But whatever advances had been made in the treatment of O. T. scripture by the Latins since the days of Origen were unhappily not perpetuated. We may see this in the *Morals* of Gregory on the Book of Job; the last great independent work of a Latin Father. Three senses of the sacred text are here recognized and pursued in separate threads; the historical and literal, the allegorical, and the moral. But the three have hardly any mutual connexion; the very idea of such a connexion is ignored. The allegorical interpretation is consequently entirely arbitrary; and the moral interpretation is, in conformity with the practice, not with the principles, of Origen, placed after the allegorical, so called, and is itself every whit as allegorical as the former. They differ only in their aims: that of the one is to set forth the history of Christ; that of the other to promote the edification of the Church by a reference of the language to the inward workings of the soul. No effort is made to apprehend the mutual relation of the different parts of the book, or the moral lessons which the course of the argument in that pre-eminently moral book was intended to bring out. Such was the general character of the interpretation which prevailed through the middle ages, during which Gregory's work stood in high repute. The mystical sense of Scripture was entirely divorced from the literal. Some guidance, however, in the paths of even the most arbitrary allegorism was found practically necessary; and this was obtained in the uniformity of the mystical sense attached to the several scriptural terms. Hence the dictionary of the allegorical meanings—partly genuine, partly conventional—of scriptural terms compiled in the 9th century by

Rabanus Maurus. An exceptional value was attached to some of the mediaeval comments on the O. T., as those of Rupert of Deutz († 1125); but in general even those which, like Gregory's *Morals*, are prized for their treasures of religious thought, are little worth as interpretations.

The first impulse to the new investigation of the literal meaning of the text of the O. T. came from the great Jewish commentators, mostly of Spanish origin, of the 11th and following centuries; Jarchi († 1105), Aben Ezra († 1167), Kimchi († 1260) and others. Following in the wake of these, the converted Jew Nicolaus of Lyre, near Evreux, in Normandy († 1341), produced his *Postille* *Perpetuae* on the Bible, in which, without denying the deeper meanings of Scripture, he justly contended for the literal as that on which they all must rest. Exception was taken to these a century later by Paul of Burgos, also a converted Jew († 1435), who upheld, by the side of the literal, the traditional interpretations, to which he was probably at heart exclusively attached. But the very arguments by which he sought to vindicate them showed that the recognition of the value of the literal interpretation had taken firm root. The Restoration of Letters helped it forward. The Reformation contributed in many ways to unfold its importance; and the position of Luther with regard to it embodied in his saying "Optimum grammaticum etiam optimum theologum esse." That grammatical scholarship is not indeed the only qualification of a sound theologian, the German commentators of the last hundred years have abundantly shown; yet where others have sown, the Church eventually reaps; and it would be ungrateful to close any historical sketch of the interpretation of the O. T. without acknowledging the immense service rendered to it by modern Germany, through the labours and learning alike of the disciples of the neologian school, and of those who have again raised aloft the banner of the faith.

In respect of the O. T. types, an important difference has prevailed among Protestant interpreters between the adherents and opponents of that school which is usually, from one of the most eminent of its representatives, denominated the Coccean, and which practically, though perhaps unconsciously, trod much in the steps of the earlier Fathers, Justin, Irenaeus, and Tertullian. Cocceus, professor at Leyden († 1669), justly maintained that a typical meaning ran throughout the whole of the Jewish scriptures; but his principle that *Scriptura significat whatever it can signify* ("quicquid potest significare"), as applied by him, opened the door to an almost boundless licence of the interpreter's theory. The arbitrariness of the Coccean interpretation provoked eventually a no less arbitrary reply; and while the authority of the N. T., as to the connexion of scriptural types could not well be set aside, it became a common principle with the English theologians of the early part of the present century, not only those persons or things were to be admitted as typical which were so expressly interpreted in Scripture—or in the N. T.—itself. With sound judgment, and not without considerable success, Fairbairn has of late years, in his *Typology of Scripture*, set the example of an investigation of the fundamental principles which govern the typical connexion of the Old Testament with the New (See, for further information, J. G. Eschen's contemptuous *Historia Interpretationis ad Typologiam Actate ad Literarum Institutionem*, 5 vols.

1795-1814; Meyer's *Gesch. der Schriftklärung seit der Wiederherstellung der Wissenschaften*, 5 vols., 1802-9; Conybeare's *Bampton Lectures*, 1824; Olshausen's little tract, *Ein Wort über tiefen Schriftsinn*, 1824; and Davidson's *Sacred Hermeneutics*, 1843.)

2. *Principles of Interpretation.*—From the foregoing sketch it will have appeared that it has been very generally recognized that the interpretation of the O. T. embraces the discovery of its literal, moral, and spiritual meaning. It has given occasion to misrepresentation to speak of the existence in Scripture of more than a single sense: rather, then, let it be said that there are in it three elements, coexisting and coalescing with each other, and generally requiring each other's presence in order that they may be severally manifested. Correspondingly too there are three portions of the O. T. in which the respective elements, each in its turn, shine out with peculiar lustre. The literal (and historical) element is most obviously displayed in the historical narrative: the moral is specially honoured in the Law, and in the hortatory addresses of the Prophets: the predictions of the Prophets bear emphatic witness to the prophetic or spiritual. Still, generally, in every portion of the O. T. the presence of all three elements may by the student of Scripture be traced. In perusing the story of the journey of the Israelites through the wilderness, he has the historical element in the actual occurrence of the facts narrated; the moral, in the warnings which God's dealings with the people and their own several disobediences convey; and the spiritual in the prefiguration by that journey, in its several features, of the Christian pilgrimage through the wilderness of life. In investigating the several ordinances of the Law relating to sacrifice, he has the historical element in the observances actually enjoined upon the Israelites; the moral in the personal unworthiness and self-surrender to God which those observances were designed to express, and which are themselves of universal interest; and the spiritual in the prefiguration by those sacrifices of the one true sacrifice of Christ. In bending his eyes on the prophetic picture of the conqueror coming from Edom, with dyed garments from Bozrah, he has the historical element in the relations subsisting between the historical Edom and Israel, supplying the language through which the anticipations of triumph are expressed; the moral element in the assurance to all the persecuted of the condemnation of the unnatural malignity wherewith those nearest of kin to themselves may have exulted in their calamities; and the spiritual, in the prophecy of the loneliness of Christ's passion and of the gloriousness of his resurrection, the strength of which, and with the signal of victory before her, the Church should trample down all spiritual foes beneath her feet. Yet again, in the greater number of the Psalms of David he has the historical element in those events of David's life which the language of the psalm reflects; the moral, in the moral connexion between righteous faith and eternal deliverance by which it is pervaded; and the spiritual, in its fore-embodiment of the struggles of Christ, in whom it finds its essential and perfect fulfilment, and by her union with whom the Christian Church still claims and appropriates the psalm

as her own. In all these cases it is requisite to the full interpretation of the O. T. that the so-called grammatico-historical, the moral, and the spiritual interpretation should advance hand in hand: the moral interpretation presupposes the grammatico-historical, the spiritual rests on the two preceding. If the question be asked, Are the three several elements in the O. T. mutually coextensive? we reply, They are certainly coextensive in the O. T., taken as a whole, and in the several portions of it, largely viewed; yet not so as that they are all to be traced in each several section. The historical element may occasionally exist alone; for, however full a history may be of deeper meanings, there must also needs be found in it connecting links to hold the significant parts of it together: otherwise it sinks from a history into a mere succession of pictures. Not to cite doubtful instances, the genealogies, the details of the route through the wilderness and of the subsequent partition of the land of Canaan, the account of the war which was to furnish the occasion for God's providential dealings with Abraham and Lot (Gen. xiv. 1-12), are obvious and simple instances of such links. On the other hand there are passages of direct and simple moral exhortation, e. g. a considerable part of the book of Proverbs, into which the historical element hardly enters: the same is the case with Psalm i., which is, as it were, the moral preface to the psalms which follow, designed to call attention to the moral element which pervades them generally. Occasionally also, as in Psalm ii., which is designed to bear witness of the prophetic import running through the Psalms, the prophetic element, though not altogether divorced from the historical and the moral, yet completely overshadows them. It is moreover a maxim which cannot be too strongly enforced, that the historical, moral, or prophetic interest of a section of Scripture, or even of an entire book, may lie rather in the general tenour and result of the whole than in any number of separate passages: e. g. the moral teaching of the book of Job lies pre-eminently not in the truths which the several speeches may contain, but in the great moral lesson to the unfolding of which they are all gradually working.

That we should use the New Testament as the key to the true meaning of the Old, and should seek to interpret the latter as it was interpreted by our Lord and His apostles, is in accordance both with the spirit of what the earlier Fathers asserted respecting the value of the tradition received from them, and with the appeals to the N. T. by which Origen defended and fortified the threefold method of interpretation. But here it is the analogy of the N. T. interpretations that we must follow; for it were unreasonable to suppose that the whole of the Old Testament would be found completely interpreted in the New. Nor, provided only a spiritual meaning of the Old Testament be in the New sufficiently recognized, does it seem much more reasonable to expect every separate type to be there indicated or explained, or the fulfilment of every prophecy noted, than it would be to expect that the N. T. should unfold the historical importance or the moral lesson of every separate portion of the O. T. history. Why indeed should we assume that a full interpretation in any single respect of the older volume would be given in another of less

\* Conybeare has introduced, and still sanctions, the use of this somewhat barbarous word. The reader will perceive how ill-suited that the term *grammatical* is

the equivalent of *literal*; being derived from *γραμμα* "letter" not from *γραμμαρ*, "grammar"

than a quarter of its bulk, the primary design of which is not expository at all, and that when the use actually made of the former in the latter is in kind so manifold? The Apostles nowhere profess to give a systematic interpretation of the O. T. The nearest approach to any such is to be found in the explanation of the spiritual meaning of the Mosaic ritual in the Epistle to the Hebrews; and even here it is expressly declared that there are many things "of which we cannot now speak particularly" (ix. 5). We may well allow that the substance of all the O. T. shadows is in the N. T. contained, without holding that the several relations between the substance and the shadows are there in each case authoritatively traced.

With these preliminary observations we may glance at the several branches of the interpreter's task.

First, then, Scripture has its outward form or body, all the several details of which he will have to explore and to analyse. He must ascertain the thing outwardly asserted, commanded, foretold, prayed for, or the like; and this with reference, so far as is possible, to the historical occasion and circumstances, the time, the place, the political and social position, the manner of life, the surrounding influences, the distinctive character, and the object in view, alike of the writers, the persons addressed, and the persons who appear upon the scene. Taken in its wide sense, the outward form of Scripture will itself, no doubt, include much that is figurative. How should it indeed be otherwise, when all language is in its structure essentially figurative? Even, however, though we should define the literal sense of words to be that which they signify in their usual acceptation, and the figurative that which they intend in another than their usual acceptation, under some form or figure of speech, still when the terms literal and figurative simply belong (to use the words of Van Mildert) "to the verbal signification, which with respect to the sense may be virtually the same, whether or not expressed by trope and figure," and when therefore it is impossible to conceive that by persons of moderate understanding any other than the figurative sense could ever have been deduced from the words employed, we rightfully account the investigation of such sense a necessary part of the most elementary interpretation. To the outward form of Scripture thus belong all metonymies, in which one name is substituted for another, *e. g.* the cause for the effect, the mouth for the word; and metaphors, in which a word is transformed from its proper to a cognate signification, *e. g.* when hardness is predicated of the heart, clothing of the soul; so also all prosopopœias, or personifications; and even all anthropomorphic and anthropopathic descriptions of God, which could never have been understood in a purely literal sense, at least by any of the right-minded among God's people. Nor would even the exclusively grammatico-historical interpreter deem it so part of his task to explain such a continued metaphor as that in Ps. lxxx. 8 *seqq.*, or such a parable as that in Is. v. 1-7, or such a fable as that in Judg. ix. 8-15. The historical element in such passages only comes out when their allegorical character is perceived; nor can it be supposed that it was ever unperceived. Still the primary allegorical meaning in such passages may itself be an allegory of something beyond, with which latter the more rudimentary interpretation is not strictly concerned. An unexpectant Jewish reader of Is. v. 1-7 might

have traced in the vineyard an image of the land of his inheritance, fenced off by its boundary heights, deserts, and sea from the surrounding territories—might have discerned in the stems the old heathen tribes that had been plucked up and off it, and in the choice vine the Israel that had been planted in their place—might have identified the tower with the city of David, as the symbol of the protecting Davidic sovereignty, and the wine-press with the Temple, where the blood of the sacrifices was poured forth, as the symbol of Israel's worship; and this without inquiring into or making of the higher blessings of which all these things were but the shadows. Yet it is not to be denied that it is difficult, perhaps impossible, to draw the exact line where the province of spiritual interpretation begins and that of historical ends. On the one hand the spiritual significance of a passage may occasionally, perhaps often, throw light on the historical element involved in it; on the other hand the very large use of figurative language in the O. T., and more especially in the prophetic, prepares us for the recognition of the yet more deeply figurative and essentially allegorical import which runs, as a *travée*, through the whole.

Yet no unhallowed or unworthy task can it ever be to study, even for its own sake, the historical form in which the O. T. comes to us clothed. It was probably to most of us one of the earliest charms of our childhood, developing in us our sense of brotherhood with all that had gone before us, leading us to feel that we were not singular in that which befell us, and therefore, correspondingly, that we could not live for ourselves alone. Even by itself it proclaims to us the historical writings of God, and reveals the care wherewith He has ever watched over the interests of His Church. Above all the history of the O. T. is the indispensable preface to the historical advent of the Son of God in the flesh. We need hardly labour to prove that the N. T. recognizes the general historical character of what the O. T. records. It is everywhere assumed. The gospel-genealogies testify to it; so too our Lord when He spoke of the desires of the prophets and righteous men of old, or of all the righteous blood shed upon the earth which should be visited upon His own generation; so too Stephen and Paul in their speeches in the council-chamber and at Antioch; so too, again, the latter, when He spoke of the things which "happened" unto the Israelites for examples. The testimonies borne by our Lord and His apostles to the outward reality of particular circumstances could be easily drawn out in array, were it needful. Of course in reference to that which is not related as plain matter of history, there will always remain the question how far the descriptions are to be viewed as *definitely* historical, how far as drawn, for a specific purpose, from the imagination. Such a question presents itself, for example, in the book of Job. It is one which must plainly be in each case decided according to the particular circumstances. Scenes which could never have any outward reality may, as in the Canticles, be made the vehicle of spiritual allegory; and yet even here the historical element meets us in the historical person of the typical bridegroom, in the various local allusions which the allegorist has introduced into his description, and in the references to the manners and customs of the age. In examining the extent of the historical element in the prophecies, both of the prophets and the Psalmists, we must distinguish between those

ich we either definitely know or may reasonably  
ame to have been fulfilled at a period not en-  
sly distant from that at which they were uttered,  
l those which reached far beyond in their pro-  
ective reference. The former, once fulfilled, were  
sueforth annexed to the domain of history (Is.  
i.; Ps. cxvii. 33). It must be observed, however,  
t the prophet often beheld in a single vision, and  
efore delineated as accomplished all at once,  
at was really, as in the case of the desolation of  
ylon, the gradual work of a long period (Is.  
.); or, as in Ezekiel's prophecy respecting the  
milation of Egypt, uttered his predictions in  
h ideal language as scarcely admitted of a literal  
filment (Ez. xxix. 8-12; see Fairbairn *in loco*).  
th the prophecies of more distant scope the case  
nd thus. A picture was presented to the pro-  
t's gaze, embodying an outward representation  
ertain future spiritual struggles, judgments,  
umpha, or blessings; a picture suggested in-  
eral by the historical circumstances of the pre-  
t (Zech. vi. 9-15; Ps. v., lxxii.), or of the past  
x. xx. 35, 36; Is. xi. 15, xlviii. 21; Ps. xcix. 8,  
q.), or of the near future, already anticipated  
l viewed as present (Is. xlix. 7-26; Ps. lvii.  
11), or of all these, variously combined, altered,  
l heightened by the imagination. But it does  
t follow that that picture was ever outwardly  
ught to pass: the local had been exchanged for  
spiritual, the outward type had merged in the  
ard reality before the fulfilment of the prophecy  
lect. In some cases, more especially those in  
ich the prophet had taken his stand upon the  
rer future, there was a preliminary and typical  
ilment, or, rather, approach to it; for it seldom,  
ver, corresponded to the full extent of the pro-  
y: the far-reaching import of the prophecy  
d have been obscured if it had. The measuring-  
ever outwardly went forth upon Garib and  
ased about to Goath (Jer. xxxi. 39) till the  
of Herod Agrippa, after our Saviour's final  
upon the literal Jerusalem had been actually  
uod; and neither the temple of Zerubbabel  
t of Herod corresponded to that which had  
held in vision by Ezekiel (xl. seq.). There  
over, as it would seem, exceptional cases  
even the outward form of the prophet's  
as was divinely drawn from the unknown  
much as from the historical circumstances  
h he was familiar, and in which, conse-  
the details of the imagery by means of  
concentrated all his conscious conceptions  
ate were literally, or almost literally,  
the events by which his prediction was  
Such is the case in Is. liii. The Holy  
ntel to the prophet the actual death-  
r Saviour as the form in which his  
that event was to be embodied; and  
e in it an approach to a literal history  
our's endurance before they came to

g the rudiments of interpretation, let  
here suffice:—The knowledge of the  
hebrew words is gathered (a) from the  
om parallel passages, (c) from the  
rpretations preserved in Jewish com-  
dictionaries, (d) from the ancient  
om the cognate languages, Chaldee,  
abic. The syntax must be almost  
l from the O. T. itself; and for the  
f the poetical books, while the im-  
udy of the Hebrew parallelism is

now generally recognized, more attention leads to  
be bestowed than has been bestowed hitherto on the  
centralism and inversion by which the poetical  
structure and language is often marked. It may  
here too be in place to mention, that of the various  
systematic treatises which have by different ge-  
erations been put forth on the interpretation of  
Scripture, the most standard work is the *Philologia  
Sacra* of Sol. Glasius (Prof. at Jena, †1656), ori-  
ginally published in 1623, and often reprinted. A  
new edition of it, "accommodated to their times,"  
and bearing the impress of the theological views of  
the new editors, was brought out by Dath: and  
Bauer, 1776-97. It is a vast storehouse of ma-  
terials; but the need of such treatises has been now  
much superseded by the special labours of more re-  
cent scholars in particular departments.)

From the outward form of the O. T. we proceed  
to its moral element or soul. It was with reference  
to this that St. Paul declared that all Scripture was  
given by inspiration of God, and was profitable for  
doctrine, for reproof, for correction, for instruction  
in righteousness (2 Tim. iii. 16); and it is in the  
implicit recognition of the essentially moral char-  
acter of the whole, that our Lord and His apostles  
not only appeal to its direct precepts (e. g. Matt.  
xv. 4; xix. 17-19), and set forth the fulness of  
their bearing (e. g. Matt. ix. 13), but also lay bare  
moral lessons in O. T. passages which lie rather be-  
neath the surface than upon it (Matt. xix. 5, 6, xxii.  
32; John x. 34, 35; Acts vi. 48, 49; 1 Cor. ix. 9,  
10; 2 Cor. viii. 13-15). With regard more particu-  
larly to the Law, our Lord shows in His Sermon on  
the Mount how deep is the moral teaching implied  
in its letter; and in His denunciation of the Pharisees,  
upbraids them for their omission of its weightier  
matters—judgment, mercy, and faith. The history  
too of the O. T. finds frequent reference made in  
the N. T. to its moral teaching (Luke vi. 3; Rom.  
iv., ix. 17; 1 Cor. x. 6-11; Heb. iii. 7-11, xi.;  
2 Pet. ii. 15-16; 1 John iii. 12). No doubt it  
was with reference to the moral instruction to be  
drawn from them that that history had been made  
to dwell at greatest length on the events of greatest  
moral importance. The same reason explains also  
why it should be to so large an extent biographical.  
The interpreter of the O. T. will have, among his  
other tasks, to analyse in the lives set before him  
the various yet generally mingled workings of the  
spirit of holiness and of the spirit of sin. He must  
not fall into the error of supposing that any of the  
lives are those of perfect men; Scripture nowhere  
asserts or implies it, and the sins of even the best  
testify against it. Nor must he expect to be ex-  
pressly informed of each recorded action, any more  
than of each sentiment delivered by the several  
speakers in the book of Job, whether it were com-  
mendable or the contrary; nor must we assume, as  
some have done, that Scripture identifies itself with  
every action of a saintly man which, without openly  
condemning, it records. The moral errors by which  
the lives of even the greatest O. T. saints were dis-  
figured are related, and that for our instruction,  
but not generally criticized: e. g. that of Abraham  
when, already once warned in Egypt, he suffered  
the king of Gerar to suppose that Sarah was merely  
his sister; or that of David, when, by feigning  
himself mad, he practised deceit upon Achish. The  
interpreter of Scripture has no warrant for shutting  
his eyes to such errors; certainly not the warrant  
of David, who himself virtually counselled them in  
Ps. xxi. (see especially ver. 13). He must so-

knowledge and commend the holy faith which lay at the root of the earliest recorded deeds of Jacob, a faith rewarded by his becoming the heir of God's promises; but he must no less acknowledge and condemn Jacob's unbrotherly deceit and filial disobedience, offences punished by the sorrows that attended him from his flight into Mesopotamia to the day of his death. And should he be tempted to desire that in such cases the O. T. had distinguished more directly and authoritatively the good from the evil, he will ask, Would it in that case have spoken as effectually? Are not our thoughts more drawn out, and our affections more engaged, by studying a man's character in the records of his life than in a summary of it ready prepared for us? Is it in a dried and labelled collection of specimens, or in a living garden where the flowers have all their several imperfections, that we best learn to appreciate the true beauties of floral nature? The true glory of the O. T. is here the choice richness of the garden into which it conducts us. It sets before us just those lives—the lives generally of religious men—which will best repay our study, and will most strongly suggest the moral lessons that God would have us learn; and herein it is that, in regard of the moral aspects of the O. T. history, we may most surely trace the overruling influence of the Holy Spirit by which the sacred historians wrote.

But the O. T. has further its spiritual and therefore prophetic element, the result of that organic unity of sacred history by means of which the same God who in His wisdom delayed, till the fulness of time should be come, the advent of His Son into the world, ordained that all the career and worship of His earlier people should outwardly anticipate the glories of the Redeemer and of His spiritually ransomed Church. Our attention is here first attracted to the avowedly predictive parts of the O. T., of the prospective reference of which, at the time that they were uttered, no question can exist, and the majority of which still awaited their fulfilment when the Redeemer of the world was born. No new covenant had up to that time been inaugurated (Jer. xxxi. 31-40); no temple built corresponding to that which Ezekiel had described (xl. seq.); nor had the new David ere that arisen to be a prince in Israel (ib. xxxiv.). With Christ then the new era of the fulfilment of prophecy commenced. In Him were to be fulfilled all things that were written in the Law of Moses, and in the Prophets, and in the Psalms, concerning Him (Luke xxiv. 44; cf. Matt. xxvi. 54, &c.). A marvellous amount there was in His person of the verification of the very letter of prophecy—partly that it might be seen how definitely all had pointed to Him; partly because His outward mission, up to the time of His death, was out to the lost sheep of the house of Israel, and the letter had not yet been finally superseded by the spirit. Yet it would plainly be impossible to suppose that the significance of such prophecies as Zech. ix. 9 was exhausted by the mere outward verification; and with the delivery of Christ by His own people to the Gentiles, and the doom on the city of Jerusalem for rejecting Him, and the ratification of the new covenant by His death, and the subsequent mission of the apostles to all nations, all consummated by the final blow which fell within forty years on the once chosen people of God, the outward blessings had merged for ever in the spiritual, and the typical Israelitish nation in the Church Universal.

Hence the entire substance of the O. T. of any

recognition, by either Christ or His apostles, of *our* prospective outward glories as the prophecies, literally interpreted, would still have implied. *Not* of outward restoration mingled with the annals of outward doom which Christ uttered forth on the nation from which He Himself had sprung (Matt. xxi. 43, xxiii. 38, xxiv. 2; no old outward deliverance with the spiritual salvation which He and His apostles declared to be still in store for those of the race of Israel who should believe on Him (Matt. xxiii. 39; Acts iii. 19-21; Rom. xi. 1; 2 Cor. vi. 16). The language of the ancient prophecies is everywhere applied to the gathering together, the privileges, and the triumphs of the universal body of Christ (John x. 16, xi. 52; Acts ii. 39, ix. 15-17; Rom. ix. 25, 26, 32, 33, x. 11, 13, v. 22, 26, 27; 2 Cor. vi. 16-18; Gal. iv. 27; 1 Pet. ii. 4-6, 10; Rev. iii. 7, 8, xi. 8, 9, xii. xiii.; above all, in the crowning passage of the apostolic interpretation of O. T. prophecy (Heb. xii. 27), in which the Christian Church is distinctly marked out as the Zion of whose glory all the prophets had spoken. Even apart, however, from the authoritative interpretation thus placed upon them, the prophecies contain within themselves, in sufficient measure, the evidence of their spiritual import. It would not be that the literal Zion should be greatly raised a physical height (Is. ii. 2), or all the Holy Land levelled to a plain (Zech. xiv. 10), or partitioned off by straight lines and in rectangles, without regard to its physical conformation (Ez. xli.); or that the city of Jerusalem should lie to the south of the Temple (ib. xl. 2), and at a distance of five miles from it (ib. xlv. 6), and yet that it should occupy its old place (Jer. xxi. 38, 39; Zech. iii. 10); or that holy waters should issue from Jerusalem, increasing in depth as they roll on, not through the accession of any tributary streams, but simply because their source is beneath the sanctuary (Ez. xlvii.). Nor could it well be that, after a long line of genealogies and title-deeds, the Jews should be reorganized in their tribes and families (Zech. vi. 12-14; Mal. iii. 3; Ez. xlv. 15, xlvii.), and settled after their old estates (Ez. xxxvi. 11). No again, that all the inhabitants of the world should go up to Jerusalem to worship, not only in the festivals (Zech. xiv. 16), but even monthly and weekly (Is. lxvi. 23), and yet that while Jerusalem were thus the seat of worship for the whole world, there should also be altars everywhere (Is. xix. 19; Zeph. ii. 11; Mal. i. 11), both being really but different expressions of the same spiritual truth—the extension of God's pure worship to all nations. Nor can we suppose that Jews will ever again outwardly triumph over heathen nations that have long disappeared from the stage of history (Acts ii. 11, 12; Is. xi. 14; Mic. v. 5; Ob. 17-21). Nor will sacrifices be renewed (Ez. xlviii. &c.) when Christ has by one offering perfected for ever them that are sanctified; nor will a special sanctity yet attach to Jerusalem, when the hour is come that "neither in this mountain nor yet at Jerusalem" shall men worship the Father; nor yet to the natural Israel (cf. Joel ii. 4), when in Christ there is neither Jew nor Greek, all believers being one alike the circumcision (Phil. iii. 3) and Abraham's seed (Gal. iii. 29), and the name Israel being frequently used in the N. T. of the whole Christian Church (Matt. xix. 28; Luke xxii. 30; Rom. ix. 24; Gal. vi. 16; cf. Rev. vii. 4, xii. 12).

The substance therefore of these prophecies is the glory of the Redeemer's spiritual kingdom; and

but the form that is derived from the outward circumstances of the career of God's ancient people, which had passed, or all but passed, away before the fulfilment of the promised blessings commenced. The one kingdom was indeed to merge into rather than to be violently replaced by the other; the holy seed of old was to be the stock of the new generation; men of all nations were to take hold of the skirt of the Jew, and Israelitish apostles were to become the patriarchs of the new Christian community. Nor was even the form in which the announcement of the new blessings had been clothed to be rudely cast aside: the imagery of the prophets is on every account justly dear to us, and from love, no less than from habit, we still speak the language of Canaan. But then arises the question, Must not this language have been divinely designed from the first as the language of God's Church? Is it easily to be supposed that the prophets, whose writings form so large a portion of the Bible, should have so extensively used the history of the old Israel as the garment wherein to envelop their delineations of the blessings of the new, and yet that that history should not be in itself essentially an anticipation of what the promised Redeemer was to bring with him? Besides, the typical import of the Israelitish tabernacle and ritual worship is implied in Heb. ix. ("The Holy Ghost this signifying"), and is almost universally allowed; and it is not easy to tear asunder the events of Israel's history from the ceremonies of Israel's worship; nor yet, again, the events of the preceding history of the patriarchs from those of the history of Israel. The N. T. itself implies the typical import of a large part of the O. T. narrative. The original dominion conferred upon man (1 Cor. xv. 27; Heb. ii. 8), the rest of God on the seventh day (Heb. iv. 4), the institution of marriage (Eph. v. 31), are in it all invested with a deeper and prospective meaning. So also the offering and martyrdom of Abel (Heb. xi. 4, xii. 24); the preservation of Noah and his family in the ark (1 Pet. iii. 21); the priesthood of Melchizedek (Heb. vii., following Ps. cx. 4); the mutual relation of Sarah and Hagar, and of their children (Gal. iv. 22, seqq.); the offering and rescue of Isaac (Rom. viii. 32; Heb. xi. 19); the favour of God to Jacob rather than Esau (Rom. ix. 10-13, following Mal. i. 2, 3); the sojourn of Israel in Egypt (Matt. ii. 15); the passover feast (1 Cor. v. 7, 8); the shepherdship of Moses (Heb. xiii. 20, cf. Is. lxxiii. 11, Sept.); his veiling of his face at Sinai (2 Cor. iii. 13); the ratification of the covenant by blood (Heb. ix. 18, seqq.); the priestly character of the chosen people (1 Pet. ii. 9); God's outward presence with them (2 Cor. vi. 16); the various events in their pilgrimage through the desert (1 Cor. x.), and specially the eating of manna from heaven (Matt. iv. 4; John vi. 48-51); the lifting up of the brazen serpent (John iii. 14); the promise of the divine presence with Israel after the removal of Moses, their shepherd, from them (Heb. xii. 5, cf. Deut. xxxi. 6); the kingdom of David (Luke i. 32, 33); and the devouring of Jonah (Matt. xii. 40). If some of these instances be doubted, let at least the rest be duly weighed, and this not without regard to the cumulative force of the whole. In the O. T. itself we have, and this even in the latest times, events and persons expressly treated as typical: e. g. the once-rejected stone the headstone of the corner, probably a historical incident in the laying of the foundation of the second Temple, Ps. cxviii.

22); the arraying of Joshua the high priest with fair garments (Zech. iii.), and the placing of crowns on his head to symbolize the union of royalty and priesthood (Zech. vi. 9, seqq.). A further testimony to the typical character of the history of the Old Testament is furnished by the typical character of the events related even in the New. All our Lord's miracles were essentially typical, and are almost universally so acknowledged: the works of mercy which He wrought outwardly on the body betokening His corresponding operations within man's soul. So too the outward fulfilments of prophecy in the Redeemer's life were types of the deeper though less immediately striking fulfilment which it was to continue to receive ideally; and if this deeper and more spiritual significance underlie the literal narrative of the New Testament, how much more that of the Old, which was so essentially designed as a preparation for the good things to come! A remarkable and honourable testimony on this subject was borne in his later years by De Wette. "Long before Christ appeared," he says, "the world was prepared for His appearance: the entire O. T. is a great prophecy, a great type of Him who was to come, and did come. Who can deny that the holy seers of the O. T. saw, in spirit, the advent of Christ long beforehand, and in prophetic anticipations of greater or less clearness had presages of the new doctrine? The typological comparison too of the Old Testament with the New was no mere play of fancy; and it is scarcely altogether accidental that the evangetic history, in the most important particulars, runs parallel with the Mosaic" (cited by Tholuck, *The Old Testament in the New*).

It is not unlikely that there is in many quarters an unwillingness to recognize the spiritual element in the historical parts of the O. T., arising from the fear that the recognition of it may endanger that of the historical truth of the events recorded. Nor is such danger altogether visionary; for one-sided and prejudiced contemplation will be ever so abusing one element of Scripture as thereby to cast a slight upon the rest. But this does not affect its existence; and on the other hand there are certainly cases in which the spiritual element confirms the outward reality of the historical fact. So is it with the devouring of Jonah; which many would consign to the region of parable or myth, not apparently from any result of criticism, which is indeed at a loss to find an origin for the story save in fact, but simply from the unwillingness to give credit to an event the extraordinary character of which must have been patent from the first. But if the divine purpose were to prefigure in a striking and effective manner the passage of our Saviour through the darkness of the tomb, how could any ordinary event, akin to ordinary human experience, adequately represent that of which we have no experience? The utmost perils of the royal psalmist required, in Ps. xviii., to be heightened and compacted together by the aid of extraneous imagery in order that they might typify the horrors of death. Those same horrors were more definitely prefigured by the incarceration of Jonah: it was a marvellous type, but not more marvellous than the antitype which it foreshadowed: it testified by its very wonderfulness that there are gloomy terrors beyond any of which this world supplies the experience, but over which Christ should triumph, as Jonah was delivered from the belly of the fish.

Of another danger besetting the path of the spiritual interpreter of the O. T., we have a warning

in the unedifying puerilities into which some have fallen. Against such he will guard by forgoing too curious a search for mere external resemblances between the Old Testament and the New, though withal thankfully recognizing them wherever they present themselves. His true task will be rather to investigate the inward ideas involved in the O. T. narratives, institutions, and prophecies themselves, by the aid of the more perfect manifestation of those ideas in the transactions and events of gospel-times. The spiritual interpretation must rest upon both the literal and the moral; and there can be no spiritual analogy between things which have nought morally in common. One consequence of this principle will of course be, that we must never be content to rest in any mere outward fulfilment of prophecy. It can never, for example, be admitted that the ordinance respecting the atonement of the passover-lamb had reference *merely* to the preservation of our Saviour's legs unbroken on the cross, or that the concluding words of Zech. ix. 9, pointed *merely* to the animal on which our Saviour should outwardly ride into Jerusalem, or that the sojourn of Israel in Egypt, in its evangelic reference, had respect *merely* to the temporary sojourn of our Saviour in the same country. However remarkable the outward fulfilment be, it must always guide us to some deeper analogy, in which a moral element is involved. Another consequence of the foregoing principle of interpretation will be that that which was forbidden or sinful can, so far as it was sinful, not be regarded as typical of that which is free from sin. We may, for example, reject, as altogether groundless, the view, often propounded, but never proved, that Solomon's marriage with Pharaoh's daughter was a figure of the reception of the Gentiles into the Church of the Gospel. On the other hand there is no more difficulty in supposing that that which was sinful may have originated the occasion for the exhibition of some striking type, than there is in believing that disobedience brought about the need of redemption. The Israelites sinned in demanding a king; yet the earthly kingdom of David was a type of the kingdom of Christ: and it was in consequence of Jonah's fleeing, like the first Adam, from the presence of the Lord, that he became so signal a type of the second Adam in his three days' removal from the light of heaven. So again that which was tolerated rather than approved may contain within itself the type of something imperfect, in contrast to that which is more perfect. Thus Hagar, as the concubine of Abraham, represented the covenant at Sinai; but it is only the bondage-aspect of that covenant which here comes directly under consideration, and the children of the covenant, symbolized by Ishmael, are those only who cleave to the element of bondage in it.

Yet withal, in laying down rules for the interpretation of the O. T., we must abstain from attempting to define the limits, or to measure the extent of its fulness. That fulness has certainly not yet been, nor will by us be, exhausted. Search after truth, and reverence for the native worth of the written Word, authorize us indeed to reject past interpretations of it which cannot be shown to rest on any solid foundation. Still all interpretation is essentially progressive; and in no part of the O. T. can we tell the number of meanings and bearings, beyond those with which we are ourselves familiar, which may one day be brought out, and which then not only may approve themselves by their intrinsic reasonableness, but even say by their mutual har-

mony an practical interest furnish additional evidence of the divine source of that Scripture which cannot be broken.

### C. QUOTATIONS FROM THE OLD TESTAMENT IN THE NEW TESTAMENT.

The New Testament quotations from the Old form one of the outward bonds of connexion between the two parts of the Bible. They are manifold in kind. Some of the passages quoted contain prophecies, or involve types of which the N. T. writers designed to indicate the fulfilment. Others are introduced as direct logical supports to the doctrine which they were enforcing. In all cases which can be clearly referred to either of these categories, we are fairly warranted in deeming the use which has been made of the older text authoritative; and from these, and especially from an analysis of the quotations which at first sight present difficulties, we may study the principles on which the sacred application and exegesis of the older scriptures has proceeded. Let it only be borne in mind that however just the interpretations virtually placed upon the passages quoted, they do not profess to be *exhaustively* complete. The contrary is indeed manifest from the two opposite bearings of the same passage, Ps. xxiv. 1, brought out by St. Paul in the course of a few verses, 1 Cor. i. 26, 28. But in many instances also the N. T. writers have quoted the O. T. rather by way of illustration, than with the intention of leaning upon it; variously applying and adapting it, and making its language the vehicle of their own independent thoughts. It could hardly well be otherwise. The thoughts of all who have been deeply educated in the Scriptures naturally move in scriptural diction: it would have been strange had the writers of the N. T. formed exceptions to the general rule.

It may not be easy to distribute all the quotations into their distinctive classes. But among those in which a prophetic or typical force is ascribed in the N. T. to the passage quoted, may fairly be reckoned all that are introduced with an intimation that the Scripture was "fulfilled." And it may be observed that the word "fulfil," as applied to the accomplishment of what had been predicted or foreshadowed, is in the N. T. only used by our Lord Himself and His companion-apostles; not by St. Mark nor St. Luke, except in their reports of our Lord's and Peter's sayings, nor yet by St. Paul (Mark xv. 28, is not genuine). It had grown familiar to the original apostles from the constant verification of the O. T. which they had beheld in the events of their Master's career. These had testified to the deep connexion between the promises of the O. T. and the realities of the Gospel; and, through the general connexion in turn casting down its radiance on the individual points of contact, the higher term was occasionally applied to express a relation for which, viewed merely in itself, weaker language might have sufficed. Three "fulfillments" of Scripture are traced by St. Matthew in the incidents of our Saviour's infancy (ch. 15, 18, 23). He beheld Him marked out as the true Israel, the beloved of God with high destiny before Him, by the outward correspondence between His and Israel's sojourn in Egypt. The sorrowing of the mothers of Bethlehem for their children was to him a renewal of the grief for the captives at Hamah, which grief Jeremiah had described in language suggested by the record of the patriarchal grief for the loss of Joseph: it was thus a present token (we need account

it no more) of the spiritual captivity which all outward captivities recalled, and from which, since it had been declared that there was hope in the end, Christ was to prove the deliverer. And again, Christ's sojourn in despised Nazareth, was an outward token of the lowliness of his condition; and if the prophets had rightly spoken, this lowliness was the necessary prelude, and therefore, in part, the pledge of his future glory. In the first and last of these cases the evangelist, in his wonted phrase, expressly declares that the events came to pass that which was spoken "might be fulfilled:" language which must not be arbitrarily softened down. In the other case the phrase is less definitely strong: "Then was fulfilled," &c. The substitution of this phrase can, however, of itself decide nothing, for it is used of an acknowledged prophecy in xxvii. 9. And should any be disposed on other grounds to view the quotation from Jer. xxxi. 15, merely as an adornment of the narrative, let them first consider whether the evangelist, who was occupied with the history of Christ, would be likely formally to introduce a passage from the O. T. merely as an illustration of material grief.

In the quotations of all kinds from the Old Testament in the New, we find a continual variation from the letter of the older Scriptures. To this variation three causes may be specified as having contributed.

First, all the N. T. writers quoted from the Septuagint; correcting it indeed more or less by the Hebrew, especially when it was needful for their purpose; occasionally deserting it altogether; still abiding by it to so large an extent as to show that it was the primary source whence their quotations were drawn. Their use of it may be best illustrated by the corresponding use of our liturgical version of the Psalms; a use founded on love as well as on habit, but which nevertheless we forgo when it becomes important that we should follow the more accurate rendering. Consequently, when the errors involved in the Septuagint version do not interfere with the purpose which the N. T. writer had in view, they are frequently allowed to remain in his quotation: see Matt. xv. 9 (a record of our Lord's words); Luke iv. 18; Acts xiii. 41, xv. 17; Rom. xv. 10; 2 Cor. iv. 13; Heb. viii. 9, x. 5, xi. 21.

The current of apostolic thought too is frequently dictated by words of the Septuagint, which differ much from the Hebrew: see Rom. ii. 24; 1 Cor. xv. 55; 2 Cor. ix. 7; Heb. xiii. 15. Or even an *unintended* interpolation of the Septuagint is quoted, Heb. i. 6 (Deut. xxxii. 43). On the other hand, in Matt. xxi. 5; 1 Cor. iii. 19, the Septuagint is corrected by the Hebrew: so too in Matt. ix. 13; *ke* xiii. 37, there is an effort to preserve an *resemblance* of the Hebrew which the Septuagint *lost*; and in Matt. iv. 15, 16; John xix. 37; 1 *xv. 54*, the Septuagint disappears altogether. *Rom. ix. 33*, we have a quotation from the Septuagint combined with another from the Hebrew. Mark xii. 30; Luke x. 27; Rom. xii. 19, the Septuagint and Hebrew are superadded the one to the other. In the Epistle to the Hebrews, *ab in this respect* stands alone, the Septuagint is *formally* followed; except in the one remarkable *variation*. Heb. x. 40, which, according neither with the Hebrew nor the Septuagint, was probably derived from the last-named passage, Rom. xii. 19, where it exactly coincides. The quotation in 1 Cor. *to* seems to have been derived not directly from the O. T., but rather from a Christian liturgy or

other document into which the language of Is. lxi. 4, had been transferred.

Secondly, the N. T. writers must have frequently quoted from memory. The O. T. had been deeply instilled into their minds, ready for service, whenever needed; and the fulfilment of its predictions which they witnessed, made its utterances rise up in life before them: cf. John ii. 17, 22. It was of the very essence of such a living use of O. T. scripture that their quotations of it should not of necessity be verbally exact.

Thirdly, combined with this, there was an alteration of conscious or unconscious design. Sometimes the object of this was to obtain increased force: hence the variation from the original in the form of the divine oath, Rom. xiv. 11; or the result "I quike," substituted for the cause, Heb. xii. 21; or the insertion of rhetorical words to bring out the emphasis, Heb. xii. 26; or the change of person to show that what men perpetrated had its root in God's determinate counsel, Matt. xvi. 31. Sometimes an O. T. passage is abridged, and in the abridgment so adjusted, by a little alteration, as to present an aspect of completeness, and yet omit what is foreign to the immediate purpose, Acts i. 20; 1 Cor. i. 31. At other times a passage is enlarged by the incorporation of a passage from another source: thus in Luke iv. 18, 19, although the contents are professedly those read by our Lord from Is. lxi., we have the words "to set at liberty them that are bruised," introduced from Is. lviii. 6 (Sept.); similarly in Rom. xi. 8, Deut. xxix. 4 is combined with Is. xxix. 10. In some cases still greater liberty of alteration is assumed. In Rom. x. 11, the word *was* is introduced into Is. xlviii. 16, to show that that is uttered of Jew and Gentile alike. In Rom. xi. 26, 27, the "to Zion" of Is. lix. 20 (Sept. *ἐπὶ τὴν Σιών*) is replaced by "out of Zion" (suggested by Is. ii. 3): to Zion the Redeemer had already come; from Zion, the Christian Church, His law was to go forth; or even from the literal Jerusalem, cf. Luke xxiv. 47; Rom. xv. 19, for, till she was destroyed, the type was still in a measure kept up. In Matt. viii. 17, the words of Is. liii. 4 are adapted to the divine removal of disease, the outward token and witness of that sin which Christ was eventually to remove by His death, thereby fulfilling the prophecy more completely. For other, though less striking, instances of variation, see 1 Cor. xiv. 21; 1 Pet. iii. 15. In some places again, the actual words of the original are taken up, but employed with a new meaning: thus the *ἐρχόμενος*, which in Hab. ii. 3 merely qualified the verb, is in Heb. x. 37 made the subject to it.

Almost more remarkable than any alteration in the quotation itself, is the circumstance that in Matt. xxvii. 9, Jeremiah should be named as the author of a prophecy really delivered by Zechariah: the reason being, as has been well shown by Hengstenberg in his Christology, that the prophecy is based upon that in Jer. xviii., xix., and that without a reference to this original source the most essential features of the fulfilment of Zechariah's prophecy would be misunderstood. The case is indeed not entirely unique; for in the Greek of Mark i. 2, 3, where Mal. iii. 1 is combined with Is. xl. 3, the name of Isaiah alone is mentioned: it was on his prophecy that that of Malachi partly depended. On the other hand in Matt. ii. 25, John vi. 45, the comprehensive mention of the prophets indicates a reference not only to the passages

• The expression of the text denotes that this was a known and frequented spot for devotion. The Talmudists say that it was the place at which the Ark and Tabernacle were first caught sight of in approaching Jerusalem over the Mount. Spots from which a sanctuary is visible are still considered in the East as themselves sacred. (See

times—it must have seemed for the last time—and took his farewell of the city, “with many tears, as one who had lost his kingdom.” He then turned the summit, and after passing Bahurim, probably about where Bethany now stands, continued the descent through the “dry and thirsty land” until he arrived “weary” at the bank of the river (Joseph. *Ant.* vii. 9, §2-6; 2 Sam. xvi. 14, xvii. 21, 22).

This, which is the earliest mention of the Mount of Olives, is also a complete introduction to it. It stands forth, with every feature complete, almost as if in a picture. Its nearness to Jerusalem—the ravine at its foot—the olive-tree at its base—the steep road through the trees to the summit—the remarkable view from thence of Zion and the city, spread opposite and almost seeming to rise towards the spectator—the very “stones and dust” of the rugged and sultry descent—all are caught, nothing essential is omitted.

The remaining references to it in the Old Testament are but slight. The “high places” which Solomon constructed for the gods of his numerous wives, were in the mount “facing Jerusalem” (1 K. xi. 7)—an expression which applies to the Mount of Olives only, as indeed all commentators apply it. Modern tradition (see below) has, after some hesitation, fixed the site of these sanctuaries on the most southern of the four summits into which the whole range of the mount is divided, and therefore far removed from that principal summit over which David took his way. But there is nothing in the O. T. to countenance this, or to forbid our believing that Solomon adhered to the spot already consecrated in the time of his father. The reverence which in our days attaches to the spot on the very top of the principal summit, is probably only changed in its object from what it was in the time of the kingdom of Judah.

During the next four hundred years we have only the brief notice of Josiah's iconoclasm at this spot. Ahaz and Manasseh had no doubt maintained and enlarged the original traditions of Solomon. These Josiah demolished. He “defiled” the high places, broke to pieces the uncouth and obscene symbols which deformed them, cut down the images, or possibly the actual groves, of Ashtaroth, and effectually disqualified them for worship by filling up the cavities with human bones (2 K. xxiii. 13, 14). Another two hundred years and we find a further mention of it—this time in a thoroughly different connexion. It is now the great repository for the vegetation of the district, planted thick with olive, and the hushy myrtle, and the feathery palm. “Go out” of the city “into the mount”—was the command of Ezra for the celebration of the first anniversary of the Feast of Tabernacles after

the Return from Babylon—“and fetch olive-leaf and oil-tree branches, and myrtle-branches, palm-leaves, and branches of thick trees to booths, as it is written” (Neh. viii. 15).

The cultivated and umbigeous character is implied in this description, as well as in the of the mount, it retained till the N. T. Capimatha, Bethphage, Bethany, all names of on the mount, and all derived from some vegetation, are probably of late origin, earliest late mention. True, the “palm-branches” by the crowd who flocked out of Jerusalem to welcome the “Prophet of Nazareth,” were taken from the city (John xii. 13)—not from the gardens of the Temple (Ps. xvi. 12) but the boughs which they stemmed on the way before Him, were cut or torn down from the olive trees which shadowed the road round it.

At this point in the history it will be necessary to describe the situation and appearance of the Mount of Olives. It is not so much a ridge, as a slope, of rather more than a mile in length running in general direction north and south, the whole eastern side of the city, and rising from the bare, waste, uncultivated plain the “wilderness”—which lies beyond it, up the space between the Mount of Olives and the Dead Sea. At its north end the ridge bends to the west, so as to form an enclosure to the city on that side also. But there is this difference, whereas on the north a space of nearly a mile of tolerably level surface intervenes between the city and the rising ground, on the east the mount is close to the walls, parted only by a narrow ravine of the Kidron, which from the city itself seems no parting of the Golden Gateway, or the Gate of St. Stephen, by a sudden and steep declivity, and so near the bed of the valley reached than you can almost perceive the ascent of Olivet. So great is the effect of this proximity, that, partly from that, and partly from the extreme clearness of the air, a space from the western part of Jerusalem may be seen to rise immediately from the side of the Kidron (Porter, *Handb.* 105a; also Stanley, *p.* 117).

It is this portion which is the real Mount of Olives of the history. The northern part, which is probably Nob, Mizpah, and Scepse, and is geologically continuous, a distinct mountain of the so-called Mount of Evil Counsel, being west of the Coenaculum, is too distant and too completely isolated by the trench of the Kidron to bear the name. We will therefore confine ourselves to this portion. In general height it is not far above the city: 300 feet higher than the Temple mount,<sup>1</sup> hardly more than half above the level

the citations in Lightfoot on Luke xxiv. 50; and compare Mitzpah, ii. 329, note.) It is worthy of remark that the expression is “where they worshipped God,” not Jehovah: as if it were one of the old sanctuaries of Elohim, like Bethel or Moreh.

<sup>1</sup> Ps. lxxiii.—by its title and by constant tradition—is referred to this day. The word rendered “thirsty” in ver. 1 is the same as that rendered “weary” in 2 Sam. xvi. 14—*חָיָה*.

<sup>2</sup> The author of the Targum Pseudo-jonathan introduces it still earlier. According to him, the olive-leaf which the dove brought back to Noah was plucked from it.

<sup>3</sup> It must be remembered that the mount had not yet acquired its now familiar name. All that is said is that David “ascended by the ascent of the olives.”

<sup>4</sup> At Bahurim, while David and his men lay down, Shimei scrambled along the slope of the mountain above, even with him, and threw stones at him, and covered him with dust (xvi. 13).

<sup>5</sup> See MIZPAH, vol. ii. 329.

<sup>6</sup> The following are the elevations of the region (above the Mediterranean), according to Dr. Velde (*Memoir*, 179):—

Mount of Olives (Church of Ananias)	750
“Zion” (the Coenaculum)	550
“Moriah” (Barren area)	520
N.W. corner of city	450
Valley of Kidron (Bethesda)	350
Do.	300
Bethany	250
Jordan	200

is to some extent made up for by a nity which exaggerates its height, side next to it.

"ridge" has been used above as the de for an eminence of some length, but that word is hardly accurate. "ridge-like" in the appearance of Olives, or of any other of the limestone district of Palestine; all is rounded, regular in form. At a distance its horizontal, gradually sloping away end; but when approached, and seen from below the eastern wall divides itself into three, or rather independent summits or eminences.

N. to S. these occur in the following, or Viri Galilaei; Mount of the phets, subordinate to the last, and it; Mount of Offence.

he central one, distinguished by the nes of the Church of the Ascension, the most important. The church, met of wretched hovels which sur- *K'fr et-Tûr*—are planted slightly ide of the actual top, but not so far ie being seen from all parts of the s of the mountain, or, in their turn, view of the deepest recesses of the Porter, *Handb.* 103). Three paths valley to the summit. The first s of the path which descends from s Gate to the tomb of the Virgin—the north wall of the enclosure of d follows the line of the depression ntre and the northern hill. The m the first about 50 yards beyond d striking off to the right up the he hill, surmounts the projection on ditional spot of the Lamentation over thence proceeds directly upwards to is is rather shorter than the former; er hand, it is much steeper, and the y toilsome and difficult. The third two at the N.E. corner of Geth- uking a considerable detour to the so-called "Tombs of the Prophets," very slight depression which occurs the mount, arrives in its turn at

ree paths the first, from the fact the natural shape of the ground, is, older than the others, which deviate rtain artificial objects. Every con- favour of its being the road taken flight. The second—having probably the convenience of reaching a spot of which is comparatively modern—not recent.

hill, which we are now considering.

atal-gur has been compiled from Qua- and Mislin. The last of these works, sion to accuracy, is very inaccurate. nes to other works are occasionally

purports to contain the sites of some of the most sacred and impressive events of Christian history. During the middle ages most of these were protected by an edifice of some sort; and to judge from the reports of the early travellers, the mount must at one time have been thickly covered with churches and convents. The following is a complete list of these, as far as the writer has been able to ascertain them.

1. Commencing at the Western foot, and going gradually up the Hill.\*

\*Tomb of the Virgin: containing also those of Joseph, Joachim, and Anna.

Gethsemane: containing

Olive garden.

\*Cavern of Christ's Prayer and Agony.

(A Church here in the time of Jerome and Willibald.)

Rock on which the 3 disciples slept.

\*Place of the capture of Christ. (A Church in the time of Bernard the Wise.)

Spot from which the Virgin witnessed the stoning of St. Stephen.

Do. at which her girdle dropped during her Assumption.

Do. of our Lord's Lamentation over Jerusalem, Luke xix. 41. (A Church here formerly, called *Dominus flevit*; Surius, in Mialin, ii. 476.)

Do. on which He first said the Lord's Prayer, or wrote it on the stone with His finger (Saeuwulf, *E. Tr.* 42). A splendid Church here formerly. Maundeville seems to give this as the spot where the Beatitudes were pronounced (*E. Tr.* 177).

Do. at which the woman taken in adultery was brought to Him (Bernard the Wise, *E. Tr.* 28).

\*Tombs of the Prophets (Matt. xxiii. 29): containing, according to the Jews, those of Haggai and Zechariah.

Cave in which the Apostles composed the Creed: called also Church of St. Mark or of the 12 Apostles.

Spot at which Christ discoursed of the Judgment to come (Matt. xxiv. 3).

Cave of St. Pelagia: according to the Jews, sepulchre of Huldah the Prophetess.

\*Place of the Ascension. (Church, with subsequently a large Augustine convent attached.)

Spot at which the Virgin was warned of her death by an angel. In the valley between the Ascension and Viri Galilaei (Maundeville, 177, and so Doubdan); but Maundell (*E. Tr.* 470) places it close to the cave of Pelagia.

Viri Galilaei. Spot from which the Apostles watched the Ascension: or at which Christ first appeared to the 3 Maries after His Resurrection (Tobler, 76 note).

2. On the East side, descending from the Church of the Ascension to Bethany.

The field in which stood the fruitless fig-tree.

Bethphage.

Bethany: House of Lazarus. (A Church there in Jerome's time; *Lib. de Situ, &c.* "Bethania.")

\*Tomb of Lazarus.

\*Stone on which Christ was sitting when Martha and Mary came to Him.

\* Plenary Indulgence is accorded by the Church of Rome to those who recite the Lord's Prayer and the Ave Maria at the spots marked thus (\*).

The majority of these sacred spots now command little or no attention; but three still remain, sufficiently sacred—if authentic—to consecrate any place. These are: 1. Gethsemane, at the foot of the mount. 2. The place of the Lamentation of our Saviour over Jerusalem, half-way up; and 3. The spot from which He ascended, on the summit.

(1.) Of these, Gethsemane is the only one which has any claim to be authentic. Its claims, however, are considerable; they are spoken of elsewhere.

(2.) The first person who attached the Ascension of Christ to the Mount of Olives seems to have been the Empress Helena (A.D. 325). Eusebius (*Vit. Const.* iii. §43) states that she erected as a memorial of that event "a sacred house" of assembly on "the highest part of the mount, where there was a cave which a sure tradition (*ἀόριος ἀληθής*) testified to be that in which the Saviour had imparted mysteries to His disciples. But neither this account, nor that of the same author (Euseb. *Demonst. Evang.* vi. 18) when the cave is again mentioned, do more than name the Mount of Olives, generally, as the place from which Christ ascended: they fix no definite spot thereon. Nor does the Bourdeaux Pilgrim, who arrived shortly after the building of the church (A.D. 333), know anything of the exact spot. He names the Mount of Olives as the place where our Lord used to teach His disciples; mentions that a basilica of Constantine stood there . . . he carefully points out the Mount of Transfiguration in the neighbourhood (!) but is silent on the Ascension. From this time to that of Arculf (A.D. 700) we have no information, except the casual reference of Jerome (A.D. 390), cited below. In that immense interval of 370 years, the basilica of Constantine or Helena had given way to the round church of Modestus (Tobler, 92 note), and the tradition had become firmly established. The church was open to the sky "because of the passage of the Lord's body," and on the ground in the centre were the prints of His feet in the dust (*pulvere*). The cave or spot hallowed by His preaching to His disciples appears to have been moved off to the north of Bethany (*Early Travels*, 8).

Since that day many changes in detail have occurred: the "dust" has given way to stone, in which the print of first one, then two feet, was recognized,\* one of which by a strange fate is said now to rest in the Mosk of the Aksa.† The buildings too have gone through alterations, additions, and finally losses, which has reduced them to their present condition:—a mosk with a paved and unroofed court of irregular shape adjoining, round which are ranged the altars of various Christian churches. In the centre is the miraculous stone surmounted by a cupola and screened by a Moallim Kibleh or praying-place,‡ with an altar attached, on

\* *ἱερὸν εἶκον ἐκκλησίας*. This church was surmounted by a conspicuous gilt cross, the glitter of which was visible far and wide. Jerome refers to it several times. See especially *Epist. Paulae*, "crux rutilans," and his comment on Zeph. i. 15.

† Even the toes were made out by some (Tobler, p. 108, note).

‡ The "Chapel of the foot of Isa" is at the south end of the main aisle of the Aksa, almost under the dome. Attached to its northern side is the Pulpit. At the time of Ali Bey's visit (ii. 218, and plate lxxi.) it was called *Sâda Aisa*, Lord Jesus; but he says nothing of the foot-mark.

§ See the plan of the edifice, in its present condition, on the margin of Sig. Pierotti's map, 1861. Other plans are

which the Christians are permitted since a Pasha's mam (Williams, *H. C.* ii. 445). But in all these changes the locality of the Ascension remained constantly the same.

The tradition no doubt arose from the Empress Helena's having erected her memorial close to the summit of the hill. It has been pointed out that she does not appear to have had any intention of fixing on a precise spot; she desired to erect a memorial of the Ascension, and this she did on the summit of the Mount of Olives, partly so because of its conspicuous situation, but also because of the existence there of the sacred spot in which our Lord had taught.† It took several centuries to harden and narrow this general notion of the connexion of the Mount of Olives with the Ascension into a lying invention in contradistinction to the narrative of the Ascension. For a century and a half undoubtedly is. Two accounts of its location exist, both by the same author—the one, Luke i. 50, 51, the other, Acts i. 6-11. The former of these names the place at which our Lord ascended. That place was not the summit of the Mount of Olives—He led them out as far as Bethany—on the eastern slopes of the Mount two miles beyond the traditional spot.‡ The latter of the Acts does not name the scene of the ascension, but it states that after it had taken place he "returned to Jerusalem from the mount called Olivet, which is from Jerusalem a Sabbath day's journey." It was their natural, therefore, that St. Luke is writing for Gentile readers of the localities, and therefore he not only adds the name of Olivet, but adds the general information that it was a Sabbath day's journey from Jerusalem. The specification of the distance no more applies to Bethany on the further side of the mount than to the summit on the nearer.

And if, leaving the evidence, we consider the relative fitness of the two spots for such a purpose, and compare the retired and wooded slopes of Bethany, so intimately connected with the last part of His life and with the friends who shared its dreadful pressure of that period, and to which it was attached by such binding ties, with a public spot visible from every part of the city, and indeed for miles in every direction—can we have no difficulty in deciding which is the more appropriate scene for the last act in the earthly career of One who always shunned publicity even to the death, and whose communications after His resurrection were confined to His disciples, and even by a singular privacy and reserve.

(3.) The third of the three traditions mentioned—that of the Lamentation over Jerusalem (Luke xix. 41-44)—is not more happily chosen

given in Quaresimus, ii. 315, and A. B. 1861. Arculf's sketch is in Tobler (Sketches, p. 101).

† Since writing this, the writer has observed that Stanley has taken the same view, almost to the word. (See *S. & P.* ch. xiv. 484.)

‡ The Mount of Olives seems to be used to denote also in Luke xxi. 37, compared with Mark xvi. 7, and Mark xiv. 3. The morning walk from Bethany to Jerusalem at any rate terminate with the day after the arrival at Jerusalem. (See Mark xi. 30.) One mode of reconciling the two narratives—which do not need reconciling—may say that the district of Bethany extended to the summit of the mount. But "Bethany" in the N.T. is a district but a village; and it was "as far as" that village place that "He led them forth."

It is on a mamelon or projects from the slope of the breast yards above Gethsemane. The site is a spot on the road from the city or temple should sud- w: but this is one which can a walk of several hundred st of the hill, with the temple at the whole time. It is also the path which now passes the date to the fixing of the spot. The natural road lies up the hill and that to the north, and the special object of a visit to this very inconvenient path. The place has been noticed by the first who gave it its name as the true spot to take its own passage of *Sinai and Pales-* ows that the road of our Lord's must have been, not the short summit used by small parties longer and easier route round er of the southern of the three it, which has the peculiarity of ssive views of Jerusalem: the portion—the modern Zion; the val, the buildings on the temple the two points in the narrative— ultitude, the weeping of Christ. en of the central and principal it. Next to it on the southern it by a slight depression, up tioned above as the third takes hich appears neither to possess, d, any independent name. It or the fact that it contains the known as the "Tombs of the in allusion to the words of 29). Of the origin, and even his cavern hardly anything is ble that it is the "rock called by Josephus (*B. J.* v. 12, §2) use of Titus's great wall" of cir- there is not much to be said (*Rob. iii.* 254 note). To the does not appear to have been ir descriptions hardly apply to ndition. Mr. Stanley (*S. & P.* identify it with the cave men- as that in which our Lord is, and also with that which is lf and Bernard as containing of our Lord (*Early Travels*, it is not improbable, but the Bernard seems to have been not far from the tomb of the pot of the betrayal (*E. T.* 28), thesemane.

to have crossed the Kidron from Stephen's Gate to the mount on the "turned south and encompassed the rock called the dovecot (ἀγλαΐας τῆς περιστάς), and the other hill id is over the valley of Siloam." ed as a synonym for columbarium, n excavated cemetery; and there is between it and the *Wady Hammdm*, in the neighbourhood of Tiberias, b abound in caves and perforations. se half-Hebrew, half-Greek appel- reason to believe Josephus bestows as of Palestine, and which have yet

3. The most southern portion of the Mount of Olives is that usually known as the "Mount of Offence." *Mons Offensionis*, though by the Arabs called *Baten el Hawa*, "the bag of the wind." It rises next to that last mentioned; and in the hollow between the two, more marked than the depressions between the more northern portions, runs the road from Bethany, which was without doubt the road of Christ's entry to Jerusalem.

The title Mount of Offence, or of Scandal, was bestowed on the supposition that it is the "Mount of Corruption,"<sup>a</sup> on which Solomon erected the high places for the gods of his foreign wives (2 K. xxiii. 13; 1 K. xi. 7). This tradition appears to be of a recent date. It is not mentioned in the Jewish travellers, Benjamin, hap-Parchi, or Petachia, and the first appearance of the name or the tradition as attached to that locality among Christian writers, appears to be in John of Wirtzburg (Tobler, 80 note) and Brocardus (*Descriptio Terr. S.* cap. ix.) both of the 13th century. At that time the northern summit was believed to have been the site of the altar of Chemosh (Brocardus), the southern one that of Molech only (Thietmar, *Peregr.* xi. 2).

The southern summit is considerably lower than the centre one, and, as already remarked, it is much more definitely separated from the surrounding portions of the mountain than the others are. It is also sterner and more repulsive in its form. On the south it is bounded by the *Wady en-Nar*, the continuation of the Kidron, curving round eastward on its dreary course to S. Saba and the Dead Sea. From this barren ravine the Mount of Offence rears its rugged sides by acclivities barer and steeper than any in the northern portion of the mount, and its top presents a bald and desolate surface, contrasting greatly with the cultivation of the other summits, and which not improbably, as in the case of Mount Ebal, suggested the name which it now bears. On the steep ledges of its western face clings the ill-favoured village of *Sikhon*, a few dilapidated towers rather than houses, their gray bleared walls hardly to be distinguished from the rock to which they adhere, and inhabited by a tribe as mean and repulsive as their habitations. [SILOAM.]

Crossing to the back or eastern side of this mountain, on a half-isolated promontory or spur which overlooks the road of our Lord's progress from Bethany, are found tanks and foundations and other remains, which are maintained by Dr. Barclay (*City*, &c. 66) to be those of Bethphage (see also Stewart, *Tent and Khan*, 322).

4. The only one of the four summits remaining to be considered is that on the north of the "Mount of Ascension"—the *Karem es-Seyad*, or Vineyard of the Sportsman; or, as it is called by the modern Latin and Greek Christians, the *Viri Galilaei*. This is a hill of exactly the same character as the Mount

to be investigated. Tischendorf (*Travels in the East*, 176) is wrong in saying that Josephus "always calls it the Dovecot." He mentions it only this once.

<sup>a</sup> In German, *Berg des Aergernisses*.

<sup>b</sup> מִן הַבְּרִיחַ. This seems to be connected etymologically in some way with the name by which the mount is occasionally rendered in the Targums—מִן הַבְּרִיחַ (Jonathan, Cant. viii. 9; Pseudojon. Gen. viii. 11). One is probably a play on the other.

Mr. Stanley (*S. & P.* 188, note) argues that the Mount of Corruption was the northern hill (*Viri Galilaei*), because the three sanctuaries were south of it, and therefore on the other three summits.

of the Ascension, and so nearly its equal in height that few travellers agree as to which is the more lofty. The summits of the two are about 400 yards apart. It stands directly opposite the N.E. corner of Jerusalem, and is approached by the path between it and the Mount of Ascension, which strikes at the top into a cross path leading to *el-Iscariyeh* and *Anata*. The Arabic name well reflects the fruitful character of the hill, on which there are several vineyards, besides much cultivation of other kinds. The Christian name is due to the singular tradition, that here the two angels addressed the Apostles after our Lord's ascension—"Ye men of Galilee!" This idea, which is so incompatible, on account of the distance, even with the traditional spot of the Ascension, is of late existence and inexplicable origin. The first name by which we encounter this hill is simply "Galilee,"  $\eta$  Γαλιλαία, (Perdiccas, cir. A.D. 1250, in *Reland, Pal. cap. lii.*). Brocardus (A.D. 1280) describes the mountain as the site of Solomon's altar to Chemosh (*Descr. cap. ix.*), but evidently knows of no name for it, and connects it with no Christian event. This name may, as is conjectured (Quaresmius ii. 319, and *Reland, 341*), have originated in its being the custom of the Apostles, or of the Galilaeans generally, when they came up to Jerusalem, to take up their quarters there; or it may be the echo or distortion of an ancient name of the spot, possibly the Gellioth of Josh. xviii. 17—one of the landmarks of the south boundary of Benjamin, which has often puzzled the topographer. But, whatever its origin, it came at last to be considered as the actual Galilee of northern Palestine, the place at which our Lord appointed to meet His disciples after His resurrection (Matt. xxviii. 10), the scene of the miracle of Cana (*Reland, 338*). This transference, at once so extraordinary and so instructive, arose from the same desire, combined with the same astounding want of the critical faculty, which enabled the pilgrims of the middle ages to see without perplexity the scene of the Transfiguration (Bourdes-ix Pilgr.), of the Beatitudes (Maundeville, *E. T.* 177), and of the Ascension, all crowded together on the single summit of the central hill of Olivet. It testified to the same feeling which has brought together the scene of Jacob's vision at Bethel, of the sacrifice of Isaac on Moriah, and of David's offering in the threshing-floor of Araunah, on one hill; and which to this day has crowded within the walls of one church of moderate size all the events connected with the death and resurrection of Christ.

In the 8th century the place of the angels was represented by two columns\* in the Church of the Ascension itself (Willibald, *E. T.* 19). So it remained with some trifling difference, at the time of Sæwulf's visit (A.D. 1102), but there was then also a chapel in existence—apparently on the northern summit—purporting to stand where Christ made His first appearance after the Resurrection, and called "Galilee." So it continued at Maundeville's visit (1322). In 1580 the two pillars were still shown in the Church of the Ascension (Radzivil), but in the 16th century (Toller, 75) the tradition had relinquished its ancient and more appropriate seat, and thenceforth became attached to the northern summit, where Maundrell (A.D. 1697) encountered it (*E. T.* 471), and where it even now retains some hold, the

name *Kalilea* being occasionally applied to it by Arabs. (See Pussacke and Schulz, in *Tyber*.) An ancient tower connected with the traditional course of demolition during Maundrell's visit Turk having bought the field in which it stood.

The presence of the crowd of churches and edifices implied in the foregoing description have rendered the Mount of Olives, during early and middle ages of Christianity, quite like what it was in the time of the Jewish dominion or of our Lord. Except the high plain summit the only buildings then to be seen probably the walls of the vineyards and the towers and presses which were the usual accompaniment. But though the hills are nearly all demolished there must be a considerable difference between the aspect of the mountain now and in those days when it rose from the abundance of its olive-groves, and not now stand so preeminent in the neighbourhood of Jerusalem. The cedars commemorated by the Talmud (foot, ii. 305), and the date-palms, *impudica* name Bethany, have faded still worse: one of either to be found within many miles change is no doubt due to natural causes, viz. of climate, &c.; but the check was not given by the ravages committed by the Romans Titus, who are stated by Josephus to have cut the country round Jerusalem for miles and miles of every stick or shrub for the bachelors during the siege. No olive or cedar, however, to Jew or Christian, would at such a time be the axes of the Roman sappers, and, moreover, how under similar circumstances every fibre of the smallest shrub were dug up to build the camp-followers of our army at Jerusalem would be wrong to deceive themselves by supposing that any of the trees now existing are the same or even descendants of those which were standing before that time.

Except at such rare occasions as the passage of the caravan of pilgrims to the Jordan, there is also a great contrast between the scene of loneliness which now pervades the mount and the busy scene which it presented in later times. Bethphage and Bethany are constantly referred to in the Jewish authors as places of rest and business and pleasure. The two large ovens mentioned had below them shops for the sale of pigeons and other necessaries for the use of the Temple, and appear to have driven a considerable trade (see the citations in *Lignier, 2*). Two religious ceremonies performed there must also have done much to increase the number who resorted to the mount. The appearance of the moon was probably watched for, and it is claimed, from the summit—the long train of clouds and fire in the moonless night the ascent to the peak of *Kurn el-Sakabeh*; and so much was the Jews attached to such sights and so sure to attract a concourse. The annual festival referred to was burning of the Red Heifer. The solemn ceremonial was enacted to the sound of music and in a spot so carefully specified that it was

\* These columns appear to have been seen as late as A.D. 1580 by Radzivil (Williams, *Holy City*, ii. 127, note).

\* There seems to be some doubt whether this was an annual ceremony. Jerome (*Epist. Pauline*, §12) distinctly says so; but the Rabbis assert that during the Captivity it was performed but once; and that activity to the Destruction eight times (*Lignier, 2*).

is not difficult to fix it. It was due east of the city, and at such an elevation on the mount of the officiating priest, as he slew the animal sprinkled her blood, could see the façade of the gateway through the east gate of the Temple. At this spot a viaduct was constructed across the valley on a double row of arches, so as to raise it above all possible proximity with graves or other defilements (see citations in Lightfoot, ii. 39). The depth of the valley is such at this place (about 100 ft. from the line of the south wall of the present *Horizon* area) that this viaduct must have been an important and conspicuous work. It was probably demolished by the Jews themselves on the approach of Titus, or even earlier, when Pompey led his army by Jericho and over the Mount of Olives. This would account satisfactorily for its not being alluded to by Josephus. During the siege the 10th legion had its fortified camp and batteries on the top of the mount, and the first, and some of the fiercest, encounters of the siege took place here.

"The lasting glory of the Mount of Olives," it has been well said, "belongs not to the Old Dispensation, but to the New. Its very barrenness witnessed in earlier times sets forth the abundance of those associations which it derives from the closing scenes of the sacred history. Nothing, perhaps, brings before us more strikingly the contrast of Jewish and Christian feeling, the abrupt and unharmonious termination of the Jewish dispensation—if we exclude the culminating point of the Gospel history—than to contrast the blank which Olivet presents to the Jewish pilgrims of the middle ages, only dignified by the sacrifice of 'the red sufferer'; and the vision too great for words, which it offers to the Christian traveller of all times, as the most detailed and the most authentic abiding-place of Jesus Christ. By one of those strange coincidences, whether accidental or borrowed, which occasionally appear in the Rabbinical writings, it is said in the *Midrash*,\* that the Shechinah, or Presence of God, after having finally retired from Jerusalem, 'dwelt' three years and a half on the Mount of Olives, to see whether the Jewish people would or would not repent, calling, 'Return to me, O my sons, and I will return to you;' 'Seek ye the Lord while He may be found, call upon Him while He is near;' and then, when all was in vain, returned to its own place. Whether or not this story has a direct allusion to the ministrations of Olivet, it is a true expression of His relation respectively to Jerusalem and to Olivet. It is useless to seek for traces of His presence in the streets of the once ten times captured city. It is impossible not to find them in the free space of the Mount of Olives" (Stanley, *Sin. and Pal.* 189).

A monograph on the Mount of Olives, exhausting every source of information, and giving the fullest references, will be found in Toller's *Silvashquelle und der Gellberg*, St. Gallen, 1852. The ecclesiastical traditions are in Quaresmiius, *Elucidatio Terrae Sanctae*, ii. 277-340, &c. Doubdan's account (*Le Voyage de la Terre Sainte*, Paris, 1857) is excellent and his plates very correct. The passages relating to the mount in Mr. Stanley's *Sinai and Palestine* (p. 183-195, 452-454) are full of instruction and caution, and in fixing the spot of our Lord's lamentation over Jerusalem he has certainly

made one of the most important discoveries ever made in relation to this interesting locality. [G.]

OLIVET (2 Sam. xv. 30; Acts i. 12), probably derived from the Vulgate, *mons qui vocatur Oliveti* in the latter of these two passages. [See OLIVES, MOUNT OF.]

OLYMPAS (Ὀλυπᾶς: *Olympias*), a Christian at Rome (Rom. xvi. 15), perhaps of the household of Philologus. It is stated by Pseudo-Hippolytus that he was one of the seventy disciples, and underwent martyrdom at Rome: and Baronius ventures to give A.D. 69 as the date of his death. [W. T. B.]

OLYMPIUS (Ὀλυμπίος: *Olympius*). One of the chief epithets of the Greek deity Zeus, so called from Mount Olympus in Thessaly, the abode of the gods (2 Mac. vi. 2). [See JUPITER, vol. i. p. 1175.]

OMAEERUS (Ἰσμαήρως: *Abramus*). AMRAM of the sons of Bani (1 Esd. ix. 34; comp. Ezr. x. 34). The Syriac seems to have read "Ishmael."

OMAR (أُمّار: *Amur*; Alex. *Amur* in Gen. xxxvi. 11: *Omar*). Son of Eliphaz the firstborn of Esau, and "duke" or phylarch of Edom (Gen. xxxvi. 11, 15; 1 Chr. i. 36). The name is supposed to survive in that of the tribe of *Amir* Arabs east of the Jordan. Bunsen asserts that Omar was the ancestor of the *Bne 'Hammer* in northern Edom (*Bibelwerk*, Gen. xxxvi. 11), but the names are essentially different.

OMEGA (Ω). The last letter of the Greek alphabet, as Alpha is the first. It is used metaphorically to denote the end of anything: "I am Alpha and Omega, the beginning and the ending . . . the first and the last" (Rev. i. 8, 11). The symbol Ω, which contains the first and last letters of the Hebrew alphabet, is, according to Buxtorf (*Lex. Talm.* p. 244), "among the Cabalists often put mystically for the beginning and end, like A and Ω in the Apocalypse." Schoettgen (*Hor. Heb.* p. 1086) quotes from the *Talkut Rubeni* on Gen. i. 1, to the effect that in Ω are comprehended all letters, and that it is the name of the Shechinah.

OMER. [WEIGHTS AND MEASURES.]

OMRI (עֲמֹרִי, i. e. עֲמֹרִיָּה, probably "servant of Jehovah" (Gesenius): *Αμβρι*, LXX.; *Amurios*, Joseph. *Ant.* viii. 12, 5: *Amri*), 1. originally "captain of the host" to ELAH, was afterwards himself king of Israel, and founder of the third dynasty. When Elah was murdered by Zimri at Tirzah, then capital of the northern kingdom, Omri was engaged in the siege of Gibbethon, situated in the tribe of Dan, which had been occupied by the Philistines, who had retained it, in spite of the efforts to take it made by Nadab, Jeroboam's son and successor. As soon as the army heard of Elah's death, they proclaimed Omri king. Thereupon he broke up the siege of Gibbethon, and attacked Tirzah, where Zimri was holding his court as king of Israel. The city was taken, and Zimri perished in the flames of the palace, after a reign of seven days. [ZIMRI.] Omri, however, was not allowed to establish his dynasty without a struggle against Tibni, whom "half the people" (1 K. xvi. 21) desired to raise to the throne, and

Jehovah is said to have left Jerusalem and taken its stand on the Mount of Olives—the mountain on the east side of the city!

\* Rabbi Janna, in the *Midrash Tehillim*, quoted by Lightfoot, ii. 39. Can this statement have originated in the *Septuagint* passage, Ez. xl. 23, in which the *g' sy* of

who was bravely assisted by his brother Joram.\* The civil war lasted four years (cf. 1 K. xvi. 15, with 23). After the defeat and death of Tibni and Joram, Omri reigned for six years in Tirzah, although the palace there was destroyed; but at the end of that time, in spite of the proverbial beauty of the site (Cant. vi. 4), he transferred his residence, probably from the proved inability of Tirzah to stand a siege, to the mountain Shomron, better known by its Greek name Samaria, which he bought for two talents of silver from a rich man, otherwise unknown, called Shemer. It is situated about six miles from Shechem, the most ancient of Hebrew capitals; and its position, according to Prof. Stanley (*S. & P.*, p. 240), "combined, in a union not elsewhere found in Palestine, strength, fertility, and beauty." Bethel, however, remained the religious metropolis of the kingdom, and the calf-worship of Jeroboam was maintained with increased determination and disregard of God's law (1 K. xvi. 26). At Samaria Omri reigned for six years more. He seems to have been a vigorous and unscrupulous ruler, anxious to strengthen his dynasty by intercourse and alliances with foreign states. Thus he made a treaty with Benhadad I., king of Damascus, though on very unfavourable conditions, surrendering to him some frontier cities (1 K. xi. 34), and among them probably Ramoth-Gilead (1 K. xiii. 3), and admitting into Samaria a resident Syrian embassy, which is described by the expression "he made streets in Samaria" for Benhadad. (See the phrase more fully explained under AHAB.) As a part of the same system, he united his son in marriage to the daughter of a principal Phoenician prince, which led to the introduction into Israel of Baal-worship, and all its attendant calamities and crimes. This worldly and irreligious policy is denounced by Micah (vi. 16) under the name of the "statutes of Omri," which appear to be contrasted with the Lord's precepts to His people, "to do justly, and to love mercy, and to walk humbly with thy God." It achieved, however, a temporary success, for Omri left his kingdom in peace to his son Ahab; and his family, unlike the ephemeral dynasties which had preceded him, gave four kings to Israel, and occupied the throne for about half a century, till it was overthrown by the great reaction against Baal-worship under Jehu. The probable date of Omri's accession (i. e. of the deaths of Elah and Zimri) was B.C. 935; of Tibni's defeat and the beginning of Omri's sole reign B.C. 931, and of his death B.C. 919. [G. E. L. C.]

2. (\**Amapiá*.) One of the sons of Becher the son of Benjamin (1 Chr. vii. 8).

3. (\**Ampl*.) A descendant of Pharez the son of Judah (1 Chr. ix. 4).

4. (\**Amphi*; Alex. \**Ampl*.) Son of Michael, and chief of the tribe of Issachar in the reign of David (1 Chr. xxvi. 18).

ON (פֶּן: אֹנ; Alex. *Αὐν*; Hon). The son of Peleth, and one of the chiefs of the tribe of Reuben who took part with Korah, Dathan, and Abiram in their revolt against Moses (Num. xvi. 1). His name does not again appear in the narrative of the con-

spiracy, nor is he alluded to when reference is made to the final catastrophe. Possibly he reigned; at indeed there is a Rabbinical tradition to the effect that he was prevailed upon by his wife to withdraw from his accomplices. Abendana's note is, "Isaiah On is not mentioned again, for he was separated from their company after Moses spoke with God. And our Rabbis of blessed memory said that his wife saved him." Josephus (*Ant. iv. 2, §2*) omits the name of On, but retains that of his father in the form Φαλασούς, thus apparently identifying him with Phallu, the son of Reuben. [W. A. W.]

ON (פֶּן: אֹנ: אֹנ, \**Ηλιοπόλις*: *Heliopolis*), a town of Lower Egypt, which is mentioned in the Bible under at least two names, *IR-HA-SHEMESH*, שֶׁמֶשׁ בֵּית (Jer. xliii. 13), corresponding to the ancient Egyptian sacred name *IR-H* "the abode of the sun," and that *HERES*, corresponding to the common name *AN*, and *IR-HA-HERES*, אֶרֶץ הָהָרִים, the second part being, in this case, the Egyptian sacred name, or else the Hebrew *הָרִים*, but we prefer to read "a city of devotion." [*IR-HA-HERES*.] The two names are known to the translator or translator of lists in the LXX. where On is explained to be *Heliopolis* (\**Αν ή έστιν Ηλιοπόλις*, I. 11; cf. Jeremiah this version seems to treat *IR-HA-SHEMESH* as the name of a temple (*τοῦ ἁγίου ἑλισίου* *ἑλισίου*, τοῦ *Αν*, xliii. 13, LXX. I. 11). The Coptic version gives *ⲙⲓⲛ* as the equivalent of the names in the LXX., but whether as an Egyptian word or such a word Hebraicised can not be determined.

The ancient Egyptian common name is written *AN*, or *AN-T*, and perhaps *ANU*; but the common part of the word is *AN*, and probably so pronounced. There were two towns called *AN*, *Heliopolis*, distinguished as the northern, *AN-MENET* and *Hermopolis*, in Upper Egypt, as the southern *AN-RES* (Brugsch, *Geogr. Inschr.*, I. pp. 224, 225. Nos. 1217 a, b, 1218, 870, 1225). As to the meaning, we can say nothing certain. Coptic, who as bishop of Alexandria, should be interested in such a question, says that On signified the sun (*ⲁν δέ έστιν κατ' αὐτοῦ δέ έστιν*, cf. *ⲁν* 145), and the Coptic *ⲟⲩⲱⲛⲓⲛ* (*ⲙⲓⲛ*, *ⲟⲩⲱⲛⲓⲛ* *ⲟⲩⲱⲛⲓⲛ*), "light," has therefore been compared (see La Crosse, *Lex.* pp. 71, 189), but its hieroglyphic form is *UBEN*, "shining," which is no connection with *AN*.

*Heliopolis* was situated on the east side of the Pelusiac branch of the Nile, just below the mouth of the Delta, and about twenty miles north-east of Memphis. It was before the Roman time the capital of the Heliopolite Nome, which was included in Lower Egypt. Now, its site is above the point of the Delta, which is the junction of the Pelusiac or Damietta branch and the Bollaia, or Bollaia, and about ten miles to the north-east of Cairo. The oldest monument of the town is the stela which

have been transposed, and the first transposed with Brugsch (*Geogr. Inschr.* I. 254) supposes *AN* and *ⲟⲩⲱⲛⲓⲛ* to be the same, "as the Egyptian *A* often had a vowel intermediate between *a* and *o*." But this does not admit of change of the *a* vowel to the long vowel *o* that it was as distinct as from the other long vowel *ⲟ* respectively like *ⲁ* and *ⲟ*, and

\* The LXX. read in 1 K. xvi. 22, καὶ ἀνέβησαν Θαβὶ καὶ Ἰακώβ δ' ἀδελφοὶ αὐτοῦ ἐν τῇ κοίτῃ ἑστῆναι. Ewald pronounces this an "offenbar üchter Zusatz."

\* The latter is perhaps more probable, as the letter we represent by *A* is not commonly changed into the Coptic *ⲙ*, unless indeed one hieroglyphic form of the name would be read *ANU*, in which case the last vowel might

up late in the reign of Sesertesen I., head of dynasty, dating B.C. cir. 2050. According to the bull Mnevis was first worshipped in the reign of Kaiechô, second king of the 2nd (B.C. cir. 2400). In the earliest times it has been subject to the 1st dynasty so long as its rule lasted, which was perhaps for no more reigns of Menes (B.C. cir. 2717) and Athoudoubtless next came under the government of the 3rd (B.C. cir. 2640), 4th dynasties: it then passed into the hands of the 12th dynasty, and the 15th; but whether the former or the latter held it first, or it was contested between them, we cannot as yet determine. During the period of anarchy that followed the rule of the 13th dynasty, when Lower Egypt was subject to shepherd kings, Heliopolis must have been in the government of the strangers. With the rise of the 18th dynasty, it was probably held by the Egyptians, during the war which, or Amosis, head of that line, waged with the pharaohs, and thenceforward held by them, perhaps more than once occupied by invaders Chabaa, *Papyrus Magique Harris*), before the Persians conquered Egypt. Its position, near the eastern frontier, must have made it always of special importance. [NO-AMON.] The chief object of worship at Heliopolis was the sun-god, the forms RA, the sun simply, whence the name of the place, HA-RA, "the abode of the sun," and ATUM, the setting sun, or sun of the other world. Probably its chief temple was dedicated to both. SHU, the son of Atum, and T, his daughter, were also here worshipped, as the bull Mnevis, sacred to RA, Osiris, the Phoenix, BENNU, probably represented the sacred bird of the crane kind. (On the myserion see Brugach, pp. 254 seq.) The temple was, described by Strabo (xvii. pp. 805, 806), only represented by the single beautiful obelisk which is of red granite, 68 feet 2 inches high on a pedestal, and bears a dedication, showing it was sculptured in or after his 30th year (cir. 2045). There were probably more than a usual number of obelisks before the temple, on the evidence of ancient records and the inscriptions of some yet remaining monuments, and no doubt the reason was that these monuments were sacred to the sun. Heliopolis was famous for its learning, and Eudoxus was said to have studied under its priests; but, from the extent of its ruins, it seems to have been always a small

The first mention of this place in the Bible is in the story of Joseph, to whom we read Pharaoh gave his daughter Asenath the daughter of Poti-pherah, "On" (Gen. xli. 45, comp. ver. 50, and xlii. 1). Joseph was probably governor of Egypt under the 15th dynasty, of which Memphis was, for a time, the capital. In this case he would have lived for part of the year at Memphis, before near to Heliopolis. The name of Asenath was appropriate to a Heliopolite, and likely to a priest of that place (though according to the Hebrew text he may have been a prince), for it means "giving to Ra," or "the sun." The name of the master Poti-pherah is the same, but with a difference in the Hebrew orthography. According to the LXX. version, On was one of the cities of the land of Goshen by the oppressed Israelites, for it

mentions three "strong cities" instead of the two "treasure cities" of the Heb., adding On to Pithom and Raames (Καὶ φειδομένησαν πόλεις θυγατρὸς τοῦ Φαραῶ, τὴν τε Πειθὼν, καὶ Ῥαμεσσή, καὶ Ὀν, ἣ δὲ ἴστω Ἡλιούπολιν, Ex. i. 11). If it be intended that these cities were founded by the labour of the people, the addition is probably a mistake, although Heliopolis may have been ruined and rebuilt; but it is possible that they were merely fortified, probably as places for keeping stores. Heliopolis lay at no great distance from the land of Goshen and from Raames, and probably Pithom also.

Isaiah has been supposed to speak of On when he prophesies that one of the five cities in Egypt that should speak the language of Canaan, should be called Ir-ha-heres, which may mean the City of the Sun, whether we take "heres" to be a Hebrew or an Egyptian word; but the reading "a city of destruction" seems preferable, and we have no evidence that there was any large Jewish settlement at Heliopolis, although there may have been at one time from its nearness to the town of Onias. [IR-HA-HERES; ONIAS.] Jeremiah speaks of On under the name Beth-shemesh, "the house of the sun," where he predicts of Nebuchadnezzar, "He shall break also the pillars [? כְּלִי כֶסֶף, but, perhaps, statues, comp. IDOL, i. 850a] of Beth-shemesh, that [is] in the land of Egypt; and the houses of the gods of the Egyptians shall he burn with fire" (xliii. 13). By the word we have rendered "pillars," obelisks are reasonably supposed to be meant, for the number of which before the temple of the sun Heliopolis must have been famous, and perhaps by "the houses of the gods," the temples of this place are intended, as their being burnt would be a proof of the powerlessness of Ra and Atum, both forms of the sun, Shu the god of light, and Tafnet a fire-goddess, to save their dwellings from the very element over which they were supposed to rule.—Perhaps it was on account of the many false gods of Heliopolis, that, in Ezekiel, On is written Aven, by a change in the punctuation, if we can here depend on the Masoretic text, and so made to signify "vanity," and especially the vanity of idolatry. The prophet foretells, "The young men of Aven and of Pi-beseth shall fall by the sword: and these [cities] shall go into captivity" (xxx. 17). Pi-beseth or Bubastis is doubtless spoken of with Heliopolis as in the same part of Egypt, and so to be involved in a common calamity at the same time when the land should be invaded.

After the age of the prophets we hear no more in Scripture of Heliopolis. Local tradition, however, points it out as a place where Our Lord and the Virgin came, when Joseph brought them into Egypt, and a very ancient sycamore is shown as a tree beneath which they rested. The Jewish settlements in this part of Egypt, and especially the town of Onias, which was probably only twelve miles distant from Heliopolis in a northerly direction, but a little to the eastward (*Modern Egypt and Thebes*, i. 297, 298), then flourished, and were nearer to Palestine than the heathen towns like Alexandria, in which there was any large Jewish population, so that there is much probability in this tradition. And, perhaps, Heliopolis itself may have had a Jewish quarter, although we do not know it to have been the Ir-ha-heres of Isaiah. [R. S. P.]

O'NAM (עֲנָם): 'Anâm, 'Anân; Alex. 'Anâm, 'Anâm; Onam). 1. One of the sons of Shobal the son of Seir (Gen. xxxvi. 23; 1 Chr. i. 40). Some Hebrew M.S. read "Onan."

2. (Ὀνάν; Alex. Ὀνόμα.) The son of Jerahmeel by his wife Atharab (1 Chr. ii. 26, 28).

**O'NAN** (Ὀνάν; Ἀνάν; *Onan*). The second son of Judah by the Canaanitess, "the daughter of Shua" (Gen. xxviii. 4; 1 Chr. ii. 3). On the death of Er the first-born, it was the duty of Onan, according to the custom which then existed and was afterwards established by a definite law (Deut. xxv. 5-10), continuing to the latest period of Jewish history (Mark xii. 19), to marry his brother's widow and perpetuate his race. But he found means to prevent the consequences of marriage, "and what he did was evil in the eyes of Jehovah, and He slew him also," as He had slain his elder brother (Gen. xxviii. 9). His death took place before the family of Jacob went down into Egypt (Gen. xlii. 13; Num. xxvi. 19). [W. A. W.]

**ONESIMUS** (Ὀνήσιμος; *Onesimus*) is the name of the servant or slave in whose behalf Paul wrote the Epistle to Philemon. He was a native, or certainly an inhabitant of Colossae, since Paul in writing to the Church there speaks of him (Col. iv. 9) as *ὅς ἐστιν ἐξ ὑμῶν*, "one of you." This expression confirms the presumption which his Greek name affords, that he was a Gentile, and not a Jew, as some have argued from *μάλιστα ἐμοί* in Phil. 16. Slaves were numerous in Phrygia, and the name itself of Phrygian was almost synonymous with that of slave. Hence it happened that in writing to the Colossians (iii. 22-iv. 1) Paul had occasion to instruct them concerning the duties of masters and servants to each other. Onesimus was one of this unfortunate class of persons, as is evident both from the manifest implication in *σύνετι δὲ δοῦλον* in Phil. 16, and from the general tenor of the epistle. There appears to have been no difference of opinion on this point among the ancient commentators, and there is none of any critical weight among the modern. The man escaped from his master and fled to Rome, where in the midst of its vast population he could hope to be concealed, and to baffle the efforts which were so often made in such cases for retaking the fugitive. (Walter, *Die Geschichte des Röm. Rechts*, ii. 63 sq.) It must have been to Rome that he directed his way, and not to Caesarea, as some contend; for the latter view stands connected with an indefensible opinion respecting the place whence the letter was written (see Neander's *Pfandung*, ii. s. 506). Whether Onesimus had any other motive for the flight than the natural love of liberty, we have not the means of deciding. It has been very generally supposed that he had committed some offence, as theft or embezzlement, and feared the punishment of his guilt. But as the ground of that opinion we must know the meaning of *ἠδίκησε* in Phil. 18, which is uncertain, not to say inconsistent with any such imputation (see Notes in the *Epistle to Philemon*, by the American Bible Union, p. 60). Commentators at all events go entirely beyond the evidence when they assert (as Conybeare, *Life and Epistles of Paul*, ii. p. 467) that he belonged to the dregs of society, that he robbed his master, and confessed the sin to Paul. Though it may be doubted whether Onesimus heard the gospel for the first time at Rome, it is beyond question that he was led to embrace the gospel there through the apostle's instrumentality. The language in ver. 10 of the letter (*ὅτι ἐγέννησα ἐν τοῖς δεσμοῖς μου*) is explicit on this point. As there were believers in Phrygia when the apostle

passed through that region on his third missionary tour (Acts xviii. 23), and as Onesimus belonged to a Christian household (Phil. 2), it is not probable that he knew something of the Christian doctrine before he went to Rome. How long a time elapsed between his escape and conversion, we cannot decide; for *πρὸς ἑσπέρα* in the 13th verse, which appeal has been made, is purely a figure of expression, and will not justify any inference as to the interval in question.

After his conversion, the most happy and close relations sprung up between the teacher and the disciple. The situation of the apostle as a minister and an indefatigable labourer for the promulgation of the gospel (Acts xxviii. 30, 31) must have made him keenly alive to the sympathies of Christian friendship and dependent upon others for the services of a personal nature, important to his efficiency as a minister of the word. Onesimus appears to have supplied this twofold want in an eminent degree. We see from the letter that he was entirely the apostle's heart, and made himself useful to him in various private ways, and such such a capacity to be so (for he may have gone back to Colossae soon after his conversion), that Paul wished to have him remain constantly with him. Whether he desired his presence as a personal attendant or as a minister of the word, is not certain from *ἵνα διακομιῇ μοι* in ver. 13 of the Epistle. Be this as it may, Paul's attitude toward him as a disciple, as a personal friend, and as a helper to him in his bonds, was such that he trusted him up only in obedience to that spirit of submission and that sensitive regard for the feelings and rights of others, of which his conduct on his mission displayed so noble an example.

There is but little to add to this account, when we pass beyond the limits of the New Testament. The traditional notices which have come down to us, are too few and too late to amount to much as historical testimony. Some of the later fathers assert that Onesimus was set free, and was subsequently ordained Bishop of Hermon in Maron (Constit. Apost. 7, 46). The person of the same name mentioned as Bishop of Ephesus in the last epistle of Ignatius to the Ephesians (Holtz, *Form Apost. Opp.*, p. 152) was a different person, as Winer, *Realw.*, ii. 175). It is related that Onesimus finally made his way to Rome again, and ended his days there as a martyr during the persecution under Nero. [H. E. I.]

**ONESIPHORUS** (Ὀνησιφόρος) is mentioned twice only in the N. T., viz., 2 Tim. i. 16-18, and iv. 19. In the former passage Paul mentions him in terms of grateful love, as having a noble temper and generosity in his behalf, amid his unjust imprisonment at Rome, when others from whom he expected better things had deserted him (2 Tim. i. 16); and in the latter passage he singles out "the household of Onesiphorus" as worthy of a special greeting. It has been made a question whether this friend of the apostle was still living when the letter to Timothy was written, because in both instances Paul speaks of "the household" (2 Tim. i. 16, *οἶκόν* *ἐλεος* *δὲ* *κόμιος* *τῷ* *Ὀνησιφόρῳ* *ἐμοί*, and not separately of Onesiphorus himself). We infer that he was not living, then we see in 2 Tim. i. 18, almost an instance of the apostle's sanction of the practice of praying for the dead. But the probability is that other members of the family were also active Christians; and as Paul wished to remember them at the same time

grouped them together under the comprehensive *ὁσ. οἰκον* (2 Tim. iv. 19), and thus carefully recognised the common merit, as a sort of family distinction. The mention of Stephanas 1 Cor. xvi. 17, shows that we need not exclude from the *Ἀρεφανὺ οἰκον* in 1 Cor. i. 16. It is evident from 2 Tim. i. 18 (*ὅσα ἐν Ἐφέσῳ διετηρήσατο*), that Onesiphorus had his home at Ephesus; though if we restrict the salutation near the close of the Epistle (iv. 19) to his family, he himself possibly has been with Paul at Rome when the latter wrote to Timothy. Nothing authentic is known of him beyond these notices. According to a tradition in Fabricius (*Lux Evang.* p. 117), cited by Winer (*Realb.* ii. 175), he became bishop of Corone in Messenia. [H. B. H.]

**ONIAIRES** (*Ονιδῆς*), a name introduced into Greek and Syriac texts of 1 Macc. xii. 20 by very old corruption. The true reading is preserved in Josephus (*Ant.* xii. 4, §10) and the Vulgate, (*Oniq' Apēios*, *Onias Arius*), and is given in margin of the A. V.

**ONIAS** (*Ὀνίας*: *Onias*), the name of five high priests, of whom only two (1 and 3) are mentioned in the A. V., but an account of all is here given to prevent confusion. 1. The son and successor of Asa, who entered on the office about the time of the death of Alexander the Great, c. B.C. 330-308, according to Eusebius, 300. (*Jos. Ant.* xi. 7, §1. According to Josephus he was father of Simon Just (*Jos. Ant.* xii. 2, §4; *Ecclus.* i. 1). [ECCLESIASTICUS, vol. i. p. 4796; SIMON.]

2. The son of Simon the Just (*Jos. Ant.* xii. 4, §1). He was a minor at the time of his father's death (c. B.C. 290), and the high-priesthood was seized in succession by his uncle Eleazar and passed to his exclusion. He entered on the office at last c. B.C. 240, and his conduct threatened to precipitate the rupture with Egypt, which afterwards opened the way for Syrian oppression. Onias, avaricious, it is said—a vice which was likely to be increased by his long exclusion from power—refused for several years to remit to Ptolemy the customary annual tribute of 20 talents. The king claimed the arrears with threats of violence in case his demands were not satisfied. Onias refused to discharge the debt, more, as it were, from self-will than with any prospect of successful resistance. The evil consequences of this inactivity were, however, averted by the policy of nephew Joseph, the son of Tobias, who visited Egypt, urged the imbecility of Onias, won the favour of the king, and entered into a contract for paying the tribute, which he carried out with success. Onias retained the high-priesthood till his death, c. B.C. 226, when he was succeeded by his son Simon II. (*Jos. Ant.* xii. 4, §1).

3. The son of Simon II., who succeeded his father in the high-priesthood, c. B.C. 198. In the interval which had elapsed since the government was transferred to the Syrian monarchy (Dan. xi. 14), for a time enjoyed tranquil prosperity. Internal dissensions furnished an occasion for the first act of Syrian oppression. Seleucus Philopator was informed that Simon, governor of the Temple, of the riches stored in the sacred treasury, and he made an attempt to seize them by force. At the prayer of Onias, according to the tradition (2 Macc. iii.), the attempt was averted; but the high-priest was obliged to appeal to the king himself for support

against the machinations of Simon. Not long afterwards Seleucus died (B.C. 175), and Onias found himself supplanted in the favour of Antiochus Epiphanes by his brother Jason, who received the high-priesthood from the king. Jason, in turn, was displaced by his youngest brother Menelaus, who procured the murder of Onias (c. B.C. 171), in anger at the reproof which he had received from him for his sacrilege (2 Macc. iv. 32-38). But though his righteous zeal was thus fervent, the punishment which Antiochus inflicted on his murderer was a tribute to his "sober and modest behaviour" (2 Macc. iv. 37) after his deposition from his office. [ANDRONICUS, vol. i. p. 67.]

It was probably during the government of Onias III. that the communication between the Spartans and Jews took place (1 Macc. xii. 19-23; *Jos. Ant.* xii. 4, §10). [SPARTANS.] How powerful an impression he made upon his contemporaries is seen from the remarkable account of the dream of Judas Maccabaeus before his great victory (2 Macc. xv. 12-16).

4. The youngest brother of Onias III., who bore the same name, which he afterwards exchanged for Menelaus (*Jos. Ant.* xii. 5, §1). [MENELAUS.]

5. The son of Onias III., who sought a refuge in Egypt from the sedition and sacrilege which disgraced Jerusalem. The immediate occasion of his flight was the triumph of "the sons of Tobias," gained by the interference of Antiochus Epiphanes. Onias, to whom the high-priesthood belonged by right, appears to have supported throughout the alliance with Egypt (*Jos. B. J.* i. 1, §1), and receiving the protection of Ptolemy Philometor, he endeavoured to give a unity to the Hellenistic Jews, which seemed impossible for the Jews in Palestine. With this object he founded the Temple at Leontopolis [ON], which occupies a position in the history of the development of Judaism of which the importance is commonly overlooked: but the discussion of this attempt to consolidate Hellenism belongs to another place, though the connexion of the attempt itself with Jewish history could not be wholly overlooked (*Jos. Ant.* xiii. 3; *B. J.* i. 1, §1, vii. 10, §2; Ewald, *Gesch.* iv. 405 ff.; Herzfeld, *Gesch.* ii. 460 ff., 557 ff.). [B. F. W.]

THE CITY OF ONIAS, THE REGION OF ONIAS, the city in which stood the temple built by Onias, and the region of the Jewish settlements in Egypt. Ptolemy mentions the city as the capital of the Heliopolite nome: *Ἡλιουπόλιν νομόν, καὶ μητροπόλιν Ὀνίου* (iv. 5, §53); where the reading *Ἡλίου* is not admissible, since Heliopolis is afterwards mentioned, and its different position distinctly laid down (§54). Josephus speaks of "the region of Onias," *Ὀνίου χώρα* (*Ant.* xiv. 8, §1; *B. J.* i. 9, §4; comp. vii. 10, §2), and mentions a place there situated called "the Camp of the Jews," *Ἰουδαίων στρατόπεδον* (*Ant.* xiv. 8, §2, *B. J.* i. c.). In the spurious letters given by him in the account of the foundation of the temple of Onias, it is made to have been at Leontopolis in the Heliopolite nome, and called a strong place of Bubastis (*Ant.* xiii. 3, §§1, 2); and when speaking of its closing by the Romans, he says that it was in a region 180 stadia from Memphis, in the Heliopolite nome, where Onias had founded a castle (lit. watch-post, *φρούριον*, *B. J.* vii. 10, §§2, 3, 4). Leontopolis was not in the Heliopolite nome, but in Ptolemy's time was the capital of the Leontopolite (iv. 5, §51), and the mention of it is altogether a blunder. There is probably also a confusion as to the city Bubastis;

unless, indeed, the temple which Onias adopted and restored were one of the Egyptian goddesses of that name.

The site of the city of Onias is to be looked for in some one of those to the northward of Heliopolis which are called Tel-el-Yahood, "the Mound of the Jews," or Tel-el-Yahodeeyeh, "the Jewish Mound." Sir Gardner Wilkinson thinks that there is little doubt that it is one which stands in the cultivated land near Shibbeen, to the northward of Heliopolis, in a direction a little to the east, at a distance of twelve miles. "Its mounds are of very great height." He remarks that the distance from Memphis (29 miles) is greater than that given by Josephus; but the inaccuracy is not extreme. Another mound of the same name, standing on the edge of the desert, a short distance to the south of Belbays, and 24 miles from Heliopolis, would, he thinks, correspond to the *Vicus Judaeorum* of the *Itinerary of Antoninus*. (See *Modern Egypt and Thebes*, i. pp. 297-300).

During the writer's residence in Egypt, 1849-1849, excavations were made in the mound supposed by Sir Gardner Wilkinson to mark the site of the city of Onias. We believe, writing only from memory, that no result was obtained but the discovery of portions of pavement very much resembling the Assyrian pavements now in the British Museum.

From the account of Josephus, and the name given to one of them, "the Camp of the Jews," these settlements appear to have been of a half-military nature. The chief of them seems to have been a strong place; and the same is apparently the case with another, that just mentioned, from the circumstances of the history even more than from its name. This name, though recalling the "Camp" where Psammetichus I. established his Greek mercenaries [MIGDOL], does not prove it was a military settlement, as the "Camp of the Tyrians" in Memphis (Her. ii. 112) was perhaps in its name a reminiscence of the Shepherd occupation, for there stood there a temple of "the Foreign Venus," of which the age seems to be shown by a tablet of Amenoph II. (B.C. cir. 1400) in the quarries opposite the city in which Ashtoreth is worshipped, or else it may have been a merchant-settlement. We may also compare the Coptic name of El-Gezeh, opposite Cairo, *†*νεπριοι, which has been ingeniously conjectured to record the position of a Persian camp. The easternmost part of Lower Egypt, be it remembered, was always chosen for great military settlements, in order to protect the country from the incursions of her enemies beyond that frontier. Here the first Shepherd king Salatis placed an enormous garrison in the stronghold Avaris, the Zoan of the Bible (Manetho, ap. Jos. c. Ap. i. 14). Here foreign mercenaries of the Saitic kings of the 26th dynasty were settled; where also the greatest body of the Egyptian soldiers had the lands allotted to them, all being established in the Delta (Her. ii. 164-166). Probably the Jewish settlements were established for the same purpose, more especially as the hatred of their inhabitants towards the kings of Syria would promise their opposing the strongest resistance in case of an invasion.

The history of the Jewish cities of Egypt is a very obscure portion of that of the Hebrew nation. We know little more than the story of the founda-

tion and overthrow of one of them, though we may infer that they were populous and practically important. It seems at first sight remarkable that we have no trace of any literature of these settlements; but as it would have been preserved to us by either the Jews of Palestine or those of Alexandria, both of whom must have looked upon the worshippers at the temple of Onias as schismatics, it could scarcely have been expected to have come down to us. [R. & P.]

**ONIONS** (עֲבֵתִים, *betadilim*: *vā* *apilapim*: *caepē*). There is no doubt as to the meaning of the Hebrew word, which occurs only in Num. xii. 11, one of the good things of Egypt of which the Israelites regretted the loss. Onions have been from time immemorial a favourite article of food amongst the Egyptians. (See Her. ii. 123; Plin. xxvi. 12.) The onions of Egypt are much milder in flavour and less pungent than those of this country. Hasselquist (*Trav.* p. 290) says, "Whoever has tasted onions in Egypt must allow that none can be had better in any other part of the universe. here they are sweet; in other countries they are nauseous and strong. . . . They eat them roasted, cut into four pieces, with bits of roasted meat which the Turks in Egypt call *kebab*; and with this dish they are so delighted that I have heard them wish they might enjoy it in Paradise. They likewise make a soup of them." [W. & A.]

**ONO** (אֲנוֹ, and once אֲנוֹ: in Chet. *Alap*, Alex. *Adap*; elsewhere 'אנוֹן' and 'אנוֹ, *Alap*, *Alap*: *Ono*). One of the towns of Benjamin. It does not appear in the catalogues of the *Book of Joshua*, but is first found in 1 Chr. viii. 12, where Shamed or Shamer is said to have built Ono of Lod with their "daughter villages." It was therefore probably annexed by the Benjamites subsequently to their original settlement, like *Lydda* which was allotted to Dan, but is found elsewhere in the hands of the Benjamites (1 Chr. viii. 12). The men of Lod, Hadid, and Ono, to the number of 725 (or Neh. 721) returned from the captivity with Zerubbabel (Ezr. ii. 33; Neh. vii. 37) or also 1 Esdr. v. 22). [ONIA.]

A plain was attached to the town, and bore a name—*Bikath-Ono*, "the plain of Ono" (Neh. ii. 2), perhaps identical with the "valley of craftsmen" (Neh. xi. 36). By Eusebius and Jerome it is so named. The Rabbis frequently mention it, but without any indication of its position further than that it was three miles from Lod. (See the citation in the Talmud in Lightfoot, *Chor.* *Tractat* in S. *Mid.* ch. ix. §3.) A village called *Kefer 'Ana* is commemorated by Robinson among the places in the districts of *Ramleh* and *Lydda* (*B. R.* lat. ed. pp. 120, 121). This village, almost due S. of *Lydda*, is suggested by Van de Velde (*Memoir*, 17) as identical with Ono. Against the identification however are, the difference in the names—the latter one containing the *Ain*;—and the distance to *Lydda*, which instead of being 3 miles as in the S. being more than 4 English miles according to Van de Velde's map. Winer remarks that *Ono* is more suitable as far as its orthography is concerned; but on the other hand *Kefer 'Ana* is much too far distant from *Lydda* to meet the requirements of the passages quoted above. [R.]

\* In Neh. vi. 2 the Vat. MS., according to Mai, reads *וְהָיוּ כְּעִיר*.

† The tradition of the Talmudists is that it was left

intact by Joshua, but burnt during the war of David (Judg. xx. 46), and that 1 Chr. viii. 12 describes its restoration. (See Targum on this latter passage.)

**ONUS** (ὄνυξ: om. in Vulg.). The form in which the name ONO appears in 1 Ead. v. 22.

**ONYCHA** (ὄνυχος, *shechdeleth*: *onyx*) according to many of the old versions denotes the operculum of some species of *Strombus*, a genus of gasteropodous Mollusca. The Hebrew word, which appears to be derived from a root which means "to shell or peel off," occurs only in Ex. xxx. 34, as one of the ingredients of the sacred perfume; in Eccles. xxiv. 15, Wisdom is compared to the pleasant odour yielded by "galbanum, onyx, and sweet storax." There can be little doubt that the *onyx* of Dioscorides (ii. 10), and the *onyx* of Pliny (xxxii. 10), are identical with the operculum of a *Strombus*, perhaps *S. lentiginosus*. There is frequent mention of the *onyx* in the writings of Arabian authors, and it would appear from them that the operculum of several kinds of *Strombus* were prized as perfumes. The following is Dioscorides' description of the *onyx*: "The onyx is the operculum of a shell-fish resembling the *purpura*, which is found in India in the nard-producing lakes; it is odorous, because the shell-fish feed on the nard, and is collected after the heat has dried up the marshes: that is the best kind which comes from the Red Sea, and is whitish and shining; the Babylonian kind is dark and smaller than the other; both have a sweet odour when burnt, something like castoreum." It is not easy to see what Dioscorides can mean by "nard-producing lakes." The *onyx*, "nail," or "claw," seems to point to the operculum of the *Strombidae*, which is of a claw shape and serrated, whence the Arabs call the mollusc "the devil's claw;"

A. *Strombus Dromas*. B. The Operculum.

the *Impis odoratus*, or *Blatta byzantina*,—for under both these terms apparently the devil claw (*Teufelsklu* of the Germans, see Winer,

<sup>a</sup> *onyx*, an unused root, i. q. *שחל*; whence probably our word "shell," "scale." (See Gesenius, s. v.)

<sup>b</sup> Since the above was written, we have been favoured with a communication from Mr. Daniel Hanbury, on the subject of the *Blatta byzantina* of old Pharmacological writers, as well as with specimens of the substance itself, which it appears is still found in the bazaars of the East, though not now in much demand. Mr. Hanbury procured some specimens in Damascus in October (1880), and a friend of his bought some in Alexandria a few months previously. The article appears to be always mixed with the opercula of some species of *Purpura*. As regards the perfume ascribed to this substance, it does not appear to us, from a specimen we burnt, to deserve the character of the excellent odour which has been ascribed to it, though it is not without an aromatic scent. See a figure of the true *B. Byssini* in

*Matte*, s. v.) is alluded to in old English writers on *Materia Medica*—has by some been supposed no longer to exist. Dr. Lister laments its loss, believing it to have been a good medicine "from its strong aromatic smell." Dr. Gray of the British Museum, who has favoured us with some remarks on this subject, says that the opercula of the different kinds of *Strombidae* agree with the figures of *Blatta byzantina* and *Unguis odoratus* in the old books; with regard to the odour he writes—"The horny opercula when burnt all emit an odour which some may call sweet according to their fancy." Bochart (*Hieros*, iii. 797) believes some kind of bdellium is intended; but there can be no doubt that the *onyx* of the LXX. denotes the operculum of some one or more species of *Strombus*. For further information on this subject see Rumph (*Amboinische Raritäten-Kammer*, cap. xvii. p. 48, the German ed. Vienna, 1766), and compare also Sprengel (*Comment. ad Dioscor.* ii. 10); Forskål (*Desc. Anim.* 143, 21, "Unguis odoratus"), *Philos. Transac.* (xvii. 641); Johnston (*Introd. to Conchol.* p. 77); and Gesenius (*Thes.* s. v. *ὄνυχος*). [W. H.]

**ONYX** (ὄνυξ, *shēham*: ὁ λίθος ὁ πρῶτος, *σμάραγδος, σάρδιος, σαρδαίος, βαρβάλλος, ὄνυξ*; Aq. *σαρδόνυξ*; Symm. and Theod. *onyx* and *onyx*: *onychinus (lapis)*, *sardonychus, onyx*). The A. V. uniformly renders the Hebrew *shēham* by "onyx;" the Vulgate too is consistent with itself, the *sardonychus* (Job xxviii. 16) being merely a variety of the *onyx*; but the testimonies of ancient interpreters generally are, as Gesenius has remarked, diverse and ambiguous. The *shēham* stone is mentioned (Gen. ii. 12) as a product of the land of Havilah. Two of these stones, upon which were engraven the names of the children of Israel, six on either stone, adorned the shoulders of the high-priest's ephod (Ex. xxviii. 9-12), and were to be worn as "stones of memorial" (see Kalisch on Ex. i. c.). A *shēham* was also the second stone in the fourth row of the sacerdotal breastplate (Ex. xxviii. 20). *Shēham* stones were collected by David for adorning the Temple (1 Chr. xxix. 2). In Job xxviii. 16, it is said that wisdom "cannot be valued with the gold of Ophir, with the precious *shēham* or the sapphire." The *shēham* is mentioned as one of the treasures of the king of Tyre (Ez. xxviii. 13). There is nothing in the contexts of the several passages where the Hebrew term occurs to help us to determine its signification. Braun (*De Vest. sac. Heb.* p. 727) has endeavoured to show that the sardonych is the stone indicated, and his remarks are well worthy of careful perusal. Josephus (*Ant.* iii. 7, §5, and

Matthioli's *Comment.* in *Dioscor.* (ii. 8), where there is a long discussion on the subject; also a fig. of *Blatta byzantina* and the operculum of *Purpura* in Pomet's *Historia des Drogues*, 1691, part 2 p. 97. "Mansfield Parkyns," writes Mr. Hanbury, "in his *Life in Abyssinia* (vol. i. p. 419), mentions among the exports from Massowah, a certain article called *Imfus*, which he states is the operculum of a shell, and that it is used in Nubia as a perfume, being burnt with sandal-wood. This bit of information is quite confirmatory of Forskål's statement concerning the *Defr. el afriti*—(is not Parkyns's "Drofu" meant for *defr. صفي*)—namely, "e Mocbia per Btā. Arabes etiam affert. Nigritia fumigatorum est."

<sup>a</sup> The Rev. C. W. King writes to us that "a large, perfect sardonych is still precious. A dealer tells me he saw this summer (1861) in Paris one valued at 1000*fr.* not engraved."

*B. J.* v. 5, §7) expressly states that the shoulder-stones of the high-priest were formed of two large sardonyxes, an onyx being, in his description, the second stone in the fourth row of the breastplate. Some writers believe that the "beryl" is intended, and the authority of the LXX. and other versions has been adduced in proof of this interpretation; but a glance at the head of this article will shew that the LXX. is most inconsistent, and that nothing can, in consequence, be learnt from it. Of those who identify the *shōham* with the beryl are Eellermann (*Die Urin und Thunmin*, p. 64), Winer (*Bib. Realwort*, i. 333), and Rosenmüller (*The Mineralogy of the Bible*, p. 40, *Bib. Cub.*). Other interpretations of *shōham* have been proposed, but all are mere conjectures. Braun traces *shōham* to the Arabic *sachma*, "blackness": "Of such a colour," says he, "are the Arabian sardonyxes, which have a black ground-colour." This agrees essentially with Mr. King's remarks (*Antique Gems*, p. 9): "The Arabian species," he says, "were formed of black or blue strata, covered by one of opaque white; over which again was a third of a vermilion colour." But Gesenius and Fürst refer the Hebrew word to the Arabic *saham*, "to be pale." The different kinds of onyx and sardonyx, however, are so variable in colour, that either of these definitions is suitable. They all form excellent materials for the engraver's art. The balance of authority is, we think, in favour of some variety of the onyx. We are content to retain the rendering of the A. V., supported as it is by the Vulgate and the express statement of so high an authority as Josephus,<sup>c</sup> till better proofs in support of the claims of some other stone be forthcoming. As to the "onyx" of Eccles. xxiv. 15, see ONYCHIA.

[W. H.]

**OPHEL** (לְפֶהֱלָהּ, always with the def. article:

Ὀφείλα, ὁ Ὀφείλα; Alex. ὁ Ὀφείλα; *Ophel*). A part of ancient Jerusalem. The name is derived by the lexicographers from a root of similar sound, which has the force of a swelling or tumour (Gesenius, *Theo.*; Fürst, *Hdub.* ii. 1696). It does not come forward till a late period of Old Test. history. In 2 Chr. xxvii. 3, Jotham is said to have built much "on the wall of Ophel." Manasseh, amongst his other defensive works, "compassed about Ophel" (*Ibid.* xxxiii. 14). From the catalogue of Nehemiah's repairs to the wall of Jerusalem, it appears to have been near the "water-gate" (Neh. iii. 26) and the "great tower that lieth out" (ver. 27). Lastly, the former of these two passages, and Neh. xi. 21, shew that Ophel was the residence of the Levites. It is not again mentioned, though its omission in the account of the route round the walls at the sanctification of the second Temple, Neh. xii. 31-40, is singular.

In the passages of his history parallel to those quoted above, Josephus either passes it over altogether, or else refers to it in merely general terms—"very large towers" (*Ant.* ix. 11, §2), "very high towers" (x. 3, §2). But in his account of the last days of Jerusalem he mentions it four times as Ophla (ὁ Ὀφλά, accompanying it as in the Hebrew with the article). The first of these (*B. J.* ii. 17, §9) tells nothing as to its position;

<sup>b</sup> The onyx has two strata, the sardonyx three.

<sup>c</sup> Who speaks from actual observation: he expressly notices the fine quality of these two pieces of sardonyx."—[C. W. KING.]

<sup>d</sup> Fürst (*Hdub.* ii. 169) states, without a word that could lead a reader to suspect that there was any doubt

but from the other three we can gather something.

(1.) The old wall of Jerusalem ran above the spring of Siloam and the pool of Solomon, and on reaching the place called Ophla, joined the eastern porch of the Temple (*B. J.* v. 4, §2). (2.) "John held the Temple and the places round it, not a little in extent,—both the Ophla and the valley called Kidron" (*Ib.* v. 6, §1). (3.) After the capture of the Temple, and before Titus had taken the upper city (the modern Zion) from the Jews, his soldiers burnt the whole of the lower city, lying in the valley between the two, "and the place called the Ophla" (*Ib.* vi. 6, §3).

From this it appears that Ophel was outside the south wall of the Temple, and that it lay between the central valley of the city, which debouches along the spring of Siloam, on the one hand, and the east portion of the Temple on the other. The east portion, it should be remembered, was not on the line of the east wall of the present *Akron*, but 350 feet further west, on the line of the solid wall which forms the termination of the vaults in the eastern corner. [See JERUSALEM, vol. i. p. 1029; and the Plan, 1022.] This situation agrees with the mention of the "water-gate" in Neh. iii. 26, and the statement of xi. 21, that it was the residence of the Levites. Possibly the "great tower that lieth out" in the former of these may be the "tower of Elna," mentioned with "Ophel of the daughter of Zim," Micah (iv. 8), or that named in an obscure passage of Isaiah—"Ophel and watch tower" (xlii. 10, A. V., inaccurately "forts and towers").

Ophel, then, in accordance with the probable origin of the name, was the swelling declivity by which the Mount of the Temple slopes off on its western side into the Valley of Hinnom—a long narrow rounded spur or promontory, which intervenes between the mouth of the central valley of Jerusalem (the Tyropeon) and the Kidron, or Valley of Jehoshaphat. Halfway down it on its eastern base is the "Fount of the Virgin," so called; and at its feet the lower outlet of the same spring—the Pool of Siloam. How much of this declivity was covered with the houses of the Levites, or with the edifices which would naturally gather round them, and what the "great tower" stood we have not at present the means of ascertaining.

Professor Stanley (*Sermons on the Apostolic Age*, 329, 330) has ingeniously conjectured that the name Ophla (Ὀφλά) which was one of the titles by which St. James the Less was distinguished from other Jacobs of the time, and which is explained by Hegesippus (Euseb. *Hist. Eccl.* i. 23) as meaning "bulwark" (περιχώ) of the people, was in its original form Ophli-am (Ὀφλήαμ), in this connexion it is a singular coincidence that St. James was martyred by being thrown from the corner of the Temple, at, or close to, the very spot which is named by Josephus as the boundary of Ophel. [JAMES, vol. i. 204, EX-RUGEL, 558a.] Ewald, however (*Jerusalem*, vi. 204 note), restores the name as Ὀφλή, as if from לְפֶהֱלָהּ, a fence or boundary. [CHERL.] The has in its favour the fact that it more closely

on the point, that Ophel is identical with Ophla. It will be so, only there is not a particle of evidence to support it.

<sup>e</sup> Some of the MSS. of Eusebius have the same form (Ὀφλάα), preserving the termination, though they corrupt the former part of the word.

## OPHIR

agrees in sigification with *ωπειρή* than Ophel does.

The Ophel which appears to have been the residence of Elisha at the time of Naaman's visit to him (2 K. v. 24; A. V. "the tower") was of course a different place from that spoken of above. The narrative would seem to imply that it was not far from Samaria; but this is not certain. The LXX. and Vulg. must have read *לְפֶלֶא*, "darkness," for they give *τὸ σκοτεινόν* and *vesperi* respectively. [G.]

**O'PHIR** (עֹפִיר, עֹפִיר: *Ophir*: *Ophir*). 1. The eleventh in order of the sons of Joktan, coming immediately after Sheba (Gen. x. 29; 1 Chr. i. 23). So many important names in the genealogical table in the 10th chapter of Genesis—such as Sidon, Canaan, Asshur, Aram (Syria), Micraim (the two Egypts, Upper and Lower), Sheba, Caphtorim, and Philistim (the Philistines)—represent the name of some city, country, or people, that it is reasonable to infer that the same is the case with all the names in the table. It frequently happens that a father and his sons in the genealogy represent districts geographically contiguous to each other; yet this is not an invariable rule, for in the case of Tarahish the son of Javan (ver. 10), and of Nimrod the son of Cush, whose kingdom was Babel or Babylon (ver. 11), a son was conceived as a distant colony or offshoot. But there is one marked peculiarity in the sons of Joktan, which is common to them with the Canaanites alone, that precise geographical limits are assigned to their settlements. Thus it is said (ver. 19) that the border of the Canaanites was "from Sidon, as thou comest to Gerar, unto Gaza; as thou goest, unto Sodom and Gomorrah, and Admah, and Zeboim, even unto Lasha;" and in like manner (ver. 29, 30) that the dwelling of the sons of Joktan was "from Meha, as thou goest unto Sephar a mountain of the east." The peculiar wording of these geographical limits, and the fact that the well-known towns which define the border of the Canaanites are mentioned so nearly in the same manner, forbid the supposition that Meha and Sephar belonged to very distant countries, or were comparatively unknown; and as many of the sons of Joktan—such as Sheba, Hazarmaveth, Almodad, and others—are by common consent admitted to represent settlements in Arabia, it is an obvious inference that all the settlements corresponding to the names of the other sons are to be sought for in the same peninsula alone. Hence, as Ophir is one of those sons, it may be regarded as a fixed point in discussions concerning the place Ophir mentioned in the book of Kings, that the author of the 10th chapter of Genesis regarded Ophir the son of Joktan as corresponding to some city, region, or tribe in Arabia.

**Etymology.**—There is, seemingly, no sufficient reason to doubt that the word Ophir is Semitic, although, as is the case with numerous proper names known to be of Hebrew origin, the precise word does not occur as a common name in the Bible. See the words from עֹפִיר and עֹפִיר in Gesenius's *Thesaurus*, and compare Ἀφάρ, the metropolis of the Sabaeans in the *Periplus*, attributed

## OPHIR

637

to Arrian. Cæsius suggests that it means a "fruitful region," if it is Semitic. Baron von Wrede, who explored Hadhramaut in Arabia in 1843 (*Journal of the R. Geographical Society*, vol. xiv. p. 110), made a small vocabulary of Himyaritic words in the vernacular tongue, and amongst these he gives *ofir* as signifying red. He says that the Mahra people call themselves the tribes of the red country (*ofir*), and call the Red Sea, *bahr ofir*. If this were so, it might have somewhat of the same relation to *aphar*, "dust" or "dry ground" (N and P being interchangeable), that *adam*, "red," has to *adamah*, "the ground." Still it is unsafe to accept the use of a word of this kind on the authority of any one traveller, however accurate; and the supposed existence and meaning of a word *ofir* is recommended for special inquiry to any future traveller in the same district.

2. (*Ophir* and *Ophir*; *Ophira*, 1 K. ix. 28, x. 11; 2 Chr. viii. 18, ix. 10; in 1 K. ix. 28 the translation of the LXX. is *eis Ophir*, though the ending in the original merely denotes motion towards Ophir, and is no part of the name.) A seaport or region from which the Hebrews in the time of Solomon obtained gold, in vessels which went thither in conjunction with Tyrian ships from Ezion-geber, near Elath, on that branch of the Red Sea which is now called the Gulf of Akabah. The gold was proverbial for its fineness, so that "gold of Ophir" is several times used as an expression for fine gold (Ps. xlv. 10; Job xxviii. 16; Is. xiii. 12; 1 Chr. xxix. 4); and in one passage (Job xxii. 24) the word "Ophir" by itself is used for gold of Ophir, and for gold generally. In Jer. x. 9 and Dan. x. 5 it is thought by Gesenius and others that Ophir is intended by the word "Uphaz"—there being a very trifling difference between the words in Hebrew when written without the vowel-points. In addition to gold, the vessels brought from Ophir almug-wood and precious stones.

The precise geographical situation of Ophir has long been a subject of doubt and discussion. Calmet (*Dictionary of the Bible*, s. v. "Ophir") regarded it as in Armenia; Sir Walter Raleigh (*History of the World*, book i. ch. 8) thought it was one of the Molucca Islands; and Arias Montanus (Bochart, *Phaleg*, Pref. and ch. 9), led by the similarity of the word Parvaim, supposed to be identical with Ophir (2 Chr. iii. 6), found it in Peru.\* But these countries, as well as Iberia and Phrygia, cannot now be viewed as affording matter for serious discussion on this point, and the three opinions which have found supporters in our own time were formerly represented, amongst other writers, by Huet (*Sur le Commerce et la Navigation des Anciens*, p. 59), by Bruce (*Travels*, book ii. c. 4), and by the historian Robertson (*Disquisition respecting Ancient India*, sect. 1), who placed Ophir in Africa; by Vitringa (*Geograph. Sacra*, p. 114) and Reland (*Dissertatio de Ophir*), who placed it in India; and by Michaelis (*Spicilegium*, ii. 184), Niebuhr, the traveller (*Description de l'Arabie*, p. 253), Gossellin (*Recherches sur la Géographie des Anciens*, ii. 99), and Vincent (*History of the Commerce and Navigation of the Ancients*, ii. 265-270), who

And there within, sir, are the golden mines,  
Great Solomon's Ophir."

Arias Montanus fancied that Parvaim meant, in the dual number, two Perus; one Peru Proper, and the other New Spain (פֶּרֶאִים).

\* This strange idea of one of the most learned Spaniards of his time (b. 1527, A.D., d. 1598) accounts for the following passage in Ben Jonson's *Alchemist*, Act. II. Sc. 1:

—Come on, sir; now you set your foot on shore  
In Novo Orbe. —Here's the rich Peru;

placed it in Arabia. Of other distinguished geographical writers, Bochart (*Phaleg*, ii. 27) admitted two Ophirs, one in Arabia and one in India, i. e. at Ceylon; while D'Anville (*Dissertation sur le Pays d'Ophir*, *Mémoires de Littérature*, xxx. 83), equally admitting two, placed one in Arabia and one in Africa. In our own days the discussion has been continued by Gesenius, who in articles on Ophir in his *Thesaurus* (p. 141), and in Ersch and Gruber's *Encyclopædie* (s. v.) stated that the question lay between India and Arabia, assigned the reasons to be urged in favour of each of these countries, but declared the arguments for each to be so equally balanced that he refrained from expressing any opinion of his own on the subject. M. Quatremère, however, in a paper on Ophir which was printed in 1842 in the *Mémoires de l'Institut*, again insisted on the claims of Africa (*Académie des Inscriptions et Belles Lettres*, t. xv. ii. 362); and in his valuable work on Ceylon (part vii. chap. 1) Sir J. Emerson Tennant adopts the opinion, sanctioned by Josephus, that Malacca was Ophir. Otherwise the two countries which have divided the opinions of the learned have been India and Arabia—Lassen, Ritter, Bertheau (*Exeget. Handbuch*, 2 Chr. viii. 18), Thénius (*Exeget. Handbuch*, 1 K. x. 22), and Ewald (*Geschichte*, iii. 347, 2nd ed.) being in favour of India, while Winer (*Realh. s. v.*), Fürst (*Hebr. und Chald. Handb. s. v.*), Knobel (*Völkertafel der Genesis*, p. 190), Forster (*Geogr. of Arabia*, i. 161-167), Crawford (*Descriptive Dictionary of the Indian Islands*, s. v.), and Kalisch (*Commentary on Genesis*, chap. "The Genealogy of Nations") are in favour of Arabia. The fullest treatise on the question is that of Ritter, who in his *Erkunde*, vol. xiv., published in 1848, devoted 80 octavo pages to the discussion (pp. 351-431), and adopted the opinion of Lassen (*Ind. Alt.* i. 529) that Ophir was situated at the mouth of the Indus.

Some general idea of the arguments which may be advanced in favour of each of the three countries may be derived from the following statement. In favour of Arabia, there are these considerations:—1st. The 10th chapter of Genesis ver. 29, contains what is equivalent to an intimation of the author's opinion, that Ophir was in Arabia. [OPHIR I.] 2ndly. Three places in Arabia may be pointed out, the names of which agree sufficiently with the word Ophir: viz., Aphar, called by Ptolemy Sapphara, now Zafir or Saphar, which, according to the Periplus ascribed to Arrian, was the metropolis of the Sabæans, and was distant twelve days' journey from the emporium Muza on the Red Sea; Dafir, a city mentioned by Niebuhr the traveller (*Description de l'Arabie*, p. 219), as a considerable town of Yemen, and capital of Bellad Hadsje, situated to the north of Loheïa, and 15 leagues from the sea; and Zafir or Zalfiri [ARABIA, p. 92] (Sopher, Dhafir) now Dufar, a city on the southern coast of Arabia, visited in the 14th century by Ibn Batuta, the Arabian traveller, and stated by him to be a month's journey by land from Aden, and a month's voyage, when the wind was fair, from the Indian shores (Lee's *Translation*, p. 57). 3rdly. In antiquity, Arabia was represented as a country producing gold by four writers at least: viz., by the geographer Agatharchides, who lived in the 2nd century before Christ (in Photius 250, and Hudson's *Geograph. Minores*, i. 60); by the geographer Artemidorus, who lived a little later, and whose account has been preserved, and, as it

were, adopted by the geographer Strabo (iv. 18; by Diodorus Siculus (ii. 50, iii. 44); and by Ptolemy the Elder (vi. 32). 4thly. Eusebius, a Greek historian, who lived before the Christian era, and who, besides other writings, wrote a work respecting the kings of Judæa, expressly states, as quoted by Eusebius (*Præp. Evang.* ix. 30), that Ophir was an island with gold mines in the Erythræan Sea (Ὠφύρη, comp. Ὀφείρη, the LXX. Translation in Gen. x. 29), and that David sent miners thither in vessels which he caused to be built at Adma = Elath. Now it is true that the name of the Erythræan Sea was deemed to include the Persian Gulf, as well as the Red Sea, but it was always regarded as closely connected with the shores of Arabia, and cannot be shown to have been extended to India. 5thly. On the supposition that, notwithstanding all the ancient authorities on the subject, gold really never existed either in Arabia, or on any island along its coasts, Ophir was an Arabian emporium, into which gold was brought as an article of commerce, and was exported into Judæa. There is not a single passage in the Bible inconsistent with this supposition; and there is something like a direct intimation that Ophir was in Arabia.

While such is a general view of the arguments for Arabia, the following considerations are urged in behalf of India. 1st. Sofir is the Coptic word for India; and Sophir, or Sophira is the word used for the place Ophir by the Septuagint translators, and likewise by Josephus. And Josephus expressly states that it was a part of India (*Ant.* viii. 6, 14), though he places it in the Golden Chersonese, which was the Malay peninsula, and belonged, geographically, not to India proper, but to India beyond the Ganges. Moreover, in three passages of the Bible where the Septuagint has *Ἰσούφι* or *Ἰσούφι* (1 K. x. 28, x. 11; Is. xiii. 12, Arabian translators have used the word *India*. 2ndly. All the three important Ophir, gold, precious stones, and almsgood, or essentially Indian. Gold is found in the southern of the Indus and the Cabool River before their junction at Attock; in the Himalaya mountains, and in a portion of the Deccan, especially at Cochin. India has in all ages been celebrated for its precious stones of all kinds. And sandal-wood, which the modern Hebrew scholars regard as the almsgood of the Bible, is almost exclusively, or at any rate pre-eminently, a product of the coast of Malabar. 3rdly. Assuming that the ivory, peacocks, and apes, which were brought to Ezion-geber once in three years by the navy of Tharshish in conjunction with the navy of Hiram (1 K. x. 22), were brought from Ophir, they also collectively point to India rather than Arabia. Moreover, etymologically, not one of these words in the Hebrew is of Hebrew or Semitic origin; one being connected with Sanskrit, another with the Tamil, and another with the Malay language. [TAMISH.] 4thly. Two places in India may be specified, agreeing to a certain extent in name with Ophir; one at the mouth of the Indus, where Indian writers placed a people named the Abhira, agreeing with the name *Abelipa* of the geographer Ptolemy; and the other, the *Sourapa* of Ptolemy, the *Ouvraga* of Arrian's Periplus, where the town of Goa is now situated on the western coast of India.

Lastly, the following plans have been urged in behalf of Africa. 1st. Of the three countries, Africa, Arabia, and India, Africa is the only one which can be seriously regarded as containing districts which have supplied gold in all

tity. Although, as a statistical fact, been found in parts of India, the quantity, that India has never supplied the commerce of the world; and in no gold at all, nor any vestiges of mines have been found in Arabia. 2ndly. The eastern coast of Africa, near Mozambique, a port called by the Arabians Sofala, which, as *Sofala* and *Sofala* are easily interchanged, was the Ophir of the Ancients. When the Portuguese, A.D. 1500, first reached it by the Cape route, it was the emporium of the gold of the interior; and two Arabian vessels of gold were actually off *Sofala* at the time (Munro, cap. 58). 3rdly. On the supposed passage, 1 K. x. 22, applies to Ophir, the still stronger claims in preference to peacocks, indeed, would not have been from it; but the peacock is too delicate a long voyage in small vessels, and the *parrot*, probably signified "parrots." At the time, ivory and apes might have been in abundance from the district of which was the emporium. On the other hand, if it had been in India, other Indian productions would have been expected in the list of imports; rawls, silk, rich tissues of cotton, pepper, and cinnamon. 4thly. On the same passage, 1 K. x. 22, it can, according to Mr. Bruce, be proved by the laws of the country in the Indian Ocean, that Ophir was inasmuch as the voyage to *Sofala* from *Sofala* would have been performed exactly in the same manner; it could not have been accomplished in any other manner, and it would not have required more (vol.

The above statement of the different views has been held respecting the situation of the country, will naturally suggest itself a suspicion conclusion can be arrived at on the subject. And this seems to be true, in this sense, that in all its direct notices of Ophir as a country, it does not supply sufficient data for an independent opinion on this disputed point. At the same time, it is an inference in the highest degree that the author of the 10th chapter of Genesis regarded Ophir as in Arabia; and, in the absence of any conclusive proof that he was mistaken, it is reasonable to acquiesce in his opinion. To illustrate this view of the question it is desirable to examine closely all the passages in the Bible which mention Ophir by name. There are only five in number: three in the Books of Kings and two in the Books of Chronicles. The first is probably copied from the former; and, as it does not contain any additional information, it is sufficient to give a reference to 1 Chron. viii. 18, ix. 10. The three passages in the Books of Kings, however, being short, are set out at length. The first passage is as follows: "In the history of the reign of Solomon, King Solomon made a navy of ships at Ezion-geber, which is beside Eloth, on the shore of the Red Sea, in the land of Edom. And Hiram sent in his servants, shipmen that had knowledge of the sea, with the servants of Solomon. And they

came to Ophir, and fetched from thence gold, four hundred and twenty talents, and brought it to King Solomon," 1 K. ix. 26-29. The next passage is in the succeeding chapter, and refers to the same reign. "And the navy also of Hiram that brought gold from Ophir, brought in from Ophir great plenty of almug-trees and precious stones," 1 K. x. 11. The third passage relates to the reign of Jehoshaphat king of Judah, and is as follows: "Jehoshaphat made ships of Tharshish to go to Ophir for gold; but they went not: for the ships were broken at Ezion-geber," 1 K. xxii. 48. In addition to these three passages, the following verse on the Book of Kings has very frequently been referred to Ophir: "For the king (i. e. Solomon) had at sea a navy of Tharshish with the navy of Hiram: once in three years came the navy of Tharshish bringing gold and silver, ivory, and apes, and peacocks," 1 K. x. 22. But there is not sufficient evidence to show that the fleet mentioned in this verse was identical with the fleet mentioned in 1 K. ix. 26-29, and 1 K. x. 11, as bringing gold, almug-trees, and precious stones from Ophir; and if, notwithstanding, the identity of the two is admitted as a probable conjecture, there is not the slightest evidence that the fleet went *only* to Ophir, and that therefore the silver, ivory, apes, and peacocks must have come from Ophir. Indeed, the direct contrary might be inferred, even on the hypothesis of the identity of the two fleets, inasmuch as the actual mention of Ophir is distinctly confined to the imports of gold, almug-trees, and precious stones, and the compiler might seem carefully to have distinguished between it and the country from which silver, ivory, apes, and peacocks were imported. Hence, without referring farther to the passage in 1 K. x. 22, we are thrown back, for the purpose of ascertaining the situation of Ophir, to the three passages from the Book of Kings which were first set forth. And if those three passages are carefully examined, it will be seen that all the information given respecting Ophir is, that it was a place or region, accessible by sea from Ezion-geber on the Red Sea, from which imports of gold, almug-trees, and precious stones were brought back by the Tyrian and Hebrew sailors. No data whatever are given as to the distance of Ophir from Ezion-geber; no information direct or indirect, or even the slightest hint, is afforded for determining whether Ophir was the name of a town, or the name of a district; whether it was an emporium only, or the country which actually produced the three articles of traffic. Bearing in mind the possibility of its being an emporium, there is no reason why it may not have been either in Arabia, or on the Persian coast, or in India, or in Africa; but there is not sufficient evidence for deciding in favour of one of these suggestions rather than of the others.

Under these circumstances it is well to revert to the 10th chapter of Genesis. It has been shown [OPHIR 1] to be reasonably certain that the author of that chapter regarded Ophir as the name of some city, region, or tribe in Arabia. And it is almost equally certain that the Ophir of Genesis is the Ophir of the Book of Kings. There is no mention, either in the Bible or elsewhere, of any other Ophir;

Mr. Bruce has pointed out a passage in Milton's *Paradise Lost*, xl. 399-401, favouring this *Sofala*:—"Sofala, and Quilon, and Melind, and Sofala, thought Ophir, to the realm of Congo and Angola farthest south."

Milton followed a passage in Purchas's *Pilgrimage*, page 1072 of the 2nd volume, published in 1625; and all the modern geographical names in vv. 307-411 are in Purchas.

and the idea of there having been *two* Ophirs, evidently arose from a perception of the obvious meaning of the 10th chapter of Genesis, on the one hand, coupled with the erroneous opinion on the other, that the Ophir of the Book of Kings could not have been in Arabia. Now, whatever uncertainty may exist as to the time when the 10th chapter of Genesis was written (Knobel, *Völkertafel der Genesis*, p. 4, and Hartmann's *Forschungen über die 5 Bücher Moses*, p. 584), the author of it wrote while Hebrew was yet a living language; there is no statement in any part of the Bible inconsistent with his opinion; and the most ancient writer who can be opposed to him as an authority, lived, under any hypothesis, many centuries after his death. Hence the *burden of proof* lies on any one who denies Ophir to have been in Arabia.

But all that can be advanced against Arabia falls very short of such proof. In weighing the evidence on this point, the assumption that ivory, peacocks, and apes were imported from Ophir must be dismissed from consideration. In one view of the subject, and accepting the statement in 2 Chr. ix. 21, they might have connexion with Tarshish [TARSHISH]; but they have a very slight bearing on the position of Ophir. Hence it is not here necessary to discuss the law of monsoons in the Indian Ocean; though it may be said in passing that the facts on which the supposed law is founded, which seemed so cogent that they induced the historian Robertson to place Ophir in Africa (*Disquisition on India*, sect. 2), have been pointedly denied by Mr. Salt in his *Voyage to Abyssinia* (p. 103). Moreover, the resemblance of names of places in India and Africa to Ophir, cannot reasonably be insisted on; for there is an equally great resemblance in the names of some places in Arabia. And in reference to Africa, especially, the place there imagined to be Ophir, viz., *Sofala*, has been shown to be merely an Arabic word, corresponding to the Hebrew Shephelah, which signifies a plain or low country (Jer. xxiii. 44; Josh. xi. 16; the *Σεφέλα* of the Maccabees, 1 Macc. xii. 38; see Gesenius, *Lex. s. v.*). Again, the use of *Sofir* as the Coptic word for Ophir cannot be regarded as of much importance, it having been pointed out by Reland that there is no proof of its use except in late Coptic, and that thus its adoption may have been the mere consequence of the erroneous views which Josephus represented, instead of being a confirmation of them. Similar remarks apply to the Biblical versions by the Arabic translators. The opinion of Josephus himself would have been entitled to much consideration in the absence of all other evidence on the subject; but he lived about a thousand years after the only voyages to Ophir of which any record has been preserved, and his authority cannot be compared to that of the 10th chapter of Genesis. Again, he seems inconsistent with himself; for in *Ant.* ix. 1, §4, he translates the Ophir of 1 K. xxii. 49, and the Tarshish of 2 Chr. xx. 36, as *Pontus* and *Thrace*. It is likewise some deduction from the weight of his opinion, that it is contrary to the opinion of Eupolemus, who was an earlier writer; though he too lived at so great a distance of time from the reign of Solomon that he is by no means a decisive authority. Moreover, imagination may have acted

on Josephus to place Ophir in the Golden Chersonese, which to the ancients was, as it were, the extreme east; as it acted on Arias Montanus, to place it in Peru, in the far more improbable and distant west. All the foregoing objections having been rejected from the discussion, it remains to notice those which are based on the assertion that sandal-wood (assumed to be the same as almsg-wood), precious stones, and gold, are not products of Arabia. And the following observations tend to show that such objections are not conclusive.

1st. In the Periplus attributed to Arrian, sandal-wood (*ξύλα σαυδάρινα*) is mentioned as one of its imports into Omana, an emporium on the Persian Gulf; and it is thus proved, if any proof is requisite, that a sea-port would not necessarily be in India, because sandal-wood was obtained from it. But independently of this circumstance, the views advanced in favour of almsg-wood being the same as sandal-wood, though admissible as a conjecture, seem too weak to justify the founding an argument on them. In 2 Chr. ii. 8, Solomon is represented as writing to Hiram, king of Tyre, in these words: "Send me also cedar-trees, fir-trees, and almsg-trees out of Lebanon; for I know that thy servants can skill to cut timber in Lebanon," a passage evidently written under the belief that almsg-trees grew in Lebanon. It has been suggested that this was a mistake—but this is a point which cannot be assumed without *direct* evidence to render it probable. The LXX. translator of the Book of Kings, 1 K. x. 17, translates almsg-wood by *ξύλα πελέκηρα*, or *ἀνέκωρη*, which gives no information as to the nature of the wood; and the LXX. translator of the Chronicles renders it by *ξύλα πεύκαινα*, which strictly means *fir-wood* (compare Ennius's translation of *Mela*, v. 4, and which, at the utmost, can only be extended to any wood of resinous trees. The Vulgate translation is "thyria," i.e. wood made of this (*θύρα, θύλα*), a tree which Theophrastus mentions as having supplied peculiarly durable timber for the roofs of temples; which he says is like the cypress; and which is classed by him as evergreen with the pine, the fir, the juniper, the olive-tree, and the cedar (*Histor. Plant.* v. 3, §1, 9, §3). It is stated both by Buxtorf and Gesenius (*s. v.*) that the Rabbins understood by the word *corule*—which is certainly a most improbable meaning—and that in the 3rd century, among the Mishnah (*Kelim* 13, 6) was used for wood of the singular number. In the 13th century, Kimchi is said, proposed the meaning of Brazil wood. And it was not till last century that, for the first time, the suggestion was made that almsg-wood was the same as sandal-wood. This suggestion came from Celsius, the Swedish botanist, in his *Herbarium*, who at the same time recounted thirteen meanings proposed by others. Now, as all that has been handed down of the uses of almsg-wood is, that the king made of it a prop<sup>s</sup> or support for the House of the Lord and the king's house; and haps also psalteries for singers (1 K. x. 12), it is hard to conceive how the greatest botanical genius that ever lived can now do more than make a guess, more or less probable, at the meaning of the word.

Since the time of Celsius, the meaning of "an-

\* The general meaning of *ὑποστήριξ*, a prop or support, is certain though its special meaning in 1 K. x. 12 seems irreversibly lost. It is translated "pillars" in the A. V., and *υποστηρίγματα* in the LXX. In the corresponding

passage of 2 Chr. ix. 11, the word is *πύσσος*, the usual meaning of which is *highness*; and which is translated in the A. V. *terrace*, and in the LXX. *ἀνέκωρη*, *steps* or *stairs*. See Her. i. 181.

dal wood" has been defended by Sanscrit etymologies. According to Gesenius (*Lexicon*, s. v.), Bohlen proposed, as a derivation for *almuggin*, the Arabic article *Al*, and *mlcata*, from simple *māca*, a name for red sandal-wood. Lassen, in *Indische Alterthumskunde* (vol. i., pt. 1, p. 538), adopting the form *almugmin*, says that if the plural ending is taken from it, there remains *valgu*, as one of the Sanscrit names for sandal-wood, which in the language of the Deccan is *valgun*. Perhaps, however, these etymologies cannot lay claim to much value until it is made probable, independently, that *almug*-wood is sandal-wood. It is to be observed that there is a difference of opinion as to whether "al" in *almugmin* is an article or part of the noun, and it is not denied by any one that *chandana* is the ordinary Sanscrit word for sandal-wood. Moreover, Mr. Crawford, who resided officially many years in the East and is familiar with sandal-wood, says that it is never—now, at least—used for musical instruments, and that it is unfit for pillars, or stairs, balustrades, or banisters, or balconies. (See also his *Descriptive Dictionary of the Indian Islands*, pp. 310-375.) It is used for incense or perfume, or as fancy wood.

2. As to precious stones, they take up such little room, and can be so easily concealed, if necessary, and conveyed from place to place, that there is no difficulty in supposing they came from Ophir, simply as from an emporium, even admitting that there were no precious stones in Arabia. But it has already been observed [ARABIA, i. p. 916] that the Arabian peninsula produces the emerald and onyx stone; and it has been well pointed out by Mr. Crawford that it is impossible to identify precious stones under so general a name with any particular country. Certainly it cannot be shown that the Jews of Solomon's time included under that name the diamond, for which India is peculiarly renowned.

3. As to gold, far too great stress seems to have been laid on the negative fact that no gold nor trace of gold-mines has been discovered in Arabia. Negative evidence of this kind, in which Ritter<sup>4</sup> has placed so much reliance (vol. xiv. p. 406), is by no means conclusive. Sir Roderick Murchison and Sir Charles Lyell concur in stating that, although no rock is known to exist in Arabia from which gold is obtained at the present day, yet the peninsula has not undergone a sufficient geological examination to warrant the conclusion that gold did not exist there formerly or that it may not yet be discovered there. Under these circumstances there is no sufficient reason to reject the accounts of the ancient writers who have been already adduced as witnesses for the former existence of gold in Arabia. It is true that Artemidorus and Diodorus Siculus may merely have died on the authority of Agatharchides, but it is important to remark that Agatharchides lived in Egypt and was guardian to one of the young Ptolemies during his minority, so that he must have been familiar with the general nature of the commerce between Egypt and Arabia. Although it may have been inaccurate in details, it is not

lightly to be admitted that he was altogether mistaken in supposing that Arabia produced any gold at all. And it is in his favour that two of his statements have unexpectedly received confirmation in our own time: 1st, respecting gold-mines in Egypt, the position of which in the Bisharee Desert was ascertained by Mr. Linant and Mr. Bonomi (Wilkinson's *Ancient Egyptians*, ch. ix.); and 2nd, as to the existence of nuggets of pure gold, some of the size of an olive-stone, some of a medlar, and some of a chestnut. The latter statement was discredited by Michaelis (*Spicilegium*, p. 287, "Nec credo ullibi massas auri non experti castaneæ nuci magnitudine reperi"), but it has been shown to be not incredible by the result of the gold discoveries in California and Australia.

If, however, negative evidence is allowed to outweigh on this subject the authority of Agatharchides, Artemidorus, Diodorus Siculus, Pliny, and, it may be added, Strabo, all of whom may possibly have been mistaken, there is still nothing to prevent Ophir having been an Arabian emporium for gold (Winer, *Realw.* s. v. "Ophir"). The Periplus, attributed to Arrian, gives an account of several Arabian emporia. In the Red Sea, for example, was the Emporium Muza, only twelve days distant from Aphar the metropolis of the Sabæans and the Homerites. It is expressly stated that this port had commercial relations with Barygaza, i. e. Beroach, on the west coast of India, and that it was always full of Arabs, either ship-owners or sailors. Again, where the British town of Aden is now situated, there was another emporium, with an excellent harbour, called Arabia Felix (to be carefully distinguished from the district so called), which received its name of Felix, according to the author of the Periplus, from its being the dépôt for the merchandise both of the Indians and Egyptians at a time when vessels did not sail direct from India to Egypt, and when merchants from Egypt did not dare to venture farther eastward towards India. At Zafâr or Zafûri, likewise, already referred to as a town in Hadramût, there was an emporium in the middle ages, and there may have been one in the time of Solomon. And on the Arabian side of the Persian Gulf was the emporium of Gerrha, mentioned by Strabo (xvi. p. 766), which seems to have had commercial intercourse with Babylon both by caravans and by barges. Its exports and imports are not specified, but there is no reason why the articles of commerce to be obtained there should have been very different from those at Omana on the opposite side of the gulf, the exports from which were purple cloth, wine, dates, slaves, and gold, while the imports were brass, sandal-wood, horn, and ebony. In fact, whatever other difficulties may exist in relation to Ophir, no difficulty arises from any absence of emporia along the Arabian coast, suited to the size of vessels and the state of navigation in early times.

There do not, however, appear to be sufficient data for determining in favour of any one emporium or of any one locality rather than another in Arabia as having been the Ophir of Solomon. Mr. Forster (*Geography of Arabia*, i. 167) relies

<sup>4</sup> Bearing this in mind, it is remarkable that Ritter should have accepted Lassen's conjecture respecting the position of Ophir at the mouth of the Indus. Attock is distant from the sea 242 miles by the Indus, and 618 in a straight line; and the upper part of the Indus is about

240 miles long above Attock (Thornton's *Gazetteer of India*). Hence gold would be so distant from the mouth of the Indus, that none could be obtained thence, except from an emporium situated there.

on an Ofor or Ofir, in Sale and D'Anville's maps, as the name of a city and district in the mountains of Omán; but he does not quote any ancient writer or modern traveller as an authority for the existence of such an Ofir, though this may perhaps be reasonably required before importance is attached, in a disputed point of this kind, to a name on a map. Niebuhr the traveller (*Description de l'Arabie*, p. 253) says that Ophir was probably the principal port of the kingdom of the Sabaeans, that it was situated between Aden and Dufar (or Zafar), and that perhaps even it was Cane. Gosselin, on the other hand, thinks it was Doffir, the city of Yemen already adverted to; and in reference to the obvious objection (which applies equally to the metropolis Aphar) that it is at some distance from the sea, he says that during the long period which has elapsed since the time of Solomon, sands have encroached on the coast of Laheia, and that Ophir may have been regarded as a port, although vessels did not actually reach it (*Recherches sur la Géographie des Anciens*, l. c.). Dean Vincent agrees with Gosselin in confining Ophir to Sabaea, partly because in Gen. x. Ophir is mentioned in connexion with sons of Joktan who have their residence in Arabia Felix, and partly because, in 1 K. ix., the voyage to Ophir seems related as if it were in consequence of the visit of the Queen of Sheba to Jerusalem (*History of the Commerce and Navigation of the Ancients*, l. c.). But the opinion that Jotab and Havilah represent parts of Arabia Felix would by no means command universal assent; and although the Book of Kings certainly suggests the inference that there was some connexion between the visit of the Queen of Sheba and the voyage to Ophir, this would be consistent with Ophir being either contiguous to Sabaea, or situated on any point of the southern or eastern coasts of Arabia; as in either of these cases it would have been politic in Solomon to conciliate the good will of the Sabaeans, who occupied a long tract of the eastern coast of the Red Sea, and who might possibly have commanded the Straits of Babel-mandel. On the whole, though there is reason to believe that Ophir was in Arabia, there does not seem to be adequate information to enable us to point out the precise locality which once bore that name.

In conclusion it may be observed that objections against Ophir being in Arabia, grounded on the fact that no gold has been discovered in Arabia in the present day, seem decisively answered by the parallel case of Sheba. In the 72nd Psalm, v. 15, "gold of Sheba," translated in the English Psalter "gold of Arabia," is spoken of just as "gold of Ophir" is spoken of in other passages of the O. T., and in Ezekiel's account of the trade with Tyre (xxvii. 22), it is stated "the merchants of Sheba and Raamah, they were thy merchants: they occupied in thy fairs with chief of all spices and with all precious stones, and gold," just as in 1 K. x., precious stones and gold are said to have been brought from Ophir by the navy of Solomon and of Hiram. (Compare Plin. vi. 28; Horae, *Od.* i. 29, l. ii. 12, 24, iii. 24, 2; *Epist.* i. 7, 36; and Judg. viii. 24.) Now, of two things one is true. Either the gold of Sheba and the precious stones sold to the Tyrians by the merchants of Sheba were the natural productions of Sheba, and in this case—as the Sheba here spoken of was confessedly in Arabia—the assertion that Arabia did not produce gold falls to the ground; or the

merchants of Sheba obtained precious stones and gold in such quantities by trade, that they became noted for supplying them to the Tyrians and Jews without curious inquiry by the Jews as to the precise locality whence these commodities were originally derived. And exactly similar reasons may apply to Ophir. The resemblance seems complete. In answer to objections against the obvious meaning of the tenth chapter of *Genesis*, the alternatives may be stated as follows. Either Ophir, although in Arabia, produced gold and precious stones; or, if it shall be hereafter proved in the progress of geological investigation that this could not have been the case, Ophir furnished gold and precious stones as an emporium, although the Jews were not careful to ascertain and record the fact. [E. T.]

OPH'NI (עֹפְנִי, with the def. article—"the Ophnite;" LXX. both MSS. omit: *Opáni*). A town of Benjamin, mentioned in Josh. xviii. 24 only, apparently in the north-eastern portion of that tribe. Its name may perhaps imply that, like others of the towns of this region, it was originally founded by some non-Israelite tribe—the Ophnites—viz. in that case have left but this one slight trace of their existence. [See note to vol. i. p. 188.] In the biblical history of Palestine Ophni plays no part; but it is doubtless the Ophna of Josephus, a place which at the time of Vespasian's invasion was apparently so important as to be second only to Jerusalem (*B. J.* iii. 3, §5). It was probably in Gufnith, Gufas, or Beth-gufin of the Talmud (*Schwarz*, 126), which still survives in the name *Jifna* or *Jufna*,  $2\frac{1}{2}$  miles north-west of Beal (*Nelaud, Pal.* 816; *Rob. B. E.* ii. 294). The change from the *Ain*, with which Ophni begins to G, is common enough in the LXX. (*Comp. Gomorrah, Athaliah, &c.*) [E.]

OPH'RAH (עֹפְרָה). The name of two places in the central part of Palestine.

1. (In Judges, *עֹפְרָה*; Alex. *Appa*; in Sam. *עֹפְרָה*; *Ophra*, in Sam. *Apheza*.) In the tribe of Benjamin (Josh. xviii. 23). It is named between Hap-Parah and Chephar ha-Ammoni, but so the position of neither of these places is known, so we not thereby obtain any clue to that of Ophrah. It appears to be mentioned again (1 Sam. xiii. 17) in describing the routes taken by the spies who issued from the Philistine camp at Michmash. One of these bands of rangers went due west, in the road to Beth-horon; one towards the "crisis at Zebolm," that is in all probability one of the oaks which lead down to the Jordan valley, and thence due east; while the third took the road "to Ophrah and the land of Shual"—doubtless north, for well they could not go, owing to the position held by Saul and Jonathan. [*GIBBEAN*, vol. i. p. 678.] In accordance with this is the statement of Jerome (*On the musticon*, "Aphra"), who places it 5 miles east of Bethel. Dr. Robinson (*B. R. E.* 447) suggests its identity with *et-Tayyibeh*, a small village on the crown of a conical and very conical hill, 4 miles E.N.E. of Beita (Bethel), on the ground that no other ancient place occurred to him as probable, and that the situation accords with the notice of Jerome. In the absence of any similarity in the name, and of any more conclusive evidence, it is impossible absolutely to adopt this identification.

Ophrah is probably the same place with that which is mentioned under the slightly different name

AIN (or Ephron) and EPHRAIM. [See vol. a.] It may also have given its name to the government of APHEREMA (1 Macc.

Ῥαββῆ; and so Alex., excepting ix. 5, Ephra.) More fully OPHRAH OF THE ITES, the native place of Gideon (Judg. the scene of his exploits against Baal (ver. residence after his accession to power and the place of his burial in the family (viii. 32). In Ophrah also he deposited which he made or enriched with the ornaments from the Ishmaelite followers of Zebah nunnah (viii. 27), and so great was the of that object, that the town must then a place of great pilgrimage and resort. cations in the narrative of the position h are but slight. It was probably in Ma-i. 15), and not far distant from Shechem 5). Van de Velde (*Memoir*) suggests a d *Erfui*, a mile south of *Akrabeh*, about from *Nabhus*, and Schwarz (158) "the villa, north of Sanur," by which he probably rabeh. The former of them has the disad- of being altogether out of the territory of i. Of the latter, nothing either for or an be said.

h possibly derives its name from Ephra, who of the heads of the families of Manasseh in dite portion (1 Chr. v. 24), and who ap- have migrated to the west of Jordan with and Shechem (Num. xxvi. 30; Josh. [AB-EZER; EPHRA, vol. i. 560a; MA- p. 220a.] [G.]

RAH (עפרה; Гофepд; Alex. Гофopд:

The son of Meonothai (1 Chr. iv. 14). By a "Meonothai begat Ophrah," it is uncer- whether we are to understand that they were d son, or that Meonothai was the founder h.

TOR. 1. The A. V. rendering for *luchash*, or incantation, joined with *neben*, skillful, A. V. "eloquent orator," marg. "skillful." The phrase appears to refer to pretended magic, comp. Ps. lviii. 5. [DIVINATION.] title applied to Tertullus, who appeared cocate or patronus of the Jewish accusers ul before Felix, Acts xxiv. 1. The Latin was used, and Roman forms observed in judicial proceedings, as, to cite an ob- anel case, Norman-French was for so the language of English law proceedings. of St. Paul at Caesarea was distinctly one an citizen; and thus the advocate spoke as awyer, and probably in the Latin language xxv. 9, 10; Val. Good passage on this by Thomson (*The Land Book*, ch. xxvi.), describing the flight be-

"raven" or "crow," the companion of Zeb, the "wolf." One of the chieftains of the Midianite host which invaded Israel, and was defeated and driven back by Gideon. The title given to them (עָרָב, A. V. "princes") distinguishes them from Zebah and Zalmunna, the other two chieftains, who are called "kings" (מלכ), and were evidently superior in rank to Oreb and Zeeb. They were killed, not by Gideon himself, or the people under his immediate conduct, but by the men of Ephraim, who rose at his entreaty and intercepted the flying horde at the fords of the Jordan. This was the second Act of this great Tragedy. It is but slightly touched upon in the narrative of Judges, but the terms in which Isaiah refers to it (x. 26) are such as to imply that it was a truly awful slaughter. He places it in the same rank with the two most tremendous disasters recorded in the whole of the history of Israel—the destruction of the Egyptians in the Red Sea, and of the army of Sennacherib. Nor is Isaiah alone among the poets of Israel in his reference to this great event. While it is the terrific slaughter of the Midianites which points his allusion, their discomfiture and flight are prominent in that of the author of Ps. lxxiii. In imagery both obvious and vivid to every native of the gusty hills and plains of Palestine, though to us comparatively unintelligible, the Psalmist describes them as driven over the uplands of Gilead like the clouds of chaff blown from the threshing-floors; chased away like the spherical muzzes of dry weeds which course over the plains of Exdmelon and Philistia—flying with the dreadful hurry and confusion of the flames, that rush and leap from tree to tree and hill to hill when the wooded mountains of a tropical country are by chance ignited (Ps. lxxiii. 13, 14). The slaughter was concentrated round the rock at which Oreb fell, and which was long known by his name (Judg. vii. 25; Is. x. 26). This spot appears to have been on the east of Jordan, from whence the heads of the two chiefs were brought to Gideon to encourage him to further pursuit after the fugitive Zebah and Zalmunna.

This is a remarkable instance of the value of the incidental notices of the later books of the Bible in confirming or filling up the rapid and often necessarily slight outlines of the formal history. No reader of the relation in Judges would suppose that the death of Oreb and Zeeb had been accompanied by any slaughter of their followers. In the subsequent pursuit of Zebah and Zalmunna the "host" is especially mentioned, but in this case the chiefs alone are named. This the notices of Isaiah and the Psalmist, who evidently referred to facts with which their hearers were familiar, fortunately enable us to supply. Similarly in the narrative of the exodus of Israel from Egypt, as given in the Pentateuch, there is no mention whatever of the tempest, the thunder and lightning, and the earthquake, which from the incidental allusions of Ps. lxxvii. 16-18 we know accompanied that event, and which are also stated fully by Josephus (*Ant.* ii. 16, §3). We are thus reminded of a truth perhaps too often overlooked,

fore the wind of the dry plants of the wild artichoke. He gives also a striking Arab imprecation in reference to it, which recalls in a remarkable way the words of the Psalm quoted above:—"May you be whirled like the *ak-kub* before the wind, until you are caught in the thorn or plunged into the sea!"

that the occurrences preserved in the Scriptures are not the only ones which happened in connexion with the various events of the Sacred history: a consideration which should dispose us not to reject too hastily the supplements to the Bible narrative furnished by Josephus, or by the additions and corrections of the Septuagint, and even those facts which are reflected, in a distorted form it is true, but still often with considerable remains of their original shape and character, in the legends of the Jewish, Mahometan, and Christian East. [G.]

OREB (Oreb), i. e. Mount Horeb (2 Esd. ii. 33). [HOREB.]

OREB, THE ROCK (עֹרֵב) in Judges זֶעֶב, Alex. Ζούπεν; in Is. τόπος θάψαντος in both MSS.: *Petra Oreb*, and *Horeb*). The "raven's crag," the spot at which the Midianite chieftain Oreb, with thousands of his countrymen, fell by the hand of the Ephraimites, and which probably acquired its name therefrom. It is mentioned in Judg. vii. 25; \* Is. x. 26. It seems plain from the terms of Judg. vii. 25 and viii. 1 that the rock Oreb and the winepress Zeeb were on the east side<sup>b</sup> of Jordan. Perhaps the place called 'Orbo (עֹרְבוֹ), which in the *Beresith Rabba* (Reiland, *Pal.* 913) is stated to have been in the neighbourhood of Bethshean, may have some connexion with it. Rabbi Judah (*Ber. Rabba*, ib.) was of opinion that the *Orebin* ("ravens") who ministered to Elijah were no ravens, but the people of this Orbo or of the rock Oreb,<sup>c</sup> an idea upon which even St. Jerome himself does not look with entire disfavour (*Comm. in Is. xv. 7*), and which has met in later times with some supporters. The present defective state of our knowledge of the regions east of the Jordan renders it impossible to pronounce whether the name is still surviving. [G.]

O'REN (רֵן: 'Apdu; Alex. 'Apdu: *Aram*). One of the sons of Jerahmeel the firstborn of Hezron (1 Chr. ii. 25).

ORGAN (אֵוָן, Gen. iv. 21, Job xxi. 12; אֵוָן, Job xxx. 31, Ps. cl. 4). The Hebrew word 'ăwāb or 'uggāb, thus rendered in our version, probably denotes a pipe or perforated wind-instrument, as the root of the word indicates.<sup>d</sup> In Gen. iv. 21 it appears to be a general term for all wind-instruments, opposed to *cinnôr* (A. V. "harp"), which denotes all stringed instruments. In Job xxi. 12 are enumerated the three kinds of musical instruments which are possible, under the general terms of the timbrel, harp, and organ. The 'ăwāb is here distinguished from the timbrel and harp, as in Job xxx. 31, compared with Ps. cl. 4. Our translators adopted their rendering, "organ," from the Vulgate, which has uniformly *organum*, that is, the double or multiple pipe. The renderings of the LXX. are various: *κινύρα* in Gen. iv. 21, *ψαλμός* in Job, and *ὄργανον* in Ps. cl. 4. The Chaldee in every case has אֲבָבָא, *abbābā*, which signifies "a pipe," and is the rendering of the Hebrew word so translated in our version of Is. xxx. 29, Jer. xlviii. 36. Joel Brill, in his 2nd preface to the Psalms in Mendelssohn's Bible, adopts the opinion of those who identify it with the Paudean pipes, or syrinx, as instrument of unquestionably ancient origin, and

common in the East. It was a favourite with the shepherds in the time of Homer (*Il.* xiii. 206), and its invention was attributed to various deities. to Pallas Athene by Pindar (*Pyth.* iii. 12-14), to Pan by Pliny (vii. 57; cf. Virg. *Ecl.* ii. 32; Tibull. ii. 5, 30), by others to Marsyas or Silenus (Athen. iv. 184). In the last-quoted passage it is said that Hermes first made the syrinx with one reed, while Silenus, or, according to others, two Maen, Seuthes and Rhomakes, invented that with many reeds, and Marsyas fastened them with wax. The reeds were of unequal length but equal thickness, generally seven in number (Virg. *Ecl.* ii. 36), but sometimes nine (Theocr. *Id.* viii.). There is no among the Turks sometimes numbered fourteen or fifteen (Calmet, *Diss. in Mus. Inst. Hædr.*, in Epinini, *Thes.* xxxii. p. 790). Russell describes those he met with in Aleppo. "The syrinx, or Pan's pipe, is still a pastoral instrument in Syria; it is known also in the city, but very few of the performers can sound it tolerably well. The higher notes are clear and pleasing, but the longer reeds are apt, like the dervish's flute, to make a hissing sound, though blown by a good player. The number of reeds of which the syrinx is composed varies a different instrument, from five to twenty-four" (*Aleppo*, b. ii. c. 2, vol. i. p. 155, 2nd ed.).

If the root of the word 'ăwāb above given is correct, a stringed instrument is out of the question, and it is therefore only necessary to mention the opinion of the author of *Shillê Haggillêta* (Ugol. vol. xxxii.), that it is the same as the *laine ciola da gamba*, which was somewhat similar in form to the modern violin, and was played upon with a bow of horsehair, the chief difference being that it had six strings of gut instead of ten. Michaelis (*Suppl. ad Lex. Hebr.*, No. 1186) identifies the 'ăwāb with the psaltéry.

Winer (*Reise*, art. "Musikalische Instrumente") says that in the Hebrew version of the book of Daniel 'ăwāb is used as the equivalent of *ἄρφα* *šmponyāh* (Gr. *σμπωνία*), rendered "dulciana" in our version. [W. & H.]

ORION (אֲרִיֹן: 'Ewepos, Job ix. 9; אֲרִיֹן, Job xxxviii. 31: *Orion*, *Arcturus*, in Job xxxviii. 31. That the constellation known to the Hebrews by the name *ceāl* is the same as that which the Greeks called *orion*, and the Arabs "the giant," there seems little reason to doubt, though the ancient versions vary in their renderings. In Job ix. 9 the order of the words has evidently been transposed. In the LXX. it appears to have been thus—*ceāl* *ceāl*, 'ăsh: the Vulgate retains the words as they stand in the Hebrew; while the Peshito Syriac and *cindā*, 'ăsh, *ceāl*, rendering the last-mentioned word *גִּבּוֹר*, *gabōr*, "the giant," as in Job xxxviii. 31. In Am. v. 8 there is again a difficulty in the Syriac version, which represents *ceāl* by *לֹאֵשׁ*, 'Iyāthō, by which 'ăsh in Job ix. 9 and 'ăish in Job xxxviii. 32 (A. V. "Arcturus") are translated. Again, in Job xxxviii. 32, 'ăsh is represented by 'Ewepos in the LXX., which raises a question whether the order of the words which the translators had before them in Job ix. 9 was not, as in the Syr., *cindā*, 'ăsh, *ceāl*, in which

\* The word "upon" in the Auth. version of this passage is not correct. The preposition is אֲ = "in" or "at."

<sup>c</sup> Such is the conclusion of Reiland (*Pal.* 915, 'Oreb').

<sup>c</sup> Manasseh ben-Israel, *Conciliator*, on Lev. xl. 15.

<sup>d</sup> אֵוָן, to blow, or breathe.

ld be represented by Ἀκροῦπος, endering adopted by Jerome from er (*Comm. in Jes.* xiii. 10). But script authority supports any such received Hebrew text.

f Oriental astronomy was Nimrod, r, who was fabled to have been r for his impiety. The two dogs ch are among the constellations in d of Orion, mao: his train com- possibly an allusion to this belief t *cesil*" (Job xxviii. 31), with (Jes. i. 458) compares Prov. vii. *monicon Paschale* (p. 36) Nimrod in "a giant, the founder of Baby- sians say, was deified and placed f heaven, whom they call Orion" p. 14). The name *cesil*, literally u "an impious, godless man," is ppropriate to Nimrod, who, accord- as a rebel against God in building l, and is called by the Arab his- ker." All this, however, is the ter period, and is based upon a t Nimrod's name, and an attempt d *cesil* to a Hebrew derivation. ters, the Rabbis Isaac Israel and em, identified the Hebrew *cesil* *sohil*, by which was understood mopus. The words of R. Jonah noted by Künchi (*Lex. Heb.* s. v.), s large star called in Arabic *Sohail*, igned with it are called after its. The name *Sohail*, "foolish," was supposed influence of the star in men, and was probably an addi- identifying it with *cesil*. These d, first, upon the supposition that win its origin, and, secondly, that, it is connected with the root of whereas it is more probably derived oying firmness or strength, and he "strong one," the giant of the s. A full account of the various ave been framed on the subject Michaelis, *Suppl. ad Lex. Hebr.*, [W. A. W.]

TS, PERSONAL. The num- weight of the ornaments ordinarily person forms one of the charac- f Oriental costume, both in ancient s. The monuments of ancient e hands of ladies loaded with rings, great size, anklets, armlets, brace- varied character, and frequently ions stones or enamel, handsome ented necklaces, either of gold or ins of various kinds (Wilkinson, he modern Egyptians retain to the e, and vie with their progenitors in

the number and beauty of their ornaments (Lane, vol. iii. Appendix A.). Nor is the display confined, as with us, to the upper classes: we are told that even "most of the women of the lower orders wear a variety of trumpery ornaments, such as ear-rings, necklaces, bracelets, &c., and sometimes a nose-ring" (Lane, i. 78). There is sufficient evidence in the Bible that the inhabitants of Palestine were equally devoted to finery. In the Old Testament, Isaiah (iii. 18-23) supplies us with a detailed description of the articles with which the luxurious women of his day were decorated, and the picture is filled up by incidental notices in other places: in the New Testament the apostles lead us to infer the prevalence of the same habit when they recommend the women to adorn themselves, "not with broided hair, or gold, or pearls, or costly array, but with good works" (1 Tim. ii. 9, 10), even with "the ornament of a meek and quiet spirit, which is in the sight of God of great price" (1 Pet. iii. 4). Ornaments were most lavishly displayed at festivities, whether of a public (Hos. ii. 13) or a private character, particularly on the occasion of a wedding (Is. lxi. 10; Jer. ii. 32). In times of public mourning they were, on the other hand, laid aside (Ex. xxxiii. 4-6).

With regard to the particular articles noticed in the Old Testament, it is sometimes difficult to explain their form or use, as the name is the only source of information open to us. Much illustration may, however, be gleaned both from the monuments of Egypt and Assyria, and from the statements of modern travellers; and we are in all respects in a better position to explain the meaning of the Hebrew terms, than were the learned men of the Reformation era. We propose, therefore, to review the passages in which the personal ornaments are described, substituting, where necessary, for the readings of the A. V. the more correct sense in italics, and referring for more detailed descriptions of the articles to the various heads under which they may be found. The notices which occur in the early books of the Bible, imply the weight and abundance of the ornaments worn at that period. Eliezer decorated Rebekah with "a golden nose-ring" of half a shekel weight, and two bracelets for her hands of ten shekels weight of gold" (Gen. xxiv. 22); and he afterwards added "trinkets" of silver and trinkets of gold" (verse 53). Earrings were worn by Jacob's wives, apparently as charms, for they are mentioned in connexion with idols:—"they gave unto Jacob all the strange gods, which were in their hand, and their earrings which were in their ears" (Gen. xxxv. 4). The ornaments worn by the patriarch Judah were a "signet," which was suspended by a string round the neck, and a "staff" (Gen. xxviii. 18): the staff itself was probably ornamented, and thus the practice of the Israelites would be exactly similar to that of the Babylonians, who, according to

A. V. "ear-ring." The term is used "and "nose-ring." That it was the ent case appears from ver. 47: "I put her face" (פָּנֶיהָ). The term is appropriate to the nose-ring than to -RING; NOSE-RING.]

Y a particular kind of bracelet, on signifying "to fasten." [BRACELET.] A. V. "jewels." The word signifies

generally "articles." They may have been either vessels or personal ornaments: we think the latter sense more adapted to this passage.

4 The word *neamah* is again used, but with the addition of נֶאֱמָרָהּ, "in their ears."

\* *Chôlâm* (חֹלָם). [SEAL]

† *Pâhâh* (פָּהֶה); A. V. "bracelets." The signet is still worn, suspended by a string, in parts of Arabia. (Bebis. s. u. i. 36.)

Herodotus (i. 195), "each carried a staff, and a walking-stick, carved at the top into the form of an apple, a rose, an eagle, or something similar." The first notice of the ring occurs in reference to Joseph: when he was made ruler of Egypt, Pharaoh "took off his signet-ring" from his hand and put it upon Joseph's hand, and put a gold chain<sup>1</sup> about his neck" (Gen. xli. 42), the latter being probably a "simple gold chain in imitation of string, to which a stone scarabæus, set in the same precious metal, was appended" (Wilkinson, ii. 339). The number of personal ornaments worn by the Egyptians, particularly by the females, is incidentally noticed in Ex. iii. 22:—"Every woman shall ask (A. V. "borrow") of her neighbour *trinkets*<sup>1</sup> of silver and *trinkets*<sup>1</sup> of gold . . . and ye shall spoil the Egyptians;" in Ex. xi. 2 the order is extended to the males, and from this time we may perhaps date the more frequent use of trinkets among men; for, while it is said in the former passage:—"ye shall put them upon your sons and upon your daughters," we find subsequent notices of earrings being worn at all events by young men (Ex. xxxii. 2), and again of offerings both from men and women of "nose-rings,<sup>1</sup> and ear-rings, and rings, and necklaces,<sup>1</sup> all articles of gold" (Ex. xxxv. 22). The profusion of those ornaments was such as to supply sufficient gold for making the sacred utensils for the tabernacle, while the laver of brass was constructed out of the brazen mirrors<sup>1</sup> which the women carried about with them (Ex. xxxviii. 8). The Midianites appear to have been as prodigal as the Egyptians in the use of ornaments: for the Israelites

<sup>1</sup> *Tabbat'ath* (טַבְּעֶתֶת). The signet-ring in this, as in other cases (Esth. iii. 10, vii. 2; 1 Mac. vi. 16), was not merely an ornament, but the symbol of authority.

<sup>1</sup> *Ribid* (רִבִּיד). The term is also applied to a chain worn by a woman (Ex. xvi. 11).

<sup>1</sup> *Cell*. See note <sup>1</sup> above.

<sup>1</sup> *Chak* (חַךְ). A. V. "bracelets." The meaning of the term is rather doubtful, some authorities preferring the sense "buckle." In other passages the same word signifies the ring placed through the nose of an animal, such as a bull, to lead him by.

<sup>1</sup> *Cimêz* (צִמֶז). A. V. "tablets." It means a necklace formed of perforated gold drops strung together. [NECKLACE.]

<sup>1</sup> *Marôth* (מַרְוֹת). A. V. "looking-glasses." The use of polished mirrors is alluded to in Job xxxvii. 18. [MIRROR.]

<sup>1</sup> *Ete'adâh* (אֶעֱדָה). A. V. "chains." A cognate term, used in Is. iii. 26, means "step-chain;" but the word is used both here and in 2 Sam. i. 10 without reference to its etymological sense. [ARMLET.]

<sup>1</sup> *Agil* (אֶגִּיל); a circular ear-ring, of a solid character.

<sup>1</sup> *Cimâz*; A. V. "tablets." See note <sup>1</sup> above.

<sup>1</sup> *Nesom*; A. V. "ear-rings." See note <sup>1</sup> above. The term is here undefined; but, as ear-rings are subsequently noticed in the verse, we think it probable that the nose-ring is intended.

<sup>1</sup> *Saharônim* (שָׁהֲרֹנִים). A. V. "ornaments." The word specifies moon-shaped disks of metal, strung on a cord, and placed round the necks either of men or of camels. Compare ver. 21. [CHAINS.]

<sup>1</sup> *Netiphôth* (נֶתִּיפּוֹת). A. V. "collars" or "sweet-jewels." The etymological sense of the word is *pendants*, which were no doubt attached to ear-rings.

<sup>1</sup> *Tôrîm* (תּוֹרִים). A. V. "rows." The term means, according to Gesenius (*Thes.* p. 1499), rows of pearls or

are described as having captured "trinkets of gold armlets,<sup>1</sup> and bracelets, rings, earrings,<sup>1</sup> and necklaces,"<sup>1</sup> the value of which amounted to 1875 shekels (Num. xxxi. 53, 52). Equally valuable were the ornaments obtained from the same source after their defeat by Gideon: "the weight of the golden nose-rings<sup>1</sup> was a thousand and were hundred shekels of gold; beside collars<sup>1</sup> and earrings<sup>1</sup>" (Judg. viii. 26).

The poetical portions of the O. T. contain numerous references to the ornaments worn by the Israelites in the time of their highest prosperity. The appearance of the bride is thus described in a book of the Canticles:—"Thy cheeks are set with beads,<sup>1</sup> thy neck with perforated<sup>1</sup> jewels; we will make thee beads of gold with necklaces of silver" (i. 10, 11). Her neck rising tall and stately "like the tower of David builded for an armoury," was decorated with various ornaments hanging like the "thousand bucklers, all shields mighty men, on the walls of the armoury" (ii. 3); her hair falling gracefully over her neck is described figuratively as a "chain"<sup>1</sup> (iv. 2); and the "roundings"<sup>1</sup> (not as in the A. V. "the sides") of her thighs are likened to the "pendants"<sup>1</sup> of a ring, which tapers gradually downwards (v. 10). So again we read of the bridegroom:—"His feet are . . . fitly set,"<sup>1</sup> as though they were guarding the sockets of rings (v. 12); "his hands as gold rings<sup>1</sup> set with the beryl,"<sup>1</sup> as is explained by Gesenius, *Thesaur.* p. 127; his legs when curved are like gold rings, and the curls of his hair with henna resemble gums. Lastly, the hands

beads; but, as the etymological sense is somewhat of a circle, it may rather mean the individual beads which might be strung together, and so make a row across the cheeks. In the next verse the same word is used in the A. V. "borders." The same must however be the same in both verses, and the point of contrast here chance consist in the difference of the material to which in ver. 10 being of some ordinary metal, while here ver. 11 were to be of gold.

<sup>1</sup> *Charâzim* (חֲרָצִים). A. V. "chains." The word would apply to any perforated articles, such as a pearl, coral, &c.

<sup>1</sup> *Anâk* (אֲנָק). In the A. V. it is supposed to be really a chain; and hence some critics explain its use attached to it, as meaning a "neck" or "necklace." The latter, which is the correct sense here, is retained by treating *anâk* as metaphorically applied to a pendant lock of hair.

<sup>1</sup> *Chalûm* (חָלָם). A. V. "jewels." Gesenius explains the term as referring to a necklace, and explains the passage, "the roundings of thy legs are like the roundings of a necklace." This view of the word is not supported, as *chalûm* may be combined in the word to the use of a cognate term is used in Hos. ii. 13, and is rendered in the A. V. "jewels."

<sup>1</sup> The words in the original literally mean *roundings*; and the previous reference to "roundings of legs" would rather lead us to adopt a rendering of *roundings* with that image, as is done in the LXX and the Vulgate *καθήμεναι ὡς ἑλαιομακρὰ ἰδαναι, ὡς ἑλαιομακρὰ ἰδαναι*.

<sup>1</sup> The term here rendered "chain," *netiphôth*, is nowhere else found in this sense, it is only used of a personal ornament. Its etymological sense implies *roundings*, and therefore the word stands of *roundings* "stuffs;" in which case a comparison might be drawn between the outstretched fingers and the *roundings* of a staff, of which we have already spoken (see *in loc.*)

after close affection is expressed thus:—"Set me as a seal upon thine heart, as a seal upon thine arm," whether that the seal itself was the most valuable personal ornament worn by a man, as in Jer. xxii. 24; Hag. ii. 23, or whether perchance the close contiguity of the seal to the wax on which it is impressed may not rather be intended (Cant. viii. 6). We may further notice the imagery employed in the Proverbs to describe the effects of wisdom in beautifying the character; in reference to the terms used we need only explain that the "ornament" of the A. V. in i. 9, iv. 9, is more specifically a *wreath* or *garland*; the "chains" of i. 9, the *drops*, of which the necklace was formed; the "jewel of gold in a swine's snout" of xi. 22, a *nose-ring*; the "jewel" of xx. 15, a *trinket*, and the "ornament" of xiv. 12, an *ear-pendant*.<sup>b</sup>

The passage of Isaiah (iv. 18-23), to which we have already referred, may be rendered as follows:—(18) "In that day the Lord will take away the bravery of their *anklets*,<sup>a</sup> and their *lace caps*,<sup>d</sup> and their *necklaces*,<sup>e</sup> (19) the *ear-pendants*,<sup>f</sup> and the *bracelets*,<sup>g</sup> and the *light veils*,<sup>h</sup> (20) the *turbans*,<sup>i</sup> and the *step-chains*,<sup>j</sup> and the *girdles*,<sup>k</sup> and the *scant-bottles*,<sup>l</sup> and the *amulets*,<sup>m</sup> (21) the rings and *nose-rings*,<sup>n</sup> (22) the *state-dresses*<sup>o</sup> and the *cloaks*, and the *shawls*, and the *purses*,<sup>p</sup> (23) the *mirrors*,<sup>q</sup> and the fine linen *shirts*, and the *turbans*,<sup>r</sup> and the *light dresses*."<sup>s</sup>

The following extracts from the Mishna (*Sabb. cap. vi.*) illustrate the subject of this article, it being premised that the object of the enquiry was to ascertain what constituted a proper article of dress, and what might be regarded by rabbinical refinement as a burden:—"A woman must not go out (on the Sabbath) with linen or woollen laces, nor with the straps on her head: nor with a frontlet and pendants thereto, unless sewn to her cap: nor with a golden tower (i. e. an ornament in the shape of a tower): nor with a tight gold chain: nor with nose-rings: nor with finger-rings on which

there is no seal: nor with a needle without an eye (§ 1): nor with a needle that has an eye: nor with a finger-ring that has a seal on it: nor with a diadem: nor with a smelling-bottle or balm-flask (§ 3). A man is not to go out . . . with an amulet, unless it be by a distinguished sage (§ 2): knee-buckles are clean and a man may go out with them: step-chains are liable to become unclean, and a man must not go out with them" (§ 4). [W. L. B.]

ORNAN (אֲרָנָן; 'Oppā: Ornan). The form in which the name of the Jebusite king, who is the older record of the Book of Samuel is called Araunah, Aranyah, Ha-avannah, or Haornah, is given in Chronicles (1 Chr. xxi. 15, 18, 20-25, 28; 2 Chr. iii. 1). This extraordinary variety of form is a strong corroboration to the statement that Ornan was a non-Israelite. [ARAUANAH; JEBUSITE, vol. i. 937b.]

In some of the Greek versions of Origen's Hexapla collected by Bahrdt, the threshing-floor of Ornan ('Εὐρά τοῦ Ἰεβοσαλου) is named for that of Nachon in 2 Sam. vi. 6. [G.]

OR'PAH (אֲרָפָה; 'Oppā: Orpha). A Moabite woman, wife of Chilion son of Naomi, and thereby sister-in-law to RUTH. On the death of their husbands Orpah accompanied her sister-in-law and her mother-in-law on the road to Bethlehem. But here her resolution failed her. The offer which Naomi made to the two younger women that they should return "each to their own mother's house," after a slight hesitation, she embraced. "Orpah kissed her mother-in-law," and went back "to her people and to her gods," leaving to the unconscious Ruth the glory, which she might have rivalled, of being the mother of the most illustrious house of that or any nation. [G.]

ORTHO'SIAS ('Orthosias; Alex. 'Orthosia: Orthosias). Tryphon, when besieged by Antiochus Sidetes in Dora, fled by ship to Orthosias (1 Macc.

<sup>a</sup> Liryāh (לִירְיָה).

<sup>b</sup> See note <sup>a</sup> above.

<sup>c</sup> The word is *nezem*. See note <sup>a</sup> above.

<sup>d</sup> Chāl. See note <sup>a</sup> above.

<sup>e</sup> Aḥshām (אֲחֶשְׁתָּם); A. V. "tinkling ornaments about their feet." The effect of the anklet is described in ver. 16 "making a tinkling with their feet." [ANKLET.]

<sup>f</sup> Naphāim (נִפְתָּיִם); A. V. "cauls" or "net works." The term has been otherwise explained as meaning ornaments shaped like the sun, and worn as a necklace. [HEAT.]

<sup>g</sup> Sakharonim; A. V. "round tires like the moon." See note <sup>a</sup> above.

<sup>h</sup> Netaphāh; A. V. "chains" or "sweet balls." See note <sup>a</sup> above.

<sup>i</sup> Shārāh (שָׂרָה); The word refers to the construction of the bracelet by *interlacing* cords or metal rods.

<sup>j</sup> Shā'āh (שָׂאָה); A. V. "mufflers" or "spangled ornaments." The word describes the *tremulous* motion of the veil. [VEIL.]

<sup>k</sup> Pārah (פָּרָה); A. V. "bonnets." The *pa'ar* may mean more specifically the decoration in front of the turban. [HEADDRESS.]

<sup>l</sup> Shā'āh (שָׂאָה); A. V. "ornaments of the legs." See note <sup>a</sup> above. The effect of the step-chain is to give a *mincing* gait, as described in ver. 16.

<sup>m</sup> Aḥshām (אֲחֶשְׁתָּם); A. V. "head-bands." It probably means a handsomely decorated girdle. [GIRDLE.] See *formed part* of a bride's attire (Jer. ii. 32)

<sup>n</sup> Bottle hampheah (בֹּתְלֵי הַמֶּפֶחַ); A. V. "tablets," or "houses of the soul," the latter being the literal rendering of the words. The scent-bottle was either attached to the girdle or suspended from the neck.

<sup>o</sup> Lechshām (לְחֶשֶׁת); A. V. "ear-rings." The meaning of this term is extremely doubtful: it is derived from a root signifying "to whisper," and hence is applied to the mutterings of serpent charmers, and in a secondary sense to amulets. They may have been in the form of ear-rings, as already stated. The etymological meaning might otherwise make it applicable to describe light, rustling robes (Schachtel, *Archäol.* i. 30).

<sup>p</sup> A. V. "nose-jewels."

<sup>q</sup> For this and the two following terms see DRESS.

<sup>r</sup> Charitim (חַרִּיתִּים); A. V. "crisping-pins." Compare 2 K. v. 23. According to Gesenius (*Thes.* p. 519), the purse is so named from its round, conical form.

<sup>s</sup> Gilyōnim (גִּלְיוֹנִים); A. V. "glasscs." The term is not the same as was before used; nor is its sense well ascertained. It has been otherwise understood as describing a transparent material like gauze. See DRESS.

<sup>t</sup> A. V. "hoods." [HEADDRESS.]

<sup>u</sup> A. V. "vails." [DRESS.]

<sup>v</sup> Declined 'Oppā, 'Oppār, in the Vat. MS. (Mal); but in the Alex. MS. constantly Oppā. In the Targum to Chronicles the name is given in four different forms:—usually אֲרָנָן, but also אֲרָנָה, אֲרָנָה, אֲרָנָה, and אֲרָנָה. See the edition of Beck (*Aug. Vind.* 1860).

rv. 37). Orthosia is described by Pliny (v. 17) as north of Tripolis, and south of the river Eleutherus, near which it was situated (Strabo, xvi. p. 753). It was the northern boundary of Phoenice, and distant 1130 stadia from the Orontes (id. p. 760). Shaw (*Trav.* p. 270, 271, 2nd ed.) identifies the Eleutherus with the modern Nahr el-Bârid, on the north bank of which, corresponding to the description of Strabo (p. 753), he found "ruins of a considerable city, whose adjacent district pays yearly to the Bashaws of Tripoly a tax of fifty dollars by the name of *Or-tosa*. In Peutinger's Table, also, Orthosia is placed thirty miles to the south of Antaratad, and twelve miles to the north of Tripoly. The situation of it likewise is further illustrated by a medal of Antoninus Pius, struck at Orthosia; upon the reverse of which we have the goddess Astarte treading upon a river. For this city was built upon a rising ground on the northern banks of the river, within half a furlong of the sea, and, as the rugged eminences of Mount Libanus lie at a small distance in a parallel with the shore, Orthosia must have been a place of the greatest importance, as it would have hereby the entire command of the road (the only one there is) betwixt Phoenice and the maritime parts of Syria." On the other hand, Mr. Porter, who identifies the Eleutherus with the modern Nahr el-Kebir, describes the ruins of Orthosia as on the south bank of the Nahr el-Bârid, "the cold river" (*Handbk.* p. 593), thus agreeing with the accounts of Ptolemy and Pliny. The statement of Strabo is not sufficiently precise to allow the inference that he considered Orthosia north of the Eleutherus. But if the ruins on the south bank of the Nahr el-Bârid be really those of Orthosia, it seems an objection to the identification of the Eleutherus with the Nahr el-Kebir; for Strabo at one time makes Orthosia (xiv. p. 670), and at another the neighbouring river Eleutherus (δ ἑλευθερίος ποταμός), the boundary of Phoenice on the north. This could hardly have been the case if the Eleutherus were 3½ hours, or nearly twelve miles, from Orthosia.

According to Josephus (*Ant.* x. 7, §2), Tryphon fled to Apamea, while in a fragment of Chama, quoted by Grimm (*Kurzgef. Handb.*) from Müller's *Frug. Græc. Hist.* iii. p. 644, fr. 14, he is said to have taken refuge at Ptolemais. Grimm reconciles these statements by supposing that Tryphon fled first to Orthosia, then to Ptolemais, and lastly to Apamea, where he was slain. [W. A. W.]

**OSAIAS** (Ὀσαίας: sm. in Vulg.). A corruption of JESHAIAH (1 Ead. viii. 48; comp. Ead. viii. 19).

**OSE'A** (Osee). HOSHEA the son of Elah, king of Israel (2 Ead. xiii. 40).

**OSE'AS** (Osee). The prophet Hosea (2 Ead. i. 39).

**OSHE'A** (הֶשֶׁה, i. e. Hoshea; Samar. יְהוֹשֻׁעַ: *Absh.* Osee). The original name of Joshua the son of Nun (Num. xiii. 8), which on some occasion not stated—but which we may with reason conjecture to have been his resistance to the factious conduct of the spies—received from Moses (ver. 16) the addition of the great name of Jehovah, so lately revealed to the nation (Ex. vi. 3), and thus from "Help" became "Help of Jehovah." The Samaritan Codex has Jehoshua in both places, and therefore misses the point of the change.

The original form of the name recurs in Deut.

xxii. 44, though there the A. V. (with some accuracy than here) has Hoshea.

Probably no name in the whole Bible appears so many forms as that of this great peacock, in the original five, and in the A. V. no less than seven—Oshea, Hoshea, Jehoshua, Jehoshuah, Jeshua, Jesus; and if we add Hosen (also identical with Oshea) and Osen, nine. [G.]

**OSPRAY** (הַיַּיִט, *ospiyyah*: *haliaetus*: *haliaetus*). The Hebrew word occurs only in Lev. x. 13, and Deut. xiv. 12, as the name of some marine bird which the law of Moses disallowed as food to the Israelites. The old versions and many commentators are in favour of this interpretation; but Beza (*Hieroz.* ii. 774) has endeavoured, though on no reasonable grounds, to prove that the bird denoted by the Hebrew term is identical with the *haliaetus* (*αλκατρεος*) of Aristotle, the *haliaetus aquila* of Pliny. There is, however, some identity in identifying the *haliaetus* of Aristotle and Pliny, on account of some statements these writers give with respect to the habits of this bird. The former description they give would suit either the *ospi* (*Pandion haliaetus*) or the white-tailed eagle

*Pandion haliaetus*

(*Haliaetus albicilla*). The following passage, however, of Pliny (x. 3), points to the osprey: "The *haliaetus* poises itself aloft, and the moment it catches sight of a fish in the sea, before passing headlong upon it, and clearing the water with its

*Haliaetus albicilla*

breast, carries off its booty." With this may be compared the description of a modern naturalist, Dr. Richardson: "When looking out for its prey it sails with great ease and elegance, in undulating lines at a considerable altitude above the water, from whence it precipitates itself upon its quarry, and bears it off in its claws." Again, both Aristotle and Pliny speak of the diving habits of the *haliaetus*. The osprey often plunges entirely under the water in pursuit of fish. The osprey belongs to the family *Falconidae*, order *Raptiformes*. It has a wide geographical range, and is occasionally seen in Egypt; but as it is rather a northern bird, the Heb. word may refer, as Mr. Tristram suggests to us, either to the *Aquila naevia*, or *A. naevifrons*, or more probably still to the very abundant *Circus gallicus* which feeds upon reptiles. [W. H.]

OSSEFRAGE (עֲרֵב, *peres*; γρύψ: *gryps*).

There is much to be said in favour of this translation of the A. V. The word occurs, as the name of an unclean bird, in Lev. xi. 13, and in the parallel passage of Deut. xiv. 12. (For other renderings of *peres* see Bochart, *Hieroz.* ii. 770.) The Arabic version has *okab*, which Bochart renders *melanoleucos*, "the black eagle." [OSSEFRAGE.] This word, however, is in all probability generic, and is used to denote any bird of the eagle kind, for in the vernacular Arabic of Algeria *okab* is "the generic

the ossefrage has the hooked beak characteristic of the order *Raptiformes* in a very marked degree. If much weight is to be allowed to etymology, the *peres* of the Hebrew Scriptures may well be represented by the ossefrage, or bone-breaker; for *peres* in Hebrew means "the breaker." And the ossefrage (*Gypaetus barbatus*) is well deserving of his name in a more literal manner, it will appear, than Colonel H. Smith (*Kitto's Cyc. art.* "Peres") is willing to allow; for not only does he crush kids and lambs, and even men, off the rocks, but he takes the bones of animals which other birds of prey have devoured of the flesh high up into the air, and lets them fall upon a stone in order to crack them, and render them more digestible even for his enormous powers of deglutition. (See Mr. Simpson's very interesting account of the *Lammergeyer* in *Ibid.* ii. 282.) The *Lammergeyer*, or bearded vulture, as it is sometimes called, is one of the largest of the birds of prey. It is not uncommon in the East; and Mr. Tristram several times observed this bird "sailing over the high mountain-passes west of the Jordan" (*Ibid.* i. 23). The English word *ossefrage* has been applied to some of the *Falconidae*; but the *ossefrage* of the Latins evidently points to the *Lammergeyer*, one of the *Vulturidae*. [W. H.]

OSTRICH. There can be no doubt that the Hebrew words *bath haya'andah*, *ya'en*, and *randan*, denote this bird of the desert.

*Oryx capensis* Linn.

used by the Arabs to express any of the large kind of the *Falconidae*." (See Luchie's *Catalogue des Oiseaux observés en Algérie*, p. 37.) There is nothing conclusive to be gathered from the *gryps* of the LXX. and the *gryps* of the Vulgate, which is the name of a fabulous animal. Etymologically the word points to some rapacious bird with an eminently "hooked beak;" and certainly

1. *Bath haya'andah* (בַּת הַיְאֵנָה: στρουθίος, *strophios*, στρούφις: *strophis*) occurs in Lev. xi. 16, Deut. xiv. 15, in the list of unclean birds; and in other passages of Scripture. The A. V. erroneously renders the Hebrew expression, which signifies either "daughter of greediness" or "daughter of shouting," by "owl," or, as in the margin, by "daughter of owl." In Job xxx. 29, Is. xxxiv. 13, and *Ibid.* 20, the margin of the A. V. correctly reads "ostriches." Bochart considers that *bath haya'andah* denotes the female ostrich only, and that *tachand*, the following word in the Hebrew text, is to be restricted to the male bird. In all probability, however, this latter word is intended to signify a bird of another genus. [NIGHT-HAWK.] There is considerable difference of opinion with regard to the etymology of the Hebrew word *ya'andah*. Bochart (*Hieroz.* ii. 811) derives it from a root *ya'* meaning to "cry out" (see also Maurer, *Comment. in V. T. ad Thren.* iv. 3); and this is the interpretation of old commentators generally. Gesenius (*Thes. a. v.* עָנָה) refers the word to a root which signifies "to be greedy or voracious;" and detours to the explanation given by Michaelis (*Suppl. ad Lex. Heb.* p. 1127), and by Rosenmüller (*Not. ad Hieroz.* ii. 829, and *Schol. ad Lev.* xi. 16), who trace the Hebrew word *ya'andah* to one which in Arabic denotes "hard and sterile land;" *bath haya'andah* accordingly would mean "daughter of the desert." Without entering into the merits of these various explanations, it will be enough to mention that any one of them is well suited to the habits of the ostrich. This bird, as is well known, will swallow almost any substance, pieces of iron, large stones, &c. &c.; this it does probably in order to assist the triturating action of the gizzard; so that the Oriental expression of "daughter of voracity" is

- עֲרֵב, from עָרַב, "to break," "to crush."
- עָנָה "to cry out."
- עָנָה

9-6-  
• عَانَة, *lana dura et sterilis*

rennently characteristic of the ostrich.\* With regard to the two other derivations of the Hebrew word, we may add that the cry of the ostrich is said sometimes to resemble the lion, so that the Hot-tentots of S. Africa are deceived by it; and that its particular haunts are the parched and desolate tracts of sandy deserts.

The loud crying of the ostrich seems to be referred to in Mic. i. 8: "I will wail and howl . . . I will make a mourning as the ostriches" (see also Job xxx. 29). The other passages where *bath haya'andh* occurs point to the desolate places which are the natural habitat of these birds.

2. *Yé'énin* (יְעִנִּין) occurs only in the plural number יְעִנִּינִי, *yé'énin* (LXX. *στρουθίων, struthio*), in Lam. iv. 3, where the context shews that the ostrich is intended: "The daughter of my people is become cruel like the ostriches in the wilderness." This is important, as shewing that the other word (1), which is merely the feminine form of this one, with the addition of *bath*, "daughter," clearly points to the ostrich as its correct translation, even if all the old versions were not agreed upon the matter. For remarks on Lam. iv. 3, see below.

3. *Rénánin* (רִנְנִין). The plural form (רִנְנִינִי, *renánin*: LXX. *ερωδηνος: struthio*) alone occurs in Job xxxix. 13; where, however, it is clear from the whole passage (13-18) that ostriches are intended by the word. The A. V. renders *renánin* by "peacocks," a translation which has not found favour with commentators; as "peacocks," for which there is a different Hebrew name,<sup>†</sup> were probably not known to the people of Arabia or Syria before the time of Solomon. [PEACOCKS.] The "ostrich" of the A. V. in Job xxxix. 13 is the representative of the Hebrew *nótseh*, "fentner." The Hebrew *renánin* appears to be derived from the root *ránan*,<sup>‡</sup> "to wail," or to "utter a stridulous sound," in allusion to this bird's nocturnal cries. Gesenius compares the Arabic *zimar*, "a female ostrich," from the root *zamar*, "to sing."

The following short account of the nidification of the ostrich (*Struthio camelus*) will perhaps elucidate those passages of Scripture which ascribe cruelty to this bird in neglecting her eggs or young. Ostriches are polygamous: the hens lay their eggs promiscuously in one nest, which is merely a hole scratched in the sand; the eggs are then covered over to the depth of about a foot, and are, in the case of those birds which are found within the tropics, generally left for the greater part of the day to the heat of the sun, the parent-birds taking their turns at incubation during the night. But in those countries which have not a tropical sun ostriches frequently incubate during the day, the male taking his turn at night, and watching over the eggs with great care and affection, as is evidenced by the fact that jackals and other of the smaller *carnivora* are occasionally found dead near the nest, having been killed by the ostrich in defence of the eggs or young. "As a further proof of the affection of the ostrich for its young" (we quote from Shaw's *Zoology*, xi. 426), "it is related by Thunberg that he once rode past a place where a female was sitting

on her nest, when the bird sprang up and passed him, evidently with a view to prevent his passing her eggs or young." The habit of the ostrich leaving its eggs to be nurtured by the sun: has been usually appealed to in order to confirm the biblical account, "she leaveth her eggs to the sun;" but, as has been remarked above, this is probably the case only with the tropical birds: the ostriches with which the Jews were acquainted were, it is likely, birds of Syria, Egypt, and North Africa. but, even if they were acquainted with the habits of the tropical ostriches, how can it be said that "she forgetteth that the foot may crush" the egg when they are covered a foot deep or more in sand? We believe the true explanation of the

Ostrich.

passage is to be found in the fact that the ostrich deposits some of her eggs not in the sand, but around it; these lie about on the surface of the sand, to all appearance forsaken; they are, however, designed for the nourishment of the young birds, according to Levaillant and Bonaparte (*Arab. An. King*, by Griffiths and others, vol. 426). Are not these the eggs "that the foot may crush" as may not hence be traced the cruelty which Scripture attributes to the ostrich? We have had occasion to remark in a former article (AST) that the language of Scripture is adapted to the opinions commonly held by the people of the East; for how otherwise can we explain, for instance, the passage which ascribe to the hare or to the monkey the habit of chewing the cud? And this remark will be good in the passage of Job which speaks of the ostrich being without understanding. It is a general belief amongst the Arabs that the ostrich is a very stupid bird: indeed they have a proverb, "stupid as an ostrich;" and Bochart (*Hieros. li. 865*) has given us five points on which this bird is supposed to deserve its character. They may be briefly stated thus:—(1) Because it will swallow iron, steel,

יְעִנִּינִי.

יְעִנִּינִי.

\* Mr. Tristram, who has paid considerable attention to the habits of the ostrich, has kindly read over this article; he says, "The necessity for swallowing stones, &c., may be understood from the favourite food of the tame ostriches I have seen being the date-stone, the hardest of vegetable substances."

† See Tristram (*Ibid.* li. 78). "Two Andes men dig with their hands, and presently brought up for me fresh eggs from the depth of about a foot under the sand."

Sec. (2) Because when it is hunted it thrusts its head into a bush and imagines the hunter does not see it;<sup>b</sup> (3) Because it allows itself to be deceived and captured in the manner described by Strabo (xvi. 775, ed. Kramer); (4) Because it neglects its eggs; (5) Because it has a small head and few brains. Such is the opinion the Arabs have expressed with regard to the ostrich; a bird, however, which by no means deserves such a character, as travellers have frequently testified. "So wary is the bird," says Mr. Tristram (*Ibis*, ii. 73), "and so open are the vast plains over which it roams, that no ambuscades or artifices can be employed, and the vulgar resource of dogged perseverance is the only mode of pursuit."

Dr. Shaw (*Travels*, ii. 345) relates as an instance of want of sagacity in the ostrich, that he "saw one swallow several leaden bullets, scorching hot from the mould." We may add that not unfrequently the stones and other substances which ostriches swallow prove fatal to them. In this one respect, perhaps, there is some foundation for the character of stupidity attributed to them.

The ostrich is forbidden to be used as food by the Levitical law, but the African Arabs, says Mr. Tristram, eat its flesh, which is good and sweet. Ostrich's brains were among the dainties that were placed on the supper-tables of the ancient Romans. The fat of the ostrich is sometimes used in medicine for the cure of palsy and rheumatism (Pococke, *Trav.* i. 209). Burckhardt (*Syria*, Append. p. 664) says that ostriches breed in the Dnahy. They are found, and seem formerly to have been more abundant than now, in Arabia.

The ostrich is the largest of all known birds, and perhaps the swiftest of all cursorial animals. The capture of an ostrich is often made at the sacrifice of the lives of two horses (*Ibis*, ii. 73). Its strength is enormous. The wings are useless for flight, but when the bird is pursued they are extended and act as sails before the wind. The ostrich's feathers so much prized are the long white plumes of the wings. The best come to us from Barbary and the west coast of Africa. The ostrich belongs to the family *Struthionidae*, order *Cursores*. [W. H.]

#### OTHNI (אֹתְנִי: 'Othni; Alex. Γοθνι: Othni).

Son of Shemaiah, the firstborn of Obad-edom, one of the "able men for strength for the service" of the tabernacle in the reign of David (1 Chr. xvi. 7). The name is said by Gesenius to be derived from an obsolete word, 'Othen, "a lion."

#### OTHNIEL (אֹתְנִיֵּל, "lion of God," cf. Othni,

1 Chr. xvi. 7: Γοθνιήλ: Othmiel), son of Kenaz, and younger brother of Caleb, Josh. xv. 17; Judg. i. 13, iii. 9; 1 Chr. iv. 13. But these passages all leave it doubtful whether Kenaz was his father, or, as is more probable, the more remote ancestor and head of the tribe, whose descendants were called Kenazites, Num. xxxi. 12, &c., or sons of Kenaz. If Jephthah was Caleb's father, then probably he was father of Othniel also. [CALEB.] The first mention of Othniel is on occasion of the taking of Kirjath-Sepher, or Debir, as it was afterwards called. Debir was included in the mountainous territory near Hebron, within the border of Judah, assigned to Caleb the Kenazite (Josh. xiv.

12-14); and in order to stimulate the valour of the assailants, Caleb promised to give his daughter Achsah to whosoever should assault and take the city. Othniel won the prize, and received with his wife in addition to her previous dowry the upper and nether springs in the immediate neighbourhood. These springs are identified by Van de Velde, after Stewart, with a spring which rises on the summit of a hill on the north of Wady Dilbeh (2 hours S.W. from Hebron), and is brought down by an aqueduct to the foot of the hill. (For other views see DEBIR). The next mention of Othniel is in Judg. iii. 9, where he appears as the first judge of Israel after the death of Joshua, and their deliverer from their first servitude. In consequence of their intermarriages with the Canaanites, and their frequent idolatries, the Israelites had been given into the hand of Chushan-Rishathaim, king of Mesopotamia, for eight years. From this oppressive servitude they were delivered by Othniel. "The Spirit of the Lord came upon him, and he judged Israel, and went out to war: and the Lord delivered Chushan-Rishathaim king of Mesopotamia into his hand; and his hand prevailed against Chushan-Rishathaim. And the land had rest forty years. And Othniel the son of Kenaz died."

This with his genealogy, 1 Chr. iv. 13, 14, which assigns him a son, Hathath, whose posterity, according to Judith vi. 15, continued till the time of Holofernes, is all that we know of Othniel. But two questions of some interest arise concerning him, the one his exact relationship to Caleb; the other the time and duration of his judgeship.

(1) As regards his relationship to Caleb, the doubt arises from the uncertainty whether the words in Judg. iii. 9, "Othniel the son of Kenaz, Caleb's younger brother," indicate that Othniel himself, or that Kenaz, was the brother of Caleb. The most natural rendering, according to the canon of R. Moses ben Nachman, on Num. x. 29, that in constructions of this kind such designations belong to the principal person in the preceding sentence, makes Othniel to be Caleb's brother. And this is favoured by the probability that Kenaz was not Othniel's father, but the father and head of the tribe, as we learn that Kenaz was, from the designation of Caleb as "the Kenazite," or "son of Kenaz." Jerome also so translates it, "Othniel filius Kenaz, frater Caleb junior;" and so did the LXX. originally, because even in those copies which now have δδελφού, they still retain νεώτερος in the acc. case. Nor is the objection, which influences most of the Jewish commentators to understand that Kenaz was Caleb's brother, and Othniel his nephew, of any weight. For the marriage of an uncle with his niece is not expressly prohibited by the Levitical law (Lev. xviii. 12, xx. 19); and even if it had been, Caleb and Othniel as men of foreign extraction would have been less amenable to it, and more likely to follow the custom of their own tribe. On the other hand it must be acknowledged that the canon above quoted does not hold universally. Even in the very passage, Num. x. 29, on which the canon is adduced, it is extremely doubtful whether the designation "the Midianite, Moses' father-in-law," does not apply to Reuel rather than to Hobab, seeing that Reuel, and not Hobab, was father to Moses' wife (Ex. ii. 18). In

<sup>b</sup> This is an old conceit: see Pliny (x. 1), and the remark of Plinius Siculus (ii. 50) thereon.

<sup>c</sup> Ostriches are very shy birds, and will, if their nest is

discovered, frequently forsake the eggs. Surely this is a mark rather of sagacity than stupidity.

Jer. xlii. 7, in the phrase "Hanameel the son of Shallum thine uncle," the words "thine uncle" certainly belong to Shallum, not to Hanameel, as appears from ver. 8, 9. And in 2 Chr. xxxv. 3, 4; Neh. xiii. 28, the designations "King of Israel," and "high-priest," belong respectively to David, and to Eliashib. The chronological difficulties as to Othniel's judgeship would also be mitigated considerably if he were nephew and not brother to Caleb, as in this case he might well be 25, whereas in the other he could not be under 40 years of age, at the time of his marriage with Achsah. Still the evidence, candidly weighed, preponderates strongly in favour of the opinion that Othniel was Caleb's brother.

(2) And this leads to the second question suggested above, viz. the time of Othniel's judgeship. Supposing Caleb to be about the same age as Joshua, as Num. xiii. 6, 8; Josh. xiv. 10, suggest, we should have to reckon about 25 years from Othniel's marriage with Achsah till the death of Joshua at the age of 110 years ( $85 + 25 = 110$ ). And if we take Africanus's allowance of 30 years for the elders after Joshua, in whose lifetime "the people served the Lord" (Judg. ii. 7), and then allow 8 years for Chusshan-Rishathaim's dominion, and 40 years of rest under Othniel's judgeship, and suppose Othniel to have been 40 years old at his marriage, we obtain ( $40 + 25 + 30 + 8 + 40 =$ ) 143 years as Othniel's age at his death. This we are quite sure cannot be right. Nor does any escape from the difficulty very readily offer itself. It is in fact a part of that larger chronological difficulty which affects the whole interval between the exodus and the building of Solomon's temple, where the dates and formal notes of time indicate a period more than twice as long as that derived from the genealogies and other ordinary calculations from the length of human life, and general historical probability. In the case before us one would guess an interval of not more than 25 years between Othniel's marriage and his victory over Chusshan-Rishathaim.

In endeavouring to bring these conflicting statements into harmony, the first thing that occurs to one is, that if Joshua lived to the age of 110 years, i. e. full 30 years after the entrance into Canaan, supposing him to have been 40 when he went as a spy, he must have outlived all the elder men of the generation which took possession of Canaan, and that 10 or 12 years more must have seen the last of the survivors. Then again, it is not necessary to suppose that Othniel lived through the whole 80 years of rest, nor is it possible to avoid suspecting that these long periods of 40 and 80 years are due to some influences which have disturbed the true computation of time. If these dates are discarded, and we judge only by ordinary probabilities, we shall suppose Othniel to have survived Joshua not more than 20, or at the outside, 30 years. Nor, however unsatisfactory this may be, does it seem possible, with only our present materials, to arrive at any more definite result. It must suffice to know the difficulties and wait patiently for the solution, should it ever be vouchsafed to us. [A. C. H.]

**OTHONIAS** (Ὀθωνίας; *Zochias*). A corruption of the name **MATTANIAH** in Est. x. 27 (1 Est. ix. 28).

\* It is important to observe, in reference to the LXX. renderings of the Hebrew names of the different unclean birds, &c., that the verses of Deut. xiv. are some of them

**OVEN** (אִיב; *alibavos*). The Eastern oven is of two kinds—fixed and portable. The former is found only in towns, where regular bakers are employed (Hos. vii. 4). The latter is adapted to the nomad state, and is the article generally intended by the Hebrew term *tannûr*. It consists of a large jar made of clay, about three feet high, and widening towards the bottom, with a hole for the extraction of the ashes (Niebuhr, *Desc. de l'Arab.* p. 56). Occasionally, however, it is not an actual jar, but an erection of clay in the form of a jar, built in the floor of the house (Wellsted, *Travels* i. 286). Each household possessed such an article (Ex. vi. 3); and it was only in times of extreme dearth that the same oven sufficed for several families (Lev. xvi. 26). It was heated with dry twigs and grass (Matt. vi. 30); and the loaves were placed both inside and outside of it. It was also used for roasting meat (Mishna, *Taan.* 3, §8). The heat of the oven furnished Hebrew writers with an image of rapid and violent destruction (Ps. xxi. 9; Hos. vi. 7; Mal. iv. 1). [W. L. G.]

Egyptian Oven.

**OWL**, the representative in the A. V. of the Hebrew words both *haya'andâ*, *yanshâph*, *kipphâ*, and *lillith*.

1. *Bath haya'andâ* (בַּת הַיְאָאֲנָדָא). [Canaan] *Yanshâph*, or *yanshâph* (יָנֶשֶׁף, יָנֶשֶׁף), *ylâph* (יֵלָפ), occurs in Lev. xi. 17, Deut. xv. 18, as the name of some unclean bird, and in Is. xlv. 11, in the description of desolate Edom, "the *yanshâph* and the raven shall dwell in it." The A. V. translates *yanshâph* by "owl," or "great owl." The Chaldee and Syriac are in favour of some kind of owl; and perhaps the etymology of the word points to a nocturnal bird. Bochart is of opinion that an "owl" is meant, and supposes the bird so called from the Hebrew for "twilight" (*Shem.* iii. 29). For other conjectures see Bochart *Hieron.* iii. 24-29). The LXX. and Vulg. read *ibis*, i. e. the *Ibis religiosa*, the sacred bird of Egypt. Col. H. Smith suggests that the night heron (*Ibis nycticorax*, Lin.) is perhaps intended, and refers to the *Ibis* on the ground that so rare a bird and one totally unknown in Palestine could not be the *yanshâph* of the Pentateuch; there is, however, no occasion to suppose that the *yanshâph* was rare in Palestine; the Levitical law was given *ante* the Israelites left Egypt, and it is only natural to suppose that several of the unclean animals of Egyptian, some might never have been seen or heard

evidently transposed (see Michaelis, *Suppl.* i. p. 146, and note): the order as given in Lev. xi. 18, therefore, is to be taken as the standard.

of in Palestine; the *yamshaph* is mentioned as a bird of Edom (Is. l. c.), and the Ibis might have formerly been seen there; the old Greek and Latin writers are in error when they state that this bird never leaves Egypt; Cuvier says it is found throughout the extent of Africa, and latterly Dr. Heuglin met with it on the coast of Abyssinia (*List of Birds collected in the Red Sea*; Ibis, i. p. 347). The Coptic version renders *yamshaph* by "Huppen," from which it is believed the Greek and Latin word *Ibis* is derived (see Jablonski's *Opusc.* i. 93, ed. te Water). On the whole the evidence is inconclusive, though it is in favour of the *Ibis religiosa*, and probably the other Egyptian species (*I. falcinellus*) may be included under the term. See on the subject of the Ibis of the ancients Savigny's *Histoire naturelle et mythologique de l'Ibis* (Paris, 1805, 8vo.); and Cuvier's *Mémoire sur l'Ibis des Anciens Egyptiens* (Ann. Mus. iv. p. 116.)

*Ibis religiosa.*

3. *Cô* (כֹּס: *vukukôpa*, *épawôds*: *bubo*, *Aerodius*, *nycticonax*), the name of an unclean bird (Lev. xi. 17; Dent. xiv. 16); it occurs again in Ps. cli. 6. There is good reason for believing that the A. V. is correct in its rendering of "owl" or "little owl." Most of the old versions and paraphrases are in favour of some species of "owl" as the proper translation of *Cô*; Bochart is inclined to think that we should understand the pelican (*Hieros.* iii. 17), the Hebrew *Cô* meaning a "asp." or "pouch"; the pelican being so called from its membranous bill-pouch. He compares the Latin *trua*, "a pelican," from *trua*, "a scoop" or "la. l. e." But the ancient versions are against this theory, and there does not seem to be much doubt that *Kasf* is the Hebrew name for the pelican. The passage in Ps. cli. 6, "I am like a pelican of the wilderness, I am like a *Cô* of ruined places," points decidedly to some kind of owl. Michaelis, who has devoted great attention to the elucidation of this word, has aptly compared one of the Arabic names for the owl, *um elcharab* ("mother of ruin"), in reference to the expression in the psalm just quoted (comp. *Suppl. ad Lex. Heb.* p. 1236, and Rosenmüller, *Not. ad Hieros.* l. c.). Thus the context of the passage in the Psalm where the Hebrew word occurs, as well as the authority of the old versions, goes far to prove that an owl is in-

tended by it. The *vukukôpa* of the LXX. is no doubt a general term to denote the different species of horned owl known in Egypt and Palestine; for Aristotle (*H. An.* viii. 14, §8) tells us that *vukukôpa* is identical with *Stror*, evidently, from his description, one of the horned owls, perhaps either the *Otus vulgaris*, or the *O. brachyotus*. The owl

*Otus ascalaphus.*

we figure is the *Otus ascalaphus*, the Egyptian and Asiatic representative of our great horned owl (*Bubo maximus*). Mr. Tristram says it swarms among the ruins of Thebes, and that he has been informed it is also very abundant at Petra and Baalbec; it is the great owl of all Eastern ruins, and may well therefore be the "*Cô* of ruined places."

4. *Kippô* (כִּיפּוֹ: *exivos*: *erichia*) occurs only in Is. xxiv. 15: "There (i. e. in Edom) the *kippô* shall make her nest, and lay and hatch and gather under her shadow." It is a hopeless affair to attempt to identify the animal denoted by this word; the LXX. and Vulg. give "hedgehog," reading no doubt *kippôl* instead of *kippô*, which variation six Hebrew MSS. exhibit (Michaelis, *Suppl.* p. 2199). Various conjectures have been made with respect to the bird which ought to represent the Hebrew word, most of which, however, may be passed over as unworthy of consideration. We cannot think with Bochart (*Hieros.* iii. 194, &c.) that a darting serpent is intended (the *akorilas* of Nicander and Aelian, and the *jambus* of Lucan), for the whole context (Is. xxiv. 15) seems to point to some bird, and it is certainly stretching the words very far to apply them to any kind of serpent. Bochart's argument rests entirely on the fact that the cognate Arabic, *kippax*, is used by Avicenna to denote some darting tree-serpent; but this theory, although supported by Gesenius, Fürst, Rosenmüller, and other high authorities, must be rejected as entirely at variance with the plain and literal meaning of the prophet's words; though incubation by reptiles was denied by Cuvier, and does not obtain amongst the various orders and families of this class as a general rule, yet some few excepted instances are on record, but "the gathering under the shadow" clearly must be understood of the act of a bird fostering her young under her wings; the *kippô*, moreover, is men-

tioned in the same verse with "vultures" (kites), so that there can be no doubt that some bird is intended.

berupa alat-alat

Deodati, according to Bochart, conjectures the "Scops owl," being led apparently to this interpretation on somewhat strained etymological grounds. See on this subject Bochart, *Hieroz.* iii. 197; and for the supposed connexion of *σκάψ* with *σκάπτω*, see Aelian, *Nat. Anim.* xv. 28; Pliny, x. 49; Eustathius, on *Odys.* v. 66; and Jacobs' annotations to Aelian, *l. c.* We are content to believe that *kippōs* may denote some species of owl, and to retain the reading of the A. V. till other evidence be forthcoming. The woodcut represents the *Athene merulinoides*, the commonest owl in Palestine. Mount Olivet is one of its favourite resorts (*Ibid.* i. 26). Another common species of owl is the *Scops zorca*; it is often to be seen inhabiting the mosque of Omar at Jerusalem (see Tristram, in *Ibid.* i. 26).

At the end of the day, the

5. *Lilith* (לִילִית): δυνεστάτωροι; Aq. Λαλθ; Syrn. Λαλα; *lamia*). The A. V. renders this word by "screech owl" in the text of Is. xxx. 34, and by "night-monster" in the margin. The *lilith* is mentioned in connexion with the desolation that was to mark Edom. According to the Rabbins the *lilith* was a nocturnal spectre in the form of a beautiful woman that carried off children at night.

and destroyed them (see Bochart, *Hierv.* iii. 82, Gesenius, *Thea.* s. v. *נִינְיָ*; Buxtorf, *Lex. Chald.* of Talm. p. 1140). With the *לִינְיָ* may be compared the *ghule* of the Arabian Babel. The versions support the opinion of Bochart that the spectre is intended. As to the *desolation* of the LXX., and the *lania* of the Vulgate translation of Isaiah, see the *Hierv.* iii. 832, and Gesenius (*Jesuit.* i. 915-920). Michælis (*Suppl.* p. 364) observes on this word, "In the poetical description of desolation we borrow images even from *fauna*." If, however, some animal be denoted by the *לִינְיָ* term, the screech-owl (*Strix flammea*) may well be supposed to represent it, for this bird is found in the Bible lands (see *Ibid.* i. 26, 46), and is, as is well known, a frequent inhabitant of ruined places. The statement of Irbay and Maugelas relative to *lania* illustrates the passage in Isaiah under consideration:—"The screaming of eagles, hawks, and vultures, which were soaring above our heads in considerable numbers, seemingly annoyed at any one approaching their lonely habitation, added much to the singularity of the scene." (See also Stephens, *Incident of Trav.* ii. 76.)

OX (Ωξ: *Idox*), an ancestor of *Justin* (id.  
viii, 1). [R. E. W.]

OX, the representative in the A. V. of several Hebrew words, the most important of which have been already noticed. [BULL; BULLOCK.]

We propose in this article to give a general view of what relates to the ox tribe (*Bos*), and as the subject has a Biblical interest. It will be convenient to consider (1) the ox in an economic point of view, and (2) its natural history.

(1.) There was no animal in the *past* service of the Israelites, or indeed in that of the *ancient* Orientals generally, that was held in higher esteem than the ox; and deservedly so, for the ox was the animal upon whose patient labours depended all the ordinary operations of farming. Ploughing with horses was a thing never thought of in those days. Asses, indeed, were used for this purpose (*Gen. xli.*); but it was the ox upon whom devolved the greater part this important service. The pre-eminence of the ox to "a nation of husbandmen like the Israelites," to use an expression of Michaelis in his article on this subject, will be at once evident from the Scriptural account of the various uses to which it was applied. Oxen were used for ploughing (*Deut. xxi. 10*; *1 Sam. xiv. 14*; *1 K. iii. 11*; *Job i. 14*; *Am. vi. 12*, &c.), for treading out grapes (*Deut. xiv. 3*; *Hos. x. 11*; *Nah. i. 2*; *Isa. lxi. 9*; *1 Tim. v. 18*) [*AGRICULTURE*]; for *other* purposes, when they were generally *ploughed* (*Num. vii. 3*; *1 Sam. vi. 7*; *2 Sam. vi. 1*); beasts of burden (*1 Chr. xii. 40*); their flesh was eaten (*Deut. xiv. 4*; *1 K. i. 19*; *Isa. lv. 1*; *Isa. xlii. 13*; *Prov. xv. 17*; *Neh. x. 18*); they were used in the sacrifices [*SACRIFICIAL*]; they supplied milk, butter, &c. (*Deut. xxviii. 14*; *Ex. vii. 22*; *2 Sam. xvii. 29*) [*BUDDING, MILK*].

Connected with the importance of corn to the rural economy of the Jews is the strict rule of which was mercifully enacted by God for its protection and preservation. The ox that threshed corn was by no means to be muzzed; he was to enjoy rest on the Sabbath as well as on the sabbatical year (Ex. xxiii. 12; Deut. v. 14); nor was the ox of Michaelis has observed, on the people's sabbath, because beasts can perform no work without man.

## OX

assistance, but it was for the good of the beasts "that thine ox and thine ass may rest."

The law which prohibited the slaughter of any clean animal, excepting as "an offering unto the Lord before the tabernacle," during the time that the Israelites abode in the wilderness (Lev. xvii. 1-6), although expressly designed to keep the people from idolatry, no doubt contributed to the preservation of their oxen and sheep, which they were not allowed to kill excepting in public. There can be little doubt that during the forty years' wanderings oxen and sheep were rarely used as food, whence it was *flesh* that they so often lusted after. (See Michaelis, *Laws of Moses*, art. 169.)

It is not easy to determine whether the ancient Hebrews were in the habit of castrating their animals or not. The passage in Lev. xxii. 24 may be read two ways, either as the A. V. renders it, or thus, "Ye shall not offer to the Lord that which is bruised," &c., "neither shall ye make it so in your land." Le Clerc believed that it would have been impossible to have used an uncastrated ox for agricultural purposes on account of the danger. Michaelis, on the other hand, who cites the express testimony of Josephus (*Ant.* iv. 8, §40), argues that castration was wholly forbidden, and refers to the authority of Niebuhr (*Descr. de l'Arab.*, p. 81), who mentions the fact that Europeans use stallions for cavalry purposes. In the East it is well known horses are as a rule not castrated. Michaelis observes (art. 168), with truth, that where people are accustomed to the management of uncastrated animals, it is far from being so dangerous as we from our experience are apt to imagine.

It seems clear from Prov. xv. 17, and 1 K. iv. 23, that cattle were sometimes stall-fed [FOOD], though as a general rule it is probable that they fed in the plains or on the hills of Palestine. That the Egyptians stall-fed oxen is evident from the representations on the monuments (see Wilkinson's *Anc. Egypt.* i. 27, ii. 49, ed. 1854). The cattle that grazed at large in the open country would no doubt often become fierce and wild, for it is to be remembered that in primitive times the lion and other wild beasts of prey roamed about Palestine. Hence, no doubt, the laws with regard to "goring," and the expression of "being wont to push with his horns" in time past (Ex. xxi. 28, &c.); hence the force of the Psalmist's complaint of his enemies, "Many bulls have compassed me, the mighty ones of Bashan have beset me round" (Ps. xxii. 13). The habit of surrounding objects which excite their suspicion is very characteristic of half-wild cattle. See Mr. Culley's observations on the Chillingham wild cattle, in Ball's *British Quadrupeds* (p. 424).

(2.) The monuments of Egypt exhibit representations of a long-horned breed of oxen, a short-horned, a polled, and what appears to be a variety of the zebu (*Bos Indicus*, Lin.). Some have identified this latter with the *Bos Dande* (the *Bos Elegans et parvus Africanus* of Belon). The Abyssinian breed is depicted on the monuments at Thebes (see *Anc. Egypt.* i. 385), drawing a *plaustrum* or car. [CART.] These cattle are "white and black in clouds, low in the legs, with the horns hanging loose, forming small horny hooks nearly of equal thickness to the point, turning freely either way, and hanging against the cheeks" (see Hamilton Smith in Griffiths' *Assia. & Egypt.* iv. 425). The drawings or Egyptian monuments show that the cattle of ancient Egypt were fine handsome animals: doubtless there may be taken as a sample of the cattle of Palestine in

## OX

655

ancient times. "The cattle of Egypt," says Col. H. Smith (Kitto's *Cyc.* art. 'Ox'), a high authority on the *Ruminantia*, "continued to be remarkable for beauty for some ages after the Moslem conquest, for Abdollatiph the historian extols their bulk and proportions, and in particular mentions the Alchisiah breed for the abundance of the milk it furnished, and for the beauty of its curved horns." (See figures of Egyptian cattle under AGRICULTURE.) There are now fine cattle in Egypt; but the Palestine cattle appear to have deteriorated, in size at least, since Biblical times. "Herds of cattle," says Schubert (*Oriental Christian Spectator*, April, 1853), "are seldom to be seen; the bullock of the neighbourhood of Jerusalem is small and insignificant; beef and veal are but rare dainties. Yet the bullock thrives better, and is more frequently seen, in the upper valley of the Jordan, also on Mount Tabor and near Nazareth, but particularly east of the Jordan on the road from Jacob's-bridge to Damascus." See also Thomson (*The Land and the Book*, p. 322), who observes (p. 335) that danger from being gored has not ceased "among the half-wild droves that range over the luxuriant pastures in certain parts of the country."

The buffalo (*Bubalus Bubalus*) is not uncommon in Palestine; the Arabs call it *jâmâs*. Robinson (*Bib. Res.* iii. 306) notices buffaloes "around the lake el-Hifléh as being mingled with the neat cattle, and applied in general to the same uses. They are a shy, ill-looking, ill-tempered animal." These animals love to wallow and lie for hours in water or mud, with barely the nostrils above the surface. It is doubtful whether the domestic buffalo was known to the ancient people of Syria, Egypt, &c.; the animal under consideration is the *blainsu* or tame buffalo of India; and although now common in the West, Col. H. Smith is of opinion that it was not known in the Bible lands till after the Arabian conquest of Persia (A.D. 651). Robinson's remark, therefore, that the buffalo doubtless existed anciently in Palestine in a wild state, must be received with caution. [See further remarks on this subject under UNICORN.]

The A. V. gives "wild ox" in Dent. xiv. 5, and "wild bull" in Is. li. 20, as the representatives of the Hebrew word *teô* or *tô*.

*Tô* or *tô* (תֹּר, תֹּר) *δρυξ, σευτλῶν*; Aq., Symm., and Theod., *δρυξ: oryx*). Among the beasts that were to be eaten mention is made of the *teô* (Dent. i. c.); again, in Isaiah "they lie at the head of all the streets like a *tô* in the nets." The most important ancient versions point to the *oryx* (*Oryx leucoryx*) as the animal denoted by the Hebrew words. Were it not for the fact that another Heb. name (*yachmur*) seems to stand for this animal,<sup>a</sup> we should have no hesitation in referring the *teô* to the antelope above named. Col. H. Smith suggests that the antelope he calls the Nubian *Oryx* (*Oryx Tuo*), may be the animal intended; this, however, is probably only a variety of the other. Oedmann (*Vern. Samn.* p. iv. 23) thinks the Bubule (*Alcephalus Bubulis*) may be the *tô*; this is the *Bekker-el-wash* of N. Africa mentioned by Shaw (*Trav.* i. 310, 8vo ed.). The point must be left undetermined. [See FALLOW DEER, Append.] [W. H.]

<sup>a</sup> As to this word, see Schleusner, *Lex. in LXX.* v.

<sup>b</sup> *Yachmur*, in the vernacular Arabic of N. Africa, is one of the names for the *oryx*.

## OX-GOAD. [GOAD.]

O'ZEM (עֲזֵם, *i. e.* Otsem). The name of two persons of the tribe of Judah.

1. ('Αζέμ: *Assom*.) The sixth son of Jesse, the next eldest above David (1 Chr. ii. 15). His name is not again mentioned in the Bible, nor do the Jewish traditions appear to contain anything concerning him.

2. ('Αζέμ; \* Alex. Αζομ: *Asom*.) Son of Jerahmeel, a chief man in the great family of Hezron (1 Chr. ii. 25). [G.]

OZIAS ('Οζίας: *Ozias*). 1. The son of Micha of the tribe of Simeon, one of the "governors" of Bethulia, in the history of Judith (Jud. vi. 15, vii. 23, viii. 10, 28, 35). [B. F. W.]

2. UZZI, one of the ancestors of Ezra (2 Ead. ii. 2); also called SAVIAS (1 Ead. viii. 2).

3. UZZIAH, King of Judah (Matt. i. 8, 9).

OZIEL ('Οζία: *Ozias*), an ancestor of Judith (Jud. viii. 1). The name occurs frequently in O. T. under the form UZZIEL. [B. F. W.]

OZ'NI (Ὀζνί: 'Αζενί; Alex. 'Αζανί: *Ozni*). One of the sons of Gad (Num. xxvi. 16), called EZBON in Gen. xli. 16, and founder of the family of the

OZ'NITES (Ὀζνίται: Ὀζνίται δ' 'Αζενί; Alex. δ' 'Αζανί: *familia Oznitariam*), Num. xxvi. 16.

OZO'RA (Ὀζώρα). "The sons of Machnadebai," in Ezr. x. 40, is corrupted into "the sons of Ozora" (1 Ead. ix. 34).

## P

PA'ARAI (פֶּאֶרַי: *Pharai*). In the list of 2 Sam. xliii. 35, "Paarni the Arbite" is one of David's mighty men. In 1 Chr. xi. 37, he is called "Naarai the son of Ezbai," and this in Kennicott's opinion is the true reading (*Diss.* p. 209-211). The Vat. MS. omits the first letter of the name, and reads the other three with the following word, thus, *οὐραιοερχί*. The Peshito-Syriac has "Gari of Arub," which makes it probable that "Naarai" is the true reading, and that the Syriac translators mistook J for P.

PA'DAN (פֶּדָן: *Mesopotamia τῆς Συρίας: Mesopotamia*). Padan-Aram (Gen. xlviii. 7).

PA'DAN-A'RAM (פֶּדָן אֶרָם: ἡ Μεσοποταμία Συρίας, Gen. xlv. 20, xlviii. 6, 7, xxxiii. 18; ἡ M. Gen. xxviii. 2, 5, xxxi. 18; M. τῆς Συρ. Gen. xxxv. 9, 26, xli. 15; Alex. ἡ M. Gen. xxv. 20, xxviii. 5, 7, xxxi. 18; ἡ M. Συρ. Gen. xxviii. 2, xxxiii. 19. *Mesopotamia*, Gen. xlv. 20, xxxi. 18; *M. Syriae*, Gen. xxviii. 2, 5, 6, xxxiii. 18, xxxv. 9, 26, xli. 15; *Syria*, Gen. xxvi. 15). By this name, more properly *Paddan-Aram*, which signifies "the table-land of Aram" according to Fürst and Gesenius, the Hebrews designated the tract of country which they otherwise called Aram-naharaim,

\* The word following this — פִּינְחָס — A. V. Abihah, *viz.* Achia, is in the LXX. rendered ἀδελφὸς αὐτοῦ.

## PAHATH-MOAB

"Aram of the two rivers," the Greek *Mesopotamia* (Gen. xxiv. 10), and "the field (A. V. 'count' of Aram" (Hos. xii. 12). The term was particularly especially applied to that portion which bordered on the Euphrates, to distinguish it from mountainous districts in the N. and N.E. of Mesopotamia. Rashi's note on Gen. xxv. 20 is curious: "Because there were two Arams, Aram-naharaim and Aram Zobah, he (the writer) calls it *Paddan-Aram*: the expression 'yoke of oxen' is in the Targums פֶּדָן אֶרָם, *paddan aram*; and some interpret *Paddan-Aram* as 'field of Aram,' because in the language of the Ishmaelites they call a field *paddan*" (Ar. فدان). In Syr. فدان, *fidan*, is used for a "plain" or "field;" and both this and the Arabic word are probably from the root

فد, *fadda*, "to plough," which seems akin to *fidit*, from *findere*. If this etymology be true *Paddan-Aram* is the arable land of Syria; "either an upland vale in the hills, or a fertile district immediately at their feet" (Stanley, *S. & P.* p. 129, note). *Paddan*, the ploughed land, would thus correspond with the Lat. *arvom*, and is analogous to Eng. *field*, the *felled* land, from which the trees have been cleared.

Padan-Aram plays an important part in the early history of the Hebrews. The family of their founder had settled there, and were long looked upon as the aristocracy of the race, with whom alone the legitimate descendants of Abraham might intermarry, and thus preserve the purity of their blood. Thither Abraham sent his faithful steward (Gen. xxiv. 10), after the news had reached him in his southern home at Beersheba that children had been born to his brother Nahor. From this family alone, the offspring of Nahor and Milcah, Abraham's brother and niece, could a wife be sought for Isaac, the heir of promise (Gen. xxv. 20), and Jacob the inheritor of his blessing (Gen. xxviii.).

It is elsewhere called PADAN simply (Gen. xlviii. 7). [W. A. W.]

PA'DON (פֶּדוֹן: *Phadon*). The ancestor of a family of Nethinim who returned with Zerubbabel (Ezr. ii. 44; Neh. vii. 47). He is called PHALEAS in 1 Eadr. v. 29.

PAG'IEL (פַּגְיֵל: *Phagiel*). The son of Ocran, and chief of the tribe of Asher at the time of the Exodus (Num. i. 13, ii. 27, vii. 72, 77, x. 26).

PAHATH-MOAB (פַּהַת מוֹאב: *Phath-Moab*). *Phahath-Moab*, "governor of Moab." Head of one of the chief houses of the tribe of Judah. Of the individual, or the occasion of his receiving so singular a name, nothing is known certainly, either as to the time when he lived, or the particular family to which he belonged. But as we read in 1 Chr. iv. 22, of a family of Shilonites, of the tribe of Judah, who in very early times "had dominion in Moab," it may be conjectured that this was the origin of the name. It is perhaps a slight corroboration of this conjecture that as we find in Ezr. ii. 6, that the sons of Pahath-Moab had among their number "children of Joab," so also in 1 Chr. iv. we find these families who had dominion in Moab very much mixed with the sons of Caleb, among whom, in 1 Chr. ii. 54, iv. 14, we find the house

of Joab.<sup>a</sup> It may further be conjectured that this dominion of the sons of Shelah in Moab, had some connexion with the migration of Elimelech and his sons into the country of Moab, as mentioned in the book of Ruth; nor should the close resemblance of the names *וִירָחָה* (Ophrah), 1 Chr. iv. 14, and *וִירָחָה* (Orpah), Ruth i. 4, be overlooked. Jerome, indeed, following doubtless his Hebrew master, gives a mystical interpretation to the names in 1 Chr. iv. 22, and translates the strange word *Jashubi-lehem*, "they returned to Leem" (Beth-lehem). And the author of *Quaest. Heb. in Lib. Paralip.* (printed in Jerome's works) follows up this opening, and makes JOKIM (qui stare fecit solem) to mean ELIAKIM, and the men of Chozeha ('viri mendacii'), Joash and Saraph (*securus et incandens*), to mean Mahlon and Chilion, who took wives (*וְיָרָחָה*) in Moab, and returned (i. e. Ruth and Naomi did) to the plentiful bread of Bethlehem (*houses of bread*); interpretations which are so far worth noticing, as they point to ancient traditions connecting the migration of Elimelech and his sons with the Jewish dominion in Moab mentioned in 1 Chr. iv. 21.<sup>b</sup> However, as regards the name Pahath-Moab, this early and obscure connexion of the families of Shelah the son of Judah with Moab seems to supply a not improbable origin for the name itself, and to throw some glimmering upon the association of the children of Joshua and Joab with the sons of Pahath-Moab. That this family was of high rank in the tribe of Judah we learn from their appearing *fourth* in order in the two lists, Ezr. ii. 6; Neh. vii. 11, and from their chief having signed *second*, among the lay princes, in Neh. x. 14. It was also the most numerous (2818) of all the families specified, except the Benjaminite house of Seunah (Neh. vii. 38). The name of the chief of the house of Pahath-Moab, in Nehemiah's time, was Hashub; and, in exact accordance with the numbers of his family, we find him repairing two portions of the wall of Jerusalem (Neh. iii. 11, 23). It may also be noticed as slightly confirming the view of Pahath-Moab being a Shilonite family, that whereas in 1 Chr. ix. 5-7, Neh. xi. 5-7, we find the Benjaminite families in close juxta-position with the Shilonites, so in the building of the wall, where each family built the portion over against their own habitation, we find Benjamin and Hashub the Pahath-Moabite coupled together (Neh. iii. 23). The only other notices of the family are found in Ezr. viii. 4, where 200 of its males are said to have accompanied Elihoenai, the son of Zerariah, when he came up with Ezra from Babylon; and in Ezr. x. 30, where eight of the sons of Pahath-Moab are named as having taken strange wives in the time of Ezra's government.

[A. C. H.]

**PAINT** [as a cosmetic]. The use of cosmetic dyes has prevailed in all ages in Eastern countries. We have abundant evidence of the practice of painting the eyes both in ancient Egypt (Wilkinson, ii. 342) and in Assyria (Layard's *Nineveh*, ii. 328;

and in modern times no usage is more general. It does not appear, however, to have been by any means universal among the Hebrews. The notices of it are few; and in each instance it seems to have been used as a meretricious art, unworthy of a woman of high character. Thus Jezebel "put her eyes in painting" (2 K. ix. 30, margin); Jeremiah says of the harlot city, "Though thou rentest thy eyes with painting" (Jer. iv. 30); and Ezekiel again makes it a characteristic of a harlot (Ez. xxi. 40; comp. Joseph. *B. J.* iv. 9, §10). The expressions used in these passages are worthy of observation, as referring to the mode in which the process was effected. It is thus described by Chandler (*Travels*, ii. 140): "A girl, closing one of her eyes, took the two lashes between the forefinger and thumb of the left hand, pulled them forward, and then thrusting in at the external corner a bodkin which had been immersed in the soot, and extracting it again, the particles before adhering to it remained within, and were presently ranged round the organ." The eyes were thus literally "put in paint," and were "rent" open in the process. A broad line was also drawn round the eye, as represented in the accompanying cut. The effect was

"Eye ornamented with Kohl, as represented in ancient paintings." (Lane, p. 37, new ed.)

an apparent enlargement of the eye; and the expression in Jer. iv. 30 has been by some understood in this sense (Gesen. *Thes.* p. 1239), which is without doubt admissible, and would harmonize with the observations of other writers (Juv. ii. 94, "obliquâ produxit acu"; Plin. *Ep.* vi. 2). The term used for the application of the dye was *kâhhal*,<sup>c</sup> "to smear;" and Rabbinical writers described the paint itself under a cognate term (Mishn. *Sabb.* 8, §3). These words still survive in *kohl*,<sup>d</sup> the modern Oriental name for the powder used. The Bible gives no indication of the substance out of which the dye was formed. If any conclusion were deducible from the evident affinity between the Hebrew *kâh*,<sup>e</sup> the Greek *φύκος*, and the Latin *fucus*, it would be to the effect that the dye was of a vegetable kind. Such a dye is at the present day produced from the henna plant (*Lawsonia inermis*), and is extensively applied to the hands and the hair (Russell's *Aleppo*, i. 109, 110). But the old versions (the LXX., Chaldee, Syriac, &c.) agree in pronouncing the dye to have been produced from antimony, the very name of which (*στίβη*, *stibium*) probably owed its currency in the ancient world to this circumstance, the name itself and the application of the substance having both emanated from Egypt.<sup>f</sup> Antimony is still used for the purpose in Arabia (Burchhardt's *Travels*, i. 376), and in Persia (Morier's *Second Journey*, p. 61), though lead is also used in the latter country (Russell, i. 366); but in Egypt the *kohl* is a soot produced by burning either a kind of frankincense or the shells of almonds (Lane, i. 61). The dye-stuff was moistened with oil, and kept in

Spanish version: "Alcoholate tous ojos" (Gesen. *Thes.* p. 676).

<sup>c</sup> קָהַל.

<sup>d</sup> This mineral was imported into Egypt for the purpose. One of the pictures at Beni Hassan represents the arrival of a party of traders in stibium. The powder made from antimony has been always supposed to have a beneficial effect on the eye-sight (Plin. xxxiii. 24; Russell, i. 111; Lane, i. 61).

<sup>a</sup> The resemblance between *Laalab* (לֹאֵלָב), 1 Chr. iv. 21, one of the sons of Shelah, and *Laadan* (לֹאֲדָן), an ancestor of Joshua (1 Chr. vii. 26), may be noted in connexion with the mention of Jezebel, Ezr. ii. 6.

<sup>b</sup> 1 Sam. xxii. 3, may also be noticed in this connexion.

<sup>c</sup> קָהַל.

<sup>d</sup> The Hebrew verb has even been introduced into the

a small jar, which we may infer to have been made of horn, from the proper name, Keren-happuch, "horn for paint" (Job xlii. 14). The probe with which it was applied was made either of wood, silver, or ivory, and had a blunted point. Both the probe and the jar have frequently been discovered in Egyptian tombs (Wilkinson, ii. 343). In addition to the passages referring to eye-paint already quoted from the Bible, we may notice probable allusions to the practice in Prov. vi. 25, Eccles. xxvi. 9, and Is. iii. 16, the term rendered "wanton"

Ancient Vessel and Probe for Kohl.

in the last passage bearing the radical sense of painted. The contrast between the black paint and

the white of the eye led to the transfer of the word to describe the variegated stones of the string-courses of a handsome building (1 Kings vi. 2; A. V. "glistening stones," lit. *sto paint*); and again the dark cement in which the stones or other bright stones were imbedded (A. V. "I will lay thy stones with fair cement"). Whether the custom of staining the hands, particularly the nails, now so prevalent in the East, was known to the Hebrews, is doubtful. *henna*, which is used for that purpose, was known (Cant. i. 14; A. V. "camphire"), and expressions in Cant. v. 14 may possibly allude to this custom.

## PAI. [PAU.]

**PALACE.** There are few tasks more difficult than the attempt to restore the building of which we possess nothing but descriptions, and the difficulties are very much enhanced when the description is written in a language like Hebrew, the terms in which it is written are of such a nature as to render our ignorance, the widest latitude of interpretation; and although written in a language of which we have a more definite knowledge, it was composed by persons who never could have given the buildings in such a manner as to enable us to describe them.

Notwithstanding this, the palace which was occupied by David during the years after he had built the Temple is of such world-wide interest, that it is without interest to the Biblical student who has made a study of the subject, who are familiar with the arrangements of palaces, should not have ideas on the subject. It is also important that our knowledge on all other matters connected with the subject should be brought up to the latest date.

All the restorations of the palace which we find in earlier editions of the Bible are what is called Vitruvian, viz. on the principles of classical architecture. These were the only ones known to their authors. In the earlier part of the 19th century attempts were made to introduce the principles of Egyptian design into these restorations, but with even less success.

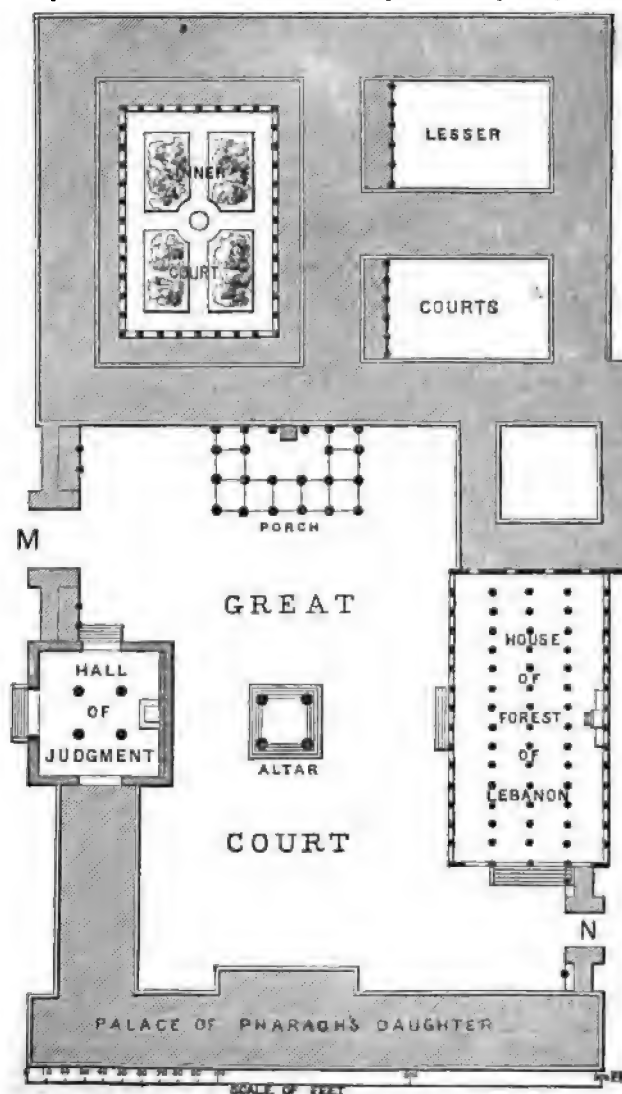

Fig. 1. Diagram Plan of Solomon's Palace.

lated Egypt and all that it contained, and everything they did, or even thought, was antagonistic to the arts and feelings of that land of bondage. On the other hand, the exhumation of the palaces of Nineveh, and the more careful examination of those at Persepolis, have thrown a flood of light on the subject. Many expressions which before were entirely unintelligible are now clear and easily understood, and, if we cannot yet explain everything, we know at least where to look for analogies, and what was the character, even if we cannot predicate the exact form, of the buildings in question.

The site of the Palace of Solomon was almost certainly in the city itself, on the brow opposite to the Temple, and overlooking it and the whole city of David. It is impossible, of course, to be at all certain what was either the form or the exact disposition of such a palace, but, as we have the dimensions of the three principal buildings given in the book of Kings, and confirmed by Josephus, we may, by taking these as a scale, ascertain pretty nearly that the building covered somewhere about 150,000 or 160,000 square feet. Less would not suffice for the accommodation specified, and more would not be justified, either from the accounts we have, or the dimensions of the city in which it was situated. Whether it was a square of 400 feet each way, or an oblong of about 550 feet by 300, as

represented in the annexed diagram, must always be more or less a matter of conjecture. The form here adopted seems to suit better not only the exigencies of the site, but the known disposition of the parts.

The principal building situated within the Palace was, as in all Eastern palaces, the great hall of state and audience; here called the "House of the Forest of Lebanon." Its dimensions were 100 cubits, or 150 feet long, by half that, or 75 feet in width. According to the Bible (1 K. vii. 2) it had "four rows of cedar pillars with cedar beams upon the pillars;" but it is added in the next verse that "it was covered with cedar above the beams that lay on 45 pillars, 15 in a row." This would be easily explicable if the description stopped there, and so Josephus took it. He evidently considered the hall, as he afterwards described the Stoa basilica of the Temple, as consisting of four rows of columns, three standing free, but the fourth built into the outer wall (*Ant.* xi. 5); and his expression that the ceiling of the palace hall was in the Corinthian manner (*Ant.* vii. 5. §2) does not mean that it was of that order, which was not then invented, but after the fashion of what was called in his day a Corinthian oecus, viz. a hall with a clerestory. If we, like Josephus, are contented with these indications, the section of the hall was

Fig. 2. Diagram Sections of the House of Cedar of Lebanon.

certainly as shown in fig. A. But the Bible goes on to say (ver. 4) that "there were windows in three rows, and light was against light in three ranks," and in the next verse it repeats, "and light was against light in three ranks." Josephus escapes the difficulty by saying it was lighted by "θύραι καὶ παράθυροι," or by windows in three divisions, which might be taken as an extremely probable description if the Bible were not so very specific regarding it; and we must therefore adopt some such arrangement as that shown in fig. B. Though other arrangements might be suggested, in the whole it appears probable that this is the nearest the truth: as it admits of a clerestory, to which Josephus evidently refers, and shows the three rows of columns which the Bible description requires. Besides the clerestory there was probably a range of openings under the cornice of the walls, and then a range of open doorways, which would make the three openings required by the Bible description. In a hotter climate the first arrangement (fig. A) would be the more probable; but on a site so exposed and occasionally so cold as Jerusalem, it is scarcely likely that the great hall of the Palace was permanently open even on one side.

Another difficulty in attempting to restore this arose from the number of pillars being un-

equal ("15 in a row"), and if we adopt the last theory (fig. B), we have a row of columns in the centre both ways. The probability is that it was closed, as shown in the plan, by a wall at one end, which would give 15 spaces to the 15 pillars, and so provide a central space in the longer dimension of the hall in which the throne might have been placed. If the first theory be adopted, the throne may have stood either at the end, or in the centre of the longer side, but, judging from what we know of the arrangement of Eastern palaces, we may be almost certain that the latter is the correct position.

Next in importance to the building just described is the hall or porch of judgment (ver. 7), which Josephus distinctly tells us (*Ant.* vii. 5. §1) was situated opposite to the centre of the longer side of the great hall: an indication which may be admitted with less hesitation, as such a position is identical with that of a similar hall at Persepolis, and with the probable position of one at Khorsabad.

Its dimensions were 50 cubits, or 75 feet square (Josephus says 30 in one direction at least), and its disposition can easily be understood by comparing the descriptions we have with the remains of the Assyrian and Persian examples. It must have been supported by four pillars in the centre, and had

three entrances; the principal opening from the street and facing the judgment-seat, a second from the court-yard of the Palace, by which the councillors and officers of state might come in, and a third from the Palace, reserved for the king and his household as shown in the plan (fig. 1, N).

The third edifice is merely called "the Porch." Its dimensions were 50 by 30 cubits, or 75 feet by 45. Josephus does not describe its architecture; and we are unable to understand the description contained in the Bible, owing apparently to our ignorance of the synonyms of the Hebrew architectural terms. Its use, however, cannot be considered as doubtful, as it was an indispensable adjunct to an Eastern palace. It was the ordinary place of business of the palace, and the reception-room—the *Guesten Hall*—where the king received ordinary visitors, and sat, except on great state occasions, to transact the business of the kingdom.

Behind this, we are told, was the inner court, adorned with gardens and fountains, and surrounded by cloisters for shade; and besides this were other courts for the residence of the attendants and guards, and in Solomon's case, for the three hundred women of his harem: all of which are shown in the plan with more clearness than can be conveyed by a verbal description.

Apart from this palace, but attached, as Josephus tells us, to the Hall of Judgment, was the palace of Pharaoh's daughter—too proud and important a personage to be grouped with the ladies of the harem, and requiring a residence of her own.

There is still another building mentioned by Josephus, as a *mos* or temple, supported by massive columns, and situated opposite the Hall of Judgment. It may thus have been outside, in front of the palace in the city; but more probably was, as shown in the plan, in the centre of the great court. It could not have been a temple in the ordinary acceptation of the term, as the Jews had only one temple, and that was situated on the other side of the valley; but it may have been an altar covered by a baldachino. This would equally meet the exigencies of the description as well as the probabilities of the case; and so it has been represented in the plan (fig. 1).

If the site and disposition of the Palace were as above indicated, it would require two great portals; one leading from the city to the great court, shown at M; the other to the Temple and the king's garden, at N. This last was probably situated where the stairs then were which led up to the City of David, and where the bridge afterwards joined the Temple to the city and palace.

The recent discoveries at Nineveh have enabled us to understand many of the architectural details of this palace, which before they were made were nearly wholly inexplicable. We are told, for instance, that the walls of the halls of the palace were wainscotted with three tiers of stone, apparently varicoloured marbles, hewn and polished, and surmounted by a fourth course, elaborately carved with representations of leafage and flowers. Above this the walls were plastered and ornamented with coloured arabesques. At Nineveh the walls were, like these, wainscotted to a height of about eight feet, but with alabaster, a peculiar product of the country, and these were separated from the painted space above by an architectural band; the real difference being that the Assyrians revelled in sculptural representations of men and animals, as we now know from the sculptures brought home, as well as from the passage in Ezekiel (xiii, 14) where he describes

"men portrayed on the wall, the image of the Chaldeans portrayed with vermillion." See. The modes of decoration were forbidden to the Jews by the second commandment, given to them in consequence of their residence in Egypt and their consequent tendency to that multitudinous idolatry. Some difference may also be due to the fact that the alabaster, though admirably suited to bas-relief, was not suited for sharp deeply-cut filigree work like that described by Josephus; while, at the same time, the hard material used by the Jews may induce them to limit their ornamentation to what can be done by hand only. It is probable, however, that a considerable amount of colour was used in the interiors of these palaces, not only from the constant allusion to gold and gilding in Solomon's buildings, but because that as a colour could hardly be used there, but also from such passages as the following:—"Build me a wide house and large"—or thought—chambers, and cutteth out windows, as it is cieled with cedar, and painted with vermilion" (Jer. xxii, 14). It may also be seen that in the East all buildings, with scarcely an exception, are adorned with colour, and generally the three primitive colours used in their intensity, but so balanced as to produce most harmonious results.

Although incidental mention is made of the palaces at Jerusalem and elsewhere, they are of subsequent ages, and built under the influence of Roman art, and therefore not so interesting to the Biblical student as this. Besides, none of them are anywhere so described as to enable their position or details to be made out with any degree of clearness, and no instruction could be conveyed by merely reiterating the descriptions in which Josephus indulges when describing them; and no other palace is described in itself so as to render its elucidation independent in such an article as the present.

**PALAL** פלל; **Παλάτιον**; **Παλάτιον**; **Palatium**

The son of Uziel, who assisted in restoring the city of Jerusalem in the time of Nehemiah (Neh. ii, 25).

**PALESTINA** and **PALESTINE**. These forms occur in the A. V., but their use is always in poetical passages: the first, in Ex. xvi, 7 and Is. xiv, 29, 31; the second, Joel iii, 4, 25. The Hebrew is פלשתינה, *Pelishthina*, a word found besides the above, only in Ps. lxxv, 4, and lxxvii, 4, and cviii, 9, in all which our translators have rendered it by "Philistia" or "Philistia." The LXX. has in Ex. *Φαλιστινα*, but in Joel *Παλαιστίνη*; the Vulg. in Ex. *Philistia*; in Is. *Philistina*, in Joel *Palæstina*. The apparent ambiguity in the different renderings of the LXX. is in reality no ambiguity at all, for at the first that translation "Palestine" was synonymous with "Philistia." Thus Milton, with his usual accuracy in such points, mentions Irgem as

"dreaded through the name  
Of Palestine, in Gath and Ascalon,  
And Accaron and Gaza's frontier bounds" —  
(*Com. Jer.* i, 4)

and again as

"That twice-battered god of Palestine" —  
(*Hymn on Jer.* i, 4)

—where if any proof be wanted that he meant Palestine, it will be found in the

that he has previously connected other deities with the other parts of the Holy Land. See also, still more decisively, *Sanson Ag.* 144, 1098.<sup>a</sup> But even without such evidence, the passages themselves show how our translators understood the word. Thus in *Gen.* xv. 14, "Palestine," Edom, Moab, and Canaan are mentioned as the nations alarmed at the approach of Israel. In *Is.* xiv. 29, 31, the prophet warns "Palestine" not to rejoice at the death of king Ahas, who had subdued it. In *Joel* iii. 4, Phœnicia and "Palestine" are upbraided with cruelties practised on Judah and Jerusalem.

Palestine, then, in the Authorised Version, really means nothing but Philistia. The original Hebrew word *Pelēsēthā*, which, as shown above, is elsewhere translated Philistia, to the Hebrews signified merely the long and broad strip of maritime plain inhabited by their encroaching neighbours. We shall see that they never applied the name to the whole country. An inscription of Iva-lush, king of Assyria (probably the Pul of Scripture), as deciphered by Sir H. Rawlinson, names "Palatu on the Western Sea," and distinguishes it from Tyre, Damascus, Samaria, and Edom (Rawlinson's *Herod.* i. 467). In the same restricted sense it was probably employed—if employed at all—by the ancient Egyptians, in whose records at Karnak the name *Pu-sut* has been deciphered in close connexion with that of the *Shaurutima* or *Sharu*, possibly the Sidonians or Syrians (Birch, doubtfully, in Layard, *Nineveh*, ii. 407 note). Nor does it appear that at first it signified more to the Greeks. As lying next the sea, and as being also the high road from Egypt to Phœnicia and the richer regions north of it, the Philistine plain became sooner known to the western world than the country further inland, and was called by them Syria Palestina—*Συρία Παλαιστίνη*—Philistia Syria. This name is first found in Herodotus (i. 105; ii. 104; iii. 5; vii. 89); and there can be little doubt that on each occasion he is speaking of the coast, and the coast only. (See also the testimony of Joseph. *Ant.* i. 6, §2.) From thence it was gradually extended to the country further inland, till in the Roman and later Greek authors, both heathen and Christian, it becomes the usual appellation for the whole country of the Jews, both west and east of Jordan. (See the citations of Reland, *Pal.* chap. vii. viii.) Nor was its use confined to heathen writers: it even obtained among the Jews themselves. Josephus generally uses the name for the

country and nation of the Philistines (*Ant.* xii. 5, §10; vi. 1, §1, &c.), but on one or two occasions he employs it in the wider sense (*Ant.* i. 6, §4; viii. 10, §3; c. *Ap.* i. 22). So does Philo, *De Abrah.* and *De Vita Mosis*. It is even found in such thoroughly Jewish works as the Talmudic treatises *Beresith Rabba* and *Eruv Rabbothi* (Reland, 39); and it is worthy of notice how much the feeling of the nation must have degenerated before they could apply to the Promised Land the name of its bitterest enemies—the "uncircumcised Philistines."

Jerome (cir. A.D. 400) adheres to the ancient meaning of Palestina, which he restricts to Philistia (see *Ep. ad Dardanum*, §4: *Comm. in Ezechi.* xiv. 29; in *Amos* i. 6).<sup>c</sup> So also does Procopius of Gaza (cir. A.D. 510) in a curious passage on Gerar, in his comment on 2 Chr. xiv. 13.

The word is now so commonly employed in our more familiar language to designate the whole country of Israel, that, although biblically a misnomer, it has been chosen here as the most convenient heading under which to give a general description of THE HOLY LAND, embracing those points which have not been treated under the separate headings of cities or tribes.

This description will most conveniently divide itself into two sections:—

- I. The Names applied to the country of Israel in the Bible and elsewhere.
- II. The Land: its situation, aspect, climate, physical characteristics, in connexion with its history; its structure, botany, and natural history.<sup>d</sup>

The history of the country is so fully given under its various headings throughout the work, that it is unnecessary to recapitulate it here.

#### I. THE NAMES.

PALESTINE, then, is designated in the Bible by more than one name:—

1. During the Patriarchal period, the Conquest, and the age of the Judges, and also where those early periods are referred to in the later literature (as *Is.* cv. 11; and Joseph. *Ant.* i. 7; 8; 20; v. 1, &c.), it is spoken of as "Canaan," or more frequently "the Land of Canaan," meaning thereby the country west of the Jordan, as opposed to "the Land of Gilad" on the east. [*CANAAN, LAND OF*, vol. i. 246.] Other designations, during the same

and two lines, one drawn by Khan Younes, and the other between Kalsaria and the rivulet of Yafa." It is thus used repeatedly by Napoleon I. in his despatches and correspondence. See *Corresp. de Nap.* Nos. 4020, 4035, &c.

<sup>b</sup> In the second of these passages, he seems to extend it as far north as *Beirut*—if the sculptures of the *Nahr el Kelb* are the *stelae* of Sesostris.

<sup>c</sup> In his *Epist. Paulae* (§8) he extends the region of the Philistines as far north as Dor, close under Mount Carmel. We have seen above that Herodotus extends Palestine to *Beirut*. Caesarea was anciently entitled C. Palaestinae, to distinguish it from other towns of the same name, and it would seem to be even still called *Kaisariyah Felistin* by the Arabs (see note to Burckhardt, *Syria*, p. 387, July 15; also Schultens, *Index. Geogr. 'Caesarea'*). Ramleh, 10 miles east of Jaffa, retained in the time of hap-Parchi the same affix (see Asher's B. of Tudela, ii. 436). He identifies the latter with Gath.

<sup>d</sup> The reader will observe that the botany and natural history have been treated by Dr. Hooker and the Rev. W. Houghton (pp. 681; 687). The paper of the former distinguished botanist derives a peculiar value from the fact that he has visited Palestine.

<sup>a</sup> *Paradise Lost* was written between 1660 and 1670. Shakspeare, on the other hand, uses the word in its modern sense in two passages, *King John*, Act ii. Sc. 1, and *Athello*, Act iv. Sc. 3: the date of the former of these plays is 1596, that of the latter 1602. But Shakspeare and Milton wrote for different audiences; and the language of the one would be as modern (for the time) as that of the other was classical and antique. That the name was changing its meaning from the restricted to the general sense just at the beginning of the 17th century, is curiously ascertainable from two Indexes "of the Hardest Words," appended to successive editions of Sylvester's *Lu Burtas* (1605 and 1608), in one of which it is explained as "Judea, the Holy Land, first called Canaan," and in the other "the Land of the Philistines." Fuller, in his 'Piscagabright of Palestine' (1650), of course uses it in the largest sense; but it is somewhat remarkable that he says nothing whatever of the signification of the name. In France the original narrow signification has been retained. Thus *chap. xxxi. of Volney's Travels* treats of "Palestine, i. e. the plain which terminates the country of Syria on the west," and "comprehends the whole country between the Mediterranean on the west, the mountains on the east,

early period, are "the land of the Hebrews" (Gen. xi. 15 only—a natural phrase in the mouth of Joseph); the "land of the Hittites" (Josh. i. 4): a remarkable expression, occurring here only in the Bible, though frequently used in the Egyptian records of Rameses II., in which *Cheta* or *Chita* appears to denote the whole country of Lower and Middle Syria. (Brugsch, *Geogr. Inschrift.* ii. 21, &c.) The name *Ta-neir* (i. e. Holy Land), which is found in the inscriptions of Rameses II. and Thothmes III., is believed by M. Brugsch to refer to Palestine (*Ibid.* 17). But this is contested by M. de Rougé (*Revue Archéologique*, Sept. 1861, p. 216). The Phœnicians appear to have applied the title Holy Land to their own country, and possibly also to Palestine at a very early date (Brugsch, 17). If this can be substantiated, it opens a new view to the Biblical student, inasmuch as it would seem to imply that the country had a reputation for sanctity before its connexion with the Hebrews.

2. During the Monarchy the name usually, though not frequently, employed, is "Land of Israel" (אֶרֶץ יִשְׂרָאֵל; 1 Sam. xiii. 19; 2 K. v. 2, 4, vi. 23; 1 Chr. xxii. 17; 2 Chr. ii. 17). Of course this must not be confounded with the same appellation as applied to the northern kingdom only (2 Chr. xxx. 25; Ez. xxvii. 17). It is Ezekiel's favourite expression, though he commonly alters its form slightly, substituting אֶרֶץ יִשְׂרָאֵל for אֶרֶץ יִשְׂרָאֵל. The pious and loyal aspirations of Hosea find vent in the expression "land of Jehovah" (Hos. ix. 3; comp. Is. lxi. 4, &c., and indeed Lev. xxv. 23, &c.). In Zechariah it is "the Holy land" (Zech. ii. 12); and in Daniel "the glorious land" (Dan. xi. 41). In Amos (ii. 10) alone it is "the land of the Amorite;" perhaps with a glance at Deut. i. 7. Occasionally it appears to be mentioned simply as "The Land;" as in Ruth i. 1; Jer. xxii. 27; 1 Macc. xiv. 4; Luke iv. 25, and perhaps even xiii. 44. The later Jewish writers are fond of this title, of which several examples will be found in Reland, *Pal.* chap. v.

3. Between the Captivity and the time of our Lord the name "Judæa" had extended itself from the southern portion to the whole of the country,\* even that beyond Jordan (Matt. xix. 1; Mark x. 1; Joseph. *Ant.* ix. 14, §1; xii. 4, §11). In the book of Judith it is applied to the portion between the plain of Esdraelon and Samaria (xi. 19), as it is in Luke xiii. 5; though it is also used in the stricter sense of Judæa proper (John iv. 3, vii. 1), that is, the most southern of the three main divisions west of Jordan. In this narrower sense it is employed throughout 1 Macc. (see especially ix. 50, x. 30, 38, xi. 34).

In the Epistle to the Hebrews (xi. 9) we find Palestine spoken of as "the land of promise;" and in 2 Esdr. xiv. 31, it is called "the land of Sion."

4. The Roman division of the country hardly coincided with the biblical one, and it does not appear that the Romans had any distinct name for that which we understand by Palestine. The province of Syria, established by Pompey, of which

Scouras was the first governor (see *Ant.* xix. 1, in 32 B.C.), seems to have embraced the whole seaboard from the Bay of Issus (*Islandoria*) to Egypt, as far back as it was habitable, that is, up to the desert which forms the background to the whole district. "Judæa" in their phrase appears to have signified so much of this country as intervened between Idumæa on the south, and the territories of the numerous free cities, on the north and east, which were established with the establishment of the province—such as Scythopolis, Sebaste, Bays, Azotus, &c. (*Dict. of Geography*, ii. 1877). The district east of the Jordan, lying between it and the desert—at least so much of it as was not covered by the lands of Pella, Gadara, Canatha, Ptolemais, and other free towns—was called Perea.

5. Soon after the Christian era, we find from Palestine in possession of the country. Pater (A.D. 161) thus applies it (*Geogr.* v. 18). "The arbitrary divisions of Palestine Prima, Secunda, and Tertia, settled at the end of the 4th or beginning of the 5th cent. (see the quotations from the *Rel. Theol.* in Reland, p. 205), are still observed in the documents of the Eastern Church" (*Dict. of Hist.* ii. 533a). Palestine Tertia, of which Pella was the capital, was however out of the biblical land, and the portions of Perea not comprised in the Secunda were counted as in Arabia.

6. Josephus usually employs the name "Canaan" in reference to the events of the early history, but when speaking of the country in reference to his own time styles it Judæa (*Ant.* i. 6, §2, &c.); though as that was the home name of the southern province, it is sometimes (e.g. *Ant.* i. 1, §1; iii. 3, §59) difficult to ascertain when he is using it in its wider or narrower sense. In the narrower sense he certainly does when he says (e.g. *Ant.* v. 1, §22; *B. J.* iii. 3, §4, 5). Eusebius of Damascus applies the name to the whole land (Joseph. *Ant.* i. 7, §2).

The Talmudists and other Jewish writers use the title of the "Land of Israel." As the Christians and all other nations but their own have been divided, the Rabbis divide the whole world into two parts—the Land of Israel, and the regions outside it.

7. The name most frequently used at the close of the middle ages, and down to our own time, is *Sancta*—the Holy Land. In the long list of towns and Trentises given by Ritter (*Erdenkunde*, i. 31-55), Robinson (*B. R.* ii. 354-355), and Reland (*Land of Promise*, 517-535), it predominates beyond any other appellation. Quaresmii, in his *Elucidatio Terræ Sanctæ* (i. 9, 17), also enumerating the various names above mentioned, concludes by adding seven names more, of which he has embodied in the title of his work "though of later date than the rest, yet in sanctity and dignity surpasses them all," giving all the words of Pope Urban II. addressed to the Council of Clermont:—"Quam terram mortis sanctæ dicimus, in qua non est etiam paucis judicium ut illustraverit et sanctificaverit vel impio vel infidelis, vel gloriosa promissa sanctis in eternitricis, vel amplectendus Apud terram sanctam vel martyrum celebrandus singularis officium."

\* An indication of this is discovered by Reland (*Pal.* 32), as early as the time of Solomon, in the terms of 2 Chr. ix. 11; but there is nothing to imply that "Judah" in that passage means more than the actual territory of the tribe.

† This very ambiguity is a sign (notwithstanding all that Josephus says of the population and importance of

Gallilee) that the southern province was by no means an important part of the country, it contained its most fertile whole.

‡ See the citations in Ordo, *Loc. Sancti*, "Jerusalem Sanctio"; and the *Itinerarium de Sanctis*, Ptolemy, *Itin.* in Carney, &c.

## II. THE LAND.

The Holy Land is not in size or physical characteristics proportioned to its moral and historical position, as the theatre of the most momentous events in the world's history. It is but a strip of country, about the size of Wales, less than 140 miles<sup>1</sup> in length, and barely 40<sup>1</sup> in average breadth, on the very frontier of the East, hemmed in between the Mediterranean Sea on the one hand, and the enormous trench of the Jordan-valley on the other, by which it is effectually cut off from the mainland of Asia behind it. On the north it is shut in by the high ranges of Lebanon and anti-Lebanon, and by the chasm of the Litány,<sup>2</sup> which runs at their feet and forms the main drain of their southern slopes. On the south it is no less enclosed by the arid and inhospitable deserts of the upper part of the peninsula of Sinai, whose undulating wastes melt imperceptibly into the southern hills of Judaea.

1. Its position on the Map of the World—as the world was when the Holy Land first made its appearance in history—is a remarkable one.

(1.) It is on the very outpost—on the extreme western edge of the East, pushed forward, as it were, by the huge continent of Asia, which almost seems to have rejected and cut off from communication with itself this tiny strip, by the broad and impassable desert interposed between it and the vast tracts of Mesopotamia and Arabia in its rear. On the shore of the Mediterranean it stands, as if it had advanced as far as possible towards the West—towards that New World which in the fulness of time it was so mightily to affect; separated therefrom by that which, when the time arrived, proved to be no barrier, but the readiest medium of communication—the wide waters of the “Great Sea.” Thus it was open to all the gradual influences of the rising communities of the West, while it was saved from the retrogression and decrepitude which have ultimately been the doom of all purely Eastern States whose connexions were limited to the East<sup>3</sup> only. And when at last its ruin was effected, and the nation of Israel driven from its home, it transferred without obstacle the result of its long training to those regions of the West with which by virtue of its position it was in ready communication.

(2.) There was however one channel, and but one, by which it could reach and be reached by the great Oriental empires. The only road by which the two great rivals of the ancient world could approach one another—by which alone Egypt could get to Assyria, and Assyria to Egypt—lay along the broad flat strip of coast which formed the ma-

ritime portion of the Holy Land, and thence by the Plain of the Lebanon to the Euphrates. True, this road did not, as we shall see, lie actually through the country, but at the foot of the highlands which virtually composed the Holy Land; still the proximity was too close not to be full of danger; and though the catastrophe was postponed for many centuries, yet, when it actually arrived, it arrived through this channel.

(3.) After this the Holy Land became (like the Netherlands in Europe) the convenient arena on which in successive ages the hostile powers who contended for the empire of the East, fought their battles. Here the Seleucidae routed, or were routed by, the Ptolemies; here the Romans vanquished the Parthians, the Persians, and the Jews themselves; and here the armies of France, England, and Germany, fought the hosts of Saladin.

2. It is essentially a mountainous country. Not that it contains independent mountain chains, as in Greece for example, dividing one region from another with extensive valleys or plains between and among them—but that every part of the highland is in greater or less undulation. From its station in the north, the range of Lebanon pushes forth before it a multitude of hills and eminences, which crowd one another more or less thickly<sup>4</sup> over the face of the country to its extreme south limit. But it is not only a mountainous country. It contains in combination with its mountains a remarkable arrangement of plains, such as few other countries can show, which indeed form its chief peculiarity, and have had an equal, if not a more important, bearing on its history than the mountains themselves. The mass of hills which occupies the centre of the country is bordered or framed on both sides, east and west, by a broad belt of lowland, sunk deep below its own level. The slopes or cliffs which form, as it were, the retaining walls of this depression, are furrowed and cleft by the torrent beds which discharge the waters of the hills, and form the means of communication between the upper and lower level. On the west this lowland interposes between the mountains and the sea, and is the Plain of Philistia and of Sharon. On the east it is the broad bottom of the Jordan valley, deep down in which rushes the one river of Palestine to its grave in the Dead Sea.

3. Such is the first general impression of the physiognomy of the Holy Land. It is a physiognomy compounded of the three main features already named—the plains, the highland hills, and the torrent beds: features which are marked in the words of its earliest describers (Num. xiii. 29; Josh. xi. 16, xii. 8), and which must be comprehended by every one who wishes to understand

<sup>1</sup> The latitude of *Banias*, the ancient Dan, is 33° 16', and that of *Beersheba* 31° 16'; thus the distance between these two points—the one at the north, the other at the south—is 2 degrees, 120 geogr. or 139 English miles.

<sup>2</sup> The breadth of the country at *Gaza*, from the shore of the Mediterranean to that of the Dead Sea, is 48 geogr. miles, while at the latitude of the *Litány* from the coast to the Jordan it is 26. The average of the breadths between two parallels, taken at each half degree, gives 54 geogr. miles, or just 40 English miles.

<sup>3</sup> The latitude of the *Litány* (or *Kizilirmak*) differs but slightly from that of *Banias*. Its mouth is given by *Van de Velde* (*Memoir*, 59) at 33° 20'.

<sup>4</sup> The contrast between East and West, and the position of the Holy Land as on the confines of each, is happily given in a passage in *Æthien* (chap. 28).

<sup>1</sup> The district of the Surrey hills about Caterham, in its most regular portions, if denuded of most of its wood, turf, and soil, would be not unlike many parts of Palestine. So are (or were) the hills of Roxburghshire on the banks of the Tweed, as the following description of them by Washington Irving will show:—“From a hill which like Gerizim or Olivet ‘commanded an extensive prospect . . . I gazed about me for a time with surprise, I may almost say with disappointment. I beheld a succession of grey waving hills, line beyond line, as far as my eyes could reach, monotonous in their aspect, and entirely destitute of trees. . . . The far-famed Tweed appeared a naked stream flowing between bare hills. And yet’ (what is even more applicable to the Holy Land) ‘such had been the magic web thrown over the whole, that it had a greater charm than the richest scenery in England.’”

MAP OF PALESTINE, with section of the country from Jaffa to the Dead Sea.

se country, and the intimate connexion existing between its structure and its history. In the accompanying sketch-map an attempt has been made to exhibit these features with greater distinctness than is usual, or perhaps possible, in maps containing more detail.

On a nearer view we shall discover some traits not observed at first, which add sensibly to the expression of this interesting countenance. About halfway up the coast the maritime plain is suddenly interrupted by a long ridge thrown out from the central mass, rising considerably above the general level, and terminating in a bold promontory on the very edge of the Mediterranean. This ridge is Mount Carmel. On its upper side, the plain, as if to compensate for its temporary displacement, invades the centre of the country and forms an undulating hollow right across it from the Mediterranean to the Jordan valley. This central lowland, which divides with its broad depression the mountains of Ephraim from the mountains of Galilee, is the plain of Esdraelon or Jezreel, the great battle-field of Palestine. North of Carmel the lowland resumes its position by the sea-side till it is again interrupted and finally cut at an end to by the northern mountains which dash their way out to the sea, ending in the white promontory of the *Ras Nakhâra*. Above this is the ancient Phœnicia—a succession of headlands sweeping down to the ocean, and leaving but few intervals of beach. Behind Phœnicia—north of Esdraelon, and enclosed between it, the Litâny, and the upper valley of the Jordan—is a continuation of the mountain district, not differing materially in structure or character from that to the south, but rising gradually to occasional elevation until it reaches the main ranges of Lebanon and anti-Lebanon (or Hermon), from their lofty heights they overlook the whole land below them, of which they are indeed the centres.

4. The country thus roughly portrayed, and high, as before stated, is less than 140 miles in length, and not more than 40 in average breadth, to all intents and purposes the whole Land of Israel. The northern portion is Galilee; the centre, Samaria; the south, Judæa. This is the Land of Canaan which was bestowed on Abraham; the commanded home of his descendants. The two tribes and a half remained on the uplands beyond Jordan, instead of advancing to take their portion with the rest within its circumvallation of defence; but that it appears to have formed no part of the original plan. It arose out of an accidental circumstance,—the abundance of cattle which they had acquired during their stay in Egypt, or during the transit through the wilderness,—and its result was, that the tribes in question soon ceased to have any close connexion with the others, or to form any virtual part of the nation. But even this definition might without impropriety be further circumscribed; for during the greater part of the O. T. times the chief events of the history were confined to the district south of Esdraelon, which contained the cities of Hebron, Jerusalem, Bethel, Shiloh, Shechem, and Samaria, the Mount of Olives, and the Mount Carmel. The battles of the Conquest and the early struggles

of the era of the Judges once passed, Galilee subsided into obscurity and unimportance till the time of Christ.

5. Small as the Holy Land is on the map, and when contrasted either with modern states or with the two enormous ancient empires of Egypt and Assyria between which it lay, it seems even smaller to the traveller as he pursues his way through it. The long solid purple wall of the Moab and Gilead mountains, which is always in sight, and forms the background to almost every view to the eastward, is perpetually reminding him that the confines of the country in that direction are close at hand. There are numerous eminences in the highlands which command the view of both frontiers at the same time—the eastern mountains of Gilead with the Jordan at their feet on the one hand, on the other the Western Sea,\* with its line of white sand and its blue expanse. Hermon, the apex of the country on the north, is said to have been seen from the southern end of the Dead Sea: it is certainly plain enough, from many a point nearer the centre. It is startling to find that from the top of the hills of Neby Samwil, Bethel, Tabor, Gerizim, or Safed, the eye can embrace at one glance, and almost without turning the head, such opposite points as the Lake of Galilee and the Bay of Akka, the farthest mountains of the Hauran and the long ridge of Carmel, the ravine of the Jabbok, or the green windings of Jordan, and the sand-hills of Jaffa. The impression thus produced is materially assisted by the transparent clearness of the air and the exceeding brightness of the light, by which objects that in our duller atmosphere would be invisible from each other or thrown into dim distance are made distinctly visible, and thus appear to be much nearer together than they really are.

6. The highland district, thus surrounded and intersected by its broad lowland plains, preserves from north to south a remarkably even and horizontal profile. Its average height may be taken as 1500 to 1800 feet above the Mediterranean. It can hardly be denominated a plateau, yet so evenly is the general level preserved, and so thickly do the hills stand behind and between one another, that, when seen from the coast or the western part of the maritime plain, it has quite the appearance of a wall, standing in the background of the rich district between it and the observer—a district which from its gentle undulations, and its being so nearly on a level with the eye, appears almost immeasurable in extent. This general monotony of profile is, however, accentuated at intervals by certain centres of elevation. These occur in a line almost due north and south, but lying somewhat east of the axis of the country. Beginning from the south, they are Hebron,† 3029 feet above the Mediterranean; Jerusalem 2610, and Mount of Olives 2724, with *Neby Samwil* on the north 2650; Bethel, 2400; *Samûl*, 2685; Ebal and Gerizim 2700; “Little Hermon” or Tabor (on the north side of the Plain of Esdraelon) 1900; Safed 2775; *Jebel Jermak* 4000. Between these elevated points runs the watershed‡ of the country, sending off on either hand—to the Jordan valley on the east and the Mediterranean on the west, and be it remem-

\* The main ridge of Carmel is between 1700 and 1800 feet high. The hills of Samaria immediately to the S.E. are only about 1100 feet (Van de Velde, *Memoir*, 7, 8).

† The same word is used in Hebrew for “sea” and for “east.”

‡ The altitudes are those given by Van de Velde, after much comparison and investigation, in his *Memoir* (pp. 170-183).

§ For the watershed see Ritter, *Erdrkunde, Jordan*, 474-480. His heights have been somewhat modified by more recent observations, for which see Van de Velde's *Memoir*.

bered east and west only—the long tortuous arms of its many torrent beds. But though keeping north and south as its general direction, the line of the watershed is, as might be expected from the prevalent equality of level of these highlands, and the absence of anything like ridge or saddle, very irregular, the heads of the valleys on the one side often passing and “overlapping” those of the other. Thus in the territory of the ancient Benjamin, the heads of the great Wady *Fucar* (or *Suweinit*) and *Mutjah* (or *Kelt*)—the two main channels by which the torrents of the winter rains hurry down from the bald hills of this district into the valley of the Jordan—are at *Birch* and *Beitla* respectively, while the great Wady *Belât*, which enters the Mediterranean at *Nahr Aujah* a few miles above Jaffa, stretches its long arms as far as, and even farther than, *Taiyibeh*, nearly four miles to the east of either *Birch* or *Beitla*. Thus also in the more northern district of Mount Ephraim around Nablus, the ramifications of that extensive system of valleys which combine to form the Wady *Ferrah*—one of the main feeders of the central Jordan—interlace and cross by many miles those of the Wady *Shair*, whose principal arm is the Valley of *Nablus*, and which pours its waters into the Mediterranean at *Nahr Fulaik*.

7. The valleys on the two sides of the watershed differ considerably in character. Those on the east—owing to the extraordinary depth of the Jordan valley into which they plunge, and also to the fact already mentioned, that the watershed lies rather on that side of the highlands, thus making the fall more abrupt—are extremely steep and rugged. This is the case during the whole length of the southern and middle portions of the country. The precipitous descent between Olivet and Jericho, with which all travellers in the Holy Land are acquainted, is a type, and by no means an unfair type, of the eastern passes, from *Zuccirah* and *Ain-jidi* on the south to Wady *Bidan* on the north. It is only when the junction between the Plain of Esdraelon and the Jordan Valley is reached, that the slopes become gradual and the ground fit for the manoeuvres of anything but detached bodies of foot soldiers. But, rugged and difficult as they are, they form the only access to the upper country from this side, and every man or body of men who reached the territory of Judah, Benjamin, or Ephraim from the Jordan Valley, must have climbed one or other of them.\* The Ammonites and Moabites, who at some remote date left such lasting traces of their presence in the names of Chephar ha-Ammonai and Michmash, and the Israelites pressing forward to the relief of Gibeon and the slaughter of Beth-horon, doubtless entered alike through the great Wady *Fucar* already spoken of. The Moabites, Edomites, and Meunim swarmed up to their attack on Judah through the crevices of *Ain-jidi* (2 Chr. xx. 12, 16). The pass

of Adummim was in the days of our Lord—what still is—the regular route between Jericho and Jerusalem. By it Pompey advanced with luxury when he took the city.

8. The western valleys are more gradual in their slope. The level of the external plain on this side is higher, and therefore the fall less, still at the same time the distance to be traversed is much greater. Thus the length of the Wady *Belât* already mentioned, from its remotest head at *Taiyibeh* to the point at which it emerges on the plain of Sharon, may be taken as 20 to 25 miles, with a total difference of level during that distance of perhaps 1800 feet, while the Wady *et-Aujah*, which falls from the other side of *Taiyibeh* into the Jordan, has a distance of barely 10 miles to reach the Jordan-valley, at the same time falling no less than 2800 feet.

Here again the valleys are the only means of communication between the lowland and the high land. From Jaffa and the central part of the coast there are two of these roads “going up to Jerusalem”: the one to the right by *Ramleh* and the Wady *Alg*; the other to the left by *Lod*, whence thence by the Bethhorana, or the Wady *Shair*, and Gibeon. The former of these is easier, but the latter is the scene of many a fierce contest in the ancient history. Over its long columns the Canaanites were driven by Joshua to their plains; the Philistines ascended to Michmash of Gaba, and fled back past Ajalon; the Syrian host was stopped and hurled back by Judah; the host of Cestius Gallus were chased pell-mell to their strongholds at Antipatris.

9. Further south, the communications between the mountains of Judah and the lowland of Philistia are hitherto comparatively unexplored. We were doubtless the scene of many a fierce and repulse during the lifetime of Samson and his struggles of the Danites, but there is no one of their having been used for the passage of an important force either in ancient or modern times. North of Jaffa the passes are few. One of them by the Wady *Belât*, led from Antipatris to Gophna. By this route St. Paul was probably conveyed away from Jerusalem. Another led to the ancient sanctuary of Gidgal near *Nephtali* in *Nablus*.—These western valleys, though easier than those on the eastern side, are of such a nature as to present great difficulties to the passage of an army force encumbered by baggage. In fact these mountain passes really formed the security of Israel, as if she had been wise enough to settle her internal quarrels without reference to foreign nations might, humanly speaking, have stood in the present hour. The height, and consequent traffic, which was the frequent boast of the Prophet and Palmists in regard to Jerusalem, was no less true of the whole country, rising as it does to the

\* Except in the immediate neighbourhood of the Plain of Esdraelon, and in the extreme north—where the drainage, instead of being to the Mediterranean or the Jordan, is to the Litany—the statement in the text is strictly accurate.

† Nothing can afford so strong a testimony to the really unwarlike genius of the Canaanites, and subsequently, in their turn, of the Jews also, as the way in which they suffered their conquerors again and again to advance through these defiles, where their destruction might so easily have been effected. They always retired at once, and shutting themselves up in their strongholds, awaited the attack there. From Jericho, Hebron, Jerusalem, to

Silistria, the story is one and the same—the mode of Oriental to fight in the open field, and their persistent determined resistance when entrenched behind defilements.

‡ Richard I., when intending to attack Jerusalem, sent from Acre to Blanche Garde (*Castle*), or *Bel-garde*, on the edge of the mountains of Judah; and just before taking a direct route to the Holy City through the passes of the mountains, turned northwards over the plain to take the road from Ramleh to Bethlehem (John 12:18). The ordinary approach from Jaffa to Jerusalem, took of at least four days. (See Vincent, *v. c.*, in *Revue de Cruesade*, 124.)

edges from plains so much below it in level. The masses of Egypt and Assyria, as they traced and retraced their path between Pelusium and Carmichael, must have looked at the long wall of heights which closed in the broad level roadway they were pursuing, as belonging to a country with which they had no concern. It was to them a natural mountain fastness, the approach to which was beset with difficulties, while its bare and soilless hills were hardly worth the trouble of conquering, in comparison with the rich green plains of the Euphrates and the Nile, or even with the boundless cornfield through which they were marching. This may be fairly inferred from various notices in Scripture and in contemporary history. The Egyptian kings, from Rameses II. and Thothmes III. to Pharaoh Necho, were in the constant habit of pursuing this route during their expeditions against the Chatti, or Hittites, in the north of Syria; and the two last-named monarchs fought battles at Megiddo, without, as far as we know, having taken the trouble to penetrate into the interior of the country. The Pharaoh who was Solomon's contemporary came up the Philistine plain as far as Gezer (probably about Ramleh), and besieged and destroyed it, without leaving any impression of uneasiness in the annals of Israel. Later in the monarchy, Pammethicus besieged Ashdod in the Philistine plain for the extraordinary period of twenty-nine years (Herod. ii. 157); during a portion of that time an Assyrian army probably occupied part of the same district, endeavouring to relieve the town. The battles must have been frequent; and yet the only reference to these events in the Bible is the mention of the Assyrian general by Isaiah (xx. 1), in so casual a manner as to lead irresistibly to the conclusion that neither Egyptians nor Assyrians had come up into the highland. This is illustrated by Napoleon's campaign in Palestine. He entered it from Egypt by *El-Arish*, and after overrunning the whole of the lowland, and taking Gaza, Jaffa, Ramleh, and the other places on the plain, he writes to the sheikhs of Nablus and Jerusalem, announcing that he has no intention of making war against them (*Corresp. de Nap.* No. 4020, "19 Ventose, 1799"). To use his own words, the highland country "did not lie within his base of operations;" and it would have been a waste of time, or worse, to ascend thither.

In the later days of the Jewish nation, and during the Crusades, Jerusalem became the great object of contest; and then the battlefield of the country, which had originally been Esdraelon, was transferred to the maritime plain at the foot of the passes communicating most directly with the capital. Here Judas Maccabeus achieved some of his greatest triumphs; and here some of Herod's most decisive actions were fought; and Blanchegarde, Ascalon, Jaffa, and Beitautah (the Bettenuble of the Cru-

sading historian), still shine with the brightest rays of the valour of Richard the First.

10. When the highlands of the country are more closely examined, a considerable difference will be found to exist in the natural condition and appearance of their different portions. The south, as being nearer the arid desert, and farther removed from the drainage of the mountains, is drier and less productive than the north. The tract below Hebron, which forms the link between the hills of Judah and the desert, was known to the ancient Hebrews by a term originally derived from its dryness (*Negob*). This was THE SOUTH country. It contained the territory which Caleb bestowed on his daughter, and which he had afterwards to endow specially with the "upper and lower springs" of a less parched locality (Josh. xv. 19). Here lived Nabal, so chary of his "water" (1 Sam. xxv. 11); and here may well have been the scene of the composition of the 63rd Psalm—the "dry and thirsty land where no water is." As the traveller advances north of this tract there is an improvement; but perhaps no country equally cultivated is more monotonous, bare, or uninviting in its aspect, than a great part of the highlands of Judah and Benjamin during the largest portion of the year. The spring covers even those bald grey rocks with verdure and colour, and fills the ravines with torrents of rushing water; but in summer and autumn the look of the country from Hebron up to Bethel is very dreary and desolate. The flowers, which for a few weeks give so brilliant and varied a hue to whole districts, wither and vanish before the first fierce rays of the sun of summer: they are "to-day in the field—to-morrow cast into the oven." Rounded hills of moderate height fill up the view on every side, their coarse grey stone continually discovering itself through the thin coating of soil, and hardly distinguishable from the remains of the ancient terraces which run round them with the regularity of contour lines, or from the confused heaps of ruin which occupy the site of former village or fortress. On some of the hills the terraces have been repaired or reconstructed, and these contain plantations of olives or figs, sometimes with and sometimes without vineyards, surrounded by rough stone walls, and with the watch-towers at the corners, so familiar to us from the parables of the Old and New Testaments. Others have a shaggy covering of oak bushes in clumps. There are traditions that in former times the road between Bethlehem and Hebron was lined with large trees; but all that now remains of them are the large oak-roots which are embedded in the rocky soil, and are dug up by the peasants for fuel (*Miss Beaufort*, ii. 124). The valleys of denudation which divide these monotonous hills are also planted with figs or olives, but often cultivated with corn or *dourra*, the long reed-like stalks of which remain on the stony ground till the next seed time,

<sup>1</sup> Rawlinson, note to Herod. ii. §157.

<sup>2</sup> For Thothmes' engagement at Megiddo, see De Rougé's interpretation of his monuments recently discovered at Thebes, in the *Revue Archéologique*, 1861, p. 384, &c. For Pharaoh Necho, see 2 K. xxiii. 29.

<sup>3</sup> The identification of Megiddo, coinciding as it does with the statements of the Bible, is tolerably certain; but at present as much can hardly be said of the other names in these lists. Not only does the agreement of the names appear doubtful, but the lists, as now deciphered, present an amount of confusion—places in the north being jumbled up with those in the south, &c.—which raises a constant suspicion.

<sup>4</sup> Is. xx. 1, as explained by Gesenius, and by Rawlinson (ii. 242, note).

<sup>5</sup> This Psalm is also referred to the hot and waterless road of the deep descent to Jericho and the Jordan. See OLIVER, MOUNT OF, p. 624 a.

<sup>6</sup> Stanley (*N. & P.* 139)—not prone to exaggerate colour (comp. 87, "Pitra")—speaks of it as "a blaze of scarlet."

<sup>7</sup> "Rounded swelling masses like huge bubbles," says Mr. Seaton the painter (p. 122). "Each one uglier than its neighbour" (*Miss Beaufort*, ii. 97). See also the description of Rassegger the geologist, in Ritter, *Jordan*, 496.

<sup>8</sup> "Often looking as if burnt in the kiln" (*Anderson* 122).

and give a singularly dry and slovenly look to the fields. The general absence of fences in the valleys does not render them less desolate to an English eye, and where a fence is now and then encountered, it is either a stone wall trodden down and dilapidated, or a hedge of the prickly-pear cactus, gaunt, irregular, and ugly, without being picturesque. Often the track rises and falls for miles together over the edges of the white strata upturned into almost a vertical position; or over sheets of bare rock spread out like flagstones, and marked with fissures which have all the regularity of artificial joints; or along narrow channels, through which the feet of centuries of travellers have with difficulty retained their hold on the steep declivities; or down flights of irregular steps hewn or worn in the solid rock of the ravine, and strewn thick with innumerable loose stones. Even the grey villages—always on the top or near the top of the hills—do but add to the dreariness of the scene by the forlorn look which their flat roofs and absence of windows present to a European eye, and by the poverty and ruin so universal among them. At Jerusalem this reaches its climax, and in the leaden ashy hue which overspreads, for the major part of the year, much of the landscape immediately contiguous to the city, and which may well be owing to the debris of its successive demolitions, there is something unspeakably affecting. The solitude which reigns throughout most of these hills and valleys is also very striking. "For miles and miles there is often no appearance of life except the occasional goat-herd on the hill-side, or gathering of women at the wells."<sup>a</sup>

To the west and north-west of the highlands, where the sea breezes are felt, there is considerably more vegetation. The *Wady es-Sunt* derives its name from the acacias which line its sides. In the same neighbourhood olives abound, and give the country "almost a wooded appearance" (Rob. ii. 21, 22). The dark grateful foliage of the *butm*, or terebinth, is frequent; and one of these trees, perhaps the largest in Palestine, stands a few minutes' ride from the ancient Socho (ib. 222). About ten miles north of this, near the site of the ancient Kirjath-jearim, the "city of forests," are some thickets of pine (*snûber*) and laurel (*kehdûb*), which Tobler compares with European woods (*3tte Wanderung*, 178).

11. Hitherto we have spoken of the central and northern portions of Judaea. Its eastern portion—a tract some 9 or 10 miles in width by about 35 in length—which intervenes between the centre and the abrupt descent to the Dead Sea, is far more wild and desolate, and that not for a portion of the year only, but throughout it.<sup>b</sup> This must have been always what it is now—an uninhabited desert, because uninhabitable; "a bare arid wilderness; an endless succession of shapeless yellow and ash-

coloured hills, without grass or shrubs, without water, and almost without life,"—even without ruins, with the rare exceptions of Masada, and a solitary watch-tower or two.

12. No descriptive sketch of this part of the country can be complete which does not allude to the caverns, characteristic of all limestone districts, and here existing in astonishing numbers. Every hill and ravine is pierced with them, some very large and of curious formation—perhaps partly natural, partly artificial—others mere grottoes. Many of them are connected with most important and interesting events of the ancient history of the country. Especially is this true of the district now under consideration. *Mashpelah*, *Makhrish*, *Adulim*, *Egged*, names inseparably connected with the lives, adventures, and deaths of Abraham, Joshua, David, and other Old Testament worthies, are all within the small circle of the territory of Judaea. Moreover, there is perhaps hardly one of these caverns, however small, which has not at some time or other furnished a hiding-place to some ancient Hebrew from the sweeping incursions of the Philistines or Amalekites. For the bearing which the present treatment of many of the caverns has on the modern religious aspect of Palestine, and for the remarkable symbol which they furnish of the life of Israel, the reader must be referred to a striking passage in *Sinai and Palestine* (ch. ii. x. 3). [CAVE.]

13. The bareness and dryness which prevail more or less in Judaea is owing partly to the absence of wood (see below), partly to its proximity to the desert, and partly to a scarcity of water, arising from its distance from the Lebanon. The abundant springs which form so delightful a feature of the country further north, and many of which continue to flow even after the hottest summers, are here very rarely met with after the most season is over, and their place is but poorly supplied by the wells, themselves but few in number, and down into the white rock of the universal substratum, and with mouths so narrow and so carefully closed that they may be easily passed without notice by travellers unaccustomed to the country. [WELLS.]

14. But to this discouraging aspect there are happily some important exceptions. The valley of *Urds*, south of Bethlehem, contains springs which in abundance and excellence rival even those of *Abbas*; the huge "Pools of Solomon" are enough to supply a district for many miles round them; and the cultivation now going on in that neighbourhood shows what might be done with a soil which requires only irrigation and a moderate amount of labour to evoke a boundless produce. At *Bethlehem* and *Mar Elyds*, too, and in the neighbourhood of the Convent of the Cross, and especially near *Rahm*, there are excellent examples of what can be done with vineyards, and plantations of olives and fig-

<sup>a</sup> As at *Beit-sur* (Beth-horon).

<sup>b</sup> As south of *Beitlin* (Bethel), and many other places.

<sup>c</sup> As in the *Wady Aly*, 7 miles west of Jerusalem. See Beaumont's description of this route in his *Diary of a Journey*, &c. i. 192.

<sup>d</sup> See JERUSALEM, vol. i. p. 988 a. The same remark will be found in Seddon's *Memoir*, 198.

<sup>e</sup> Stanley, *S. & P.* 117.

<sup>f</sup> Even on the 8th January, De Saulcy found no water.

<sup>g</sup> Van de Velde, *Syria & Pal.* ii. 98; and see the same still more forcibly stated on p. 101; and a graphic description by Miss Beaufort, ii. 102, 103; 127, 128. The cha-

acter of the upper part of the district, to the S.E. of the Mount of Olives, is well seized by Mr. Seddon. "A barrenness of mountain-tops, in some places tossed up like walls of mud, in others wrinkled over with scum, the rocks made of crumpled brown paper, the trunks and branches strewn with rocks and bushes" (*Mem. etc.*, 204).

<sup>h</sup> There is no adequate provision here or elsewhere in Palestine (except perhaps in Jerusalem) for catching and preserving the water which falls in the heavy snow of winter and spring; a provision easily made, and found to answer admirably in countries similarly circumstanced, such as Malta and Bermuda, where the rains furnish almost the whole water supply.

trees. And it must not be forgotten that during the limited time when the plains and bottoms are covered with waving crops of green or golden corn, and when the naked rocks are shrouded in that brilliant covering of flowers to which allusion has already been made, the appearance of things must be far more inviting than it is during that greater portion of the year which elapses after the harvest, and which, as being the more habitual aspect of the scene, has been dwelt upon above.

15. It is obvious that in the ancient days of the nation, when Judah and Benjamin possessed the teeming population indicated in the Bible, the condition and aspect of the country must have been very different. Of this there are not wanting sure evidences. There is no country in which the ruined towns bear so large a proportion to those still existing. Hardly a hill-top of the many within sight that is not covered with vestiges of some fortress or city.\* That this numerous population knew how most effectually to cultivate their rocky territory, is shown by the remains of their ancient terraces, which constantly meet the eye, the only mode of husbanding so scanty a coating of soil, and preventing its being washed by the torrents into the valleys. These frequent remains enable the traveller to form an idea of the look of the landscape when they were kept up. But, besides this, forests appear to have stood in many parts of Judaea<sup>†</sup> until the repeated invasions and sieges caused their fall, and the wretched government of the Turks prevented their reinstatement; and all this vegetation must have reacted on the moisture of the climate, and, by preserving the water in many a ravine and natural reservoir where now it is rapidly dried by the fierce sun of the early summer, must have influenced materially the look and the resources of the country.

16. Advancing northwards from Judaea the country becomes gradually more open and pleasant. Plains of good soil occur between the hills, at first small,<sup>‡</sup> but afterwards comparatively large. In some cases (such as the *Mukhmas*, which stretches away from the feet of Gerizim for several miles to the south and east) these would be remarkable anywhere. The hills assume here a more varied aspect than in the southern districts, springs are more abundant and more permanent, until at last, when the district of the *Jebel Nablûs* is reached—the ancient Mount Ephraim—the traveller encounters an atmosphere and an amount of vegetation and water which, if not so transcendently lovely as the representations of enthusiastic travellers would make it, is yet greatly superior to anything he has met with in Judaea, and even sufficient to recall much of the scenery of the West.

17. Perhaps the Springs are the only objects which in themselves, and apart from their associations, really strike an English traveller with astonishment and admiration. Such glorious fountains as those of *Ain-judâi* or the *Ius el-Mukdâtî*, where a great body of the clearest water wells silently but swiftly out from deep blue recesses worn in the foot of a low cliff of limestone rock, and at once forms a considerable stream—or as that of *Tell el-Kady*, eddying forth from the base of a lovely wooded mound into a wide, deep, and limpid pool—or those of *Banias* and *Fijâh*, where a large river leaps headlong foam-

ing and roaring from its cave—or even as that of *Jemâ*, bubbling upwards from the level ground—are very rarely to be met with out of irregular, rocky, mountainous countries, and being such unusual sights can hardly be looked on by the traveller without surprise and emotion. But, added to this their natural impressiveness, there is the consideration of the prominent part which so many of these springs have played in the history. Even the caverns are not more characteristic of Palestine, or oftener mentioned in the accounts both of the great national crises and of more ordinary transactions. It is sufficient here to name En-hakkore, En-gedi, Gihon, and, in this particular district, the spring of Harod, the fountain of Jezreel, En-dor, and En-gannim, reserving a fuller treatment of the subject for the special head of SPRINGS.

18. The valleys which lead down from the upper level in this district to the valley of the Jordan, and the mountains through which they descend, are also a great improvement on those which form the eastern portion of Judah, and even of Benjamin. The valleys are (as already remarked) less precipitous, because the level from which they start in their descent is lower, while that of the Jordan valley is higher; and they have lost that savage character which distinguishes the naked clefts of the *Wady Suweinit* and *Kelt*, of the *Ain-jily* or *Zuweirah*, and have become wider and shallower, swelling out here and there into basins, and containing much land under cultivation more or less regular. Fine streams run through many of these valleys, in which a considerable body of water is found even after the hottest and longest summers, their banks hidden by a thick shrubbery of oleanders and other flowering trees,—truly a delicious sight, and one most rarely seen to the south of Jerusalem, or within many miles to the north of it. The mountains, though bare of wood and but partially cultivated, have none of that arid, worn look which renders those east of Hebron, and even those between Mukhmas and Jericho, so repulsive. In fact the eastern district of the *Jebel Nablûs* contains some of the most fertile and valuable spots in Palestine.<sup>§</sup>

19. Hardly less rich is the extensive region which lies north-west of the city of *Nablûs*, between it and Carmel, in which the mountains gradually break down into the Plain of Sharon. This has been very imperfectly explored, but it is spoken of as extremely fertile—huge fields of corn, with occasional tracts of wood, recalling the county of Kent<sup>||</sup>—but mostly a continued expanse of sloping downs.

20. But with all its richness, and all its advance on the southern part of the country, there is a strange dearth of natural wood about this central district. Olive-trees are indeed to be found everywhere, but they are artificially cultivated for their fruit, and the olive is not a tree which adds to the look of a landscape. A few carob-trees are also met with in such richer spots as the valley of *Nablûs*. But of all natural non-fruit-bearing trees there is a singular dearth. It is this which makes the wooded sides of Carmel and the parklike scenery of the adjacent slopes and plains so remarkable. True, when compared with European timber, the trees are but small, but their abundance is in strong contrast with the absolute dearth of

which rise the gentle hills which bear the ruins of Gibeon, Nablûs, &c., is perhaps the first of these in the advance from south to north.

<sup>||</sup> Lord Lindsay (*Bohn's ed.*), p. 254.

\* Stanley, *S. & P.* 117, where the lessons to be gathered from these ruins of so many successive nations and races are admirably drawn out.

† For a list of these, see Fossier.

‡ That at the northern foot of Neby Samwîl, out of

wood in the neighbouring mountains. Carmel is always mentioned by the ancient prophets and poets as remarkable for its luxuriance; and, as there is no reason to believe that it has changed its character, we have, in the expressions referred to, pretty conclusive evidence that the look of the adjoining district of Ephraim was not very different then from what it is now.

21. No sooner, however, is the Plain of Esdraelon passed, than a considerable improvement is perceptible. The low hills which spread down from the mountains of Galilee, and form the barrier between the plains of Akka and Esdraelon, are covered with timber, of moderate size, it is true, but of thick vigorous growth, and pleasant to the eye. Eastward of these hills rises the round mass of Tabor, dark with its copes of oak, and set off by contrast with the bare slopes of *Jebel el-Dukky* (the so-called "Little Hermon") and the white hills of Nazareth. North of Tabor and Nazareth is the plain of *el-Buttauf*, an upland tract hitherto very imperfectly described, but apparently of a similar nature to Esdraelon, though much more elevated. It runs from east to west, in which direction it is perhaps ten miles long, by two miles wide at its broadest part. It is described as extremely fertile, and abounding in vegetation. Beyond this the amount of natural growth increases at every step, until towards the north the country becomes what even in the West would be considered as well timbered. The centre part—the watershed between the upper end of the Jordan valley on the one hand, and the Mediterranean on the other, is a succession of swelling hills, covered with oak and terebinth, its occasional ravines thickly clothed in addition with maple, arbutus, sumach, and other trees. So abundant is the timber that large quantities of it are regularly carried to the sea-coast at Tyre, and there shipped as fuel to the towns on the coast (Rob. ii. 450). The general level of the country is not quite equal to that of Judaea and Samaria, but on the other hand there are points which reach a greater elevation than anything in the south, such as the prominent group of *Jebel Jurnuk*, and perhaps *Tibnin*—and which have all the greater effect from the surrounding country being lower. *Tibnin* lies about the centre of the district, and as far north as this the valleys run east and west of the watershed, but above it they run northwards into the Litány, which cleaves the country from east to west, and forms the northern border of the district, and indeed of the Holy Land itself.

22. The notices of this romantic district in the Bible are but scanty; in fact till the date of the New Testament, when it had acquired the name of Galilee, it may be said, for all purposes of history, to be hardly mentioned. And even in the New Testament times the interest is confined to a very small portion—the south and south-west corner containing Nazareth, Cana, and Nain, on the confines of Esdraelon, Capernaum, Tiberias, and Gennesareth, on the margin of the Lake.\*

In the great Roman conquest, or rather destruction, of Galilee, which preceded the fall of Jerusalem, the contest penetrated but a short distance into the interior. Jotapata and Giscala—neither of them more than 12 miles from the Lake—are the furthest

points to which we know of the struggle extending in that wooded and impenetrable district. One of the earliest accounts we possess describes it as a land "quiet and secure" (Judg. xviii. 27). There is no thoroughfare through it, nor any inducement to make one. May there not be, retired in the recesses of these woody hills and extensive valleys many a village whose inhabitants have lived from age to age undisturbed by the invasions and populations with which Israelites, Assyrians, Romans and Moslems have successively visited the margins and accessible parts of the country?

23. From the present appearance of this district we may, with some allowances, perhaps gain an idea of what the more southern portions of the central highlands were during the earlier periods in the history. There is little real difference in the natural conditions of the two regions. Galilee is slightly nearer the spring of the cool breezes of the snow-covered Lebanon, and further distant from the hot siroccos of the eastern deserts, and the volcanic nature of a portion of its soil is more favourable to vegetation than the chalk of Judaea; but these circumstances, though they would tell to a certain degree, would not produce any very marked difference in the appearance of the country provided other conditions were alike. It therefore seems fair to infer that the hills of Sheshem, Bethel, and Hebron, when Abram first wandered over them, were at very inferior to those of the *Belad Bashan* or the *Belad el-Buttauf*. The timber was probably smaller, but the oak-groves<sup>†</sup> of Moriah, Mount Tabor,<sup>‡</sup> must have consisted of large trees; and the narrative implies that the "forests" or "woods" of Hareth, Ziph, and Bethel were not then mere scrub.

24. The causes of the present barrenness of the hills of the country are two, which indeed can hardly be separated. The first is the destruction of its timber in that long series of sieges and ravages which began with the invasion of Sennacherib (circa 970) and has not yet come to an end. Its by depriving the soil and the streams of shelter from the burning sun, at once made, as it probably does, the climate more arid and thus led, of doubtless diminished the rainfall. The second is the decay of the terraces necessary to retain the soil on the steep slopes of the round hills. This decay is owing to the general uncertainty and insecurity which have been the lot of this poor little country almost ever since the Babylonian conquest. The terraces once gone, there is nothing to prevent the soil which they support being washed away by the heavy rains of winter and it is hopeless to look for a renewal of the soil, or for any real improvement in the general face of the country, until they have been restored and established. This cannot happen to any extent until a just and firm government shall give confidence to the inhabitants.

25. Few things are a more constant source of surprise to the stranger in the Holy Land than the manner in which the hill tops are, throughout selected for habitation. A town in a valley is a rare exception. On the other hand there is a high eminence of the multitude always in sight from

\* The associations of Mt. Tabor, dim as they are, belong to the Old Testament; for there can be very little doubt that it was no more the scene of the Transfiguration than the Mount of Olives was. [See vol. ii. §26a.]

† In the Authorised Version rendered mountain "plain."

‡ Tabor (1 Sam. x. 3) has no connection with the rest of the same name.

crowned with a city or village,\* inhabited or in ruins, often so placed as if not accessibility but inaccessibility had been the object of its builders.† And indeed such was their object. These groups of naked forlorn structures, piled irregularly one over the other on the curve of the hill-top, their rectangular outline, flat roofs, and blank walls, suggestive to the Western mind rather of fastness than of peaceful habitation, surrounded by filthy heaps of the rubbish of centuries, approached only by the narrow winding path, worn white, on the grey or brown breast of the hill—are the lineal descendants, if indeed they do not sometimes contain the actual remains, of the “fenced cities, great and walled up to heaven,” which are so frequently mentioned in the records of the Israelite conquest. They bear witness now, no less surely than they did even in that early age, and as they have done through all the ravages and conquests of thirty centuries, to the insecurity of the country—to the continual risk of sudden plunder and destruction incurred by those rash enough to take up their dwelling in the plain. Another and hardly less valid reason for the practice is furnished in the terms of our Lord’s well known apologue,—namely, the treacherous nature of the loose alluvial “sand” of the plain under the sudden rush of the winter torrents from the neighbouring hills, as compared with the safety and firm foundation attainable by building on the naked “rock” of the hills themselves (Matt. vii. 24-27).

26. These hill-towns were not what gave the Israelites their main difficulty in the occupation of the country. Wherever strength of arm and fleetness of foot availed, there those hardy warriors, fierce as lions, sudden and swift as eagles, sure-footed and fleet as the wild deer on the hills (1 Chr. xii. 8; 2 Sam. i. 23, ii. 18), easily conquered. It was in the plains, where the horses and chariots of the Canaanites and Philistines had space to manoeuvre, that they failed in dislodging the aborigines. “Judah drove out the inhabitants of the mountain, but could not drive out the inhabitants of the valley, because they had chariots of iron . . . neither could Manasseh drive out the inhabitants of Bethshean . . . nor Megiddo,” in the plain of Esdraelon . . . “nor could Ephraim drive out the Canaanites that dwelt in Geshur,” on the maritime plain near Ramleh . . . “nor could Asher drive out the inhabitants of Achcho” . . . “and the Amorites forced the children of Dan into the mountain, for they would not suffer them to come down into the valley” (Judg. i. 19-35). Thus in this case the ordinary conditions of conquest were reversed—the conquerors took the hills, the conquered kept the plains. To a people so exclusive as the Jews there must have been a constant satisfaction in the elevation and inaccessibility of their highland regions. This is evident in every page of their literature, which is tinged throughout with a highland colouring. The “mountains” were to “bring peace,” the “little hills, justice to the people:” when plenty came, the corn was to flourish on the “top of the mountains” (Ps. lxxii. 3, 16). In like manner the mountains were to be joyful before Jehovah when He came to judge His people

(xcviii. 8). What gave its keenest sting to the Babylonian conquest, was the consideration that the “mountains of Israel,” the “ancient high places,” were become a “prey and a derision;” while, on the other hand, one of the most joyful circumstances of the restoration is, that the mountains “shall yield their fruit as before, and be settled after their old estates” (Ezek. xxxvi. 1, 8, 11). But it is needless to multiply instances of this, which pervades the writings of the psalmists and prophets in a truly remarkable manner, and must be familiar to every student of the Bible. (See the citations in *Sinai & Pal.* ch. ii. viii.) Nor was it unacknowledged by the surrounding heathen. We have their own testimony that in their estimation Jehovah was the “God of the mountains” (1 K. xx. 28), and they showed their appreciation of the fact by fighting (as already noticed), when possible, in the lowlands. The contrast is strongly brought out in the repeated expression of the psalmists. “Some,” like the Canaanites and Philistines of the lowlands, “put their trust in chariots and some in horses; but we”—we mountaineers, from our “sanctuary” on the heights of “Zion”—“will remember the name of Jehovah our God,” “the God of Jacob our father,” the shepherd-warrior, whose only weapons were sword and bow—the God who is now a high fortress for us—“at whose command both chariot and horse are fallen,” “who burneth the chariots in the fire” (Ps. xx. 1, 7, xlv. 7-11, lxxvi. 2, 6).

27. But the hills were occupied by other edifices besides the “fenced cities.” The tiny white domes which stand perched here and there on the summits of the eminences, and mark the holy ground in which some Mahometan saint is resting—sometimes standing alone, sometimes near the village, in either case surrounded with a rude inclosure, and overshadowed with the grateful shade and pleasant colour of terebinth or carob—these are the successors of the “high places” or sanctuaries so constantly denounced by the prophets, and which were set up “on every high hill and under every green tree” (Jer. ii. 20; Ez. vi. 13).

28. From the mountainous structure of the Holy Land and the extraordinary variations in the level of its different districts, arises a further peculiarity most interesting and most characteristic—namely, the extensive views of the country which can be obtained from various commanding points. The number of panoramas which present themselves to the traveller in Palestine is truly remarkable. To speak of the west of Jordan only, for east of it all is at present more or less unknown—the prospects from the height of *Beni naim*,<sup>7</sup> near Hebron, from the Mount of Olives, from Neby Samwil, from Bethel, from Gerizim or Ebal, from Jenin, Carmel, Tabor, Safed, the Castle of Banias, the *Kübbet en Nasr* above Damascus—are known to many travellers. Their peculiar charm resides in their wide extent, the number of spots historically remarkable which are visible at once, the limpid clearness of the air, which brings the most distant objects comparatively close, and the consideration that in many cases the feet must be standing on the same ground, and the

\* The same thing may be observed, though not with the same exclusive regularity, in Provence, a country which, in its natural and artificial features, presents many likenesses to Palestine.

† Two such may be named as types of the rest,—*Surpet Nit* (perhaps an ancient Gath or Gitta), perched

on one of the western spurs of the *Jebel Nablus*, and described high up beside the road from *Jaffa* to *Nablus*; and *Werr* or *Marr*, on the absolute top of the lofty peaked hill, at the foot of which the spring of *Jalad* wells forth.

<sup>7</sup> Robinson, *Bib. Res.* i. 490.

eyes resting on the same spots which have been stood upon and gazed at by the most famous patriarchs, prophets, and heroes, of all the successive ages in the eventful history of the country. "We can stand where Abram and Lot stood looking down from Bethel into the Jordan valley, when Lot chose to go to Sodom and the great destiny of the Hebrew people was fixed for ever; or with Abraham on the height near Hetron gazing over the gulf towards Sodom at the vast column of smoke as it towered aloft tinged with the rising sun, and wondering whether his kinsman had escaped; or with Gaal the son of Ebed on Gerizim when he watched the armed men steal along like the shadow of the mountains on the plain of the Mukhna; or with Deborah and Barak on Mount Tabor when they saw the hosts of the Canaanites marshalling to their doom on the undulations of Esdraelon; or with Elisha on Carmel looking across the same wide space towards Shunem, and recognizing the bereaved mother as she urged her course over the flat before him; or, in later times, with Mohammed on the heights above Damascus, when he put by an earthly for a heavenly paradise; or with Richard Cœur de Lion on Neby Samwil when he refused to look at the towers of the Holy City, in the deliverance of which he could take no part. These we can see; but the most famous and the most extensive of all we cannot see. The view of Balaam from Pisgah, and the view of Moses from the same spot, we cannot realize, because the locality of Pisgah is not yet accessible.

These views are a feature in which Palestine is perhaps approached by no other country, certainly by no country whose history is at all equal in importance to the world. Great as is their charm when viewed as mere landscapes, their deep and abiding interest lies in their intimate connexion with the history and the remarkable manner in which they corroborate its statements. By its constant reference to localities—mountain, rock, plain, river, tree—the Bible seems to invite examination; and, indeed, it is only by such examination that we can appreciate its minute accuracy and realize how far its plain matter of fact statements of actual occurrences, to actual persons, in actual places—how far these raise its records above the unreal and unconnected rhapsodies, and the vain repetitions, of the sacred books of other religions.\*

29. A few words must be said in general description of the maritime lowland, which it will be remembered intervenes between the sea and the highlands, and of which detailed accounts will be found under the heads of its great divisions.

This region, only slightly elevated above the level of the Mediterranean, extends without interruption from *el-Arish*, south of Gaza, to Mount Carmel. It naturally divides itself into two portions, each of about half its length:—the lower one the wider; the upper one the narrower. The lower half is the Plain of the Philistines—*Philistia*, or, as the Hebrews called it, the *Shefelah* or Lowland. [SEPHULA.] The upper half is the Sharon or Saron of the Old and New Testaments, the "Forest country" of Josephus and the LXX. (Josephus, *Ant.* xiv. 13, §3;

LXX. Is. lvi. 10). [SHARON.] Viewed from the sea this maritime region appears as a long line of white or cream-coloured sand, its slight undulations rising occasionally into mounds or cliffs, which in one or two places, such as *Jaffa* and *Caesarea*, almost aspire to the dignity of headlands. On these white undulations, in the farthest background stretches the faint blue level line of the heights of Judaea and Samaria.

30. Such is its appearance from without. From within, when traversed, or overlooked from some point on those blue hills, such as *Beit-el* or *Beit-netty*, the prospect is very different.

The Philistine Plain is on an average from sixteen miles in width from the coast to the beginning of the belt of hills, which form the gradual approach to the highland of the mountains of Judah. This district of inferior hills contains many places which have been identified with those in the lists of the conquest as being in the plain, and it was therefore probably attached originally to the plain, and not to the highland. It is termed by modern travellers as a beautiful open country, consisting of low calcareous hills rising from the level soil of broad arable valleys, covered with inhabited villages and deserted ruins, and dotted with much natural shrubbery and with large plantations of olives in a high state of cultivation; the soil gradually broadening down into the wide expanse of the plain itself. The Plain is in many parts a dead level, in others gently undulating in waves; here and there low mounds or hills are crowned with its village, and more rarely a hill overtopping the rest, like *Tell es-Sheikh el-Ajlun*, the seat of some fortress of Jewish or Crusading times. The larger towns, as *Gaza* and *Asdod*, which stand near the shore, are surrounded with huge groves of olive, acacia, and palm, in the days of King David (1 Chr. xiv. 16)—some of them among the most extensive in the country. The whole plain appears to consist of brown loamy soil, light, but rich, and almost without a stone. This is noted as its characteristic in a remarkable expression of one of the leaders of the Maccabean wars, a great part of which was fought in this locality (1 Macc. x. 73). It is the absence of stone that the disappearance of its towns and villages—so much more remarkable than in other parts of the country—is to be traced. The common material is brick, made after the Egyptian fashion, of the sandy loam of the plain mixed with stubble, and this has been taken away in almost all cases by the rains of recent centuries (Thomson, 563). It is now, as it was when the Philistines possessed it, one vast cornfield; an ocean of wheat covers the vast expanse between the hills and the sand dunes of the sea-shore, without interruption of any kind—no break or hedge, hardly even a single olive (Thomson, 552; Van de Velde, p. 175). Its fertility is marvellous; for the produce grows and it raises are produced, and probably have been produced almost year by year for the last centuries, without any of the appliances which were

\* Stanley, *S. & P.* 218, 2.

\* Nothing can be more instructive than to compare (in regard to this one only of the many points in which they differ) the Bible with the Koran. So little ascertainable connexion has the Koran with the life or career of Mohammed, that it seems impossible to arrange it with any verity in the order, real or ostensible, of its composition.

With the Bible, on the other hand, each book belongs to a certain period. It describes the persons of the time, the places under the names which they then bore, with many a note of identity by which they are still recognized; so that it may be said, without exaggeration, to be the best Handbook to Palestine.

\* Robinson, *B. & A.*, 11, 15, 20, 29, 37, 42.

for success—with no manure beyond that supplied by the washing down of the hill—without irrigation, without succession of crops with only the rudest method of husbandry. That the Jews struggled hard to get, and prize such a prize: no wonder that of Egypt and Assyria were content to trade re-traverse a region where their supplies were so abundant and so easily obtained. Southern part of the Philistine Plain, in the rhod of *Beit Jibrin*, appears to have been as late as the sixth century, with a forest, the Forest of Gerar; but of this no traces are now to exist (Procopius of Gaza, *Scholion* on iv.).

The Plain of Sharon is much narrower than

It is about ten miles wide from the sea to the mountains, which are here of a more character than those of Philistia, and with intermediate hilly region there occurring, the time it is more undulating and irregular former, and crossed by streams from the hills, some of them of considerable size, and giving water during the whole year. Owing to the general level of the surface and to the accumulation of sand on the shore, several of these spread out into wide marshes, which might with difficulty be turned to purposes of irrigation in their present neglected state form large areas. The soil is extremely rich, varying from red to deep black, and producing enormous crops of weeds or grain, as the case may be. There, on the margins of the streams or rivers of the marshes, are large tracts of rank where many a herd of camels or cattle seen feeding, as the royal herds did in the David (1 Chr. xxvii. 25.). At its northern end is narrowed by the low hills which gather the western flanks of Carmel, and gradually upon it until it terminates entirely against the base of the mountain itself, leaving only a narrow strip at the foot of the promontory by which unite with the plain on the north.

The tract of white sand already mentioned as the shore line of the whole coast, is gradually encroaching on this magnificent region. In the north it has buried Askelon, and in the north Caesarea and Jaffa the dunes are said to be as three miles wide and 300 feet high. Destruction which is thus caused to the outer streams has been already noticed. All the edge of Sharon there are pools and marshes.

In some places the sand is covered by a growth of maritime pines, the descendants of the trees which at the Christian era gave its name to the Plain, and which seem to have been as late as the second crusade (Vinisauf, *of Crus.*). It is probable, for the reasons stated, that the Jews never permanently more than a small portion of this rich and fertile region. Its principal towns were, it is true, to the different tribes (Josh. xv. 45-47; Iezzer; xvii. 11, Dor, &c.); but this was in the time of the intended conquest (xiii. 3-6). The cities of the Philistines remained in their

possession (1 Sam. vi., xxi. 10, xxvii.); and the district was regarded as one independent of and apart from Israel (xxvii. 2; 1 K. ii. 39; 2 K. vii. 2, 3). In like manner Dor remained in the hands of the Canaanites (Judg. i. 27), and Gazer in the hands of the Philistines till taken from them in Solomon's time by his father-in-law (1 K. ix. 16). We find that towards the end of the monarchy the tribe of Benjamin was in possession of Lydd, Jmsu, Ono, and other places in the plain (Neh. xi. 34; 2 Chr. xxviii. 18); but it was only by a gradual process of extension from their native hills, in the rough ground of which they were safe from the attack of cavalry and chariots. But, though the Jews never had any hold on the region, it had its own population, and towns probably not inferior to any in Syria. Both Gaza and Askelon had regular ports (*majumas*); and there is evidence to show that they were very important and very large long before the fall of the Jewish monarchy (Kenrick, *Phoenicia*, 27-29). Ashdod, though on the open plain, resisted for 29 years the attack of the whole Egyptian force: a similar attack to that which reduced Jerusalem without a blow (2 Chr. xii.), and was sufficient on another occasion to destroy it after a siege of a year and a half, even when fortified by the works of a score of successive monarchs (2 K. xxv. 1-3).

33. In the Roman times this region was considered the pride of the country (*B. J.* i. 29, §9), and some of the most important cities of the province stood in it—Caesarea, Antipatris, Diospolis. The one ancient port of the Jews, the "beautiful" city of Joppa, occupied a position central between the Shefelah and Sharon. Roads led from these various cities to each other, to Jerusalem, Neapolis, and Sebaste in the interior, and to Ptolemais and Gaza on the north and south. The commerce of Damascus, and, beyond Damascus, of Persia and India, passed this way to Egypt, Rome, and the infant colonies of the west; and that traffic and the constant movement of troops backwards and forwards must have made this plain one of the busiest and most populous regions of Syria at the time of Christ. Now, Caesarea is a wave-washed ruin; Antipatris has vanished both in name and substance; Diospolis has shaken off the appellation which it bore in the days of its prosperity, and is a mere village, remarkable only for the ruin of its fine mediæval church, and for the palm-grove which shrouds it from view. Joppa alone maintains a dull life, surviving solely because it is the nearest point at which the sea-going travellers from the West can approach Jerusalem. For a few miles above Jaffa cultivation is still carried on, but the fear of the Bedouins who roam (as they always have roamed) over parts of the plain, plundering all passers-by, and extorting black mail from the wretched peasants, has desolated a large district, and effectually prevents it being used any longer as the route for travellers from south to north; while in the portions which are free from this scourge, the teeming soil itself is doomed to unproductiveness through the folly and iniquity of its Turkish rulers, whose exactions have driven, and are driving, its industrious and patient inhabitants to remoter parts of the land.\*

*unier de la Syrie* (Duc de Raguse, *Voyage*).  
Bedouins from beyond Jordan, whom Gideon destroyed the earth "as far as Gaza;" i. e. they ploughed of Ezerlon, and overflowed into Sharon, and northwards to the richest prize of the day.  
district, called the *Sahel Adnâ*, between the sea and

and the western flanks of Carmel, has been within a very few years reduced from being one of the most thriving and productive regions of the country, as well as one of the most profitable to the government, to desolation and desertion, by these wicked exactions. The taxes are paid in kind; and the officers who gather them demand so much

distance. Here and there they are broken by the vast mysterious rents, through which the Hieromax, the *Wady Zurka*, and other streams force their way down to the Jordan. The western mountains are more irregular in height, their slopes less vertical, and their general line is interrupted by projecting outposts such as *Tell Fasail*, and *Kurn Surtabeh*. North of Jericho they recede in a kind of wide amphitheatre, and the valley becomes twelve miles broad, a breadth which it thenceforward retains to the southern extremity of the Dead Sea. What the real bottom of this cavity may be, or at what depth below the surface, is not yet known, but that which meets the eye is a level or gently undulating surface of light sandy soil, about Jericho brilliant white, about Beisan dark and reddish, crossed at intervals by the torrents of the Western highlands which have ploughed their zigzag course deep down into its soft substance, and even in autumn betray the presence of moisture by the bright green of the thorn-bushes which flourish in and around their channels, and cluster in greater profusion round the springheads at the foot of the mountains. Formerly palms abounded on both sides<sup>1</sup> of the Jordan at its lower end, but none now exist there. Passing through this vegetation, such as it is, the traveller emerges on a plain of bare sand furrowed out in innumerable channels by the rain-streams, all running eastward towards the river, which lies there in the distance, though invisible. Gradually these channels increase in number and depth till they form steep cones or mounds of sand of brilliant white, 50 to 100 feet high, their lower part loose, but their upper portion indurated by the action of the rains and the tremendous heat of the sun.<sup>2</sup> Here and there these cones are marshalled in a tolerably regular line, like gigantic tents, and form the bank of a terrace overlooking a flat considerably lower in level than that already traversed. After crossing this lower flat for some distance, another descent, of a few feet only, is made into a thick growth of dwarf shrubs: and when this has been pursued until the traveller has well nigh lost all patience, he suddenly arrives on the edge of a "hole" filled with thick trees and shrubs, whose tops rise to a level with his feet. Through the thicket comes the welcome sound of rushing waters. This is the Jordan.<sup>3</sup>

38. Barred as it is thus between such lofty ranges, and shielded from every breeze, the climate

gradually in height as they receded eastward. Is this the case with this locality only? or would the whole region east of the Jordan prove equally broken, if viewed sufficiently near? Prof. Stanley hints that such may be the case (*S. & P.* 330). Certainly the hills of Judah and Samaria appear as much a "wall" as those east of Jordan, when viewed from the sea-coast.

<sup>1</sup> Jericho was the city of palm-trees (2 Chr. xxviii. 18); and Josephus mentions the palms of Abila, on the eastern side of the river, as the scene of Moses' last address. "The whole shore of the Dead Sea," says Mr. Poole, "is strewed with palms" (*Geogr. Society's Journal*, 1856). Dr. Anderson (1892) describes a large grove as standing on the lower margin of the sea between Wady Mujeb (Arnon) and Zurka Main (Callirhoe).

<sup>2</sup> The writer is here speaking from his own observation of the lower part. A similar description is given by Lynch of the upper part (*Official Report*, April 13; *Vaa de Veide, Revue*, 128).

<sup>3</sup> The Hese which have given many a young mind its first and most lasting impression of the Jordan and its

of the Jordan valley is extremely hot and relaxing. Its enervating influence is shown by the inhabitants of Jericho, who are a small feeble exhausted race, dependent for the cultivation of their lands on the hardier peasants of the highland villages (*Rob. i.* 550), and to this day prone to the vices which are often developed by tropical climates, and which brought destruction on Sodom and Gomorrah. But the circumstances which are unfavourable to morals are most favourable to fertility. Whether there was any great amount of cultivation and habitation in this region in the times of the Israelites the Bible does not say; but in post-biblical times there is no doubt on the point. The palms of Jericho, and of Abila (opposite Jericho on the other side of the river), and the extensive balsam and rose gardens of the former place, are spoken of by Josephus, who calls the whole district a "divine spot" (*Θείον χωρίον*, *B. J.* iv. 8, §3; see vol. i. 976).<sup>4</sup> Bethshan was a proverb among the Rabbis for its fertility. Succoth was the site of Jacob's first settlement west of the Jordan; and therefore was probably then, as it still is, an eligible spot. In later times indigo and sugar appear to have been grown near Jericho and elsewhere;<sup>5</sup> aqueducts are still partially standing, of Christian or Saracenic arches; and there are remains, all over the plain between Jericho and the river, of former residences or towns and of systems of irrigation (*Ritter, Jordan*, 503, 512). Phasaelis, a few miles further north, was built by Herod the Great; and there were other towns either in or closely bordering on the plain. At present this part is almost entirely desert, and cultivation is confined to the upper portion, between *Sahel* and *Beisan*. There indeed it is conducted on a grand scale; and the traveller as he journeys along the road which leads over the foot of the western mountains, overlooks an immense extent of the richest land, abundantly watered, and covered with corn and other grain.<sup>6</sup> Here, too, as at Jericho, the cultivation is conducted principally by the inhabitants of the villages on the western mountains.

39. All the irrigation necessary for the towns, or for the cultivation which formerly existed, or still exists, in the *Ghôr*, is obtained from the torrents and springs of the western mountains. For all purposes to which a river is ordinarily applied, the Jordan is useless. So rapid that its course is one continued cataract; so crooked, that in the whole of its lower and main course, it has hardly half a mile straight; so broken with rapids and other impediments, that

surrounding scenery, are not more accurate than many other versions of Scripture scenes and facts:—

"Sweet fields beyond the swelling flood  
Stand dressed in living green;  
So to the Jews' old Canaan stood,  
While Jordan rolled between."

<sup>1</sup> Besides Gilgal, the tribe of Benjamin had four cities or settlements in the neighbourhood of Jericho (*Josh. xviii. 21*). The rebuilding of the last-named town in Ahab's reign probably indicates an increase in the prosperity of the district.

<sup>2</sup> This seems to have been the *περίχωρος*, or "region round about" Jordan, mentioned in the Gospels, and possibly answering to the *Ciccar* of the ancient Hebrews. (See Stanley, *S. & P.* 284, 488.)

<sup>3</sup> The word *sukkar* (sugar) is found in the names of places near Tiberias below Sebbeh (Masada), and near Gaza, as well as at Jericho. All these are in the depressed regions for the indigo, see Poole (*Geogr. Journal*, xxi. 87).

<sup>4</sup> Robinson, *iii.* 214; and from the writer's own observation.

during the continuance of the rain, and quickly drying up after the commencement of summer: "What time they wax warm they vanish; when it is hot they are consumed out of their place . . . they go to nothing and perish" (Job vi. 15). For fully half the year, these "rivers" or "brooks," as our version of the Bible renders the special term (*nachal*, which designates them in the original, are often mere dry lanes of hot white or grey stones; or if their water still continues to run, it is a tiny rill, working its way through heaps of parched boulders in the centre of a broad flat tract of loose stones, often only traceable by the thin line of verdure which springs up along its course. Those who have travelled in Provence or Granada in the summer will have no difficulty in recognising this description, and in comprehending how the use of such terms as "river" or "brook" must mislead those who can only read the exact and vivid narrative of the Bible through the medium of the Authorized Version.

This subject will be more fully described, and a list of the few perennial streams of the Holy Land given under RIVER.

41. How far the Valley of the Jordan was employed by the ancient inhabitants of the Holy Land as a medium of communication between the northern and southern parts of the country we can only conjecture. Though not the shortest route between Galilee and Judaea, it would yet, as far as the levels and form of the ground are concerned, be the most practicable for large bodies; though these advantages would be seriously counterbalanced by the sultry heat of its climate, as compared with the fresher air of the more difficult road over the highlands.

The ancient notices of this route are very scanty.

(1.) From 2 Chr. xxviii. 15, we find that the captives taken from Judah by the army of the northern kingdom were sent back from Samaria to Jerusalem by way of Jericho. The route pursued was probably by *Nablus* across the *Mukhna*, and by *Wady Ferruh* or *Fisail* into the Jordan valley. Why this road was taken is a mystery, since it is not stated or implied that the captives were sent

valley has been traversed by Dr. Anderson, who accompanied him as geologist, but appears to have been one of the other travellers.

42. Monotonous and uninviting as the Holy Land will appear from the English readers, accustomed to the succession of flowers, lasting the year, the ample streams and of our own country—we must aspect to the Israelites after of forty years through the desert, the side of the brightest revelation that they could conjure up, is different. After the "great drought" with its "fiery serpent" and "rocks of fire," the sultry march all day in the dust, the procession—the eager looking at which the encampment was crowded, the fighting, the close appointment round the medicinal plant, the desired spot was reached so long "loathed"—the food when the quails descended, the sea permitted the "fish" to be daily struggle for a painful existence must have been the rest afforded by the Promise!—how delicious the air if it were, of the hills and ravines, and green plains, even the men the vineyards and olive-yards as abundance," the cattle, sheep, and the country with their long bi swarming round their penitent wood! Moreover they entered time of the Passover, when it full glory and freshness of it before the scorching sun of sun to wither its flowers and emit Taking all these circumstances, allowing for the bold metaphors,

## PALESTINE

43. Again, the variations of the seasons may appear to us slight, and the atmosphere dry and hot; but after the monotonous climate of Egypt, where rain is a rare phenomenon, and where the difference between summer and winter is hardly perceptible, the "rain of heaven" must have been a most gratifying novelty in its two seasons, the former and the latter—the occasional snow and ice of the winters of Palestine, and the burst of returning spring, must have had double the effect which they would produce on those accustomed to such changes. Nor is the change only a relative one; there is a real difference—due partly to the higher latitude of Palestine, partly to its proximity to the sea—between the sultry atmosphere of the Egyptian valley and the invigorating sea-breezes which blow over the hills of Ephraim and Judah.

44. The contrast with Egypt would tell also in another way. In place of the huge everflowing river whose only variation was from low to high, and from high to low again, and which lay at the lowest level of that level country, so that all irrigation had to be done by artificial labour—"a land where thou sowest thy seed and wateredst it with thy foot like a garden of herbs"—in place of this, they were to find themselves in a land of constant and considerable undulation, where the water, either of gushing spring, or deep well, or flowing stream, could be procured at the most varied elevations, requiring only to be judiciously husbanded and skilfully conducted to find its own way through field or garden, whether terraced on the hill-sides or extended in the broad bottoms.<sup>7</sup> But such change was not compulsory. Those who preferred the climate and the mode of cultivation of Egypt could resort to the lowland plains or the Jordan valley, where the temperature is more constant and many degrees higher than on the more elevated districts of the country, where the breezes never penetrate, where the light fertile soil recalls, as it did in the earliest times, that of Egypt, and where the Jordan in its lowness of level presents at least one point of resemblance to the Nile.

45. In truth, on closer consideration, it will be seen that, beneath the apparent monotony, there is a variety in the Holy Land really remarkable. There is the variety due to the difference of level between the different parts of the country. There is the variety of climate and of natural appearances, proceeding, partly from those very differences of level, and partly from the proximity of the snow-capped Hermon and Lebanon on the north and of the arid desert on the south; and which approximate the climate, in many respects, to that of regions much further north. There is also the variety which is inevitably produced by the presence of

<sup>7</sup> The view taken above, that the beauty of the Promised Land was greatly enhanced to the Israelites by contrast with the scenes they had previously passed through, is corroborated by the fact that such laudatory expressions as "the land flowing with milk and honey," "the glory of all lands," &c., occur, with rare exceptions, in those parts of the Bible only which purport to have been composed just before their entrance, and that in the course of their employment by the Prophets (Jer. xl. 6, vii. 22; Ez. xx. 6, 15) there is always an allusion to Egypt—"the iron furnace," the passing of the Red Sea, the wilderness, to point the contrast.

<sup>8</sup> Gen. xiii. 10. All Ezy (ii. 29) says that the maritime plain, from Khan Younes to Jaffa, is "of rich soil, similar to the climate of the Nile." Other points of resemblance are mentioned by Robinson (*R. E. ii.* 22, 24, 26, 28) and Eschscholtz (*Urdon and Ruck*, ch. 36). The plain

## PALESTINE

677

the sea—"the eternal freshness and loveliness of ocean."

46. Each of these is continually reflected in the Hebrew literature. The contrast between the highlands and lowlands is more than implied in the habitual forms of expression, "going up," to Judah, Jerusalem, Hebron; "going down" to Jericho, Capernaum, Lydda, Caesarea, Gaza, and Egypt. More than this, the difference is marked unmistakably in the topographical terms which so abound in, and are so peculiar to, this literature—"The mountain of Judah," "the mountain of Israel," "the mountain of Naphtali," are the names by which the three great divisions of the highlands are designated. The predominant names for the towns of the same district—Gibeon, Gela, Gaba, Gibeon (meaning "hill"); Ramah, Ramathaim (the "brow" of an eminence); Mizpeh, Zophim, Zephathah (all modifications of a root signifying a wide prospect)—all reflect the elevation of the region in which they were situated. On the other hand, the great lowland districts have each their peculiar name. The southern part of the maritime plain is "the Shefelah;" the northern, "Sharon;" the Valley of the Jordan, "ha-Arallah;" names which are never interchanged, and never confounded with the terms (such as *enck*, *nachal*, *gai*) employed for the ravines, torrent-beds, and small valleys of the highlands.<sup>8</sup>

47. The differences in climate are no less often mentioned. The Psalmists, Prophets, and historians. Books, are full of allusions to the fierce heat of the midday sun and the dryness of summer; no less than to the various accompaniments of winter—the rain, snow, frost, ice, and fogs, which are experienced at Jerusalem and other places in the upper country quite sufficiently to make every one familiar with them. Even the sharp alternations between the heat of the days and the coldness of the nights, which strike every traveller in Palestine, are mentioned.<sup>9</sup> The Israelites practised no commerce by sea; and, with the single exception of Joppa, not only possessed no harbour along the whole length of their coast, but had no word by which to denote one. But that their poets knew and appreciated the phenomena of the sea is plain from such expressions as are constantly recurring in their works—"the great and wide sea," its "ships," its "monsters," its roaring and dashing "waves," its "depths," its "sand," its mariners, the perils of its navigation.

It is unnecessary here to show how materially the Bible has gained in its hold on Western nations by these vivid reflections of a country so much more like those of the West than are most oriental regions; but of the fact there can be no doubt, and it has been admirably brought out by Professor Stanley in *Sinai and Palestine*, chap. ii. sect. vii.

of Gennesareth still "recalls the Valley of the Nile" (Stanley, *S. & P.* 374). The papyrus is said to grow there (Buchanan, *Cler. Parvulus*, 392).

<sup>8</sup> The same expressions are still used by the Arabs of the Nijl with reference to Syria and their own country (Wallin, *Geogr. Soc. Journal*, xiv. 174).

<sup>9</sup> It is impossible to trace these correspondences and distinctions in the English Bible, our translators not having always rendered the same Hebrew by the same English word. But the corrections will be found in the Appendix to Professor Stanley's *Sinai and Palestine*.

<sup>10</sup> Ps. xix. 6, xxiii. 4; Is. lv. 6, xxv. 8; Gen. xviii. 1; 1 Sam. xl. 9; Neh. vii. 3.

<sup>11</sup> Jer. xxxvi. 30. Gen. xxxi. 40 refers—unless the recent speculations of Mr. Deke should prove true—to Mesopotamia.

48 In the preceding description allusion has been made to many of the characteristic features of the Holy Land. But it is impossible to close this account without mentioning a defect which is even more characteristic—its lack of monuments and personal relics of the nation who possessed it for so many centuries, and gave it its claim to our veneration and affection. When compared with other nations of equal antiquity—Egypt, Greece, Assyria—the contrast is truly remarkable. In Egypt and Greece, and also in Assyria, as far as our knowledge at present extends, we find a series of buildings, reaching down from the most remote and mysterious antiquity, a chain, of which hardly a link is wanting, and which records the progress of the people in civilisation, art, and religion, as certainly as the buildings of the mediæval architects do that of the various nations of modern Europe. We possess also a multitude of objects of use and ornament, belonging to those nations, truly astonishing in number, and pertaining to every station, office, and act in their official, religious, and domestic life. But in Palestine it is not too much to say that there does not exist a single edifice, or part of an edifice, of which we can be sure that it is of a date anterior to the Christian era. Excavated tombs, cisterns, flights of stairs, which are encountered everywhere, are of course out of the question. They may be—some of them, such as the tombs of Hinnom and Shiloh, probably are—of very great age, older than anything else in the country. But there is no evidence either way, and as far as the history of art is concerned nothing would be gained if their age were ascertained. The only ancient buildings of which we can speak with certainty are those which were erected by the Greeks or Romans during their occupation of the country. Not that these buildings have not a certain individuality which separates them from any mere Greek or Roman building in Greece or Rome. But the fact is certain, that not one of them was built while the Israelites were masters of the country, and before the date at which Western nations began to get a footing in Palestine. And as with the buildings so with other memorials. With one exception, the museums of Europe do not possess a single piece of pottery or metal work, a single weapon or household utensil, an ornament or a piece of armour, of Israelite make, which can give us the least conception of the manners or outward appliances of the nation before the date of the destruction of Jerusalem by Titus. The coins form the single exception. A few rare specimens still exist, the oldest of them attributed—though even that is matter of dispute—to the Macabees, and their rudeness and insignificance furnish a stronger evidence than even their absence could imply, of the total want of art among the Israelites.

It may be said that Palestine is now only in the same condition with Assyria before the recent researches brought so much to light. But the two cases are not parallel. The soil of Babylon is a loose loam or sand, of the description best fitted for covering up and preserving the relics of former ages. On the other hand, the greater part of the Holy Land is hard and rocky, and the soil lies in the valleys and lowlands, where the cities were only very rarely built. If any store of Jewish relics were remaining embedded or hidden in suitable ground—as for example, in the loose mass of debris which coats the slopes around Jerusalem—we should expect occasionally to find articles which might be recognised as Jewish. This was the case in Assyria.

Long before the mounds were explored, Rich brought home many fragments of inscriptions, bricks, engraved stones, which were picked up on the surface, and were evidently the productions of some race whose art was not then known. But in Palestine no only objects hitherto discovered have all belonged to the West—coins or arms of the Greeks or Romans.

The buildings already mentioned as being Jewish in character, though carried out with foreign details are the following:—

The tombs of the Kings and of the Judges; the buildings known as the tombs of Abraham, Isaac, St. James, and Jehoshaphat; the tombs at Siloam;—all in the neighbourhood of Jerusalem; the ruined synagogues at Meston and Hebron. But there are two edifices which seem to bear a character of their own, and do not so clearly betray the style of the West. These are, the entrance round the sacred cave at Hebron; and portions of the western, southern, and eastern walls of the Haram at Jerusalem, with the vaulted passage below the Akra. Of the former it is impossible to speak in the present state of our knowledge. The latter will be more fully noticed under the head of TEMPLE; it is sufficient here to name one or two considerations which seem to bear against their being of older date than Herod. (1.) Herod is expressly said by Josephus to have removed the old foundations, and laid others in their stead, enclosing also the original area. *Ant.* xv. 11. §3; *H. J.* i. 11. §1. (2.) The part of the wall which all acknowledge to be the oldest contains the springing of an arch, the arch and the vaulted passage can hardly be assigned to builders earlier than the time of the Romans. (3.) The masonry of these magnificent stones, usually called the "bevel", on which so much stress has been laid, is not exclusively Jewish or even Jewish. It is found at Persepolis; it is also found at Nine and throughout Asia Minor, and at Athens; and stones of such enormous size as those at Jerusalem, but similar in their workmanship.

M. Renan, in his recent report of his journey in Phœnicia, has named two circumstances which must have had a great effect in suppressing Jewish architecture amongst the ancient Israelites, viz. their very existence proves that the people had no genius in that direction. These are (1) the prohibition of sculptured representations of living creatures, and (2) the command not to build a temple anywhere but at Jerusalem. The heaving up of building-stones was even forbidden. "But," he asks, "would Greece have been, if it had been illegal to build any temples but at Delphi or Athens? In ten centuries the Jews had only three temples to build, and of these certainly two were erected under the guidance of foreigners. The oldest of synagogues dates from the time of the Macabees, and the Jews then naturally employed the best style of architecture, which at that time reigned universally."

In fact the Israelites never lost the feeling of the traditions of their early pastoral nomadic life. Long after the nation had been settled in the land, the cry of those earlier days, "To your tents, O Israel!" was heard in periods of national distress. The prophets, sick of the luxury of the cities, were constantly recalling the "tents" of their fathers.

\* 2 Sam. xx. 1; 1 K. xiv. 16 (that the word *at* is a mere formula of the historian is proved by their use in 2 Chr. x. 16); 2 K. xiv. 12.

† Jer. xxx. 9; Zech. xiii. 7; Ps. lxxviii. 16-18.

less artificial life; and the Temple of Solomon, nay even perhaps of Zerubbabel, was spoken of to the last as the "tent of the Lord of hosts," the "place where David had pitched his tent." It is a remarkable fact, that eminent as Jews have been in other departments of art, science, and affairs, no Jewish architect, painter, or sculptor has ever achieved any signal success.

THE GEOLOGY.—Of the geological structure of Palestine it has been said with truth that our information is but imperfect and indistinct, and that much time must elapse, and many a cherished hypothesis be sacrificed, before a satisfactory explanation can be arrived at of its more remarkable phenomena.

It is not intended to attempt here more than a very cursory sketch, addressed to the general and non-scientific reader. The geologist must be referred to the original works from which these remarks have been compiled.

1. The main sources of our knowledge are (1) the observations contained in the Travels of Russegger, an Austrian geologist and mining engineer who visited this amongst other countries of the East in 1836-8 (*Reisen in Griechenland, &c.*, 4 vols., Stuttgart, 1841-49, with *Atlas*); (2) the Report of H. J. Anderson, M.D., an American geologist, formerly Professor in Columbia Coll., New York, who accompanied Captain Lynch in his exploration of the Jordan and the Dead Sea (*Geol. Reconnaissance, in Lynch's Official Report*, 4to., 1852, pp. 75-207); and (3) the Diary of Mr. H. Poole, who visited Palestine on a mission for the British government in 1836 (*Journal of Geogr. Society*, vol. xxvi. pp. 55-70). Neither of these contains anything approaching a complete investigation, either as to extent or to detail of observations. Russegger travelled from Sinai to Hebron and Jerusalem. He explored carefully the route between the latter place and the Dead Sea. He then proceeded to Jaffa by the ordinary road; and from thence to Beyrût and the Lebanon by Nazareth, Tiberias, Cana, Akka, Tyre, and Sidon. Thus he left the Dead Sea in its most interesting portions, the Jordan Valley, the central highlands, and the important district of the Upper Jordan, untouched. His work is accompanied by two sections: from the Mount of Olives to the Jordan, and from Tabor to the Lake of Tiberias. His observations, though clearly and attractively given, and evidently those of a practised observer, are too short and cursory for the subject. The general notice of his journey is in vol. iii. 76-157; the scientific observations, tables, &c., are contained between 161 and 291. Dr. Anderson visited the south-western portion of the Lebanon between Beyrût and Banias, Galilee, the Lake of Tiberias, the Jordan; made the circuit of the Dead Sea; and explored the district between that Lake and Jerusalem. His account is evidently drawn up with great pains, and is far more elaborate than that of Russegger. He gives full analyses of the different rocks which he examined, and very good lithographs of fossils; but unfortunately his work is deformed by a very unreadable style. Mr. Poole's journey was confined to the western and south-eastern portions of the Dead Sea, the Jordan, the country between the latter and Jerusalem, and the

beaten track of the central highlands from Hebron to Nablus.

2. From the reports of these observers it appears that the Holy Land is a much-disturbed mountainous tract of limestone of the secondary period (jurassic and cretaceous); the southern offshoot of the chain of Lebanon; elevated considerably above the sea level; with partial interruptions from tertiary and basaltic deposits. It is part of a vast mass of limestone, stretching in every direction except west, far beyond the limits of the Holy Land. The whole of Syria is cleft from north to south by a straight crevasse of moderate width, but extending in the southern portion of its centre division to a truly remarkable depth (<sup>a</sup> 2625 ft.) below the sea level. This crevasse, which contains the principal watercourse of the country, is also the most exceptional feature of its geology. Such fissures are not uncommon in limestone formations; but no other is known of such a length and of so extraordinary a depth, and so open throughout its greatest extent. It may have been volcanic in its origin; the result of an upheaval from beneath, which has tilted the limestone back on each side, leaving this huge split in the strata; the volcanic force having stopped short at that point in the operation, without intruding any volcanic rocks into the fissure. This idea is supported by the crater-like form of the basins of the Lake of Tiberias and of the Dead Sea (Rus. 206, 7), and by many other tokens of volcanic action, past and present, which are encountered in and around those Lakes, and along the whole extent of the Valley. Or it may have been excavated by the gradual action of the ocean during the immense periods of geological operation. The latter appears to be the opinion of Dr. Anderson (79, 140, 205); but further examination is necessary before a positive opinion can be pronounced. The ranges of the hills of the surface take the direction nearly due north and south, though frequently thrown from their main bearing and much broken up into detached masses. The lesser watercourses run chiefly east and west of the central highlands.

3. The Limestone consists of two strata, or rather groups of strata. The upper one, which usually meets the eye, over the whole country from Hebron to Hermon, is a tolerably solid stone, varying in colour from white to reddish brown, with very few fossils, inclining to crystalline structure, and abounding in caverns. Its general surface has been formed into gently rounded hills, crowded more or less thickly together, separated by narrow valleys of denudation occasionally spreading into small plains. The strata are not well defined, and although sometimes level<sup>m</sup> (in which case they lend themselves to the formation of terraces), are more often violently disarranged.<sup>n</sup> Remarkable instances of such contortions are to be found on the road from Jerusalem to Jericho, where the beds are seen pressed and twisted into every variety of form.

It is hardly necessary to say that these contortions, as well as the general form of the surface, are due to forces not now in action, but are part of the general configuration of the country, as it was left after the last of that succession of immersions below, and upheavals from, the ocean, by which.

<sup>a</sup> Ps. lxxxiv. 1, xliii. 3, lxxvi. 2; Judith ix. 8.

<sup>m</sup> Is. xlix. 1, xvi. 5.

<sup>n</sup> See the well-known passage in *Comingsby*, bk. iv. ch. 15.

<sup>b</sup> The surface of the Dead Sea is 1317 ft. below the Mediterranean, and to depth 1308 ft.

<sup>m</sup> As at the twin hills of el-Jib, the ancient Gibeon, bek = Naby Samiri.

<sup>n</sup> As on the road between the upper and lower *Heil-un* about five miles from el-Jib.

its present form was given it, long prior to the historic period. There is no ground for believing that the broad geological features of this or any part of the country are appreciably altered from what they were at the earliest times of the Bible history. The evidences of later action are, however, often visible, as for instance where the atmosphere and the rains have furrowed the face of the limestone cliffs with long and deep vertical channels, often causing the most fantastic forms (And. 89, 111; Poole, 56).

4. This limestone is often found crowned with chalk, rich in flints, the remains of a deposit which probably once covered a great portion of the country, but has only partially survived subsequent immersions. In many districts the coarse flint or chert which originally belonged to the chalk is found in great profusion. It is called in the country *chalcodony* (Poole, 57).

On the heights which border the western side of the Dead Sea, this chalk is found in greater abundance and more undisturbed, and contains numerous springs of salt and sulphurous water.

5. Near Jerusalem the mass of the ordinary limestone is often mingled with large bodies of dolomite (magnesian limestone), a hardish semi-crystalline rock, reddish white or brown, with glistening surface and pearly lustre, often containing pores and small cellular cavities lined with oxide of iron or minute crystals of bitter spar. It is not stratified; but it is a question whether it has not been produced among the ordinary limestone by some subsequent chemical agency. Most of the caverns near Jerusalem occur in this rock, though in other parts of the country they are found in the more friable chalky limestone.\* So much for the upper stratum.

6. The lower stratum is in two divisions or series of beds—the upper, dusky in colour, contorted and cavernous like that just described, but more ferruginous—the lower one dark grey, compact and solid, and characterised by abundant fossils of *cidaris*, an extinct echinus, the spines of which are the well-known "olives" of the convents. This last-named rock appears to form the substratum of the whole country, east as well as west of the Jordan.

The ravine by which the traveller descends from the summit of the Mount of Olives (2700 feet above the Mediterranean) to Jericho (900 below it) cuts through the strata already mentioned, and affords an unrivalled opportunity for examining them. The lower formation differs entirely in character from the upper. Instead of smooth, commonplace, swelling, outlines, everything here is rugged, pointed, and abrupt. Huge fissures, the work of the earthquakes of ages, cleave the rock in all directions—they are to be found as much as 1000 feet deep by not more than 30 or 40 feet wide, and with almost vertical sides. One of them, near the ruined khan at which travellers usually halt, presents a most interesting and characteristic section of the strata (Russeger, 247-251, &c.).

7. After the limestone had received the general form which its surface still retains, but at a time far anterior to any historic period, it was pierced and broken by large eruptions of lava pushed up from beneath, which has broken up and overflowed the stratified beds, and now appears in the form of basalt or trap.

8. On the west of Jordan these volcanic rocks have been hitherto found only north of the mountains of Samaria. They are first encountered on the south-western side of the Plain of Esdraelon (Russ. 258); then they are last sight of till the opposite side of the plain is reached, being probably hidden below the deep rich soil, except a few patches here and there on the surface. Beyond this they abound over a district which may be said to be contained between Delâta on the north, Tiberias on the east, Tabor on the south, and Turan on the west. There seem to have been two centres of eruption: one, and that the most ancient (And. 129, 134), at or about the *Kurn Hattin* (the traditional Mount of Beatitudes), whence the stream flows over the declivities of the limestone towards the lake (Russ. 259, 260). This mass of basalt forms the cliffs at the back of Tiberias, and to its disintegration is due the black soil, so extremely productive, of the *Ar el Hammâ* and the Plain of Gennesareth, which is, the one on the south, the other on the north, of the ridge of *Hattin*. The other—the more recent—was more to the north, in the neighbourhood of Sâid, where three of the ancient craters still exist, converted into the reservoirs or lakes of *el Jâh*, *Tamâ*, and *Delâta* (And. 128, 9; Calman, in *Kitt's Phys. Geog.* 119).

The basalt of Tiberias is fully described by Dr. Anderson. It is dark iron-grey in tint, coarse, but firm in texture, amygdaloidal, the cells filled with carbonate of lime, olivine and augite, with a specific gravity of 2.6 to 2.9. It is often columnar in its more developed portions, as, for instance, in the cliffs behind the town. Here the junctions of the two formations may be seen; the base of the cliffs being limestone, while the crown and top are massive basalt (124, 135, 136).

The lava of Delâta and the northern craters differ considerably from that of Tiberias, and is pronounced by Dr. Anderson to be of later date. It is found of various colours, from black-silver to reddish-grey, very porous in texture, and contains much pumice and scoriae; polygonal columns are seen at *el Jâh*, where the neighbouring volcanic beds are contorted in an unusual manner (And. 128, 129, 130).

A third variety is found at a spur of the hills of Galilee, projecting into the *Ar el Hâleb* (Lake Keddes, and referred to by Dr. Anderson as *Tel el Haiyeh*; but of this rock he gives no description, and declines to assign it any chronological position (130).

9. The volcanic action which in pre-historic times projected this basalt, has left its later traces in the ancient records of the country, and is even still active in the form of earthquakes. Not to speak of passages in the poetical books of the Bible, which can hardly have been suggested except by such awful catastrophes, there is at least one distinct allusion to them, viz. that of *Zachariah* (xiv. 5) to an earthquake in the reign of *Uzziah*, which is corroborated by *Josephus*, who adds that it injured the Temple, and brought down a large mass of rock from the Mount of Olives (Ant. ix. 10, §4).

"Syria and Palestine," says Sir Charles Lyell (*Principles*, 8th ed., p. 340), "abound in volcanic appearances; and very extensive areas have been shaken at different periods, with great destruction of cities and loss of lives. Continued mention is made

\* See the description of the caverns of *Beit Jibrin* and *Beit Irshab* in *Eccl.* ii. 23, 61-3; and *Van der Velde*, p. 156.

† Similar rents were cleft in the rock of *el-Hattin* by an earthquake of 1653 (Calman, in *Kitt's Phys. Geog.* 119).

‡ Is. xxi. 17-20, Amos ix. 6, &c. &c.

a history of the ravages committed by earthquakes at Sidon, Tyre, Beyrût, Laodicea, and Antioch." The same author (p. 342) mentions the remarkable fact that "from the 13th to the 17th centuries there was an almost entire cessation of earthquakes in Syria and Judaea; and that, during the interval of quiescence, the Archipelago, together with part of Asia Minor, Southern Italy and Sicily suffered greatly from earthquakes and volcanic eruptions." Since they have again begun to be active in Syria, the most remarkable earthquakes have been those which destroyed Aleppo in 1616 and 1822 (for this see Wolf, *Travels*, ch. 9), Antioch in 1737, and Tiberias and Safed in 1837\* (Thomson, ch. 19). A list of those which are known to have affected the Holy Land is given by Dr. Pusey in his *Commentary* on Amos iv. 11. See also the Index to Kitter, vol. viii. p. 1953.

The rocks between Jerusalem and Jericho show many an evidence of these convulsions, as we have already remarked. Two earthquakes only are recorded as having affected Jerusalem itself—that in the reign of Uzziah already mentioned, and that at the time of the crucifixion, when "the rocks were rent and the rocky tombs torn open" (Matt. xxvii. 51). Slight shocks are still occasionally felt there (e. g. Poole, 56), but the general exemption of that city from any injury by earthquakes, except in these two cases, is really remarkable. The ancient Jewish writers were aware of it, and appealed to the fact as a proof of the favour of Jehovah to His chosen city (Ps. xlii. 1, 2).

10. But in addition to earthquakes, the hot salt and acid springs which are found at Tiberias, Callirhoe, and other spots along the valley of the Jordan, and around the basins of its lakes, and the rock-salt, nitre, and sulphur of the Dead Sea are all evidences of volcanic or plutonic action. Von Buch in his letter to Robinson (*B. R.* ii. 525), goes so far as to cite the bitumen of the Dead Sea as a further token of it. The hot springs of Tiberias were observed to flow more copiously, and to increase in temperature, at the time of the earthquake of 1837 (Thomson, ch. 19, 26).

11. In the Jordan Valley the basalt is frequently encountered. Here, as before, it is deposited on the limestone, which forms the substratum of the whole country. It is visible from time to time on the banks and in the bed of the river; but so covered with deposits of tufa, conglomerate, and alluvium, as not to be traceable without difficulty (And. 136-152). On the western side of the lower Jordan and Dead Sea no volcanic formations have been found (And. 11, 133; Russ. 205, 251); nor do they appear on

its eastern shore: till the Wady Zurka Maia is approached, and then only in erratic fragments (And. 191). At Wady Hemrah, north of the last-mentioned stream, the igneous rocks first make their appearance in situ near the level of the water (194).

12. It is on the east of the Jordan that the most extensive and remarkable developments of igneous rocks are found. Over a large portion of the surface from Damascus to the latitude of the south of the Dead Sea, and even beyond that, they occur in the greatest abundance all over the surface. The limestone, however, still underlies the whole. These extraordinary formations render this region geologically the most remarkable part of all Syria. In some districts, such as the *Lajah* (the ancient Argob or Trachonitis), the *Sufâ* and the *Hurrâh*, it presents appearances and characteristics which are perhaps unique on the earth's surface. These regions are yet but very imperfectly known, but travellers are beginning to visit them, and we shall possibly be in possession ere long of the results of further investigation. A portion of them, has been recently described in great detail by Mr. Wetstein, Prussian consul at Damascus. They lie, however, beyond the boundary of the Holy Land proper, and the reader must therefore be referred for these discoveries to the head of TRACHONITIS.

13. The tertiary and alluvial beds remain to be noticed. These are chiefly remarkable in the neighbourhood of the Jordan, as forming the floor of the valley, and as existing along the course, and accumulated at the mouths, of the torrents which deliver their tributary streams into the river, and into the still deeper caldron of the Dead Sea. They appear to be all of later date than the igneous rocks described, though even this cannot be considered as certain.

14. The floor of the Jordan valley is described by Dr. Anderson (140) as exhibiting throughout more or less distinctly the traces of two independent terraces. The upper one is much the broader of the two. It extends back to the face of the limestone mountains which form the walls of the valley on east and west. He regards this as older than the river, though of course formed after the removal of the material from between the walls. Its upper and accessible portions consist of a mass of detritus brought down by the ravines of the walls, always chalky, sometimes "an actual chalk;" usually bare of vegetation (And. 143), though not uniformly so (Rob. iii. 315).

Below this, varying in depth from 50 to 150 feet, is the second terrace, which reaches to the channels of the Jordan, and, in Dr. Anderson's opinion, has

\* Four-fifths of the population of Safed, and one-fourth of that of Tiberias, were killed on this occasion.

\* Even the tremendous earthquake of May 20, 1202, only did Jerusalem a very slight damage (Abdul-latif, in *Uttin*, *Phys. Geogr.* 148).

\* It may be convenient to give a list of the hot or brackish springs of Palestine, as far as they can be collected. It will be observed that they are all in or about the Jordan Valley. Beginning at the north:—

Ain Eyûb, and Ain Tâ'ighah, N.E. of Lake of Tiberias: highly warm, too brackish to be drinkable. (Rob. ii. 405.)

Ain el-Bâridah, on shore of Lake, S. of Mâjdel: 80 Fahr., highly brackish. (Rob. ii. 396.)

Tiberias: 144° Fahr.; salt, bitter, sulphureous.

Amatsh, in the Wady Mandhur: very hot, slightly sulphureous. (Burckhardt, May 6.)

Wady Malih (Salt Valley), in the Ghôr near Bahû. 9° Fahr.; very salt, fetid. (Rob. iii. 308.)

Below Ain-Feshkah: fetid and brackish. (Lynch Apr. 18.)

One day N. of Ain-Jidy: 80° Fahr.: salt. (Poole, 67.)

Between Wady Mahras and W. Khushelbeh, S. of Ain-Jidy: brackish. (Anderson, 177.)

Wady Muhariyat, 45° E. of Usdûm: salt, containing small fish. (Littler, *Jordan*, 736; Poole, 61.)

Wady el-Aby, S.E. end of Dead Sea: hot. (Burckhardt Aug. 7.)

Wady Bent-Hamed, near Rabba, E. side of Dead Sea. (Ritter, *Syrien*, 1223.)

Wady Zerka Maia (Callirhoe), E. side of Dead Sea: very hot, very slightly sulphureous. (Seetzen, Jan. 18; Irby, June 8.)

\* *Reisbericht über Hausran und die Trachonen*, 1860; with map and woodcuts.

\* Compare Robinson's diary of his journey across the Jordan near Sakit (ii. 313).

been excavated by the river itself before it had shrunk to its present limits, when it filled the whole space between the eastern and western faces of the upper terrace. The inner side of both upper and lower terraces is furrowed out into conical knolls, by the torrents of the rains descending to the lower level. These cones often attain the magnitude of hills, and are ranged along the edge of the terraces with curious regularity. They display convenient sections, which show sometimes a tertiary limestone or marl, sometimes quaternary deposits of sands, gravels, variegated clays, or unstratified detritus. The lower terrace bears a good deal of vegetation, oleander, agnus castus, &c. The alluvial deposits have in some places been swept entirely away, for Dr. Anderson speaks of crossing the upturned edges of nearly vertical strata of limestone, with neighbouring beds contorted in a very violent manner (148). This was a few miles N. of Jericho.

All along the channel of the river are found mounds and low cliffs of conglomerates, and breccias of various ages, and more various composition. Rolled boulders and pebbles of flinty sandstone or chert, which have descended from the upper hills, are found in the cross ravines; and tufts, both calcareous and siliceous, abound on the terraces (And. 147).

15. Round the margin of the Dead Sea the tertiary beds assume larger and more important proportions than by the course of the river. The marls, gypsites, and conglomerates continue along the base of the western cliff as far as the Wady Sebbeh, where they attain their greatest development. South of this they form a sterile waste of brilliant white marl and bitter salt flakes, ploughed by the rain-torrents from the heights into pinnacles and obelisks (180).

At the south-eastern corner of the sea, sandstones begin to display themselves in great profusion, and extend northward beyond Wady Zurka Mafn (189). Their full development takes place at the mouth of the Wady Mojeb, where the beds are from 100 to 400 feet in height. They are deposited on the limestone, and have been themselves gradually worn through by the waters of the ravine. There are many varieties, differing in colour, composition, and date. Dr. A. enumerates several of these (190, 196), and states instances of the red sandstone having been filled up, after excavation, by nonconforming beds of yellow sandstone of a much later date, which in its turn has been hollowed out, the hollows being now occupied by detritus of a stream long since extinct.

Russeger mentions having found a tertiary breccia overlying the chalk on the south of Carmel, composed of fragments of chalk and flint, cemented by lime (257).

16. The rich alluvial soil of the wide plains which form the maritime portion of the Holy Land, and also that of Esdraelon, Gennesareth, and other similar plains, will complete our sketch of the geology. The former of these districts is a region of from eight to twelve miles in width, intervening between the central highlands and the sea. It is formed of washings from those highlands, brought down by the heavy rains which fall in the winter months, and which, though they rarely remain as permanent streams, yet last long enough to spread this fertilising manure over the face of the country. The soil is a light loamy sand, red in some places,

and deep black in others. The substratum is not seen, but it appears to be the same limestone which composes the central mountains. The actual soil is formed of a very recent sandstone full of marine shells, often those of existing species (Russ. 232, 7), which is disintegrated by the waves and thrown to the shore as sand,<sup>7</sup> where it forms a tract of considerable width and height. This sand in many places stops the outflow of the streams, and washes them back on to the plain, where they serve to form marshes, which with proper treatment might afford most important assistance to the fertility of this already fertile district.

17. The plain of Gennesareth is under similar conditions, except that its outer edge is bounded by the lake instead of the ocean. Its superiority is owing to the maritime land is probably due to the abundance of running water which it contains all the year round, and to the rich soil produced from the top of the volcanic rocks on the steep heights which immediately enclose it.

18. The plain of Esdraelon lies between two tracts of highland, with a third (the hills separating it from the plain of Akko), at its north-west end. It is watered by some of the finest springs of Palestine, the streams from which traverse it both east and west of the central water-shed, and render soil or mud, moisture and marsh, even during the coldest months of the year. The soil of this plain is also volcanic, though not so purely as in the case of Gennesareth.

19. Bitumen or asphaltum, called by the Arabs *hummar* (the slime of Gen. xi. 3), is only seen in the valley of Jordan. At Hasbaya, so remote from the sources of the river, it is obtained from pits or wells which are sunk through a mass of bituminous earth to a depth of about 100 ft. (And. 115, 116). It is also found in small fragments on the shore of the Dead Sea, and occasionally, though rarely, very large masses of it are discovered floating in the water (Robt. 1, 11). This appears to have been more frequent in case in ancient times (Joseph. *l. c.* ii. 8, 9). Diod. Sic. ii. 48). [Scribn.] The Arabs hold that it proceeds from a source in one of the pinnacles on the eastern shore of the Dead Sea (Robt. i. 517) opposite *Ain-jah* (Russ. 212), but this is not corroborated by the observations of Leake's party, of Mr. Poole, or of Dr. Robinson, who examined the eastern shore from the western end, and made special reference thereto. It is more probable that the bituminous limestone in the neighbourhood of Neby Musa exists in strata of great thickness, and that the bitumen escapes from its lower beds to the Dead Sea, and there accumulates until by some accident it is detached, and rises to the surface.

20. Sulphur is found on the W. and S. and N. portions of the shore of the Dead Sea (Robt. 1, 11). In many spots the air smells strongly of sulphuric acid and sulphuretted hydrogen gas (And. 120; Poole, 66; Beaufort, ii. 113), a sulphureous smell spread over the surface of the beach, and large quantities of sulphur are found in the sea (Robt. i. 512; Russ. 63) speaks of "sulphur hills" on the peninsula the S.E. end of the sea (Russ. 187).

Nitre is rare. Mr. Poole did not discover any, though he made special search for it. By the

<sup>7</sup> The statement in the text is from Thomson (*Land and Rock*, ch. 33). But the writer has learned that in the opinion of Capt. Mansell, R. N. [than whom no one has had

more opportunity of judging], the sand of the coast of Syria has been brought up from Egypt by the E. wind. This is also stated by Josephus (*Ant.* vi. 116).

s. Seetzen and Robinson, however, mention seen it (Rob. i. 513).

—salt abunds in large masses. The salt of *Kashm Udum* at the southern end of the Dead Sea is an enormous pile, 5 miles long by 1/2 mile, and some hundred feet in height (And.

Its inferior portion consists entirely of rock-salt, the upper part of sulphate of lime and iron, and is mixed with a large admixture of alumina. [G.]

**BOTANY.**—The Botany of Syria and Palestine differs but little from that of Asia Minor, and is one of the most rich and varied on the globe.

What differences it presents are due to the admixture of Persian forms on the eastern coast, of Arabian and Egyptian on the southern, and of Arabian and Indian tropical plants in the arid depression of the Jordan and Dead Sea.

latter, which number perhaps a hundred or more kinds, are anomalous features in the otherwise arid landscape of Syria. On the other hand, the Palestine forms the southern and eastern limit of the Asia-Minor flora, and contains a multitude of plants, shrubs, and herbs that advance no further east.

Of these the pine, oak, elder, rose, dog-rose and hawthorn are conspicuous; their southern migration being checked by the drought and heat of the regions beyond the Jordan.

Owing, however, to the geographical position and the mountainous character of Asia Minor and Syria, the main features of the flora are essentially Mediterranean-European, and Asiatic.

A vast proportion of the comarboseous and frutescent plants are identical with those of Spain, Algeria, Italy, and Greece; and many belong to the same genera as do British, American, and Scandinavian plants, there are ample opportunities of instituting such a comparison between the flora and that familiar to us as any intelligent natural observer can follow and understand.

elsewhere throughout the Mediterranean region, Syria and Palestine were evidently once thickly clothed with forests, which on the lower hills and have been either entirely removed, or else reduced to the condition of brushwood and copse; which still abound on the mountains, and along the coast.

The low grounds, and rocky hills are carpeted with herbaceous plants, that appear in rapid succession from before the sun till June, when they disappear; and the alluvial or white calcareous soil, being heated by the scorching rays of the sun, gives an forbidding sterility to the most productive soil.

Lastly, the lofty regions of the mountains are dry, swardless, and swamplike, with few or no plants, mosses, lichens, or ferns; presenting a most unfavourable contrast to the Scandinavian, and British mountain floras at low elevations.

a traveller from England, it is difficult to say whether the familiar or the foreign forms predominate. Of trees he recognizes the oak, pine, walnut, juniper, alder, poplar, willow, ash, dwarf plane, ivy, arbutus, rhamnus, almond, plum, and hawthorn, all elements of his own forest and plantations; but misses the beech, lime, holly, birch, larch, and spruce;

he sees for the first time such southern forms as the olive (*Olea*), cypress, sycamore, fig, pistachio, styrax, olive, phyllirea, vitex, and celtis, many new kinds of oak, the pistachio oil, and various tall tropical grasses.

Of cultivated English fruits he sees the vine, apple, pear, apricot, quince, plum, mulberry, and fig; but misses the gooseberry, raspberry, strawberry, currant, cherry, and other northern kinds, which are as it were replaced by such southern and subtropical fruits as the date, pomegranate, cordia myxa (*sebastos* of the Arabs), orange, shaddock, lime, banana, almond, prickly pear, and pistachio-nut.

Amongst cereals and vegetables the English traveller finds wheat, barley, peas, potatoes, many varieties of cabbage, carrots, lettuces, endive, and mustard; and misses oats, rye, and the extensive fields of turnip, beet, mangold-wurzel, and fodder grasses, with which he is familiar in England.

On the other hand, he sees for the first time the cotton, millet, rice, sorghum, sesamum, sugar-cane, maize, egg-apple, ochra, or *Abelmoschus esculentus*, *Cochlospermum*, various beans and lentils, as *Labiab vulgaris*, *Phaseolus mungos*, and *Cicer arietinum*; melons, gourds, pumpkins, cummin, coriander, fennel, anise, sweet potato, tobacco, yam, colocasia, and other subtropical and tropical field and garden crops.

The flora of Syria, so far as it is known, may be roughly classed under three principal botanical regions, corresponding with the physical characters of the country. These are (1), the western or seaboard half of Syria and Palestine, including the lower valleys of the Lebanon and Anti-Lebanon, the plain of Coele-Syria, Galilee, Samaria, and Judea. (2) The desert or eastern half, which includes the east flanks of the Anti-Lebanon, the plain of Damascus, the Jordan and Dead Sea valley. (3) The middle and upper mountain regions of Mount Casius, and of Lebanon above 3400 feet, and of the Anti-Lebanon above 4000 feet. Nothing whatever is known botanically of the regions to the eastward, viz. the Hauran, Lejah, Gilead, Ammon, and Moab; countries extending eastward into Mesopotamia, the flora of which is Persian, and south to Idumea, where the purely Arabian flora begins.

These Botanical regions present no definite boundary line. A vast number of plants, and especially of herbs, are common to all except the loftiest parts of Lebanon and the driest spots of the eastern district, and in no latitude is there a sharp line of demarcation between them. But though the change is gradual from the dry and semi-tropical eastern flora to the moister and cooler western, or from the latter to the cold temperate one of the Lebanon, there is a great and decided difference between the floras of three such localities as the Lebanon at 5000 feet, Jerusalem, and Jericho; or between the tops of Lebanon, of Carmel, and of any of the hills bounding the Jordan; for in the first locality we are most strongly reminded of northern Europe, in the second of Spain, and in the third of western India or Persia.

**1. Western Syria and Palestine.**—The flora throughout this district is made up of such a multitude of different families and genera of plants, that it is not easy to characterise it by the mention of a few. Amongst trees, oaks are by far the most prevalent, and are the only ones that form continuous woods, except the *Pinus maritima* and *P. Halapensis* (Aleppo Pine); the former of which extends in forests here and there along the shore, and the latter crests the spurs of the Lebanon, Carmel, and a few other ranges as far south as Hebron. The most prevalent oak is the *Quercus pseudo-coccifera*, a plant scarcely different from the common *Q. coccifera* of the western Mediterranean, and which it strongly resembles in form, habit, and evergreen foliage. It is called holly by many travellers, and

Of cultivated English fruits he sees the vine, apple, pear, apricot, quince, plum, mulberry, and fig; but misses the gooseberry, raspberry, strawberry, currant, cherry, and other northern kinds, which are as it were replaced by such southern and subtropical fruits as the date, pomegranate, cordia myxa (*sebastos* of the Arabs), orange, shaddock, lime, banana, almond, prickly pear, and pistachio-nut.

Amongst cereals and vegetables the English traveller finds wheat, barley, peas, potatoes, many varieties of cabbage, carrots, lettuces, endive, and mustard; and misses oats, rye, and the extensive fields of turnip, beet, mangold-wurzel, and fodder grasses, with which he is familiar in England.

On the other hand, he sees for the first time the cotton, millet, rice, sorghum, sesamum, sugar-cane, maize, egg-apple, ochra, or *Abelmoschus esculentus*, *Cochlospermum*, various beans and lentils, as *Labiab vulgaris*, *Phaseolus mungos*, and *Cicer arietinum*; melons, gourds, pumpkins, cummin, coriander, fennel, anise, sweet potato, tobacco, yam, colocasia, and other subtropical and tropical field and garden crops.

The flora of Syria, so far as it is known, may be roughly classed under three principal botanical regions, corresponding with the physical characters of the country. These are (1), the western or seaboard half of Syria and Palestine, including the lower valleys of the Lebanon and Anti-Lebanon, the plain of Coele-Syria, Galilee, Samaria, and Judea. (2) The desert or eastern half, which includes the east flanks of the Anti-Lebanon, the plain of Damascus, the Jordan and Dead Sea valley. (3) The middle and upper mountain regions of Mount Casius, and of Lebanon above 3400 feet, and of the Anti-Lebanon above 4000 feet. Nothing whatever is known botanically of the regions to the eastward, viz. the Hauran, Lejah, Gilead, Ammon, and Moab; countries extending eastward into Mesopotamia, the flora of which is Persian, and south to Idumea, where the purely Arabian flora begins.

These Botanical regions present no definite boundary line. A vast number of plants, and especially of herbs, are common to all except the loftiest parts of Lebanon and the driest spots of the eastern district, and in no latitude is there a sharp line of demarcation between them. But though the change is gradual from the dry and semi-tropical eastern flora to the moister and cooler western, or from the latter to the cold temperate one of the Lebanon, there is a great and decided difference between the floras of three such localities as the Lebanon at 5000 feet, Jerusalem, and Jericho; or between the tops of Lebanon, of Carmel, and of any of the hills bounding the Jordan; for in the first locality we are most strongly reminded of northern Europe, in the second of Spain, and in the third of western India or Persia.

**1. Western Syria and Palestine.**—The flora throughout this district is made up of such a multitude of different families and genera of plants, that it is not easy to characterise it by the mention of a few. Amongst trees, oaks are by far the most prevalent, and are the only ones that form continuous woods, except the *Pinus maritima* and *P. Halapensis* (Aleppo Pine); the former of which extends in forests here and there along the shore, and the latter crests the spurs of the Lebanon, Carmel, and a few other ranges as far south as Hebron. The most prevalent oak is the *Quercus pseudo-coccifera*, a plant scarcely different from the common *Q. coccifera* of the western Mediterranean, and which it strongly resembles in form, habit, and evergreen foliage. It is called holly by many travellers, and

*Quercus Ilex* by others, both very different trees. *Q. pseudo-coccifera* is perhaps the commonest plant in all Syria and Palestine, covering as a low dense bush many square miles of hilly country everywhere, but rarely or never growing in the plains. It seldom becomes a large tree, except in the valleys of the Lebanon, or where, as in the case of the famous oak of Mamre, it is allowed to attain its full size. It ascends about 5000 feet on the mountains, but does not descend into the middle and lower valley of the Jordan; nor is it seen on the east slopes of the Anti-Lebanon, and scarcely to the eastward of Jerusalem; it may indeed have been removed by man from these regions, when the effect of its removal would be to dry the soil and climate, and prevent its re-establishment. Even around Jerusalem it is rare, though its roots are said to exist in abundance in the soil. The only other oaks that are common are the *Q. infectoria* (a gall oak), and *Q. Aegilops*. The *Q. infectoria* is a small deciduous-leaved tree, found here and there in Galilee, Samaria, and on the Lebanon; it is very conspicuous from the numbers of bright chesnut-coloured shining viscid galls which it bears, and which are sometimes exported to England, but which are a poor substitute for the true Aleppo galls. *Q. Aegilops* again is the Valonia oak; a low, very stout-trunked sturdy tree, common in Galilee, and especially on Tabor and Carmel, where it grows in scattered groups, giving a park-like appearance to the landscape. It bears acorns of a very large size, whose cups, which are covered with long recurved spines, are exported to Europe as Valonia, and are used, like the galls of *Q. infectoria*, in the operation of dyeing. This, I am inclined to believe, is the oak of Bashan, both on account of its sturdy habit and thick trunk, and also because a fine piece of the wood of this tree was sent from Bashan to the Kew Museum by Mr. Cyril Graham. The other oaks of Syria are chiefly confined to the mountains, and will be noticed in their proper place.

The trees of the genus *Pistacia* rank next in abundance to the Oak,—and of these there are three species in Syria, two wild and most abundant, but the third, *P. cera*, which yields the well-known pistachio nut, very rare, and chiefly seen in cultivation about Aleppo, but also in Beyrout and near Jerusalem. The wild species are the *P. Lentiscus* and *P. Terebinthus*, both very common: the *P. Lentiscus* rarely exceeds the size of a low bush, which is conspicuous for its dark evergreen leaves and numberless small red berries; the other grows larger, but seldom forms a fair-sized tree.

The Carob or Locust-tree, *Ceratonia Siliqua*, ranks perhaps next in abundance to the foregoing trees. It never grows in clumps or forms woods, but appears as an isolated, rounded or oblong, very dense-foliaged tree, branching from near the base, of a bright lucid green hue, affording the best shade. Its singular flowers are produced from its thick branches in autumn, and are succeeded by the large pendulous pods, called St. John's Bread, and extensively exported from the Levant to England for feeding cattle.

The oriental Plane is far from uncommon, and though generally cultivated, it is to all appearances wild in the valleys of the Lebanon and Anti-Lebanon. The great plane of Damascus is a well-known object to travellers; the girth of its trunk was nearly 40 feet, but it is now a mere wreck.

The Sycomore fig is common in the neighbourhood of towns, and attains a large size; its wood is

much used, especially in Egypt, where the mummy cases were formerly made of it. Poplars, especially the aspen and white poplar, are extremely common by streams; the latter is generally trained for firewood, so as to resemble the Lombardy poplar. The Walnut is more common in Syria than in Palestine, and in both countries is generally confined to gardens and orchards. Of large native shrubs or small trees almost universally spread over this district are, *Arbutus Andrachne*, which is common in the hilly country from Hebron northward; *Crataegus Aronia*, which grows equally in dry rocky exposures, as on the Mount of Olives, and in cool mountain valleys; it yields a large yellow or red haw that is abundantly sold in the markets. Cyppresses are common about villages, and especially near all religious establishments, often attaining a considerable size, but I am not aware of their being indigenous to Syria. *Zizyphus Spina-Christi*, Christ's Thorn—often called jujute—the Nuk of the Arabs, is most common on dry open plains, as that of Jericho, where it is either a scrambling briar, a standard shrub, or rarely even a middling-sized tree with pendulous branches: it is familiar to the traveller from its sharp hooks, white undersides to the three-nerved leaves, and globular yellow sweetish fruit with a large woody stone. The *Paliurus aculeatus*, also called Christ's Thorn, resembles it a good deal, but is much less common; it abounds in the Anti-Lebanon, where it is used for hedges, and may be recognised by its curved prickles and curious dry fruit, with a broad flat wing at the top. *Syrus officinalis*, which used to yield the famous Suez, abounds in all parts of the country where hilly, sometimes, as on the east end of Carmel and on Tabor, becoming a very large bush branching from the ground, but never assuming the form of a tree: it may be known by its small downy leaves, white flowers like orange blossoms, and round yellow fruit, pendulous from slender stalks, like cherries. The flesh of the berry, which is quite uneatable, is of a semi-transparent hue, and contains one or more large, chesnut-coloured seeds. *Tamarisk* is common, but seldom attains a large size, and has nothing to recommend it to notice. *Oleander* claims a separate notice, from its great beauty and abundance; lining the banks of the streams and lakes in gravelly places, and bearing a profusion of blossoms. Other still smaller but familiar shrubs are *Phillyrea*, *Rhamnus alaternus*, and others of that genus. *Rhus Coriaria*, several leguminous shrubs, as *Anagyris foetida*, *Calycotome* and *Genista*; *Cotoneaster*, the common bramble, dog-rose, and hawthorn *Elaeagnus*, wild olive, *Lycium Europaeum*, *Vitis agnus-castus*, sweet bay (*Laurus nobilis*), *Ephedra*, *Clematis*, Gum-Cistus, and the caper plant: thus nearly complete the list of the commoner shrubs and trees of the western district, which attain a height of four feet or more, and are almost universally met with, especially in the hilly country.

Of planted trees and large shrubs, the first in importance is the Vine, which is most abundantly cultivated all over the country, and produces, as in the time of the Canaanites, enormous bunches of grapes. This is especially the case in the southern districts; those of Eschcol being still particularly famous. Stephen Schultz states that at a village near Ptolemais (Acre) he supped under a large vine, the stem of which measured a foot and a half in diameter, its height being 30 feet; and that the whole plant, supported on trellis, covered an area 50 feet either way. The bunches of grapes

red 10-12 lbs., and the berries were like plums. Mariti relates that no vines can be produced with those of Judea, of which a bunch not be carried far without destroying the fruit; we have ourselves heard that the bunches produced near Hebron are sometimes so long that, when attached to a stick which is supported on the shoulders of two men, the tip of the bunch trails on ground.

Next to the vine, or even in some respects inferior in importance, ranks the Olive, which nowhere grows in greater luxuriance and abundance than in Palestine, where the olive orchards form a prominent feature throughout the landscape, and are done so from time immemorial. The olive-tree is in no respects a handsome or picturesque object; its bark is grey and rugged; its foliage is colour an ashy, or at best a dusky green, and casts little shade; its wood is useless as timber, flowers are inconspicuous, and its fruit uninviting to the eye or palate; so that, even where most abundant and productive, the olive scarcely relieves the aspect of the dry soil, and deceives the superficial observer as to the fertility of Palestine. Indeed it is mainly owing to these peculiarities of olive-tree, and to the deciduous character of foliage of the fig and vine, that the impression so prevalent amongst northern travellers, that

Holy Land is in point of productiveness not at all what it was in former times; for to the native of northern Europe especially, the idea of fertility is incomparable from that of verdure. The article will be referred to for details of this tree, which is perhaps most skilfully and carefully cultivated in the neighbourhood of Hebron, where for many miles the roads run between stone walls enclosing magnificent olive orchards, apparently tended with as much neatness, care, and skill as the best gardens in England. The terraced olive-yards and Sebastieh must also strike the most casual observer, as admirable specimens of careful cultivation.

The Fig forms another most important crop in Syria and Palestine, and one which is apparently increasing in extent. As with the olive and cherry, the fig-trees, where best cultivated, are systematically planted in fields, whose soil is freed from stones, and kept as scrupulously clean of weeds as it can be in a semi-tropical climate. As is well known, the fig bears two or three crops in the year: Josephus says that it bears for ten months of the twelve. The early figs, which ripen about June, are reckoned especially good. The summer figs again ripen in August, and a third crop appears still later when the leaves are shed; these are occasionally gathered as late as January. The figs are dried by the natives, and are chiefly consumed by the Arabs of the eastern deserts. The Armenian fig, previously noticed, has much smaller and very inferior fruit.

The quince, apple, almond, walnut, peach, and apricot, are all most abundant field or orchard crops, often planted in lines, rows, or quincunx pattern, with the olive, mulberry, or fig; but they are by no means so abundant as these latter. The negundo grows everywhere as a bush; but, like the orange, Eucalyptus, and other less common plants, is more often seen in gardens than in fields. The fruit ripens in August, and is kept throughout the winter. Three kinds are cultivated—the acid, the sweet, and insipid—and all are used in preparing preserves; while the bark and fruit made of all are

used for dyeing and as medicine, owing to their astringent properties.

The Banana is only found near the Mediterranean; it ripens its fruit as far north as Beyrouth, and occasionally even at Tripoli, but more constantly at Sidon and Jaffa; only one kind is commonly cultivated, but it is excellent. Dates are not frequent: they are most common at Caiffa and Jaffa, where the fruit ripens, but there are now no groves of this tree anywhere but in Southern Palestine, such as once existed in the valley of the Jordan, near the assumed site of Jericho. Of that well-known grove no tree is standing; one log of date-palm, now lying in a stream near the locality, is perhaps the last remains of that ancient race, though that they were once abundant in the immediate neighbourhood of the Dead Sea is obvious from the remark of Mr. Poole, that some part of the shore of that sea is strewn with their trunks. [See p. 675 note.] Wild dwarf dates, rarely producing fruit, grow by the shores of the Lake of Tiberias and near Caiffa; but whether they are truly indigenous date-palms, or crab-dates produced from seedlings of the cultivated form, is not known.

The Opuntia, or Prickly Pear, is most abundant throughout Syria, and though a native of the New World, has here, as elsewhere throughout the dry, hot regions of the eastern hemisphere, established its claim to be regarded as a permanent and rapidly-increasing denizen. It is in general use for hedging, and its well-known fruit is extensively eaten by all classes. I am not aware that the cochineal insect has ever been introduced into Syria, where there can, however, be little doubt but that it might be successfully cultivated.

Of dye-stuffs the *Carthamus* (Safflower) and Indigo are both cultivated; and of Textiles, Flax, Hemp, and Cotton.

The Carob, or St. John's Bread (*Ceratonia Siliqua*), has already been mentioned amongst the conspicuous trees: the sweetish pulp of the pods is used for sherbets, and abundantly eaten; the pods are used for cattle-feeding, and the leaves and bark for tanning.

The Cistus or Rock-rose, two or three species of which are abundant throughout the hilly districts of Palestine, is the shrub from which in former times Gum-Labdanum was collected in the islands of Candia and Cyprus.

With regard to the rich and varied herbaceous vegetation of West Syria and Palestine, it is difficult to afford any idea of its nature to the English non-botanical reader, except by comparing it with the British; which I shall first do, and then detail its most prominent botanical features.

The plants contained in this botanical region probably number not less than 2000 or 2500, of which perhaps 500 are British wild flowers; amongst the most conspicuous of these British ones are the *Ranunculus aquatilis*, *arvensis*, and *Ficaria*; the yellow water-lily, *Nymphaea Pinnatifida* and *hybrida*, and several Fumitories; fully 20 cruciferous plants, including *Draba cerna*, water-cress, *Turritis glabra*, *Sisymbrium Irio*, *Capsella Bursa-pastoris*, *Cakile maritima*, *Lepidium Draba*, charlock, mustard (often growing 8 to 9 feet high), two mignonettes (*Rosella alba* and *lutea*), *Silene inflata*, various species of *Cerastium*, *Spergula*, *Stellaria* and *Arenaria*, mallows, *Geranium molle*, *rotundifolium*, *lucidum*, *dissectum*, and *Robertianum*, *Erodium moschatum*, and *cicutarium*. Also many species of Leguminosae, especially of *Medicago*, *Trifolium*,

*Xanthoxus*, *Lotus*, *Ononis*, *Errum*, *Vicia* and *Lathyrus*. Of *Rosaceae* the common bramble and dog-rose. *Lathrum Salicaria*, *Epilobium hirsutum*, *Bryonia divica*, *Saxifraga tridactylites*, *Galium ceruin*, *Rubia parviflora*, *Asperula arvensis*. Various *Umbelliferae* and *Compositae*, including the daisy, wormwood, groundsel, dandelion, chicory, sowthistle, and many others. Blue and white pimpernel, *Cyclamen Europaeum*, *Samolus Valerandi*, *Erica vagans*, Borage, *Veronica Anayallis*, *Beccabunga*, *agrestis*, *triphyllos*, and *Chamaedrys*, *Lathraea squamaria*, Vervain, *Lamium amplexicaule*, mint, horehound, *Prunella*, *Statice Limonium*, many *Chenopodiaceae*, *Polygonum* and *Rumex*, *Pellitory*, *Mercurialis*, *Euphorbia*, nettles, box, elm, several willows and poplars, common duck-weed and pond-weed, *Orchis maris*, *Crocus aureus*, butcher's-broom, black Bryony, autumnal Squill, and many rushes, sedges, and grasses.

The most abundant natural families of plants in West Syria and Palestine are—(1) *Leguminosae*, (2) *Compositae*, (3) *Labiatae*, (4) *Cruciferae*; after which come (5) *Umbelliferae*, (6) *Caryophyllaceae*, (7) *Boraginaceae*, (8) *Scrophulariaceae*, (9) *Gramineae*, and (10) *Liliaceae*.

(1.) *Leguminosae* abound in all situations, especially the genera *Trifolium*, *Trigonella*, *Medicago*, *Lotus*, *Vicia*, and *Orobus*, in the richer soils, and *Astragalus* in enormous profusion in the drier and more barren districts. The latter genus is indeed the largest in the whole country, upwards of fifty species belonging to it being enumerated, either as confined to Syria, or common to it and the neighbouring countries. Amongst them are the gum-bearing *Astragalus*, which are, however, almost confined to the upper mountain regions. Of the shrubby *Leguminosae* there are a few species of *Genista*, *Cytisus*, *Ononis*, *Retama*, *Anagyris*, *Calycotome*, *Coronilla*, and *Acacia*. One species, the *Ceratonia*, is arboreous.

(2.) *Compositae*.—No family of plants more strikes the observer than the *Compositae*, from the vast abundance of thistles and centauries, and other spring-plants of the same tribe, which swarm alike over the richest plains and most stony hills, often towering high above all other herbaceous vegetation. By the unobservant traveller these are often supposed to indicate sterility of soil, instead of the contrary, which they for the most part really do, for they are nowhere so tall, rank, or luxuriant as on the most productive soils. It is beyond the limits of this article to detail the botanical peculiarities of this vegetation, and we can only mention the genera *Centaurea*, *Echinops*, *Onopordum*, *Cirsium*, *Cynara*, and *Carduus*, as being eminently conspicuous for their numbers or size. The tribe *Cichoreae* are scarcely less numerous, whilst those of *Gnaphalium*, *Asteroidae*, and *Senecionidae*, so common in more northern latitudes, are here comparatively rare.

(3.) *Labiatae* form a prominent feature everywhere, and one all the more obtrusive from the fragrance of many of the genera. Thus the lovely hills of Galilee and Samaria are inseparably linked in the memory with the odoriferous herbage of marjoram, thyme, lavender, calaminths, sage, and teucriums; of all which there are many species, as also there are of *Sideritis*, *Phlomis*, *Stachys*, *Ballota*, *Nepeta*, and *Mentha*.

(4.) Of *Cruciferae* there is little to remark: its species are generally weed-like, and present no marked feature in the landscape. Among the most noticeable are the gigantic mustard, previously

mentioned, which does not differ from the common mustard. *Sinapis nigra*, save in size, and the *Isotatica haezchuntica*, or rose of Jericho, an Egyptian and Arabian plant, which is said to grow in the Jordan and Dead Sea valleys.

(5.) *Umbelliferae* present little to remark in save the abundance of fennel and *Rapum*: the order is exceedingly numerous both in species and individuals, which often form a large proportion of the tall rank herbage at the edges of open-wooded in damp hollows. The grey and spiny *Eryngium*, so abundant on all the arid hills, belongs to this order.

(6.) *Caryophyllaceae* also are not a very conspicuous order, though so numerous that the abundance of pinks, *Silene* and *Saponaria*, is a marked feature to the eye of the botanist.

(7.) The *Boraginaceae* are for the most part annual weeds, but some notable exceptions are found in the *Echium*, *Anchusa*, and *Onosma*, which are among the most beautiful plants of the country.

(8.) Of *Scrophulariaceae* the principal genera are *Scrophularia*, *Veronica*, *Lauraria*, and *Pedicularis* (Mulleins): the latter is by far the most abundant, and many of the species are quite gigantic.

(9.) *Gramineae*, though very numerous in species, seldom afford a sward as in moister and other regions; the pasture of England having its Oriental equivalent the herbs and herbaceous top of the low shrubby plants which cover the country, and on which all herbivorous animals love to browse. The *Arundo Donax*, *Saccharum Aegyptiacum*, and *Eriophorum Ravennae*, are all conspicuous for their gigantic size and silky plumes of flowers of exquisite grace and beauty.

(10.) *Liliaceae*.—The variety and beauty of this order in Syria is perhaps nowhere exceeded, and especially of the bulb-bearing genera, as tulips, fritillaries, squills, gageas, &c. The *Urginea* (medicinal squill) abounds everywhere, throwing up a tall stalk beset with white flowers at its apex half; and the little purple autumnal squill is one of the commonest plants in the country, springing up in October and November in the most arid situations imaginable.

Of other natural orders worthy of notice, for one reason or another, are *Violaceae*, for the purity of its species; *Geraniaceae*, which are very numerous and beautiful; *Eutaceae*, which are common, and very strong-scented when bruised. *Linaceae* are not so abundant as in more northern climates, but are represented by one remarkable plant, *Fallopia spinosum*, which covers whole tracts of arid hill country, much as the ling does in Britain. *Cuscutaceae* and *Saxifragaceae* are also not so plentiful as in cooler regions. *Dipsacaceae* are very abundant, especially the genera *Knautia*, *Scabiosa*, *Cephalaria*, and *Pterocarpus*. *Campanulaceae* are common, and *Lobeliaceae* rare. *Primulaceae* and *Loraceae* are both rare, though one or two species are not uncommon. There are very few *Gesneriaceae*, but many *Convolvuli*. Of *Solanaceae*, *Mandragora*, *Solanum*, and *Hyoscyamus* are very common, also *Physalis*, *Cappucinum*, and *Lycopersicon*, all probably escapes from cultivation. *Plantaginaceae* contain a good many *Statice*, and the blue-flowered *Plantago Europaea* is a very common weed. *Chenopodiaceae* are very numerous, especially the small *Atriplex* and *Chenopodium* and some shrubby *Salsola*. *Polygonum* are very common indeed, especially the smaller species of *Polygonum* itself. *Antirrhineae* present several species. *Euphorbia*. The herbaceous genus *Euphorbia* is vastly abundant.

ally in fields: upwards of fifty Syrian species known. *Crotophora*, *Andrachne*, and *Ricinus*, among other types, are also common. *Urtica* is not the common European nettles, *Mercurialis*, *Pellitory*. *Morea*, the common and sycamore and the black and white mulberries. *Aroideae* very common, and many of them are handsome, eg deep-purple lurid spathes, which rise out of the ground before the leaves.

*Balanophoras*, the curious *Cynomorium coccineum*, or "Fungus Melitensis," used as a styptic by the Crusades by the Knights of Malta, is found in the valleys of Lebanon near the sea. *Idaea*, as in other dry countries, are scarce. *Idaea* contain about thirty to forty kinds, eg South European species of *Orchis*, *Ophrys*, *Anthems*, and *Serapias*.

*maryllideae* present *Pancratium*, *Sternbergia*, *Irion*, and *Narcissus*. *Iridea* has many species *ris* and *Crocus*, besides *Moraea*, *Gladiolus*, *hemema*, and *Romulea*. *Dioscoreae*, *Tamus* *sumis*. *Smilacinae*, several *Asparagi*, *Smilax*, *Ruscus aculeatus*. *Melanthaceae* contain many *Idaea*, besides *Merendera* and *Erythrostictus*. *Idaea* contain none but the commoner British *is* and *luzulas*. *Cyperaceae* are remarkably poor *ies*; the genus *Carex*, so abundant in Europe, *ecially* rare, not half a dozen species being *erated*.

*rus* are extremely scarce, owing to the dryness *e* climate, and most of the species belong to *ebanon* flora. The common lowland ones are *abum capillus-veneris*, *Cheilanthes fragrans*, *sogramma leptophylla*, *Ceterach officinarum*, *is lanceolata*, and *Asplenium Adiantum* *um*. *Selaginella denticulata* is also found.

*se* of the most memorable plants of this region, *indeed* in the whole world, is the celebrated *rus* of the ancients (*Papyrus antiquorum*), *h* is said once to have grown on the banks of *ower Nile*, but which is nowhere found now in *a* north of the tropics. The only other known *at* beside Syria and tropical Africa is one spot *is* island of Sicily. The Papyrus is a noble *l*, forming tufts of tall stout 3-angled green *th* stems, 6 to 10 feet high, each surmounted *op* of pendulous threads: it abounds in some *ies* by the Lake of Tiberias, and is also said *ow* near Caiffa and elsewhere in Syria. It is *aily* the most remarkable plant in the country. *f* other Cryptogamic plants little is known. *sa*, lichens, and *Hepaticae* are not generally *ion*, though doubtless many species are to be *in* the winter and spring months. The marine *are* supposed to be the same as in the rest of *esterranean*, and of *Fingi* we have no know-*at* all.

*erbitaceae*, though not included under any of *ore heads*, are a very frequent order in Syria. *sa* the immense crops of melons, gourds, and *is* *ina*, the colocynth apple, which yields the *is* drug, is common in some parts, while even *sa* is the Squinting Cucumber (*Ecballium elae-* *agium*).

*Plants* that contribute largely to that showy *ter* for which the herbage of Palestine is *sa*, may be mentioned *Adonis*, *Ranunculus* *cus*, and others; *Anemone coronaria*, poppies, *sa*, *Matthiola*, *Malcolmia*, *Alyssum*, *Bi-* *um*, *Helianthemum*, *Cistus*, the caper plant, *pinks*, *Silene*, *Saponaria*, and *Gypsophila*; *sa* *Phloxes*, mallows, *Lavatera Hyssericum*;

many geraniums, *Erodium*, and *Leguminosae*, and *Labiatae* far too numerous to individualize; *Scabiosa*, *Cephalaria*, *chrysanthemum*, *Pyrethrum*, *Inulas*, *Achilleas*, *Calendulas*, *Centaureas*, *Trago-* *pogons*, *Scorzoneras*, and *Crepis*; many noble *Cam-* *panulas*, *cyclamens*, *Convolutis*, *Anchusas*, *Ono-* *mas*, and *Echiums*, *Acanthus*, *Verbascum* (most *conspicuously*), *Veronicas*, *Celsias*, *Hyoscyamus*; many *Arums* in autumn, orchis and *Ophrys* in *spring*; *Narcissus*, *Tazetta*, *irises*, *Pancratiums*, *Sternbergia*, *Gladiolus*; many beautiful crocuses and colchicums, squills, *Tulipa oculus-solis*, *Gageas*, *fritillaries*, *Alliums*, Star of Bethlehem, *Muscarias*, white lily, *Hyacinthus orientalis*, *Bellevalias*, and *Asphodeli*.

With such gay and delicate flowers as these, in *numberless* combinations, the ground is almost *carpeted* during spring and early summer; and as *in* similar hot and dry, but still temperate climates, *as* the Cape of Good Hope and Australia, they often *colour* the whole landscape, from their lavish *abundance*.

II. *Botany of Eastern Syria and Palestine*.— *Little* or nothing being known of the flora of the *range* of mountains east of the Jordan and Syrian *desert*, we must confine our notice to the valley of *the Jordan*, that of the Dead Sea, and the country *about Damascus*.

Nowhere can a better locality be found for show-*ing* the contrast between the vegetation of the *eastern* and western districts of Syria than in the *neighbourhood* of Jerusalem. To the west and *south* of that city the valleys are full of the dwarf *oak*, two kinds of *Pistacia*, besides *Smilax*, *Arbutus*, *rose*, Aleppo Pine, *Rhamnus*, *Phylliraea*, bramble, and *Crataegus Aromia*. Of these the last alone is *found* on the Mount of Olives, beyond which, east-*ward* to the Dead Sea, not one of these plants appears, *nor* are they replaced by any analogous ones. For *the first* few miles the olive groves continue, and *here* and there a carob and lentisk or sycamore *recurr*, but beyond Bethany these are scarcely seen. *Naked* rocks, or white chalky rounded hills, with *bare* open valleys, succeed, wholly destitute of copse, *and* sprinkled with sterile-looking shrubs of *Salsolas*, *Cappariidene*, *Zygophyllum*, *rues*, *Fayonia*, *Poly-* *gonum*, *Zizyphus*, tamarisks, alhagi, and *Artemisia*. *Herbaceous* plants are still abundant, but do not *form* the continuous sward that they do in Judea. *Amongst* these, *Borragineae*, *Alminae*, *Fayonia*, *Poly-* *gonum*, *Crotophora*, *Euphorbus*, and *Leguminosae* *are* the most frequent.

On descending 1000 feet below the level of the *sea* to the valley of the Jordan, the subtropical and *desert* vegetation of Arabia and West Asia is en-*countered* in full force. Many plants wholly foreign *to* the western district suddenly appear, and the *flora* is that of the whole dry country as far *east* as the Panjab. The commonest plant is the *Zizyphus Spina-Christi*, or *sukb* of the Arabs, *forming* bushes or small trees. Scarcely less abun-*dant*, and as large, is the *Balanites Aegyptiaca*, *whose* fruit yields the oil called *suk* by the Arabs, *which* is reputed to possess healing properties, and *which* may possibly be alluded to as Balm of Gilead. *Tamarisks* are most abundant, together with *Rhus* (*Syriaca*?), conspicuous for the bright green of its *few* small leaves, and its exact resemblance in foliage, *bark*, and habit to the true Balm of Gilead, the *Amyris Gileadensis* of Arabia. Other most abun-*dant* shrubs are *Ochradeus baccatus*, a tall, bran-*ching*, almost leafless plant, with small white berries

and the twiggy, leafless broom called *Betuma*. *Acacia Farnesiana* is very abundant, and celebrated for the delicious fragrance of its yellow flowers. It is chiefly upon it that the superb misletoe, *Loranthus Acaciæ*, grows, whose scarlet flowers are brilliant ornaments to the desert during winter, giving the appearance of flame to the bushes. *Capparis spinosa*, the common caper-plant, flourishes everywhere in the Jordan valley, forming clumps in the very arid rocky bottoms, which are conspicuous for their pale-blue hue, when seen from a distance. *Athagi matorum* is extremely common; as is the prickly *Solanum Sodomeum*, with purple flowers and globular yellow fruits, commonly known as the Dead Sea apple.

On the banks of the Jordan itself the arboreous and shrubby vegetation chiefly consists of *Populus Euphratica* (a plant found all over Central Asia, but not known west of the Jordan), tamarisk, *Oxyris alba*, *Periploca*, *Acacia vera*, *Prosopis Stephaniæna*, *Arundo Donax*, *Lycium*, and *Capparis spinosa*. As the ground becomes saline, *Atriplex Halimus* and large *Statice* (sea-pinks) appear in vast abundance, with very many succulent shrubby *Salsolus*, *Salicornias*, *Suaedas*, and other allied plants to the number of at least a dozen, many of which are typical of the salt depressions of the Caspian and Central Asia.

Other very tropical plants of this region are *Zygophyllum coccineum*, *Boerhaavia*, *Indigofera*; several *Astragali*, *Cassias*, *Gymnocarpum*, and *Nitraria*. At the same time thoroughly European forms are common, especially in wet places; as dock, mint, *Veronica Anagallis*, and *Stium*. One remote and little-visited spot in this region is particularly celebrated for the tropical character of its vegetation. This is the small valley of Engeli (Ain-jisti), which is on the west shore of the Dead Sea, and where alone, it is said, the following tropical plants grow:—*Sida nutica* and *Asiatica*, *Calotropis procera* (whose bladdery fruits, full of the silky coma of the seeds, have even been assumed to be the Apple of Sodom), *Annona*, *Batatas littoralis*, *Aerva javanica*, *Pluchea Theocordis*.

It is here that the *Salvadora Persica*, supposed by some to be the mustard-tree of Scripture, grows: it is a small tree, found as far south as Abyssinia or Aden, and eastward to the peninsula of India, but is unknown west or north of the Dead Sea. The late Dr. Royle—unaware, no doubt, how scarce and local it was, and arguing from the pungent taste of its bark, which is used as horse-radish in India—supposed that this tree was that alluded to in the parable of the mustard-tree; but not only is the pungent nature of the bark not generally known to the natives of Syria, but the plant itself is so scarce, local, and little known, that Jesus Christ could never have made it the subject of a parable that would reach the understanding of His hearers.

The shores immediately around the Dead Sea present abundance of vegetation, though almost wholly of a saline character. *Juncus maritimus* is very common in large clumps, and a yellow-flowered groundsel-like plant, *Julia crithuoides* (also common on the rocky shores of Tyre, Sidon, &c.), *Spergularia maritima*, *Atriplex Halimus*, *Balanites Aegyptiaca*, several shrubby *Suaedas* and *Salicornias*, *Tamarix*, and a prickly-leaved grass (*Festuca*), all grow more or less close to the edge of

the water; while of non-saline plants the *Solanum Sodomeum*, *Tamarix*, *Centaurea*, and immense brakes of *Arundo Donax* may be seen all around.

The most singular effect is however experienced in the re-ascent from the Dead Sea to the hills on the N.W. shore, which presents first a sudden sharp rise, and then a series of vast water-worn terraces at the same level as the Mediterranean. Thence this ascent such familiar plants of the latter region are successively met with as *Pteridium aquilinum*, *Anchusa*, pink, *Hypericum*, *Fraxinæ*, &c., but no trees are seen till the longitude of Jerusalem is approached.

III. *Flora of the Middle and Upper Mountain Regions of Syria*.—The oak forms the principal arboreous vegetation of this region below 3000 ft. The *Quercus pseudo-coccifera* and *infectoria* is not seen much above 3000 feet, nor the *Valea* at all at so great an elevation; but above these limits some magnificent species occur, including the *Quercus Cerris* of the South of Europe, the *Q. Eberbergii*, or *contumeliosa*, *Q. Toza*, *Q. Libani*, and *Q. mannifera*, Lincl., which is perhaps not distinct from some of the forms of *Q. Libani*, or *sessilifera*?

At the same elevations *Juniperus* become common, but the species have not been satisfactorily made out. The *Juniperus communis* is found, but is not so common as the tall, straight, black red (*J. excelsa*, or *fortitissima*). On Mount Casius the *J. drupacea* grows, remarkable for its large pear-like fruit; and *J. Sabina*, *phœnicea*, and *aspidifolia* are all said to inhabit Syria. But the most remarkable plant of the upper region is certainly the cedar, for which we must refer the reader to the article CEDAR.\*

Lastly, the flora of the upper temperate and alpine Syrian mountains demands some notice. As before remarked, no part of the Lebanon presents a vegetation at all similar, or even analogous, to that of the Alps of Europe, India, or North America. This is partly owing to the hot and extreme dryness of the climate during a considerable part of the year, to the sudden descending influence of the desert winds, and to the sterile nature of the dry limestone soil on the highest summits of Lebanon, Hermon, and the Anti-Lebanon; but perhaps still more to a warm period having succeeded to that cold one during which the glaciers were fused (whose former presence is attested by the moraine in the cedar valley and elsewhere), and which may have obliterated almost every trace of the glacial flora. Hence it happens that far more useful plants may be gathered on the Himalaya at 10,000 ft. elevation, than at the analogous heights on Lebanon of 8-10,000 ft.; and that whilst truly boreal plants belonging to the Arctic circle inhabit the range of North India, not half that number are found on the Lebanon, though those mountains are in a far higher latitude.

At the elevation of 4000 feet on the Lebanon many plants of the middle and northern mountains of Europe commence, amongst which the most conspicuous are hawthorn, dwarf elder, dogwood, or butcher's broom, a variety of the heberry, butter-suckle, maple, and jasmine. A little higher, at 5-7000 ft., occur *Coloneaster*, *Rhododendron geniculatum*, primrose, *Daphne Oleoides*, several other *Pteridium*, *Juniperus communis*, *fortitissima*, or *excelsa*, and cedar. Still higher, at 7-10,000 ft.

\* For some notices of the oaks of Syria, see *Transactions of the Linn. Society*, xliii. 221, and pages 26-38.

\* See also Dr. Hooker's paper 'On the Climate and Flora,' &c., in the *Nat. Hist. Review*, No. 6; vol. 1, p. 420.

there is no shrubby vegetation, properly so called. What shrubs there are form small, rounded, harsh, prickly bushes, and belong to genera, or forms of genera, that are almost peculiar to the dry mountain regions of the Levant and Persia, and West Asia generally. Of these *Astragali* are by far the most numerous, including the *A. Tragacantha*, which yields the famous gum in the greatest abundance; and next to them a curious tribe of *Statice* called *Acantholimon*, whose rigid, pungent leaves spread like stars over the whole surface of the plant; and, lastly, a small white chenopodiaceous plant called *Noaea*. These are the prevalent forms up to the very summit of Lebanon, growing in globular masses on the rounded flank of Dhar-el-Khodib itself, 10,200 ft. above the sea.

At the elevation of 8-9000 ft. the beautiful silvery *Vicia camecensis* forms large tufts of pale blue, where scarcely anything else will grow.

The herbaceous plants of 7-10,000 ft. altitude are still chiefly Levantine forms of *Campanula*, *Banunculus*, *Corydalis*, *Draba*, *Silene*, *Arenaria*, *Saponaria*, *Geranium*, *Erodium*, several *Umbellifera*, *Galiuna*, *Eriogonum*, *Scorzonera*, *Turazacum*, *Androsace*, *Scrophularia*, *Nepeta*, *Sideritis*, *Asphodeline*, *Crocus*, *Ornithogalum*; and a few grasses and sedges. No gentians, heaths, *Primulas*, saxifragas, anemones, or other alpine favourites, are found.

The most boreal forms, which are confined to the clefts of rocks, or the vicinity of patches of snow above 9000 ft., are *Drabas*, *Arenaria*, one small *Potentilla*, a *Festuca*, an *Arabis* like *alpina*, and the *Oxyria reniformis*, the only decidedly Arctic type in the whole country, and probably the only characteristic plant remaining of the flora which inhabited the Lebanon during the glacial period. It is, however, extremely rare, and only found growing under stones, and in deep clefts of rocks, on the very summit, and near the patches of snow on Dhar-el-Khodib.

No doubt Cryptogamic plants are sufficiently numerous in this region, but none have been collected, except ferns, amongst which are *Cystopteris fragilis*, *Polypodium vulgare*, *Nephrodium pallidum*, and *Polystichum angulare*. [J. D. H.]

**ZOOLOGY.**—Much information is still needed on this subject before we can possibly determine with any degree of certainty the fauna of Palestine; but, the complaint of Linneus in 1747, that we are less acquainted with the Natural History of Palestine than with that of the remotest parts of Asia, is almost as just now as it was when the remark was made. "There is perhaps," writes a recent visitor to the Holy Land, "no country more neglected by travellers whose fauna is so little known as that of Palestine" (*Ibid.*, i. 22); indeed, the complaint is general amongst zoologists.

It will be sufficient in this article to give a general survey of the fauna of Palestine, as the reader will find more particular information in the various articles which treat of the various animals or their respective names.

**Mammalia.**—The *Chiroptera* (bats) are prominently represented in Palestine by the species which are known to occur in Egypt and Syria, but we

want precise information on this point. [BAT.] Of the *Insectivora* we find hedgehogs (*Eriacus europæus*) and moles (*Talpa vulgaris*, *T. caeca* (?)), which are recorded to occur in great numbers and to commit much damage (Hasselquist, *Trav.* p. 120); doubtless the family of *Soricidae* (Shrews) is also represented, but we lack information. Of the *Carnivora* are still seen, in the Lebanon, the Syrian bear (*Ursus Syriacus*),\* and the panther (*Leopardus varius*), which occupies the central mountains of the land. Jackals and foxes are common; the hyena and wolf are also occasionally observed; the badger (*Meles taxus*) is also said to occur in Palestine;<sup>b</sup> the lion is no longer a resident in Palestine or Syria, though in Biblical times this animal must have been by no means uncommon, being frequently mentioned in Scripture. [LION.] The late Dr. Roth informed Mr. Tristram that bones of the lion had recently been found among the gravel on the banks of the Jordan not far south of the Sea of Galilee. A species of squirrel (*Sciurus Syriacus*), which the Arabs term *Orkidan*, "the leaper," has been noticed by Hemprich and Ehrenberg on the lower and middle parts of Lebanon; two kinds of hare, *Lepus Syriacus*, and *L. Aegyptius*; rats and mice, which are said to abound, but to be partly kept down by the tame Persian cats; the jerboa (*Dipus Aegyptius*); the porcupine (*Hystrix cristata*); the short-tailed field-mouse (*Arvicola agrestis*), a most injurious animal to the husbandman, and doubtless other species of *Custodius*, may be considered as the representatives of the *Rodentia*. Of the *Pachydermata*, the wild boar (*Sus scrofa*), which is frequently met with on Tabor and little Hermon, appears to be the only living wild example. The Syrian hyrax appears to be now but rarely seen. [CONY, APPENDIX A.]

There does not appear to be at present any wild ox in Palestine, though it is very probable that in Biblical times some kind of *Urus* or *Bison* roamed about the hills of Bashan and Lebanon. [UNICORN.] Dr. Thomson states that wild goats (*Ilex* ?) are still (see 1 Sam. xxiv. 2) frequently seen in the rocks of Engedi. Mr. Tristram possesses a specimen of *Capra Aegagrus*, the Persian ibex, obtained by him a little to the south of Hebron. The gazelle (*Gazella dorcas*) occurs not unfrequently in the Holy Land, and is the antelope of the country. We want information as to other species of antelopes found in Palestine: probably the variety named, by Hemprich and Ehrenberg, *Antelope Arabica*, and perhaps the *Gazella subellina* belong to the fauna. The Arabs hunt the gazelles with greyhound and falcon; the fallow-deer (*Dama vulgaris*) is said to be not unfrequently observed.

Of domestic animals we need only mention the Arabian or one-humped camel, asses, and mules, and horses, all which are in general use. The buffalo (*Bubalus bubalis*) is common, and is on account of its strength much used for ploughing and draught purposes. The ox of the country is small and unsightly in the neighbourhood of Jerusalem, but in the richer pastures of the upper part of the country, the cattle, though small, are not unsightly, the head being very like that of an Alderney; the common

\* There is some little doubt whether the brown bear (*U. arctos*) may not occasionally be found in Palestine. Dr. Schubert (*Reise in das Morgenland*).

<sup>b</sup> Col. H. Smith, in Kitchin's 'Cyc. art. 'Badger,' denies that the badger occurs in Palestine, and says it has not yet been found out of Europe. This animal, however, is certainly an inhabitant of certain parts of Asia; and is mentioned, together with wolves, jackals, porcupines, &c., by Mr. H. Paule as abounding at Hebron (see *See-through Journal* for 1866, p. 53).

sheep of Palestine is the broad-tail (*Ovis laticaudatus*), with its varieties [SHEEP]; goats are extremely common everywhere.

**Birds.**—Palestine abounds in numerous kinds of birds. Vultures, eagles, falcons, kites, owls of different kinds, represent the *Raptorial* order. Of the smaller birds may be mentioned, amongst others, the *Merops Persicus*, the *Upupa Epops*, the *Sitta Syriacus* or Dalmatian nuthatch, several kinds of *Silviidae*, the *Cinnyris osea*, or Palestine sunbird, the *Ixos xanthopygus*, Palestine nightingale,—the finest songster in the country, which long before sunrise pours forth its sweet notes from the thick jungle which fringes the Jordan; the *Amythus Tristramii*, or glossy starling, discovered by Mr. Tristram in the gorge of the Kedron not far from the Dead Sea, "the roll of whose music, something like that of the organ-bird of Australia, makes the rocks resound"—this is a bird of much interest, inasmuch as it belongs to a purely African group not before met with in Asia; the sly and wary *Crotopus chalybeus*, in the open wooded district near Jericho; the jay of Palestine (*Garrulus melanocephalus*); kingfishers (*Ceryle rudis*, and perhaps *Alcedo eschida*) abound about the Lake of Tiberias and in the streams above the Huleh; the raven, and carrion crow; the *Pastor roseus*, or locust-bird [see LOCUST]; the common cuckoo; several kinds of doves; sandgrouse (*Pterocles*), partridges, francolins, quails, the great bustard, storks, both the black and white kinds, seen often in flocks of some hundreds; herons, auweas, pelicans, sea-swallows (*Sterna*), gulls, &c. &c. For the ornithology of the Holy Land the reader is referred to Hemprich and Elmenberg's *Symbolae Physicae* (Berlin, 1820-25), and to Mr. Tristram's paper in the *Ibis*, i. 22.

**Reptilia.**—Several kinds of lizards (*Sauri*) occur. The *Lacerta stellio*, Lin., which the Arabs call *Hardan*, and the Turkes kill, as they think it mimics them saying their prayers, is very common in ruined walls. The *Varan el hard* (*Psammognathus scincus*) is very common in the deserts. The common Greek tortoise (*Testudo Graeca*) Dr. Wilson observed at the sources of the Jordan; fresh-water tortoises (probably *Emys Caspica*) are found abundantly in the upper part of the country in the streams of Esdraelon and of the higher Jordan valley, and in the lakes. The chameleon (*Chamaeleo vulgaris*) is common; the crocodile does not occur in Palestine; the *Monitor Niloticus* has doubtless been confounded with it. In the south of Palestine especially reptiles of various kinds abound; besides those already mentioned, a large *Acanthodactylus* frequents old buildings; a large species of *Uromastix*, at least two species of *Gekko* (*Tarentola*), a *Hemiphyllus ocellatus*?, several other *Acanthodactylus* and *Seps tridactylus* have been observed. Of *Ophiidians*, there is more than one species of *Echidna*; a *Naja*, several *Tropidonotus*, a *Coronella*, a *Coleber* (*trixipatus*?) occur; and on the southern frontier of the land the desert fern *Cerastes Hasselquistii* has been observed. Of the *Batrachia* we have little information beyond that supplied by Kitto, viz. that frogs (*Rana aculeata*) abound in the marshy pools of Palestine; that they are of a large size, but are not eaten by

the inhabitants. The tree-frog (*Hyla*) and toad (*Bufo*) are also very common.

**Fishes.**—Fish were supplied to the inhabitants of Palestine both from the Mediterranean and from the inland lakes, especially from the Lake of Tiberias. The men of Tyre brought fish and sold on the Sabbath to the people of Jerusalem (Neh. xiii. 16). The principal kinds which are caught off the shores of the Mediterranean are supplied by the families *Sparidae*, *Percaidae*, *Scorpaenidae*, *Eleutheroideae*, and *Pleuronectidae*. The Sea of Galilee has long always celebrated for its fish. Burckhardt (Seyl. 332) says the most common species are the *huay* (*Cyprinus lepidotus*), frequent in all the fresh waters of Palestine and Syria, and a fish called *Mas*, which he describes as being a foot long and 5 inches broad, with a flat body like the sole. The *huay* is a species of barbel; it is the *Barbus Rindi* of Cut and Valenci, and is said by Lyce to attain sometimes to a weight of 70 lbs.; it is common in the Nile, and is said to occur in all the fresh waters of Syria; the *Mas* is undoubtedly a species of *Chromis*, one of the *Labridae*, and is perhaps identical with the *Niloticus*, which is frequently represented on Egyptian monuments. The fish of this lake are, according to old tradition, nearly identical with the fish of the Nile; but we sadly want accurate information on this point. As to the fishes of Egypt and Syria, see Kuppell, E., *Neue Fische des Nils*, in *Verhandl. Senckenberg. Gesellsch. Frankf.*, and Heesl, J., *Die Fische Syriens*, in *Russischer Reise nach Syrien und Klein Asien*. There does not appear to be any separate work published on the fishes of the Holy Land.

Concerning the other divisions of the animal kingdom we have little information. *Molluscs* are numerous; indeed in few areas of similar extent could so large a number of land molluscs be found. Mr. Tristram collected casually, and without much upwards of 100 species in a few weeks. The land shells may be classified in four groups. In the north of the country the prevailing type is that of the Greek and Turkish mountain region, numerous species of the genus *Clavus*, and of *omphalus* *bulani* and *Pupa* predominating. On the coast and in the plains the common shells of the East Mediterranean basin abound, e.g. *Helix Pannu*, *H. Spencei*, &c. In the south, in the hill country of Judah, occurs a very interesting group, chiefly confined to the plain *Helix*, three subdivisions of which may be traced by *H. Doumeri*, *H. Sectena*, *H. tuberosa*, recalling by their thick, calcareous, lustrous surface the prevalent types of Egypt, Arabia, and Saba. In the valley of the Jordan the prevailing group is a subdivision of the genus *Paludina*, rounded, emarginate, and lustrous, very numerous in species which are for the most part peculiar to this district. The reader will find a list of *Mollusca* found in the neighbourhood of Jerusalem, in the *Ann. Mag. Nat. Hist.* vi. No. 84, p. 312. The following remark of a resident in Jerusalem may be mentioned: "No shells are found in the Dead Sea in its margin except the bleached specimens of *Melampus Neritinae*, and various *Unionidae*, which have been washed down by the Jordan, and afterwards drifted on shore. In fact, so intense is the brackish quality of its waters that no molluscs, nor, so far as I know, any other living creature, can stand in it."

\* This statement with regard to the total absence of aquatic life in the Dead Sea is confirmed by a most every traveller, and there can be no doubt as to its general accuracy. It is, however, but right to state that Mr. H.

Poole discovered some small fish in a brackish spring, about 100 yds. distant from, and 30 ft. above the level of the Dead Sea, which he was studying in thick mud taken produced from fish in the sea (see *Geograph. Journal* for 1861).

be typified by *B. Jordani* and *B. Alep-*  
the *Crustacea* we know scarcely any-  
Lindsay observed large numbers of a  
in the sands near Akala. Hasselquist  
speaks of a "running crab" seen by  
coasts of Syria and Egypt. Dr. Baird has  
*n. and Mag. N. H.* viii. No. 45, p. 209)  
an interesting form of *Entomostracous*,  
which he terms *Branchipus Eximius*,

other species of this group are described  
in the *Am. and Mag. N. H.* for Oct.  
in regard to the *insects*, a number of beetles  
figured in the *Symbolæ Physiæ*.

*Lepidoptera* of Palestine are as numerous and  
might have been expected in a land of  
All the common butterflies of southern  
nearly allied congeners, are plentiful in  
the plains and on the hill-sides. Nu-  
cies of *Polymnatus* and *Lucerna*, *The-*  
*onidæ acacis*; many kinds of *Pontia*, the  
*locustis Euphros* abounds on the lower  
ing, as does *Parnassius Apollinus*; more  
series of *Thais* occurs; the genera *Argyn-*  
*elitia* are abundantly represented, not  
*Asis*, owing probably to the comparative  
the soil. *Lilythea* (*Celtis*?) is found,  
ugeous genus *Vincosa* is very common  
able localities; the almost cosmopolitan  
*ardus* and *Vincosa Atakuta*, *V. L.*  
*V. Antiope*, may be mentioned; *Pan-*  
*nor* and some others of the same species  
the plains of Sharon, and the caterpillar  
gnificant *Sphinx Neri* feeds in swarms  
rampers by the banks of the Jordan.  
common. [BEE.] At least three species  
s have been distinguished. Spiders are  
The *Abu Hanakein*, noticed as occurring

Burckhardt, which appears to be some  
*idolodex*, one of the Solpugidae, probably  
and in Palestine. Locusts occasionally  
time and do infinite damage. Ants are  
some species are described in the *Journal*  
*Acad. Soc. Sci.* vi. No. 21, which were col-  
fr. Hanbury in the autumn of 1860. Or-  
*di* we have no information; while of the  
kingdoms of *Coelenterata* and *Protozoa*  
pletely ignorant.

Heu remarked that in its physical character  
resents on a small scale an epitome of the  
atures of all regions, mountainous and  
thern and tropical, maritime and inland,  
rable, and volcanic. This fact, which has  
re allusions in the Scriptures so varied as  
miliar illustrations to the people of every  
s had its natural effect on the zoology of  
r. In no other district, not even on the  
opes of the Himalayah, are the typical  
many distinct regions and zones brought  
close juxtaposition. The bear of the

snowy heights of Lebanon and the gazelle of the  
desert may be hunted within two days' journey of  
each other; sometimes even the ostrich approaches  
the southern borders of the land; the wolf of the  
north and the leopard of the tropics howl within  
hearing of the same bivouac; while the falcons, the  
linnets, and buntings, recall the familiar inhabit-  
ants of our English fields, the sparkling little sun-  
bird (*Cinnyris osea*), and the grackle of the glee.  
(*Amydrus Tristramii*) introduce us at once to the  
most brilliant types of the bird life of Asia and  
S. Africa.

Within a walk of Bethlehem, the common frog  
of England, the chameleon, and the gecko of Africa,  
may be found almost in company; and descending to  
the lower forms of animal life, while the northern  
valleys are prolific in *Clavulus* and other genera  
of molluscs common to Europe, the valley of the  
Jordan presents types of its own, and the hill  
country of Judaea produces the same type of *Helices*  
as is found in Egypt and the African Sahara. So  
in insects, while the familiar forms of the butter-  
flies of Southern Europe are represented on the plain  
of Sharon, the Apollo butterfly of the Alps is recalled  
on Mount Olivet by the exquisite *Parnassius Apol-*  
*linus* hovering over the same plants as the sparkling  
*Thais medicata* and the *Lilythea* (*Celtis*?), northern  
representatives of sub-tropical lepidoptera.

If the many travellers who year by year visit  
the Holy Land would pay some attention to its  
zoology, by bringing home collections and by in-  
vestigations in the country, we should soon hope  
to have a fair knowledge of the fauna of a land  
which in this respect has been so much neglected,  
and should doubtless gain much towards the eluci-  
dation of many passages of Holy Scripture. [W. H.  
and H. B. TRISTRAM.]

THE CLIMATE.—No materials exist for an ac-  
curate account of the Climate of the very different  
regions of Palestine. Besides the casual notices of  
travellers (often unscientific persons), the following  
observations are all that we possess:—

(1.) Average monthly temperatures at Jerusa-  
lem, taken between June 1851, and Jan. 1855  
inclusive, by Dr. R. G. Barclay, of Beyrout and  
Jerusalem, and published by him in a paper 'On  
the State of Medical Science in Syria,' in the  
*N. American Medical-Chirurgical Review* (Phila-  
delphia, vol. i. 705-718.<sup>4</sup>

(2.) A set of observations of temperature, 206 in  
all, extending from Nov. 19, 1838, to Jan. 16, 1839,  
taken at Jerusalem, Jaffa, Nazareth, and Beyrout,  
by Russegger, and given in his work (*Reisen*, iii.  
170-185).

(3.) The writer is indebted to his friend Mr. James  
Glaisher, F.R.S., for a table shewing the mean tem-  
perature of the air at Jerusalem for each month,  
from May, 1843, to May, 1844<sup>5</sup>; and at Beyrout,  
from April, 1842, to May, 1845.

have been identified by Sir J. Richardson with  
*Hammonia*, *Uv. et Val.* xvii. 169; see *Pro-*  
*g. Soc.* for 1856, p. 371. Mr. Tristram observed  
and in the Sahara *Cypripedium diaphanum* in hot  
where the water was shallow, but that these  
were found in deep pools or lakes. Mr. Poole  
so a number of aquatic birds diving from  
the Dead Sea, and thence concluded, justly,  
as he thinks, "that they must have found  
table there." It would, moreover, be an in-  
teresting question to determine whether some species of

*Artemia* (brine-shrimp) may not exist in the shallow pools  
at the extreme south end of the Salt Lake. In the open  
tanks at Lynton myriads of these transparent little  
brine-shrimps (they are about half an inch in length) are  
seen swimming actively about in water every pint of which  
contains as much as a quarter of a pound of salt!

<sup>4</sup> These observations are inserted in Dr. Barclay's work  
(*City of the Great King*, 428), and are accompanied by his  
comments, the result of a residence of several years in  
Jerusalem (see also pp. 42-46).

<sup>5</sup> There is considerable variation in the above three sets

(4.) Register of the fall of rain at Jerusalem from 1846 to 1849, and 1850 to 1854, by Dr. R. G. Barclay (as above).

1. *Temperature.*—The results of these observations at Jerusalem may be stated generally as follows. January is the coldest month, and July and August the hottest, though June and September are nearly as warm. In the first-named month the average temperature is  $49^{\circ}\cdot 1$  Fahr., and greatest cold  $28^{\circ}$ ; in July and August the average is  $78^{\circ}\cdot 4$ ; with greatest heat  $92^{\circ}$  in the shade and  $143^{\circ}$  in the sun. The extreme range in a single year was  $52^{\circ}$ ; the mean annual temperature  $65^{\circ}\cdot 6$ . Though varying so much during the different seasons, the climate is on the whole pretty uniform from year to year. Thus the thermometric variation in the same latitude on the west coast of North America is nearly twice as great. The isothermal line of mean annual temperature of Jerusalem passes through California and Florida (to the north of Mobile), and Dr. Barclay remarks that in temperature and the periodicity of the seasons there is a close analogy between Palestine and the former state. The isothermal line also passes through Gibraltar, and near Madeira and the Bermudas. The heat, though extreme during the four midsummer months, is much alleviated by a sea-breeze from the N.W., which blows with great regularity from 10 A.M. till 10 P.M.; and from this and other unexplained causes the heat is rarely oppressive, except during the occasional presence of the Khamsin or sirocco, and is said to be much more bearable than even in many parts of the western world<sup>1</sup> which are deemed tropical. The Khamsin blows during February, March, and April (Wilckenbruch). It is most oppressive when it comes from the east, bearing the heat and sand of the desert with it, and during its continuance darkening the air and filling everything with fine dust (Miss Beaufort, li. 223).

During January and February snow often falls to the depth of a foot or more, though it may not make its appearance for several years together. In 1854-5 it remained on the ground for a fortnight.<sup>2</sup>

of observations, as will be seen from the following comparative table of the mean temperatures of Jerusalem:—

Month.	(1.)	(2.)	(3.)
Jan.	49·4		47·7
Feb.	54·4		53·7
March	55·7		50·
April	61·4		54·7
May	73·4		66·8
June	75·2		71·7
July	79·1		77·3
Aug.	79·3		72·6
Sept.	77·	(Mean of 67 obs. from Nov. 10 to Dec. 5.)	72·2
Oct.	74·2		68·4
Nov.	63·8		58·9
Dec.	54·5	52·	47·4
Mean for the year	66·5		62·6

It is understood that a regular series of observations, with standard Barometer, Thermometer, and Rain-gauge, was made for 10 years by the late Dr. McGowan of the Hospital, Jerusalem, but the record of them has unfortunately been mislaid.

<sup>1</sup> Barclay, 48; Rob. B. R. i. 430; also Schwarz, 327.

<sup>2</sup> *Jerusalem Intelligence*, 1856, p. 137, note.

Nor is this of late occurrence only, but is reported by Shaw in 1722. In 1818 it was between two and three feet deep.<sup>3</sup> In 1754 a heavy fall lay in place, and twenty-five persons are said to have been frozen to death at Nazareth.<sup>4</sup> Snow is repeatedly mentioned in the poetical books of the Bible, as must therefore have been known at that time (Ps. lxxviii. 14, cxlviii. 16; Is. lv. 10, &c.). For a the narrative it only appears twice (1 Mac. xii. 22; 2 Sam. xxiii. 20).

Thin ice is occasionally found on pools or deep of water; and pieces of ground out of the road if the sun's rays remain sometimes slightly frozen in several days. But this is a rare occurrence, and no injury is done to the vegetation by frost, as no plants require shelter during winter (Barclay).

Observations made at Jerusalem are not applicable to the whole of the highland, as is shown from Russeger's at Nazareth. These show to be the result of fifty-five observations, extending from 15 to 26; highest temp.  $58^{\circ}\cdot 5^{\circ}$ , lowest  $37^{\circ}$ , and  $53^{\circ}$ , all considerably lower than those taken at Jerusalem a fortnight before.

2. *Rain.*—The result of Dr. Barclay's observations is to show that the greatest fall of rain at Jerusalem in a single year was 85 inches,<sup>5</sup> and the smallest 44, the mean being 61·6 inches. The greatest fall in any one month (Dec. 1854) was 33·8, and the greatest in three months (Dec. 1854, Jan. and Feb. 1851) 72·4. These figures will be best appreciated by recollecting that the average rain-fall of London during the whole year is only 25 inches, and that in the wettest parts of the country, such as Cumberland and Devon, it only exceeds 60 inches.

As in the time of our Saviour (Luke vi. 34), the rains come chiefly from the S. or S.W. They commence at the end of October or beginning of November, and continue with greater or less continuance till the end of February or middle of March, and occasionally, though rarely, till the end of April. It is not a heavy continuous rain, so much as a succession of severe showers or storms with intervening periods of fine bright weather, permitting the grain crops to grow and ripen. And although the season is not divided by an entire cessation of rain for a lengthened interval, as some represent, yet there appears to be a diminution in the fall for a few weeks in December and January, after which it begins again, and continues during February and till the conclusion of the season. On the uplands the winter harvest (which precedes the wheat) should be about the last week of May, so that it is protected by five or six weeks of summer weather, the falling-off in the rain during the winter being very prejudicial to the harvest; and, as in the words of the prophet Amos, nothing could so easily occasion the greatest distress or be so hurtful to them as a drought three months before harvest (Amos iv. 7).

There is much difference of opinion as to whether the former and the latter rain of Scripture are represented by the beginning and end of the present rainy season, separated by the slight interval

<sup>3</sup> "1 Elle hoch," Scholz, quoted by Van Eschoten, 73.

<sup>4</sup> S. Scholz, quoted by Van Eschoten, Scholz, 20.

<sup>5</sup> Here again there is a considerable discrepancy. Dr. Mr. Poole (*Geogr. Journal*, xvi. 21) states that Dr. McGowan had registered the greatest quantity of rain at 106 inches.

tioned above (e. g. Kenrick, *Phœnicia*, 33), or whether, as Dr. Barclay (*City*, &c. 54) and others affirm, the latter rain took place after the harvest, about midsummer, and has been withheld as a punishment for the sins of the nation. This will be best discussed under RAIN.

Between April and November there is, with the rarest exceptions, an uninterrupted succession of fine weather, and skies without a cloud. Thus the year divides itself into two, and only two, seasons—as indeed we see it constantly divided in the Bible—"winter and summer," "cold and heat," "seed-time and harvest."

During the summer the dews are very heavy, and often saturate the traveller's tent as if a shower had passed over it. The nights, especially towards sunrise, are very cold, and thick fogs or mists are common all over the country. Thunder-storms of great violence are frequent during the winter months.

3. So much for the climate of Jerusalem and the highland generally. In the lowland districts, on the other hand, the heat is much greater and more oppressive,<sup>1</sup> owing to the quantity of vapour in the atmosphere, the absence of any breeze, the sandy nature of the soil, and the manner in which the heat is confined and reflected by the enclosing heights; perhaps also to the internal heat of the earth, due to the depth below the sea level of the greater part of the Jordan valley, and the remains of volcanic agency, which we have already shown to be still in existence in this very depressed region [p. 681a]. No indication of these conditions is discoverable in the Bible, but Josephus was aware of them (*B. J.* iv. 8, §3), and states that the neighbourhood of Jericho was so much warmer than the upper country that linen clothing was worn there even when Judæa was covered with snow. This is not quite confirmed by the experience of modern travellers, but it appears that when the winter is at its severest on the highlands, and both eastern and western mountains are white with snow, no frost visits the depths of the Jordan valley, and the greatest cold experienced is produced by the driving rain of tempests (Seetzen, Jan. 9, ii. 300). The vegetation already mentioned as formerly or at present existing in the district—palms, indigo, sugar—testifies to its tropical heat. The harvest in the Ghor is fully a month in advance of that on the highlands, and the fields of wheat are still green on the latter when the grain is being threshed in the former (*Rob. B. R.* i. 431, 551, *iii.* 314). Thus Burckhardt on May 5 found the barley of the district between Tiberias and Beisan nearly all harvested, while on the upland plains of the Hauran, from which he had just descended, the harvest was not to commence for fifteen days. In this fervid and moist atmosphere irrigation alone is

necessary to ensure abundant crops of the finest grain (*Rob. i.* 550).

4. The climate of the maritime lowland exhibits many of the characteristics of that of the Jordan valley,<sup>2</sup> but, being much more elevated, and exposed on its western side to the sea-breezes, is not so oppressively hot. Russeger's observations at Jaffa (*Dec.* 7 to 12), indicate only a slight advance in temperature on that of Jerusalem. But Mr. Glaisher's observations at Beyrout (mentioned above) show on the other hand that the temperature there is considerably higher, the Jan. being 54°, July 82°, and the mean for the year 69·3. The situation of Beyrout (which indeed is out of the confines of the Holy Land) is such as to render its climate very sultry. This district retains much tropical vegetation; all along the coast from Gaza to Beyrout, and inland as far as Ramleh and Lydd, the date-palm flourishes and fruits abundantly, and the orange, sycamore fig, pomegranate, and banana grow luxuriantly at Jaffa and other places. Here also the harvest is in advance of that of the mountainous districts (Thomson, *Land and Book*, 543). In the lower portions of this extensive plain frost and snow are as little known as they are in the Ghor. But the heights, even in summer, are often very chilly,<sup>3</sup> and the sunrise is frequently obscured by a dense low fog (Thomson, 490, 542; *Rob. ii.* 19). North of Carmel slight frosts are occasionally experienced.

In the winter months however the climate of these regions is very similar to that of the south of France or the maritime districts of the north of Italy. Napoleon, writing from Gaza on the "8th Ventose (26 Feb.) 1799," says, "Nous sommes ici dans l'eau et la boue jusqu'aux genoux. Il fait ici le même froid et le même temps qu'à Paris dans cette saison" (*Corr. de Napoléon*, No. 3993). Berthier to Marmont, from the same place (29 Dec 1798), says, "Nous trouvons ici un pays qui ressemble à la Provence et le climat à celui d'Europe" (*Mém. du Duc de Raguse*, ii. 56).

A register of the weather and vegetation of the twelve months in Palestine, referring especially to the coast region, is given by Colonel von Wildenbruch in *Geogr. Society's Journal*, xx. 232. A good deal of similar information will be found in a tabular form on Petermann's Physical Map of Palestine in the *Biblical Atlas* of the Tract Society.

The permanence of the climate of Palestine, on the ground that the same vegetation which anciently flourished there still exists, is ingeniously maintained in a paper on *The Climate of Palestine in Modern compared to Ancient Times* in the *Edinburgh New Philosophical Journal* for April, 1862. Reference is therein made to a paper on the same subject by Schouw in vol. viii. of the same periodical, p. 311.

<sup>1</sup> At 5 P.M. on the 25th Nov. Russeger's thermometer at Jerusalem shewed a temp. of 62·4; but when he arrived at Jericho at 5:30 P.M. on the 27th it had risen to 72·5. At 7:30 the following morning it was 63·5, against 72° at Jerusalem on the 25th; and at noon, at the Jordan, it had risen to 81. At Marsha, at 11 A.M. of the 29th, it was 66; and on returning to Jerusalem on the 1st Dec. it again fell to an average of 61. An observation recorded by Mr. Robinson (*ii.* 310) at Sakat (Succoth), in the central part of the Jordan valley, on May 14, 1852, in the shade, rose to a spring, gives 92°, which is the very highest reading recorded at Jerusalem in July: later on the same day it was 93°, in a strong N.W. wind (314). On May 23, 1852, at Jericho, it was 91° in the shade and the breeze.

Dr. Anderson (184) found it 106° Fahr. "through the first half of the night" at the S.E. corner of the Dead Sea. In a paper on the 'Climate of Palestine,' &c., in the *Edinburgh New Philosophical Journal* for April, 1862, published while this sheet was passing through the press, the mean annual temperature of Jericho is stated as 72° Fahr., but without giving any authority.

<sup>2</sup> Robinson (*ii.* 223), on June 8, 1834, found the thermometer 83° Fahr. before sunrise, at *Ba'at Natif*, on the lower hills overlooking the plain of Philistia.

<sup>3</sup> Chilly nights, succeeding scorching days, have formed a characteristic of the East ever since the days of Josue (*Gen. xxxi.* 40; *Jer. xxxvi.* 30).

**LITERATURE.**—The list of works on the Holy Land is of prodigious extent. Dr. Robinson, in the Appendix to his *Biblical Researches*, enumerates no less than 183; to which Boissier (*Land of Promise*) adds a large number: and even then the list is far from complete. Of course every traveller sees some things which none of his predecessors saw, and therefore none should be neglected by the student anxious thoroughly to investigate the nature and customs of the Holy Land; but the following works will be found to contain nearly all necessary information:—

1. **Josephus.**—Invaluable, both for its own sake, and as an accompaniment and elucidation of the Bible narrative. Josephus had a very intimate knowledge of the country. He possessed both the Hebrew Bible and the Septuagint, and knew them well; and there are many places in his works which show that he knew how to compare the various books together, and combine their scattered notices in one narrative, in a manner more like the processes of modern criticism than of ancient record. He possessed also the works of several ancient historians, who survive only through the fragments he has preserved. And it is evident that he had in addition other nameless sources of information, now lost to us, which often supplement the Scripture history in a very important manner. These and other things in the writings of Josephus have yet to be investigated. Two tracts by Tusch (*Quæstiones de F. Josephi libris*, &c., Leipzig, 1859), on geographical points, are worth attention.

2. The *Onomasticon* (usually so called) of Eusebius and Jerome. A tract of Eusebius († 340), "concerning the names of places in the Sacred Scriptures" translated, freely and with many additions, by Jerome († 420), and included in his works as *Liber de Situ et Nominibus Locorum Hebraicorum*. The original arrangement is according to the Books of Scripture, but it was thrown into one general alphabetical order by Bonfrère (1631, &c.); and finally edited by J. Clericus, Amst. 1707, &c. This tract contains notices (often very valuable, often absolutely absurd) of the situation of many ancient places of Palestine, as far as they were known to the two men who in their day were probably best acquainted with the subject. In connexion with it, see Jerome's *Ep. ad Eustochium*; *Epit. Paulæ*—an itinerary through a large part of the Holy Land. Others of Jerome's Epistles, and his Commentaries, are full of information on the country.

3. The most important of the early travellers—from Areulf (A.D. 700) to Maundrell (1697)—are contained in *Early Travels in Palestine*, a volume published by Bohn. The shape is convenient, but the translation is not always to be implicitly relied on.

4. **Beland.**—*H. Belandi Palestina ex Monumentis Veteribus illustrata*, 1714. A treatise on the Holy Land in three books: 1. The country; 2. The distances; 3. The places; with maps (excellent for their date), prints of coins and inscriptions. Beland exhausts all the information obtainable on his subject down to his own date (he often quotes Maundrell, 1703). His learning is immense, he is extremely accurate, always ingenious, and not wanting in humour. But honesty and strong sound sense are his characteristics. A sentence of his own might be his motto: "Conjecturae, quibus

non delectamur" (p. 139), or "Ego nil muti" (671).

5. **Benjamin of Tudela.**—*Travels of Rabbi Benjamin* (in Europe, Asia, and Africa) 3am 1191-7. The best edition is that of A. Asher, 2 vols. 1843. The part relating to Palestine is contained in pp. 61-87. The editor's notes contain some curious information; but their most valuable part (A. 25. 445) is a translation of extracts from the work of Esthori B. Moshe hap-Parchi on Palestine (A.D. 1314-22). These passages— Notices of places and identifications—are very valuable, more so than those of Benjamin. The original work, *Chetivat-Pherach*, "knop and flower," has been republished in Hebrew, by Edelmann, Berlin, 1852. Other literatures of Jews have been translated and published by Carmoly (Brux. 1847), but they are of less value than the two already named.

6. **Abulfeda.**—The chief Moslem accounts of the Holy Land are those of Edrisi (cir. 1150), and Abulfeda (cir. 1300), translated under the title of *Talula Syriae*, and *Deccr. Arabiae*. Extracts from these and from the great work of Yakoot are given by Schultens in an *Index Geographicus* appended to his edition of Bohædîd's *Life of Saladin*, Gin. 1755. Yakoot has yet to be explored, and no doubt he contains a mass of valuable information.

7. **Quaresmius.**—*Terræ Sanctæ Descriptio*, &c. Ant. 1639, 2 vols. folio. The work of a Latin monk who lived in the Holy Land for more than twelve years, and rose to be Principal and Commissary Apostolic of the country. It is divided into eight books: the first three, general dissertations; the remainder "peregrinations" through the Holy Land, with historical accounts, and identifications (often hoisted), and elaborate accounts of the Latin traditions attaching to each spot, and of the ecclesiastical establishments, military orders, &c. of the time. It has a copious index.—Similar information is given by the Abbé Mislin (*Les Saints Lieux*, Paris, 1858, 3 vols. 8vo); but with less elaboration than Quaresmius, and in too hostile a vein towards Lamartine and other travellers.

8. The great burst of modern travel in the Holy Land began with Seetzen and Burckhardt. Seetzen resided in Palestine from 1803 to 1807, during which time he travelled on both E. and W. of Jordan. He was the first to visit the Hauran, the Gilead, and the mountains of Ajlun; he travelled extensively round the Dead Sea, besides exploring the east side a second time. As an experienced man of science, Seetzen was charged with collecting antiquaries and natural objects for the Oriental Museum at Göttingen, and his diaries contain inscriptions, and notices of flora and fauna, &c. They have been published in 3 vols., with a 4th vol. of notes (but without an index), by Kruse (Berlin, 1854-9). The Palestine journeys are contained in vols. 1 and 2. Burckhardt, founded on these diaries, and giving their results, are in Zach's *Monatli. Corresp.* vols. 17, 18, 20, 21.

9. **Burckhardt.**—*Travels in Syria and the Holy Land*, 4to, 1822. With the exception of an excursion of twelve days to Safed and Nablous, Burckhardt's journeys S. of Damascus were confined to the east of the Jordan. These regions he explored and described more completely than any other or any later traveller till Wetzstein (1861), and even his researches do not extend over so wide an area. Burckhardt made two tours in the Hauran, a second

▷ A list of all the works on Palestine which have any pretensions to importance, with full critical remarks, is

given by Ritter at the commencement of the 22d volume of his ninth volume (*Jordan*).

uch he penetrated—first of Europeans—into the mysterious Leja. The southern portions of the Jordanian country he traversed in his journey from Damascus to Petra and Sinai. The fulness of notes which he contrived to keep under the difficult circumstances in which he travelled is astonishing. They contain a multitude of inscriptions, long catalogues of names, plans of sites, &c. The strength of his memory is shown not only by notes but by his constant references to books, which he was completely cut off. His diaries interspersed with lengthened accounts of the various districts, and the manners and customs, the people, &c., of their inhabitants. Burckhardt's accuracy is universally praised. No doubt justly. It should be remembered that on the E. of us no means of testing him as yet exist; while other places his descriptions have been found correct or at variance with facts.—The volume contains an excellent preface by Col. Leake, but is defective from the want of an index. This is fully supplied in the German translation (Weimar, 1823-4, 2 vols. 8vo.), which has the advantage of being both edited and annotated by Gesenius.

13. *Libby and Mangles.—Travels in Egypt and Syria and the Holy Land* (in 1817-18). Libby and Mangles. This work is of great value, especially for the portions which relate their route on the east of Jordan, especially about Kerek and the country of Moab and Ammon, which are very well told, and with an admirable faithfulness. These portions are contained in parts vi. and viii. The work is published in *Travels and Col. Library*, 1847.

14. Robinson.—(1.) *Biblical Researches in Palestine, &c.*, in 1838: 1st ed. 1841, 3 vols. 8vo; 2d. 1856, 2 vols. 8vo. (2.) *Later Bib. Res.*, 1852, 8vo, 1856. Dr. Robinson's is the most recent work on the Holy Land since Reland. His knowledge of the subject and its literature is great, his common sense excellent, his qualifications as an investigator and a describer remarkable.

He had the rare advantage of being acquainted on both occasions by Dr. Eli Smith, long resident in Syria, and perfectly versed in both Arabic and vernacular Arabic. Thus he was enabled to identify a host of ancient sites, which are fully discussed at great length, and with full access to the authorities. The drawbacks to his work are a want of knowledge of architectural art, a certain dogmatism, which occasionally passes into contempt for those who differ with him. He uniformly disregards tradition, an extreme fully justified as its opposite in a country like the East.

His first edition has a most valuable Appendix, containing lists of the Arabic names of modern places in the country, which in the second edition is omitted. Both series are furnished with indices, but those of Geography and Antiquities might tend to be of great advantage.

15. Wilson.—*The Lands of the Bible revisited, &c.*, 2 vols. 8vo. Dr. Wilson traversed the Holy Land twice, but without going out of the usual routes. He paid much attention to the topography, and kept a constant eye on the reports of his predecessors. His book cannot be neglected by any student of the country; but it is especially valuable for its careful and detailed account of the religious bodies of the East, especially Jews and Samaritans. His Indian labours

having accustomed him to Arabic, he was able to converse freely with all the people he met, and his inquiries were generally made in the direction just named. His notice of the Samaritans is unusually full and accurate, and illustrated by copies and translations of documents, and information not elsewhere given.

16. Schwarz.—*A Descriptive Geography, &c., of Palestine*, Philad. 1850, 8vo. A translation of a work originally published in Hebrew (*Sepher Tzibboth*, Jerusalem, 5605, A.D. 1845) by Rabbi Joseph Schwarz. Taking as his basis the catalogues of Joshua, Chronicles, &c., and the numerous topographical notices of the Rabbinical books, he proceeds systematically through the country, suggesting identifications, and often giving curious and valuable information. The American translation is almost useless for want of an index. This is in some measure supplied in the German version, *Das heilige Land, &c.*, Frankfurt a. M. 1852.

17. De Saulcy.—*Voyage autour de la Mer Morte, &c.*, 1853, 2 vols. 8vo., with *Atlas of Maps and Plates, Lists of Plants and Insects*. Interesting rather from the unusual route taken by the author, the boldness of his theories, and the atlas of admirably engraved maps and plates which accompanies the text, than for its own merits. Like many French works it has no index. Translated:—*Narrative of a Journey, &c.*, 2 vols. 8vo, 1854.—See *The Dead Sea*, by Rev. A. A. Isaacs, 1857. Also a valuable Letter by "A Pilgrim," in the *Athenaeum*, Sept. 9, 1854.

18. Lynch.—*Official Report of the United States Expedition to explore the Dead Sea and the Jordan*, 4to., Baltimore, 1852. Contains the daily Record of the Expedition, and separate Reports on the Ornithology, Botany, and Geology. The last of these Reports is more particularly described at p. 679.

19. Stanley.—*Sinai and Palestine*, 1853, 8vo. Professor Stanley's work differs from those of his predecessors. Like them he made a lengthened journey in the country, is intimately acquainted with all the authorities, ancient and modern, and has himself made some of the most brilliant identifications of the historical sites. But his great object seems to have been not so much to make fresh discoveries, as to apply those already made, the structure of the country and the peculiarities of the scenery, to the elucidation of the history. This he has done with a power and a delicacy truly remarkable. To the sentiment and eloquence of Lamartine, the genial freshness of Miss Martineau, and the sound judgment of Robinson, he adds a reverent appreciation of the subject, and a care for the smallest details of the picture, which no one else has yet displayed, and which render his descriptions a most valuable commentary on the Bible narrative. The work contains an Appendix on the Topographical Terms of the Bible, of importance to students of the English version of the Scriptures.

See also a paper on "Sacred Geography" by Professor Stanley in the *Quarterly Review*, No. cxxviii.

20. Tobler.—*Bethlehem, 1849: Topographie von Jerusalem u. seine Umgebungen*, 1854. These works are models of patient industry and research. They contain everything that has been said by everybody on the subject, and are truly valuable storehouses for those who are unable to refer to the originals. His *Dritte Wanderung*, 8vo, 1859, describes a district at little known, viz. part of Philistia and the country between Hebron and Ramleh and thus possesses, in addition to the merits above

For examples of this see Robinson, *B. R.* iii. 324; 374-404 Stanley, *Sinai & Pal.* 61, 72.

named, that of *noëlet*. It contains a sketch-map of the latter district, which corrects former maps in some important points.

18. Van de Velde.—*Syria and Palestine*, 2 vols. 8vo. 1854. Contains the narrative of the author's journeys while engaged in preparing his large *Map of the Holy Land* (1858), the best map yet published. A condensed edition of this work, omitting the purely personal details too frequently introduced, would be useful. Van de Velde's *Memoir*, 8vo, 1858, gives elevations, latitudes and longitudes, routes, and much very excellent information. His *Pays d'Israel*, 100 coloured lithographs from original sketches, are accurate and admirably executed, and many of the views are unique.

19. Ritter.—*Die Vergleichende Erdkunde*, &c. The six volumes of Ritter's great geographical work which relate to the peninsula of Sinai, the Holy Land, and Syria, and form together *Band viii*. They may be conveniently designated by the following names, which the writer has adopted in his other articles:—1. Sinai. 2. Jordan. 3. Syria (Index). 4. Palestine. 5. Lebanon. 6. Damascus (Index).

20. Of more recent works the following may be noticed:—Porter: *Five Years in Damascus, the Hauran, &c.*, 2 vols. 8vo. 1855: *Handbook for Syria and Palestine*, 1858.—Bonar, *The Land of Promise*, 1858.—Thomson, *The Land and the Book*, 1859. The fruit of twenty-five years' residence in the Holy Land, by a shrewd and intelligent observer.—Wetzstein, *Reisebericht über Hauran und die beiden Truchonen*, 1860, with woodcuts, a plate of inscriptions, and a map of the district by Kiepert. The first attempt at a real exploration of these extraordinary regions east of the Jordan, which were partially visited by Burckhardt, and recently by Cyril Graham (*Cambridge Essays*, 1858; *Trans. R. S. Lit.* 1860, &c.).—Drew, *Scripture Lands in Connection with their History*, 1860.

Two works by ladies claim especial notice. *Egyptian Sepulchres and Syrian Shrines*, by Miss E. A. Beaufort, 2 vols. 1861. The 2nd vol. contains the record of six months' travel and residence in the Holy Land, and is full of keen and delicate observation, caught with the eye of an artist, and characteristically recorded.—*Domestic Life in Palestine*, by Miss Rogers (1862), is, what its name purports, an account of a visit of several years to the Holy Land, during which, owing to her brother's position, the author had opportunities of seeing at leisure the interiors of many unsophisticated Arab and Jewish households, in places out of the ordinary track, such as few Englishwomen ever before enjoyed, and certainly none have recorded. These she has described with great skill and fidelity, and with an abstinence from descriptions of matters out of her proper path or at second-hand which is truly admirable.

It still remains, however, for some one to do for Syria what Mr. Lane has so faultlessly accomplished for Egypt, the more to be desired because the time is fast passing, and Syria is becoming every day more leavened by the West.

Views.—Two extensive collections of Views of the Holy Land exist—those of Bartlett and of Roberts. Pictorially beautiful as these plates are, they are not so useful to the student as the very accurate views of William Tipping, Esq., published in Traill's *Josephus*, some of which have been inserted in the article JERUSALEM. There are some instructive views taken from photographs, in the last edition of Keith's *Land of Israel*. Photographs have been

published by Frith, Robertson, Rev. G. W. Bridges, and others.

Maps.—Mr. Van de Velde's map, already mentioned, has superseded all its predecessors, but more still remains to be done in districts out of the track usually pursued by travellers. On the east of Jordan, Kiepert's map (in Wetzstein's *Hauran*) is so far the only trustworthy document. The new military surveys of the coast are understood to be rapidly approaching completion, and will leave nothing to be desired.

Of works on Jerusalem the following may be named:—

Williams.—*The Holy City*: 2nd ed. 2 vols. 8vo. 1849. Contains a detailed history of Jerusalem, an account of the modern town, and an essay on the architectural history of the Church of the Sepulchre by Professor Willis. Mr. Williams is most if not all cases supports tradition.

B Barclay.—*The City of the Great Kings*: Pict. 1858. An account of Jerusalem as it was, and will be. Dr. B. had some peculiar opportunities of investigating the subterranean passages of the city and the Hauran area, and his book contains many valuable notices. His large Map of *Jerusalem and Environs*, though badly engraved, is accurate and useful, giving the form of the ground very well.

Fergusson.—*The Ancient Topography of Jerusalem, &c.*, 1847, with 7 plates. Treats of the Temple and the walls of ancient Jerusalem, and the site of the Holy Sepulchre, and is full of the most original and ingenious views, expressed in the boldest language. From architectural arguments the author maintains the so-called Monk of Clug to be the real Holy Sepulchre. He also shows that the Temple, instead of occupying the whole of the Hauran area, was confined to its south-western corner. His arguments have never been answered or even fairly discussed. The remarks of some of his critics are, however, dealt with by Mr. F. in a pamphlet, *Notes on the Site of the Holy Sepulchre*, 1861. See also vol. 1. of this Dictionary, pp. 1017-1035.

Thrupp.—*Ancient Jerusalem, a new Investigation, &c.*, 1855.

A good résumé of the controversy on the Holy Sepulchre is given in the *Museum of Classical Antiquities*, No. viii., and Suppl.

Maps.—Besides Dr. Barclay's, already mentioned, Mr. Van de Velde has published a very clear and correct map (1858). So also has Signor Ferri (1861). The latter contains a great deal of information, and shows plans of the churches, &c., in the neighbourhood of the city.

Photographs have been taken by Salzmann, whose plates are accompanied by a treatise, *Jerusalem Etude, &c.* (Paris, 1856); also by Frith (Vorte 1858), Robertson, and others. [G.]

PAL'LU (פַּלְלִי; Παλλῶν; *Phallō*). The second son of Reuben, father of Eliab and founder of the family of the PALLUITES (Ex. vi. 14; Num. xvi. 5, 8; 1 Chr. v. 3). In the A. V. of Gen. xiv. 9, he is called PALLI, and Josephus appears to identify him with Peleth in Num. xvi. 1, whom he calls Παλλῶν. [See OS.]

PALLUITES, THE (פַּלְלִי; δ Παλλῶν). The descendants of Pallu the son of Reuben (Num. xxv. 2).

PALMER-WORM (עֲרֵב; *gōrion*; *gōrion*) occurs Joel i. 4, ii. 23; Am. ix. 9. *Palmer*

*Hieros.* iii. 253) has endeavoured to show that *gázam* denotes some species of locust; it has lately been shown that the ten Hebrew names of which Bochart assigns the meaning of different kinds of locusts cannot possibly apply to so many, a not more than two or three destructive species of locust are known in the Bible lands. [LOCUST; CATERPILLAR.] The derivation of the Hebrew word from a root which means "to cut off," is as applicable to several kinds of insects, whether in their perfect or larva condition, as it is to a locust; accordingly we prefer to follow the LXX. and Vulg., which are consistent with each other in the rendering of the Hebrew word in the three passages where it is found. The *καμύρη* of Aristotle (*Anim. Hist.* ii. 17, 4, 5, 6) evidently denotes a caterpillar, so called from its "bending itself" up (*καμύρω*) to move, as the caterpillars called geonetric, or else from the habit some caterpillars have of "coiling" themselves up when handled. The *Eruca* of the Vulg. is the *καμύρη* of the Greeks, as is evident from the express assertion of Columella (*De Re Rust.* xi. 3, 63, *Script. R. R.* ed. Schneider). The Chaldee and Syriac understand some locust larva by the Hebrew word. Oedmann (*Verm. Samm.* i. c. vi. p. 116) is of the same opinion. Ychsen (*Comment. de locustis*, &c., p. 88) identifies the *gázam* with the *Gryllus cristatus*, Lin., a south African species. Michnelis (*Supp.* p. 220) follows the LXX. and Vulg. We cannot agree with Mr. Denham (Kitto's *Cycl.*, art. "Locust") that the predation ascribed to the *gázam* in Amos better agree with the characteristics of the locust than of caterpillar, of which various kinds are occasionally the cause of much damage to fruit-trees, the g and the olive, &c. [W. H.]

**PALM-TREE** (פֶּלֶם: פֹּלִינֵץ). Under this generic term many species are botanically included; but we have here only to do with the Date-palm, the *Phoenix Dactylifera* of Linnaeus. It grew very abundantly (more abundantly than now) in many parts of the Levant. On this subject generally it is enough to refer to Kitter's monograph 'Ueber die geographische Verbreitung der Dattelpalme' in his *Erkunde*, and also published separately.

While this tree was abundant generally in the Levant, it was regarded by the ancients as peculiarly characteristic of Palestine and the neighbouring regions. (Σύμπε, θένου πολίνες οἱ καρποφόροι, *en. Cyrop.* vi. 2, §22. Judea incluta est palmetis, *lin. N. H.* xiii. 4. Palmetis [Judæis] proceritas decor, *Tac. Hist.* v. 6. Comp. Tac. Strabo xvii. 10, 818; Theophrast. *Hist. Plant.* ii. 8; Paus. i. 19, §5). The following places may be enumerated from the Bible as having some connexion with the palm-tree, either in the derivation of the name, or in the mention of the tree as growing on the spot.

(1.) At ELIM, one of the stations of the Israelites between Egypt and Sinai, it is expressly stated that there were "twelve wells (fountains) of water, and threescore and ten palm-trees" (*Ex.* xv. 27; *Num.* xxiii. 9). The word "fountains" of the latter passage is more correct than the "wells" of the former: it is more in harmony too with the bits of the tree; for, as Theophrastus says (*l. c.*), the palm ἐκίηται μάλλον τὸ ναματιαῖον ὕδωρ. There are still palm-trees and fountains in Wady *Er-Ramleh*, which is generally identified with Elim (*Ab. Bib. Res.* i. 69).

(2.) Next, it should be observed that ELATH (*Deut.* ii. 8; 1 K. ix. 26; 2 K. xiv. 22, xvi. 6; 2 Chr. viii. 17, xxvi. 2) is another plural form of the same word, and may likewise mean "the palm-trees." See Prof. Stanley's remarks (*S. and P.* pp. 20, 84, 519), and compare Reland (*Palæst.* p. 930). This place was in Edom (probably *Akaba*); and we are reminded here of the "Idumææ palmarum" of Virgil (*Georg.* iii. 12) and Martial (x. 50).

(3.) No place in Scripture is so closely associated with the subject before us as JERICHO. Its rich palm-groves are connected with two very different periods,—with that of Moses and Joshua on the one hand, and that of the Evangelists on the other. As to the former, the mention of "Jericho, the city of palm-trees" (*Deut.* xxiv. 3), gives a peculiar vividness to the Lawgiver's last view from Pisgah; and even after the narrative of the conquest, we have the children of the Kenite, Moses' father-in-law, again associated with "the city of palm-trees" (*Judg.* i. 16). So Jericho is described in the account of the Moabite invasion after the death of Othniel (*Judg.* iii. 13); and, long after, we find the same phrase applied to it in the reign of Ahaz (2 Chr. xxviii. 15). What the extent of these palm-groves may have been in the desolate period of Jericho we cannot tell; but they were renowned in the time of the Gospels and Josephus. The Jewish historian mentions the luxuriance of these trees again and again; not only in allusion to the time of Moses (*Ant.* iv. 8, §1), but in the account of the Roman campaign under Pompey (*Ant.* xiv. 4, §1; *B. J.* i. 6, §6), the proceedings of Antony and Cleopatra (*Ant.* xv. 4, §2), and the war of Vespasian (*B. J.* iv. 8, §2, 3). Herod the Great did much for Jericho, and took great interest in its palm-groves. Hence Horace's "Herodia palmæ pinguia" (*Ep.* ii. 2, 184), which seems almost to have been a proverbial expression. Nor is this the only heathen testimony to the same fact. Strabo describes this immediate neighbourhood as πλεοδύσων τῷ πολίνι, ἐπὶ μῆκος σταδίων ἑκατὸν (xvi. 763), and Pliny says "Hiericuntum palmetis constat" (*H. N.* v. 14), and adds elsewhere that, while palm-trees grow well in other parts in Judæa, "Hiericunte maxime" (xiii. 4). See also Galen, *De Aliment. facult.* ii., and Justin. xxvii. 3. Shaw (*Trac.* p. 371, folio) speaks of several of these trees still remaining at Jericho in his time.

(4.) The name of HAZEZON-TAMAR, "the felling of the palm-tree," is clear in its derivation. This place is mentioned in the history both of Abraham (*Gen.* xiv. 7) and of Jehoshaphat (2 Chr. xx. 2). In the second of these passages it is expressly identified with Engedi, which was on the western edge of the Dead Sea; and here we can adduce, as a valuable illustration of what is before us, the language of the Apocrypha, "I was exalted like a palm-tree in Engaddi" (*Ecc.* xiv. 14). Here again, too, we can quote alike Josephus (*γεννᾶται ἐν αὐτῇ πολίνι δ' ἑκαταστός*, *Ant.* ix. 1, §2) and Pliny (*Engaddi oppidum secundum ab Hierocolumis, fertilitate palmetorumque nemoribus*, *H. N.* v. 17.).

(5.) Another place having the same element in its name, and doubtless the same characteristic in its scenery, was BAAL-TAMAR (*Judg.* xi. 33), the Βηθβαμάρ of Eusebius. Its position was near Gilbeah of Benjamin; and it could not be far from Deborah's famous palm-tree (*Judg.* iv. 5); if indeed it was not identical with it, as is suggested by Stanley (*S. & P.* p. 146).

(6.) We must next mention the TAMAR, "the

palm," which is set before us in the vision of Ezekiel (xlii. 19, xlvii. 28) as a point from which the southern border of the land is to be measured eastwards and westwards. Robinson identifies it with the *Qanapá* of Ptolemy (v. 16), and thinks its site may be at *el-Milk*, between Hebron and *Wady Musa* (*Bib. Res.* ii. 198, 202). It seems from Jerome to have been in his day a Roman fortress.

(7.) There is little doubt that Solomon's TADMON, afterwards the famous Palmyra, on another desert frontier far to the N.E. of Tamar, is primarily the same word; and that, as Gibbon says (*Decline and Fall*, ii. 38), "the name, by its signification in the Syriac as well as in the Latin language, denoted the multitude of palm-trees, which afforded shade and verdure to that temperate region." In fact, while the undoubted reading in 2 Chr. viii. 4 is תְּמָרִים, the best text in 1 K. ix. 18 is תְּמָרִים. See Joseph. *Ant.* viii. 6, § 1. The springs which he mentions there make the palm-trees almost a matter of course.

(8.) Nor again are the places of the N. T. without their associations with this characteristic tree of Palestine. BETHANY means "the house of dates;" and thus we are reminded that the palm grew in the neighbourhood of the Mount of Olives. This helps our realisation of Our Saviour's entry into Jerusalem, when the people "took branches of palm-trees and went forth to meet Him" (John xii. 13). This again carries our thoughts backwards to the time when the Feast of Tabernacles was first kept after the captivity, when the proclamation was given that they should "go forth unto the mount and fetch palm-branches" (Neh. viii. 15)—the only branches, it may be observed (those of the willow excepted), which are specified by name in the original institution of the festival (Lev. xxiii. 40). From this Gospel incident comes *Palm Sunday* (Dominica in Ramis Palmarum), which is observed with much ceremony in some countries where true palms can be had. Even in northern latitudes (in Yorkshire, for instance) the country people use a substitute which comes into flower just before Easter:—

"And willow branches hallow,  
That they palmies do use to call."

(9.) The word Phœnicia (Φοινίκη), which occurs twice in the N. T. (Acts xi. 19, xv. 3) is in all probability derived from the Greek word (φοινίξ) for a palm. Sidonius mentions palms as a product of Phœnicia (*Paneg. Majorian.* 44). See also Plin. *H. N.* xiii. 4, Athen. i. 21. Thus we may imagine the same natural objects in connexion with St. Paul's journeys along the coast to the north of Palestine, as with the wanderings of the Israelites through the desert on the south.

(10.) Lastly, Phoenix in the island of Crete, the harbour which St. Paul was prevented by the storm from reaching (Acts xxvii. 12), has doubtless the same derivation. Both Theophrastus and Pliny say that palm-trees are indigenous in this island. See Hoeck's *Crete*, i. 38, 388. [PHENIX.]

From the passages where there is a literal reference to the palm-tree, we may pass to the emblematical uses of it in Scripture. Under this head may be classed the following:—

(1.) The striking appearance of the tree, its uprightness and beauty, would naturally suggest the giving of its name occasionally to women. As we find in the *Odyssey* (vi. 163) Nausicaa, the daughter of Alcinoüs, compared to a palm, so in Cant. vii. 7 we have the same comparison: "Thy stature is like to a palm-tree." In the O. T. three women

named Tamar are mentioned: Judah's daughter-in-law (Gen. xxxviii. 6), Absalom's sister (2 Sam. xiii. 1), and Absalom's daughter (2 Sam. xiv. 27). The beauty of the two last is expressly mentioned.

(2.) We have notices of the employment of the form in decorative art, both in the real temple of Solomon and in the visionary temple of Ezekiel. In the former case we are told (2 Chr. iii. 7) of this decoration in general terms, and elsewhere more specifically that it was applied to the walls (1 K. vi. 29), to the doors (v. 32, 35, and to the "bases" (vii. 36). So in the prophet's vision we find palm-trees on the post of the gates (Ez. xl. 16, 22, 26, 31, 34, 37), and also on the walls and the doors (xli. 18-20, 25, 26). This work seems to have been in relief. We do not stay to inquire whether it had any symbolical meanings. It was a natural and doubtless customary kind of ornamentation in Eastern architecture. Thus we are told by Herodotus (ii. 107) of the hall of a temple at Sais in Egypt, which was *ἡσκημένη στύλοισι φοινίκας τὰ δένδρεα μορφομένοις*; and we are familiar now with the same sort of decoration in Assyrian buildings (*Layard's Nineveh and its Remains*, b. 137, 396, 401). The image of such rigid and motionless forms may possibly have been before the mind of Jeremiah when he said of the idols of the heathen (z. 4, 5), "They fasten it with nails and with hammers, that it move not; they are upright as the palm-tree, but speak not."

Palm-Tree (Phœnicia Decap. form.)

(3.) With a tree so abundant in Judaea and so marked in its growth and appearance, as the palm, it seems rather remarkable that it does not occur more frequently in the imagery of the O. T. There is, however, in the Psalms (xvii. 12) the familiar comparison, "The righteous shall flourish like the palm-tree," which suggests a world of associations, whether respect be had to the orderly and regular aspect of the tree, its fruitfulness, the perpetual greenness of its foliage, or the height at which its foliage grows, as far as possible from its root to

possible to heaven. Perhaps no point is worthy of mention, if we wish to pursue the matter, than the elasticity of the fibre of the wood and its determined growth upwards, even aided with weights ("nititur in pondus"). Such particulars of resemblance to the human form were variously dwelt on by the Christian writers. Some instances are given in his *Hierobotomicon* (Upsal, 1747), p. 17. One, which he does not give, is worthy of mention:—"Well is the life of the righteous compared to a palm, in that the palm below is rough and, and in a manner enveloped in dry bark; above it is adorned with fruit, fair even; below, it is compressed by the enfolding bark; above, it is spread out in ample beautiful greenness. For so is the life of the righteous: despised below, beautiful above. Down it is, as it were, enfolded in many barks, in straitened by innumerable afflictions; but it is expanded into a foliage, as it were, of greenness by the amplitude of the reward." (Gregory, *Mor. on Job* xix. 49).

The passage in Lev. vii. 9, where the glories of the nations are described as "clothed with cedars and palms in their hands," might seem a purely classical image, drawn (like many of the images) from the Greek games, the victors of which carried palms in their hands. But to trace here a Jewish element also, when we consider three passages in the Apocrypha. In iii. 51 Simon Maccabaeus, after the capture of the tower at Jerusalem, is described as it with music and thanksgiving "and of palm-trees." In 2 Macc. x. 7 it is said that Judas Maccabaeus had recovered the land the city "they bare branches and palms, and psalms also unto Him that had given them success." In 2 Macc. xiv. 4 Demetrius is said "with a crown of gold and a palm." We see the palm-branches used by Jews in victory and peace. (Such indeed is the Gospel narrative, John xii. 13.)

There is a fourth passage in the Apocrypha, published in English, which approximates the imagery of the Apocalypse. "I asked, 'What are these?' He answered and said, 'These be they which have put off the old clothing, and now they are crowned and adorned with palms. Then said I unto the angel, 'What reason is it that crowneth them and giveth them palms in their hands?' So he answered and said, 'It is the Son of God, whom they have in the world'" (2 Esd. iii. 44-47). This is the approximation not of anticipation, but of imitation. Whatever may be determined of the date of the rest of the book, this is clearly subsequent to the Christian era, and is the SECOND BOOK OF.]

the industrial and domestic uses of the palm is well known that they are very numerous, but there is no clear allusion to them in the Bible. The ancient Orientals, however, made

the palm-tree being dioecious—that is to say, the stamens (male and female parts) being on different plants—it is evident that no edible fruit can be produced without fertilisation is effected either by insects or by artificial means. That the mode of impregnating the plant with the pollen of the male (*palmetto*) was known to the ancients, is evident from the Bible (H. P. ii. 9), and Herodotus, who states that the Egyptians adopted a similar plan. The mode of

use of wine and honey obtained from the Palm-tree is evident from Herodotus (i. 193, ii. 86), Strabo (xvi. ch. 14, ed. Kram.), and Pliny (*N. H.* xiii. 4). It is indeed possible that the honey mentioned in some places may be palm-sugar. (In 2 Chr. xxxi. 5 the margin has "dates.") There may also be Cant. vii. 8, "I will go up to the palm-tree, I will take hold of the boughs thereof," be a reference to climbing for the fruit. The LXX. have *ἀναβήσομαι ἐν τῇ φοίνικι, κρατήσω τῶν ὕψων αὐτοῦ*. So in ii. 3 and elsewhere (e. g. Ps. i. 3) the fruit of the palm may be intended: but this cannot be proved.\* [SUGAR; WINE.]

Group of Dates.

It is curious that this tree, once so abundant in Judaea, is now comparatively rare, except in the Philistine plain, and in the old Phoenicia about *Beirut*. A few years ago there was just one palm-tree at Jericho: but that is now gone. Old trunks are washed up in the Dead Sea. It would almost seem as though we might take the history of this tree in Palestine as emblematic of that of the people whose home was once in that land. The well-known coin of Vespasian representing the palm-tree with the legend "*Judaea capta*," is figured in vol. ii. p. 438. [J. S. H.]

**PALSY.** [MEDICINE, p. 304.]

**PAL'TI** (פָּלְטִי: פֶּלְטִי: *Phalti*). The son of Raphu; a Benjamite who was one of the twelve spies. Num. xiii. 9).

**PALTIEL** (פֶּלְטִי: פֶּלְטִי: *Phaltiel*). The son of Azzan and prince of the tribe of Issachar.

Arabs of Barbary, Persia, &c., take care to hang clusters of male flowers on female trees. The ancient Egyptians probably did the same. A cake of preserved dates was found by Sir G. Wilkinson at Thebes (H. 181, ed. 1854). It is certainly curious there is no distinct mention of dates in the Bible, though we cannot doubt that the ancient Hebrews used the fruit, and were probably acquainted with the art of fertilising the flowers of the female plant.

(Num. xxi. 26). He was one of the twelve appointed to divide the land of Canaan among the tribes west of Jordan.

**PALTITE, THE** (פלטית: δ Κελσθί; Alex. ο φελλωνεὶ: *de Phallis*). Helez "the Paltite" is named in 2 Sam. xiii. 26 among David's mighty men. In 1 Chr. xi. 27, he is called "the Pelonite," and such seems to have been the reading followed by the Alex. MS. in 2 Sam. The Peshito-Syriac, however, supports the Hebrew, "Choluts of Pelat." But in 1 Chr. xvii. 10, "Helez the Pelonite" of the tribe of Ephraim is again mentioned as captain of 24,000 men of David's army for the seventh month, and the balance of evidence therefore inclines to "Pelonite" as the true reading. The variation arose from a confusion between the letters פל and פל. In the Syriac of 1 Chr. both readings are combined, and Helez is described as "of Paltōn."

**PAMPHYLIA** (Παμφυλία), one of the coast-regions in the south of Asia Minor, having CILICIA on the east, and LYCIA on the west. It seems in early times to have been less considerable than either of these contiguous districts; for in the Persian war, while Cilicia contributed a hundred ships and Lycia fifty, Pamphylia sent only thirty (Herod. vii. 91, 92). The name probably then embraced little more than the crescent of comparatively level ground between Taurus and the sea. To the north, along the heights of Taurus itself, was the region of PISIDIA. The Roman organization of the country, however, gave a wider range to the term Pamphylia. In St. Paul's time it was not only a regular province, but the Emperor Claudius had united Lycia with it (Dio Cass. ix. 17), and probably also a good part of Pisidia. However, in the N. T., the three terms are used as distinct. It was in Pamphylia that St. Paul first entered Asia Minor, after preaching the Gospel in Cyprus. He and Barnabas sailed up the river Cestrus to PERGA (Acts xiii. 13). Here they were abandoned by their subordinate companion John-Mark; a circumstance which is alluded to again with much feeling, and with a pointed mention of the place where the separation occurred (Acts xv. 38). It might be the pain of this separation which induced Paul and Barnabas to leave Perga without delay. They did however preach the Gospel there on their return from the interior (Acts xiv. 24, 25). We may conclude, from Acts ii. 10, that there were many Jews in the province; and possibly Perga had a synagogue. The two missionaries finally left Pamphylia by its chief seaport, ATTALIA. We do not know that St. Paul was ever in this district again: but many years afterwards he sailed near its coast, passing through "the sea of Cilicia and Pamphylia" on his way to a town of Lycia (Acts xxvii. 5). We notice here the accurate order of these geographical terms, as in the above-mentioned land-journey we observe how Pisidia and Pamphylia occur in their true relations, both in going and returning (εἰς Πέργην τῆς Παμφυλίας . . . ἀπὸ τῆς Πέργης εἰς

\* 1. פִּיר, or פִּיר; λέβης ὁ μέγας; *lebes* (1 Sam. ii. 14); elsewhere "laver" and "hearth," i. e. a brazier or pan for fire (Zech. xii. 6).

\* 2. פִּתְּחָה, from פָּחָה, "bake" (Gen. 444), *πάγανον*, *sartago* (Lev. ii. 5), where it follows פָּחָה *εἰσάρα*, *craticula*, "frying-pan," and is therefore distinct from it.

\* 3. מִצְּבֹת; *πάγανον*; "a baking-pan" (2 Sam. xii. 9), *Bos* 1313.

Ἀτταχὲ εἰς τὴν Πισιδίαν, xiii. 13, 14; καὶ ἔθεν τὴν Πισιδίαν ἥλαρον εἰς Παμφυλίαν, xiv. 24.

[J. S. S.]

**PAN.** Of the six words so rendered in A. V., two, *nichbath* and *meteth*, seem to imply a shallow pan or plate, such as is used by Indians and Syrians for baking or dressing rapidly their bits of meat, such as were used in legal offerings; so others, especially *air*, a deeper vessel or caldron for boiling meat, placed during the process on flat stones (Burckhardt, *Nodes on Bed.* i. 38; *Nutrient Descr. de l'Ar.* p. 46; Lane, *Mod. Eg.* i. 100). [CALDRON.]

**PANNAG** (Παννᾶ), an article of commerce imported from Palestine to Tyre (Ec. xxi. 17), of nature of which is a pure matter of conjecture, as the term occurs nowhere else. In comparing its passage in Ezekiel with Gen. xliii. 11, where it is not valued productions of Palestine are enumerated, the omission of tragacanth and ladanum (A. V., "gum and myrrh") in the latter is very remarkable, and leads to the supposition that pannag represented one of the spices grown in that country. The LXX. in rendering it *καρία*, favours this opinion, and it is evident that cassia cannot be the pannag spice intended (see ver. 19). Hitzig observes that similar term occurs in Sanscrit (*pannaga*), is an aromatic plant. The Syriac version, on the other hand, understands by it "millet" (*pannag* = *liacium*); and this view is favoured by the expression in the book of Samar, quoted by Jerome (s. v.), which speaks of "bread of pannag," and this again is not decisive, for the pannag may well have been some flavouring substance, as well to be implied in the doubtful equivalent *pan* in the Targum. [W. L. G.]

#### PAPER. [WRITING.]

**PAPHOS** (Πάφος), a town at the west end of CYPRUS, connected by a road with SALAMIS to the east end. Paul and Barnabas travelled, on their first missionary expedition, "through the isle" to the latter place to the former (Acts xiii. 13).

What took place at Paphos was briefly as follows. The two missionaries found SERPIS PAPHOS, the proconsul of the island, residing here; and were enabled to produce a considerable effect on his intelligent and candid mind. This influence was aided by ELYMAS (or Bar-Jesus), one of the local "sorcerers," whose mischievous power was great at this period, even among the educated class. Miraculous sanction was given to the apostles of Elymas was struck with blindness. The proconsul's faith having been thus confirmed, and a Christian Church having been founded in Paphos, Barnabas and Saul crossed over to the mainland and landed in PAMPHYLIA (ver. 15). It is desirable that it is at this point that the latter names are more prominent of the two, and that the one henceforward is Paul, and not Saul (Σαῦλος καὶ Παῦλος, ver. 9). How far this was necessary with the proconsul's name, must be discussed elsewhere.

\* 4. פִּיר; λέβης; *ella*; from פִּיר, "boil" (Gen. i. 9, 38) with *gēlādāh*, "great," i. e. the great boiler or caldron.

\* 5. פָּחָה; *εἰσάρα*; *ella*.

\* 6. מִצְּבֹת, plur.; *εἰσάρα*; *ella* (1 Chr. xxi. 17) in Prov. xix. 24, "dell."

\* 7. מִצְּבֹת.

The great characteristic of Paphos was the worship of Aphrodite or Venus, who was here fabled to have risen from the sea (Hom. *Od.* viii. 362). Her temple, however, was at "Old Paphos," now called *Akkoia*. The harbour and the chief town were at "New Paphos," at some little distance. The place is still called *Buffa*. The road between the two was often filled with gay and profligate processions (Strabo, xiv. p. 663); strangers came constantly to visit the shrine (Athen. xv. 18); and the hold which these local superstitions had upon the higher minds at this very period is well exemplified by the pilgrimage of Titus (Tac. *Hist.* ii. 2, 3) shortly before the Jewish war.

For notices of such scanty remains as are found at Paphos we must refer to Pococke (*Disc. of the East*, ii. 325-328), and especially Ross (*Reisen nach Kos, Halikarnassos, Rhodos u. Cyprus*, 180-192). Extracts also are given in *Life and Epp. of St. Paul* (2nd ed. i. 190, 191) from the MS. notes of Captain Graves, R.N., who recently surveyed the island of Cyprus. For all that relates to the harbour the Admiralty Chart should be consulted. [J. S. H.]

#### PAPYRUS. [REED.]

**PARABLE** (παροιμία, *mashal*: παραβολή: *parabola*). The distinction between the Parable and one cognate form of teaching has been discussed under FABLE. Something remains to be said (1) as to the word, (2) as to the Parables of the Gospels, (3) as to the laws of their interpretation.

1. The word παραβολή does not of itself imply a narrative. The juxtaposition of two things, differing in most points, but agreeing in some, is sufficient to bring the comparison thus produced within the etymology of the word. The παραβολή of Greek rhetoric need not be more than the simplest argument from analogy. "You would not choose pilots or athletes by lot; why then should you choose statesmen?" (Aristot. *Rhet.* ii. 20). In Hellenistic Greek, however, it acquired a wider meaning, co-extensive with that of the Hebrew *mashal*, for which the LXX. writers with hardly an exception, make it the equivalent.\* That word (= *similitude*), as was natural in the language of a people who had never reduced rhetoric to an art, had a large range of application, and was applied sometimes to the shortest proverbs (1 Sam. x. 12, xxiv. 13; 2 Chr. vii. 20), sometimes to dark prophetic utterances (Num. xxiii. 7, 18, xxiv. 3; Ez. xx. 49), sometimes to enigmatic maxims (Ps. lxxviii. 2; Prov. i. 6, or metaphors expanded into a narrative (Ez. xii. 22). In Ecclesiasticus the word occurs with a striking frequency, and, as will be seen hereafter, its use by the son of Sirach throws light on the position occupied by parables in Our Lord's teaching. In the N. T. itself the word is used with a like latitude. While attached most frequently to the illustrations which have given it a special meaning, it is also applied to a short saying like, "Physician, heal thyself" (Luke iv. 23), to a mere comparison without a narrative (Matt. xxiv. 32), to the

figurative character of the Levitical ordinances (Heb. ix. 9), or of single facts in patriarchal history (Heb. xi. 19).† The later history of the word is not without interest. Naturalized in Latin, chiefly through the Vulgate or earlier versions, it loses gradually the original idea of figurative speech, and is used for speech of any kind. Mediaeval Latin gives us the strange form of *parabolare*, and the descendants of the technical Greek word in the Romance languages are *parler*, *parola*, *parola*, *palabras* (Diaz. *Roman. Wörterb.* s. v. *parola*).

II. As a form of teaching, the Parable, as has been shown, differs from the Fable, (1) in excluding brute or inanimate creatures passing out of the laws of their nature, and speaking or acting like men, (2) in its higher ethical significance. It differs, it may be added, from the Mythus, in being the result of a conscious deliberate choice, not the growth of an unconscious realism, personifying attributes, appearing, no one knows how, in popular belief. It differs from the Allegory, in that the latter, with its direct personification of ideas or attributes, and the names which designate them, involves really no comparison. The virtues and vices of mankind appear, as in a drama, in their own character and costume. The allegory is self-interpreting. The parable demands attention, insight, sometimes an actual explanation. It differs lastly from the Proverb, in that it must include a similitude of some kind, while the proverb may assert, without a similitude, some wide generalization of experience. So far as proverbs go beyond this, and state what they affirm in a figurative form, they may be described as condensed parables, and parables as expanded proverbs (comp. Trench on *Parables*, ch. i.; and Grotius on *Matt.* xiii.).

To understand the relation of the parables of the Gospels to our Lord's teaching, we must go back to the use made of them by previous or contemporary teachers. We have sufficient evidence that they were frequently employed by them. They appear frequently in the Gemara and Midrash (comp. Lightfoot, *Hor. Heb. in Matt.* xiii. 3; Jost, *Judenthum*, ii. 216), and are ascribed to Hillel, Shammai, and other great Rabbis of the two preceding centuries.‡ The panegyric passed upon the great Rabbi Meir, that after his death men ceased to speak parables, implies that, up to that time, there had been a succession of teachers more or less distinguished for them (*Sot.* fol. 49, in Jost, *Judenthum*, ii. 87; Lightfoot, *l. c.*). Later Jewish writers have seen in this employment of parables a concession to the ignorance of the great mass of mankind, who cannot be taught otherwise. For them, as for women or children, parables are the natural and fit method of instruction (Maimonides, *Porta Mosia*, p. 54, in Wetstein, on *Matt.* xiii.), and the same view is taken by Jerome as accounting for the common use of parables in Syria and Palestine (Hieron. in *Matt.* xviii. 23). It may be questioned, however, whether this represents the use made of them by the Rabbis of Our Lord's time. The language

\* The word παροιμία is used by the LXX. in Prov. i. 1, xav. 1, xxi. 7; Eccles. vi. 37, &c., and in some other passages by Symmachus. The same word, it will be remembered, is used throughout by St. John, instead of παραβολή.

† It should be mentioned that another meaning has been given by some interpreters to παραβολή in this passage, but it is believed, on insufficient grounds.

‡ Some interesting examples of these may be seen in

Trench's *Parables*, ch. iv. Others, presenting some striking superficial resemblances to those of the Pearl of Great Price, the Labourers, the Lost Piece of Money, the Wise and Foolish Virgins, may be seen in Wetstein's notes to those parables. The conclusion from them is, that there was at least a generic resemblance between the outward form of our Lord's teaching and that of the Rabbis of Jerusalem.

of the Son of Sirach confines them to the scribe who devotes himself to study. They are at once his glory and his reward (Ecclus. xxxix. 2, 3). To all who eat bread by the sweat of their brow, of the great mass of men in cities and country, it is written that "they shall not be found where parables are spoken" (Ibid. xxxviii. 33). For these therefore it is probable that the scribes and teachers of the law had simply rules and precepts, often perhaps burdensome and oppressive (Matt. xxiii. 3, 4), formulas of prayer (Luke xi. 1), appointed times of fasting and hours of devotion (Mark ii. 18). They, with whom they would not even eat (comp. Wetstein and Lampe on John vii. 49), cared little to give even as much as this to the "people of the earth," whom they scorned as "knowing not the law," a brute herd for whom they could have no sympathy. For their own scholars they had, according to their individual character and power of thought, the casuistry with which the Mishna is for the most part filled, or the parables which here and there give tokens of some deeper insight. The parable was made the instrument for teaching the young disciple to discern the treasures of wisdom of which the "accursed" multitude were ignorant. The teaching of Our Lord at the commencement of His ministry was, in every way, the opposite of this. The Sermon on the Mount may be taken as the type of the "words of grace" which he spoke, "not as the scribes," Beatitudes, laws, promises were uttered distinctly, not indeed without similitudes, but with similitudes that explained themselves. So for some months He taught in the synagogues and on the sea-shore of Galilee, as He had before taught in Jerusalem, and as yet without a parable. But then there comes a change. The direct teaching was met with scorn, unbelief, hardness, and He seems for a time to abandon it for that which took the form of parables. The question of the disciples (Matt. xiii. 10) implies that they were astonished. Their Master was no longer proclaiming the Gospel of the kingdom as before. He was falling back into one at least of the forms of Rabbinic teaching (comp. Schoettgen's *Hor. Heb.* ii., *Christus Rabbinorum Summus*). He was speaking to the multitude in the parables and dark sayings which the Rabbis reserved for their chosen disciples. Here for them were two grounds of wonder. Here, for us, is the key to the explanation which He gave, that He had chosen this form of teaching because the people were spiritually blind and deaf (Matt. xiii. 13), and in order that they might remain so (Mark iv. 12). Two interpretations have been given of these words. (1.) Spiritual truths, it has been said, are in themselves hard and uninviting. Men needed to be won to them by that which was more attractive. The parable was an instrument of education for those who were children in age or character. For this reason it was chosen by the Divine Teacher as fables and stories, "admiranda imbecillitatis" (Seneca, *Epist.* 58), have been chosen by human teachers (Chrysost. *Hom. in Joann.* 34). (2.) Others again have seen in this use of parables something of a penal character. Men have set themselves against the truth, and therefore it is hid from their eyes, presented to them in forms in which it is not easy for them to recognise it. To the inner circle of the chosen it is given to know the mysteries of the kingdom of God. To those who are without, all

these things are done in parables.—Neither view is wholly satisfactory. Each contains a partial truth. All experience shows (1) that parables do attract, and, when once understood, are sure to be remembered, (2) that men may listen to them and not that they have a meaning, and yet never care to ask what that meaning is. Their worth, as instruments of teaching, lies in their being at once a test of character, and in their presenting each form of character with that which, as a penalty or blessing, is adapted to it. They withdraw the light from those who love darkness. They protect the truth which they enshrine from the mockery of the scribe. They leave something even with the careless which may be interpreted and understood afterwards. They reveal, on the other hand, the seeker after truth. These ask the meaning of the parable, will not rest till the teacher has explained it, and step by step to the laws of interpretation, so that they can "understand all parables," and then pass on into the higher region in which parables are no longer necessary, but all things are spoken plainly. In this way the parable did its work, found out the fit hearers and led them on. And it is to be remembered also that even after this self-imposed law of reserve and reticence, the teaching of Christ presented a marvellous contrast to the narrow exclusiveness of the Scribes. The mode of education was changed, but the work of teaching or educating was not for a moment given up, and the aptest scholars were found in those whom the received opinion would have altogether shut out.

From the time indicated by Matt. xiii., accordingly, parables enter largely into our Lord's usual teaching. Each parable of these which we read in the Gospels may have been repeated more than once with greater or less variation (as e. g. those of the Pounds and the Talents, Matt. xxv. 14; Luke xix. 12; of the Supper, in Matt. xxii. 2, and Luke xiv. 16). Everything leads us to believe that there were many others of which we have no record (Matt. xiii. 34; Mark iv. 33). In those which remain it is possible to trace something like an order.<sup>4</sup>

(A.) There is the group with which the new mode of teaching is ushered in, and which have for their subject the laws of the Divine Kingdom, its growth, its nature, its consummation. Under this head we have—

1. The Sower (Matt. xiii.; Mark iv.; Luke vi.).
2. The Wheat and the Tares (Matt. xiii.).
3. The Mustard-Seed (Matt. xiii.; Mark iv.).
4. The Seed cast into the Ground (Mark iv.).
5. The Leaven (Matt. xiii.).
6. The Hidden Treasure (Matt. xiii.).
7. The Pearl of Great Price (Matt. xiii.).
8. The Net cast into the Sea (Matt. xiii.).

(B.) After this there is an interval of some months of which we know comparatively little. Either there was a return to the more direct teaching, or else these were repeated, or others like them spoken. When the next parables meet us they are of a different type and occupy a different position. They occur chiefly in the interval between the mission of the seventy and the last approach to Jerusalem. They are drawn from the life of men rather than from the world of nature. Often they occur, not, as in Matt. xiii., in discourses to the multitude,

<sup>4</sup> This number of parables in the Gospels will of course depend on the range given to the application of the name.

Thus Mr. Nicolson reckons twenty-seven; Dean Church thirty. By others, the number has been extended to fifty.

but it answers to the questions of the disciples or other inquirers. They are such as these—

9. The Two Debtors (Luke vii.).
10. The Merciless Servant (Matt. xviii.).
11. The Good Samaritan (Luke x.).
12. The Friend at Midnight (Luke xi.).
13. The Rich Fool (Luke xii.).
14. The Wedding Feast (Luke xii.).
15. The Fig-Tree (Luke xiii.).
16. The Great Supper (Luke xiv.).
17. The Lost Sheep (Matt. xviii.; Luke xv.).
18. The Lost Piece of Money (Luke xv.).
19. The Prodigal Son (Luke xv.).
20. The Unjust Steward (Luke xvi.).
21. The Rich Man and Lazarus (Luke xvi.).
22. The Unjust Judge (Luke xviii.).
23. The Pharisee and the Publican (Luke xviii.).
24. The Labourers in the Vineyard (Matt. xx.).

(C.) Towards the close of Our Lord's ministry, immediately before and after the entry into Jerusalem, the parables assume a new character. They are again theocratic, but the phase of the Divine Kingdom, on which they chiefly dwell, is that of its final consummation. They are prophetic, in part, of the rejection of Israel, in part of the great retribution of the coming of the Lord. They are to the earlier parables what the prophecy of Matt. xxiv. is to the Sermon on the Mount. To this class we may refer—

25. The Pounds (Luke xix.).
26. The Two Sons (Matt. xxi.).
27. The Vineyard let out to Husbandmen (Matt. xxi.; Mark xii.; Luke xx.).
28. The Marriage-Fest (Matt. xxii.).
29. The Wise and Foolish Virgins (Matt. xxv.).
30. The Talents (Matt. xxv.).
31. The Sheep and the Goats (Matt. xxv.).

It is characteristic of the several Gospels that the greater part of the parables of the first and third groups belong to St. Matthew, emphatically the Evangelist of the kingdom. Those of the second are found for the most part in St. Luke. They are such as we might expect to meet with in the Gospel which dwells most on the sympathy of Christ for all men. St. Mark, as giving vivid recollections of the acts rather than the teaching of Christ is the scantiest of the three synoptic Gospels. It is not less characteristic that there are no parables properly so called in St. John. It is as if he, sooner than any other, had passed into the higher stage of knowledge in which parables were no longer necessary, and therefore dwelt less on them. That which his spirit appropriated most readily were the words of eternal life, figurative it might be in form, abounding in bold analogies, but not in any single instance taking the form of a narrative.<sup>6</sup>

Lastly it is to be noticed, partly as a witness to the truth of the four Gospels, partly as a line of demarcation between them and all counterfeits, that the apocryphal Gospels contain no parables. Human invention could imagine miracles (though these too in the spurious Gospels are stripped of all

that gives them majesty and significance), but the parables of the Gospels were inimitable and unapproachable by any writers of that or the succeeding age. They possess a life and power which stamp them as with the "image and superscription" of the Son of Man. Even the total absence of any allusion to them in the written or spoken teaching of the Apostles shows how little their minds set afterwards in that direction, how little likely they were to do more than testify what they had actually heard.<sup>7</sup>

III. Lastly, there is the law of interpretation. It has been urged by some writers, by none with greater force or clearness than by Chrysostom (*Hom. in Matt.* 64), that there is a scope or purpose for each parable, and that our aim must be to discern this, not to find a special significance in each circumstance or incident. The rest, it is said, may be dealt with as the drapery which the parable needs for its grace and completeness, but which is not essential. It may be questioned, however, whether this canon of interpretation is likely to lead us to the full meaning of this portion of Our Lord's teaching. True as it doubtless is, that there was in each parable a leading thought to be learnt partly from the parable itself, partly from the occasion of its utterance, and that all else gathers round that thought as a centre, it must be remembered that in the great patterns of interpretation which He himself has given us, there is more than this. Not only the sower and the seed and the several soils have their counterparts in the spiritual life, but the birds of the air, the thorns, the scorching heat, have each of them a significance. The explanation of the wheat and the tares, given with less fulness, an outline as it were, which the advancing scholars would be able to fill up, is equally specific. It may be inferred from these two instances that we are, at least, justified in looking for a meaning even in the seeming accessories of a parable. If the opposite mode of interpreting should seem likely to lead us, as it has led many, to strange and forced analogies, and an arbitrary dogmatism, the safeguard may be found in our recollecting that in assigning such meanings we are but as scholars guessing at the mind of a teacher whose words are higher than our thoughts, recognizing the analogies which may have been, but which were not necessarily those which he recognized. No such interpretation can claim anything like authority. The very form of the teaching makes it probable that there may be, in any case, more than one legitimate explanation. The outward fact in nature, or in social life, may correspond to spiritual facts at once in God's government of the world, and in the history of the individual soul. A parable may be at once ethical, and in the highest sense of the term prophetic. There is thus a wide field open to the discernment of the interpreter. There are also restraints upon the mere fertility of his imagination. (1.) The analogies must be real, not arbitrary. (2.) The parables are to be considered as parts of a whole, and the interpretation of one is not to over-ride or encroach upon the lessons taught

<sup>6</sup> See an ingenious classification of the parables of each Gospel, according to their subject-matter, in Westcott, *Introduction to the Study of the Gospels*, ch. vii., and appendix F.

<sup>7</sup> The existence of Rabbinic parables, presenting a superficial resemblance to those of the Gospel, is no real exception to this statement. Whether we believe them

to have had an independent origin, and so to be fair specimens of the *genus* of this form of teaching among the Jews, or to have been (as chronologically they might have been) borrowed, consciously or unconsciously, from those of Christ, there is still in the latter a distinctive power, and purity, which place the others almost beyond the range of comparison, except as to outward form.

by others. (3.) The direct teaching of Christ presents the standard to which all our interpretations are to be referred and by which they are to be measured. (Comp. Dean Trench on the Parables; Introductory Remarks; to which one who has once read it cannot but be more indebted than any more references can indicate; Stier, *Words of the Lord Jesus*, on Matt. xiii. 11). [E. H. P.]

**PARADISE** (פֶּדֶס, *Pardés*; *παράδεισος*: *Paradysus*). Questions as to the nature and locality of Paradise as identical with the garden of Gen. ii. and iii. have been already discussed under EDEN. It remains to trace the history of the word and the associations connected with it, as it appears in the later books of the O. T. and in the language of Christ and His Apostles.

The word itself, though it appears in the above form in Song of Sol. iv. 13, Eccles. ii. 5, Neh. ii. 8, may be classed, with hardly a doubt, as of Aryan rather than of Semitic origin. It first appears in Greek as coming straight from Persia (Xen. *ut inf.*). Greek lexicographers classify it as a Persian word (Julius Pollux, *Onomast.* ix. 3). Modern philologists accept the same conclusion with hardly a dissentient voice (Renan, *Langues Sémitiques*, ii. 1, p. 133). Gesenius (s. v.) traces it a step further, and connects it with the Sanscrit *para-dēpa* = high, well-tilled land, and applied to an ornamental garden attached to a house. Other Sanscrit scholars, however, assert that the meaning of *para-dēpa* in classical Sanscrit is "foreign country," and although they admit that it may also mean "the best or most excellent country," they look on this as an instance of casual coincidence rather than derivation.\* Other etymologies, more fanciful and far-fetched, have been suggested—(1.) from *παρά* and *δαίμα*, giving as a meaning, the "well-watered ground" (Suidas, s. v.); (2.) from *παρά* and *δαίμα*, a barbarous word, supposed to signify a plant, or collection of plants (Joann. Damasc. in Suidas, l. c.); (3.) from פָּרָה דָּשָׁא, to bring forth herbs; (4) פָּרָה הָרִם, to bring forth myrrh (Ludwig, *de raptu Pauli in Parad.* in Menthes's *Thesaur. Theolog.* 1702.)

On the assumption that the Song of Solomon and Ecclesiastes were written in the time of Solomon, the occurrence of the foreign word may be accounted for either (1.) on the hypothesis of later forms having crept into the text in the process of transcription, or (2.) on that of the word having found its way into the language of Israel at the time when its civilization took a new flight under the Son of David, and the king borrowed from the customs of central Asia that which made the royal park or garden part of the glory of the kingdom. In Neh. ii. 8, as might be expected, the word is used in a connexion which points it out as distinctly Persian. The account given of the hanging gardens of Babylon, in like manner, indicates Media as the original seat both of the word and of the thing. Nebuchadnezzar constructed them, terrace upon terrace, that he might reproduce in the plains of Mesopotamia the scenery with which the Median princess he had married had been familiar in her native country; and this was the origin of the *παράδεισος* (*Paradysus*, in Joseph. c. *Ap.* i. 19). In Xenophon the word occurs frequently, and we get vivid pictures of the scene which it im-

plied. A wide open park, enclosed around yet with its natural beauty unspoiled, with forest trees, many of them bearing fruit, by clear streams, on whose banks herds of antelopes or sheep—this was the scene connected itself in the mind of the Greek with the word *παράδεισος*, and for which language supplied no precise equivalent (*Anab.* i. 2, §7, 4, §9; ii. 4, §14; *Hellen.* i. 3, §14; *Oeconom.* 4, §14.). The writings of Xenophon, and through the mixture of Orientalisms in the later Greek conquests of Alexander, the word gained a new use which gave it a higher worth as for it a more perennial life. The garden became *δ παράδεισος τῆς τρυφῆς* (*Gen.* iii. 23; Joel ii. 3). They used the word whenever there was any allusion, however to the fair region which had been the home of man. The valley of the Jordan, in the version, is the paradise of God (*Gen.*). There is no tree in the paradise of God that which in the prophet's vision and glory of Assyria (*Ez.* xxi. 1-2). The chapter furnishes a more vivid picture of a *παράδεισος* than we find in the prophet to whom "the word of the Lord came" by the river of Chebar may well be what he describes so clearly. Elsewhere, as in the translation of the three passages, *paradis* occurs in the Hebrew, it is used in a general sense. (Comp. Is. i. 30; Num. Jer. xxix. 5; Susana. ver. 4.)

It was natural, however, that this high-sounding word should become the exclusive one, associated with new thoughts. Paradise, as another word to qualify it, was the high which man had lost, which was guarded by a flaming sword. Soon a new hope arose. Over and above all questions as to where the original garden had been, there came the belief that it did not belong entirely to the past. There was a paradise still into which man might hope to enter. It is a matter of some interest to ascertain what associations the word was connected with in the minds of the Jews of Palestine at the time of our Lord's coming, and what sense therefore we may attach to its use in the writings of the N.T.

In this as in other instances we may trace three modes of thought, each with its own characteristics, yet often blended together in various proportions, and melting one into the other in hardly perceptible degrees. Each has its part in the teaching of Christ. The language of the N.T. stands apart from all. (1.) To the Idealist, which Philo is the representative, *paradis* was nothing more than a symbol and a name. It was of this way of looking at it that we have seen in the teaching of the Son of God. The rivers of Eden are figures of the wisdom and wisdom, and she is as the tree and the river and waters the paradise of God (*John.* vi. 25-30). This, however, was complete recognition of Gen. ii. as speaking of it. Philo the thought of the past was forgotten. The primeval history spoke of a paradise

\* Professor Monier Williams allows the writer to say that he is of this opinion. Comp. also Friesemann, in

Humboldt's *Cosmos*, ii. note 238, and *Die Welt als Abeyclap.* a. v.

d water. Spiritual perfection (*ἀρετή*: paradise. The trees that grew in it were of the spiritual man. The fruits were life and knowledge and immortality. The four rivers flowing from one source were the four virtues of the later Platonists, from the same source of goodness (*ἀρετή*). It is obvious that a system of thought such as this was not likely to become confined to a single school, possible teacher. It has little or nothing in common with it in the N.T.

The rabbinic schools of Palestine presented about the very opposite of that of the writer. They had their descriptions, detailed, a complete topography of the world. Paradise, the garden of Eden, extended over the whole world. They discussed the question of its location. It was far off in the distant East, the foot of man had trod. It was a world of the dead, of Sheol, in the earth. Gehenna was on one side, with its torments. Paradise on the other, the home of the blessed. (Comp. Justin, and Schoettgen on *Luc.* xxiii.) It was there, Abraham, and Isaac, ready to receive their faithful descendants (Joseph, *de Macc.* c. 13). The place of honour at the feast of the Passover was Abraham's bosom (Luke xvi. 23). The new heir of immortality reclined as an honoured guest. Or, again, paradise was on the earth, nor within it, but the third heaven, or in some higher region. [E.N.] Or there were two paradises, the lower—one in heaven, for those who had attained to holiness—one in earth who had lived but decently (Schoettgen, *ib.* in *Apoc.* ii. 7), and the heavenly one sixty times as large as the whole world (Eisenmenger, *Entdeckt. Judenth.* ii. 10). It had seven palaces, and in each its appropriate dwellers (*ib.* p. 302). The righteous dead entered paradise, angels and of their grave-clothes, arrayed them in robes of glory, and placed on their heads crowns of gold and pearls (*ib.* p. 310). There was a river of life. Its pavement was of precious stones of healing power and wondrous strength on the banks of its streams (*ib.* p. 311). In this lower paradise the souls of the departed and on feast-days to the higher world every day there was the presence of the living council with His saints (*ib.* p. 312). (Comp. also Schoettgen, *Hor. Heb. in Luc.*

of the discussions and theories of the time grew a broad popular belief, fixed in the minds of men, accepted without discussion, as their best hopes. Their prayer for the dead was that his soul might rest in the garden of Eden (Maimonides, quoted by Wetstein in *Luc.* xviii.; *enl. Sermon on Sir G. Dalton*), the Essenes, as reported by Josephus, ii. 8, §11), may be accepted as a

fair representation of the thoughts of those who, like them, were not trained in the rabbinical schools, living in a simple and more child-like faith. To them accordingly paradise was a far-off land, a region where there was no scorching heat, no consuming cold, where the soft west-wind from the ocean blew for evermore. The visions of the 2nd book of Esdras, though not without an admixture of Christian thoughts and phrases, may be looked upon as representing this phase of feeling. There also we have the picture of a fair garden, streams of milk and honey, twelve trees laden with divers fruits, mighty mountains whereon grow lilies and roses (ii. 19)—a place into which the wicked shall not enter.

It is with this popular belief, rather than with that of either school of Jewish thought, that the language of the N.T. connects itself. In this, as in other instances, it is made the starting-point for an education which leads men to rise from it to higher thoughts. The old word is kept, and is raised to a new dignity or power. It is significant, indeed, that the word "paradise" nowhere occurs in the public teaching of our Lord, or in His intercourse with His own disciples. Connected as it had been with the thoughts of a sensuous happiness, it was not the fittest or the best word for those whom He was training to rise out of sensuous thoughts to the higher regions of the spiritual life. For them, accordingly, the kingdom of Heaven, the kingdom of God, are the words most dwelt on. The blessedness of the pure in heart is that they shall see God. If language borrowed from their common speech is used at other times, if they hear of the marriage-supper and the new wine, it is not till they have been taught to understand parables and to separate the figure from the reality. With the thief dying on the cross the case was different. We can assume nothing in the robber-outlaw but the most rudimentary forms of popular belief. We may well believe that the word used here, and here only, in the whole course of the Gospel history, had a special fitness for him. His reverence, sympathy, repentance, hope, uttered themselves in the prayer, "Lord, remember me when thou comest into thy kingdom!" What were the thoughts of the sufferer as to that kingdom we do not know. Unless they were supernaturally raised above the level which the disciples had reached by slow and painful steps, they must have been mingled with visions of an earthly glory, of pomp, and victory, and triumph. The answer to his prayer gave him what he needed most, the assurance of immediate rest and peace. The word Paradise spoke to him, as to other Jews, of repose, shelter, joy—the greatest contrast possible to the thirst, and agony, and shame of the hours upon the cross. Rudimentary as his previous thoughts of it might be, this was the word fittest for the education of his spirit.

There is a like significance in the general absence of the word from the language of the Epistles. Here also it is found nowhere in the direct teaching. It occurs only in passages that are apocalyptic, and therefore almost of necessity symbolic. St. Paul speaks of one, apparently of himself, as having been "caught up into paradise," as having there heard things that might not be uttered (2 Cor. xii. 3-5).

questions (1) whether the *raptus* of St. Paul was incorporeal, (2) whether the third heaven be identified with or distinguished from the lower world, whether this was the upper or the lower

paradise of the Jewish schools, comp. Meyer, *Wundtsworth*, *Abord. in loc.*; August, *de Gen. ad litt.* vii.; Ludwig, *Diss. de raptu Pauli*, in Menthen's *Thesaurus*. Interpreted by the current Jewish belief of the period, we

In the message to the first of the Seven Churches of Asia, "the tree of life which is in the midst of the paradise of God," appears as the reward of him that overcometh, the symbol of an eternal blessedness. (Comp. Dean Trench, *Comm. on the Epistles to the Seven Churches*, in loc.) The thing, though not the word, appears in the closing visions of Rev. xxi.

(4.) The eager curiosity which prompts men to press on into the things behind the veil, has led them to construct hypotheses more or less definite as to the intermediate state, and these have affected the thoughts which Christian writers have connected with the word paradise. Patristic and later interpreters follow, as has been noticed, in the footsteps of the Jewish schools. To Origen and others of a like spiritual insight, paradise is but a synonym for a region of life and immortality—one and the same with the third heaven (Jerome, *Ep. ad Joh. Hieros.* in Wordsworth on 2 Cor. xii.). So far as it is a place, it is as a school in which the souls of men are trained and learn to judge rightly of the things they have done and seen on earth (Origen, *de Princ.* ii. 12). The sermon of Basil, *de Paradiso*, gives an eloquent representation of the common belief of Christians who were neither mystical nor speculative. Minds at once logical and sensuous ask questions as to the locality, and the answers are wildly conjectural. It is not in Hades, and is therefore different from Abraham's bosom (Tertull. *de Idol.* c. 13). It is above and beyond the world, separated from it by a wall of fire (Tertull. *Apol.* c. 47). It is the "refrigerium" for all faithful souls, where they have the vision of saints, and angels, and of Christ himself (Just. M. *Respons. ad Orthodoxos*, 75 and 85), or for those only who are entitled, as martyrs, fresh from the baptism of blood, to a special reward above their fellows (Tertull. *de Anim.* c. 55).<sup>a</sup> It is in the fourth heaven (Clem. Alex. *Pragm.* §51). It is in some unknown region of the earth, where the seas and skies meet, higher than any earthly mountain (Joann. Damasc. *de Orthod. Fid.* ii. 11), and had thus escaped the waters of the Flood (P. Lombard, *Sentent.* ii. 17, E.). It has been identified with the *φυλακή* of 1 Pet. iii. 19, and the spirits in it are those of the antediluvian races who repented before the great destruction overtook them (Bishop Horsley, *Sermons*, xx.). (Comp. an elaborate note in Thilo, *Codex Apocryph. N. T.* p. 754.) The word enters largely, as might be expected, into the apocryphal literature of the early Church. Where the true Gospels are most reticent, the mythical are most exuberant. The Gospel of Nicodemus, in narrating Christ's victory over Hades (the "harrowing of hell" of our early English mysteries), tells how, till then, Enoch and Elijah had been its sole inhabitants<sup>d</sup>—how the

may refer the "third heaven" to a vision of the Divine Glory; "paradise," to a vision of the fellowship of the righteous dead, waiting in calmness and peace for their final resurrection.

<sup>a</sup> A special treatise by Tertullian, *de Paradiso*, is unfortunately lost.

<sup>b</sup> One trace of this belief is found in the Vulg. of Ecclesi. xlv. 16, "transitus est in paradysum," in the absence of any corresponding word in the Greek text.

<sup>c</sup> Thus it occurs in the Koran in the form *ferdus*; and the name of the Persian poet Ferdusi is probably derived from it (Humboldt's *Cosmos*, II. note 236).

<sup>d</sup> The passage quoted by Alt is from *Orat. c. Arrian. II.* (vol. i. p. 307, Colun. 1886): *Καὶ βασιλεὺς πάλαι ἐκείνων εἰς τὸν παράδεισον τῆς ἐκκλησίας*. Ingenious as his

penitent robber was there with his cross on the night of the crucifixion—how the souls of the pious were led thither by Christ, and were received by the archangel Michael, as he kept watch with his flaming swords at the gate. In the apocryphal *Acta Philippi* (Tischendorf, *Act. Apost.* p. 17), the Apostle is sentenced to remain for forty days outside the circle of paradise, because he had gone away to anger and cursed the people of Himerus for their unbelief.

(5.) The later history of the word presents some facts of interest. Accepting in this, as in other instances, the mythical elements of Eastern Christianity, the creed of Islam presented to its followers the hope of a sensuous paradise, and the Persian word was transplanted through it into the language spoken by them.<sup>e</sup> In the West it passes through some strange transformations, and descends to lower uses. The thought that men on entering the Church of Christ returned to the blessedness which Adam had forfeited, was symbolized in the church architecture of the fourth century. The narthex, or atrium, in which were assembled those who, not being able in full communion, were not admitted into the interior of the building, was known as the "Paradise" of the church (Alt, *Cultus*, p. 591). Athanasius, as has been said, speaks scornfully of Anasius as creeping into this paradise,<sup>f</sup> implying that it addressed itself to the ignorant and untaught. In the West we trace a change of firm, and one singular change of application. Paradise became to some Italian dialects *Paraviso*, and this passed into the French *parais*,<sup>g</sup> denoting the western porch of a church, or the open space in front of it (Glossary, s. v. 'Parvius'; *Lies, Etymology*, Wörterb. p. 700). In the church this space was occupied, as we have seen, by the lower classes of the people. The word was transferred from the place of worship to the place of amusement, and, though the position was entirely different, was applied to the highest and cheapest gallery of a French theatre (Alt, *ibid.*, l. c.). By some, however, this use of the word is connected only with the extreme height of the gallery, just as "chemin de paradis" is a proverbial phrase for any specially arduous undertaking (Fischerelles, *Dictionnaire Français*). [E. H. F.]

PARAH (פַּרְהָה, with the def. article פַּרְהָה־), Alex. 'Apar: *Ap̄phara*), one of the cities in the territory allotted to Benjamin, named only in the lists of the conquest (Josh. xviii. 23). It seems to be the first of the two groups into which the towns of Benjamin are divided, which seems to contain those of the northern and eastern portions of the tribe, between Jericho, Bethel, and Hebron; the towns of the south, from Gibeon to Jerusalem, being enumerated in the second group.

conjecture is, it may be questioned whether the name which he finds in the words is not the creation of his own imagination. There seems no ground for referring the word paradise to any section of the Church, but either to the Church as a whole (comp. August. *de Gen. ad lit.* 12: "The Ariens were to it what the serpent had been to the earlier paradise).

<sup>e</sup> This word will be familiar to many readers from the "Responsiones in *Parvum*" of the Oxford edition of the *Summa*, however little they may previously have connected that place with their thoughts of paradise. Others, however, *Parvium* (or *parvum*) is derived from *parvius* (s. v. 'Parvius'). (*Menage, orig. de la Langue Fran.* s. v. 'Parvius').

nomenclature "Aphra", it is specified by the text of Eusebius being want-miles east of Bethel. No traces of the et been found in that position; but the exists further to the S.E. attached to *Fārāh*, one of the southern branches *Wady Sureināt*, and to a site of ruins on of the same with the main valley. ification, first suggested by Dr. Robin- is supported by Van de Velde (*Memoir*, schwarz (126). The drawback men- r. R., namely, that the Arabic word ") differs in signification from the he cow") is not of much force, since it of modern names to cling to similarity th the ancient names, rather than of (Compare *Beit-ur*; *el Aal*, &c.)

f *Wady Fārāh* is given by Barclay 58, who proposes it for AENON. [G.]  
 ' EL-PARAN (פָּרָן, פָּרָן אֵיל :  
 . and Joseph.).

hown under KADESH that the name ponds probably in general outline with *Et-Tāh*. The Sinaitic desert, including f metamorphic rocks, granite, syenite, y, set, as it were, in a superficial margin ndstone, forms nearly a scalene triangle, x southwards, and having its base or ot a straight, but concave crescent line in short, of the *Et-Tāh* range of moun- ing about 120 miles from east to west. dip, the curve of the aforesaid crescent.

Speaking generally, the wilderness of x. 12, xii. 16, in which the march- Faberah and Hazeroth, if the latter ] be identical with *Hūdhrah*, are pro- towards its N.E. limit, may be said the *Et-Tāh* range, the wilderness of it, and the one to end where the other : of Paran is a stretch of chalky forma- alk being covered with coarse gravel, lack flint and drifting sand. The sur- tensive desert tract is a slope ascending north, and in it appear to rise (by map, from which most of the previous : taken) three chalky ridges, as it were, mountainous formation, all to the W. wn from *Ras Mohammed* to *Kūlat-el- e Mediterranean*. The caravan-route o *Akūba* crosses the *Et-Tāh* desert in V. to E., a little S. In this wide tract, is northwards to join the "wilderness " (Gen. xxi. 21, cf. 14), and eastward he wilderness of Zin [KADESH] on the order. Ishmael dwelt, and there pro- terity originally multiplied. Ascending rom it on a meridian to the E. of Beer- ould reach Maon and Carmel, or that ion of the territory of Judah, W. of a, known as "the South," where the s gradually into an uninhabited pasture- in spring and autumn, and in which, me of "Paran," Nabal fed his flocks 1.. Between the wilderness of Paran Zin no strict demarcation exists in the r do the natural features of the region,

asons why *Serbāl* should not be accepted,

r. [PNS] says the wilderness so called, ian and Egypt, bears this name at the

so far as yet ascertainel, yield a well-defined boundary. The name of Paran seems, as in the story of Ishmael, to have predominated towards the western extremity of the northern desert frontier of *Et-Tāh*, and in Num. xxiv. 4 the wilderness of Zin, not Paran, is spoken of as the southern border of the land or of the tribe of Judah (Josh. xv. 3). If by the Paran region we understand "that great and terrible wilderness" so emphatically described as the haunt of noxious creatures and the terror of the wayfarer (Deut. i. 19, viii. 15), then we might see how the adjacent tracts, which still must be called "wilderness," might, either as having less repulsive features, or because they lay near to some settled country, have a special nomenclature of their own. For the latter reason the wildernesses of Zin, eastward towards Edom and Mount Seir, and of Shur, westward towards Egypt, might be thus distinguished; for the former reason that of Sin and Sinai. It would not be inconsistent with the rules of Scriptural nomenclature, if we suppose these accessory wilds to be sometimes included under the general name of "wilderness of Paran;" and to this extent we may perhaps modify the previous general statement that S. of the *Et-Tāh* range is the wilderness of Sinai, and N. of it that of Paran. Still, construed strictly, the wildernesses of Paran and Zin would seem to lie as already approximately laid down. [KADESH.] If, however, as previously hinted, they may in another view be regarded as overlapping, we can more easily understand how Chedorlaomer, when he "smote" the peoples S. of the Dead Sea, returned round its south-western curve to the El-Paran, or "terebinth-tree of Paran," viewed as indicating a locality in connexion with the wilderness of Paran, and yet close, apparently, to that Dead Sea border (Gen. xiv. 6).

Was there, then, a Paran proper, or definite spot to which the name was applied? From Deut. i. 1 it should seem there must have been. This is confirmed by 1 K. xi. 18, from which we further learn the fact of its being an inhabited region; and the position required by the context here is one between Midian and Egypt. If we are to reconcile these passages by the aid of the personal history of Moses, it seems certain that the local Midian of the Sinaitic peninsula must have lain near the Mount Horeb itself (Ex. iii. 1, xviii. 1-5). The site of the "Paran" of Hadad the Edomite must then have lain to the N.W. or Egyptian side of Horeb. This brings us, if we assume any principal mountain, except *Serbāl*,<sup>a</sup> of the whole Sinaitic group, to be "the Mount of God," so close to the *Wady Feiran* that the similarity of name,<sup>b</sup> supported by the recently expressed opinion of eminent geographers, may be taken as establishing substantial identity. Ritter (vol. xiv. p. 740-1) and Stanley (p. 39-41) both consider that Rephidim is to be found in *Wady Feiran*, and no other place in the whole peninsula seems, from its local advantages, to have been so likely to form an *entrepôt* in Solomon's time between Edom and Egypt. Burckhardt (*Syria*, &c. 602) describes this wady as narrowing in one spot to 100 paces, and adds that the high mountains adjacent, and the thick woods which clothe it, contribute with the bad water to make it unhealthy, but that it is, for productiveness, the finest valley<sup>c</sup>

present day." No maps now in use give any closer approximation to the ancient name than *Feiran*.

<sup>a</sup> Compare, however, the same traveller's statement of the claims of a coast wady at *Tār*, on the Gulf of Suez

on of the hands of the Apostles to this in (Acts vi. 5). His name occurs but Scripture; and ecclesiastical history of him save the tradition that he yidom at Philippi in the reign of i. ii. 55). In the Calendar of the By he and Prochorus are commemorated . [E. H.—s.]

CH (פֶּרֶנֶץ: φαρνᾶχ: *Pharnach*). estor of Elizaphan prince of the tribe Num. xxxiv. 25).

I (פֶּרֶשֶׁת: φάρις; Alex. φάρις in ls-where φάρος: *Pharos*). The de- Parosh, in number 2172, returned with Zerubbabel (Ezr. ii. 3; Neh. ther detachment of 150 males, with their head, accompanied Ezra (Ezr. en of the family had married foreign . 25). They assisted in the building Jerusalem (Neh. iii. 25), and signed with Nehemiah (Neh. x. 14). In the asage the name Parosh is clearly that and not of an individual.

INDATHIA (מְדַתְיָא: φαρσιν- θαρσινεσθάν: *Pharsindatha*). The man's ten sons who were slain by the Jan (Esth. ix. 7). First (*Hinderb.*) o old Persian *frashvadata*, "given by ompanes the proper name Παρσώνδης, in Diol. ii. 33.

ANS Πάρθοι; *Parthi*) occurs only , where it designates Jews settled in rthia Proper was the region stretching uthern flank of the mountains which great Persian desert from the desert of t lay south of Hyrcania, east of Media, Sagartia. The country was pleasant, rtile, watered by a number of small ing from the mountains, and absorbed or a shorter course by the sands. It as the *Atak* or "skirt," and is still rt of Persia, though supporting only dation. In ancient times it seems to usely peopled; and the ruins of many ponently handsome cities attest its city. (See Fraser's *Khorassan*, p.

it Parthians are called a "Scythic" xi. 9, §2; Justin, xli. 1-4; Arrian, probably belonged to the great Turan. Various stories are told of their es of Chorene calls them the descend- am by Keturah (*Hist. Armen.* ii. 65); of Malala relates that they were Sey- the Egyptian king Sesostriis brought his return from Scythia, and settled in Persia (*Hist. Univ.* p. 26; compare .). Really, nothing is known of them time of Darius Hystaspis, when they the district which so long retained and appear as faithful subjects of the archs. We may fairly presume that dled to the empire by Cyrus, about t that monarch seems to have been the all the north-eastern provinces. He- ks of them as contained in the 16th Darius, where they were joined with ans, the Sogdians, and the Arians, or at (Herod. iii. 95). He also mentions

that they served in the army which Xerxes led into Greece, under the same leader as the Chorasians (vii. 66). They carried bows and arrows, and short spears; but were not at this time held in much repute as soldiers. In the final struggle between the Greeks and Persians they remained faithful to the latter, serving at Arbela (Arr. *Exp. Alex.* iii. 8), but offering only a weak resistance to Alexander when, on his way to Bactria, he entered their country (ib. 25). In the division of Alexander's dominions they fell to the share of Eumenes, and Parthia for some while was counted among the territories of the Seleucidae. About B.C. 256, however, they ventured upon a revolt, and under Arsaces (whom Strabo calls "a king of the Dahae," but who was more probably a native leader) they succeeded in establishing their independence. This was the beginning of the great Parthian empire, which may be regarded as rising out of the ruins of the Persian, and as taking its place during the centuries when the Roman power was at its height.

Parthia, in the mind of the writer of the Acts, would designate this empire, which extended from India to the Tigris, and from the Chorasman desert to the shores of the Southern Ocean. Hence the prominent position of the name Parthians in the list of those present at Pentecost. Parthia was a power almost rivalling Rome—the only existing power which had tried its strength against Rome and not been worsted in the encounter. By the defeat and destruction of Crassus near Carrhae (the Scriptural Harran) the Parthians acquired that character for military prowess which attaches to them in the best writers of the Roman classical period. (See Hor. *Od.* ii. 13; *Sat.* ii. 1, 15; Virg. *Georg.* iii. 31; Ov. *Art. Am.* i. 209, &c.) Their armies were composed of clouds of horsemen, who were all riders of extraordinary expertness; their chief weapon was the bow. They shot their arrows with wonderful precision while their horses were in full career, and were proverbially remarkable for the injury they inflicted with these weapons on an enemy who attempted to follow them in their flight. From the time of Crassus to that of Trajan they were an enemy whom Rome especially dreaded, and whose ravages she was content to repel without revenging. The warlike successor of Nerva had the boldness to attack them; and his expedition, which was well conceived and vigorously conducted, deprived them of a considerable portion of their territories. In the next reign, that of Hadrian, the Parthians recovered these losses; but their military strength was now upon the decline; and in A.D. 226, the last of the Arsacidae was forced to yield his kingdom to the revolted Persians, who, under Artaxerxes, son of Sassan, succeeded in re-establishing their empire. The Parthian dominion thus lasted for nearly five centuries, commencing in the third century before, and terminating in the third century after, our era.

It has already been stated that the Parthians were a Turanian race. Their success is to be regarded as the subversion of a tolerably advanced civilisation by a comparative barbarism—the substitution of Tatar coarseness for Arian polish and refinement. They aimed indeed at adopting the art and civilisation of those whom they conquered; but their imitation was a poor travesty, and there is something ludicrously grotesque in most of their more ambitious efforts. At the same time, they occasionally exhibit a certain amount of skill and

taste, more especially where they followed Greek models. Their architecture was better than their sculpture. The famous ruins of Ctesiphon have a grandeur of effect which strikes every traveller;

Figure of Fame, surmounting the Arch of Tacht-i-Bostan.  
(Sir R. K. Porter's *Towers*, vol. ii. fol. 62.)

and the Parthian constructions at Akkerkuf, El Hammam, &c., are among the most remarkable of Oriental remains. Nor was grandeur of general effect the only merit of their buildings. There is sometimes a beauty and delicacy in their ornamentation which is almost worthy the Greeks. (For

Ornamentation of Arch at Tacht-i-Bostan.

specimens of Parthian sculpture and architecture, see the *Travels* of Sir R. K. Porter, vol. i. plates 19-24; vol. ii. plates 62-66 and 82, &c. For the general history of the nation, see Heeren's *Manual of Ancient History*, pp. 229-305, Eng. Tr.; and the article PARTHIA in *Dict. of Gr. and Rom. Geography*.)

[G. R.]

**PARTRIDGE** (קָרֵד, *kôrê*; πέρδιξ, *perdix*) occurs only 1 Sam. xvi. 20, where David compares himself to a hunted *Kôrê* upon the mountains, and in Jer. xvii. 11, where it is said, "As a *Kôrê* sitteth on eggs, and hatcheth them not; so he that getteth riches, and not by right, shall leave them in the midst of his days, and at his end shall be a fool." The translation of *Kôrê* by "partridge" is supported by many of the old versions, the Hebrew name, as is generally supposed, having reference to the "call" of the cock bird; compare the German *Rebhuhn* from *rufen*, "to call."\* Bochart (*Hieroz.* ii. 632) has attempted to show that *Kôrê* denotes some species of "snipe," or "woodcock" (*rusticola* ?); he refers the Hebrew word to the Arabic *Kurîa*, which he believes, but

\* *Perdix enim nomen suum hebraicum קָרֵד habet a vocando, quemadmodum eodem avis Germanice dicitur Rebhuhn a rûpen, i. e. rufen, vocare* (Rosenmüll. *Schol. in Jer.* xvii. 11). Mr. Tristram says that *Kôrê* would be an admirable imitation of the call-note of *Cucubita maculata*.

\* The partridge of the mountains I suspect to be *Ammodendix Heyii*, familiar as it must have been to

upon very insufficient ground, to be the same of some one of these birds. Dehmann (*Form. Sam.* ii. 57) identifies the *Kurîa* of Arabic writers with the *Merops apus* (the Bee-eater); this explanation has deservedly found favour with no commentators. What the *Kurîa* of the Arabs may be we have been unable to determine; but the *Kôrê* then can be no doubt denotes a partridge. The "hunting this bird upon the mountains" (1 Sam. xvi. 20) entirely agrees with the habits of two well-known species of partridge, viz., *Ammodendix* (the Greek partridge) and *Ammodendix Heyii*. The specific name of the former is partly indicative of the localities it frequents, viz., rocky and hilly ground covered with brushwood.

*Ammodendix Heyii*.

It will be seen by the marginal reading that the passage in Jeremiah may bear the following interpretation:—As the *Kôrê* "gathereth *yaqim* which she hath not brought forth." This rendering is supported by the LXX. and Vulg., and is that which Maurer (*Comment. in Jer.* i. c.), Rosenmüller (*Schol. in Jer.* i. c.), Gesenius (*Thes. s. v.*), Winer (*Reallex.* "Rebhuhn"), and scholars generally, adopt. In order to meet the requirements of this latter interpretation, it has been asserted that the partridge is in the habit of stealing the eggs from the nests of its congeners and of sitting upon them, and that when the young are hatched they forsake their false parent; hence, it is said, the meaning of the simile: the man who has become rich by dishonest means loses his riches as the fittitious partridge her stolen brood (see Jones in *Sermon*, i. c.). It is perhaps almost needless to remark that this is a mere fable, in which, however, the ancient Orientals may have believed. There is a passage in the Arabian naturalist (quoted by Bochart (*Hieroz.* ii. 638), which shows that in his time this opinion was held with regard to some kind of partridge.\* The explanation of the rendering of the text of the A. V. is therefore as follows. Partridges were often "hunted" in ancient times as they are at present, either by hunting or by being driven from place to place till they be

David when he camped by the cave of Achish—A not more difficult by far to be induced to take wing than *C. maculata* (H. B. Tristram).

\* Partridges, like gallinaceous birds generally, not occasionally lay their eggs in the nests of other kinds of the same species. It is hardly likely, however, that the fact should have attracted the attention of the ancient; neither can it alone be sufficient to explain the simile.

more fatigued, when they are knocked down by the slinks or sercats of the Arabs (see Shaw's Trav. i. 425, 8vo.). Thus, nests were no doubt constantly disturbed, and many destroyed: as, therefore, is a partridge which is driven from her eggs, so is he that enricheth himself by unjust means—"he shall leave them in the midst of his days." The expression in Eccles. xi. 30, "like as a partridge taken

*Caccabis pectoralis.*

(and kept) in a cage," clearly refers, as Shaw (Trav. i. c.) has observed, to "a decoy partridge," and the Greek *περδικὴ θηραυτὴς* should have been so translated, as is evident both from the context and the Greek words; compare Aristot. *Hist. Anim.* ix. 9, § 3 and 4. Besides the two species of partridge natural above, the *Caccabis chukar*—the red-leg of India and Persia, which Mr. Tristram regards as distinct from the Greek partridge—is found about the Jordan. Our common partridge (*Perdix cinerea*), as well as the Barbary (*C. petrosa*) and red-leg (*C. rufa*), do not occur in Palestine. There are three or four species of the genus *Pterocles* (Sandgrouse) and *Fringilla* found in the Bible lands, but they do not appear to be noticed by any distinct term. [QUAIL.] [W. H.]

**PARUAH** (פָּרֻאָה: פֶּרֶאָה; Alex. φαρράου: *Parua*). The father of Jehoshaphat, Solomon's commissariat officer in Issachar (1 K. iv. 17).

**PARVAIM** (פָּרְבַּיִם: פֶּרְבַּיִם; Alex. φαρράμ: *Parva*). The place or country whence the gold was procured for the decoration of Solomon's Temple (2 Chr. iii. 6). The name occurs but once in the Bible, and there without any particulars that assist to its identification. We may notice the conjectures of Hitzig (*Ann. Dan.* 2. 5), that the name is derived from the Sanscrit *parva*, "hill," and betokens the *διδυμα ὄρη* in Arabia, mentioned by Ptolemy (vi. 7, § 11); of Kiehl (*Falkert*, p. 191), that it is an abbreviated form of Sepharvaim, which stands in the Syriac version and the Targum of Jonathan for the Sephar of Gen. x. 30; and of Wilford (quoted by Gesenius, *Thes.* ii. 1125), that it is derived from the Sanscrit *pāra*, "eastern," and is a general term for the East. Bohart's identification of it with Taprobane is etymologically incorrect. [W. L. B.]

**PASACH** (פָּסַח: פֶּסַח; Alex. φασαχ: *Phasach*). Son of Japhlet of the tribe of Asher (1 Chr. vii. 33), and one of the chiefs of his tribe.

\* Mr. Tristram tells us the *Caccabis saxatilis* makes an admirable decoy, becoming very tame and clever. He brought one home with him from Cyprus.

**PAS-DAM'MIM** (פֶּסֶם דָּמִיִּם: φασδομαμ; Alex. φασδομαμ: *Aphesdomin*). The form under which in 1 Chr. xi. 13 the name appears, which in 1 Sam. xvii. 1 is given more at length as **EPHES-DAMMIM**. The lexicographers do not decide which is the earlier or correcter of the two. Gesenius (*Thes.* 139) takes them to be identical in meaning. It will be observed that in the original of Pas-dammim, the definite article has taken the place of the first letter of the other form. In the parallel narrative of 2 Sam. xxiii., the name appears to be corrupted\* to *charpham* (חַרְפָּחַם), in the A. V. rendered "there." The present text of Josephus (*Ant.* vii. 12, § 4) gives it as *Arasmos* (Ἀρασμος).

The chief interest attaching to the appearance of the name in this passage of Chronicles is the evidence it affords that the place was the scene of repeated encounters between Israel and the Philistines, unless indeed we treat 1 Chr. xi. 13 (and the parallel passage, 2 Sam. xxiii. 11) as an independent account of the occurrence related in 1 Sam. xvii.—which hardly seems possible.

A ruined site bearing the name of *Damian* or *Chirbet Damoum*, lies near the road from Jerusalem to Beit Jibrin (Van de Velde, *S. & P.* ii. 193; Tobler, *3tte Wand*, 201), about three miles E. of *Shuweikeh* (Socho). This Van de Velde proposes to identify with Pas-dammim. [G.]

**PASEAH** (פָּסֵאָה: Πασαή; Alex. φασή: *Passeh*). 1. Son of Eshton, in an obscure fragment of the genealogies of Judah (1 Chr. iv. 12). He and his brethren are described as "the men of Rechah," which in the Targum of R. Joseph is rendered "the men of the great Sanhedrin."

2. (φασή Exr., φασή Neh.: *Phasea*). The "sons of Pasen" were among the Nethinim who returned with Zerubbabel (Ezr. ii. 49). In the A. V. of Neh. vii. 51, the name is written ΠΑΣΕΑΗ. Jehoiada, a member of the family, assisted in rebuilding the old gate of the city under Nehemiah (Neh. iii. 6).

**PASHUR** (פָּשֻׁר: Πασχάρ: *Phassur*), of uncertain etymology, although Jer. xx. 3 seems to allude to the meaning of it: comp. Ruth i. 20; and see Gesen. s. v.

1. Name of one of the families of priests of the chief house of Malchijah (Jer. xxi. 1, xxxviii. 1; 1 Chr. ix. 12, xxiv. 9; Neh. xi. 12). In the time of Nehemiah this family appears to have become a chief house, and its head the head of a course (Ezr. ii. 38; Neh. vii. 41, x. 3); and, if the text can be relied upon, a comparison of Neh. x. 3 with xii. 2 would indicate that the time of their return from Babylon was subsequent to the days of Zerubbabel and Jeshua. The individual from whom the family was named was probably Pashur the son of Malchiah, who in the reign of Zedekiah was one of the chief princes of the court (Jer. xxxviii. 1). He was sent, with others, by Zedekiah to Jeremiah at the time when Nebuchadnezzar was preparing his attack upon Jerusalem, to inquire what would be the issue, and received a reply full of forebodings of disaster (Jer. xxi.). Again somewhat later, when the temporary raising of the siege of Jerusalem by the advance of Pharaoh Hophra's army from Egypt, had inspired hopes in king and people that Jere-

\* This is carefully examined by Kennicott (*Dissertation*, p. 137, &c.).

miah's predictions would be falsified, Pashur joined with several other chief men in petitioning the king that Jeremiah might be put to death as a traitor, who weakened the hands of the patriotic party by his exhortations to surrender, and his prophecies of defeat, and he proceeded, with the other princes, actually to cast the prophet into the dry well where he nearly perished (Jer. xxxviii.). Nothing more is known of Pashur. His descendant Adaiah seems to have returned with Zerubbabel (1 Chr. ix. 12), or whenever the census there quoted was taken.

2. Another person of this name, also a priest, and "chief governor of the house of the Lord," is mentioned in Jer. xx. 1. He is described as "the son of Immer," who was the head of the 16th course of priests (1 Chr. xxiv. 14), and probably the same as Amariah, Neh. x. 3, xii. 2, &c. In the reign of Jehoiakim he showed himself as hostile to Jeremiah as his namesake the son of Malechiah did afterwards, and put him in the stocks by the gate of Benjamin, for prophesying evil against Jerusalem, and left him there all night. For this indignity to God's prophet, Pashur was told by Jeremiah that his name was changed to Mager-missabib (*Terror on every side*), and that he and all his house should be carried captives to Babylon and there die (Jer. xx. 1-6). From the expression in v. 6, it should seem that Pashur the son of Immer acted the part of a prophet as well as that of a priest.

3. Father of Gedaliah (Jer. xxxviii. 1). [A.C.H.]

PASSAGE.<sup>a</sup> Used in plur. (Jer. xii. 20), probably to denote the mountain region of Abairim, on the east side of Jordan [ABARIM] (Itinerary, *Pal.* p. 62; Ges. p. 987; Stanley, *S. & P.* p. 204, and App. p. 503). It also denotes a river-ford or a mountain gorge or pass. [MICHAMASH.] [H. W. P.]

<sup>a</sup> 1. מַעְבָּר; τὸ πέραν τῆς θαλάσσης.

2. מַעְבָּר; διάβασις; vadum (Gen. xxxii. 22); also a gorge (1 Sam. xlii. 23).

3. מַעְבָּרָה; φάραγξ; transcursus (Is. x. 29). "A ford" (Is. xvi. 2).

<sup>b</sup> This is evidently the word מַעְבָּרָה, the Aramaean form of מַעְבָּר, put into Greek letters. Some have taken the meaning of מַעְבָּר, the root of מַעְבָּר, to be that of "passing through," and have referred its application here to the passage of the Red Sea. Hence the Vulgate has rendered מַעְבָּר by *transitus*, Philo (*De 191. Moysi*, lib. iii. c. 29) by *διαβαρία*, and Gregory of Nazianzus by *διαβασις*. Augustine takes the same view of the word; as do also Van Hellen and a few other modern critics. Jerome applies *transitus* both to the *passing over* of the destroyer and the *passing through* the Red Sea (in Matt. xxvi.). But the true sense of the Hebrew substantive is plainly indicated in Ex. xii. 27; and the best authorities are agreed that מַעְבָּר never expresses "passing through," but that its primary meaning is "leaping over." Hence the verb is regularly used with the preposition עָל. But since, when we jump or step over anything, we do not tread upon it, the word has a secondary meaning, "to spare," or "to show mercy" (comp. Is. xxxi. 5, with Ex. xii. 27). The LXX. have therefore used *σπεύζω* in Ex. xii. 13; and Onkelos has rendered מַעְבָּרָה-זֶבַח, "the sacrifice of the Passover," by חֵם זֶבַח חַסֵּד, "the sacrifice of mercy." Josephus rightly explains *πάσχα* by *ὕπερβασις*. In the same purport, agree Aquila, Theodotion, Symmachus, several of the Fathers, and the best modern critics. Our own translators, by using the word "Passover," have made clear Ex. xii. 12, 23, and other passages, which are

phase, *ut cat transitus*; also, Πᾶσχα. τὰ δέσματα; in N. T. ἡ ἐορτὴ τῶν δέσμων; τῶν ἀζύμων; *azyza, festum azyzorum* of the three great annual Festivals of Israel celebrated in the month Nisan, from the 14th to the 21st.

The following are the principal passages in the Pentateuch relating to the Passover: Ex. xii. 1-13, in which there is a full account of its institution and first observance in Egypt, 3-10, in which the unleavened bread is in connexion with the sanctification of the first-born, but there is no mention of the paschal lamb, 14-19, where, under the title of the feast of unleavened bread, it is first called the other two great annual festivals, as the sabbath, and in which the paschal lamb is first mentioned, 20-28, in which the paschal lamb is first mentioned, 29-34, in which the paschal lamb is first mentioned, 35-38, in which the paschal lamb is first mentioned, 39-41, in which the paschal lamb is first mentioned, 42-48, in which the paschal lamb is first mentioned, 49-51, in which the paschal lamb is first mentioned, 52-54, in which the paschal lamb is first mentioned, 55-57, in which the paschal lamb is first mentioned, 58-60, in which the paschal lamb is first mentioned, 61-63, in which the paschal lamb is first mentioned, 64-66, in which the paschal lamb is first mentioned, 67-69, in which the paschal lamb is first mentioned, 70-72, in which the paschal lamb is first mentioned, 73-75, in which the paschal lamb is first mentioned, 76-78, in which the paschal lamb is first mentioned, 79-81, in which the paschal lamb is first mentioned, 82-84, in which the paschal lamb is first mentioned, 85-87, in which the paschal lamb is first mentioned, 88-90, in which the paschal lamb is first mentioned, 91-93, in which the paschal lamb is first mentioned, 94-96, in which the paschal lamb is first mentioned, 97-99, in which the paschal lamb is first mentioned, 100-102, in which the paschal lamb is first mentioned, 103-105, in which the paschal lamb is first mentioned, 106-108, in which the paschal lamb is first mentioned, 109-111, in which the paschal lamb is first mentioned, 112-114, in which the paschal lamb is first mentioned, 115-117, in which the paschal lamb is first mentioned, 118-120, in which the paschal lamb is first mentioned, 121-123, in which the paschal lamb is first mentioned, 124-126, in which the paschal lamb is first mentioned, 127-129, in which the paschal lamb is first mentioned, 130-132, in which the paschal lamb is first mentioned, 133-135, in which the paschal lamb is first mentioned, 136-138, in which the paschal lamb is first mentioned, 139-141, in which the paschal lamb is first mentioned, 142-144, in which the paschal lamb is first mentioned, 145-147, in which the paschal lamb is first mentioned, 148-150, in which the paschal lamb is first mentioned, 151-153, in which the paschal lamb is first mentioned, 154-156, in which the paschal lamb is first mentioned, 157-159, in which the paschal lamb is first mentioned, 160-162, in which the paschal lamb is first mentioned, 163-165, in which the paschal lamb is first mentioned, 166-168, in which the paschal lamb is first mentioned, 169-171, in which the paschal lamb is first mentioned, 172-174, in which the paschal lamb is first mentioned, 175-177, in which the paschal lamb is first mentioned, 178-180, in which the paschal lamb is first mentioned, 181-183, in which the paschal lamb is first mentioned, 184-186, in which the paschal lamb is first mentioned, 187-189, in which the paschal lamb is first mentioned, 190-192, in which the paschal lamb is first mentioned, 193-195, in which the paschal lamb is first mentioned, 196-198, in which the paschal lamb is first mentioned, 199-201, in which the paschal lamb is first mentioned, 202-204, in which the paschal lamb is first mentioned, 205-207, in which the paschal lamb is first mentioned, 208-210, in which the paschal lamb is first mentioned, 211-213, in which the paschal lamb is first mentioned, 214-216, in which the paschal lamb is first mentioned, 217-219, in which the paschal lamb is first mentioned, 220-222, in which the paschal lamb is first mentioned, 223-225, in which the paschal lamb is first mentioned, 226-228, in which the paschal lamb is first mentioned, 229-231, in which the paschal lamb is first mentioned, 232-234, in which the paschal lamb is first mentioned, 235-237, in which the paschal lamb is first mentioned, 238-240, in which the paschal lamb is first mentioned, 241-243, in which the paschal lamb is first mentioned, 244-246, in which the paschal lamb is first mentioned, 247-249, in which the paschal lamb is first mentioned, 250-252, in which the paschal lamb is first mentioned, 253-255, in which the paschal lamb is first mentioned, 256-258, in which the paschal lamb is first mentioned, 259-261, in which the paschal lamb is first mentioned, 262-264, in which the paschal lamb is first mentioned, 265-267, in which the paschal lamb is first mentioned, 268-270, in which the paschal lamb is first mentioned, 271-273, in which the paschal lamb is first mentioned, 274-276, in which the paschal lamb is first mentioned, 277-279, in which the paschal lamb is first mentioned, 280-282, in which the paschal lamb is first mentioned, 283-285, in which the paschal lamb is first mentioned, 286-288, in which the paschal lamb is first mentioned, 289-291, in which the paschal lamb is first mentioned, 292-294, in which the paschal lamb is first mentioned, 295-297, in which the paschal lamb is first mentioned, 298-300, in which the paschal lamb is first mentioned, 301-303, in which the paschal lamb is first mentioned, 304-306, in which the paschal lamb is first mentioned, 307-309, in which the paschal lamb is first mentioned, 310-312, in which the paschal lamb is first mentioned, 313-315, in which the paschal lamb is first mentioned, 316-318, in which the paschal lamb is first mentioned, 319-321, in which the paschal lamb is first mentioned, 322-324, in which the paschal lamb is first mentioned, 325-327, in which the paschal lamb is first mentioned, 328-330, in which the paschal lamb is first mentioned, 331-333, in which the paschal lamb is first mentioned, 334-336, in which the paschal lamb is first mentioned, 337-339, in which the paschal lamb is first mentioned, 340-342, in which the paschal lamb is first mentioned, 343-345, in which the paschal lamb is first mentioned, 346-348, in which the paschal lamb is first mentioned, 349-351, in which the paschal lamb is first mentioned, 352-354, in which the paschal lamb is first mentioned, 355-357, in which the paschal lamb is first mentioned, 358-360, in which the paschal lamb is first mentioned, 361-363, in which the paschal lamb is first mentioned, 364-366, in which the paschal lamb is first mentioned, 367-369, in which the paschal lamb is first mentioned, 370-372, in which the paschal lamb is first mentioned, 373-375, in which the paschal lamb is first mentioned, 376-378, in which the paschal lamb is first mentioned, 379-381, in which the paschal lamb is first mentioned, 382-384, in which the paschal lamb is first mentioned, 385-387, in which the paschal lamb is first mentioned, 388-390, in which the paschal lamb is first mentioned, 391-393, in which the paschal lamb is first mentioned, 394-396, in which the paschal lamb is first mentioned, 397-399, in which the paschal lamb is first mentioned, 400-402, in which the paschal lamb is first mentioned, 403-405, in which the paschal lamb is first mentioned, 406-408, in which the paschal lamb is first mentioned, 409-411, in which the paschal lamb is first mentioned, 412-414, in which the paschal lamb is first mentioned, 415-417, in which the paschal lamb is first mentioned, 418-420, in which the paschal lamb is first mentioned, 421-423, in which the paschal lamb is first mentioned, 424-426, in which the paschal lamb is first mentioned, 427-429, in which the paschal lamb is first mentioned, 430-432, in which the paschal lamb is first mentioned, 433-435, in which the paschal lamb is first mentioned, 436-438, in which the paschal lamb is first mentioned, 439-441, in which the paschal lamb is first mentioned, 442-444, in which the paschal lamb is first mentioned, 445-447, in which the paschal lamb is first mentioned, 448-450, in which the paschal lamb is first mentioned, 451-453, in which the paschal lamb is first mentioned, 454-456, in which the paschal lamb is first mentioned, 457-459, in which the paschal lamb is first mentioned, 460-462, in which the paschal lamb is first mentioned, 463-465, in which the paschal lamb is first mentioned, 466-468, in which the paschal lamb is first mentioned, 469-471, in which the paschal lamb is first mentioned, 472-474, in which the paschal lamb is first mentioned, 475-477, in which the paschal lamb is first mentioned, 478-480, in which the paschal lamb is first mentioned, 481-483, in which the paschal lamb is first mentioned, 484-486, in which the paschal lamb is first mentioned, 487-489, in which the paschal lamb is first mentioned, 490-492, in which the paschal lamb is first mentioned, 493-495, in which the paschal lamb is first mentioned, 496-498, in which the paschal lamb is first mentioned, 499-501, in which the paschal lamb is first mentioned, 502-504, in which the paschal lamb is first mentioned, 505-507, in which the paschal lamb is first mentioned, 508-510, in which the paschal lamb is first mentioned, 511-513, in which the paschal lamb is first mentioned, 514-516, in which the paschal lamb is first mentioned, 517-519, in which the paschal lamb is first mentioned, 520-522, in which the paschal lamb is first mentioned, 523-525, in which the paschal lamb is first mentioned, 526-528, in which the paschal lamb is first mentioned, 529-531, in which the paschal lamb is first mentioned, 532-534, in which the paschal lamb is first mentioned, 535-537, in which the paschal lamb is first mentioned, 538-540, in which the paschal lamb is first mentioned, 541-543, in which the paschal lamb is first mentioned, 544-546, in which the paschal lamb is first mentioned, 547-549, in which the paschal lamb is first mentioned, 550-552, in which the paschal lamb is first mentioned, 553-555, in which the paschal lamb is first mentioned, 556-558, in which the paschal lamb is first mentioned, 559-561, in which the paschal lamb is first mentioned, 562-564, in which the paschal lamb is first mentioned, 565-567, in which the paschal lamb is first mentioned, 568-570, in which the paschal lamb is first mentioned, 571-573, in which the paschal lamb is first mentioned, 574-576, in which the paschal lamb is first mentioned, 577-579, in which the paschal lamb is first mentioned, 580-582, in which the paschal lamb is first mentioned, 583-585, in which the paschal lamb is first mentioned, 586-588, in which the paschal lamb is first mentioned, 589-591, in which the paschal lamb is first mentioned, 592-594, in which the paschal lamb is first mentioned, 595-597, in which the paschal lamb is first mentioned, 598-600, in which the paschal lamb is first mentioned, 601-603, in which the paschal lamb is first mentioned, 604-606, in which the paschal lamb is first mentioned, 607-609, in which the paschal lamb is first mentioned, 610-612, in which the paschal lamb is first mentioned, 613-615, in which the paschal lamb is first mentioned, 616-618, in which the paschal lamb is first mentioned, 619-621, in which the paschal lamb is first mentioned, 622-624, in which the paschal lamb is first mentioned, 625-627, in which the paschal lamb is first mentioned, 628-630, in which the paschal lamb is first mentioned, 631-633, in which the paschal lamb is first mentioned, 634-636, in which the paschal lamb is first mentioned, 637-639, in which the paschal lamb is first mentioned, 640-642, in which the paschal lamb is first mentioned, 643-645, in which the paschal lamb is first mentioned, 646-648, in which the paschal lamb is first mentioned, 649-651, in which the paschal lamb is first mentioned, 652-654, in which the paschal lamb is first mentioned, 655-657, in which the paschal lamb is first mentioned, 658-660, in which the paschal lamb is first mentioned, 661-663, in which the paschal lamb is first mentioned, 664-666, in which the paschal lamb is first mentioned, 667-669, in which the paschal lamb is first mentioned, 670-672, in which the paschal lamb is first mentioned, 673-675, in which the paschal lamb is first mentioned, 676-678, in which the paschal lamb is first mentioned, 679-681, in which the paschal lamb is first mentioned, 682-684, in which the paschal lamb is first mentioned, 685-687, in which the paschal lamb is first mentioned, 688-690, in which the paschal lamb is first mentioned, 691-693, in which the paschal lamb is first mentioned, 694-696, in which the paschal lamb is first mentioned, 697-699, in which the paschal lamb is first mentioned, 700-702, in which the paschal lamb is first mentioned, 703-705, in which the paschal lamb is first mentioned, 706-708, in which the paschal lamb is first mentioned, 709-711, in which the paschal lamb is first mentioned, 712-714, in which the paschal lamb is first mentioned, 715-717, in which the paschal lamb is first mentioned, 718-720, in which the paschal lamb is first mentioned, 721-723, in which the paschal lamb is first mentioned, 724-726, in which the paschal lamb is first mentioned, 727-729, in which the paschal lamb is first mentioned, 730-732, in which the paschal lamb is first mentioned, 733-735, in which the paschal lamb is first mentioned, 736-738, in which the paschal lamb is first mentioned, 739-741, in which the paschal lamb is first mentioned, 742-744, in which the paschal lamb is first mentioned, 745-747, in which the paschal lamb is first mentioned, 748-750, in which the paschal lamb is first mentioned, 751-753, in which the paschal lamb is first mentioned, 754-756, in which the paschal lamb is first mentioned, 757-759, in which the paschal lamb is first mentioned, 760-762, in which the paschal lamb is first mentioned, 763-765, in which the paschal lamb is first mentioned, 766-768, in which the paschal lamb is first mentioned, 769-771, in which the paschal lamb is first mentioned, 772-774, in which the paschal lamb is first mentioned, 775-777, in which the paschal lamb is first mentioned, 778-780, in which the paschal lamb is first mentioned, 781-783, in which the paschal lamb is first mentioned, 784-786, in which the paschal lamb is first mentioned, 787-789, in which the paschal lamb is first mentioned, 790-792, in which the paschal lamb is first mentioned, 793-795, in which the paschal lamb is first mentioned, 796-798, in which the paschal lamb is first mentioned, 799-801, in which the paschal lamb is first mentioned, 802-804, in which the paschal lamb is first mentioned, 805-807, in which the paschal lamb is first mentioned, 808-810, in which the paschal lamb is first mentioned, 811-813, in which the paschal lamb is first mentioned, 814-816, in which the paschal lamb is first mentioned, 817-819, in which the paschal lamb is first mentioned, 820-822, in which the paschal lamb is first mentioned, 823-825, in which the paschal lamb is first mentioned, 826-828, in which the paschal lamb is first mentioned, 829-831, in which the paschal lamb is first mentioned, 832-834, in which the paschal lamb is first mentioned, 835-837, in which the paschal lamb is first mentioned, 838-840, in which the paschal lamb is first mentioned, 841-843, in which the paschal lamb is first mentioned, 844-846, in which the paschal lamb is first mentioned, 847-849, in which the paschal lamb is first mentioned, 850-852, in which the paschal lamb is first mentioned, 853-855, in which the paschal lamb is first mentioned, 856-858, in which the paschal lamb is first mentioned, 859-861, in which the paschal lamb is first mentioned, 862-864, in which the paschal lamb is first mentioned, 865-867, in which the paschal lamb is first mentioned, 868-870, in which the paschal lamb is first mentioned, 871-873, in which the paschal lamb is first mentioned, 874-876, in which the paschal lamb is first mentioned, 877-879, in which the paschal lamb is first mentioned, 880-882, in which the paschal lamb is first mentioned, 883-885, in which the paschal lamb is first mentioned, 886-888, in which the paschal lamb is first mentioned, 889-891, in which the paschal lamb is first mentioned, 892-894, in which the paschal lamb is first mentioned, 895-897, in which the paschal lamb is first mentioned, 898-900, in which the paschal lamb is first mentioned, 901-903, in which the paschal lamb is first mentioned, 904-906, in which the paschal lamb is first mentioned, 907-909, in which the paschal lamb is first mentioned, 910-912, in which the paschal lamb is first mentioned, 913-915, in which the paschal lamb is first mentioned, 916-918, in which the paschal lamb is first mentioned, 919-921, in which the paschal lamb is first mentioned, 922-924, in which the paschal lamb is first mentioned, 925-927, in which the paschal lamb is first mentioned, 928-930, in which the paschal lamb is first mentioned, 931-933, in which the paschal lamb is first mentioned, 934-936, in which the paschal lamb is first mentioned, 937-939, in which the paschal lamb is first mentioned, 940-942, in which the paschal lamb is first mentioned, 943-945, in which the paschal lamb is first mentioned, 946-948, in which the paschal lamb is first mentioned, 949-951, in which the paschal lamb is first mentioned, 952-954, in which the paschal lamb is first mentioned, 955-957, in which the paschal lamb is first mentioned, 958-960, in which the paschal lamb is first mentioned, 961-963, in which the paschal lamb is first mentioned, 964-966, in which the paschal lamb is first mentioned, 967-969, in which the paschal lamb is first mentioned, 970-972, in which the paschal lamb is first mentioned, 973-975, in which the paschal lamb is first mentioned, 976-978, in which the paschal lamb is first mentioned, 979-981, in which the paschal lamb is first mentioned, 982-984, in which the paschal lamb is first mentioned, 985-987, in which the paschal lamb is first mentioned, 988-990, in which the paschal lamb is first mentioned, 991-993, in which the paschal lamb is first mentioned, 994-996, in which the paschal lamb is first mentioned, 997-999, in which the paschal lamb is first mentioned, 1000-1002, in which the paschal lamb is first mentioned, 1003-1005, in which the paschal lamb is first mentioned, 1006-1008, in which the paschal lamb is first mentioned, 1009-1011, in which the paschal lamb is first mentioned, 1012-1014, in which the paschal lamb is first mentioned, 1015-1017, in which the paschal lamb is first mentioned, 1018-1020, in which the paschal lamb is first mentioned, 1021-1023, in which the paschal lamb is first mentioned, 1024-1026, in which the paschal lamb is first mentioned, 1027-1029, in which the paschal lamb is first mentioned, 1030-1032, in which the paschal lamb is first mentioned, 1033-1035, in which the paschal lamb is first mentioned, 1036-1038, in which the paschal lamb is first mentioned, 1039-1041, in which the paschal lamb is first mentioned, 1042-1044, in which the paschal lamb is first mentioned, 1045-1047, in which the paschal lamb is first mentioned, 1048-1050, in which the paschal lamb is first mentioned, 1051-1053, in which the paschal lamb is first mentioned, 1054-1056, in which the paschal lamb is first mentioned, 1057-1059, in which the paschal lamb is first mentioned, 1060-1062, in which the paschal lamb is first mentioned, 1063-1065, in which the paschal lamb is first mentioned, 1066-1068, in which the paschal lamb is first mentioned, 1069-1071, in which the paschal lamb is first mentioned, 1072-1074, in which the paschal lamb is first mentioned, 1075-1077, in which the paschal lamb is first mentioned, 1078-1080, in which the paschal lamb is first mentioned, 1081-1083, in which the paschal lamb is first mentioned, 1084-1086, in which the paschal lamb is first mentioned, 1087-1089, in which the paschal lamb is first mentioned, 1090-1092, in which the paschal lamb is first mentioned, 1093-1095, in which the paschal lamb is first mentioned, 1096-1098, in which the paschal lamb is first mentioned, 1099-1101, in which the paschal lamb is first mentioned, 1102-1104, in which the paschal lamb is first mentioned, 1105-1107, in which the paschal lamb is first mentioned, 1108-1110, in which the paschal lamb is first mentioned, 1111-1113, in which the paschal lamb is first mentioned, 1114-1116, in which the paschal lamb is first mentioned, 1117-1119, in which the paschal lamb is first mentioned, 1120-1122, in which the paschal lamb is first mentioned, 1123-1125, in which the paschal lamb is first mentioned, 1126-1128, in which the paschal lamb is first mentioned, 1129-1131, in which the paschal lamb is first mentioned, 1132-1134, in which the paschal lamb is first mentioned, 1135-1137, in which the paschal lamb is first mentioned, 1138-1140, in which the paschal lamb is first mentioned, 1141-1143, in which the paschal lamb is first mentioned, 1144-1146, in which the paschal lamb is first mentioned, 1147-1149, in which the paschal lamb is first mentioned, 1150-1152, in which the paschal lamb is first mentioned, 1153-1155, in which the paschal lamb is first mentioned, 1156-1158, in which the paschal lamb is first mentioned, 1159-1161, in which the paschal lamb is first mentioned, 1162-1164, in which the paschal lamb is first mentioned, 1165-1167, in which the paschal lamb is first mentioned, 1168-1170, in which the paschal lamb is first mentioned, 1171-1173, in which the paschal lamb is first mentioned, 1174-1176, in which the paschal lamb is first mentioned, 1177-1179, in which the paschal lamb is first mentioned, 1180-1182, in which the paschal lamb is first mentioned, 1183-1185, in which the paschal lamb is first mentioned, 1186-1188, in which the paschal lamb is first mentioned, 1189-1191, in which the paschal lamb is first mentioned, 1192-1194, in which the paschal lamb is first mentioned, 1195-1197, in which the paschal lamb is first mentioned, 1198-1200, in which the paschal lamb is first mentioned, 1201-1203, in which the paschal lamb is first mentioned, 1204-1206, in which the paschal lamb is first mentioned, 1207-1209, in which the paschal lamb is first mentioned, 1210-1212, in which the paschal lamb is first mentioned, 1213-1215, in which the paschal lamb is first mentioned, 1216-1218, in which the paschal lamb is first mentioned, 1219-1221, in which the paschal lamb is first mentioned, 1222-1224, in which the paschal lamb is first mentioned, 1225-1227, in which the paschal lamb is first mentioned, 1228-1230, in which the paschal lamb is first mentioned, 1231-1233, in which the paschal lamb is first mentioned, 1234-1236, in which the paschal lamb is first mentioned, 1237-1239, in which the paschal lamb is first mentioned, 1240-1242, in which the paschal lamb is first mentioned, 1243-1245, in which the paschal lamb is first mentioned, 1246-1248, in which the paschal lamb is first mentioned, 1249-1251, in which the paschal lamb is first mentioned, 1252-1254, in which the paschal lamb is first mentioned, 1255-1257, in which the paschal lamb is first mentioned, 1258-1260, in which the paschal lamb is first mentioned, 1261-1263, in which the paschal lamb is first mentioned, 1264-1266, in which the paschal lamb is first mentioned, 1267-1269, in which the paschal lamb is first mentioned, 1270-1272, in which the paschal lamb is first mentioned, 1273-1275, in which the paschal lamb is first mentioned, 1276-1278, in which the paschal lamb is first mentioned, 1279-1281, in which the paschal lamb is first mentioned, 1282-1284, in which the paschal lamb is first mentioned, 1285-1287, in which the paschal lamb is first mentioned, 1288-1290, in which the paschal lamb is first mentioned, 1291-1293, in which the paschal lamb is first mentioned, 1294-1296, in which the paschal lamb is first mentioned, 1297-1299, in which the paschal lamb is first mentioned, 1300-1302, in which the paschal lamb is first mentioned, 1303-1305, in which the paschal lamb is first mentioned, 1306-1308, in which the paschal lamb is first mentioned, 1309-1311, in which the paschal lamb is first mentioned, 1312-1314, in which the paschal lamb is first mentioned, 1315-1317, in which the paschal lamb is first mentioned, 1318-1320, in which the paschal lamb is first mentioned, 1321-1323, in which the paschal lamb is first mentioned, 1324-1326, in which the paschal lamb is first mentioned, 1327-1329, in which the paschal lamb is first mentioned, 1330-1332, in which the paschal lamb is first mentioned, 1333-1335, in which the paschal lamb is first mentioned, 1336-1338, in which the paschal lamb is first mentioned, 1339-1341, in which the paschal lamb is first mentioned, 1342-1344, in which the paschal lamb is first mentioned, 1345-1347, in which the paschal lamb is first mentioned, 1348-1350, in which the paschal lamb is first mentioned, 1351-1353, in which the paschal lamb is first mentioned, 1354-1356, in which the paschal lamb is first mentioned, 1357-1359, in which the paschal lamb is in which the paschal lamb is first mentioned, 1624-1

s which were to be made on each of the of the festival; Deut. xvi. 1-6, where and is prospectively given that the Passover, the other great festivals, should be observed in the place which the Lord might choose of promise, and where there appears to be the Chagigah, or voluntary peace-offering (p. 717b).

#### ORIGIN AND FIRST CELEBRATION OF THE PASSOVER.

The chosen people were about to be brought out of Egypt, the word of the Lord came to Moses commanding them to instruct all the congregation of Israel to prepare for their departure in accordance with a religious ordinance. On the tenth day of the month, which had then commenced, each family was to select from the flock a lamb or a kid, a male of the first year, without blemish. If his family was too small to select a lamb, he was permitted to select a goat or a kid, a male of the first year, without blemish. If his family was too small to select a lamb, he was permitted to select a goat or a kid, a male of the first year, without blemish. On the fourteenth day of the month, he was to kill the lamb, and the blood was to be sprinkled on the two side-posts and the lintel of the door of the house. The lamb was to be roasted whole. It was expressly commanded that it should be boiled, or that a bone of it should not be broken. Unleavened bread and bitter herbs were to be eaten with the flesh. No male uncircumcised was to join the company. Each man was to have his loins girt, to hold a staff in his hand, and to have shoes on his feet. The meal was to be eaten in haste, and it would seem that the lamb was to be eaten during the meal. The number of lambs was to be calculated as nearly as possible so that all the flesh of the lamb might be eaten. If any portion of it happened to remain, it was to be burned in the morning. No morsel of it was to be carried out of the house. The law was further directed to inform the people of God's purpose to smite the first-born of the Egyptians, to declare that the Passover was to be an ordinance for ever, to give them respecting the order and duration of the festival in future times, and to enjoin upon them to observe it in accordance with its meaning, from generation to generation.

A message was delivered to the people, and they bowed their heads in worship. The lambs were slain on the fourteenth day of the month, and the blood was sprinkled, and in the following evening, on the fifteenth day of the month, the paschal meal was eaten. At midnight the Egyptians were smitten, from the first-born of Pharaoh that sat on his throne unto the first-born of the captive that was in the dungeon, and the firstlings of the cattle. The king and the people were now in great haste, and the Israelites should have been ready, and readily bestowed on them

supplies for the journey. In such haste did the Israelites depart, on that very day (Num. xxxiii. 3), that they packed up their kneading-troughs containing the dough prepared for the morrow's provision, which was not yet leavened.

Such were the occurrences connected with the institution of the Passover, as they are related in Ex. xii. It would seem that the law for the consecration of the first-born was passed in immediate connexion with them (Ex. xiii. 1, 13, 15, 16).

#### II. OBSERVANCE OF THE PASSOVER IN LATER TIMES.

1. In the twelfth and thirteenth chapters of Exodus, there are not only distinct references to the observance of the festival in future ages (e. g. xii. 2, 14, 17, 24-27, 42, xiii. 2, 5, 8-10); but there are several injunctions which were evidently not intended for the first passover, and which indeed could not possibly have been observed. The Israelites, for example, could not have kept the next day, the 15th of Nisan, on which they commenced their march (Ex. xii. 51; Num. xxxiii. 3), as a day of holy convocation according to Ex. xii. 16. [FESTIVALS, vol. i. p. 617.]

In the later notices of the festival in the books of the law, there are particulars added which appear as modifications of the original institution. Of this kind are the directions for offering the Omer, or first sheaf of harvest (Lev. xxiii. 10-14), the instructions respecting the special sacrifices which were to be offered each day of the festival week (Num. xxviii. 16-25), and the command that the paschal lambs should be slain at the national sanctuary, and that the blood should be sprinkled on the altar, instead of the lintels and door-posts of the houses (Deut. xvi. 1-6).

Hence it is not without reason that the Jewish writers have laid great stress on the distinction between "the Egyptian Passover" and "the perpetual Passover." The distinction is noticed in the Mishna (*Pesachim*, ix. 5). The peculiarities of the Egyptian passover which are there pointed out are, the selection of the lamb on the 10th day of the month, the sprinkling of the blood on the lintels and door-posts, the use of hyssop in sprinkling, the haste in which the meal was to be eaten, and the restriction of the abstinence from unleavened bread to a single day. Elias of Byzantium adds, that there was no command to burn the fat on the altar, that the pure and impure all partook of the paschal meal contrary to the law afterwards given (Num. xviii. 11), that both men and women were then required to partake, but subsequently the command was given only to men (Ex. xxiii. 17; Deut. xvi. 16), that neither the Hallel nor any other hymn was sung, as was required in later times in accordance with Is. xxx. 29, that there were no days of holy convocation, and that the lambs were not slain in the consecrated place.<sup>a</sup>

2. The following was the general order of the observance of the festival in later times:

directed against the sacred animals, "the gods of Egypt," mentioned in Ex. xii. 12.

<sup>a</sup> Quoted by Carpov, *App. Crit.* p. 406. For other Jewish authorities, see Otho's *Lexicon*, s. v. *Pascha*.

<sup>b</sup> Another Jewish authority (*Tuniphtin in Pesachim*, quoted by Otho) adds that the rule that no one who partook of the lamb should go out of the house until the morning (Ex. xii. 22) was observed only on this one occasion; a point of interest, as bearing on the question relating to our Lord's last supper. See p. 719a.

Is translated in A. V. "the whole assembly gathered" (Ex. xii. 6), evidently mean every congregation. They are well rendered by *congregatio*, *Sac. iii. 3, §9*, "universa Israelitarum agmina excepto." The word *קָהָל*, though it means an assembly, must here signify no complete number of persons, not necessarily gathered.

<sup>c</sup> p. 714.

and Kurtz consider that this visitation was

n, which he handed to the next priest, who empty basin in return. A succession of was thus passed towards the altar, and a of empty ones towards the people. The stood next the altar threw the blood out the base in a single jet. When the first and performed their work, the second came then the third. The lambs were skinned, viscera taken out with the internal fat, carefully separated and collected in the, and the viscera were washed and replaced of the lamb, like those of the burnt Lev. i. 9, iii. 3-5; comp. *Pesachim*, vi. 1). les says that the tail was put with the fat *Pes.* v. 10). While this was going on was sung, and repeated a second, or even me, if the process was not finished. As ark, the people went home to roast their The fat was burned on the altar, with in- it same evening.\* When the 14th of Nisan e sabbath, all these things were done in the inner; but the court of the Temple, instead carefully cleansed as on other occasions, was flooded by opening a sluice. it made of the wood of the pomegranate ust lengthwise through the lamb (*Pesachim*, According to Justin Martyr, a second skewer, was put transversely through the ers, so as to form the figure of a cross.<sup>2</sup> The was of earthenware, and appears to have been ape something like a bee-hive with an opening side to admit fuel. The lamb was carefully as not to touch the side of the oven, lest

The remarkable passage in which this is commanded, ch. occurs Ex. xxiii. 17, 18, 19, and is repeated Ex. xlv. 23, 24, appears to be a sort of proverbial caution upon the three great feasts. "Three times in the year all thy males shall appear before the Lord God. Thou shalt not offer the blood of my sacrifice with leavened bread: neither shall the fat of my sacrifice made until the morning. The first of the first-fruits of land thou shalt bring into the house of the Lord thy God. Thou shalt not seethe a kid in his mother's milk." References to the Passover and Pentecost are plain enough. That which is supposed to refer to Tabernacles is also found Deut. xiv. 21). "Thou shalt not seethe a kid in his mother's milk," is explained by Abail, and in a Karaitic MS. spoken of by Cudworth, as being on a custom of boiling a kid in the milk of its mother as a charm, and sprinkling fields and orchards with milk to render them fertile (Cudworth, *True Notion of Liberty*, pp. 36, 37; Spencer, *Leg. Heb.* ii. 8. For interpretations of the passage, see Rosenmüller, vol. xxiii. 19). [IDOLATRY; vol. I. 859 b.]

The statement is in the Dialogue with Trypho, c. 40:— "ὁ καλεσθὲν πρόβατον ἐκείνο ὅπῃ ὅλον γίνεσθαι, ἰδὼν τοῦ σταυροῦ, δι' οὗ πάσχει ἑμῶν ὁ Χριστός· ὅν ἡ γὰρ ὀνομαζόμενον πρόβατον σχηματίζον ὁμοίως τῷ σχήματι τοῦ σταυροῦ ὀπταῖται. εἰς πῦρ ὀβελίσκος διαπυρνᾶται ἀπὸ τῶν κατωτάτων μέλεος τῆς κεφαλῆς, καὶ εἰς πάλιν κατὰ τὸ μέτωπον, ὅ ὑποσπῆνται καὶ αἱ χεῖρες τοῦ προβάτου. Justin was a native of Flavia Neapolis. It is a striking fact that the modern Samaritans roast their paschal lambs in the same manner at this day. Mr. George Grove, lately Nablous in 1861, in a letter to the writer of this article, says, "The lambs (they require six for the party now) are roasted all together by stuffing them alive, head downwards, into an oven which is like a well, about three feet diameter, and four or five feet high, in which a fire has been kept up several hours. After the lambs are thrust in, the top hole is covered with bushes and earth, to confine them till they are done. Each lamb has a stake or rod through him to draw him up by; and, to pre-

the cooking should be effected in part by not earthenware, and not entirely by fire, according to Ex. xii. 9; 2 Chr. xxxv. 13. If any one concerned in the process broke a bone of the lamb so as to infringe the command in Ex. xii. 46, he was subject to the punishment of forty stripes. The flesh was to be roasted thoroughly\* (*Ex.* xii. 9). No portion of it was allowed to be carried out of the house, and if any of it was not eaten at the meal, it was burned, along with the bones and tendons, in the morning of the 16th of Nisan; or, if that day happened to be the sabbath, on the 17th.

As the paschal lamb could be legally slain, and the blood and fat offered, only in the national sanctuary (Deut. xvi. 2), it of course ceased to be offered by the Jews after the destruction of Jerusalem. The spring festival of the modern Jews strictly consists only of the feast of unleavened bread.<sup>2</sup>

(b.) *The Unleavened Bread.*—There is no reason to doubt that the unleavened bread eaten in the Passover and that used on other religious occasions were of the same nature. It might be made of wheat, spelt, barley, oats, or rye, but not of rice or millet (*Pesachim*, ii. 5). It appears to have been usually made of the finest wheat flour\* (Buxt. *Syn. Jud.* c. xviii. p. 397). The greatest care was taken that it should be made in perfectly clean vessels and with all possible expedition, lest the process of fermentation should be allowed to commence in the slightest degree (*Pesachim*, iii. 2-5). It was probably formed into dry, thin biscuits, not unlike those used by the modern Jews.

The command to eat unleavened bread during

vent the spit from tearing away through the roast meat with the weight, a cross piece is put through the lower end of it." A similar account is given in Miss Rogers' *Domestic Life in Palestine*. Vitringa, Bochart, and Hottinger have taken the statement of Justin as representing the ancient Jewish usage; and, with him, regard the crossed spits as a prophetic type of the cross of our Lord. But it would seem more probable that the transverse spit was a mere matter of convenience, and was perhaps never in use among the Jews. The Rabbinical traditions relate that the lamb was called *Galeatus*, "qui quum totus assabatur, cum capite, cruribus, et intestinis, pedes autem et intestina ad latera ligabantur inter assandum, agnus ita quasi armatus representaverit, qui galea in capite et ense in latere est munitus" (Otho, *Lex. Rab.* p. 503).

\* The word נֶזֶק, in A. V. "raw," is rendered "alive" by Onkelos and Jonathan. In 1 Sam. ii. 15, it plainly means raw. But Jarchi, Aben Ezra, and other Jewish authorities, understand it as half-dressed (Rosenmüller, *loc. cit.*).

\* There are many curious particulars in the mode in which the modern Jews observe this festival to be found in Buxt. *Syn. Jud.* c. xviii. xix.; Picart, *Cérémonies Religieuses*, vol. i.; Mill, *The British Jews* (London, 1853); Stauben, *Scènes de la vie Juive en Alsace* (Paris, 1860). The following appear to be the most interesting:—A shoulder of lamb, thoroughly roasted, is placed on the table to take the place of the paschal lamb, with a hard boiled egg as a symbol of wholeness. Besides the sweet sauce, to remind them of the sort of work carried on by their fathers in Egypt (see p. 716a), there is sometimes a vessel of salt and water, to represent the Red Sea, into which they dip the bitter herbs. But the most remarkable usages are those connected with the expectation of the coming of Elijah. A cup of wine is poured out for him, and stands all night upon the table. Just before the filling of the cups of the guests the fourth time, there is an interval of dead silence, and the door of the room is opened for some minutes to admit the prophet.

\* Ewald (*Altorthümer*, p. 391) and Hüllman (quoted by Winer) conjecture the original unleavened bread of the Passover to have been of barley, in connexion with the commencement of barley harvest.

the seven days of the festival, under the penalty of being cut off from the people, is given with marked emphasis, as well as that to put away all leaven from the house during the festival (Ex. xii. 15, 19, 20, xiii. 7). But the rabbins say that the house was carefully cleansed and every corner searched for any fragment of leavened bread in the evening before the 14th of Nisan, though leavened bread might be eaten till the sixth hour of that day, when all that remained was to be burned (*Pesachim*, i. 1, 4; and citation in Lightfoot, *Temple Serv.*, xii. §1).

(c.) *The Bitter Herbs and the Sauce.*—According to *Pesachim* (ii. 6) the bitter herbs (מררים; *marorim*; *lactucae agrestes*, Ex. xii. 8) might be endive, chervil, wild lettuce, or nettles. These plants were important articles of food to the ancient Egyptians (as is noticed by Pliny), and they are said to constitute nearly half that of the modern Egyptians. According to Niebuhr they are still eaten at the Passover by the Jews in the East. They were used in former times either fresh or dried, and a portion of them is said to have been eaten before the unleavened bread (*Pesach*, x. 3).

The sauce into which the herbs, the bread, and the meat were dipped as they were eaten (John xii. 26; Matt. xxvi. 23) is not mentioned in the Pentateuch. It is called in the Mishna חרוסת. According to Bartenora it consisted of only vinegar and water; but others describe it as a mixture of vinegar, figs, dates, almonds, and spice. The same sauce was used on ordinary occasions thickened with a little flour; but the rabbins forbade this at the Passover, lest the flour should occasion a slight degree of fermentation. Some say that it was beaten up to the consistence of mortar or clay, in order to commemorate the toils of the Israelites in Egypt in laying bricks (Buxtorf, *Lex. Tul.* col. 831; *Pesachim*, ii. 8, x. 3, with the notes of Bartenora, Maimonides, and Surenhusius).

(d.) *The Four Cups of Wine.*—There is no mention of wine in connexion with the Passover in the Pentateuch; but the Mishna strictly enjoins that there should never be less than four cups of it provided at the paschal meal even of the poorest Israelite (*Pes.* x. 1). The wine was usually red, and it was mixed with water as it was drunk (*Pes.* vii. 13, with Bartenora's note; and Otho's *Lex.* p. 507). The cups were handed round in succession at specified intervals in the meal (see p. 717a). Two of them appear to be distinctly mentioned Luke xii. 17, 20. "The cup of blessing" (1 Cor. x. 16) was probably the latter one of these, and is generally considered to have been the third of the series, after which a grace was said; though a comparison of Luke xii. 20 (where it is called "the cup after supper") with *Pes.* x. 7, and the designation בום הלל, "cup of the Hallel," might rather suggest that it was the fourth and last cup. Schoettgen, however, is inclined to doubt whether there is any reference, in either of the passages of the N. T., to the formal ordering of the cups of the Passover, and proves that the name "cup of blessing" (בום של ברכה) was applied in a general way to any cup which was drunk with thanksgiving, and that the expression was often used

metaphorically, e. g. *Pes.* xvi. 13 (*Ex.* 1 Cor. x. 16). See also Carpzov, *App. Crit.* p. 17.

The wine drunk at the meal was not more than the four cups, but none could be taken in the interval between the third and fourth (*Pes.* x. 7).

(e.) *The Hallel.*—The service of psalmody at the Passover is not mentioned in the Law. It is contracted from הלל (Hallelujah), and consisted of the series of Psalms from cxv. to cxviii. The first portion, comprising Ps. cxv. and cxvi., was sung in the early part of the meal, the second part after the fourth cup of wine. It is supposed to have been the "hymn" sung by Lord and his Apostles (Matt. xxvi. 30; Mark xvi. 26; Buxtorf, *Lex. Tul.* s. v. הלל, and *ibid.* p. 48; Otho, *Lex.* p. 271; Carpzov, *ibid.* p. 374).

(f.) *Modes and Order of the Paschal Supper.*—Adopting as much from Jewish tradition as is inconsistent or improbable, the following appear to have been the usual custom. All work, except that belonging to a few trades connected with war, was suspended for some hours before the 14th of Nisan. There was, however, no fast in this respect. The Galileans abstained from the whole day; the Jews of the south from the middle of the tenth hour, that is, from three o'clock. It was not lawful to eat ordinary food after mid-day. The reason for this was, that the paschal supper might be eaten with the enjoyment furnished by a full stomach (*Pes.* iv. 1-3, x. 1, with Maimonides, *ibid.*); it is also stated that this preliminary fast was especially incumbent on the eldest son, and was intended to commemorate the first-born in Egypt. This was particularly true of later times (Buxtorf, *Syn. Jud.* xvi. p. 11).

No male was admitted to the table unless he was circumcised, even if he was of the tribe of Levi (Ex. xii. 48). Neither, according to the law, was any one of either sex who was ceremonially unclean (Num. xix. 13; *B. J.* vi. 9, §3). But this rule was on occasions liberally applied. In the case of the kish's Passover (2 Cor. xii.), we find that a degree of legal purity was required in the lambs than to eat them, and that women were permitted, though not commanded, to eat (*Pes.* viii. 1; *Chagigah*, t. 1; comp. *ibid.* vi. 9, §3), in accordance with the law of Scripture which have been mentioned of David and Mary (p. 714a). But the women of recent times, excluded all but the Passover, was customary for the number of persons not less than ten (Joseph, *E. J.* x. 1, §1), and perhaps generally under twenty, but sometimes as many as a hundred, if each consumed less than of the lamb as large as an ox (*ibid.*).

When the meal was prepared, the participants placed round the table, the paschal lamb in the place of honour, probably somewhat to the right of the rest. There is no reason to think that

\* Other particulars of the precautions which were taken are given in *Pesachim*, and also by Maimonides, in his treatise *De Fermentato et Azymo*, a compendium of which is given by Carpzov, *App. Crit.* p. 404.

\* Certain precautions to avoid pollution were taken

a month before the Passover. Amongst the Jews an annual whitewashing of the sepulchres of the dead (Isaiah, *ibid.* iv. 2, 5). In John vi. 22, we find the Jews coming up to Jerusalem to purify themselves before the feast.

Hebrews sat, as they were accustomed to do ordinary meals (see Otho, *Lex.* p. 7). But the custom of reclining at table had become that posture appears to have been enjoined, ground of its supposed significance. The Jews says that the meanest Israelite should at the Passover "like a king, with the ease of a free man" (*Pes.* x. 1, with Maimonides).

He was to keep in mind that when his son stood at the feast in Egypt they took the Passover of slaves (R. Levi, quoted by Otho, p. 504). And His Apostles conformed to the usual custom of their time, and reclined (Luke xxii. 14, &c.). At the party was arranged, the first cup of wine was filled, and a blessing was asked by the head of the family on the feast, as well as a special blessing on the cup. The bitter herbs were then placed on the table, and a portion of them eaten, either without the sauce. The unleavened bread was laid round next, and afterwards the lamb was laid on the table in front of the head of the family (*Pes.* x. 3).

Before the lamb was eaten, the first cup of wine was filled, and the son, in accordance with Ex. xii. 26, asked his father the reason of the feast. In reply, an account was given of the sufferings of the Israelites in Egypt, and their deliverance, with a particular explanation of the Passover (Deut. xxvi. 5, and the first part of the *Pes.* xiii., xiv.) was sung. This being done the lamb was carved and eaten. The third cup of wine was poured out and drunk, and soon afterwards the fourth. The second part of the *Pes.* x. xiv. to xviii. was then sung (*Pes.* x. x. to xxi.). The fifth wine-cup appears to have been introduced, but perhaps only in later times. The sixth cup, termed the greater Hallel (*Pes.* xxi. to xxii.), was sung on such occasions (Buxt. *Syn.* p. 181.). The meal being ended, it was unnecessary to introduce anything in the way of dessert.

The Israelites who lived in the country appear to have been accommodated at the feast by the Jews of Jerusalem in their houses, so far as a room for them (Luke xxii. 10-12; Matt. xxvi. 18).

It is said that the guests left in return for the entertainment the skin of the lamb, the horns of other vessels which they had used. Those which did not get received into the city encamped the walls in tents, as the pilgrims now do at Jerusalem.

The number of these must have been great, if we may trust the computation of Josephus that they who partook of the Passover in the reign of Nero, to above 2,700,000 (*Jos.* vi. 9, §3.). It is not wonderful that there were apt to break out in such a vast multitude brought together (*Jos.* vii. 9, §2; *Jos.* vii. 10, §3, &c.; comp. Matt. xxvi. 5; Luke xiii. 1).

The paschal meal, such of the Israelites as were so disposed left Jerusalem, and served the remainder of the festival at their respective homes (*Deut.* xvi. 7). But see Lightfoot on Luke ii. 43.

*The first Sheaf of Harvest.*—The offering of the first sheaf of wheat (*Lev.* ii. 12; *Num.* xiii. 14; *Lev.* xxi. 10; *Lev.* xxiii. 10-14). It is there commanded that the Israelites might reach the land of promise, and bring, on the 16th of the month, "the

first sheaf of the harvest" (i. e. the day of holy convocation [PENTECOST, §1 note]) the first sheaf of the harvest to the priest, to be waved by him before the Lord. A lamb, with a meat-offering and a drink-offering, was to be offered at the same time. Until this ceremony was performed, no bread, parched corn, or green ears, were to be eaten of the new crop (see *Josh.* v. 11, 12).<sup>7</sup> It was from the day of this offering that the fifty days began to be counted to the day of Pentecost (*Lev.* xxiii. 15). The sheaf was of barley, as being the grain which was first ripe (*2 Kings* iv. 42). Josephus relates (*Ant.* iii. 10, §5) that the barley was ground, and that ten handfuls of the meal were brought to the altar, one handful being cast into the fire and the remainder given to the priests. The Mishna adds several particulars, and, amongst others, that men were formally sent by the Sanhedrim to cut the barley in some field near Jerusalem; and that, after the meal had been sifted thirteen times, it was mingled with oil and incense (*Menachoth*, x. 2-6).

(h.) *The Chagigah.*—The daily sacrifices are enumerated in the Pentateuch only in *Num.* xxviii. 19-23, but reference is made to them *Lev.* xxiii. 8. Besides these public offerings (which are mentioned, p. 714a), there was another sort of sacrifice connected with the Passover, as well as with the other great festivals, called in the Talmud *חגיגה* (*Chagigah*, i. e. "festivity"). It was a voluntary peace-offering made by private individuals. The victim might be taken either from the flock or the herd. It might be either male or female, but it must be without blemish. The offerer laid his hand upon its head and slew it at the door of the sanctuary. The blood was sprinkled on the altar, and the fat of the inside, with the kidneys, was burned by the priest. The breast was given to the priest as a wave-offering, and the right shoulder as a heave-offering (*Lev.* iii. 1-5, vii. 29-34). What remained of the victim might be eaten by the offerer and his guests on the day on which it was slain, and on the day following; but if any portion was left till the third day, it was burned (*Lev.* vii. 16-18; *Pesach.* vi. 4). The connexion of these free-will-peace-offerings with the festivals, appears to be indicated *Num.* x. 10; *Deut.* xiv. 26; *2 Chr.* xxx. 22, and they are included under the term Passover in *Deut.* xvi. 2—"Thou shalt therefore sacrifice the passover unto the Lord thy God, of the flock and of the herd." Onkelos here understands the command to sacrifice from the flock, to refer to the paschal lamb; and that to sacrifice from the herd, to the Chagigah. But it seems more probable that both the flock and the herd refer to the Chagigah, as there is a specific command respecting the paschal lamb in *vers.* 5-7. (See De Muis' note in the *Crit. Sac.*; and Lightfoot, *Hor. Heb.* on *John* xviii. 28.) There are evidently similar references, *2 Chr.* xxx. 22-24, and *2 Chr.* xxxv. 7. Hezekiah and his princes gave away at the great Passover which he celebrated, two thousand bullocks and seventeen thousand sheep; and Josiah, on a similar occasion, is said to have supplied the people at his own cost with lambs "for the Passover offerings," besides three thousand oxen. From these passages and others, it may be seen that the eating of the Chagigah was an occasion of social festivity

as described in the Mishna. See p. 714b.

<sup>7</sup> On this text, see PENTECOST.

\* There is no mention of the Omer in *Pesachim*.

connected with the festivals, and especially with the Passover. The principal day for sacrificing the Passover Chagigah, was the 15th of Nisan, the first day of holy convocation, unless it happened to be the weekly sabbath. The paschal lamb might be slain on the sabbath, but not the Chagigah. With this exception, the Chagigah might be offered on any day of the festival, and on some occasions a Chagigah victim was slain on the 14th, especially when the paschal lamb was likely to prove too small to serve as meat for the party (*Pesach*. iv. 4, x. 3; Lightfoot, *Temple Service*, c. xii.; Reland, *Ant.* iv. c. ii. §2).

That the Chagigah might be boiled, as well as roasted, is proved by 2 Chr. xxxv. 13, "And they roasted the passover with fire according to the ordinance: but the other holy offerings *sod* they in pots, and in caldrons, and in pans, and divided them speedily among the people."

(i.) *Release of Prisoners*.—It is a question whether the release of a prisoner at the Passover (Matt. xvii. 15; Mark xv. 6; Luke xxiii. 17; John xviii. 39) was a custom of Roman origin resembling what took place at the betisternium (Liv. v. 13); and, in later times, on the birthday of an emperor; or whether it was an old Hebrew usage belonging to the festival, which Pilate allowed the Jews to retain. Grotius argues in favour of the former notion (On Matt. xvii. 15). But others (Hottinger, Schoettgen, Winer) consider that the words of St. John—*ἔστι δὲ συνήθεια ὑμῶν*—render it most probable that the custom was essentially Hebrew. Schoettgen thinks that there is an allusion to it in *Pesachia* (viii. 6), where it is permitted that a lamb should be slain on the 14th of Nisan for the special use of one in prison to whom a release had been promised. The subject is discussed at length by Hottinger, in his tract *De Ritu dimittendi Reum in Festo Paschatis*, in the *Thesaurus Novus Theologico-Philologicus*.

(k.) *The Second, or Little Passover*.—When the Passover was celebrated the second year, in the wilderness, certain men were prevented from keeping it, owing to their being defiled by contact with a dead body. Being thus prevented from obeying the Divine command, they came anxiously to Moses to inquire what they should do. He was accordingly instructed to institute a second Passover, to be observed on the 14th of the following month, for the benefit of any who had been hindered from keeping the regular one in Nisan (Num. ix. 11). The Talmudists called this the Little Passover (*פסח קטן*). It was distinguished, according to them, from the Greater Passover by the rites lasting only one day, instead of seven days, by it not being required that the Hallel should be sung during the meal, but only when the lamb was slaughtered, and by it not being necessary for leaven to be put out of the houses (*Pesach*. ix. 3; Buxt. *Lex. Tul.* col. 1766.).

(l.) *Observances of the Passover recorded in Scripture*.—Of these seven are of chief historical importance.

1. The first Passover in Egypt (Ex. xii.).
2. The first kept in the desert (Num. ix.).

\* Josephus in like manner calls the 14th of Nisan the first day of unleavened bread (*B. J.* v. 3, §1); and he speaks of the festival of the Passover as lasting eight days (*Ant.* ii. 15, §1). But he elsewhere calls the 15th of Nisan "the commencement of the feast of unleavened bread" (*Ant.* iii. 10, §5). Either mode of speaking was

There is no notice of the observance of Passover in the desert; and Hapfield, Keil, have concluded that none took place there, one and that at Gilgal. The neglect of the army render this probable. But Galyat that a special permission was given to to continue the ordinance of the Passover Keil on Joshua v. 10.]

3. That celebrated by Joshua at Gilgal, immediately after the circumcision of the people, the manna ceased (Josh. v.).

4. That which Hezekiah observed on the occasion of his restoring the national worship (2 Chr. xxx. 27). Owing to the impurity of a considerable number of the priests in the month Nisan, the festival was not held till the second month, the month of the Little Passover. The postponement was terminated by a decree of the congregation, the same authority, the festival was repeated a second seven days to serve the need of a multitude who wished to attend it. The case of the probable impurity of a considerable number of the people, the Levites were commanded to slaughter the lambs, and the king prayed that the Lord would pardon every one who was guilty, though his legal pollution might be upon him.

5. The Passover of Josiah in the eighth year of his reign (2 Chr. xxxv.). On this occasion, in the Passover of Hezekiah, the Levites were commanded to have slain the lambs (ver. 6), and it is stated that they flayed them.

6. That celebrated by Ezra after the return from Babylon (Ez. vi.). On this occasion, the Levites slew the lambs, and for the same reason they did in Hezekiah's Passover.

7. The last Passover of our Lord's life.

### III. THE LAST SUPPER.

1. Whether or not the meal at which our Lord instituted the sacrament of the Eucharist was paschal supper according to the law, is a question of great difficulty. No point in the Gospel has been more disputed. If we had no other guide us but the three first Gospels, no doubt a kind could well be raised, though the matter may not be free from difficulties in them. We find them speaking, in accordance with the usage, of the day of the supper as that on which "the Passover must be killed," and as "the first day of unleavened bread" (Matt. xxvi. 17; Mark 12; Luke xxi. 7). Each relates that the supper was in the guest-chamber was secured in the manner with those who came from a distance to the festival. Each states that "they made *pascha* Passover," and that, when the evening was over, our Lord, taking the place of the head of the table, sat down with the twelve. He Himself then calls the meal "this Passover" (Luke xxi. 14). After a thanksgiving, he passes round the cup of wine (Luke xxi. 17), and, when the supper ended, the usual "cup of blessing" (comp. Luke 20; 1 Cor. x. 16, xi. 25). A hymn is then sung (Matt. xxvi. 30; Mark xiv. 26), which it is not able to suppose was the last part of the Hallel.

If it be granted that the supper was eaten

evidently allowable; in one case regarding it as a fact that the eating of unleavened bread began on the 14th; and in the other, distinguishing the meal of unleavened bread, lasting from the first day of preparation to the concluding one, from the paschal meal.

of the 14th of Nisan, the apprehension, crucifixion of our Lord, must have occurred Friday the 15th, the day of holy convocation, which was the first of the seven days of the week. The weekly sabbath on which He was buried in the tomb was the 16th, and the Sunday of resurrection was the 17th.

On the other hand, if we had no information which is to be gathered from St. John's Gospel, we could not hesitate to infer that the evening supper was that of the 13th of Nisan, preceding that of the paschal meal. It is spoken of as occurring before the feast of Passover (xiii. 1, 2). Some of the disciples that Christ told Judas, while they were at supper, that they "had need of against the Jews" (xiii. 29). In the night which follows the Jews will not enter the praetorium lest the temple should be defiled and so not able to "eat the Passover" (xviii. 28). When our Lord is before Pilate about to be led out to crucifixion, we are told that it was "the preparation of the Passover" (xix. 14).

After the crucifixion, the Jews are said to have remained in Jerusalem "because it was the preparation, that the bodies should not remain upon the cross on the Sabbath day, for that Sabbath day was a high day" (xix. 31).

If we admit, in accordance with the first view of the passages, that the last supper was on the 13th of Nisan, our Lord must have been crucified on the 14th, the day on which the paschal lamb was slain and eaten. He lay in the grave on the 15th (which was a "high day" or double sabbath, because the weekly sabbath coincided with the day of holy convocation), and the Sunday of the resurrection was the 16th.

It is alleged that this view of the case is strengthened by certain facts in the narratives of the synoptic gospels, as well as that of St. John, compared with the law and with what we know of Jewish customs in later times. If the meal was the paschal supper, the law of Ex. xii. 22, that none "shall go out of the door of his house until the morning," must have been broken, not only by Judas (John x. 30), but by our Lord and the other disciples (John xii. 39).<sup>a</sup> In like manner it is said that the law for the observance of the 15th, the day of convocation with which the paschal week commenced (Ex. xii. 16; Lev. xxiii. 35 &c.), and some enactments in the Talmud regarding legal proceedings and particular details, such as the carrying of spices, must have been infringed by the Jewish rulers in the apprehending of Christ, in His trial before the High-priest and the Sanhedrim, and His crucifixion; and also by Simon of Cyrene, who was coming out of the country (Mark xv. 21; Luke x. 26), by Joseph who bought fine linen (Mark x. 46), by the women who bought spices (Mark xvi. 1; Luke xxiii. 56), and by Nicodemus who brought the tomb a hundred pounds weight of a mixture of myrrh and aloes (John xix. 39). The same objection is considered to lie against the supposition that the disciples could have imagined, on the evening of the Passover, that our Lord was giving directions to Judas respecting the purchase of anything

<sup>a</sup> It has been stated (p. 713 note<sup>b</sup>) that, according to Jewish authorities, this law was disused in later times. Even if this were not the case, it does not seem that so much difficulty in adopting the arrangement in *Breswell's Harmony*, that the party did not leave the house to go over the brook till after midnight. Lightfoot, *Hor. Heb.* on Matt. xxvii. 1.

or the giving of alms to the poor. The latter act (except under very special conditions) would have been as much opposed to rabbinical maxims as the former.<sup>c</sup>

It is further urged that the expressions of our Lord, "My time is at hand" (Matt. xxvi. 18), and "this passover" (Luke xxii. 15), as well as St. Paul's designating it as "the same night that He was betrayed," instead of *the night of the passover* (1 Cor. xi. 23), and his identifying Christ as our slain paschal lamb (1 Cor. v. 7), seem to point to the time of the supper as being peculiar, and to the time of the crucifixion as being the same as that of the killing of the lamb (Neander and Lücke).

It is not surprising that some modern critics should have given up as hopeless the task of reconciling this difficulty. Several have rejected the narrative of St. John (Bretschneider, Weiss), but a greater number (especially De Wette, Usteri, Ewald, Meyer, and Theile) have taken an opposite course, and have been content with the notion that the three first Evangelists made a mistake and confounded the meal with the Passover.

2. The reconciliations which have been attempted fall under three principal heads:—

i. Those which regard the supper at which our Lord washed the feet of His disciples (John xiii.), as having been a distinct meal eaten one or more days before the regular Passover, of which our Lord partook in due course according to the synoptical narratives.

ii. Those in which it is endeavoured to establish that the meal was eaten on the 13th, and that our Lord was crucified on the evening of the true paschal supper.

iii. Those in which the most obvious view of the first three narratives is defended, and in which it is attempted to explain the apparent contradictions in St. John, and the difficulties in reference to the law.

(i.) The first method has the advantage of furnishing the most ready way of accounting for St. John's silence on the institution of the Holy Communion. It has been adopted by Maldonat,<sup>d</sup> Lightfoot, and Bengel, and more recently by Kaiser.<sup>e</sup> Lightfoot identifies the supper of John xiii. with the one in the house of Simon the leper at Bethany two days before the Passover, when Mary poured the ointment on the head of our Saviour (Matt. xxvi. 6, Mark xiv. 3); and quaintly remarks, "While they are grumbling at the anointing of His head, He does not scruple to wash their feet."<sup>f</sup> Bengel supposes that it was eaten only the evening before the Passover.<sup>g</sup>

But any explanation founded on the supposition of two meals appears to be rendered untenable by the context. The fact that all four Evangelists introduce in the same connexion the foretelling of the treachery of Judas with the dipping of the sop, and of the denials of St. Peter and the going out to the Mount of Olives, can hardly leave a doubt that they are speaking of the same meal. Besides this, the explanation does not touch the greatest difficulties, which are those connected with "the day of preparation."

<sup>d</sup> On John xiii. 1.

<sup>e</sup> *Chronologie und Harmonie der vier Ev.* Mentioned by Tischendorf, *Synop. Evang.* p. xlv.

<sup>f</sup> *Ex. Heb.*, on John xiii. 2, and Matt. xxvi. 6. Also, "Gleanings from Exodus," No. XIX.

<sup>g</sup> On Matt. xxvi. 17, and John xviii. 28.

(ii.) The current of opinion <sup>b</sup> in modern times has set in favour of taking the more obvious interpretation of the passages in St. John, that the supper was eaten on the 13th, and that Our Lord was crucified on the 14th. It must, however, be admitted that most of those who advocate this view in some degree ignore the difficulties which it raises in any respectful interpretation of the synoptical narratives. Tittmann (*Meletemata*, p. 476) simply remarks that ἡ πρόδη τῶν ἀζύμων (Matt. xxvi. 17; Mark xiv. 12) should be explained as προτέρα τῶν ἀζύμων. Dean Alford, while he believes that the narrative of St. John "absolutely excludes such a supposition as that our Lord and His disciples ate the usual Passover," acknowledges the difficulty and dismisses it (on Matt. xxvi. 17).

Those who thus hold that the supper was eaten on the 13th day of the month have devised various ways of accounting for the circumstance, of which the following are the most important. It will be observed that in the first three the supper is regarded as a true paschal supper, eaten a day before the usual time; and in the other two, as a meal of a peculiar kind.

(a.) It is assumed that a party of the Jews, probably the Sadducees and those who inclined towards them, used to eat the Passover one day before the rest, and that our Lord approved of their practice. But there is not a shadow of historical evidence of the existence of any party which might have held such a notion until the controversy between the Rabbinites and the Karaites arose, which was not much before the eighth century.<sup>1</sup>

(b.) It has been conjectured that the great brouhaha of the Jews had gone wrong in calculating the true Passover-day, placing it a day too late, and that our Lord ate the Passover on what was really the 14th, but what commonly passed as the 13th. This was the opinion of Beza, Bucer, Calovius, and Scaliger. It is favoured by Stier. But it is utterly unsupported by historical testimony.

(c.) Calvin supposed that on this occasion, though our Lord thought it right to adhere to the true legal time, the Jews ate the Passover on the 15th instead of the 14th, in order to escape from the burden of two days of strict observance (the day of holy convocation and the weekly sabbath) coming together.<sup>2</sup> But that no practice of this kind could have existed so early as our Lord's time is satisfactorily proved in Cocceius' note to *Sanhedrin*, i. §2.<sup>3</sup>

(d.) Grotius <sup>4</sup> thought that the meal was a *πρόαζα μνησνευτικόν* (like the paschal feast of the modern Jews, and such as might have been observed during the Babylonian captivity), not a *πρόαζα θύσιμον*. But there is no reason to believe that such a mere

commemorative rite was ever observed till destruction of the Temple.

(e.) A view which has been received with far more generally than either of the preceding, that the Last Supper was instituted by Christ the occasion, in order that He might Hime on the proper evening on which the pasch was slain. Neander says, "He foresaw would have to leave His disciples before the Passover, and determined to give a peculiar meal to His last meal with them, and to place peculiar relation to the Passover of the Old Testament, the place of which was to be taken by the New Covenant" (*Life of Christ*). This view is substantially the same as that of Clement, Origen, Erasmus, Calmet, Kuinoel, Alford.<sup>5</sup>

Erasmus (Paraphrase on John xiii. 1, Luke xxii. 7) and others have called it an "antitypical Passover," with the intention, no doubt, on a reconciliation between St. John and the Evangelists. But if this view is to stand, better, in a formal treatment of the subject, call it a Passover at all. The difference between it and the Hebrew rite must have been. Even if a lamb was eaten in the supper, it can be imagined that the priests would have performed the essential acts of sprinkling the blood and the fat on any day besides the legal one (monides quoted by Otho, *Lex.* p. 501). It is not therefore have been a true paschal supper.

(iii.) They who take the facts as they appear on the surface of the synoptical narratives as a simpler point. They have nothing to explain the occurrences to account for, but they show that the passages in St. John may be interpreted in such a manner as not to conflict with their own conclusion, and to meet the suggestions by the laws relating to the observance of the festival. We shall give in such as briefly as we can, what appear to be the best explanations of the passages in question.

(a.) John xiii. 1, 2. Does *πρό τῆς ἑσπέρης* mean the time only of the proposition in the first verse is the limitation to be carried on to verse 2, to refer to the supper? In the latter case, so De Wette and others say there is "a logical necessity," *εἰς τέλος ἡγάγησεν αὐτοὺς* more directly to the manifestation of the fact which He was about to give to His disciples washing their feet; and the natural conclusion that the meal was one eaten before the supper. Bochart, however, contends that *ἑσπέρης* is equivalent to *ἐν τῷ προσεσπρίῳ*, *ita praecedit festum, ut tamen sit pars festi*, agrees with him. Others take *πρόαζα* to mean

<sup>b</sup> Lücke, Ideler, Tittmann, Bleek, De Wette, Neander, Tischendorf, Winer, Elrard, Alford, Ellicott; of earlier critics, Erasmus, Grotius, Suicer, Carpov.

<sup>1</sup> Iken (*Dissertationes*, vol. II. diss. 10 and 12), forgetting the late date of the Karaitic controversy, supposed that our Lord might have followed them in taking the day which, according to their custom, was calculated from the first appearance of the moon. Carpov (*App. Crit.* p. 434) advocates the same notion, without naming the Karaites. Elrard conjectures that some of the poorer Galileans may have submitted to eat the Passover a day too early to suit the convenience of the priests, who were overdone with the labour of sprinkling the blood and (as he strangely imagines) of slaughtering the lambs.

<sup>2</sup> *Herm.* in Matt. xxvi. 17, il. 305, edit. Tholuck. Surenhusius' *Mishna*, iv. 209.

<sup>3</sup> On Matt. xxvi. 19, and John xiii. 1.

<sup>4</sup> Assuming this view to be correct, may not it in the day made by Our Lord have some analogical change of the weekly day of rest from the seven first day?

<sup>5</sup> Dean Ellicott regards the meal as "a paschal eaten twenty-four hours before that of the old Testament," and would understand the expression xii. 6, "between the two evenings," as denoting between the evenings of the 13th and 14th of the month. But see note <sup>2</sup> p. 714. A somewhat similar explanation given in the *Journal of Sacred Literature* for Oct.

<sup>6</sup> Lightfoot, Bochart, Reland, Schoettgen, Tholuck, Hausen, Stier, Lange, Hengstenberg, Robinson, Fairbairn.

days of unleavened bread as not including the day of the lamb, and justify this limitation by Ex. xii. 1 (*ἡ ἑσπέρη τῶν ἀζύμων ἡ λεγομένη*). See note <sup>1</sup>, p. 721. But not a few who take this side of the main question (e.g., Wieseler, Tholuck, and others) regard the verse as complete in itself; understanding it to be that "Before the Passover, in respect of his departure, the Saviour's love was called forth towards his followers, and as proof of his love to the last." Tholuck says that the expression *δείχνου γενναίου* (which reads *γενόμενου*), "while supper was" (not as in the A. V., "supper being"), is very abrupt if we refer it to anything but the Passover. The Evangelist would then have used some such expression as, *καὶ ἐν αὐτῇ δείχνου*; and he considers that it is confirmed by xxi. 20, where this is spoken of as if it was something familiarly and not peculiar in its character—*ὅς καὶ ἐν τῇ δείχνου*. On the whole, Neander admits that nothing can safely be inferred from xii. 1, 2, in favour of the supper having been on the 13th.

John xii. 29. It is urged that the things of which they had "need against the feast," might be the provisions for the Chagigah, perhaps that also was required for the seven days of unleavened bread. The usual day for sacrificing the lamb was the 15th, which was then common (see p. 718, a.). But there is another difficulty, the disciples thinking it likely either that a lamb could be made, or that alms could be obtained for the poor, on a day of holy convocation. Of course a difficulty of the same kind arises which meets us in the purchases actually made by the women, by Joseph and Nicodemus. It must be admitted, that we have no proof of strict Rabbinical maxims which have been in force on this point existed in the time of our Lord, and that it is highly probable that the law in regard to trading was habitually relaxed in the case of what was required for religious, or for burials. There was plainly a relaxation recognized between a day of holy convocation and the Sabbath in the Mosaic law itself, in the obtaining and preparation of food, which head the Chagigah might come (Ex. xii. 16). In the Mishna the same distinction is maintained (*Yom Tob*, v. 2, and *Megilla*). It also appears that the School of Hillel allowed liberty in certain particulars on festival days in the night than in the day time. It is expressly stated in the Mishna, that on the festival, wine, oil, and bread, could be obtained by a cloak (*טלית*), as a pledge, and when Nisan fell on a Sabbath the paschal lamb

could be obtained in like manner (*Sabbath*, xxiii. 1). Alms also could be given to the poor under certain conditions (*Sabbath*, i. 1).

(c.) John xviii. 28. The Jews refused to enter the praetorium, lest they should be defiled and so disqualified from eating the Passover. Neander and others deny that this passage can possibly refer to anything but the paschal supper. But it is alleged that the words *ἵνα φάγωσι τὸ πάσχα*, may either be taken in a general sense as meaning "that they might go on keeping the passover," or that τὸ πάσχα may be understood specifically to denote the Chagigah. That it might be so used is rendered probable by Luke xii. 1; and the Hebrew word which it represents (*חג*), evidently refers equally to the victims for the Chagigah and the paschal lamb (Deut. xvi. 2), where it is commanded that the Passover should be sacrificed "of the flock and the herd." In the plural it is used in the same manner (2 Chr. xxxv. 7, 9). It is moreover to be kept in view that the Passover might be eaten by those who had incurred a degree of legal impurity, and that this was not the case in respect to the Chagigah. Joseph appears not to have participated in the scruple of the other rulers, as he entered the praetorium to beg the body of Jesus (Mark xv. 43). Lightfoot (*Ex. Heb.* in loc.) goes so far as to draw an argument in favour of the 14th being the day of the supper from the very text in question. He says that the slight defilement incurred by entering a Gentile house, had the Jews merely intended to eat the supper in the evening, might have been done away in good time by mere ablution; but that as the festival had actually commenced, and they were probably just about to eat the Chagigah, they could not resort even to such a simple mode of purification.\*

(d.) John xix. 14. "The preparation of the Passover" at first sight would seem as if it must be the preparation for the Passover on the 14th, a time set apart for making ready for the paschal week and for the paschal supper in particular. It is naturally so understood by those who advocate the notion that the last supper was eaten on the 13th. But they who take the opposite view affirm that, though there was a regular "preparation" for the Sabbath, there is no mention of any "preparation" for the festivals (Bochart, Reland, Tholuck, Hengstenberg). The word *παρασκευή* is expressly explained by *προσάββατον* (Mark xv. 42; Lachmann reads *πρὸς σάββατον*.) It seems to be essentially connected with the Sabbath itself (John xix. 31). There is no mention whatever of the preparation for the Sabbath in the Old Testament, but it is mentioned by Josephus (*Ant.* xvi. 6, §2), and it would seem from him that the time of preparation formally commenced at the ninth hour of the sixth day of the week. The *προσάββατον* is

John iv. 5. The apical application of the licence obscure. See Bartenora's note. Comp. also John 2.

which may mean an outer garment of any form, even frequently used to denote the fringed scarf every Jew in the service of the synagogue (Buxtorf, *Lex.* 277).

Quintilian says, "O impii coeclitas! Habitaculo contaminantur alieno, et non contaminantur prius! Alienigenae iudicis praetorio contaminantur, fratris innocenti sanguine non timentant. Super competent azyonum: quibus diebus contra erat in alienigenae habitaculum intrare" (*in Juven.* xxi. 2).

\* See p. 717 b., and Schoettgen on John xviii. 28.

\* See 2 Chr. xxx. 17; also *Psalm*, vii. 4, with Malmonides' note.

\* Dr. Fairbairn takes the expression, "that they might eat the Passover," in its limited sense, and supposes that these Jews, in their determined hatred, were willing to put off the meal to the verge of, or even beyond, the legal time (*Herm. Manual*, p. 311).

\* It cannot, however, be denied that the days of holy convocation are sometimes designated in the O. T. simply as sabbaths (Lev. xvi. 31, xxiii. 11, 32). It is therefore not quite impossible that the language of the Gospels considered by itself, might refer to them. [PENTECOST, I.]

named in Judith viii. 6 as one of the times on which devout Jews suspended their fasts. It was called by the Rabbis עֶרֶב שַׁבָּת, *quasi est* עֶרֶב שַׁבָּת (Buxt. *Lex. Talm.* col. 1659). The phrase in John xix. 14 may thus be understood as the preparation of the Sabbath which fell in the Passover week. This mode of taking the expression seems to be justified by Ignatius, who calls the Sabbath which occurred in the festival σάββατον τοῦ πάσχα (*Ep. ad Phil.* 13), and by Socrates, who calls it σάββατον τῆς ἑορτῆς (*Hist. Eccl.* v. 22). If these arguments are admitted, the day of the preparation mentioned in the Gospels must have fallen on the day of holy convocation, the 15th of Nisan.

(e.) John xix. 31. "That Sabbath day was a high day"—ἡμέρα μεγάλη. Any Sabbath occurring in the Passover week might have been considered "a high day," as deriving an accession of dignity from the festival. But it is assumed by those who fix the supper on the 13th that the term was applied, owing to the 15th being "a double sabbath," from the coincidence of the day of holy convocation with the weekly festival. Those, on the other hand, who identify the supper with the paschal meal, contend that the special dignity of the day resulted from its being that on which the Omer was offered, and from which were reckoned the fifty days to Pentecost. One explanation of the term seems to be as good as the other.

(f.) The difficulty of supposing that our Lord's apprehension, trial, and crucifixion took place on the day of holy convocation has been strongly urged.<sup>2</sup> If many of the rabbinical maxims for the observance of such days which have been handed down to us were then in force, these occurrences certainly could not have taken place. But the statements which refer to Jewish usage in regard to legal proceedings on sacred days are very inconsistent with each other. Some of them make the difficulty equally great whether we suppose the trial to have taken place on the 14th or the 15th. In others, there are exceptions permitted which seem to go far to meet the case before us. For example, the Mishna forbids that a capital offender should be examined in the night, or on the day, before the Sabbath or a feast-day (*Sanhedrin*, iv. 1). This law is modified by the glosses of the Gemara.<sup>3</sup> But if it had been recognised in its obvious meaning by the Jewish rulers, they would have outraged it in as great a degree on the preceding day (i. e. the 14th) as on the day of holy convocation before the Sabbath. It was also forbidden to administer justice on a high feast-day, or to carry arms (*Yom Tob*, v. 2). But these prohibitions are expressly distinguished from unconditional precepts, and are reckoned amongst those which may be set aside by circumstances. The members of the Sanhedrim were forbidden to eat any food on the same day after condemning a criminal.<sup>4</sup> Yet we find them intending to "eat the Passover" (John xviii. 28) after pronouncing the sentence (Matt. xxvi. 65, 66).

It was, however, expressly permitted that the

<sup>2</sup> Especially by Greenwell (*Dissert.* iii. 156).

<sup>3</sup> See the notes of Cocceius in Surenhusius, iv. 226.

<sup>4</sup> Bab. Gem. *Sanhedrin*, quoted by Lightfoot on Matt. xxvii. 1. The application of this to the point in hand will, however, hinge on the way in which we understand it not to have been lawful for the Jews to put any man to death (John xviii. 31), and therefore to pronounce sentence in the legal sense. If we suppose that the Roman government had not deprived them of the power of life and death,

Sanhedrim might assemble on the Sabbath as well as on feast-days, not indeed in their usual chamber, but in a place near the court of the women.<sup>5</sup> And there is a remarkable passage in the Mishna in which it is commanded that an elder not consenting to the voice of the Sanhedrim should be kept at Jerusalem till one of the three great festivals, and then executed, in accordance with Deut. xxi. 12, 13 (*Sanhedrin*, x. 4). Nothing is said to lead us to infer that the execution could not take place on one of the days of holy convocation. It is, however, hardly necessary to refer to this, or any similar authority, in respect to the crucifixion, which was carried out in conformity with the sentence of the Roman procurator, not that of the Sanhedrim.

But we have better proof than either the Mishna or the Gemara can afford that the Jews did not hesitate, in the time of the Roman domination, to carry arms and to apprehend a prisoner on a solemn feast-day. We find them at the feast of Tabernacles, on the "great day of the feast," sending out officers to take our Lord, and relinking them for not bearing Him (John vii. 32-45). St. Peter also was seized during the Passover (Acts xii. 3, 4). And, again, the reason alleged by the rulers for not apprehending Jesus was, not the sanctity of the festival, but the fear of an uproar among the multitude which was assembled (Matt. xxvi. 51).

On the whole, notwithstanding the express declaration of the Law and of the Mishna that the days of holy convocation were to be observed precisely as the Sabbath, except in the preparation of food, it is highly probable that considerable licence was allowed in regard to them, as we have already observed. It is very evident that the festival times were characterised by a firm and jubilant character which did not belong, in the same degree, to the Sabbath, and which was plainly not restricted to the days which fall between the days of holy convocation (Lev. xxiii. 46; Lev. xxv. 7, xiv. 26; see p. 714). It should also be observed that while the law of the Sabbath was entered on strangers dwelling amongst the Israelites, such was not the case with the law of the Feast days. A greater freedom of action in cases of urgent need would naturally follow, and it is not difficult to suppose that the women who "rested on the Sabbath-day according to the commandment" had prepared the spices and linen for the interment on the day of holy convocation. To say nothing of the way in which the question might be affected by the much greater licence permitted by the school of Hillel than by the school of Shammai, in all instances of this kind, it is remarkable that we find, on the Sabbath-day itself, not only Joseph (*Mark* x. 45), but the chief priests and Pharisees coming to Pilate, and, as it would seem, entering the *prætorium* (Matt. xxvii. 62).

3. There is a strange story preserved in the Gemara (*Sanhedrin*, vi. 2) that Our Lord having endeavoured during forty days to find an accuser, was sentenced, and, on the 14th of Nisan, crucified, and afterwards hanged. As we know that the

it may have been to avoid breaking their law, expressed in *Sanhedrin*, iv. 1, that they wished to throw the matter on the procurator. See Hodge, *Lectures on the Acts*, p. 106. See also Lightfoot's note in the *Critical Notes on John* xix. 31. Lightfoot, *Ex. Heb.* Matt. xxvi. 2, and John xix. 2, where the evidence is given which is in favour of the Jews having resigned the right of capital punishment forty years before the destruction of Jerusalem.

<sup>4</sup> *Bab. Gem. Sanhedrin*, quoted by Lightfoot on *Matt.* xxvii. 1. The application of this to the point in hand will, however, hinge on the way in which we understand it not to have been lawful for the Jews to put any man to death (*John* xviii. 31), and therefore to pronounce sentence in the legal sense. If we suppose that the Roman government had not deprived them of the power of life and death,

Sanhedrim might assemble on the Sabbath as well as on feast-days, not indeed in their usual chamber, but in a place near the court of the women.<sup>5</sup> And there is a remarkable passage in the Mishna in which it is commanded that an elder not consenting to the voice of the Sanhedrim should be kept at Jerusalem till one of the three great festivals, and then executed, in accordance with *Levit.* xvi. 12, 13 (*Sanhedrin*, x. 4). Nothing is said to lead us to infer that the execution could not take place in one of the days of holy convocation. It is, however, hardly necessary to refer to this, or any similar authority, in respect to the crucifixion, which was carried out in conformity with the sentence of the Roman procurator, not that of the Sanhedrim.

But we have better proof than either the Mishna or the Gemara can afford that the Jews did not hesitate, in the time of the Roman domination, to carry arms and to apprehend a prisoner on a solemn feast-day. We find them at the feast of Tabernacles, on the "great day of the feast," sending out officers to take our Lord, and rebuking them for not bringing Him (*John* vii. 32-45). St. Peter was seized during the Passover (*Acts* xii. 3, 4). And, again, the reason alleged by the rulers for not apprehending Jesus was, not the sanctity of the festival, but the fear of an uproar among the multitude which was assembled (*Matt.* xxvi. 5).

On the whole, notwithstanding the express declaration of the Law and of the Mishna that the days of holy convocation were to be observed precisely as the Sabbath, except in the preparation of food, it is highly probable that considerable licence was allowed in regard to them, as we have already observed. It is very evident that the festival times were characterised by a free and jubilant character which did not belong, in the same degree, to the Sabbath, and which was plainly not restricted to the days which fell between the days of holy convocation (*Lev.* xxiii. 46; *Deut.* ix. 7, xiv. 26; see p. 714). It should also be observed that while the law of the Sabbath was enforced on strangers dwelling amongst the Jews, such was not the case with the law of the Festival. A greater freedom of action in cases of urgent need would naturally follow, and it is not difficult to suppose that the women who "rested on the Sabbath-day according to the commandment" had prepared the spices and linen for the interment on the day of holy convocation. To say nothing of the way in which the question might be affected by the much greater licence permitted by the school of Hillel than by the school of Shammai, in all matters of this kind, it is remarkable that we find, on the Sabbath-day itself, not only Joseph (*Mark* ix. 44), but the chief priests and Pharisees coming to Peter, and, as it would seem, entering the production (*Matt.* xxvii. 62).

3. There is a strange story preserved in the Gemara (*Sanhedrin*, vi. 2) that Our Lord having been endeavoured during forty days to find an advocate, was sentenced, and, on the 14th of Nisan, crucified, and afterwards hanged. As we know that the

It may have been to avoid breaking their law, as explained in *Sanhedrin*, iv. 1, that they wished to throw the guilt on the procurator. See Deacon, *Lectures on the Acts*, p. 102; Scalliger's note in the *Critica Sacra* on *John* xix. 31; Lightfoot, *Ex. Heb.*, *Matt.* xxvi. 3, and *John* xvi. 7, where the evidence is given which is in favour of the Jews having resigned the right of capital punishment long before the destruction of Jerusalem.

<sup>5</sup> *Gem. Sanhedrin*.

difficulty of the Gospel narratives had been perceived long before this statement could have been written, and as the two opposite opinions on the chief question were both current, the writer might easily have taken up one or the other. The statement cannot be regarded as worth anything in the way of evidence.<sup>4</sup>

Not much use can be made in the controversy of the testimonies of the Fathers. But few of them attempted to consider the question critically. Eusebius (*Hist. Ecc.* v. 23, 24) has recorded the traditions which were in favour of St. John having kept Easter on the 14th of the month. It has been thought that those traditions rather help the conclusion that the supper was on the 14th. But the question on which Eusebius brings them to bear is simply whether the Christian festival should be observed on the 14th, the day *ἐν ᾧ ὁθεὶς τὸ πάσχα* Ἰουδαῖοις προσηγγέσθη, on whatever day of the week it might fall, or on the Sunday of the resurrection. It seems that nothing whatever can be safely inferred from them respecting the day of the month of the supper or the crucifixion. Clement of Alexandria and Origen appeal to the Gospel of St. John as deciding in favour of the 13th. Chrysostom expresses himself doubtfully between the two. St. Augustin was in favour of the 14th.<sup>5</sup>

4. It must be admitted that the narrative of St. John, as far as the mere succession of events is concerned, bears consistent testimony in favour of the last supper having been eaten on the evening before the Passover. That testimony, however, does not appear to be so distinct, and so incapable of a second interpretation, as that of the synoptical Gospels, in favour of the meal having been the paschal supper itself, at the legal time (see especially Matt. xxvi. 17; Mark xiv. 1, 12; Luke xxii. 7). Whether the explanations of the passages in St. John, and of the difficulties resulting from the nature of the occurrences related, compared with the enactments of the Jewish law, be considered satisfactory or not, due weight should be given to the antecedent probability that the meal was no other than the regular Passover, and that the reasonableness of the contrary view cannot be maintained without some artificial theory, having no proper foundation either in Scripture or ancient testimony of any kind.

#### IV. MEANING OF THE PASSOVER.

##### 1. Each of the three great festivals contained a

Other Rabbinical authorities countenance the statement that Christ was executed on the 14th of the month *as Jews, Judæa*. l. 404). But this seems to be a case in which, for the reason stated above, numbers do not add the weight of the testimony.

Numerous Patristic authorities are stated by Maimonides on Matt. xxvi.

Hauptfeld has devised an arrangement of the passages of the Pentateuch bearing on the Passover so as to show, to this theory, their relative antiquity. The following:—(1) Ex. xxiii. 14-17; (2) Ex. xxxiv. 23-26; (3) Ex. xiii. 3-10; (4) Ex. xii. 15-20; (5) Ex. xii. 1; (6) Ex. xii. 43-50; (7) Num. ix. 10-14.

of Baur, that the Passover was an astronomical festival and the lamb a symbol of the sign Aries, that of Von Rohlen, that it resembled the sun-feast of Persia, are well exposed by Bühr (Symbolik). Our theory has been endeavoured in his usual manner to show many details of the festival were derived from heathen sources, though he admits the originality of the whole. It may seem at first sight as if some countenance were given to the notion that the feast of unleavened bread

reference to the annual course of nature. Two, at least, of them—the first and the last—also commemorated events in the history of the chosen people. The coincidence of the times of their observance with the most marked periods in the process of gathering in the fruits of the earth, has not unnaturally suggested the notion that their agricultural significance is the more ancient; that in fact they were originally harvest feasts observed by the patriarchs, and that their historical meaning was superadded in later times (Ewald, Hupfeld').

It must be admitted that the relation to the natural year expressed in the Passover was less marked than that in Pentecost or Tabernacles, while its historical import was deeper and more pointed. It seems hardly possible to study the history of the Passover with candour and attention, as it stands in the Scriptures, without being driven to the conclusion that it was, at the very first, essentially the commemoration of a great historical fact. That part of its ceremonies which has a direct agricultural reference—the offering of the Omer—holds a very subordinate place.

But as regards the whole of the feasts, it is not very easy to imagine that the rites which belonged to them connected with the harvest, were of patriarchal origin. Such rites were adapted for the religion of an agricultural people, not for that of shepherds like the patriarchs. It would seem, therefore, that we gain but little by speculating on the simple impression conveyed in the Pentateuch, that the feasts were ordained by Moses in their integrity, and that they were arranged with a view to the religious wants of the people when they were to be settled in the Land of Promise.

2. The deliverance from Egypt was regarded as the starting-point of the Hebrew nation. The Israelites were then raised from the condition of bondmen under a foreign tyrant to that of a free people owing allegiance to no one but Jehovah. "Ye have seen," said the Lord, "what I did unto the Egyptians, and how I bare you on eagles' wings and brought you unto myself" (Ex. xix. 4). The prophet in a later age spoke of the event as a creation and a redemption of the nation. God declares Himself to be "the creator of Israel," in immediate connexion with evident allusions to His having brought them out of Egypt; such as His having made "a way in the sea, and a path in the mighty waters," and His having overthrown "the chariot and horse, the army and the power" (Isa.

was originally a distinct festival from the Passover, by such passages as Lev. xxiii. 5, 6: "In the fourteenth day of the first month at even is the Lord's Passover; and on the fifteenth day of the same month is the feast of unleavened bread unto the Lord: seven days ye must eat unleavened bread" (see also Num. xxviii. 16, 17). Josephus in like manner speaks of the feast of unleavened bread as "following the Passover" (*Ant.* iii. 10, §5). But such language may mean no more than the distinction between the paschal supper and the seven days of unleavened bread, which is so obviously implied in the fact that the eating of unleavened bread was observed by the country Jews who were at home, though they could not partake of the paschal lamb without going to Jerusalem. Every member of the household had to abstain from leavened bread, but some only went up to the paschal meal. (See Maimon. *De Fermentato et Azymo*, vi. 1.) It is evident that the common usage, in later times at least, was to employ, as equivalent terms the *feast of the Passover*, and the *feast of unleavened bread* (Matt. xxvi. 17; Mark xiv. 12; Luke xxii. 1; Joseph. *Ant.* xiv. 2, §1; *B. J.* ii. 1, §3). See note s, p. 718.

xlili. 1, 15-17). The Exodus was thus looked upon as the birth of the nation; the Passover was its annual birth-day feast. Nearly all the rites of the festival, if explained in the most natural manner, appear to point to this as its primary meaning. It was the yearly memorial of the dedication of the people to Him who had saved their first-born from the destroyer, in order that they might be made holy to Himself. This was the lesson which they were to teach to their children throughout all generations. When the young Hebrew asked his father regarding the paschal lamb, "What is this?" the answer pre-scribed was, "By strength of hand the Lord brought us out from Egypt, from the house of bondage: and it came to pass when Pharaoh would hardly let us go, that the Lord slew all the first-born in the land of Egypt, both the first-born of man and the first-born of beast; therefore I sacrifice to the Lord all that openeth the womb, being males; but all the first-born of my children I redeem" (Ex. xiii. 14, 15). Hence, in the periods of great national restoration in the times of Joshua, Hezekiah, Josiah, and Ezra, the Passover was observed in a special manner, to remind the people of their true position, and to mark their renewal of the covenant which their fathers had made.

3. (a.) The paschal lamb must of course be regarded as the leading feature in the ceremonial of the festival. Some Protestant divines during the last two centuries (Calov, Carpzov), laying great stress on the fact that nothing is said in the law respecting either the imposition of the hands of the priest on the head of the lamb, or the bestowing of any portion of the flesh on the priest, have denied that it was a sacrifice in the proper sense of the word. They appear to have been tempted to take this view, in order to deprive the Romanists of an analogical argument bearing on the Romish doctrine of the Lord's Supper. They affirmed that the lamb was *sacramentum*, not *sacrificium*. But most of their contemporaries (Cudworth, Bochart, Vitringa), and nearly all modern critics, have held that it was in the strictest sense a sacrifice. The chief characteristics of a sacrifice are all distinctly ascribed to it. It was offered in the holy place (Deut. xvi. 5, 6; the blood was sprinkled on the altar, and the fat was burned (2 Chr. xxx. 16, xxxv. 11). Philo and Josephus commonly call it *θύμα* or *θυσία*. The language of Ex. xii. 27, xxiii. 18, Num. ix. 7, Deut. xvi. 2, 5, together with 1 Cor. v. 7, would seem to decide the question beyond the reach of doubt.

As the original institution of the Passover in Egypt preceded the establishment of the priesthood and the regulation of the service of the tabernacle, it necessarily fell short in several particulars of the observance of the festival according to the fully developed ceremonial law (see II. 1). The head of the family slew the lamb in his own house, not in the holy place. the blood was sprinkled on the doorway, not on the altar. But when the law was perfected, certain particulars were altered

in order to assimilate the order of religion to the order of redemption. The priest was one of the first-born, not the other way round. The lamb was to be abundantly supplied, not to be sparingly. The lamb was to be regarded as the great family, a thank-offering of the nation, not the sacrifice of the elect. It was to be a sign, not a promise. It was to be a memorial, not a sacrifice (Ex. xxiii. 18, xxxi. 12). The written law, on which the law was to be based, was to be in a special manner the law of the whole people, the law of every family, the law of every old patriarchal priest, the law of every nation, because the father of the nation, handed on the law from superstition to the members of a new nation, for the promise of deliverance of the nation, unto me a king (Ex. xix. 6).<sup>1</sup> In the law, in favour of domesticity, the fact that the blood of the lamb, had at first been sprinkled on the lintels and the national altar which belonged to that only which be

A question, perhaps, may be raised regarding the blood on the lintel on the altar considered that it was the destroying angel, merely a sign to be in their safety and these views can stand. There have been an act accepted with favour (Moses kept of blood, lest he should touch them" (Heb. ix. 22), is a sacrament, of an act of God's good will, into which the creature and the creature. The institution of the Passover, the significance of the Passover (Heb. ix. 22), is a sacrament, of an act of God's good will, into which the creature and the creature.

No satisfactory command to choose

<sup>1</sup> The fact which has been noticed, II. 3. (f), is remarkable in this connexion, that those who had not incurred a degree of impurity sufficient to disqualify them from eating the paschal lamb, were yet not pure enough to take the priestly part in slaying it.

<sup>2</sup> Philo, speaking of the Passover, says, *σύμμελον τὸ ἔθνος ἱερταί, τῶν κατὰ μέρος ἐκαστὸν τὰς ὑπὲρ αὐτοῦ θυσίας ἀγαγόντος τὰς καὶ χειρουργούντος. Ὁ μὲν οὖν ἄλλος ἅπας λίσσας ἐγγίγθαι καὶ φαῖδρος ἦν, ἐκαστὸν ὑποκρίνους ἱεροσύνην τετιμῆσθαι*—*De Vit. Mosis*, III. 29, vol. iv. p. 250, edit. Tauch.

<sup>1</sup> As regards the Passover, on the red speculation, *Kühr* and door-posts were most obvious to those of different (Leut. vi. 9).

<sup>2</sup> Especially Bochart, *signum Ieo non dat liberatione certi sin*

pachal supper. Kurtz (following Hofmann) fancies that the four days signified the four centuries of Egypt an bondage. As in later times, the rule appears not to have been observed (see p. 714, b.), the reason of it was probably of a temporary nature.

That the lamb was to be roasted and not boiled, has been supposed to commemorate the haste of the departure of the Israelites.<sup>a</sup> Spencer observes on the other hand that, as they had their cooking vessels with them, one mode would have been as expeditious as the other. Some think that, like the dress and the posture in which the first Passover was to be eaten, it was intended to remind the people that they were now no longer to regard themselves as settled down in a home, but as a host upon the march, roasting being the proper military mode of dressing meat. Kurtz conjectures that the lamb was to be roasted with fire, the purifying element, because the meat was thus left pure, without the mixture even of the water, which would have entered into it in boiling. The meat in its purity would thus correspond in signification with the unleavened bread (see II. 3 (b)).

It is not difficult to determine the reason of the command, "not a bone of him shall be broken." The lamb was to be a symbol of unity; the unity of the family, the unity of the nation, the unity of God with His people whom He had taken into covenant with Himself. While the flesh was divided into portions, so that each member of the family could partake, the skeleton was left one and entire to remind them of the bonds which united them. Thus the words of the law are applied to the body of our Saviour, as the type of that still higher unity of which He was Himself to be the author and centre (John xix. 36).

The same significance may evidently be attached to the prohibition that no part of the meat should be kept for another meal, or carried to another house. The pachal meal in each house was to be one, whole and entire.

(b.) The unleavened bread ranks next in importance to the pachal lamb. The notion has been very generally held, or taken for granted, both by Christian and Jewish writers of all ages, that it was intended to remind the Israelites of the unleavened cakes which they were obliged to eat in their hasty flight (Ex. xii. 34, 39). But there is not the least intimation to this effect in the sacred narrative. On the contrary, the command was given to Moses and Aaron that unleavened bread should be eaten with the lamb before the circumstance occurred upon which this explanation is based. Comp. Ex. xii. 8 with xii. 39.

It has been considered by some (Ewald, Winer, and the modern Jews) that the unleavened bread and the bitter herbs alike owe their meaning to their being regarded as unpalatable food. The

expression "bread of affliction," *לֶחֶם עֲנִיּוֹת* (Deut. xvi. 3), is regarded as equivalent to *fasting-bread*, and on this ground Ewald ascribes something of the character of a fast to the Pass-over. But this seems to be wholly inconsistent with the pervading joyous nature of the festival. The *bread of affliction* may mean bread which, in present gladness, commemorated, either in itself, or in common with the other elements of the feast, the past affliction of the people (Bähr, Kurtz, Hofmann). It should not be forgotten that unleavened bread was not peculiar to the Passover. The ordinary "meat-offering" was unleavened (Lev. ii. 4, 5, vii. 12, x. 12 &c.), and so was the shewbread (Lev. xxiv. 5-9). The use of unleavened bread in the consecration of the priests (Ex. xxix. 23), and in the offering of the Nazirite (Num. vi. 19), is interesting in relation to the Pass-over, as being apparently connected with the consecration of the person. On the whole, we are warranted in concluding that unleavened bread had a peculiar sacrificial character, according to the law, and it can hardly be supposed that a particular kind of food should have been offered to the Lord because it was insipid or unpalatable.<sup>a</sup>

It seems more reasonable to accept St. Paul's reference to the subject (1 Cor. v. 6-8) as furnishing the true meaning of the symbol. Fermentation is decomposition, a dissolution of unity. This must be more obvious to ordinary eyes where the leaven in common use is a piece of sour dough, instead of the expedients at present employed in this country to make bread light. The pure dry biscuit, as distinguished from bread thus leavened, would be an apt emblem of unchanged duration, and, in its freedom from foreign mixture, of purity also.<sup>a</sup> If this was the accepted meaning among the Jews, "the unleavened bread of sincerity and truth" must have been a clear and familiar expression to St. Paul's Jewish readers. Bähr conceives that as the blood of the lamb figured the act of purifying, the getting rid of the corruptions of Egypt, the unleavened bread signified the abiding state of consecrated holiness.

(c.) The bitter herbs are generally understood by the Jewish writers to signify the bitter sufferings which the Israelites had endured (Ex. i. 14). But it has been remarked by Abenezra that these herbs are a good and wholesome accompaniment for meat, and are now, and appear to have been in ancient times, commonly so eaten (see p. 716).

(d.) The offering of the Omer, though it is obviously that part of the festival which is immediately connected with the course of the seasons, bore a distinct analogy to its historical significance. It may have denoted a deliverance from winter, as the lamb signified deliverance from the bondage of Egypt, which might well be considered as a winter in the history of the nation.<sup>a</sup> Again, the consecra-

<sup>a</sup> So Bähr and most of the Jewish authorities.

<sup>a</sup> Hupfeld imagines that bread without leaven, being the simplest result of cooked grain, characterised the old agricultural festival which existed before the sacrifice of the lamb was instituted.

<sup>a</sup> The root *יָבֵשׁ* signifies "to make dry." Kurtz thinks that *dryness* rather than *sweetness* is the idea in *לֶחֶם עֲנִיּוֹת*. But *anet* in this connexion has the sense of *unruined*, or *incorruptible*, and hence is easily connected with *dryness*. Perhaps our authorized version has lost something in expressing *anet* by substituting the term "unleavened bread" for the "sweet bread" of the older versions, which still holds its place in 1 Sam. i. 19.

<sup>a</sup> *לֶחֶם עֲנִיּוֹת* istud comedimus quia amaritudine affecerunt Aegyptii vitam patrum nostrorum in Aegypto.—Maimon. in *Peschim*, viii. 4.

<sup>a</sup> This application of the rite perhaps derives some support from the form in which the ordinary first-fruit offering was presented in the Temple. [Finner FARRIS.] The call of Jacob ("a Syrian ready to perish"), and the deliverance of his children from Egypt, with their settlement in the land that flowed with milk and honey, were then related (Deut. xxvi. 5-10). It is worthy of notice that, according to *Peschim*, an exposition of this passage was an important part of the reply which the father gave to his son's inquiry during the pachal supper.

The account of the procession in offering the first-fruits

tion of the first-fruits, the first-born of the soil, is an easy type of the consecration of the first-born of the Israelites. This seems to be countenanced by Ex. xiii, 2-4, where the sanctification of the first-born, and the unleavened bread which figured it, seem to be emphatically connected with the time of year, Abib, the month of green ears.\*

4. No other shadow of good things to come contained in the Law can vie with the festival of the Passover in expressiveness and completeness. Hence we are so often reminded of it, more or less distinctly, in the ritual and language of the Church. Its outline, considered in reference to the great deliverance of the Israelites which it commemorated, and many of its minute details, have been appropriated as current expressions of the truths which God has revealed to us in the fulness of times in sending His Son upon earth.

It is not surprising that ecclesiastical writers should have pushed the comparison too far, and exercised their fancy in the application of trifling or accidental particulars either to the facts of Our Lord's life or to truths connected with it.\* But, keeping within the limits of sober interpretation indicated by Scripture itself, the application is singularly full and edifying. The deliverance of Israel according to the flesh from the bondage of Egypt was always so regarded and described by the prophets as to render it a most apt type of the deliverance of the spiritual Israel from the bondage of sin into the glorious liberty with which Christ has made us free (see IV. 2). The blood of the first paschal lambs sprinkled on the doorways of the houses has ever been regarded as the best defined foreshadowing of that blood which has redeemed, saved, and sanctified us (Heb. xi. 28). The lamb itself, sacrificed by the worshipper without the intervention of a priest, and its flesh being eaten without reserve as a meal, exhibits the most perfect of peace-offerings, the closest type of the atoning Sacrifice who died for us and has made our peace with God (Is. liii. 7; John i. 29; cf. the expression "my sacrifice," Ex. xxiv. 25, also Ex. xii. 27; Acts viii. 32; 1 Cor. v. 7; 1 Pet. i. 18, 19). The ceremonial law, and the functions of the priest in later times, were indeed recognised in the sacrificial rite of the Passover; but the pre-

vious existence of the rite showed that they were not essential for the personal approach of the worshipper to God (see IV. 3 (a.); Is. lxi. 6; 1 Pet. ii. 5, 9). The unleavened bread is recognised as the figure of the state of sanctification which is the true element of the believer in Christ\* (1 Cor. v. 8). The haste with which the meal was eaten, and the girt-up loins, the staves and the sandals, are fit emblems of the life of the Christian pilgrim, ever hastening away from the world towards his heavenly destination\* (Luke xii. 35; 1 Pet. i. 13, ii. 11; Eph. v. 13; Heb. xi. 13).

It has been well observed by Kurtz (on Ex. xii. 28), that at the very crisis when the distinction between Israel and the nations of the world was most clearly brought out (Ex. xi. 7), a "mixed multitude" went out from Egypt with them (Ex. xii. 38), and that provision was then made for all who were willing to join the chosen seed and participate with them in their spiritual advantages (Ex. xii. 44). Thus, at the very starting-point of national separation, was foreshadowed the calling in of the Gentiles to that covenant in which all nations of the earth were to be blessed.

The offering of the Omer, in its higher significance as a symbol of the first-born, has been already noticed (IV. 3. (d)). But its meaning found full expression only in that First-born of all-creation, who, having died and risen again, became "the first-fruits of them that slept" (1 Cor. xv. 20). As the first of the first-fruits, no other offering of the sort seems so likely as the Omer to have immediately suggested the expressions used, Rom. viii. 23, xi. 16; Jam. i. 18; Rev. xiv. 4.

The crowning application of the paschal rite to the truths of which they were the shadowy promises appears to be that which is afforded by the fact that our Lord's death occurred during the festival. According to the Divine purpose, the true Lamb of God was slain at nearly the same time as "the Lord's Passover," in obedience to the letter of the law. It does not seem needful that, in order to give point to this coincidence, we should (as some have done) draw from it an *a priori* argument in favour of our Lord's crucifixion having taken place on the 14th of Nisan (see III. 2. d.). It is enough to know that our own Holy Week and

in the Mishna (*Bikurim*), with the probable reference to the subject in Is. xxx. 29, can hardly have anything to do with the Passover. The connexion appears to have been suggested by the tradition mentioned by Aben Ezra, that the army of Sennacherib was smitten on the night of the Passover. Regarding this tradition, Vitringa says, "Non recte, nec sperno" (*In Isaiam* xxx. 29).

\* See Gesenius, *Thes.* In the LXX it is called *μήν τῶν κρίνων*, *sc. καρπῶν*. If Nisan is a Semitic word, Gesenius thinks that it means the month of flowers, in agreement with a passage in Macarius (*Hom.* xvii.) in which it is called *μήν τῶν ἀνθῶν*. But he seems inclined to favour an explanation of the word suggested by a Zend root, according to which it would signify the month of New Year's day.

\* The crossed spits on which Justin Martyr laid stress are noticed, II. 3. (a). The subject is expanded by Vitringa, *Observat.* Soc. ii. 10. The time of the new moon, at which the festival was held, has been taken as a type of the brightness of the appearing of the Messiah; the lengthening of the days at that season of the year as figuring the ever-increasing light and warmth of the Redeemer's kingdom; the advanced hour of the day at which the supper was eaten, as a representation of the fulness of times; the roasting of the lamb as the effect of God's wrath against sin; the thorough cooking of the lamb, as

a lesson that Christian doctrine should be well arranged and digested; the prohibition that any part of the flesh should remain till the morning, as a foreshadowing of the haste in which the body of Christ was removed from the cross; the unfermented bread, as the emblem of a humble spirit, while fermented bread was the figure of a heart puffed up with pride and vanity. (See Suicer, *ad verba*.) In the like spirit, Justin Martyr and Lactantius take up the charge against the Jews of corrupting the D. T. with a view to deprive the Passover of its clearness as a witness for Christ. They specifically allege that the *hallel* passage has been omitted in the copies of the book of Ezra:—"Et dixit Esdras ad populum: Hoc pascua salvator noster est, et refugium nostrum. Cogitatis autem in cor vestrum, quoniam habemus humilitatem etiam in signis post hanc sperabimus in eum, ne desinamus habere in aeternum tempus." (Just. Mart. *Dialog.* cum Tryph. I. c. 1. *Int.* iv. 18.) It has been conjectured that the words may have been inserted between vers. 20 and 21 of Is. 52. But they have been all but universally regarded as spurious.

\* The use which the Fathers made of this may be seen in Suicer, *s. v. ἀγύατος*.

\* See Theodoret, *Interrog.* XXXV. de *pascha*. There is an eloquent passage on the same subject in Orig. *de Orat.* XLII.

as the anniversary of the same great event foretold in those events of which Passover was a commemoration.

Joined with the other festivals, the Passover is remarkably distinguished by a single ritual its own, sacrificed in a very manner. In this respect, as well as in being held in the ecclesiastical year, it had a unity and character of its own. It was the festive festival of the year, and in this position it stood in a certain relation to the second sacrament of the Hebrew law (xii. 44). We may see this in what Gilgal, when Joshua, in renewing the covenant, celebrated the Passover immediately the circumcision of the people. But of the relation in which these two rituals other did not become fully developed as were fulfilled, and the Lord's Supper as the sacramental feast of the elect. Hupfeld well observes: "En pulchriorum nostrorum exempla: circumcisi, sicut signum gratie dieris cum Deo pacti, quo ad sanctitatem vocamur; Paschalis vero agnus et ritus, quippe gratie divinae et servati foederis nuntius et pignus, quo sacra et cum Deo populi sacri membris communicatur et alitur, coenae Christi sacramentum!"

A parallel case to this, in the whole range of religious observances of the law, seems to be the Passover of the day of atonement. The remark that the modern Jews distinguish two rites above all others, as being immediately connected with the grand fulfilment of the promises to the fathers. Though they refer to the coming of the Messiah, their ordinary grasp at meals, it is only on

PATARA (Πάρα: the noun is plural), a Lycian city of some considerable note. One of its characteristics in the heathen world was that it was devoted to the worship of Apollo, and was the seat of a famous oracle (*Hor. Od.* iii. 4, 64). Fellows says that the coins of all the district around show the ascendancy of this divinity. Patara was situated on the south-western shore of Lycia, not far from the left bank of the river Xanthus. The coast here is very mountainous and bold. Immediately opposite is the island of RHODES. Patara was practically the seaport of the city of Xanthus, which was ten miles distant (*Appian, B. C.* iv. 81). These notices of its position and maritime importance introduce us to the single mention of the place in the Bible (*Acts* xxi. 1, 2). St. Paul was on his way to Jerusalem at the close of his third missionary journey. He had just come from Rhodes (v. 1); and at Patara he found a ship, which was on the point of going to Phoenicia (v. 2), and in which he completed his voyage (v. 3). This illustrates the mercantile connexion of Patara with both the eastern and western parts of the Levant. A good parallel to the Apostle's voyage is to be found in *Liv.* xxxvii. 16. There was no time for him to preach the Gospel here, but still Patara has a place in ecclesiastical history, having been the seat of a bishop (*Hierocl.* p. 684). The old name remains on the spot, and there are still considerable ruins, especially a theatre, some baths, and a triple arch which was one of the gates of the city. But sand-hills are gradually concealing these ruins, and have blocked up the harbour. For fuller details we must refer to Beaufort's *Karamania*, the *Ionian Antiquities* published by the Dilettanti Society, *Fellows' Lycia and Asia Minor*, and the *Travels in Asia Minor* by Spratt and Forbes. [LYCIA; MYRA.] [J. S. H.]

PATHE'US (Παθαῖος; Alex. Παθαῖος: *Fuc-teus*). The same as PETHAHIAH the Levite (*1 Esdr.* ix. 23; comp. *Ezr.* x. 23).

PATH'ROS (Παθρός; Παθρός, παθρός; *Phetros, Phatures, Phathurs*), gent. noun PATHRUSIM (Πατρῴσιμ; Πατρῴσιμ; *Phetrusim*), a part of Egypt, and a Mizraite tribe. That Pathros was in Egypt admits of no question: we have to attempt to decide its position more nearly. In the list of the Mizraites, the Pathrusim occur after the Naphtuhim, and before the Ashuhim; the latter being followed by the notice of the Philistines, and by the Caphtorim (*Gen.* x. 13, 14; *1 Chr.* i. 12). Isaiah prophesies the return of the Jews "from Mizraim, and from Pathros, and from Cush" (xi. 11). Jeremiah predicts their ruin to "all the Jews which dwell in the land of Egypt, which dwell at Migdol, and at Tahpanhes, and at Noph, and in the country of Pathros" (xlii. 1), and their reply is given, after this introduction, "Then all the men which knew that their wives had buried incense unto other gods, and all the women that stood by, a great multitude, even all the people that dwell in the land of Egypt, in Pathros, answered Jeremiah"

on these occasions that their expectation of the harbinger of the Messiah is expressed by formal observances. When a child is circumcised, an empty chair is placed at hand for the prophet to occupy. At the paschal meal, a cup of wine is poured out for him; and at an appointed moment the door of the room is solemnly set open for him to enter. (See note 7, p. 718.)

(15). Ezekiel speaks of the return of the captive Egyptians to "the land of Pathros, into the land of their birth" (xxix. 14), and mentions it with Egyptian cities, Noph preceding it, and Zoan, No, Sin, Noph again, Aven (On), Pi-beseth, and Tehaphnehes following it (xxx. 13-18). From the place of the Pathrusim in the list of the Mizraites, they might be supposed to have settled in Lower Egypt, or the more northern part of Upper Egypt. Four only of the Mizraite tribes or peoples can be probably assigned to Egypt, the last four, the Philistines being considered not to be one of those, but merely a colony: these are the Naphtuhim, Pathrusim, Caslulim, and Caphtorim. The first were either settled in Lower Egypt, or just beyond its western border; and the last in Upper Egypt, about Coptos. It seems, if the order be geographical, as there is reason to suppose, that it is to be inferred that the Pathrusim were seated in Lower Egypt, or not much above it, unless there be any transposition; but that some change has been made is probable from the parenthetic notice of the Philistines following the Caslulim, whereas it appears from other passages that it should rather follow the Caphtorim. If the original order were Pathrusim, Caphtorim, Caslulim, then the first might have settled in the highest part of Upper Egypt, and the other two below them. The mention in Isaiah would lead us to suppose that Pathros was Upper Egypt, if there were any sound reason for the idea that Mizraim or Mazor is ever used for Lower Egypt, which we think there is not. Rödiger's conjecture that Pathros included part of Nubia is too daring to be followed (*Encyclop. Germ.* sect. iii. tom. xiii. p. 312), although there is some slender support for it. The occurrences in Jeremiah seem to favour the idea that Pathros was part of Lower Egypt, or the whole of that region; for although it is mentioned in the prophecy against the Jews as a region where they dwell after Migdol, Tahpanhes, and Noph, as though to the south, yet we are told that the prophet was answered by the Jews "that dwell in the land of Egypt, in Pathros," as though Pathros were the region in which these cities were. We have, moreover, no distinct evidence that Jeremiah ever went into Upper Egypt. On the other hand, it may be replied that the cities mentioned are so far apart, that either the prophet must have preached to the Jews in them in succession, or else have addressed letters or messages to them (comp. xxix.). The notice by Ezekiel of Pathros as the land of the birth of the Egyptians seems to favour the idea that it was part of or all Upper Egypt, as the Thebais was probably inhabited before the rest of the country (comp. *Hdt.* ii. 15); an opinion supported by the tradition that the people of Egypt came from Ethiopia, and by the 1st dynasty's being of Thinite kings.

Pathros has been connected with the Pathyrite nome, the Phaturite of Ptolemy (*H. N.* v. 9, §47), in which Thebes was situate. The first form occurs in a Greek papyrus written in Egypt (Παθούρης τῆς Θηβαΐδος, Papyr. Anast. vid. Keuvens, *Lettres à M. Letronne*, 3 let. p. 4, 30, ap. Parthey, *Voerb.* s. v.). This identification may be as old as the LXX., and the Coptic version, which reads ΠΑΠΘΟΥΡΗΣ ΠΑΠΙΤΟΥΡΗΣ, does not contradict it. The discovery of the Egyptian name of the town after which the nome was called puts the inquiry on a safer basis. It is written HA-HAT-HER, "The Abode of Hat-her," the

Egyptian Venus. It may perhaps have been written P-HA-HAT-HER, in P-H and T-H would have confused form, as did T-H in Caphtor. (Cf. etymologies for the word Pathros as "that which is southern," and for LXX. ΠΑΤΟΥΡΗΣ, "the soil" (*Gesen. Thes.* s. v.), must be almost

On the evidence here brought forward it is reasonable to consider Pathros to be Egypt, and to trace its name in that name. But this is only a very tentative fiction, which future discoveries may or may not confirm. It is spoken of with cities in and we may suppose it was but a small (if we have rightly identified it, the Thebes is especially intended. The for its distinctive mention.

#### PATHRUSIM. [PATHROS.]

PATMOS (Πάμος, Rev. i. 9) and copious accounts, one by a French traveller, furnish us with information regarding this island. In 1841, and describes it at length (*griechischen Inseln des ägäischen Meeres*, 139). Guérin, some years later, there, and enters into more details, glands ecclesiastical antiquities and *description de l'île de Patmos et de* Paris, 1856, pp. 1-120). Among travellers who have visited Patmos we mention Tournefort and Peacocke. See *Turkey*, ii. 43.

The aspect of the island is peculiar here. And such a scene of loneliness in the reign of Domitian is quite in what we read of the custom of the was the common practice to send a most rocky and desolate island (*insularum*). See *Suet. Tit.* s. 10. Such a scene too was suitable (if we are to say so) to the sublime and awful which the Apostle received there. It indeed that there was more gloom formerly than now. Its name in the was *Palmosa*. But this has not been given place to the old classical name, and just one palm-tree in the island, is a place is called "the Saint's Garden" (*ὁ ἁγίου*). Here and there are a few about a score of cypresses, and other same scanty proportion.

Patmos is divided into two parts, northern and a southern, by a very narrow where, on the east side, are the highest town. On the hill to the south, commanding height, is the celebrated prison, bears the name of "John the Baptist." up the ascent is the cave or grotto where it says that St. John received the Revelation, which is still called *τὸ σπήλαιον τοῦ ἁγίου*. A view of it, said by Ross to be accurate) will be found in Chios. Both Ross and Guérin give a very melancholy account of the library. There were in it formerly four MSS. No. 246, of which Guérin gives a notice ought to be mentioned here, which under the title of *αἱ ἐκδόσεις τοῦ βιβλίου* account of St. John after the apostle's

n is attributed to Prochorus, an alleged St. John; the other is an abridgment of by Nicetus, archbishop of Thessalonica. The names in the island are incorporated in the text. This is one of its chief points of interest. It is published Latin translation in the *Bibliotheca Patrum* (1677, tom. ii.), but with modifications, one great object of which is to place St. John's martyrdom from Ephesus; legend places it), and to fix it in

only to add that Patmos is one of the islands in that part of the Aegean which is the Icarian Sea. It must have been correct the right when St. Paul was sailing from SAMOS to COS. [J. S. H.]

**PATRIARCHS.** The name *πατριάρχης* is the N. T. to Abraham (Heb. vii. 4), to Jacob (Acts vii. 8, 9), and to David; and is apparently intended to be equivalent to the phrase *בית אבות*, the "head" of a tribe, so often found in the O. T. in this sense by the LXX. in 1 Chr. xvi. 22; 2 Chr. xiii. 20, xvi. 12. The usage of the title of patriarch is assigned to those whose lives are recorded in previous to the time of Moses. By the "patriarchal system" is meant that state of society which developed itself naturally out of family relationships, the formation of nations properly so called.

The establishment of regular government by the "patriarchal dispensation" the time into which God was pleased to enter families of Seth, Noah, and Abraham, all of the chosen people.

Patriarchal times are naturally divided into antediluvian and post-diluvian periods.

The former the Scripture record contains the list of the line from Seth, through Adam, Mahalalel, Jared, Enoch, Methuselah, to Noah; with the ages of each period of generation and at their deaths. [GEN. I.] To some extent parallel to this, the line of Cain; Enoch, Irad, Methuselah, Lamech, and the sons of Lamech, Jabal, Jubal, Tubal-Cain. To the latter line are ascribed the first signs of material civilization, the building of cities, the division of classes, and the development of mechanical arts; while the only record of their history obscurely speaks of the bloodshed. [LAMECH.] In the former the distinction is their knowledge of the world with the constant recollection of the prod of the woman") which is seen in its action in Enoch and Noah; and the only record of their occupation (Gen. v. 29) seems to they continued a pastoral and agricultural life.

The entire corruption, even of the line of Seth, is traced (in Gen. vi. 1-4) to between "the sons of God" and "the daughters of men" (Heb. "of Adam"). This is generally explained by the ancient conception of a contact with supernatural powers of the persons of fallen angels; most modern

interpretation refers it to intermarriage between the lines of Seth and Cain. The latter is intended to avoid the difficulties attaching to the comprehension of the former view, which nevertheless is undoubtedly far more accordant with the usage of the phrase "sons of God" in the O. T. (comp. Job i. 6, xxviii. 7), and with the language of the passage in Genesis itself. (See Matland's *Enoch*, Essay vi.)

One of the main questions raised as to the antediluvian period turns on the longevity assigned to the patriarchs. With the single exception of Enoch (whose departure from the earth at 365 years of age is exceptional in every sense), their ages vary from 777 (Lamech) to 969 (Methuselah). It is to be observed that this longevity disappears gradually after the Flood. To Shem are assigned 600 years; and thence the ages diminish down to Terah (205 years), Abraham (175), Isaac (180), Jacob (147), and Joseph (110).<sup>a</sup>

This statement of ages is clear and definite. To suppose, with some, that the name of each patriarch denotes a clan or family, and his age its duration, or, with others, that the word *שנה* (because it properly signifies "iteration") may, in spite of its known and invariable usage for "year," denote a lunar revolution instead of a solar one (*i. e.* a month instead of a year) in this passage, appears to be a mere evasion of difficulty.<sup>b</sup> It must either be accepted, as a plain statement of fact, or regarded as purely fabulous, like the legendary assignment of immense ages to the early Indian or Babylonian or Egyptian kings.

The latter alternative is adopted without scruple by many of the German commentators, some of whom attempt to find such significance in the patriarchal names as to make them personify natural powers or human qualities, like the gods and demigods of mythology. It belongs of course to the mythical view of Scripture, destroying its claim, in any sense, to authority and special inspiration.

In the acceptance of the literal meaning, it is not easy to say how much difficulty is involved. With our scanty knowledge of what is really meant by "dying of old age," with the certainty that very great effects are produced on the duration of life, both of men and animals, by even slight changes of habits and circumstances, it is impossible to say what might be *a priori* probable in this respect in the antediluvian period, or to determine under what conditions the process of continual decay and reconstruction, which sustains animal life, might be indefinitely prolonged. The constant attribution in all legends of great age to primeval men is at least as likely to be a distortion of fact, as a mere invention of fancy. But even if the difficulty were greater than it is, it seems impossible to conceive that a book, given by Inspiration of God to be a treasure for all ages, could be permitted to contain a statement of plain facts, given undoubtedly, and with an elaborate show of accuracy, and yet purely and gratuitously fabulous, in no sense bearing on its great religious subject. If the Divine origin of Scripture be believed, its authority must be accepted in this, as in other cases; and the list of the ages

<sup>a</sup> Hebrew text is here taken throughout: for the LXX. and the Samaritan Pentateuch, see v.

<sup>b</sup> It is likely enough that the year (as in so many legends) may be a lunar year of 354 or 355 days,

or even a year of 10 months, but this makes no real difference. It is possible that there may be some corruption in the text, which may affect the numbers given; but the longevity of the patriarchs is noticed and commented upon, as a well-known fact, by Josephus (*Ant.* i. 3, §9).

of the patriarchs be held to be (what it certainly claims to be) a statement of real facts.

2. It is in the post-diluvian periods that more is gathered as to the nature of the patriarchal history.

It is at first general in its scope. The "Covenant" given to Noah is one, free from all condition, and fraught with natural blessings, extending to all alike; the one great command (against bloodshed), which marks it, is based on a deep and universal ground; the fulfilment of the blessing, "Be fruitful and multiply, and replenish the earth," is expressly connected, first with an attempt to set up an universal kingdom round a local centre, and then (in Gen. x.) with the formation of the various nations by conquest or settlement, and with the peopling of all the world. But the history soon narrows itself to that of a single tribe or family, and afterwards touches the general history of the ancient world and its empires, only so far as it bears upon this.

It is in this last stage that the principle of the patriarchal dispensation is most clearly seen. It is based on the sacredness of family ties and paternal authority. This authority, as the only one which is natural and original, is inevitably the foundation of the earliest form of society, and is probably seen most perfectly in wandering tribes, where it is not affected by local attachments and by the acquisition of wealth. It is one, from the nature of the case, limited in its scope, depending more on its sacredness than its power, and giving room for much exercise of freedom; and, as it extends from the family to the tribe, it must become less stringent and less concentrated, in proportion to its wider diffusion. In Scripture this authority is consecrated by an ultimate reference to God, as the God of the patriarch, the Father (that is) both of him and his children. Not, of course, that the idea of God's Fatherhood carried with it the knowledge of man's personal communion with His nature (which is revealed by the incarnation); it rather implied faith in His protection, and a free and loving obedience to His authority, with the hope (more or less assured) of some greater blessing from Him in the coming of the promised seed. At the same time, this faith was not allowed to degenerate, as it was prone to do, into an appropriation of God, as the mere tutelary God of the tribe. The Lord, it is true, suffers Himself to be called "the God of Shem, of Abraham, of Isaac, and of Jacob;" but He also reveals Himself (and that emphatically, as though it were His peculiar title) as the "God Almighty" (Gen. xvi. 1, xviii. 3, xxv. 11); He is addressed as the "Judge of all the earth" (xviii. 25), and as such is known to have intercourse with Pharaoh and Abimelech (xii. 17, xx. 3-8), to hallow the priesthood of Melchizedek (xv. 18-20), and to execute wrath on Sodom and Gomorrah. All this would confirm what the generality of the covenant with Noah, and of the promise of blessing to "all nations" in Abraham's seed must have distinctly taught, that the chosen family were, not substitutes, but representatives, of all mankind, and that God's relation to them was only a clearer and more perfect type of that in which He stood to all.

Still the distinction and preservation of the chosen family, and the maintenance of the paternal authority, are the special purposes, which give a key to the meaning of the history, and of the insti-

tutions recorded. For this the birthright (probably carrying with it the priesthood) was reserved to the first-born, belonging to him by inheritance, yet not assured to him till he received his father's blessing; for this the sanctity of marriage was jealously and even cruelly guarded, as in Gen. xxix. 7, 13, 31 (Dinah), and in xxviii. 24 ("Tamar," from the licence of the world without); and all intermarriage with idolaters was considered as tenuous to the family and the God of Abraham (Gen. xxv. 34, 35, xvi. 46, xxviii. 1, 6-9). Natural obedience and affection are the earthly virtues especially brought out in the history, and the sin dwelt upon (from the interference of Ham in the selling of Joseph), are all such as offend against these.

The type of character formed under it, is not imperfect in intellectual and spiritual growth, because not yet tried by the subtler temptations or forced to contemplate the deeper questions of life; but it is one remarkably simple, affectionate, and free, such as would grow up under a natural authority, derived from God and centering in Him, yet allowing, under its unquestioned sacredness, a familiarity and freedom of intercourse with Him, which is strongly contrasted with the stern and awful character of the Mosaic dispensation. To contemplate it from a Christian point of view is like looking back on the unconscious freedom and innocence of childhood, with that deeper insight and strength of character which are gained by the experience of manhood. We see in it the germs of the future, of the future revelation of God, and the future trials and development of man.

It is on this fact that the typical interpretation of its history depends, an interpretation mentioned directly by the example of St. Paul (Gal. iii. 21-31; Heb. vii. 1-17), indirectly suggested by other passages of Scripture (Matt. xxv. 31-46; Luke xvii. 28-32; Rom. ix. 10-13, &c.), and instinctively adopted by all who have studied the history itself.

Even in the brief outline of the ante-diluvian period, we may recognize the main features of the history of the world, the division of mankind into the two great classes, the struggle between the power of evil and good, the apparent triumph of the evil, and its destruction in the final judgment. In the post-diluvian history of the chosen family, is seen the distinction of the true believers, possessors of a special covenant, special revelation, and special privileges, from the world without. In it is therefore shadowed out the history of the Jewish Nation and Christian Church, as regards the freedom of their covenant, the gradual unfolding of their revelation, and the peculiar blessings and temptations which belong to their distinctive position.

It is but natural that the unfolding of the characters of the patriarchs under this dispensation should have a typical interest. Abraham, as the type of a faith, both brave and patient, gradual, and continuously growing under the education of various trials, stands contrasted with the lower character of Jacob, in whom the same faith is seen, tainted with deceit and selfishness, and needing therefore to be purged by disappointment and suffering. Isaac in the passive gentleness and self-sacrificeness, which characterizes his whole life, and is seen especially in his willingness to be sacrificed by the hand of his father, and Joseph, in the more active spirit of love, in which he rejected to en-

to forgive those who have persecuted set forth the perfect spirit of sonship, or be types especially of Him, in whom it dwelt in all fulness.

character in the hands of the myth—of course, made an argument against reality of the whole; those who recognize principle in God's dispensations at all prepared to find, even in their earliest form, the same features which are more d in their later periods. [A. B.]

**PAS** (Πατροβᾶς: *Patrobis*). A home to whom St. Paul sends his m. xvi. 14). According to late tradition, he was one of the 70 disciples, p of Puteoli (Pseudo-Hippolytus, *De Isis*), and suffered martyrdom together us on Nov. 4th (Eustius). Like many mentioned in Rom. xvi., this was borne e member of the emperor's household 20; Martial, *Ep.* ii. 32, 3). Proie is a contraction, like others of the tion, and stands for Πατρόβιος (see *holog.*). [W. T. B.]

**LUS** (Πάτροκλος: *Patroclus*), the anor, the famous adversary of Judas ! Macc. viii. 9).

), but in 1 Chr. i. 50, ΠΑΙ, ΨΒ, though see with the reading in Gen.: Φογῶρ: ap tal of Hadar, king of Edom (Gen. s position is unknown. The only name esemblance to it is *Phaenra*, a ruined aea mentioned by Seetzen. [W. L. B.]

**αὔλος**: *Paulus*), the Apostle of Jesus Gentiles.

The large space which St. Paul is due to the important part which preuding that kingdom. As to the ing can be plainer than that they without reference to the history; and empt in the Canon to combine them o form what we should call in modern postle's "Life and Letters." What eement, and what amount of discre-

pancy, may be observed between these independent authorities, is a question of the greatest interest and importance, and one upon which various opinions are entertained. The most adverse and extreme criticism is ably represented by Dr. Baur of Tübingen,\* who finds so much opposition between what he holds to be the few authentic Pauline Epistles and the Acts of the Apostles, that he pronounces the history to be an interested fiction. But his criticism is the very caricature of captiousness. We have but to imagine it applied to any history and letters of acknowledged authenticity, and we feel irresistibly how arbitrary and unhistorical it is. Putting aside this extreme view, it is not to be denied that difficulties are to be met with in reconciling completely the Acts and the received Epistles of St. Paul. What the solutions of such difficulties may be, whether there are any direct contradictions, how far the apparent differences may be due to the purpose of the respective writers, by what arrangement all the facts presented to us may best be dove-tailed together,—these are the various questions which have given so much occupation to the critics and expositors of St. Paul, and upon some of which it seems to be yet impossible to arrive at a decisive conclusion.

We shall assume the Acts of the Apostles to be a genuine and authentic work of St. Luke, the companion of St. Paul, and shall speak of the Epistles at the places which we believe them to occupy in the history.

*Prominent points in the Life*.—It may be well to state beforehand a few of the principal occurrences upon which the great work done by St. Paul in the world is seen to depend, and which therefore serve as landmarks in his life. Foremost of all is his *Conversion*. This was the main root of his whole life, outward and inward. Next after this, we may specify his *Labours at Antioch*. From these we pass to the *First Missionary Journey*, in the eastern part of Asia Minor, in which St. Paul first assumed the character of the Apostle of Jesus Christ to the Gentiles. *The Visit to Jerusalem*, for the sake of settling the question of the relation of Gentile converts to the Jewish law, was a critical point, both in the history of the Church and of the Apostle. *The introduction of the Gospel into Europe*, with the memorable visits to Philippi, Athens, and Corinth, was the boldest step in the carrying out of St. Paul's mission. A third great missionary journey, chiefly characterized by a long *stay at Ephesus*, is further interesting from its connexion with four leading Epistles. This was immediately followed by the *apprehension of St. Paul at Jerusalem*, and his imprisonment at *Caesarea*. And the last event of which we have a full narrative is the *Voyage to Rome*.

The relation of these events to external chronology will be considered at the end of the article.

*Saul of Tarsus, before his Conversion*.—Up to the time of his going forth as an avowed preacher of Christ to the Gentiles, the Apostle was known by the name of Saul. This was the Jewish name which he received from his Jewish parents. But though a Hebrew of the Hebrews, he was born in a Gentile city. Of his parents we know nothing.

*ulus der Apostel Jesus Christi*, Stuttgart,

mentioned by Jerome (*Scrip. Eccl. Cal.*); St. Paul's parents lived at Gischala in

Gallilee, and that, having been born there, the infant Saul emigrated with his parents to Tarsus upon the taking of that city by the Romans, is inconsistent with the fact that Gischala was not taken until a much later time, and

except that his father was of the tribe of Benjamin (Phil. iii. 5), and a Pharisee (Acts xxiii. 6), that he had acquired by some means the Roman franchise ("I was free born," Acts xxii. 28), and that he was settled in Tarsus. "I am a Jew of Tarsus, a city in Cilicia, a citizen of no mean city" (Acts xxi. 39). Our attention seems to be specially called to this birthplace and early home of Saul by the repeated mention of it in connexion with his name. Here he must have learnt to use the Greek language with freedom and mastery in both speaking and writing; and the general tone and atmosphere of a cultivated community cannot have been without their effect upon his highly susceptible nature. At Tarsus also he learnt that trade of *σκηνωτοῖς* (Acts xviii. 3), at which he afterwards occasionally wrought with his own hands. There was a goat's-hair cloth called *Cilicium*, manufactured in Cilicia, and largely used for tents. Saul's trade was probably that of making tents of this haircloth. It does not follow that the family were in the necessitous condition which such manual labour commonly implies; for it was a wholesome custom amongst the Jews, to teach every child some trade, though there might be little prospect of his depending upon it for his living.

When St. Paul makes his defence before his countrymen at Jerusalem (Acts xxii.), he tells them that though born in Tarsus, he had been "brought up" (*ἀνατετραφεμένος*) in Jerusalem. He must, therefore, have been yet a boy, when he was removed, in all probability for the sake of his education, to the Holy City of his fathers. We may imagine him arriving there, perhaps at some age between 10 and 15, already a Hellenist, speaking Greek and familiar with the Greek version of the Scriptures, possessing, besides the knowledge of his trade, the elements of Gentile learning,—to be taught at Jerusalem "according to the perfect manner of the law of the fathers." He learnt, he says, "at the feet of Gamaliel." He who was to resist so stoutly the usurpations of the law, had for his teacher one of the most eminent of all the doctors of the law. [GAMALIEL.] It is singular, that on the occasion of his well-known intervention in the Apostolical history, the master's counsels of toleration are in marked contrast to the persecuting zeal so soon displayed by the pupil. The temper of Gamaliel himself was moderate and candid, and he was personally free from bigotry; but his teaching was that of the strictest of the Pharisees, and bore its natural fruit when lodged in the ardent and thorough-going nature of Saul. Other fruits, besides that of a zeal which persecuted the Church, may no doubt be referred to the time when Saul sat at the feet of Gamaliel. A thorough training in the Scriptures and in the traditions of the elders under an acute and accomplished master, must have done much to exercise the mind of Saul, and to make him feel at home in the subjects in which he was afterwards to be so intensely interested. And we are not at all bound to suppose that, because his zeal for the law was strong enough to set him upon persecuting the believers in Jesus,

he had therefore experienced none of the struggles which, according to his testimony, it was the nature of the law to excite. On the contrary, we can scarcely imagine absent from the spiritual life of Saul, from boyhood to manhood. Earnest as he is, oftener than not, men who have been by inward struggles and perplexities. If of Gamaliel may have been crushing a new conflict in his own mind when he flew into the holy work of extirpating the sect.

Saul was yet "a young man" (Acts vii. 58), when the Church experienced the expansion which was connected with the of the Seven appointed to serve tables, the special power and inspiration of. Amongst those who disputed with Stephen some "of them of Cilicia." We naturally Saul as having been one of these, when him afterwards keeping the clothes of those witnesses who, according to the law (Acts 7), were the first to cast stones at Stephen. He says the sacred writer, significantly, "adding unto his death." The angelic glory shone from Stephen's face, and the Divine truth of words, failing to subdue the spirit of one hated now burning in Saul's breast, and embittered and aggravated its rage, he was passing through a terrible crisis for a new nature. But he was not one to be moved by stern purpose by the native refinement and earnestness which he must have been cultivating in. He was the most unwearied and unrelenting persecutors. "As for Saul, he made havoc of the Church, entering into every house, and hounding men and women, committed them to prison" (Acts viii. 3).

*Saul's Conversion.*—The preacher would have inverted. What the nature of that conversion now to observe,—Having understood the believers "unto strange ideas," Saul turned his thoughts to Damascus, especially amongst the numerous Jewish residents of the populous city, some adherents of "the way of David," and trusting, we must presume, to be allowed by the connivance of the governor to apprehend them. What befell him as he journeyed thither, is related in detail three times in the Acts, by the historian in his own person, then in the addresses made by St. Paul at Jerusalem and to Agrippa. These three narratives are not separated of one another: there are differences between which some critics choose to render remarkable. Considering that the same subject is treated for all the accounts, we give nothing, it seems for the authenticity of their statements by placing them into agreement; but it were gratifying to the author himself could not have been aware of any contradictions in the narratives. It scarcely have had any motive for producing side inconsistent reports of St. Paul's conversion, and that he should have admitted such a matter through more credence, a more credible. Of the three narratives, that of the historian himself must claim to be the most

with the Apostle's own statement that he was born at Tarsus (Acts xxi. 3).

<sup>c</sup> His words in the speech before Agrippa (Acts xxvi. 4, 5), according to the received text, refer exclusively to his life at Jerusalem. But if we read, with the

better authorities, *ἐν τῇ Ἱερουσαλὴμ καὶ ἐν ταῖς ἑτέροις πόλεσιν*, speaking of the life he led "amongst the Jews at Tarsus or elsewhere, as well as at Jerusalem."

Paul's subsequent accounts were all by the purpose for which he

St. Luke's statement is to be i. 19, where, however, the words "to kick against the pricks," in the original and English version, ought to be "the sudden light from heaven"; the speaking with authority to His persecutors to the ground, blinded, over days' suspense; the coming of the anger of the Lord; and Saul's baptism the leading features, in the eyes of the great event, and in these we see the chief significance of the con-

compare the historical relation with what we find in St. Paul's speeches (Acts

The reader will do well to compare the place. But we have here to deal with facts of agreement or difference. In the light, the speeches add to what we see that the phenomenon occurred that the light shone round, and was a companionship as well as himself. St. Paul says, that at the shining of this company ("we all") fell to the ground, not contradicted by what is said, in which journeyed with him stood there is no emphasis on "stood," being antithetical to Saul's falling, but to suppose the others rising standing still afterwards in greater darkness not seeing or hearing what was said, to reconcile the narratives either. After the question, "Why persecutest thou me?" the 2nd speech adds, "It is not a kick against the goads." Then St. Paul supplies a question and answer—"What art thou, Lord? And he said, I am Jesus, whom thou persecutest." Then he goes to go into Damascus and await the 1st speech agrees with Acts ix. according to that chapter the men heard the voice," in the 1st speech it said not the voice of him that spoke as reasonable to conclude from the fact that the men actually heard sounds, and an articulate voice. With regard to Ananias, there is no collision between the 1st speech, the latter only mentions words to Ananias. The 2nd speech gives details of the conversion after Saul saw Jesus, whom thou persecutest, and on thy feet." St. Paul adds, in the 1st of Jesus, an exposition of the purpose he had appeared to him. It is easy to bring these words to Jesus. St. Paul's reporter is violating the order and the earlier accounts. But, if we bear in mind the purpose of St. Paul's address we shall surely not suppose that he is strict truth, when he adds to the fact that Jesus spoke to him at the moment of the sound, without interposing any other occasion, that fuller exposition of the crisis through which he was passing was not to receive till afterwards, actually heard from Jesus on the way, was afterwards interpreted, to the effect that those definite expressions, do not forget that, whatever we hold

as to the external nature of the phenomena we are considering, the whole transaction was essentially, in any case, a spiritual communication. That the Lord Jesus manifested Himself as a Living Person to the man Saul, and spoke to him so that His very words could be understood, is the substantial fact declared to us. The purport of the three narratives is that an actual conversation took place between Saul and the Lord Jesus. It is remarkable that in none of them is Saul said to have seen Jesus. The grounds for believing that he did are the two expressions of Ananias (Acts ix. 17), "The Lord Jesus, who appeared unto thee in the way," and (Acts xxii. 14) "That thou shouldst see the Just One," and the statement of St. Paul (1 Cor. xv. 8), "Last of all He was seen of me also." Comparing these passages with the narratives, we conclude, either that Saul had an instantaneous vision of Jesus as the flash of light blinded him, or that the "seeing" was that apprehension of His presence which would go with a real conversation. How it was that Saul "saw" and "heard" we are quite unable to determine. That the light, and the sound or voice, were both different from any ordinary phenomena with which Saul and his companions were familiar, is unquestionably implied in the narrative. It is also implied that they were specially significant to Saul, and not to those with him. We gather therefore that there were real outward phenomena, through which Saul was made inwardly sensible of a Presence revealed to him alone.

Externally there was a flash of light. Spiritually "the light of the gospel of the glory of the Christ, who is the image of God," shone upon Saul, and convicted the darkness of the heart which had shut out Love and knew not the glory of the Cross. Externally Saul fell to the ground. Spiritually he was prostrated by shame, when he knew whom he had been persecuting. Externally sounds issued out of heaven. Spiritually the Crucified said to Saul, with tender remonstrance, "I am Jesus, why persecutest thou me?" Whether audibly to his companions, or audibly to the Lord Jesus only, Saul confessed himself in the spirit the servant of Him whose name he had hated. He gave himself up, without being able to see his way, to the disposal of Him whom he now knew to have vindicated His claim over him by the very sacrifice which formerly he had despised. The Pharisee was converted, once for all, into a disciple of Jesus the Crucified.

The only mention in the Epistles of St. Paul of the outward phenomena attending his conversion is that in 1 Cor. xv. 8, "Last of all He was seen of me also." But there is one important passage in which he speaks distinctly of his conversion itself. Dr. Baur (*Paulus*, p. 64), with his readiness to find out discrepancies, insists that this passage represents quite a different process from that recorded in the Acts. It is manifestly not a repetition of what we have been reading and considering, but it is in the most perfect harmony with it. In the Epistle to the Galatians (i. 15, 16) St. Paul has these words: "When it pleased God, who separated me from my mother's womb, and called me by His grace, to reveal His Son in me, that I might preach Him among the heathen..." (*ἀποκαλύψαι τὸν υἱὸν αὐτοῦ ἐν ἐμοί*). What words could express more exactly than these the spiritual experience which occurred to Saul on the way to Damascus? The manifestation of Jesus as the Son

of God is clearly the main point in the narrative. This manifestation was brought about through a removal of the veils of prejudice and ignorance which blinded the eyes of Saul to a Crucified Deliverer, conquering through sacrifice. And, whatever part the senses may have played in the transaction, the essence of it in any case must have been Saul's inward vision of a spiritual Lord close to his spirit, from whom he could not escape, whose every command he was henceforth to obey in the Spirit.

It would be groundless to assume that the new convictions of that mid-day immediately cleared and settled themselves in Saul's mind. It is sufficient to say that he was then converted, or turned round. For a while, no doubt, his inward state was one of awe and expectation. He was being "led by the hand" spiritually by his Master, as well as bodily by his companions. Thus entering Damascus as a servant of the Lord Jesus, he sought the house of one whom he had, perhaps, intended to persecute. Judas may have been known to his guest as a disciple of the Lord. Certainly the fame of Saul's coming had preceded him; and Ananias, "a devout man according to the law," but a believer in Jesus, when directed by the Lord to visit him, wonders at what he is told concerning the notorious persecutor. He obeys, however; and going to Saul in the name of "the Lord Jesus, who had appeared to him in the way," he puts his hands on him that he may receive his sight and be filled with the Holy Ghost. Thereupon Saul's eyes are immediately purged, and his sight is restored. "The same hour," says St. Paul (Acts xxii. 13), "I looked up upon him. And he said, The God of our fathers hath chosen thee, that thou shouldest know His will, and see the Just One, and shouldest hear the voice of His mouth. For thou shalt be His witness unto all men of what thou hast seen and heard." Every word in this address strikes some chord which we hear sounded again and again in St. Paul's Epistles. The new convert is not, as it is so common to say, converted from Judaism to Christianity—the God of the Jewish fathers chooses him. He is chosen to know God's will. That will is manifested in the Righteous One. Him Saul sees and hears, in order that he may be a witness of Him to all men. The eternal will of the God of Abraham; that will revealed in a Righteous Son of God; the testimony concerning Him, a Gospel to mankind:—these are the essentially Pauline principles which are declared in all the teaching of the Apostle, and illustrated in all his actions.

After the recovery of his sight, Saul received the washing away of his sins in baptism. He then broke his three days' fast, and was strengthened: an image, again, of the strengthening of his faint and hungering spirit through a participation in the Divine life of the Church at Damascus. He was at once received into the fellowship of the disciples, and began without delay the work to which Ananias had designated him; and to the astonishment of all his hearers he proclaimed Jesus in the synagogues, declaring him to be the Son of God. This was the natural sequel to his conversion: he was to proclaim Jesus the Crucified, first to the Jews as their own Christ, afterwards to the world as the Son of the Living God.

The narrative in the Acts tells us simply that he was occupied in this work, with increasing vigour, for "many days," up to the time when imminent danger drove him from Damascus. From the Epistle to the Galatians (i. 17, 18) we learn that the many

days were at least a good part of "three years," and that Saul, not thinking it necessary to possess authority to preach from the Apostles that were before him, went after his conversion into Arabia, and returned from thence to Damascus. We know nothing whatever of this visit to Arabia—to what district Saul went, how long he stayed, or for what purpose he went there. From the antithetical way in which it is opposed to a visit to the Apostles at Jerusalem, we infer that it took place before he deliberately committed himself to the task of proclaiming Jesus as the Christ; and also, with some probability, that he was seeking asceticism, in order that, by conferring "not with flesh and blood," but with the Lord in the Spirit, he might receive more deeply into his mind the commission given him at his conversion. That Saul did not spend the greater portion of the "three years" at Damascus seems probable, for these two reasons: (1) that the sight of the Jews was not likely to have borne with two or three years of such a life as Saul's now was without growing to a height; and (2) that the disciples at Jerusalem would not have been likely to mistrust Saul as they did, if they had heard of him as preaching Jesus at Damascus for the same considerable period. But it does not follow that Saul was in Arabia all the time he was not disputing at Damascus. For all that we know to the contrary he may have gone to Antioch or Tarsus or anywhere else, or he may have remained and at Damascus for some time after returning from Arabia.

Now that we have arrived at Saul's departure from Damascus, we are again upon historical ground, and have the double evidence of St. Luke in the Acts, and of the Apostle in his 2nd Epistle to the Corinthians. According to the former, the Jews lay in wait for Saul, intending to kill him, and watched the gates of the city that he might escape from them. Knowing this, the disciples led him by night and let him down in a basket from the wall. According to St. Paul (2 Cor. xi. 32) it was the ethnarch under Aretas the king who watched for him, desiring to apprehend him. There is no difficulty in reconciling the two statements. We might similarly say that our Lord was put to death either by the Jews or by the Roman governor. There is more difficulty in ascertaining how an officer of king Aretas should be governing in Damascus, and why he should lend himself to the designs of the Jews. But we learn from earlier history that the affairs of Damascus were, at the time, in such an unsettled state as to make the narrative not improbable. [ARETAS.] Having escaped from Damascus, Saul betook himself to Jerusalem, and there "assayed to join himself to the disciples; but they were all afraid of him, and believed not that he was a disciple." Is the natural but trying difficulty Saul was beset by one whose name was henceforth closely associated with his. Barnabas became his sponsor to the Apostles and Church at Jerusalem, leading them—from some personal knowledge, we must presume—of the facts of Saul's conversion and subsequent behaviour at Damascus. It is noticeable that the seeing and hearing are still the leading features in the conversion, and the name of Jesus in the preaching. Barnabas declared how "Saul had seen the Lord in the way, and that he had spoken to him, and how that he had preached boldly at Damascus in the name of Jesus." The

reduction removed the fears of the old Paul "was with them coming in and to Jerusalem." His Hellenistical education, like Stephen, a successful disputant "Grecians;" and it is not strange that persecutor was singled out from the other the object of a murderous hostility. He is again urged to flee; and by way of look himself to his native city Tarsus. In his epistle to the Galatians St. Paul adds iculars, in which only a perverse and ticism could see anything contradictory just related. He tells us that his motive p to Jerusalem rather than anywhere at he might see Peter; that he abode teen days; that the only Apostles he ter and James the Lord's brother; and rds he came into the regions of Syria remaining unknown by face, though for his conversion, to the churches in h were in Christ. St. Paul's object in this connexion of his with those who les before him, was to show that he accepted his apostleship as a commission

On this point the narrative in the y agrees with St. Paul's own earnest s in his Epistles. He received his com- in the Lord Jesus, and also mediately anias. This commission included a nation to preach Christ to the Gentiles. tter designation he did not act, until s opened the way for it. But he at to proclaim Jesus as the Christ to his men. Barnabas introduced him to the t as seeking their sanction, but as having at the Lord Jesus, and as having boldly dy in His name. Probably at first, endence as an Apostle of Christ was not ough of, either by himself or by the es. It was not till afterwards that it mportant; and then the reality of it viny from a reference to the beginning olic work.

at Antioch.—While Saul was at Tarsus, was going on at Antioch, which raised an importance second only to that of self in the early history of the Church. of the Apostle of the Gentiles Antioch t conspicuous place. It was there that ng of the Gospel to the Gentiles first ad from thence that it was afterwards

Its geographical position, its political cial importance, and the presence of a wterful Jewish element in its popula- he more obvious characteristics which or such a use. There came to Antioch, ersecution which arose about Stephen on their different routes the disciples een assembled at Jerusalem, men of Cyrene, eager to tell all who would e good news concerning the Lord Jesus. ch was reached, the word was spoken t unto Jews only" (Acts xi. 19). But ntiles also (of Ἑλληνες)—not, as in "the Grecians,"—were amongst the he word. A great number believed; is was reported at Jerusalem, Barnabas a special mission to Antioch.

ork grew under his hands, and "much dled unto the Lord," Barnabas felt the and went himself to Tarsus to seek Saul.

Possibly at Damascus, certainly at Jerusalem, he had been a witness of Saul's energy and devotedness, and skill in disputation. He had been drawn to him by the bond of a most brotherly affection. He therefore longed for him as a helper, and succeeded in bringing him to Antioch. There they laboured together unremittingly for "a whole year," mixing with the constant assemblies of the believers, and "teaching much people." All this time, as St. Luke would give us to understand, Saul was subordinate to Barnabas. Until "Saul" became "Paul," we read of "Barnabas and Saul" (Acts xi. 30, xii. 25, xiii. 2, 7). Afterwards the order changes to "Paul and Barnabas." It seems reasonable to conclude that there was no marked peculiarity in the teaching of Saul during the Antioch period. He held and taught, in common with the other Jewish believers, the simple faith in Jesus the Christ, crucified and raised from the dead. Nor did he ever afterwards depart from the simplicity of this faith. But new circumstances stirred up new questions; and then it was to Saul of Tarsus that it was given to see, more clearly than any others saw, those new applications of the old truth, those deep and world-wide relations of it, with which his work was to be permanently associated. In the mean time, according to the usual method of the Divine government, facts were silently growing, which were to suggest and occasion the future developments of faith and practice, and of these facts the most conspicuous was the unprecedented accession of Gentile proselytes at Antioch.

An opportunity soon occurred, of which Barnabas and Saul joyfully availed themselves, for proving the affection of these new disciples towards their brethren at Jerusalem, and for knitting the two communities together in the bonds of practical fellowship. A manifest impulse from the Holy Spirit began this work. There came "prophets" from Jerusalem to Antioch: "and there stood up one of them, named Agabus, and signified by the Spirit that there should be great dearth throughout all the world." The "prophets" who now arrived may have been the Simeon and Lucius and Manneu, mentioned in xiii. 1., besides Agabus and others. The prediction of the dearth need not have been purposeless; it would naturally have a direct reference to the needs of the poorer brethren and the duty of the richer. It is obvious that the fulfilment followed closely upon the intimation of the coming famine. For the disciples at Antioch determined to send contributions immediately to Jerusalem; and the gift was conveyed to the elders of that Church by the hands of Barnabas and Saul. The time of this dearth is vaguely designated in the Acts as the reign of Claudius. It is ascertained from Josephus's history, that a severe famine did actually prevail in Judaea, and especially at Jerusalem, at the very time fixed by the event recorded in Acts xii., the death of Herod Agrippa. This was in A.D. 44. [AGABUS.]

It could not have been necessary for the mere safe conduct of the contribution that Barnabas and Saul should go in person to Jerusalem. We are bound to see in the relations between the Mother Church and that of Antioch, of which this visit is illustrative, examples of the deep feeling of the necessity of union which dwelt in the heart of the early Church. The Apostles did not go forth to teach a system, but to enlarge a body. The Spirit which directed and furthered their labours was

essentially the Spirit of fellowship. By this Spirit Saul of Tarsus was being practically trained in strict co-operation with his elders in the Church. The habits which he learnt now were to aid in guarding him at a later time from supposing that the independence which he was bound to claim, should involve the slightest breach or loosening of the bonds of the universal brotherhood.

Having discharged their errand, Barnabas and Saul returned to Antioch, bringing with them another helper, John surnamed Mark, sister's son to Barnabas. The work of prophesying and teaching was resumed. Several of the oldest and most honoured of the believers in Jesus were expounding the way of God and organizing the Church in that busy metropolis. Travellers were incessantly passing to and fro. Antioch was in constant communication with Cilicia, with Cyprus, with all the neighbouring countries. The question must have forced itself upon hundreds of the "Christians" at Antioch, "What is the meaning of this faith of ours, of this baptism, of this incorporation, of this kingdom of the Son of God, for the world? The Gospel is not for Judaea alone: here are we called by it at Antioch. Is it meant to stop here?" The Church was pregnant with a great movement, and the time of her delivery was at hand. We forget the whole method of the Divine work in the nurture of the Church, if we ascribe to the impulses of the Holy Ghost any theatrical suddenness, and disconnect them from the thoughts which were brooding in the minds of the disciples. At every point we find both circumstances and inward reasonings preparing the crisis. Something of direct expectation seems to be implied in what is said of the leaders of the Church at Antioch, that they were "ministering to the Lord, and fasting," when the Holy Ghost spoke to them. Without doubt they knew it for a seal set upon previous surmises, when the voice came clearly to the general mind, "Separate me Barnabas and Saul for the work whereunto I have called them." That "work" was partially known already to the Christians of Antioch: who could be so fit for it as the two brothers in the faith and in mutual affection, the son of exhortation, and the highly accomplished and undaunted convert who had from the first been called "a chosen vessel, to bear the name of the Lord before the Gentiles, and kings, and the people of Israel?"

When we look back, from the higher ground of St. Paul's apostolic activity, to the years that passed between his conversion and the first missionary journey, we cannot observe without reverence the patient humility with which Saul waited for his Master's time. He did not say for once only, "Lord, what wilt thou have me to do?" Obedience to Christ was thenceforth his ruling principle. Submitting, as he believed, to his Lord's direction, he was content to work for a long time as the subordinate colleague of his seniors in the faith. He was thus the better prepared, when the call came, to act with the authority which that call conferred upon him. He left Antioch, however, still the second to Barnabas. Everything was done with orderly gravity in the sending forth of the two missionaries. Their brethren, after fasting and prayer, laid their hands on them, and so they departed.

*The first Missionary Journey.*—Much must have been hid from Barnabas and Saul as to the issues of the journey on which they embarked. But one

thing was clear to them, that *they were sent forth to speak the word of God.* They did not go in their own name or for their own purposes; they were instruments for uttering what the Eternal God Himself was saying to men. We shall find in the history a perfectly definite representation of what St. Paul announced and taught as he journeyed from city to city. But the first characteristic feature of his teaching was the absolute conviction that he was only the bearer of a Heavenly message. It is idle to discuss St. Paul's character or views without recognising this fact. We are compelled to think of him as of a man who was capable of cherishing such a conviction with perfect assurance. We are bound to bear in mind the unexampled influence which that conviction must have exerted upon his nature. The writer of the Acts proceeds upon the same assumption. He tells us that as soon as Barnabas and Saul reached Cyprus, they began to "announce the word of God."

The second fact to be observed is, that for the present they delivered their message in the synagogues of the Jews only. They tried the old path till they should be drawn out of it. But when they had gone through the island, from Salamis to Paphos, they were called upon to explain their doctrine to an eminent Gentile, Sergius Paulus, the proconsul. This Roman officer, like so many of his countrymen, had already come under the influence of Jewish teaching; but it was in the corrupt form of magical pretensions, which flattered so luxuriantly upon the godless credulity of that age. A Jew, named Barjesus, or Elymas, a sorcerer and false prophet, had attached himself to the governor, and had no doubt interested his mind, so he was an intelligent man, with what he had had him of the history and hopes of the Jews. [Elymas] Accordingly, when Sergius Paulus heard of the strange teachers who were announcing to the Jews the advent of their true Messiah, he wished to see them and sent for them. The impostor, instinctively hating the Apostles, and seeing his influence over the proconsul in danger of perishing, did what he could to withstand them. Then Saul, "also called Paul," denouncing Elymas in resolute terms, declared against him God's sentence of temporary blindness. The blindness immediately fell upon him; and the proconsul, moved by the signs and persuaded by the teaching of the Apostles, becomes a believer.

There is a singular parallelism in several points between the history of St. Paul and that of St. Peter in the Acts. Baur presents it in a highly effective form (*Paulus*, p. 91 &c.), to support his theory of the composition of this book; and this is one of the services which he has incidentally rendered to the full understanding of the early history of the Church. Thus St. Paul's denunciation of Elymas reminds us of St. Peter's denunciation of Simon Magus. The two incidents bring before us one of the great adverse elements with which the Gospel had to contend in that age. Everywhere there were counterfeits of the spiritual powers which the Apostles claimed and put forth. It was necessary for the preachers of Christ—so much to prove themselves stronger than the magicians and soothsayers, as to guard against being confounded with them. One distinguishing mark of the true servants of the Spirit would be their *not trading* upon their spiritual powers (*Act. xiii. 20*). Another would be that of shunning every

part of concealment and a fiction, and courting the daylight of open truth. St. Paul's language to Elymas is studiously directed to the reproof of the tricks of the religious impostor. The Apostle, full of the true Holy Ghost, looked steadily on the deceiver, spoke in the name of a God of light and righteousness and straightforward ways, and put forth the power of that God for the vindication of truth against delusion. The punishment of Elymas was itself symbolical, and conveyed "teaching of the Lord." He had chosen to create a spiritual darkness around him; and now there fell upon him a mist and a darkness, and he went about, seeking some one to lead him by the hand. If on reading this account we refer to St. Peter's reproof of Simon Magus, we shall be struck by the differences as well as the resemblance which we shall observe. But we shall undoubtedly gain a stronger impression of this part of the Apostolic work, viz., the conflict to be waged between the Spirit of Christ and of the Church, and the evil spirits of a dark superstition to which men were surrendering themselves as slaves. We shall feel the worth and power of that candid and open temper in which alone St. Paul would commend his cause; and in the conversion of Sergius Paulus we shall see an exemplary type of many victories to be won by the truth over falsehood.

This point is made a special crisis in the history of the Apostle by the writer of the Acts. Saul now becomes Paul, and begins to take precedence of Barnabas. Nothing is said to explain the change of name. No reader could resist the temptation of supposing that there must be some connexion between Saul's new name and that of his distinguished Roman convert. But on reflection it does not seem probable that St. Paul would either have wished, or have consented, to change his own name for that of a distinguished convert. If we put Sergius Paulus aside, we know that it was exceedingly common for Jews to bear, besides their own Jewish name, another borrowed from the country with which they had become connected. (See Conybeare and Howson, i. p. 163, for full illustrations.) Thus we have Simeon also named Niger, Barsabas also named Justus, John also named Marcus. There is no reason therefore why Saul should not have been from infancy the other name of Paul. In that case he would be Saul amongst his own countrymen, Paulus amongst the Gentiles. And we must understand St. Luke as wishing to mark strongly the transition point between Saul's activity amongst his own countrymen, and his new labours as the Apostle of the Gentiles, by calling him Saul only, at the first, and Paul only afterwards.

The conversion of Sergius Paulus may be said, also, to mark the beginning of the work amongst the Gentiles; otherwise, it was not in Cyprus that the change took place in the method hitherto followed by Barnabas and Saul in preaching the Gospel. Their public addresses were as yet confined to the synagogues; but it was soon to be otherwise. From that point Paul and his company set sail for the island, and arrived at Perga in Pamphylia. The heart of their companion John failed when he returned to Jerusalem. From Perga they travelled on to a place, obscure in secular history, but most memorable in the history of the Gospel of Christ.—Antioch in Pisidia. [ANTIOCH IN PISIDIA.] Here "they went into the synagogue on the sabbath-day, and sat down." This place was, it contained its colony of Jews, and with them proselytes who worshipped the God

of the Jews. The degree to which the Jews had spread and settled themselves over the world, and the influence they had gained over the more respectable of their Gentile neighbours, and especially over the women of the better class, are facts difficult to appreciate justly, but proved by undoubted evidence, and very important for us to bear in mind. This Pisidian Antioch may have been more Jewish than most similar towns, but it was not more so than many of much greater size and importance. What took place here in the synagogue and in the city, is interesting to us not only on account of its bearing on the history, but also because it represents more or less exactly what afterwards occurred in many other places.

It cannot be without design that we have single but detailed examples given us in the Acts, of the various kinds of addresses which St. Paul used to deliver in appealing to his different audiences. He had to address himself, in the course of his missionary labours, to Jews, knowing and receiving the Scriptures; to ignorant barbarians; to cultivated Greeks; to mobs enraged against himself personally; to magistrates and kings. It is an inestimable help in studying the Apostle and his work, that we have specimens of the tone and the arguments he was accustomed to use in all these situations. These will be noticed in their places. In what he said at the synagogue in Antioch, we recognize the type of the addresses in which he would introduce his message to his Jewish fellow-countrymen.

The Apostles of Christ sat still with the rest of the assembly, whilst the Law and the Prophets were read. They and their audience were united in reverence for the sacred books. Then the rulers of the synagogue sent to invite them, as strangers but brethren, to speak any word of exhortation which might be in them to the people. Paul stood up, and beckoning with his hand, he spoke.—The speech is given in Acts xiii. 16-41. The characteristics we observe in it are these. The speaker begins by acknowledging "the God of this people Israel." He ascribes to Him the calling out of the nation and the conduct of its subsequent history. He touches on the chief points of that history up to the reign of David, whom he brings out into prominence. He then names JESUS as the promised Son of David. To convey some knowledge of Jesus to the minds of his hearers, he recounts the chief facts of the Gospel history; the preparatory preaching and baptism of John (of which the rumour had spread perhaps to Antioch), the condemnation of Jesus by the rulers "who knew neither Him nor the prophets," and His resurrection. That resurrection is declared to be the fulfilment of all God's promises of Life, given to the fathers. Through Jesus, therefore, is now proclaimed by God Himself the forgiveness of sins and full justification. The Apostle concludes by drawing from the prophets a warning against unbelief. If this is an authentic example of Paul's preaching, it was impossible for Peter or John to stait more exclusively from the Jewish covenant and promises than did the Apostle of the Gentiles. How entirely this discourse resembles those of St. Peter and of Stephen in the earlier chapters of the Acts! There is only one specially Pauline touch in the whole,—the words in ver. 39, "By Him all that believe are justified from all things, from which ye could not be justified by the Law of Moses." "Evidently inserted in," says Baur (p. 103), who thinks we are

dealing with a mere fiction, "to prevent the speech from appearing *too* Petrine, and to give it a slightly Pauline air." Certainly, it sounds like an echo of the Epistles to the Romans and Galatians. But is there therefore the slightest incongruity between this and the other parts of the address? Does not "that "forgiveness of sins" which St. Peter and St. Paul proclaimed with the most perfect agreement, connect itself naturally, in the thoughts of one exercised by the law as Saul of Tarsus had been, with justification not by the law but by grace? If we suppose that Saul had accepted just the faith which the older Apostles held in Jesus of Nazareth, the Messiah of the Jews, crucified and raised from the dead according to the teaching of the prophets, and in the remission of sins through Him confirmed by the gift of the Holy Ghost; and that he had *also* had those experiences, not known to the older Apostles, of which we see the working in the Epistles to the Romans and Galatians; this speech, in all its parts, is precisely what we might expect; this is the very teaching which the Apostle of the Gentiles must have everywhere and always set forth, when he was speaking "God's word" for the first time to an assembly of his fellow-countrymen.

The discourse thus epitomized produced a strong impression; and the hearers (not "the Gentiles"), requested the Apostles to repeat their message on the next sabbath. During the week so much interest was excited by the teaching of the Apostles, that on the sabbath day "almost the whole city came together, to hear the Word of God." It was this concern of the Gentiles which appears to have first alienated the minds of the Jews from what they had heard. They were filled with envy. They probably felt that there was a difference between those efforts to gain Gentile proselytes in which they had themselves been so successful, and this new preaching of a Messiah in whom a justification which the Law could not give was offered to men. The eagerness of the Gentiles to hear may have confirmed their instinctive apprehensions. The Jewish envy once roused became a power of deadly hostility to the Gospel; and these Jews at Antioch set themselves to oppose bitterly the words which Paul spoke.—We have here, therefore, a new phase in the history of the Gospel. In these foreign countries it is not the Cross or Nazareth which is most immediately repulsive to the Jews in the proclaiming of Jesus. It is the wound given to Jewish importance in the association of Gentiles with Jews as the receivers of the good tidings. If the Gentiles had been asked to become Jews, no offence would have been taken. But the proclamation of the Christ could not be thus governed and restrained. It overleapt, by its own force, these narrowing methods. It was felt to be addressed not to one nation only, but to mankind.

The new opposition brought out new action on the part of the Apostles. Repetted by the Jews, they became bold and outspoken, and turned from them to the Gentiles. They remembered and declared what the prophets had foretold of the enlightening and deliverance of the whole world. In speaking to the Gentiles, therefore, they were simply fulfilling the promise of the Covenant. The gift, we observe, of which the Jews were depriving themselves, and which the Gentiles who believed were accepting, is described as "eternal life" (*ἡ αἰώνιος ζωὴ*). It was the life of which the risen Jesus was the fountain, which Peter and John had declared at Jerusalem, and of which all acts of

healing were set forth as signs. This *new* message poured out largely upon the Gentiles. The word of the Lord was published widely, and had much fruit. Henceforth, Paul and Barnabas knew it to be their commission,—not the less to present their message to Jews first; but in the absence of an adequate Jewish medium to deal directly with the Gentiles. But this expansion of the Gospel was brought with it new difficulties and dangers. At Antioch now, as in every city afterwards, the unbelieving Jews used their influence with their own adherents amongst the Gentiles, and especially the women of the higher class, to persuade the authorities or the populace to persecute the Apostles, and to drive them from the place.

With their own spirits raised, and amidst much enthusiasm of their disciples, Paul and Barnabas now travelled on to Iconium, where the scenes at Antioch were repeated, and from thence to the Lycaonian country which contained the cities Lystra and Derbe. Here they had to deal with uneducated heathens. At Lystra the healing of a cripple took place, the narrative of which runs very parallel to the account of the similar act done by Peter and John at the gate of the Temple. The account becomes closer, if we insert here, with Luke's, before "Stand upright on thy feet," the words "I say unto thee in the name of the Lord Jesus Christ." The parallel leads us to observe more distinctly that every messenger of Jesus Christ was a herald of life. The spiritual life—the *ἡ ἀληθεία*—which was of faith, is illustrated and expounded by the invigoration of impotent limbs. The one truth was to be conveyed to the inhabitants of Jerusalem, and to the heathens of Lycaonia. The act was received naturally by these pagans. They took the Apostles for gods, calling Barnabas, who was of the more imposing presence, Zeus (*Ἰσχυρὸς*), and Paul, who was the chief speaker, Hermes (*Ἑρμῆς*). This mistake, followed up by the attempt to offer sacrifices to them, gives occasion to the meaning of an address, in which we see a type of what the Apostles would say to an ignorant pagan audience. Appeals to the Scriptures, references to the God of Abraham and Isaac and Jacob, would now have been out of place. The Apostles name the Living God, who made heaven and earth and the sea and all things therein, the God of the whole world and all the nations in it. They declare themselves to be His messengers. They expatiate upon the token of Himself which the Father of men had not withheld, in that He did them good, sending rain from heaven and fruitful seasons, the support of life and joy. They protest that in restoring the cripple they had only acted as instruments of the Living God. They themselves were not gods, but human beings of like passions with the Lycaonians. The Living God was now manifesting Himself more clearly to men, desiring that henceforth the nations should go on in their own ways, but His. They therefore call upon the people to give up the various idols and worship, and to turn to the Living God (Acts i. 9, 10). In this address, the name of Jesus does not occur. It is easy to understand that the Apostles preached Him as the Son of the Living God to whom they bore witness, telling the story of His death and resurrection, and announcing His coming again.

Although the people of Lystra had turned round to worship Paul and Barnabas, the impulse of their idolatrous instincts appears to have prevailed, and they allowed themselves to be persuaded into

by Jews who came from Antioch and Iconium that they attacked Paul with stones, and they had killed him. He recovered, however, his disciples were standing round him, and he went into the city. The next day he left Iconium, and went to Derbe, and thence they came more to Lystra, and so to Iconium, renewing their exhortations to the bidding them not to think their trials out to recognize them as the appointed through which the kingdom of Heaven, into which they were called, was to be entered. In order that the Churches after their departure, they appointed "elders" in every city. Then he came down to the coast, and from Attalia they came to Antioch in Syria, where they related the which had been granted to them, and especially the opening of the door of faith to the Gentiles, so the First Missionary Journey ended. *Antioch at Jerusalem.* (Acts xv. Gal. ii. 2.)—Upon that missionary journey follows really the next important scene which the Gospels set before us,—the council held at Jerusalem to determine the relations of Gentile believers to the Law of Moses. In following this portion of the Acts, we encounter two of the greater questions which the biographer of St. Paul has to consider:—the first is historical, What were the relations between the Apostle Paul and the Twelve? The second is critical, How is Galatians ii. to be reconciled with the narrative of the Acts? The relations of St. Paul and the Twelve will be set forth in the narrative. But we must first ask why we accept St. Paul's statements in the Galatian Epistle as additional to the history of Acts. The first impression of any reader is a supposition that the two writers might be writing of the same event. The one would at first seem to be the other to his mind. In both he reads of Paul and Barnabas going up to Jerusalem, where the Gospel was preached to the uncircumcised, and then coming back with the older Apostles to the Gentile believers. In both the visit is announced, that these believers should be free from the necessity of circumcision. Many points which the narratives have in common. On looking more closely into both, the impression upon the reader's mind may be that of a certain incompatibility between them. Many joints and members of the transaction by St. Luke, do not appear in St. Paul's account in one or two cases are substituted. The visit to Jerusalem is the 3rd mentioned in Acts, after Saul's conversion; in Galatians it is apparently mentioned as the 2nd. This sense of incompatibility to remain, we will go on to inquire whether the visit mentioned in Galatians coincides better with other mentioned in the Acts,—as the 2nd or the 4th (xviii. 22). He will, in all probability, conclude without hesitation that it does. The other view will remain, that St. Paul's visit not recorded in the Acts at all, is a perfectly legitimate hypothesis; and it is deduced by the vigorous sense of Paley. But we try to place the visit? The only possible time it is some short time before the visit of Acts, but it can scarcely be denied, that the language of Gal. xv. decidedly implies that the visit recorded was the first paid by Paul and Barnabas to Jerusalem, after their great success in the Gospel amongst the Gentiles.

We suppose the reader, therefore, to recur to his first impression. He will then have to ask himself: "Granting the considerable differences, are there after all any plain contradictions between the two narratives, taken to refer to the same occurrences?" The answer must be, "There are no plain contradictions." And this, he will perceive, is a very weighty fact. When it is recognized, the resemblances first observed will return with renewed force to the mind.

We proceed then to combine the two narratives.—Whilst Paul and Barnabas were staying at Antioch, "certain men from Judaea" came there and taught the brethren that it was necessary for the Gentile converts to be circumcised. This doctrine was vigorously opposed by the two Apostles, and it was determined that the question should be referred to the Apostles and elders at Jerusalem. Paul and Barnabas themselves, and certain others, were selected for this mission. In Gal. ii. 2, St. Paul says that he went up "by revelation" (*κατ' ἀποκάλυψιν*), so that we are to understand him as receiving a private intimation from the Divine Spirit, as well as a public commission from the Church at Antioch. On their way to Jerusalem, they announced to the brethren in Phoenicia and Samaria the conversion of the Gentiles; and the news was received with great joy. "When they were come to Jerusalem, they were received by the Church, and by the Apostles and elders, and they declared all things that God had done with them" (Acts xv. 4). St. Paul adds that he communicated his views "privately to them which were of reputation," through anxiety as to the success of his work (Gal. ii. 2). The Apostles and the Church in general, it appears, would have raised no difficulties; but certain believers who had been Pharisees thought fit to maintain the same doctrine which had caused the disturbance at Antioch. In either place, St. Paul would not give way to such teaching for a single hour (Gal. ii. 5). It became necessary, therefore, that a formal decision should be come to upon the question. The Apostles and elders came together, and there was much disputing. Arguments would be used on both sides; but when the persons of highest authority spoke, they appealed to what was stronger than arguments,—the course of facts, through which the will of God had been manifestly shown. St. Peter, reminding his hearers that he himself had been first employed to open the door of faith to Gentiles points out that God had Himself bestowed on the uncircumcised that which was the seal of the highest calling and fellowship in Christ, the gift of the Holy Ghost. "Why do you not acquiesce in this token of God's will? Why impose upon Gentile believers ordinances which we ourselves have found a heavy burden? Have not we Jews left off trusting in our law, to depend only on the grace of our Lord Jesus Christ?"—Then, carrying out the same appeal to the will of God as shown in facts, Barnabas and Paul relate to the silent multitude the wonders with which God had accompanied their preaching amongst the Gentiles. After they had done, St. James, with incomparable simplicity and wisdom, binds up the testimony of recent facts with the testimony of ancient prophecy, and gives a practical judgment upon the question.

The judgment was a decisive one. The injunction that the Gentiles should abstain from pollutions of idols and from fornication explained itself. The abstinence from things strangled and from blood is desired as a concession to the customs of

the Jews who were to be found in every city, and for whom it was still right, when they had believed in Jesus Christ, to observe the Law. St. Paul had completely gained his point. The older Apostles, James, Cephas, and John, perceiving the grace which had been given him (his effectual Apostleship), gave to him and Barnabas the right hand of fellowship. At this point it is very important to observe precisely what was the matter at stake between the contending parties (compare Prof. Jewett on "St. Paul and the Twelve," in *St. Paul's Epistles*, i. 417). St. Peter speaks of a heavy yoke; St. James of troubling the Gentile converts. But we are not to suppose that they mean merely the outward trouble of conforming to the Law of Moses. That was not what St. Paul was protesting against. The case stood thus: Circumcision and the ordinances of the Law were witnesses of a separation of the chosen race from other nations. The Jews were proud of that separation. But the Gospel of the Son of Man proclaimed that the time had come in which the separation was to be done away, and God's goodwill manifested to all nations alike. It spoke of a union with God, through trust, which gave hope of a righteousness that the Law had been powerless to produce. Therefore to insist upon Gentiles being circumcised would have been to deny the Gospel of Christ. If there was to be simply an enlarging of the separated nation by the receiving of individuals into it, then the other nations of the world remained as much on the outside of God's covenant as ever. Then there was no Gospel to mankind; no justification given to men. The loss, in such a case, would have been as much to the Jew as to the Gentile. St. Paul felt this the most strongly; but St. Peter also saw that if the Jewish believers were thrown back on the Jewish Law, and gave up the free and absolute grace of God, the Law became a mere burden, just as heavy to the Jew as it would be to the Gentile. The only hope for the Jew was in a Saviour who must be the Saviour of mankind.

It implied therefore no difference of belief when it was agreed that Paul and Barnabas should go to the heathen, while James and Cephas and John undertook to be the Apostles of the Circumcision. St. Paul, wherever he went, was to preach "to the Jew first;" St. Peter was to preach to the Jews as free a Gospel, was to teach the admission of the Gentiles without circumcision as distinctly as St. Paul himself. The unity of the Church was to be preserved unbroken; and in order to nourish this unity the Gentiles were requested to remember their poorer brethren in Palestine (Gal. ii. 10). How zealously St. Paul cherished this beautiful witness of the common brotherhood we have seen in part already (Acts xi. 29, 30), but it is yet to appear more strikingly.

The judgment of the Church was immediately recorded in a letter addressed to the Gentile brethren in Antioch and Syria and Cilicia. That this letter might carry greater authority it was entrusted to "chosen men of the Jerusalem Church, Judas surnamed Barsabbas, and Silas, chief men among the brethren." The letter speaks affectionately of Barnabas and Paul (with the elder Church Barnabas still retained the precedence, xv. 22, 25) as "men who have hazarded their lives for the name of our Lord Jesus Christ." So Judas and Silas come down with Paul and Barnabas to Antioch, and comfort the Church there with their message, and when Judas returned "it pleased Silas to abide there still."

It is usual to connect with this period of the history that rebuke of St. Peter which St. Paul records in Gal. ii. 11-14. The connection of subject makes it convenient to record the incident in this place, although it is possible that it took place before the meeting at Jerusalem, and perhaps not probable\* that it did not occur till later, when St. Paul returned from his long tour in Greece to Antioch (Acts xviii. 22, 23). St. Peter was at Antioch, and had shown no scruple about "eating with the Gentiles," until "certain came from James." These Jerusalem Christians brought the Jewish exclusiveness with them, and St. Peter, weaker and more timid in mood than he had been, and through fear of his stricter friends he too began to withdraw himself from his former free association with the Gentiles. Such an example had a dangerous weight, and Barnabas and the other Jews of Antioch were being seduced by it. It was a concession for the intrepid faithfulness of St. Paul. He did not conceal his anger at such weak deserting, and he publicly remonstrated with his elder fellow-Apostle. "If thou, being a Jew, livest after the manner of Gentiles, and not as do the Jews, why compellest thou the Gentiles to live as do the Jews?" (Gal. ii. 14). St. Peter had abandoned the Jewish exclusiveness, and deliberately claimed common ground with the Gentile; why should he be separating himself from the uncircumcised, and require the Gentiles to qualify themselves for full communion by accepting circumcision? This "standing" of St. Peter was no opposition of Petrine to Petrine views; it was a faithful rebuke of blameable moral weakness.

*Second Missionary Journey.*—The most intrepid courage, indeed, was required for the work to which St. Paul was now publicly pledged. He could not associate with himself in that work one who had already shown a want of constancy. This was the occasion of what must have been a most painful difference between him and his comrade in the past, and in past perils, Barnabas. After remaining awhile at Antioch, Paul proposed to Barnabas to revisit the brethren in the countries of their former journey. Hereupon Barnabas desired that his nephew John Mark should go with them. But John had deserted them in Pamphylia, and St. Paul would not try him again. "And the contention was so sharp between them that they departed asunder from the other; and so Barnabas took Mark, and sailed unto Cyprus; and Paul chose Silas, and departed." Silas, or Silvanus, becomes now a close companion of the Apostle. The two went together through Syria and Cilicia, visiting the churches, and so came to Derbe and Lystra. Here they met Timothy, who had become a disciple on the former visit of the Apostle, and who so strongly the esteem and love of St. Paul that "he would have him go forth with him." Him St. Paul took and circumcised. If this fact had been mentioned here and stated in another narrative, how easily irreconcilable it would have been, in the eyes of some critics, with the history in the Acts! Paul and Silas were actually delivering the Jerusalem decree to all the churches they visited. They were no doubt triumphing in the freedom secured to the Gentiles. Yet at this very time our Apostle, by the wisdom and largeness of heart to transcend

\* The presence of St. Peter, and the growth of Jewish prejudice, are more easily accounted for, if we suppose St. Paul to have left Antioch for a long time.

feelings of the Jews by circumcising Timothy. There were many Jews in those parts, who knew that Timothy's father was a Greek, his mother a Jewess. That St. Paul should have had, as a chief companion, one who was uncircumcised, would of itself have been a hindrance to him in preaching to Jews; but it would have been a still greater stumbling-block if that companion were half a Jew by birth, and had professed the Jewish faith. Therefore in this case St. Paul "became unto the Jews as a Jew that he might gain the Jews."

St. Luke now steps rapidly over a considerable space of the Apostle's life and labours. "They went throughout Phrygia and the region of Galatia" (xvi. 6). At this time St. Paul was founding "the churches of Galatia" (Gal. i. 2). He himself gives us hints of the circumstances of his preaching in that region, of the reception he met with, and of the ardent, though unstable, character of the people, in the following words: "Ye know how through infirmity of the flesh (*ὅτι δι' ἀσθενίαν τῆς σαρκός*) I preached the Gospel unto you at the first (*τὸ πρῶτον*), and my temptation which was in my flesh ye despised not nor rejected, but received me as an angel of God, even as Christ Jesus. Where is then the blessedness ye spoke of (*ὁ μακαρισμὸς ὅπου*)? For I bear you record that, if it had been possible, ye would have plucked out your own eyes, and have given them to me" (iv. 13). It is not easy to decide as to the meaning of the words *δι' ἀσθενίαν τῆς σαρκός*. Undoubtedly their grammatical sense implies that "weakness of the flesh"—an illness—was the occasion of St. Paul's preaching in Galatia; and De Wette and Alford adhere to this interpretation, understanding St. Paul to have been detained by illness, when otherwise he would have gone rapidly through the country. On the other hand, the form and order of the words are not what we should have expected if the Apostle meant to say this; and Professor Jowett prefers to assume an inaccuracy of grammar, and to understand St. Paul as saying that it was in weakness of the flesh that he preached to the Galatians. In either case St. Paul must be referring to a more than ordinary pressure of that bodily infirmity which he speaks of elsewhere as detracting from the influence of his personal address. It is hopeless to attempt to determine positively what this infirmity was. But we may observe here—(1) that St. Paul's sensitiveness may have led him to exaggerate this personal disadvantage; and (2) that, whatever it was, it allowed him to go through sufferings and hardships such as few ordinary men could bear. And it certainly did not repel the Galatians; it appears rather to have excited their sympathy and warmed their affection towards the Apostle.

St. Paul at this time had not indulged the ambition of preaching his Gospel in Europe. His views were limited to the peninsula of Asia Minor. Having gone through Phrygia and Galatia he intended to visit the western coast [Asia]; but "they were forbidden by the Holy Ghost to preach the word" there. Then, being on the borders of Mysia, they thought of going back to the north-east into Bithynia; but again "the Spirit of Jesus suffered them not." So they passed by Mysia, and came down to Troas. Here the Spirit of Jesus, having checked them on other sides, revealed to them in what direction they were to go. St. Paul

saw in a vision a man of Macedonia, who besought him, saying, "Come over into Macedonia and help us." The vision was at once accepted as a heavenly intimation; the help wanted by the Macedonians was believed to be the preaching of the Gospel. It is at this point that the historian, speaking of St. Paul's company, substitutes "we" for "they." He says nothing of himself; we can only infer that St. Luke, to whatever country he belonged, became a companion of St. Paul at Troas. It is perhaps not too arbitrary a conjecture, that the Apostle, having recently suffered in health, derived benefit from the medical skill and attendance of "the beloved physician." The party, thus reinforced, immediately set sail from Troas, touched at Samothrace, then landed on the continent at Neapolis, and from thence journeyed to Philippi. They hastened to carry the "help" that had been asked to the first considerable city in Macedonia. Philippi was no inapt representative of the western world. A Greek city, it had received a body of Roman settlers, and was politically a Colonia. We must not assume that to Saul of Tarsus, the Roman citizen, there was anything very novel or strange in the world to which he had now come. But the name of Greece must have represented very imposing ideas to the Oriental and the Jew; and we may silently imagine what it must have been to St. Paul to know that he was called to be the herald of his Master, the Crucified Jesus, in the centre of the world's highest culture, and that he was now to begin his task. He began, however, with no flourish of trumpets, but as quietly as ever, and in the old way. There were a few Jews, if not many, at Philippi; and when the Sabbath came round, the Apostolic company joined their countrymen at the place by the river-side where prayer was wont to be made. The narrative in this part is very graphic: "We sat down," says the writer (xvi. 13), "and spoke to the women who had come together." Amongst these women was a proselyte from Thyatira (*αἰβομένη τὸν Θεόν*), named Lydia, a dealer in purple. As she listened "the Lord opened her heart" to attend to what Paul was saying. The first convert in Macedonia was but an Asiatic woman who already worshipped the God of the Jews; but she was a very earnest believer, and besought the Apostle and his friends to honour her by staying in her house. They could not resist her urgency, and during their stay at Philippi they were the guests of Lydia (ver. 40).

But a proof was given before long that the preachers of Christ were come to grapple with the powers in the spiritual world to which heathenism was then doing homage. A female slave, who brought gain to her masters by her powers of prediction when she was in the possessed state, met Paul and his company, following them as they went to the place of prayer, and crying out, "These men are servants of the Most High God, who publish to you (or to us) the way of salvation." Paul was vexed by her cries, and addressing the spirit in the girl, he said, "I command thee in the name of Jesus Christ to come out of her." Comparing the confession of this "spirit of divination" with the analogous confessions made by evil spirits to our Lord, we see the same singular character of a true acknowledgment extorted as if by force, and rendered with a certain insolence which implied that the spirits, though subject, were not willingly subject. The cries of the slave-girl may have sounded like sneers, mimicking what she had heard from

<sup>1</sup> May not this mean "your calling me blessed"—speaking of as one of the *μακαροὶ* men.

the Apostles themselves, until St. Paul's exorcism. "in the name of Jesus Christ," was seen to be effectual. Then he might be recognized as in truth a servant of the Most High God, giving an example of the salvation which he brought, in the deliverance of this poor girl herself from the spirit which degraded her.

But the girl's masters saw that now the hope of their gains was gone. Here at Philippi, as afterwards at Ephesus, the local trade in religion began to suffer from the manifestation of the Spirit of Christ, and an interested appeal was made to local and national feelings against the dangerous innovations of the Jewish strangers. Paul and Silas were dragged before the magistrates, the multitude clamouring loudly against them, upon the vague charge of "troubling the city," and introducing observances which were unlawful for Romans. If the magistrates had desired to act justly they might have doubted how they ought to deal with the charge. On the one hand Paul and Silas had abstained carefully, as the preachers of Christ always did, from disturbing public order, and had as yet violated no express law of the state. But on the other hand, the preaching of Jesus as King and Lord was unquestionably revolutionary, and aggressive upon the public religion, in its effects; and the Roman law was decided, in general terms, against such innovations (see *reff. in Conyb. and Hows. i. 324*). But the prietors or *duumviri* of Philippi were very unworthy representatives of the Roman magistracy. They yielded without inquiry to the clamour of the inhabitants, caused the clothes of Paul and Silas to be torn from them, and themselves to be beaten, and then committed them to prison. The jailer, having received their commands, "thrust them into the inner prison, and made their feet fast in the stocks." This cruel wrong was to be the occasion of a signal appearance of the God of righteousness and deliverance. It was to be seen which were the true servants of such a God, the magistrates or these strangers. In the night Paul and Silas, sore and sleepless, but putting their trust in God, prayed and sang praises so loudly that the other prisoners could hear them. Then suddenly the ground beneath them was shaken, the doors were opened, and every prisoner's hands were struck off (compare the similar openings of prison-doors in *xii. 6-10*, and *v. 19*). The jailer awoke and sprang up, saw with consternation that the prison-doors were open, and, concluding that the prisoners were all fled, drew his sword to kill himself. But Paul called to him loudly, "Do thyself no harm; we are all here." The jailer's fears were then changed to an overwhelming awe. What could this be? He called for lights, sprang in and fell trembling before the feet of Paul and Silas. Bringing them out from the inner dungeon, he exclaimed, "Sirs, what must I do to be saved?" (*τί με δεῖ ποιῆν ἵνα σωθῶ*;) They answered, "Believe in the Lord Jesus Christ, and thou shalt be saved, and thy house." And they went on to speak to him and to all in his house "the word of the Lord." The kindness he now showed them reminds us of their miseries. He washed their wounds, took them into his own house, and spread a table before them. The same night he received baptism, "he and all his" (including slaves), and rejoiced in his new-found faith in God.

In the morning the magistrates, either having heard of what had happened, or having repented of their injustice, or having done all they meant to do by way of pacifying the multitude, sent word to

the prison that the men might be let go. Yet a justice was to be more clearly vindicated in the persons of these men, who had been charged with subverting public order. St. Paul denounced plainly the unlawful acts of the magistrates, informing them moreover that those whom they had beaten and imprisoned without trial were Roman citizens. "And now do they thrust us out privily? Not verily, but let them come themselves and fetch us out." The magistrates, in great alarm, saw the necessity of humbling themselves ("Fama est vinciri civem Romanum, socius vesterrim," *Com. in Verrem, v. 68*). They came and begged them to leave the city. Paul and Silas consented to do so, and, after paying a visit to "the brethren" at the house of Lydia, they departed.

The Church thus founded at Philippi, was the first-fruits of the Gospel in Europe, was called as we have seen, in the name of a spiritual deliverance, of a God of justice, and of an equal Lord of freemen and slaves. That a warm and generous feeling distinguished it from the first, we learn from a testimony of St. Paul in the Epistle written long after to this Church. "In the beginning of the Gospel," as soon as he left them, they began to send him gifts, some of which reached him at Thessalonica others afterwards (*Phil. iv. 15, 18*). Their partnership in the Gospel (*κοινωνία εἰς τὸ εὐαγγέλιον*) had gladdened the Apostle from the first day (*Phil. i. 5*).

Leaving St. Luke, and perhaps Timothy in a short time, at Philippi, Paul and Silas travelled through Amphipolis and Apollonia, and stopped again at Thessalonica. At this important city there was a synagogue of the Jews. True to his custom, St. Paul went in to them, and for three sabbath-days proclaimed Jesus to be the Christ, as he would have done in a city of Judaea. As usual, the proselytes were those who heard him most gladly, and among them were many women of station. Again, as in Pisidian Antioch, the envy of the Jews was excited. They contrived to stir up the lower class of the city to tumultuary violence by representing the preachers of Christ as revolvers many *doctores*, who had come to proclaim one Jesus as the Lord of Caesar. The mob assaulted the house of Jason, with whom Paul and Silas were staying as guests, and, not finding them, dragged Jason himself and some other brethren before the magistrates, to the cause the magistrates, we are told, and the people generally, were "troubled" by the numerous accusations which they heard. But they soon have acted wisely and justly, in taking away Jason and the rest, and letting them go, after these signs of danger the brethren immediately sent away Paul and Silas by night.

The Epistles to the Thessalonians were written very soon after the Apostle's visit, and contain particulars of his work in founding that Church than we find in any other Epistle. The words of these letters ought to be read by the churches they thus supply. St. Paul speaks to the Thessalonian Christians as being mostly Gentiles. He reminds them that they had turned from all to serve the living and true God, and to wait for the Son from heaven, whom he would bring to glory. "Jesus who delivers us from the coming wrath," (*1 Thess. i. 9, 10*). The Apostle had evidently said much of the coming and punishment of the Lord Jesus Christ, and of that wrath which was about to descend upon the Jews (*5. 10, 11, 12*). His message had had a wonderful success among them.

we they had known it to be really the word of God who also wrought in them, having had towards this conviction in the zeal and disinterestedness and affection with which St. Paul withstanding his recent shameful treatment at ppi) proclaimed his Gospel amongst them (ii. 13). He had purposely wrought with his own, even night and day, that his disinterestedness to be more apparent (1 Thess. ii. 9; 2 Thess. iii. 1). He exhorted them not to be drawn away from industry by the hopes of the kingdom into which they were called, but to work quietly, and to rate purity and brotherly love (1 Thess. iv. 3, 5). Connecting these allusions with the preaching in the synagogue (Acts xvii. 3), we see clearly the teaching of St. Paul turned upon the person Jesus Christ as the Son of the Living God, proved of in the Scriptures, suffering and dying, set up and exalted to a kingdom, and about to be as the Giver of light and life, to the destruction of his enemies and the saving of those who believed in him.

When Paul and Silas left Thessalonica they came to Berea. Here they found the Jews more noble (γενέτεροι)—more disposed to receive the news rejected and crucified Messiah, and to examine scriptures with candour—than those at Thessalonica had been. Accordingly they gained many converts, both Jews and Greeks; but the Jews of Thessalonica, hearing of it, sent emissaries to stir up the people, and it was thought best that St. Paul should himself leave the city, whilst Silas and Timothy remained behind. Some of "the brethren" went with St. Paul as far as Athens, where they left him, carrying back a request to Silas and Timothy that they would speedily join him. He evidently did not like to preach alone, and indeed to rest from his apostolic labour until they came up to him: but how could he refrain himself, with all that was going on at Athens? There he witnessed the most profuse display of vanity and the most pretentious sophistry. Either of these would have been enough to stimulate his spirit. To idolaters and sophists he felt equally urged to proclaim his message and the Living God. So he went to his countrymen and the proselytes in the synagogue declared to them that the Messiah had come; he also spoke, like another Socrates, with people in the market, and with the followers of the two schools of philosophy, Epicureans and Stoics, going to all Jesus and the Resurrection. The sophists encountered him with a mixture of flattery and contempt. The Epicureans, teaching men to seek for tranquil enjoyment as the chief end of life, heard of One claiming to be the Lord of the universe, who had shown them the glory of dying and had promised to those who fought the fight bravely a nobler bliss than the comforts which the world could yield. The Stoic, cultivating a stern isolated moral independence, heard of One whose righteousness was proved by submission to death.

Father in heaven, and who had promised to reward righteousness to those who trusted not in themselves, but in Him. To all, the announcement of a new religion was much stranger than the publishing of theories which would have been. So far as they were at the preacher anything but a silly triller, they were not to them, not a philosopher, but "a setter forth of strange words": *ἐπεὶ οὐκ ἔγνωσαν καταγγέλλειν*.

But any one with a novelty was welcome to them who spent their time in nothing else but

either to hear or to tell some new thing." They brought him therefore to the Areopagus, that he might make a formal exposition of his doctrine to an assembled audience.

We are not to think here of the Council or Court, renowned in the oldest Athenian history, which took its name from Mars's Hill, but only of the elevated spot where the council met, not covered in, but arranged with benches and steps of stone, so as to form a convenient place for a public address. Here the Apostle delivered that wonderful discourse, reported in Acts xvii. 22-31, which seems as fresh and instructive for the intellect of the 19th century as it was for the intellect of the first. In this we have the Pauline Gospel as it addressed itself to the speculative mind of the cultivated Greeks. How the "report" was obtained by the writer of the history we have no means of knowing. Possibly we have in it notes written down before or after the delivery of this address by St. Paul himself. Short as it is, the form is as perfect as the matter is rich. The loftiness and breadth of the theology, the dignity and delicacy of the argument, the absence of self, the straightforward and reverent nature of the testimony delivered—all the characteristics so strikingly displayed in this speech—help us to understand what kind of a teacher had now appeared in the Grecian world. St. Paul, it is well understood, did not begin with calling the Athenians "too superstitious." "I perceive you," he said, "to be eminently religious." He had observed an altar inscribed *Ἀγνώστῳ Θεῷ*, "To the unknown God." It meant, no doubt, "To some unknown God." "I come," he said, "as the messenger of that unknown God." And then he proceeds to speak of God in terms which were not altogether new to Grecian ears. They had heard of a God who had made the world and all things therein, and even of One who gave to all life, and breath, and all things. But they had never learnt the next lesson which was now taught them. It was a special truth of the new dispensation, that "God had made of one blood all nations of men, for to dwell on all the face of the earth, having determined the times assigned to them, and the bounds of their habitation, that they should seek the Lord, if haply they might feel after him and find him."

Comparing it with the teaching given to other audiences, we perceive that it laid hold of the deepest convictions which had ever been given to Greeks, whilst at the same time it encountered the strongest prejudices of Greeks. We see, as at Lystra, that an Apostle of Christ had no need to refer to the Jewish Scriptures, when he spoke to those who had not received them. He could speak to men as God's children, and subjects of God's educating discipline, and was only bringing them further tidings of Him whom they had been always feeling after. He presented to them the Son of Man as acting in the power of Him who had made all nations, and who was not far from any single man. He began to speak of Him as risen from the dead, and of the power of a new life which was in Him for men; but his audience would not hear of Him who thus claimed their personal allegiance. Some mocked, others, more courteously, talked of hearing him again another time. The Apostle gained but few converts at Athens, and he soon took his departure and came to Corinth.

\* See, in confirmation, passages quoted from ancient authors in Conybeare and Howson, i. 389 &c.

Athens still retained its old intellectual predominance; but Corinth was the political and commercial capital of Greece. It was in places of living activity that St. Paul laboured longest and most successfully, as formerly at Antioch, now at Corinth, and afterwards at Ephesus. The rapid spread of the Gospel was obviously promoted by the preaching of it in cities where men were continually coming and going; but besides this consideration, we may be sure that the Apostle escaped gladly from dull ignorance on the one side, and from philosophical dilettantism on the other, to places in which the real business of the world was being done. The Gospel, though unworldly, was yet a message to practical and inquiring men, and it had more affinity to *work* of any kind than to torpor or to intellectual frivolity. One proof of the wholesome agreement between the following of Christ and ordinary labour was given by St. Paul himself during his stay at Corinth. Here, as at Thessalonica, he chose to earn his own subsistence by working at his trade of tent-making. This trade brought him into close connexion with two persons who became distinguished as believers in Christ, Aquila and Priscilla. They were Jews, and had lately left Rome, in consequence of an edict of Claudius [see CLAUDIUS]; and as they also were tent-makers, St. Paul "abode with them and wrought." Labouring thus on the six days, the Apostle went to the synagogue on the Sabbath, and there by expounding the Scriptures sought to win both Jews and proselytes to the belief that Jesus was the Christ.

He was testifying with unusual effort and anxiety (*συνελύξας τὸν λόγον*), when Silas and Timothy came from Macedonia, and joined him. We are left in some uncertainty as to what the movements of Silas and Timothy had been, since they were with Paul at Berea. From the statements in the Acts (xvii. 15, 18) that Paul, when he reached Athens, desired Silas and Timotheus to come to him *with all speed, and waited for them* there, compared with those in 1 Thess. (iii. 1, 2), "When we could no longer forbear, we thought it good to be left at Athens alone, and sent Timotheus, our brother, and minister of God, and our fellow-labourer in the Gospel of Christ, to establish you and to comfort you concerning your faith,"—Paley (*Horae Paulinae*, 1 Thess. No. iv.) reasonably argues that Silas and Timothy had come to Athens, but had soon been despatched thence, Timothy to Thessalonica, and Silas to Philippi, or elsewhere. From Macedonia they came together, or about the same time, to Corinth; and their arrival was the occasion of the writing of the First Epistle to the Thessalonians.

This is the first extant example of that work by which the Apostle Paul has served the Church of all ages in as eminent a degree as he laboured at the founding of it in his lifetime. All commentators upon the New Testament have been accustomed to notice the points of coincidence between the history in the Acts, and these Letters. Paley's *Horae Paulinae* is famous as a special work upon this subject. But more recently, important attempts have been made to estimate the Epistles of St. Paul more broadly, by considering them in their mutual

order and relations, and in their bearing upon the question of the development of the writer's teaching. Such attempts must lead to a better understanding of the Epistles themselves, and to a fair appreciation of the Apostle's nature and work. It is notorious that the order of the Epistles in the book of the N. T. is not their real, or chronological order. The mere placing of them in their true sequence throws considerable light upon the history; and happily the time of composition of the more important Epistles can be stated with sufficient certainty. The two Epistles to the Thessalonians belong,—and these alone,—to the present Missionary Journey. The Epistles to the Galatians, Romans, and Corinthians, were written during the next journey. Those to Philippians, the Colossians, the Ephesians, and the Philippians, belong to the captivity at Rome. With regard to the Pastoral Epistles, there are considerable difficulties, which require to be discussed separately.

Two general remarks relating to St. Paul's Letters may find a place here. (1.) There is no reason to assume that the extant Letters are all that the Apostle wrote. On the contrary, there is a strong presumption, and some slight positive evidence, that he wrote many which have not been preserved (Jowett, i. p. 195-201, 2nd ed.). (2.) We must be on our guard against concluding too much from the contents and style of any Epistle, as to the fixed bent of the Apostle's whole mind at the time when it was written. We must remember that the Epistles to the Thessalonians were written while St. Paul was deeply absorbed in the peculiar circumstances of the Corinthian Church; and that the Epistles to the Corinthians were written between those to the Galatians and the Romans. These facts are sufficient to remind us of the *variability* of the Apostle's mind;—to show us how thoroughly his feelings and ideas suggested to him by the circumstances upon which he was dwelling had the power to mould his utterances.

The First Epistle to the Thessalonians was probably written soon after his arrival at Caesarea, and before he turned from the Jews to the Gentiles. It was drawn from St. Paul by the arrival of Silas and Timothy. [THESSALONIANS, FIRST EPISTLE TO THE.] The largest portion of it consists of a impassioned recalling of the facts and feelings of the time when the Apostle was personally with them. But we perceive gradually that those expectations which he had taught them to entertain of the appearing and presence of the Lord Jesus Christ had undergone some corruption. There were symptoms in the Thessalonian church of a *restlessness*, which speculated on the times and seasons of the event, and found present duties flat and unimportant. The evil tendency St. Paul seeks to correct, by reviving the first spirit of faith and hope and mutual fellowship, and by setting forth the appearing of Jesus Christ—not indeed as distant, but as the full doing of a day of which all believers in Christ were *ready children*. The ethical characteristics appear in this letter, the degree in which St. Paul identified himself with his friends, the entire surrender of his existence to his calling as a preacher of Christ, his anxiety for the good name and well-being of his converts, are the same which will reappear continually.

\* Ewald believes, rather capriciously, that the Second Ep. to the Thess. was written first, and was sent from Berea (*Die Sendschreiben des Apostels Paulus*, pp. 17, 18).

\* Amongst these, the works of Prof. Jowett (*Epistles to*

*the Thess., Gal., and Rom.*), of Ewald (*Die Sendschreiben* &c.), and of Dr. Wordsworth (*Epistles of St. Paul*) may be named.

What interval of time separated the Second Letter to the Thessalonians from the First, we have no means of judging, except that the later one was certainly written before St. Paul's departure from Corinth.

**THESSALONIANS, SECOND EPISTLE TO THE.]** The Thessalonians had been disturbed by announcements that those convulsions of the world which all Christians were taught to associate with the coming of Christ were immediately impending. To meet these assertions, St. Paul delivers express predictions in a manner not usual with him elsewhere; and whilst re-affirming all he had ever taught the Thessalonians to believe respecting the early coming of the Saviour and the blessedness of waiting patiently for it, he informs them that certain events, of which he had spoken to them, must run their course before the full manifestation of Jesus Christ could come to pass. At the end of this epistle St. Paul guards the Thessalonians against pretended letters from him, by telling them that every genuine letter, even if not written by his hand throughout, would have at least an autograph salutation at the close of it.

We return now to the Apostle's preaching at Corinth. When Silas and Timotheus came, he was testifying to the Jews with great earnestness, but with little success. So "when they opposed themselves and blasphemed, he shook out his raiment," and said to them, in words of warning taken from their own prophets (Ezek. xxiii. 4): "Your blood be upon your own heads; I am clean, and henceforth will go to the Gentiles." The experience of Pisidian Antioch was repeating itself. The Apostle went, as he threatened, to the Gentiles, and began to preach in the house of a proselyte named Justus. Already one distinguished Jew had become a believer, Crispus, the ruler of the synagogue, mentioned (1 Cor. i. 14; as baptized by the Apostle himself: and many of the Gentile inhabitants were receiving the Gospel and being baptized. The envy and rage of the Jews, therefore, were excited in an unusual degree, and seem to have pressed upon the spirit of St. Paul. He was therefore encouraged to a vision of the Lord, who appeared to him by night, and said, "Be not afraid, but speak, and thy peace for I am with thee, and no man shall set on thee, to hurt thee; for I have people in this city." Corinth was to be an seat of the Church of Christ, distinguished not only by the number of believers, but by the variety and the fruitfulness of the teaching given there. At this time St. Paul stayed there for a year and six months, the word of God amongst them.

Corinth was the chief city of the province of Achaia, and the residence of the proconsul. During his stay, we find the proconsular office held by a brother of the philosopher Seneca. Before him the Apostle was summoned to answer his enemies, who hoped to bring the authority to bear upon him as an innovator. But Gallio perceived at once, before "open his mouth" to defend himself, that no movement was due to Jewish prejudice, but to go into the question. "If it be a matter of words and names and of your law," he said, "I will not judge of such matters." Then a singular scene presented itself. The Corinthian spectators, either favouring St. Paul, or actuated only by anger against the Jews, seized on the principal person of those who had brought the charge, and beat him before the

judgment-seat. (See on the other hand Ewald, *Geschichte*, vi. 463-466.) Gallio left these religious quarrels to settle themselves. The Apostle therefore was not allowed to be "hurt," and remained some time longer at Corinth unmolested.

We do not gather from the subsequent Epistles to the Corinthians many details of the founding of the Church at Corinth. The main body of the believers consisted of Gentiles,—("Ye know that ye were Gentiles," 1 Cor. xii. 2). But, partly from the number who had been proselytes, partly from the mixture of Jews, it had so far a Jewish character, that St. Paul could speak of "our fathers" as having been under the cloud (1 Cor. x. 1). The tendency to intellectual display, and the traffic of sophists in philosophical theories, which prevailed at Corinth, made the Apostle more than usually anxious to be independent in his life and simple in bearing his witness. He wrought for his living that he might not appear to be taking fees of his pupils (1 Cor. ix. 18; and he put the Person of Jesus Christ, crucified and risen, in the place of all doctrines (1 Cor. ii. 1-5, xv. 3, 4). What gave infinite significance to his simple statements, was the nature of the Christ who had been crucified, and His relation to men. Concerning these mysteries St. Paul had uttered a wisdom, not of the world, but of God, which had commended itself chiefly to the humble and simple. Of these God had chosen and called not a few "into the fellowship of His Son Jesus Christ the Lord of men" (1 Cor. ii. 6, 7, i. 27, 9).

Having been the instrument of accomplishing this work, St. Paul took his departure for Jerusalem, wishing to attend a festival there. Before leaving Greece, he cut off his hair at Conchrene, in fulfilment of a vow. We are not told where or why he had made the vow; and there is considerable difficulty in reconciling this act with the received customs of the Jews. [Vows.] A passage in Josephus, if rightly understood (*B. J.* ii. 15, §1), mentions a vow which included, besides a sacrifice, the cutting of the hair and the beginning of an abstinence from wine 30 days before the sacrifice. If St. Paul's was such a vow, he was going to offer up a sacrifice in the Temple at Jerusalem, and the "shearing of his head" was a preliminary to the sacrifice. The principle of the vow, whatever it was, must have been the same as that of the Nazarite vow, which St. Paul afterwards countenanced at Jerusalem. [NAZARITE, p. 472.] There is therefore no difficulty in supposing him to have followed in this instance, for some reason not explained to us, a custom of his countrymen.—When he sailed from the Isthmus, Aquila and Priscilla went with him as far as Ephesus. Paul paid a visit to the synagogue at Ephesus, but would not stay. He was anxious to be at Jerusalem for the approaching feast, but he promised, God willing, to return to them again. Leaving Ephesus, he sailed to Caesarea, and from thence went up to Jerusalem, and "saluted the Church." It is argued (Wieseler, pp. 48-50), from considerations founded on the suspension of navigation during the winter months, that the festival was probably the Pentecost. From Jerusalem, almost immediately, the Apostle went down to Antioch, thus returning to the same place from which he had started with Silas.

*Third Missionary Journey, including the stay at*

\* Acts xviii. 18. The act may be that of Aquila, but the historian certainly seems to be speaking not of him but of St. Paul.

*Ephesus* (Act. xviii. 23-xxi. 17).—Without inventing facts or discussions for which we have no authority, we may connect with this short visit of St. Paul to Jerusalem a very serious raising of the whole question, What was to be the relation of the new kingdom of Christ to the law and covenant of the Jews? Such a Church as that at Corinth, with its affiliated communities, composed chiefly of Gentile members, appeared likely to overshadow by its importance the Mother Church in Judaea. The jealousy of the more Judaical believers, not extinguished by the decision of the council at Jerusalem, began now to show itself everywhere in the form of an active and intriguing party-spirit. This disastrous movement could not indeed alienate the heart of St. Paul from the law or the calling or the people of his fathers—his antagonism is never directed against these; but it drew him into the great conflict of the next period of his life, and must have been a sore trial to the intense loyalty of his nature. To vindicate the *freedom*, as regarded the Jewish law, of believers in Christ; but to do this, for the very sake of maintaining the *unity of the Church*;—was to be the earnest labour of the Apostle for some years. In thus labouring he was carrying out completely the principles laid down by the elder Apostles at Jerusalem; and may we not believe that, in deep sorrow at appearing, even, to disparage the law and the covenant, he was the more anxious to prove his fellowship in spirit with the Church in Judaea, by "remembering the poor," as "James, Cephas, and John" had desired that he would? (Gal. ii. 10.) The prominence given, during the journeys upon which we are now entering, to the collection to be made amongst his Churches for the benefit of the poor at Jerusalem, seems to indicate such an anxiety. The great Epistles which belong to this period, those to the Galatians, Corinthians, and Romans, show how the "Judaizing" question exercised at this time the Apostle's mind.

St. Paul "spent some time" at Antioch, and during this stay, as we are inclined to believe, his collision with St. Peter (Gal. ii. 11-14), of which we have spoken above, took place. When he left Antioch, he "went over all the country of Galatia and Phrygia in order, strengthening all the disciples," and giving orders concerning the collection for the saints (1 Cor. xvi. 1). It is probable that the *Epistle to the Galatians* was written soon after this visit. [GALATIANS, EPISTLE TO THE.] When he was with them he had found the Christian communities infested by Judaizing teachers. He had "told them the truth" (Gal. iv. 16), he had warned them against the deadly tendencies of Jewish exclusiveness, and had re-affirmed the simple Gospel, concerning Jesus Christ the Son of God, which he had preached to them on his first visit (τὸ πρῶτον, Gal. iv. 13). But after he left them the Judaizing doctrine raised its head again. The only course left to its advocates was to assail openly the authority of St. Paul; and this they did. They represented him as having derived his commission from the older Apostles, and as therefore acting unlawfully if he opposed the views ascribed to Peter and James. The fickle minds of the Galatian Christians were influenced by these hardy assertions; and the Apostle heard, when he had come down to Ephesus, that his work in Galatia was being undone, and his converts were being seduced from the true faith in Christ. He therefore writes the *Epistle to reconstitute with them*—an *Epistle* full of indignation, of warning, of direct and impassioned teaching. He

recalls to their minds the Gospel he preached amongst them, and asserts in awful language its absolute truth. He declares that he had received it from *Jesus Christ the Lord*, and that his power was like the other Apostles had always been from Him, but of an independent fellow-sets before them Jesus the Crucified God, as the fulfilment of the promise to the fathers, and as the pledge and guarantee. He declares that in Him, and of the Spirit of sonship sent down upon them have inherited the rights of adoption, that the condition represented by the inferior and preparatory stage of the law, most earnestly and tenderly, in the Galatians the responsibilities of faith with Christ the Crucified, urging the fullness in all the graces of their spirituality especially to brotherly consideration.

This Letter was, in all probability, written at Ephesus. This was the goal of the Apostle's journeys through Asia Minor. He came down from the upper districts (τὰ ὄρη) of Phrygia. What *Antioch* was for Syria and Cilicia, what *Corinth* was for what *Rome* was,—we may add,—for the West, that *Ephesus* was for the Empire called Asia. Indeed, with reference to the Church Catholic, *Ephesus* occupies a position of all. This was the meeting-point of Greek, of Roman, and of Oriental. The Apostle of the Gentiles was to stay here, that he might found a strong Church should be a kind of mother-church to communities in the neighbouring cities.

A new element in the preparation of the kingdom of Christ presents itself in the beginning of the Apostle's work at Ephesus. There certain disciples (τῶν μαθητῶν) twelve in number—of whom he said, "Did ye receive the Holy Ghost when ye were baptized? No, we did not even hear of being a Holy Ghost. Unto what then were ye baptized? And they said, Unto baptism. Then said Paul, John baptized with baptism of repentance, saying to the people they should believe on him who was coming after him, that is, on Jesus. Hearing this, they were baptized in the name of the Lord Jesus when Paul had laid his hands upon them, and the Holy Ghost came upon them, and they began to speak with tongues and to prophesy" (Act. xix. 1-6). It is obvious to compare this incident with the Apostolic act of Peter and John at Jerusalem. We see in it an assertion of the full Apostolic authority of Paul. But besides this bearing of it, there are indications which suggest more than they express, as to the spiritual movement of the time. These twelve disciples are mentioned after Apollonius, who also had been at Ephesus before St. Paul's arrival, and who had taught gently concerning Jesus (τὸ εὐαγγέλιον). Knowing only the baptism of John. But he was of Alexandria, trained in the intense and quiring study of the Hebrew Scriptures, often fostered by the Greek culture of that city. We are led to suppose therefore that a knowledge of the baptism of John and of the movement had spread widely, and had been received by some of those who were to be converted to Christianity, before the message came.

and the descent of the Holy Ghost revealed. What the exact belief of Apollonius "disciples" was concerning the work of Jesus, we have no means of ascertaining, but it was wanting in a full lordship of Jesus and of the Holy Ghost. The Pentecostal faith was brought to Apollonius by Aquila and Priscilla, disciples of the Baptist by St. Paul. He now entered upon his usual work in the synagogue, and for three months, disputing and persuading concerning the Kingdom of God." At the end of this ministry and opposition of some of the Jews to give up frequenting the synagogue, he dismissed the believers as a separate congregation "in the school of Tyrannus." He did (though we may probably allow of a temporary absence of St. Paul) for two or three times many things occurred, of which the Acts chooses two extraordinary triumphs over magical arts, and the miracle raised by the silversmiths who worshipped Artemis; and amongst which we may insert the writing of the First Epistle to the Romans. "I saw special miracles," we are told (*ὅρα τὰς τυχούσας*), "by the hands of which it is evident that the arts of sorcery and those arts which betoken the belief in a spirit, but not of a Holy Spirit—were here in great luxuriance. Every history of the Old or New Testament attests the thought that the exhibitions of magic took a more startling form where grounded mainly on the reverence for powers were prevalent; that they were the work of a beneficent and orderly power which had been manifested to counteract the work of one that was irregular and malevolent. *Unity of the New Testament*, the powers of the new kingdom took a form early resembling the wonders of the darkness than was usually adopted, the robes and aprons from the body of the shadow of Peter, v. 15) were allowed for the healing of the sick and the casting out of devils. But it was to be clearly seen that this was done by the healing power of the Holy Spirit. Certain Jews, and among them sons of one Sceva (not unlike Simon Magus), fancied that the effect was due to a formula, an *ἐντολή*. They therefore exorcised, by saying, "We adjure you by the name of the Lord Jesus whom Paul preacheth." But the evil spirit gave voice to it, cried out, "Jesus Paul I know, but who are ye?" And the possessed fell furiously upon the ground. The result of this was that fear fell upon all the inhabitants of the city and the name of the Lord Jesus was And the impression produced bore its fruits. The city was well known for its *γυμνασία*, forms of incantation, sold at a high price. Many of those books brought them together and before all men, and when the cost of the incantation was found to be 50,000 *δραχμαί*. "So mightily grew the word of the Lord and prevailed."

Paul was at Ephesus his community in the Church in Achaia were not alto-

gether suspended. There is strong reason to believe that a personal visit to Corinth was made by him, and a letter sent, neither of which is mentioned in the Acts. The visit is inferred from several allusions in the 2nd Epistle to the Corinthians. "Behold, the third time I am ready to come to you" (2 Cor. xii. 14). "This is the third time I am coming to you" (2 Cor. xiii. 1). The visit he is contemplating is plainly that mentioned in Acts xx. 2, which took place when he finally left Ephesus. If that was the *third*, he must have paid a *second* during the time of his residence at Ephesus. It seems far-fetched, with Paley (*Horae Paulinae*, 2 Cor. No. xi.), to conclude that St. Paul is only affirming a *third intention*, and that the *second intention* had not been carried out. The context, in both cases, seems to refer plainly to *visits*, and not to *intentions*. Again, "I determined this with myself, that I would not come *again* to you in *heaviness*" (*πάλιν ἐν λύπῃ*): 2 Cor. ii. 1. Here St. Paul is apparently speaking of a previous visit which he had paid in sorrow of heart. He expresses an apprehension (2 Cor. xii. 21) lest "again when I come, my God should humble me among you" (*μή πάλιν ἐλθόντος μου ταπεινώσει με*—the *πάλιν* appearing certainly to refer to *ταπεινώσει* as much as to *ἐλθόντος*). The words in 2 Cor. xiii. 2, *προεῖρηκα καὶ προῦλγω, ὡς παρὼν τὸ δεύτερον καὶ ἀπὼν νῦν*, may be translated, either "as if present the second time," or "as when present the second time." In the latter case we have here a distinct confirmation of the supposed visit. The former rendering seems at first sight to exclude it: but if we remember that the thought of his special *admonition* is occupying the Apostle's mind, we should naturally understand it, "I forewarn you now in my absence, as if I were present a second time to do it in person;" so that he would be speaking of the supposed visit as a *first*, with reference to the purpose which he has in his mind. The *prima facie* sense of these passages implies a short visit, which we should place in the first half of the stay at Ephesus. And there are no strong reasons why we should not accept that *prima facie* sense. St. Paul, we may imagine, heard of disorders which prevailed in the Corinthian Church. Apollonius had returned to Ephesus some time before the 1st Epistle was written (1 Cor. xvi. 12), and it may have been from him that St. Paul learnt the tidings which distressed him. He was moved to go himself to see them. He stayed but a short time, but warned them solemnly against the licentiousness which he perceived to be creeping in amongst them. If he went directly by sea to Corinth and back, this journey would not occupy much time. It was very natural, again, that this visit should be followed up by a letter. Either the Apostle's own reflections after his return, or some subsequent tidings which reached him, drew from him, it appears, a written communication in which he gave them some practical advice. "I wrote unto you in the Epistle not to keep company with fornicators" (*ἐγράψα ὑμῖν ἐν τῇ ἐπιστολῇ*: 1 Cor. v. 9). Then at some point not defined in the course of the stay at Ephesus, St. Paul announced to his friends a plan of going through Macedonia and Achaia, and afterwards visiting Jerusalem; adding, "After I have been there, I must also see Rome." But he put off for a while his own departure, and sent before him Timothy and Erastus to the churches in Macedonia and Achaia, "to bring them into remembrance of his ways, which were in Christ" (1 Cor. iv. 17).

Whether the 1st Epistle to the Corinthians was written before or after the tumult excited by Demetrius cannot be positively asserted. He makes an allusion, in that Epistle, to a "battle with wild beasts" fought at Ephesus (*ἰθρυσιμάχουσα ἐν Ἐφέσῳ*; 1 Cor. xv. 32), which it is usual to understand figuratively, and which is by many connected with that tumult. But this connexion is arbitrary, and without much reason.<sup>2</sup> And as it would seem from Acts xx. 1 that St. Paul departed immediately after the tumult, it is probable that the Epistle was written before, though not long before, the rising of this disturbance. Here then, while the Apostle is so earnestly occupied with the teaching of believers and inquirers at Ephesus and from the neighbouring parts of "Asia," we find him throwing all his heart and soul into the concerns of the Church at Corinth. [CORINTHIANS, FIRST EPISTLE TO THE.]

There were two external inducements for writing this Epistle. (1.) St. Paul had received information from members of Chloe's household (*ἐκκλησία τοῦ Κλωῆς*, i. 11) concerning the state of the Church at Corinth. (2.) That Church had written him a letter, of which the bearers were Stephanus and Fortunatus and Achaicus, to ask his judgment upon various points which were submitted to him (vii. 1, xvi. 17). He had learnt that there were divisions in the Church; that parties had been formed which took the names of Paul, of Apollos, of Cephas, and of Christ (i. 11, 12); and also that moral and social irregularities had begun to prevail, of which the most conspicuous and scandalous example was that a believer had taken his father's wife, without being publicly condemned by the Church (v. 1, vi. 7, xi. 17-22, xiv. 33-40). To these evils we must add one doctrinal error, of those who said "that there was no resurrection of the dead" (xv. 12). It is probable that the teaching of Apollos the Alexandrian, which had been characteristic and highly successful (Acts xviii. 27, 28), had been the first occasion of the "divisions" in the Church. We may take it for granted that his adherents did not form themselves into a party until he had left Corinth, and therefore that he had been some time with St. Paul at Ephesus. But after he was gone, the special *Alexandrian* features of his teaching were remembered by those who had delighted to hear him. Their Grecian intellect was captivated by his broader and more spiritual interpretation of the Jewish Scriptures. The connexion which he taught them to perceive between the revelation made to Hebrew rulers and prophets and the wisdom by which other nations, and especially their own, had been enlightened, dwelt in their minds. That which especially occupied the Apostles' school must have been a *philosophy of the Scriptures*. It was the tendency of this party which seemed to the Apostle particularly dangerous amongst the Greeks. He hardly seems to refer specially in his letter to the other parties, but we can scarcely doubt that in what he says about "the wisdom which the Greeks sought" (i. 22), he is referring not only to the general tendency of the Greek mind, but to that tendency as it had been caught and influenced by the teaching of Apollos, it gives him an occasion of delivering his most characteristic testimony. He recognizes wisdom, but it is the wisdom of God; and that wisdom was not

only a *Σοφία* in a λόγος through which God always spoke to all men; it had been *positively* manifested in Jesus the Crucified. Christ crucified was both the Power of God and the Wisdom of God. To receive Him required a spiritual discernment, unlike the wisdom of the great men of the world; a discernment given by the Holy Spirit of God, and manifesting itself in sympathy with humanity, and in love.

For a detailed description of the Epistle the reader is referred to the special articles upon each. But it belongs to the history of St. Paul to survey the personal characteristics which appear in them. We must not omit to observe therefore, in this Epistle, how loyally the Apostle represents Jesus Christ the Crucified as the Lord of men, the Head of the body with many members, the Centre of Unity, the Bond of men to the Father. We should mark at the same time how invariably he connects the Power of the Spirit with the Name of the Lord Jesus. He meets all the evils of the Corinthian Church, the intellectual pride, the party spirit, the loose morality, the disregard of decency and order, the false belief about the Resurrection, by calling their thoughts to the Person of Christ and to the Spirit of God as the Breath of a common life to the whole body.

We observe also here, more than elsewhere, the tact, universally recognized and admired, with which the Apostle discusses the practical problems brought before him. The various questions relating to marriage (ch. vii.), the difficulty about meat offered to idols (ch. viii., x.), the behaviour proper for women (ch. xi., xiv.), the use of the gifts of prophesying and speaking with tongues (ch. xiv.) are made examples of a treatment which may be applied to all such questions. We see then of discussed with reference to first principles, the object, in every practical conclusion, being to point out and assert some permanent principle. We see St. Paul no less a lover of order and subordination than of freedom. We see him claiming for himself, and prescribing to others, great variety of action in varying circumstances, but under the strict obligation of being always true to Christ, and always seeking the highest good of men. Such a character so steadfast in motive and aim, so versatile in action, it would be difficult indeed to find elsewhere in history.

What St. Paul here tells us of his own *deeds* and movements refers chiefly to the nature of his preaching at Corinth (i. 12); to the hardships and dangers of the apostolic life (iv. 9-13); to the established custom of working for his own living (ii. 13); to the direct revelations he had received (ii. 13, xv. 8); and to his present plans (xvi.). He tells the Corinthians to raise a collection for the Church at Jerusalem by laying by something on the first day of the week, as he had directed the churches in Galatia to do. He says that he shall visit Ephesus till Pentecost, and then set out on a journey towards Corinth through Macedonia, so as perhaps to spend the winter with them. He expresses his joy at the coming of Stephanus and his companions, and commends them to the respect of the Church.

Having despatched this Epistle he stayed at Ephesus, where "a great door and official way opened to him, and there were many adversaries."

<sup>2</sup> The manner of the allusion, *ἐκκλησία τοῦ Κλωῆς ἐν Ἐφέσῳ*, may imply as Ewald (*Stenochronicon*, 214) sug-

gests, that he had mentioned this conflict in the letter alluded to in the previous non-existent letter.

airs of the Church of Corinth continued to object of the gravest anxiety to him, and to his occupation at Ephesus: but it may be convenient to put off the further notice of till we come to the time when the 2nd Epistle was written. We have now no information of the work of St. Paul at Ephesus, until that it occurred which is described in Acts xix.

The whole narrative may be read there. We learn that "this Paul" had been so successful, especially in Ephesus, but "almost throughout all" in turning people from the worship of gods with hands, that the craft of silversmiths, made little shrines for Artemis, were alarmed at his manufacture. They raised a great tumult, not being able, apparently, to find Paul, laid on two of his companions and dragged them to the theatre. Paul himself, not willing that crowds should suffer in his place, wished to go on to the people: but the disciples, supported by an urgent request of certain magistrates called Demetrius, dissuaded him from his purpose. The nature of the proceedings of the mob is highly interesting, and the address with which the town-clerk quieted the people is worthy of a discreet, experienced magistrate. His statement that these men are neither robbers of churches, nor blasphemers of your goddess, is an incidental allusion to the temperance of the Apostle and his boldness in their attacks on the popular idolatry. St. Paul is only personally concerned in this, in so far as it proves the deep impression of his teaching had made at Ephesus, and the danger in which he lived.

He had been anxious to depart from Ephesus, but this interruption of the work which had kept there determined him to stay no longer. He went therefore for Macedonia, and proceeded first to Asia (2 Cor. ii. 12), where he might have had the Gospel with good hope of success, but a restless anxiety to obtain tidings concerning the Church at Corinth urged him on, and he sailed into Macedonia, where he met Titus, who brought him the news for which he was thirsting. The receipt of this intelligence drew from him a letter which reveals to us what manner of man St. Paul was when the fountains of his heart were stirred to their inmost depths. [CORINTHIANS, SECOND EPISTLE TO THE.] How the agitation which excited itself in every sentence of this Letter was felt, is one of the most interesting questions we can consider. Every reader may perceive that, passing from the First Epistle to the Second, the tone is almost entirely changed. In the First, the difficulties of the Corinthian Church are stated. The Apostle writes of these, with spirit and emotion, as he always does, but without any disturbance. He calmly asserts his own authority over the Church, and threatens to deal severely with offenders. In the Second, he writes of whose personal relations with those whom he has seen have undergone a most painful shock. The pain given by former tidings, the confirmed by the account which Titus brought, the action of a sensitive mind at the necessity of action, contend together for utterance. What excitement this excitement?

We have seen that Timothy had been sent from Asia to Macedonia and Corinth. He had seen St. Paul when he wrote this Second Epistle, and was associated with him in the salutation (2 Cor. i. 1). We have no account, either in the Acts or

in the Epistles, of this journey of Timothy, and some have thought it probable that he never reached Corinth. Let us suppose, however, that he arrived there soon after the First Epistle, conveyed by Stephanas and others, had been received by the Corinthian Church. He found that a movement had arisen in the heart of that Church which threw (let us suppose) the case of the incestuous person (1 Cor. v. 1-5) into the shade. This was a deliberate and sustained attack upon the Apostolic authority and personal integrity of the Apostle of the Gentiles. The party-spirit which, before the writing of the First Epistle, had been content with underrating the powers of Paul compared with those of Apollos, and with protesting against the laxity of his doctrine of freedom, had been fanned into a flame by the arrival of some person or persons who came from the Judaean Church, armed with letters of commendation, and who openly questioned the commission of him whom they proclaimed to be a self-constituted Apostle (2 Cor. iii. 1, xi. 4, 12-15).

As the spirit of opposition and detraction grew strong, the tongue of some member of the Church (more probably a Corinthian than the stranger himself) was loosed. He scolded at St. Paul's courage and constancy, pointing to his delay in coming to Corinth, and making light of his threats (i. 17, 21). He demanded proofs of his Apostleship (xii. 11, 12). He derided the weakness of his personal presence and the simplicity of his speech (x. 10). He even threw out insinuations touching the personal honesty and self-devotion of St. Paul (i. 12, xi. 17, 18). When some such attack was made openly upon the Apostle, the Church had not immediately called the offender to account; the better spirit of the believers being cowed, apparently, by the confidence and assumed authority of the assailants of St. Paul. A report of this melancholy state of things was brought to the Apostle by Timothy or by others; and we can imagine how it must have wounded his sensitive and most affectionate nature, and also how critical the juncture must have seemed to him for the whole Western Church. He immediately sent off Titus to Corinth, with a letter containing the sharpest rebukes, using the authority which had been denied, and threatening to enforce it speedily by his personal presence (ii. 2, 3, vii. 8). As soon as the letter was gone—how natural a trait!—he began to repent of having written it. He must have hated the appearance of claiming homage to himself; his heart must have been sore at the requital of his love; he must have felt the deepest anxiety as to the issue of the struggle. We can well believe him therefore when he speaks of what he had suffered:—"Out of much affliction and anguish of heart I wrote to you with many tears" (ii. 4); "I had no rest in my spirit" (ii. 13); "Our flesh had no rest, but we were troubled on every side; without were fightings, within were fears" (vii. 5). It appears that he could not bring himself to hasten to Corinth so rapidly as he had intended (i. 15, 16); he would wait till he heard news which might make his visit a happy instead of a painful one (ii. 1). When he had reached Macedonia, Titus, as we have seen, met him with such reassuring tidings. The offender had been rebuked by the Church, and had made submission (ii. 6, 7); the old spirit of love and reverence towards St. Paul had been awakened, and had poured itself forth in warm expressions of shame and grief and penitence. The cloud was now dispelled; fear and pain gave place to hope and tenderness and thankfulness. Paul

even now the Apostle would not start at once for Corinth. He may have had important work to do in Macedonia. But another letter would smooth the way still more effectually for his personal visit; and he accordingly wrote the Second Epistle, and sent it by the hands of Titus and two other brethren to Corinth.

When the Epistle is read in the light of the circumstances we have supposed, the symptoms it displays of a highly wrought personal sensitiveness, and of a kind of ebb and flow of emotion, are as intelligible as they are noble and beautiful. Nothing but a temporary interruption of mutual regard could have made the joy of sympathy so deep and fresh. If he had been the object of a personal attack, how natural for the Apostle to write as he does in ii. 5-10. In vii. 12, "he that suffered wrong" is Paul himself. All his protestations relating to his Apostolic work, and his solemn appeals to God and Christ, are in place; and we enter into his feelings as he asserts his own sincerity and the openness of the truth which he taught in the Gospel (iii., iv.). We see what sustained him in his self-assertion; he knew that he did not preach himself, but Christ Jesus the Lord. His own weakness became an argument to him, which he can use to others also, of the power of God working in him. Knowing his own fellowship with Christ, and that this fellowship was the right of other men too, he would be persuasive or severe, as the cause of Christ and the good of men might require (iv., v.). If he was appearing to set himself up against the churches in Judaea, he was the more anxious that the collection which he was making for the benefit of those churches should prove his sympathy with them by its largeness. Again he would recur to the maintenance of his own authority as an Apostle of Christ, against those who impeached it. He would make it understood that spiritual views, spiritual powers, were real; that if he knew no man after the flesh, and did not war after the flesh, he was not the less able for the building up of the Church (x.). He would ask them to excuse his anxious jealousy, his folly and excitement, whilst he gloried in the practical proofs of his Apostolic commission, and in the infirmities which made the power of God more manifest; and he would plead with them earnestly that they would give him no occasion to find fault or to correct them (xi., xii., xiii.).

The hypothesis upon which we have interpreted this Epistle is not that which is most commonly received. According to the more common view, the offender is the incestuous person of 1 Cor. v., and the letter which proved so sharp but wholesome a medicine, the First Epistle. But this view does not account so satisfactorily for the whole tone of the Epistle, and for the particular expressions relating to the offender; nor does it find places so consistently for the missions of Timothy and Titus. It does not seem likely that St. Paul would have treated the sin of the man who took his father's wife as an offence against himself, nor that he would have spoken of it by preference as a *wrong* (*λάσκα*) done to another (supposed to be the father). The view we have adopted is said, in De Wette's *Exegetisches Handbuch*, to have been held, in whole or in part, by Bleek, Credner, Olshausen, and Neander. More recently it has been advocated with great force by Ewald, in his *Sandwichen des A. P.*, pp. 223-232. The ordinary account is retained by Stanley, Alford, and Davidson, and with some hesitation by Conybeare and Howson,

The particular nature of this Epistle, we are now to facts in the life of his own Apostolic activity, leads to the mention of many interesting facts of St. Paul's life. His summary, in ii. 23-24, of the hardships and dangers through which he had gone, proves to us how little the history of the Acts is to be regarded as a complete account of what he did and suffered. Of the particulars not stated in the following words, "Of the how many times received I forty stripes save one; when I was beaten with rods, once was I stoned, three times I suffered shipwreck, a night and a day I have been in the deep,"—we know only of one, the beating by the magistrates at Philippi, from the Acts. The daily burden of "the care of all the churches" seems to imply a wide and constant range of communication, by visits, messengers, and letters, in which we have found it reasonable to seek examples in his intercourse with the Church at Corinth. The mention of "visions and revelations of the Lord," and of the "thorn (or rather tail in the flesh)," side by side, is peculiarly characteristic both of the mind and of the experience of St. Paul. As an instance of the visions, he alludes to a trance which had befallen him fourteen years before, in which he had been caught up to paradise, and had heard unspeakable words. Does this vision may be identified with any that is recorded in the Acts must depend on chronological considerations; but the very expressions of it in this place would rather lead us not to regard an occasion in which words that could be reported were spoken. We observe that he speaks with the deepest reverence of the privilege that came to him; but he distinctly declines to ground upon it as regards other men. Let him tell him, he says, not by any such pretensions, but facts which were cognizable to them (1st. 1st.). And he would not, even inwardly with himself, glory in visions and revelations without remembering how the Lord had guarded him from being pulled up by them. A stroke in the flesh (*καὶ ῥά σκαρπ*) was given him, a messenger of how he buffet him, lest he should be exalted above measure. The different interpretations which have given of this *σκαρπ* have a certain historical ground. (1) Roman Catholic divines have inclined to understand by it strong *several* temptations. (2) Luther and his followers take it to mean temptations to unbelief. But neither of these could be "infirmities" in which St. Paul could "glory." (3) It is almost the unanimous opinion of modern divines—and the authority of the earliest fathers on the whole is in favour of it—that the word represents some venereal *lady*, *syphilis*, or especially *stomach* in *love*. It is *passion* that Paul refers to in Gal. iv. 14: "My tempter of my flesh ye despised not nor rejected." The infirmity distressed him so much that he boasted the Lord thrice that it might depart from him. But the Lord answered, "My grace is sufficient for thee; for my strength is made perfect in weakness." We are to understand therefore the *lady* as remaining; but Paul is more that *lady* will it, he even glories in it as a means of *loving* more purely the power of Christ in him. To be able to understand the Apostle in another way this passage, as labouring under *some* *syphilis*, health, is clear enough. But we must remember that his constitution was at least *strong* *syphilis* a matter of fact, to carry him through the hardships and anxieties and toils which he lived in.

scribes to us, as I to sustain the pressure of the long imprisonment at Caesarea and in Rome.

After writing this Epistle, St. Paul travelled through Macedonia, perhaps to the borders of Illyricum (Rom. xv. 19), and then carried out the intention of which he had spoken so often, and arrived himself at Corinth. The narrative in the Acts tells us that "when he had gone over those parts (Macedonia), and had given them much exhortation, he came into Greece, and there abode three months" (xx. 2, 3). There is only one incident which we can connect with this visit to Greece, but that is a very important one—the writing of another great Epistle, addressed to the Church at Rome. [ROMANS, EPISTLE TO THE.] That this was written at this time from Corinth appears from passages in the Epistle itself, and has never been doubted.

It would be unreasonable to suppose that St. Paul was insensible to the mighty associations which connected themselves with the name of Rome. The seat of the imperial government to which Jerusalem itself, with the rest of the world, was then subject, must have been a grand object to the thoughts of the Apostle from his infancy upwards. He was himself a citizen of Rome; he had come repeatedly under the jurisdiction of Roman magistrates; he had enjoyed the benefits of the equity of the Roman law, and the justice of Roman administration. And, besides its universal supremacy, Rome was the natural head of the Gentile world, as Jerusalem was the head of the Jewish world. In this august city Paul had many friends and brethren. Romans who had travelled into Greece and Asia, strangers from Greece and Asia who had gone to settle at Rome, had heard of Jesus Christ and the kingdom of Heaven from Paul himself or from other preachers of Christ, and had formed themselves into a community, of which a good report had gone forth throughout the Christian world. We are not surprised therefore to hear that the Apostle was very anxious to visit Rome. It was his fixed intention to go to Rome, and from Rome to extend his journeys as far as Spain (Rom. xv. 24, 28). He would thus bear his witness, both in the capital and to the extremities of the Western or Gentile world. For the present he could not go on from Corinth to Rome, because he was drawn by a special errand to Jerusalem—where indeed he was likely enough to meet with dangers and delays (xv. 25-32). But from Jerusalem he proposed to turn Romewards. In the meanwhile he would write them a letter from Corinth.

The letter is a substitute for the personal visit which he had longed "for many years" to pay; and, as he would have made the visit, so now he writes the letter, because he is the Apostle of the Gentiles. Of this office, to speak in common language, St. Paul was proud. All the labours and dangers of it he would willingly encounter; and he also jealously maintain its dignity and its power.

He held it of Christ, and Christ's commission should not be dishonoured. He represents grandly as a priest, appointed to offer up the faith of the Gentile world as a sacrifice to God (xv. 16). And he then proceeds to speak with pride of the extent and independence of his Apostolic authority.

It is in harmony with this language that he should address the Roman Church as consisting mainly of Gentiles: but we find that he speaks to persons deeply interested in Jewish traditions (see Prof. Jowett's and Bp. Clemen's Introduction to the Epistle).

To the Church thus composed, the Apostle of the Gentiles writes to declare and commend the Gospel which he everywhere preaches. That Gospel was invariably the announcement of Jesus Christ the Son of God, the Lord of men, who was made man, died, and was raised again, and whom His heralds present to the faith and obedience of mankind. Such a *κηρυγμα* might be variously commended to different hearers. In speaking to the Roman Church, St. Paul represents the chief value of it as consisting in the fact that, through it, the righteousness of God, as a righteousness not for God only, but also for men, was revealed. It is natural to ask what led him to choose and dwell upon this aspect of his proclamation of Jesus Christ. The following answers suggest themselves:—(1.) As he looked upon the condition of the Gentile world, with that *coup d'œil* which the writing of a letter to the Roman Church was likely to suggest, he was struck by the awful wickedness, the utter dissolution of moral ties, which has made that age infamous. His own terrible summary (i. 21-32) is well known to be confirmed by other contemporary evidence. The profligacy which we shudder to read of was constantly under St. Paul's eye. Along with the evil he saw also the beginnings of God's judgment upon it. He saw the miseries and disasters, begun and impending, which proved that God in heaven would not tolerate the unrighteousness of men. (2.) As he looked upon the condition of the Jewish people, he saw them claiming an exclusive righteousness, which, however, had manifestly no power to preserve them from being really unrighteous. (3.) Might not the thought also occur to him, as a Roman citizen, that the empire which was now falling to pieces through unrighteousness had been built up by righteousness, by that love of order and that acknowledgment of rights which were the great endowment of the Roman people? Whether we lay any stress upon this or not, it seems clear that to one contemplating the world from St. Paul's point of view, no thought would be so naturally suggested as that of the need of the true Righteousness for the two divisions of mankind. How he expounds that God's own righteousness was shown, in Jesus Christ, to be a righteousness which men might trust in—sinners though they were—and by trusting in it submit to it, and so receive it as to show forth the fruits of it in their own lives; how he declares the union of men with Christ as subsisting in the Divine idea and as realized by the power of the Spirit,—may be seen in the Epistle itself. The remarkable exposition contained in ch. ix., x., xi., illustrates the personal character of St. Paul, by showing the intense love for his nation which he retained through all his struggles with unbelieving Jews and Judaizing Christians, and by what hopes he reconciled himself to the thought of their unbelief and their punishment. Having spoken of this subject, he goes on to exhibit in practical counsels the same love of Christian unity, moderation, and gentleness, the same respect for social order, the same tenderness for weak consciences, and the same expectation of the Lord's coming and confidence in the future, which appear more or less strongly in all his letters.

Before his departure from Corinth, St. Paul was joined again by St. Luke, as we infer from the change in the narrative from the third to the first person. We have seen already that he was bent on making a journey to Jerusalem, for a special purpose and with

even now the Apostle would not start at once for Corinth. He may have had important work to do in Macedonia. But another letter would smooth the way still more effectually for his personal visit; and he accordingly wrote the Second Epistle, and sent it by the hands of Titus and two other brethren to Corinth.

When the Epistle is read in the light of the circumstances we have supposed, the symptoms it displays of a highly wrought personal sensitiveness, and of a kind of ebb and flow of emotion, are as intelligible as they are noble and beautiful. Nothing but a temporary interruption of mutual regard could have made the joy of sympathy so deep and fresh. If he had been the object of a personal attack, how natural for the Apostle to write as he does in ii. 5-10. In vii. 12, "he that suffered wrong" is Paul himself. All his protestations relating to his Apostolic work, and his solemn appeals to God and Christ, are in place; and we enter into his feelings as he asserts his own sincerity and the openness of the truth which he taught in the Gospel (iii. iv.). We see what sustained him in his self-assertion; he knew that he did not preach himself, but Christ Jesus the Lord. His own weakness became an argument to him, which he can use to others also, of the power of God working in him. Knowing his own fellowship with Christ, and that this fellowship was the right of other men too, he would be persuasive or severe, as the cause of Christ and the good of men might require (iv., v.). If he was appearing to set himself up against the churches in Judaea, he was the more anxious that the collection which he was making for the benefit of those churches should prove his sympathy with them by its largeness. Again he would recur to the maintenance of his own authority as an Apostle of Christ, against those who impeached it. He would make it understood that spiritual views, spiritual powers, were *real*; that if he knew no man after the flesh, and did not war after the flesh, he was not the less able for the building up of the Church (i.). He would ask them to excuse his anxious jealousy, his fully and excitement, whilst he gloried in the practical proofs of his Apostolic commission, and in the infirmities which made the power of God more manifest; and he would plead with them earnestly that they would give him no occasion to find fault or to correct them (xi., xii., xiii.).

The hypothesis upon which we have interpreted this Epistle is not that which is most commonly received. According to the more common view, the offender is the incestuous person of 1 Cor. v., and the letter which proved so sharp but wholesome a medicine, the First Epistle. But this view does not account so satisfactorily for the whole tone of the Epistle, and for the particular expressions relating to the offender; nor does it find places so consistently for the missions of Timothy and Titus. It does not seem likely that St. Paul would have treated the sin of the man who took his father's wife as an offence against himself, nor that he would have spoken of it by preference as a *wrong* (*ἀδικία*) done to another (supposed to be the father). The view we have adopted is said, in De Wette's *Exegetisches Handbuch*, to have been held, in whole or in part, by Bleek, Crelner, Olshausen, and Neander. More recently it has been advocated with great force by Ewald, in his *Send-schriften des A. P.* pp. 223-232. The ordinary account is retained by Stanley, Alford, and Davidson, and with some hesitation by Combe and Howson,

The particular nature of this Epistle, as compared to facts in the life of his own Apostle, and the leads to the mention of many interesting facts of St. Paul's life. His summary, in ii. 23-32, of the hardships and dangers through which he had gone, proves to us how little the history of Acts is to be regarded as a complete answer to what he did and suffered. Of the particulars stated in the following words, "Of the times I received I forty stripes save one; three times I beaten with rods, once was I stoned, thrice I suffered shipwreck, a night and a day I have been in the deep,"—we know only of one, the beating by the magistrates at Philippi, from the Acts. The daily burden of "the cure of all the Jews" seems to imply a wide and constant supply of munition, by visits, messengers, and letters, which we have found it reasonable to seek examples in his intercourse with the Church of Corinth. The mention of "visions and revelations of the Lord," and of the "thorn (or rather net in the flesh)," side by side, is peculiarly characteristic both of the mind and of the experience of St. Paul. As an instance of the visions, he alludes to a trance which had befallen him fourteen years before, in which he had been caught up into paradise, and had heard unspeakable words. Does this vision may be identified with any that is recorded in the Acts must depend on *disputed* considerations: but the very expression of it, in this place would rather lead us to look for an occasion in which words that could be spoken were spoken. We observe that he speaks with the deepest reverence of the privilege thus granted him; but he distinctly declines to boast of it upon it as regards other men. Let God judge him, he says, not by any such pretensions, but by facts which were cognizable to all (ii. 10). And he would not, even inwardly with himself, glory in visions and revelations, without remembering how the Lord had guarded him from being puffed up by them. A state in the flesh (*ἐν σαρκὶ τῇ σαρκί*) was given him, a messenger of his to buffet him, lest he should be exalted above measure. The different interpretations which have been given of this ἀνάλογον have a certain historical interest. (1) Roman Catholic divines have looked for a *understand* by it strong sensual temptations. Luther and his followers take it to mean temptations to *unbelief*. But neither of these could be "infirmities" in which St. Paul could "glory." (3) It is almost the unanimous opinion of modern divines—and the authority of the *ancient fathers* on the whole is in favour of it—that it denotes represents some *various* bodily infirmities (especially Stanley *in loco*). It is possible that St. Paul refers to in Gal. iv. 14: "My weakness, my flesh ye despised and me rejected." The *firmity* distressed him so much that he thought the Lord thence that it might depart from him. But the Lord answered, "My grace is sufficient for thee; for my strength is made perfect in weakness." We are to understand therefore the *infirmity* remaining; but Paul is more than *conqueror* over it, he even glories in it as a means of displaying more purely the power of Christ in him. That we are to understand the Apostle, in connection with this passage, as labouring under some degree of ill-health, is clear enough. But we must remember that his constitution was at least strong enough, as a matter of fact, to carry him through his *ships* and *anxieties* and *toils* which he bore: so

to us, and to sustain the pressure of the long journey at Caesarea and in Rome.

On writing this Epistle, St. Paul travelled in Macedonia, perhaps to the borders of Illyria (Rom. xv. 19), and then carried out the work of which he had spoken so often, and himself at Corinth. The narrative in the Acts us that "when he had gone over those Macedonia", and had given them much exhortation, he came into Greece, and there abode months" (xx. 2, 3). There is only one incident which we can connect with this visit to Greece, it is a very important one—the writing of the great Epistle, addressed to the Church at Rome.

[ROMANS, EPISTLE TO THE.] That this mission at this time from Corinth appears from within the Epistle itself, and has never been doubted. It would be unreasonable to suppose that St. Paul was sensible to the mighty associations which surrounded himself with the name of Rome. The imperial government to which Jerusalem with the rest of the world, was then subject, had been a grand object to the thoughts of the apostle from his infancy upwards. He was a citizen of Rome; he had come repeatedly under the jurisdiction of Roman magistrates; he had enjoyed the benefits of the equity of the Roman law and the justice of Roman administration. And, in its universal supremacy, Rome was the head of the Gentile world, as Jerusalem the head of the Jewish world. In this august city he had many friends and brethren. Romans had travelled into Greece and Asia, strangers in Greece and Asia who had gone to settle at the feet of Jesus Christ and the kingdom of heaven from Paul himself or from other preachers, and had formed themselves into a community, of which a good report had gone forth throughout the Christian world. We are not surprised therefore to hear that the Apostle was very anxious to visit Rome. It was his fixed intention to Rome, and from Rome to extend his journey as far as Spain (Rom. xv. 24, 28). He would bear his witness, both in the capital and to the remotest of the Western or Gentile world. He present he could not go on from Corinth to Rome because he was drawn by a special errand to Jerusalem—where indeed he was likely enough to find dangers and delays (xv. 25-32). But from Jerusalem he proposed to turn Romewards. In the while he would write them a letter from Corinth.

This letter is a substitute for the personal visit which he had longed "for many years" to pay; as he would have made the visit, so now he writes the letter, because he is the Apostle of the Gentiles. Of this office, to speak in common language, St. Paul was proud. All the labours and sorrows of it he would willingly encounter; and he would also jealously maintain its dignity and its authority. He held it of Christ, and Christ's command should not be dishonoured. He represents himself grandly as a priest, appointed to offer up the Gentile world as a sacrifice to God (Rom. ix. 25). And he then proceeds to speak with authority of the extent and independence of his Apostolic mission. It is in harmony with this language that he would address the Roman Church as consisting of Jews and Gentiles: but we find that he speaks to Jews as to persons deeply interested in Jewish traditions (see Prof. Jowett's and Bp. Colenso's lectures to the Epistle).

To the Church thus composed, the Apostle of the Gentiles writes to declare and commend the Gospel which he everywhere preaches. That Gospel was invariably the announcement of Jesus Christ the Son of God, the Lord of men, who was made man, died, and was raised again, and whom His heralds present to the faith and obedience of mankind. Such a *κηρυγμα* might be variously commended to different hearers. In speaking to the Roman Church, St. Paul represents the chief value of it as consisting in the fact that, through it, the righteousness of God, as a righteousness not for God only, but also for men, was revealed. It is natural to ask what led him to choose and dwell upon this aspect of his proclamation of Jesus Christ. The following answers suggest themselves—(1.) As he looked upon the condition of the Gentile world, with that *coup d'œil* which the writing of a letter to the Roman Church was likely to suggest, he was struck by the awful wickedness, the utter dissolution of moral ties, which has made that age infamous. His own terrible summary (i. 21-32) is well known to be confirmed by other contemporary evidence. The profligacy which we shudder to read of was constantly under St. Paul's eye. Along with the evil he saw also the beginnings of God's judgment upon it. The remarkable exposition contained in ch. ix., x., xi., illustrates the personal character of St. Paul, by showing the intense love for his nation which he retained through all his struggles with unbelieving Jews and Judaizing Christians, and by what hopes he reconciled himself to the thought of their unbelief and their punishment. Having spoken of this subject, he goes on to exhibit in practical counsels the same love of Christian unity, moderation, and gentleness, the same respect for social order, the same tenderness for weak consciences, and the same expectation of the Lord's coming and confidence in the future, which appear more or less strongly in all his letters.

Before his departure from Corinth, St. Paul was joined again by St. Luke, as we infer from the change in the narrative from the third to the first person. We have seen already that he was bent on making a journey to Jerusalem, for a special purpose, and was

even now the Apostle would not start at once for Corinth. He may have had important work to do in Macedonia. But another letter would smooth the way still more effectually for his personal visit; and he accordingly wrote the Second Epistle, and sent it by the hands of Titus and two other brethren to Corinth.

When the Epistle is read in the light of the circumstances we have supposed, the symptoms it displays of a highly wrought personal sensitiveness, and of a kind of ebb and flow of emotion, are as intelligible as they are noble and beautiful. Nothing but a temporary interruption of mutual regard could have made the joy of sympathy so deep and fresh. If he had been the object of a personal attack, how natural for the Apostle to write as he does in *ā. 5-10*. In *vii. 12*, "he that suffered wrong" is Paul himself. All his protestations relating to his Apostolic work, and his solemn appeals to God and Christ, are in place; and we enter into his feelings as he asserts his own sincerity and the openness of the truth which he taught in the Gospel (*iii., iv.*). We see what sustained him in his self-assertion; he knew that he did not preach himself, but Christ Jesus the Lord. His own weakness became an argument to him, which he can use to others also, of the power of God working in him. Knowing his own fellowship with Christ, and that this fellowship was the right of other men too, he would be persuasive or severe, as the cause of Christ and the good of men might require (*iv., v.*). If he was appearing to set himself up against the churches in Judaea, he was the more anxious that the collection which he was making for the benefit of those churches should prove his sympathy with them by its largeness. Again he would recur to the maintenance of his own authority as an Apostle of Christ, against those who impeached it. He would make it understood that spiritual views, spiritual powers, were *real*; that if he knew no man after the flesh, and did not war after the flesh, he was not the less able for the building up of the Church (*x.*). He would ask them to excuse his anxious jealousy, his fully and excitement, whilst he gloried in the practical proofs of his Apostolic commission, and in the infirmities which make the power of God more manifest; and he would plead with them earnestly that they would give him no occasion to find fault or to correct them (*xi., xii., xiii.*).

The hypothesis upon which we have interpreted this Epistle is not that which is most commonly received. According to the more common view, the offender is the incestuous person of *I Cor. v.*, and the letter which proved so sharp but wholesome a medicine, the First Epistle. But this view does not account so satisfactorily for the whole tone of the Epistle, and for the particular expressions relating to the offender; nor does it find places so consistently for the missions of Timothy and Titus. It does not seem likely that St. Paul would have treated the sin of the man who took his father's wife as an offence against himself, nor that he would have spoken of it by preference as a *wrong* (*ἀδικία*) done to another (supposed to be the father). The view we have adopted is said, in *De Wette's Exegetisches Handbuch*, to have been held, in whole or in part, by Bleek, Crelner, Olshausen, and Neander. More recently it has been advocated with great force by Ewald, in his *Send-schreiben des A. P.* pp. 223-232. The ordinary account is retained by Stanley, Alford, and Davidson, and with some hesitation by Conybeare and Howson.

The particular nature of this Epistle, as an appeal to facts in favour of his own Apostolic authority, leads to the mention of many interesting features of St. Paul's life. His summary, in *ā. 23-28*, of the hardships and dangers through which he had gone, proves to us how little the history in the Acts is to be regarded as a complete account of what he did and suffered. Of the particulars here stated in the following words, "Of the Jews five times received I forty stripes save one; thrice and I beaten with rods, once was I stoned, thrice I suffered shipwreck, a night and a day I have been in the deep,"—we know only of one, the beating by the magistrates at Philippi, from the Acts. The daily burden of "the care of all the churches" seems to imply a wide and constant range of communication, by visits, messengers, and letters, of which we have found it reasonable to assume examples in his intercourse with the Church of Corinth. The mention of "visions and revelations of the Lord," and of the "thorn" (or rather *stake*, in the flesh," side by side, is peculiarly characteristic both of the mind and of the experiences of St. Paul. As an instance of the visions, he alludes to a trance which had befallen him fourteen years before, in which he had been caught up into paradise, and had heard unspeakable words. What this vision may be identified with any that is recorded in the Acts must depend on chronological considerations: but the very expressions of St. Paul in this place would rather lead us not to think of an occasion in which words that could be reported were spoken. We observe that he speaks with the deepest reverence of the privileges that granted to him; but he distinctly declines to ground anything upon it as regards other men. Let them judge him, he says, not by any such pretensions, but by facts which were cognisable to them (*iii. 1-6*). And he would not, even inwardly with himself, glory in visions and revelations without remembering how the Lord had guarded him from being puffed up by them. A stake in the flesh (*αἰχμή ἐν σαρκί*) was given him, a messenger of Satan to buffet him, lest he should be exalted above measure. The different interpretations which have passed of this *σκόλος* have a certain historical significance. (1) Roman Catholic divines have inclined to understand by it strong sensual temptation. St. Luther and his followers take it to mean temptations to unbelief. But neither of these would be "infirmities" in which St. Paul could "glory." (3) It is almost the unanimous opinion of modern divines—and the authority of the ancient fathers on the whole is in favour of it—that the *stake* represents some vexatious bodily infirmity (as especially Stanley *in loco*). It is plainly what St. Paul refers to in *Gal. iv. 14*: "My temptation is my flesh ye despised not nor rejected." This infirmity distressed him so much that he thought the Lord thence that it might depart from him. But the Lord answered, "My grace is sufficient to thee; for my strength is made perfect in weakness." We are to understand therefore the affliction as remaining; but Paul is more than resigned under it, he even glories in it as a means of displaying more purely the power of Christ in him. That we are to understand the Apostle, in accordance with this passage, as labouring under some degree of ill-health, is clear enough. But we must remember that his constitution was at least strong enough, as a matter of fact, to carry him through the hardships and anxieties and toils which he endured.

scribes to us, as I to sustain the pressure of the long imprisonment at Caesarea and in Rome.

After writing this Epistle, St. Paul travelled through Macedonia, perhaps to the borders of Illyricum (Rom. xv. 19), and then carried out the intention of which he had spoken so often, and arrived himself at Corinth. The narrative in the Acts tells us that "when he had gone over those parts (Macedonia), and had given them much exhortation, he came into Greece, and there abode three months" (xx. 2, 3). There is only one incident which we can connect with this visit to Greece, but that is a very important one—the writing of another great Epistle, addressed to the Church at Rome. [ROMANS, EPISTLE TO THE.] That this was written at this time from Corinth appears from passages in the Epistle itself, and has never been doubted.

It would be unreasonable to suppose that St. Paul was insensible to the mighty associations which connected themselves with the name of Rome. The seat of the imperial government to which Jerusalem itself, with the rest of the world, was then subject, must have been a grand object to the thoughts of the Apostle from his infancy upwards. He was himself a citizen of Rome; he had come repeatedly under the jurisdiction of Roman magistrates; he had enjoyed the benefits of the equity of the Roman law, and the justice of Roman administration. And, besides its universal supremacy, Rome was the natural head of the Gentile world, as Jerusalem was the head of the Jewish world. In this august city Paul had many friends and brethren. Romans who had travelled into Greece and Asia, strangers from Greece and Asia who had gone to settle at Rome, had heard of Jesus Christ and the kingdom of Heaven from Paul himself or from other preachers of Christ, and had formed themselves into a community, of which a good report had gone forth throughout the Christian world. We are not surprised therefore to hear that the Apostle was very anxious to visit Rome. It was his fixed intention to go to Rome, and from Rome to extend his journeys as far as Spain (Rom. xv. 24, 28). He would thus bear his witness, both in the capital and to the extremities of the Western or Gentile world. For the present he could not go on from Corinth to Rome, because he was drawn by a special errand to Jerusalem—where indeed he was likely enough to meet with dangers and delays (xv. 25-32). But from Jerusalem he proposed to turn Romewards. In the meanwhile he would write them a letter from Corinth.

The letter is a substitute for the personal visit which he had longed "for many years" to pay; and, as he would have made the visit, so now he writes the letter, because he is the Apostle of the Gentiles. Of this office, to speak in common language, St. Paul was proud. All the labours and dangers of it he would willingly encounter; and he would also jealously maintain its dignity and its powers. He held it of Christ, and Christ's commission should not be dishonoured. He represents himself grandly as a priest, appointed to offer up the faith of the Gentile world as a sacrifice to God (xv. 16). And he then proceeds to speak with pride of the extent and independence of his Apostolic labours. It is in harmony with this language that he should address the Roman Church as consisting mainly of Gentiles: but we find that he speaks to them as to persons deeply interested in Jewish questions (see Prof. Jowett's and Bp. Caten's *Introductions to the Epistle*).

To the Church thus composed, the Apostle of the Gentiles writes to declare and commend the Gospel which he everywhere preaches. That Gospel was invariably the announcement of Jesus Christ the Son of God, the Lord of men, who was made man, died, and was raised again, and whom His heralds present to the faith and obedience of mankind. Such a *κρίπρυμα* might be variously commended to different hearers. In speaking to the Roman Church, St. Paul represents the chief value of it as consisting in the fact that, through it, the righteousness of God, as a righteousness not for God only, but also for men, was revealed. It is natural to ask what led him to choose and dwell upon this aspect of his proclamation of Jesus Christ. The following answers suggest themselves:—(1.) As he looked upon the condition of the Gentile world, with that *coup d'œil* which the writing of a letter to the Roman Church was likely to suggest, he was struck by the awful wickedness, the utter dissolution of moral ties, which has made that age infamous. His own terrible summary (i. 21-32) is well known to be confirmed by other contemporary evidence. The profligacy which we shudder to read of was constantly under St. Paul's eye. Along with the evil he saw also the beginnings of God's judgment upon it. He saw the miseries and disasters, begun and impending, which proved that God in heaven would not tolerate the unrighteousness of men. (2.) As he looked upon the condition of the Jewish people, he saw them claiming an exclusive righteousness, which, however, had manifestly no power to preserve them from being really unrighteous. (3.) Might not the thought also occur to him, as a Roman citizen, that the empire which was now falling to pieces through unrighteousness had been built up by righteousness, by that love of order and that acknowledgment of rights which were the great endowment of the Roman people? Whether we lay any stress upon this or not, it seems clear that to one contemplating the world from St. Paul's point of view, no thought would be so naturally suggested as that of the need of the *triste* Righteousness for the two divisions of mankind. How he expounds that God's own righteousness was shown, in Jesus Christ, to be a righteousness which men might trust in—sinners though they were—and by trusting in it submit to it, and so receive it as to show forth the fruits of it in their own lives; how he declares the union of men with Christ as subsisting in the Divine idea and as realized by the power of the Spirit,—may be seen in the Epistle itself. The remarkable exposition contained in ch. ix., x., xi., illustrates the personal character of St. Paul, by showing the intense love for his nation which he retained through all his struggles with unbelieving Jews and Judaizing Christians, and by what hopes he reconciled himself to the thought of their unbelief and their punishment. Having spoken of this subject, he goes on to exhibit in practical counsels the same love of Christian unity, moderation, and gentleness, the same respect for social order, the same tenderness for weak consciences, and the same expectation of the Lord's coming and confidence in the future, which appear more or less strongly in all his letters.

Before his departure from Corinth, St. Paul was joined again by St. Luke, as we infer from the change in the narrative from the third to the first person. We have seen already that he was bent on making a journey to Jerusalem, for a special purpose was written

in a limited time. With this view he was intending to go by sea to Syria. But he was made aware of some plot of the Jews for his destruction, to be carried out through this voyage; and he determined to evade their malice by changing his route. Several brethren were associated with him in this expedition, the bearers, no doubt, of the collections made in all the Churches for the poor at Jerusalem. These were sent on by sea, and probably the money with them, to Troas, where they were to await St. Paul. He, accompanied by St. Luke, went northwards through Macedonia. The style of an eye-witness again becomes manifest. "From Philippi," says the writer, "we sailed away after the days of unleavened bread, and came unto them to Troas in five days, where we abode seven days." The marks of time throughout this journey have given occasion to much chronological and geographical discussion, which brings before the reader's mind the difficulties and uncertainties of travel in that age, and leaves the precise determination of the dates of this history a matter for reasonable conjecture rather than for positive statement. But no question is raised by the times mentioned which need detain us in the course of the narrative. During the stay at Troas there was a meeting on the first day of the week "to break bread," and Paul was discoursing earnestly and at length with the brethren. He was to depart the next morning, and midnight found them listening to his earnest speech, with many lights burning in the upper chamber in which they had met, and making the atmosphere oppressive. A youth named Eutychus was sitting in the window, and was gradually overpowered by sleep, so that at last he fell into the street or court from the third story, and was taken up dead. The meeting was interrupted by this accident, and Paul went down and fell upon him and embraced him, saying, "Be not disturbed, his life is in him." His friends then appear to have taken charge of him, whilst Paul went up again, first presided at the breaking of bread, afterwards took a meal, and continued conversing until day-break, and so departed.

Whilst the vessel which conveyed the rest of the party sailed from Troas to Assos, Paul gained some time by making the journey by land. At Assos he went on board again. Coasting along by Mitylene, Chios, Samos, and Trogyllium, they arrived at Miletus. The Apostle was thus passing by the chief Church in Asia; but if he had gone to Ephesus he might have arrived at Jerusalem too late for the Pentecost, at which festival he had set his heart upon being present. At Miletus, however, there was time to send to Ephesus; and the elders of the Church were invited to come down to him there. This meeting is made the occasion for recording another characteristic and representative address of St. Paul (Acts xx. 18-35). This spoken address to the elders of the Ephesian Church may be ranked with the Epistles, and throws the same kind of light upon St. Paul's Apostolic relations to the Churches. Like several of the Epistles, it is in great part an appeal to their memories of him and of his work. He refers to his labours in "serving the Lord" amongst them, and to the dangers he endured from the plots of the Jews, and asserts emphatically the *unreserve* with which he had fought them. He then mentions a fact which will come before us again presently, that he was receiving inspired warnings, as he advanced from city to city, of the bonds and afflictions awaiting him at

Jerusalem. It is interesting to observe that the Apostle felt it to be his duty to press on in spite of these warnings. Having formed his plan on good grounds and in the sight of God, he did not see dangers which might even touch his life, however clearly set before him, reasons for changing it. Other arguments might move him from a bad purpose—not dangers. His one guiding principle was, to discharge the ministry which he had received of the Lord Jesus, to testify the Gospel of the grace of God. Speaking to his present audience as to those whom he was leaving for the last time, he proceeds to exhort them with unusual earnestness and tenderness, and expresses in conclusion that anxiety as to practical industry and integrity which has been increasingly occupying his mind in terms strongly resembling the language of the Epistles to the Thessalonians and Corinthians; he pleads his own example, and entreats them to follow it, in "labouring for the support of the weak." "And when he had thus spoken he knelt down and prayed with them all: and they all wept and, and fell on Paul's neck, and kissed him, sorrowing most of all for the words which he spake, that they should see his face no more. And they accompanied him to the ship." . . . This is the last narrative in which some learned men think they can detect the signs of a moderately clever fiction.

The course of the voyage from Miletus was by Coos and Rhodes to Patara, and from Patara a further vessel past Cyprus to Tyre. Here Paul and his company spent seven days; and there were disciples "who said to Paul through the Spirit, that he should not go up to Jerusalem." Again there was a sorrowful parting: "They all brought us on our way, with wives and children, all we were out of the city; and we knelt down on the shore and prayed." From Tyre they sailed to Ptolemais, where they spent one day, and then Ptolemais proceeded, apparently by land, to Caesarea. In this place was settled Philip the Evangelist, one of the seven, and he became the host of Paul and his friends. Philip had four unmarried daughters, who "prophesied," and who repeated, no doubt, the warnings already heard. Caesarea was within an easy journey of Jerusalem, and Paul may have thought it prudent not to be too long in Jerusalem before the festival; otherwise it might seem strange that, after the former haste, they now "tarried many days" at Caesarea. During the interval the prophet Agabus (Acts xi. 28) came down from Jerusalem, and pronounced the pressing intimations of danger with a prediction expressly delivered. It would seem as if the approaching imprisonment were intended to be conspicuous in the eyes of the Church, as an agency for the accomplishment of God's designs. At this stage a final effort was made to dissuade Paul from going up to Jerusalem, by the Christians of Caesarea, and by his travelling companions. But "Paul answered, What mean ye to weep and to break mine heart? I am ready not to be bound only, but also to die at Jerusalem for the name of the Lord Jesus. And when he would not be persuaded, we ceased, saying, The will of the Lord be done." So, after a while, they went up to Jerusalem, and were gladly received by the brethren. This is St. Paul's fifth and last visit to Jerusalem.

*St. Paul's Imprisonment: Jerusalem and the Sore.*—He who was thus conducted into Jerusalem by a company of anxious friends had become by this time a man of considerable fame amongst the

en. He was widely known as one who it with pre-eminent boldness that a way of favour was opened to the Gentiles, and way did not lie through the door of the law. He had moreover actually founded and important communities, composed of Gentiles together, which stood simply on of Jesus Christ, apart from circumcision observance of the Law. He had thus against himself the bitter enmity of that able Jewish pride which was almost as some of those who had professed the faith as in their unconverted brethren. This for years been vexing both the body and spirit of the Apostle. He had no rest from tribulations; and his joy in proclaiming the freedom to the world was mixed with a sorrow that in so doing he was held to be the calling of his fathers. He was now in a crisis in the long struggle, and the it had been made to rest upon his mind at his journey to Jerusalem. He came to die for the name of the Lord Jesus," and he expressly to prove himself a faithful man whose purpose emerges at every point of

Y. he does not mention the contributions by Paul and his companions for the poor of Jerusalem. But it is to be assumed that their was to deliver these funds into the proper hands might be done at the interview which came on the following day with "James and elders." As on former occasions, the Jerusalem could not but glorify God for what they heard; but they had been alarmed by silent feeling concerning St. Paul. They him, "Thou seest, brother, how many of Jews there are which believe; and all zealous of the law; and they are un- these that thou teachest all the Jews among the Gentiles to forsake Moses, at they ought not to circumcise their children to walk after the customs." This James and the elders assume, was not a perversion of Paul's real teaching did not, in fact, differ from theirs. In his such rumours they ask him to do an act of homage to the Law and its rites. They had four men who were under the same vow. The completion of this vow (Num. vi. 13-21) a considerable expense offerings to be presented in the Temple; as a meritorious act to provide these for the poorer Nazarites. St. Paul was to put himself under the vow with these men, and to supply the cost of their offerings. He accepted the proposal, and on the next day performed some ceremony which im- adoption of the vow, he went into the announcing that the due offerings for each were about to be presented and the period was terminated. It appears that the whole undertaken by St. Paul required seven days to it. Towards the end of this time came from "Asia," who had come up for the annual feast, and who had a personal know- of Paul himself and of his companion- is, a Gentile from Ephesus, saw Paul in the temple. They immediately set upon him, and the people against him, crying out, "Israel, help: this is the man that teacheth everywhere against the people, and the

law, and this place; and further brought Greeks also into the Temple, and hath polluted this holy place." The latter charge had no more truth in it than the first: it was only suggested by their having seen Trophimus with him, not in the Temple, but in the city. They raised, however, a great commotion: Paul was dragged out of the Temple, of which the doors were immediately shut, and the people, having him in their hands, were proposing to kill him. But tidings were soon carried to the commander of the force which was serving as a garrison in Jerusalem, that "all Jerusalem was in an uproar;" and he, taking with him soldiers and centurions, hastened to the scene of the tumult. Paul was rescued from the violence of the multitude by the Roman officer, who made him his own prisoner, causing him to be chained to two soldiers, and then proceeded to inquire who he was and what he had done. The inquiry only elicited confused outcries, and the "chief captain" seems to have imagined that the Apostle might perhaps be a certain Egyptian pretender who had recently stirred up a considerable rising of the people. The account in the Acts (xxi. 34-40) tells us with graphic touches how St. Paul obtained leave and opportunity to address the people in a discourse which is related at length.

This discourse was spoken in Hebrew; that is, in the native dialect of the country, and was on that account listened to with the more attention. It is described by St. Paul himself, in his opening words, as his "defence," addressed to his brethren and fathers. It is in this light that it ought to be regarded. As we have seen, the desire which occupied the Apostle's mind at this time, was that of vindicating his message and work as those of a faithful Jew. The discourse spoken to the angry people at Jerusalem is his own justification of himself. He adopts the historical method, after which all the recorded appeals to Jewish audiences are framed. He is a servant of facts. He had been from the first a zealous Israelite like his hearers. He had changed his course because the God of his fathers had turned him from one path into another. It is thus that he is led into a narrative of his Conversion. We have already noticed the differences, in the statement of bare facts, between this narrative and that of the 9th chapter. The business of the student, in this place, is to see how far the purpose of the Apostle will account for whatever is special to this address. That purpose explains the detailed reference to his rigorously Jewish education, and to his history before his Conversion. It gives point to the announcement that it was by a direct operation from without upon his spirit, and not by the gradual influence of other minds upon his, that his course was changed. Incidentally, we may see a reason for the admission that his companions "heard not the voice of him that spoke to me" in the fact that some of them, not believing in Jesus with their former leader, may have been living at Jerusalem, and possibly present amongst the audience. In this speech, the Apostle is glad to mention, what we were not told before, that the Ananias who interpreted the will of the Lord to him more fully at Damascus, was "a devout man according to the law, having a good report of all the Jews which dwelt there," and that he made his communication in the name of Jehovah, the God of Israel, saying "The God of our fathers hath chosen thee, that thou shouldst know his will, and hear a voice."

shalt be a witness for him unto all men of what thou hast seen and heard." Having thus claimed, according to his wont, the character of a simple instrument and witness, St. Paul goes on to describe another revelation of which we read nothing elsewhere. He had been accused of being an enemy to the Temple. He relates that after the visit to Damascus he went up again to Jerusalem, and was praying once in the Temple itself, till he fell into a trance. Then he saw the Lord, and was bidden to leave Jerusalem quickly, because the people there would not receive his testimony concerning Jesus. His own impulse was to stay at Jerusalem, and he pleaded with the Lord that there it was well known how he had persecuted those of whom he was now one,—implying, it would appear, that at Jerusalem his testimony was likely to be more impressive and irresistible than elsewhere; but the Lord answered with a simple command, "Depart: for I will send thee far hence unto the Gentiles."

Until this hated word, of a mission to the Gentiles, had been spoken, the Jews had listened to the speaker. They could bear the name of the Nazarene, though they despised it; but the thought of that free declaration of God's grace to the Gentiles, of which Paul was known to be the herald, stung them to fury. Jewish pride was in that generation becoming hardened and embittered to the utmost; and this was the enemy which St. Paul had come to encounter in its stronghold. "Away with such a fellow from the earth," the multitude now shouted: "it is not fit that he should live." The Roman commander, seeing the tumult that arose, might well conclude that St. Paul had committed some heinous offence; and carrying him off, he gave orders that he should be forced by scourging to confess his crime. Again the Apostle took advantage of his Roman citizenship to protect himself from such an outrage. To the rights of that citizenship, he, a free-born Roman, had a better title than the chief captain himself; and if he had chosen to assert it before, he might have saved himself from the indignity of being manacled.

The Roman officer was bound to protect a citizen, and to suppress tumult; but it was also a part of his policy to treat with deference the religion and the customs of the country. St. Paul's present history is the resultant of these two principles. The chief captain set him free from bonds, but on the next day called together the chief priests and the Sanhedrim, and brought Paul as a prisoner before them. We need not suppose that this was a regular legal proceeding: it was probably an experiment of policy and courtesy. If, on the one hand, the commandant of the garrison had no power to convoke the Sanhedrim; on the other hand he would not give up a Roman citizen to their judgment. As it was, the affair ended in confusion, and with no semblance of a judicial termination. The incidents selected by St. Luke from the history of this meeting form striking points in the biography of St. Paul, but they are not easy to understand. The difficulties arising here, not out of a comparison of two independent narratives, but out of a single narrative which must at least have appeared consistent and intelligible to the writer himself, are a warning to the student not to draw unfavourable inferences from all apparent discrepancies.—St. Paul appears to have been put upon his defence, and with the peculiar habit, mentioned elsewhere also (Acts xiii. 46), of looking steadily when about to speak (Acts xv. 7), he began to say "Men and brethren, I have

lived in all good conscience (or, to give *καταλήπειμαι*, I have lived a certain life) unto God, until this day." The Priest Ananias commanded those that to smite him on the mouth. With a nation, Paul exclaimed: "God shall thou whited wall: for sittest thou to the law, and commandest me to be smitten to the law?" The bystanders said, "God's High-Priest?" Paul answereth not, brethren, that he was the High-Priest written, Thou shalt not speak evil of thy people." The evidence furnishes an apology, of St. Paul's respect both for the high priesthood, was probably relating the outburst which it follows the writer thought that outburst only does not appear. St. Jerome (and quoted by Baur) draws an analogy between the vehemence of the Apostle's meekness of his Master; and he is false critics, as amongst others De Wette. But it is to be remembered that he was a lamb to the slaughter, was the cry of "whited sepulchres," and exclaimed, ye generation of vipers, how do the damnation of hell?" It is to be remembered, therefore, that St. Paul would have been a follower of Jesus if he had held his in Ananias's lawless outrage. But what answer mean? How was it possible for him to know that he who spoke was the High-Priest? Why should he have been less willing to smite an iniquitous High Priest than any other in the Sanhedrim, "sitting to judge by the Law?" These are difficult questions. It is not likely that Ananias was known to St. Paul; still less so, that the Priest was not distinguished by dress from the other members of the Sanhedrim. Objectionable solutions seem to be that he was a senator, or other,—either because he was a good, or because he was a bad man, or because he did not know whose voice it was that called him to be smitten; and that he was a man of such impression which he saw was made upon the audience by his threatening posture, and therefore took advantage of the fact that he did not know the speaker to be the High-Priest, to plain the deference he felt to the High-Priest in holding that office. The next history which Luke records seems to settle, who must have been the Apostle as remaining still a Jew, if only a shadow upon his conscience. He protested, saying that the council was divided into two parties, Sadducees and Pharisees, and therefore he said, "Men and brethren, I am a Pharisee, and a son of Pharisee; concerning the hope and resurrection of the dead I am called in question." The question whether so intended or not, had the question up the party spirit of the assembly, and that a fierce discussion arose, and when the Pharisees actually took Paul's side, saying, "We find no evil in this man; suppose a question has spoken to him?"—These who were the Pharisees, the authenticity of the Acts point to the fact that the Apostle is to be blamed for a generous artifice. But it is not to be said that Paul was using an artifice at all of his own interest, in identifying himself with the professions of the Pharisees. He was

to escape out of the way of danger, course he took on this occasion the life he had chosen. Two objects, we must regard as dearer to him than his life: (1) to whom God had raised from the dead, and (2) that in so doing he was a faithful witness. He may well have thought that both might be promoted by an appeal to the professions of the Pharisees. The *creed* he was distinguished from that of the Sadducees, unquestionably the creed of St. Paul. Jesus seemed to him to supply the fulfilment of that creed. He wished to show the Pharisees into a deeper and more consistent view of their own faith.

Such a result was in any degree attained, however: the immediate consequence of the speech occurred in the assembly was that Paul was to be torn in pieces, and was carried man soldiers. In the night he had a vision (xviii. 9, 10) and on the morning (xviii. 23, 24), of the Lord stood and encouraging him. "Be of good cheer, said his Master; "for as thou hast testified in Jerusalem, so must thou bear witness at Rome." It was not safety that he desired, but opportunity to bear witness

to the factious support which Paul had in the manner of bearing witness in the way as soon as the meeting was dissolved the next day a conspiracy was formed. A Jewish Pharisean relates with a singular fulness of detail more than forty of the Jews bound themselves to a curse neither to eat nor to drink with Paul. Their plan was, to kill him.

Roman commandant to send down Paul to the council, and then to set upon him and kill him. This conspiracy was in some way to a nephew of St. Paul's son, who was allowed to see his father from him of it, and by his desire was the captain, who was thus put on his guard. This discovery lulled the plot, and it is to be feared that they oblige Paul from their vow. The consilium. St. Paul was that he was hurried away from Jerusalem. The chief captain, Claudius Lysias, sent him to Caesarea, to Felix, the procurator, of Judaea. He there in charge of a strong guard of soldiers, and by night as far as Antipatris. From there a detachment conveyed him to Caesarea, they delivered up their prisoner into the hands of the governor, together with a letter, in which Claudius Lysias had explained to Felix his ending Paul, and had announced that would follow. Felix, St. Luke tells us, a peculiarity which marks this portion of the Acts, asked of what province the prisoner was. He told that he was of Cilicia, he gave him a hearing when his accusers were present. In the meantime he ordered him to be kept in custody, probably, to a soldier,—in a prison-house, which had been the palace of the Great High Priest.

*Paul at Caesarea.*—St. Paul was henceforth in the hands of the period embraced in the Acts to the end of his life, in Roman custody was in fact a protection to him, which he would have fallen a victim to the fury of the Jews. He seems to have

been treated throughout with humanity and consideration. His own attitude towards Roman magistrates was invariably that of a respectful but independent citizen; and whilst his franchise secured him from open injustice, his character and conduct could not fail to win him the goodwill of those into whose hands he came. The governor before whom he was now to be tried, according to Tacitus and Josephus, was a mean and dissolute tyrant. [FELIX.] "Per omnem saevitiam ac libidinem jus regium servili ingenio exercuit" (Tacitus, *Hist.* v. 9). But these characteristics, except perhaps the servile *ingenium*, do not appear in our history. The orator or counsel retained by the Jews and brought down by Ananias and the elders, when they arrived in the course of five days at Caesarea, begins the proceedings of the trial professionally by complimenting the governor. The charge he goes on to set forth against Paul shows precisely the light in which he was regarded by the fanatical Jews. He is a pestilent fellow (*λοιμώδης*); he stirs up divisions amongst the Jews throughout the world; he is a ringleader of the sect (*αἰρέσεως*) of the Nazarenes. His last offence had been an attempt to profane the Temple. St. Paul met the charge in his usual manner. He was glad that his judge had been for some years governor of a Jewish province; "because it is in thy power to ascertain that, not more than twelve days since, I came up to Jerusalem to worship." The emphasis is upon his coming up to worship. He denied positively the charges of stirring up strife and of profaning the Temple. But he admitted that "after the way (*τῆς ὁδοῦ*) which they call a sect, or a heresy,"—so he worshipped the God of his fathers, believing all things written in the law and in the prophets. Again he gave prominence to the hope of a resurrection, which he held, as he said, in common with his accusers. His loyalty to the faith of his fathers he had shown by coming up to Jerusalem expressly to bring alms for his nation and offerings, and by undertaking the ceremonies of purification in the Temple. What fault then could any Jew possibly find in him?—The Apostle's answer was straightforward and complete. He had not violated the law of his fathers; he was still a true and loyal Israelite. Felix, it appears, knew a good deal about "the way" (*τῆς ὁδοῦ*), as well as about the customs of the Jews, and was probably satisfied that St. Paul's account was a true one. He made an excuse for putting off the matter, and gave orders that the prisoner should be treated with indulgence, and that his friends should be allowed free access to him. After a while, Felix heard him again. His wife Drusilla was a Jewess, and they were both curious to hear the eminent preacher of the new faith in Christ. But St. Paul was not a man to entertain an idle curiosity. He began to reason concerning righteousness, temperance, and the coming judgment, in a manner which alarmed Felix and caused him to put an end to the conference. He frequently saw him afterwards, however, and allowed him to understand that a bribe would procure his release. But St. Paul would not resort to this method of escape, and he remained in custody until Felix left the province. The unprincipled governor had good reason to seek to ingratiate himself with the Jews; and to please them, he handed over Paul, as an untried prisoner, to his successor Festus.

At this point, as we shall see hereafter, the story of St. Paul comes into its chronological order. Festus, like

in secular history, and he bears a much better character. Upon his arrival in the province, he went up without delay from Caesarea to Jerusalem, and the leading Jews seized the opportunity of asking that Paul might be brought up there for trial, intending to assassinate him by the way. But Festus would not comply with their request. He invited them to follow him on his speedy return to Caesarea, and a trial took place there, closely resembling that before Felix. Festus saw clearly enough that Paul had committed no offence against the law, but he was anxious at the same time, if he could, to please the Jews. "They had certain questions against him," Festus says to Agrippa, "of their own superstition (or religion), and of one Jesus, who was dead, whom Paul affirmed to be alive. And being puzzled for my part as to such inquiries, I asked him whether he would go to Jerusalem to be tried there." This proposal, not a very likely one to be accepted, was the occasion of St. Paul's appeal to Caesar. In dignified and independent language he claimed his rights as a Roman citizen. We can scarcely doubt that the prospect of being forwarded by this means to Rome, the goal of all his desires, presented itself to him and drew him onwards, as he virtually protested against the indecision and impotence of the provincial governor, and exclaimed, I appeal unto Caesar. Having heard this appeal, Festus consulted with his assessors, found that there was no impediment in the way of its prosecution, and then replied, "Hast thou appealed to Caesar? To Caesar thou shalt go."

Properly speaking, an appeal was made *from the sentence of an inferior court to the jurisdiction of a higher*. But in St. Paul's case no sentence had been pronounced. We must understand, therefore, by his appeal, a demand to be tried by the imperial court, and we must suppose that a Roman citizen had the right of electing whether he would be tried in the province or at Rome. [APPEAL.]

The appeal having been allowed, Festus reflected that he must send with the prisoner a report of "the crimes laid against him." And he found that it was no easy matter to put the complaints of the Jews in a form which would be intelligible at Rome. He therefore took advantage of an opportunity which offered itself in a few days to seek some help in the matter. The Jewish prince Agrippa arrived with his sister Berenice on a visit to the new governor. To him Festus communicated his perplexity, together with an account of what had occurred before him in the case. Agrippa, who must have known something of the sect of the Nazarenes, and had probably heard of Paul himself, expressed a desire to hear him speak. The Apostle therefore was now called upon to hear the cause of his Master "before Gentiles, and kings." The audience which assembled to hear him was the most dignified which he had yet addressed, and the state and ceremony of the scene proved that he was regarded as no vulgar criminal. Festus, when Paul had been brought into the council-chamber, explained to Agrippa and the rest of the company the difficulty in which he found himself, and then expressly referred the matter to the better knowledge of the Jewish king. Paul therefore was to give an account of himself to Agrippa; and when he had received from him a courteous permission to begin, he stretched forth his hand and made his defence.

In this discourse (*Acts xvi.*), we have the second explanation from St. Paul himself of the manner in which he had been led, through his Conversion, to

serve the Lord Jesus instead of persecuting His disciples; and the third narrative of the Conversion itself. Speaking to Agrippa as to one thoroughly versed in the customs and questions prevailing amongst the Jews, Paul appeals to the well-known Jewish and even Pharisaical strictness of his youth and early manhood. He reminds the king of the great hope which sustained continually the weak of the Jewish nation,—the hope of a deliverer, promised by God Himself, who should be a conqueror of death. He had been led to see that this promise was fulfilled in Jesus of Nazareth; he proclaimed His resurrection to be the pledge of a new and immortal life. What was there in this of dereliction to the traditions of his fathers?—Did his countrymen disbelieve in this Jesus as the Messiah? he had he once disbelieved in Him; and had thought it his duty to be earnest in hostility against His name. But his eyes had been opened; he would tell how and when. The story of the Conversion is told in this address as we might fairly expect it to be. We have seen that there is no absolute contradiction between the statements of this and the other narratives. The main points,—the light, the prostration, the voice from heaven, the instructions from Jesus,—are found in all three. But in this account the words, "I am Jesus whom thou persecutest," are followed by a fuller explanation, as if the spoken by the Lord, of what the work of the Apostle was to be. The other accounts *dear* no explanation to a subsequent occasion. But when we consider how fully the mysterious communication made at the moment of the Conversion *is* what was afterwards conveyed, through dreams and in other ways, to the mind of Paul; and how needless it was for Paul, in his present address before Agrippa, to mark the stages by which the whole lesson was taught, it seems *imply* to base upon the method of this account a charge of disagreement between the different parts of the history. They bear, on the contrary, a striking mark of genuineness in the degree in which they approach contradiction without reaching it. It is most natural that a story told on different occasions should be told differently; and if in such a case we find a contradiction as to the facts, we gain all the truer impression of the substantial truth of the story. The particulars added to the former accounts by the present narrative are, that the words of Jesus were spoken in Hebrew, and that the first question to Saul was followed by the saying, "It is hard for thee to kick against the goads." [This saying is omitted by the best authorities in the last chapter.] The language of the commission which St. Paul now received from Jesus deserves close study, and will be found to bear a striking resemblance to a passage in Colossians (i. 12-14). The ideas of light, redemption, forgiveness, inheritance, and death in Christ, belong characteristically to the Gospel which Paul preached amongst the Gentiles. Not less striking is it to observe the older terms in which he describes to Agrippa his obedience to the heavenly rank. He had made it his business, he says, to proclaim to all men "that they should repent and turn to God, and do works meet for repentance." Words such as John the Baptist uttered, but not now truly Pauline. And he finally reiterates that the testimony on account of which the Jews sought to kill him was in exact agreement with Moses and the prophets. They had taught men to expect that the Christ should suffer, and that He should be the first that should rise from the dead, and should desc

people and to the Gentiles. Or such was the servant and preacher.\*

At Festus began to apprehend what was a manifest absurdity. He inter-  
sle discourteously, but with a com-  
ed in his loud remonstrance. "Thou  
; thy much learning is turning thee  
rase τὰ πολλὰ γράμματα may pos-  
suggested by the allusion to Moses  
ets; but it probably refers to the

the articles in this Dictionary of the names of  
places and the nautical terms which occur in the  
narrative.

The centurion and his prisoners, amongst whom  
Aristarchus (Col. iv. 10) is named, embarked at  
Caesarea on board a ship of Adramyttium, and set  
sail for the coast of Asia. On the next day they  
touched at Sidon, and Julius began a course of  
kindly and respectful treatment by allowing Paul  
to go on shore to visit his friends. The westerly  
winds still usual at the time of year (late in the  
summer) compelled the vessel to run northwards  
under the lee of Cyprus. Off the coast of Cilicia  
and Pamphylia they would find northerly winds,  
which enabled them to reach Myra in Lycia. Here  
the voyagers were put on board another ship, which  
was come from Alexandria and was bound for Italy.  
In this vessel they worked slowly to windward,  
keeping near the coast of Asia Minor, till they came  
over against Cnidus. The wind being still coun-  
trary, the only course was now to run southwards,  
under the lee of Crete, passing the headland of  
Salmone. They then gained the advantage of a  
weather shore, and worked along the coast of Crete  
as far as Cape Matla, near which they took refuge  
in a harbour called Fair Havens, identified with  
one bearing the same name to this day.

It became now a serious question what course  
should be taken. It was late in the year for the  
navigation of those days. The first of the day of  
expiation (Lev. xxiii. 27-29), answering to the au-  
tumnal equinox, was past, and St. Paul gave it as  
his advice that they should winter where they were.  
But the master and the owner of the ship were  
willing to run the risk of seeking a more com-  
modious harbour, and the centurion followed their  
judgment. It was resolved, with the concurrence  
of the majority, to make for a harbour called  
Phoenix, sheltered from the S.W. winds, as well as  
from the N.W. (The phrase βαίνοντα κατὰ  
ἀλβαν is rendered either "looking down the S.W."  
[Smith and Alford], or "looking towards the  
S.W." when observed from the sea and towards  
the land enclosing it [Howson].) A change of  
wind occurred which favoured the plan, and by  
the aid of a light breeze from the south they were  
sailing towards Phoenix (now Lutro), when a vio-  
lent N.E. wind [EUROCLYDON] came down from  
the land (κατ' ἀντήν, scil. Κρήνην), caught the  
vessel, and compelled them to let her drive before  
the wind. In this course they arrived under the  
lee of a small island called Claudia, about 20 miles  
from Crete, where they took advantage of com-  
paratively smooth water to get the boat on board,  
and to undergird, or fiap, the ship. There was a  
fear lest they should be driven upon the Syrtis on  
the coast of Africa, and they therefore "lowered  
the gear," or sent down upon deck the gear con-  
nected with the fair-weather sails, and stood out to  
sea "with storm-sails set and on the starboard  
tack" (Smith). The bad weather continued, and  
the ship was lightened on the next day of her  
cargo, on the third of her loose furniture and  
tackling. For many days neither sun nor stars  
were visible to steer by, the storm was violent, and  
all began to despair of safety. The general dis-  
couragement was aggravated by the abstinence

and the prophets" (Luther's Table Talk, ccccxxviii., Engl.  
Trans.). Another striking remark of Luther's may be  
added here: "Whoso reads Paul many, with a safe con-  
science, build upon his words" (Table Talk, xxli.).

caused by the difficulty of preparing food, and the spoiling of it; and in order to raise the spirits of the whole company Paul stood forth one morning to relate a vision which had occurred to him in the night. An angel of the God "whose he was and whom he served" had appeared to him and said, "Fear not, Paul: thou must be brought before Caesar; and behold, God hath given thee all them that sail with thee." At the same time he predicted that the vessel would be cast upon an island and be lost.

This shipwreck was to happen speedily. On the fourteenth night, as they were drifting through the sea [ADRIA], about midnight, the sailors perceived indications, probably the roar of breakers, that land was near. Their suspicion was confirmed by soundings. They therefore cast four anchors out of the stern, and waited anxiously for daylight. After a while the sailors lowered the boat with the professed purpose of laying out anchors from the bow, but intending to desert the ship, which was in imminent danger of being dashed to pieces. St. Paul, aware of their intentions, informed the centurion and the soldiers of it, who took care, by cutting the ropes of the boat, to prevent its being carried out. He then addressed himself to the task of encouraging the whole company, assuring them that their lives would be preserved, and exhorting them to refresh themselves quietly after their long abstinence with a good meal. He set the example himself, taking bread, giving thanks to God, and beginning to eat in presence of them all. After a general meal, in which there were 276 persons to partake, they further lightened the ship by casting out what remained of the provisions on board (*τὸν σίτον* is commonly understood to be the "wheat" which formed the cargo, but the other interpretation seems more probable). When the light of the dawn revealed the land, they did not recognize it, but they discovered a creek with a smooth beach, and determined to run the ship aground in it. So they cut away the anchors, unloosed the rudder-paddles, raised the foresail to the wind, and made for the beach. When they came close to it they found a narrow channel between the land on one side, which proved to be an islet, and the shore; and at this point, where the "two seas met," they succeeded in driving the fore part of the vessel fast into the clayey beach. The stern began at once to go to pieces under the action of the breakers; but escape was now within reach. The soldiers suggested to their commander that the prisoners should be effectually prevented from gaining their liberty by being killed; but the centurion, desiring to save Paul, stopped this proposition, and gave orders that those who could swim should cast themselves first into the sea and get to land, and that the rest should follow with the aid of such spars as might be available. By this creditable combination of humanity and discipline the deliverance was made as complete as St. Paul's assurances had predicted it would be.

The land on which they had been cast was found to belong to Malta. [MELITA.] The very point of the stranding is made out with great probability by Mr. Smith. The inhabitants of the island received the wet and exhausted voyagers with no ordinary kindness, and immediately lighted a fire to warm them. This particular kindness is recorded on account of a curious incident connected with it. The Apostle was helping to make the fire, and had gathered a bundle of sticks and laid

them on the fire, when a viper came on heat, and fastened on his hand. When he saw the creature hanging from his hand, he believed him to be poisoned by the bite, amongst themselves, "No doubt this man, whoever, whom, though he has escaped from yet Vengeance suffers not to live." But he saw that no harm came of it they shook minds and said that he was a god. This stance, as well as the honour in which he by Julius, would account for St. Paul being with some others to stay at the house of a man of the island, whose name was Publius. him they were courteously entertained 1 days. The father of Publius happened to fever and dysentery, and was healed by it and when this was known many other ones were brought to him and were healed. It was a pleasant interchange of kindnesses and The people of the island showed the Apostle his company much honour, and when he about to leave loaded them with such things they would want. The Roman soldiers went with them to Rome a desperate impudible character and the powers of the Kingdom of Paul was the herald.

After a three months' stay in Malta and their prisoners left in an Alexandrian ship. They touched at Syracuse, and stayed three days, and at Rhegium. There place they were carried with a fair wind to Sicily where they left their ship and the sea. At Rhegium they found "brethren," for it was a Christian place, and especially a chief post in the trade between Alexandria and Rome; and by the time they were exhorted to stay awhile till the mission seems to have been granted by the centurion; and whilst they were speaking of the matter at Puteoli news of the Apostle's arrival came on to Rome. The Christian at Rome, in part, sent forth some of their number to meet St. Paul at Appii Forum and Janiculum. On this first introduction to the Romans the Apostle felt that his long journey had not been in vain. "He thanked God and took courage."

St. Paul at Rome.—On this arrival at Rome the centurion delivered up his prisoner to the proper custody, that of the praetorian palace. He was at once treated with great consideration, and was allowed to dwell by himself with the soldiers who guarded him. He was not subject to the galling annoyance of being numbered, chained, or kept in a cage; but every indulgent consideration necessary restraint was made to be observed. He was now therefore free "to preach the Gospel to them that were at Rome also," and without delay to set upon his journey to Rome. He invited the chief priests to come to him, and explained to them that though he was brought to Rome to answer a charge made against him by the Jews in Palestine, he really done nothing disloyal to the Roman Law, nor desired to be considered as a traitor or fellow-countryman. On the contrary, he was in custody for maintaining that "the law of God had been fulfilled. The Roman law was not to be broken, they had received no tidings to be broken, the sect of which he had implied he was a member they knew to be everywhere spread, and they were willing to hear what he had to say. It has been thought strange that such a man should be taken towards the town of Rome."

where a flourishing branch of the Gospel for some years; and an argument drawn from this representation of the authenticity of the Acts. But it may be supposed that they had been there without violence from what we may probably conjecture. (1.) The Church consisted mainly of Gentiles, so that it is not surprising that they had been the most part Jewish proselytes. Jews at Rome had been persecuted entirely banished, and their unsettled condition checked the contact and collision which would have been otherwise likely. (3.) St. Paul, well known by name to the Roman authorities, may have persuaded them to leave him if he were not known to them, for his courteous bearing and his firmness of adhesion to the faith of his mission won a hearing from them. A day was appointed, on which a large number gathered to hear him expound his belief; and till evening he bore witness of the Gospel, persuading them concerning Jesus, the Law of Moses and out of the presence of the Apostles of the Gentiles had not yet adopted the original Apostolic method. The hope still his subject. But, as of old, the message by the Jews was not that they were slow of heart to believe, at Paphlagonian Antioch. The judgment of Isaiah was come, Paul testified, upon them; they had made themselves blind and hard of heart. The Gospel must be preached to the Gentiles, amongst whom it would welcome. He turned therefore again to his work, and for two years he dwelt in his house, and received all who came to him, teaching the kingdom of God and teaching the Lord Jesus Christ, with all counsel forbidding him.

In the last words of the Acts. This hindrance of the kingdom of Christ brings us down to the time when the Gospel was proclaimed by the great Apostle in the capital, and stops short of the mighty work which was shortly to pronounce that kingdom as the Divine commonwealth for all men.

He was not to live through the time of the Temple, and in the throes of the New Testament; the most significant part of his work was when in the Imperial City he had his Gospel preached to the Jew first, and also to the Gentile.

But his career is not abruptly closed. It is not as if he faded out of our sight in the ecclesiastical tradition, we have letters in his own hand, which contribute some part to the external biography, and give us a more intimate insight into his convictions and

*the Later Epistles.*—We might naturally say that St. Paul, tied down to one spot at last, was free to speak and write to whom he pleased. He poured out in Letters his love and his thoughts to the distant Churches. It seems entirely probable that the author of the extant Epistles is the very many which are not extant. It is, perhaps, a little in the direction to contemplate St. Paul's Epistles as a whole. It is difficult enough to connect the writing of these Epistles with the

external conditions of a human life; to think of Paul, with his incessant chain and soldier, sitting down to write or dictate, and producing for the world an inspired Epistle. But it is almost more difficult, to imagine the Christian communities of those days, samples of the population of Macedonia or Asia Minor, receiving and reading such Letters. But the Letters were actually written; and they must of necessity be accepted as representing the kind of communications which marked the intercourse of the Apostle and his fellow-Christians. When he wrote, he wrote out of the fullness of his heart; and the ideas on which he dwelt were those of his daily and hourly thoughts. To that imprisonment to which St. Luke has introduced us,—the imprisonment which lasted for such a tedious time, though tempered by much indulgence,—belongs the noble group of Letters to Philemon, to the Colossians, to the Ephesians, and to the Philippians. The three former of these were written at one time and sent by the same messengers. Whether that to the Philippians was written before or after these, we cannot determine; but the tone of it seems to imply that a crisis was approaching, and therefore it is commonly regarded as the latest of the four.

St. Paul had not himself founded the Church at Colossae. But during his imprisonment at Rome he had for an associate—he calls him a “fellow-prisoner” (Philemon 23)—a chief teacher of the Colossian Church named Epaphras. He had thus become deeply interested in the condition of that Church. It happened that at the same time a slave named Onesimus came within the reach of St. Paul's teaching, and was converted into a zealous and useful Christian. This Onesimus had run away from his master; and his master was a Christian of Colossae. St. Paul determined to send back Onesimus to his master; and with him he determined also to send his old companion Tychicus (Acts xx. 4), as a messenger to the Church at Colossae and to neighbouring Churches. This was the occasion of the letter to Philemon, which commended Onesimus, in language of singular tenderness and delicacy, as a faithful and beloved brother, to his injured master; and also of the two letters to the Colossians and Ephesians. That to the Colossians, being drawn forth by the most special circumstances, may be reasonably supposed to have been written first. It was intended to guard the Church at Colossae from false teaching, which the Apostle knew to be infesting it. For the characteristics of this Epistle, we must refer to the special article. [COLOSSIANS, EPISTLE TO THE.] The end of it (iv. 7-18) names several friends who were with St. Paul at Rome, as Aristarchus, Marcus (St. Mark), Epaphras, Luke, and Demas. For the writing of the Epistle to the Ephesians, there seems to have been no more special occasion, than that Tychicus was passing through Ephesus. [EPHESIANS, EPISTLE TO THE.] The highest characteristic which these two Epistles, to the Colossians and Ephesians, have in common, is that of a presentation of the Lord Jesus Christ, fuller and clearer than we find in previous writings, as the Head of creation and of mankind. All things created through Christ, all things coherent in Him, all things reconciled to the Father by Him, the eternal purpose to restore and complete all things in Him,—such are the ideas which grew richer and more distinct in the mind of the Apostle as he meditated on the Gospel which he had been preaching, and the truths implied in it. In the Epistle to the Colossians this Divine Headship of Christ is unde-

tained as the safeguard against the fancies which filled the heavens with secondary divinites, and which laid down rules for an artificial sanctity of men upon the earth. In the Epistle to the Ephesians the eternity and universality of God's redeeming purpose in Christ, and the gathering of men unto Him as His members, are set forth as gloriously revealed in the Gospel. In both, the application of the truth concerning Christ as the Image of God and the Head of men to the common relations of human life is dwelt upon in detail.

The Epistle to the Philippians resembles the Second to the Corinthians in the effusion of personal feeling, but differs from it in the absence of all soreness. The Christians at Philippi had regarded the Apostle with love and reverence from the beginning, and had given him many proofs of their affection. They had now sent him a contribution towards his maintenance at Rome, such as we must suppose him to have received from time to time for the expenses of "his own hired house." The bearer of this contribution was Epaphroditus, an ardent friend and fellow-labourer of St. Paul, who had fallen sick on the journey or at Rome (Phil. ii. 27). The Epistle was written to be conveyed by Epaphroditus on his return, and to express the joy with which St. Paul had received the kindness of the Philippians. He dwells therefore upon their fellowship in the work of spreading the Gospel, a work in which he was even now labouring, and scarcely with the less effect on account of his bonds. His imprisonment had made him known, and had given him fruitful opportunities of declaring his Gospel amongst the Imperial guard (i. 13), and even in the household of the Caesar (iv. 22). He professes his undiminished sense of the glory of following Christ, and his expectation of an approaching time in which the Lord Jesus should be revealed from heaven as a deliverer. There is a *gracious* tone running through this Epistle, expressive of humility, devotion, kindness, delight in all things fair and good, to which the favourable circumstances under which it was written gave a natural occasion, and which helps us to understand the kind of ripening which had taken place in the spirit of the writer. [PHILIPPIANS, EPISTLE TO THE.]

In this Epistle St. Paul twice expresses a confident hope that before long he may be able to visit the Philippians in person (i. 25, *οἷδα κ.τ.λ.* ii. 24, *πρόσθετα κ.τ.λ.*). Whether this hope was fulfilled or not, belongs to a question which now presents itself to us, and which has been the occasion of much controversy. According to the general opinion, the Apostle was liberated from his imprisonment and left Rome, soon after the writing of the letter to the Philippians, spent some time in visits to Greece, Asia Minor, and Spain, returned again as a prisoner to Rome, and was put to death there. In opposition to this view it is maintained by some, that he was never liberated, but was put to death at Rome at an earlier period than is commonly supposed. The arguments adduced in favour of the common view are, (1.) the hopes expressed by St. Paul of visiting Philippi (already named) and Colossae (Philemon 22); (2.) a number of allusions in the Pastoral Epistles, and their general character; and (3.) the testimony of ecclesiastical tradition. The arguments in favour of the single imprisonment appear to be wholly negative, and to aim simply at showing that there is no proof of a liberation, or departure from Rome. It is contended that St. Paul's expectations were not always realized, and

that the passages from Philemon and Philippians are effectually neutralized by Acts xx. 25, "I know that ye all (at Ephesus), shall see my face no more;" inasmuch as the supporters of the ordinary view hold that St. Paul went again to Ephesus. This is a fair answer. The argument from the Pastoral Epistles is met most simply by a denial of their genuineness. The tradition of ecclesiastical antiquity is affirmed to have no real weight.

The decision must turn mainly upon the view taken of the Pastoral Epistles. It is true that there are many critics, including Wieseler and Dr. Davidson, who admit the genuineness of these Epistles, and yet, by referring 1 Timothy and Titus to an earlier period, and by strained explanations of the allusions in 2 Timothy, get rid of the evidence they are generally understood to give in favour of a second imprisonment. The voyages required by the two former Epistles, and the writing of them, are placed within the three years spent chiefly at Ephesus (Acts xx. 31). But the hypothesis of voyages during that period not recorded by St. Luke is just as arbitrary as that of a release from Rome, which is objected to expressly because it is arbitrary; and such a distribution of the Pastoral Epistles is shown by overwhelming evidence to be untenable. The whole question is discussed in a masterly and decisive manner by Alford in his *Prolegomena* to the Pastoral Epistles. If, however, these Epistles are not accepted as genuine, the main ground for the belief in a second imprisonment is cut away. For a special consideration of the Epistles, let the reader refer to the articles on TIMOTHY and TITUS.

The difficulties which have induced such critics as De Wette and Ewald to reject these Epistles, are not inconsiderable, and will force themselves upon the attention of the careful student of St. Paul. But they are overpowered by the much greater difficulties attending any hypothesis which assumes these Epistles to be spurious. We are obliged therefore to recognize the modifications of St. Paul's style, the developments in the history of the Church, and the movements of various persons, which have appeared suspicious in the Epistles to Timothy and Titus, as nevertheless historically true. And then without encroaching on the domain of conjecture, we draw the following conclusions. (1.) St. Paul must have left Rome, and visited Asia Minor and Greece; for he says to Timothy (1 Tim. i. 3), "I besought thee to abide still at Ephesus, when I was setting out for Macedonia." After being once at Ephesus, he was purposing to go there again (1 Tim. iv. 13), and he spent a considerable time at Ephesus (2 Tim. i. 18). (2.) He paid a visit to Crete, and left Titus to organize Churches there (Titus i. 5). He was intending to spend a winter at one of the places named Nicopolis (Tit. iii. 12). (3.) He travelled by Miletus (2 Tim. iv. 20), Troas (2 Tim. iv. 13), where he left a cloak or case, and some books, and Corinth (2 Tim. iv. 20). (4.) He is a prisoner at Rome, "suffering unto bonds as an evildoer" (2 Tim. ii. 9), and expecting to be soon condemned to death (2 Tim. iv. 6). At this time he felt deserted and solitary, having only Luke of his old associates, to keep him company; and he was very anxious that Timothy should come to him without delay from Ephesus, and bring Mark with him (2 Tim. i. 15, iv. 16, 9-12).

These facts may be amplified by probable additions from conjecture and tradition. There are strong reasons for placing the three Epistles at an advanced date as possible, and not far from the

The peculiarities of style and diction by these are distinguished from all his former the affectionate anxieties of an old man and are frequently thrown back on earlier times, the disposition to be hortatory rather than descriptive, the references to a more complete and organization of the Church, the signs of a tendency to moral corruption, and resembling as described in the apocalyptic letters to the churches—would incline us to adopt the date which has been suggested for the death of Paul, so as to interpose as much time as possible between the Pastoral Epistles and the former.

Now the earliest authorities for the date of Paul's death are Eusebius and Jerome, who place it (Chronic. Ann. 2083) in the 13th, the *Int. Script. Eccl.* "Paulus") in the 14th Nero. These dates would allow some four years between the First Imprisonment and the death. During these years, according to the belief of the early Church, St. Paul accomplished his old design (Rom. xv. 28) and visited Ewald, who denies the genuineness of the

Epistles, and with it the journeyings in Asia Minor, believes that St. Paul was in Spain and paid this visit to Spain (*Geschichte*, 621, 631, 632); yielding upon this point testimony of tradition. The first writer in support of the journey to Spain is Ewald, whose evidence would indeed be irresistible, language in which it is expressed were clear. Clement of Rome, in a hortatory or rhetorical passage (*Ep. 1 ad Cor.* c. 5) of St. Paul as an example of patience, and that he preached *ἐν τῇ ἀνατολῇ καὶ δυσεί*, and that before his martyrdom he *ἦλθεν ἐπὶ τὸ τέρμα τῆς δυσείας*. It is probable, hardly to be said to be certain, that by this on "the goal of the west," Clement was de-

Spain, or some country yet more to the west. The next testimony labours under a somewhat similar difficulty from the imperfection of the text, it at least names unambiguously a "prophet Paulus ab urbe ad Spaniam proficiscentis." from Muratori's Fragment on the Canon (*Rel. Sac.* iv. p. 1-12). (See the passage and discussed in Wieseler, *Chron. Apost.* 106, &c., or Alford, iii. p. 93.) Afterwards Clement says simply, *Μετὰ τὸ γένεσθαι ἐν Ἰαλίᾳ εἰς τὴν Σπανίαν ἀπῆλθεν* (on 2 Tim.

and Jerome speaks of St. Paul as set free that he might preach the Gospel of Christ *in gentibus quoque partibus* (*Int. Script. Eccl.* "Paulus"). Against these assertions nothing is said, except the absence of allusions to a journey to Spain in passages from some of the fathers in which allusions might more or less be expected. Ewald (*Introd. New Test.* iii. 15, 84) gives a list of critics who believe in St. Paul's release from the first imprisonment. Wieseler (p. 106) mentions some of these, with references, and among them some of the more eminent German critics who believe in but one imprisonment. These are Thümel, Harnack, Winer, and Baur. The name of any weight to be added to this list is that of Dr. Davidson.

To conclude then, that after a wearing imprisonment of two years or more at Rome, St. Paul

was set free, and spent some years in various journeyings eastwards and westwards. Towards the close of this time he pours out the warnings of his less vigorous but still brave and faithful spirit in the Letters to Timothy and Titus. The first to Timothy and that to Titus were evidently written at very nearly the same time. After these were written, he was apprehended again and sent to Rome. As an eminent Christian teacher St. Paul was now in a far more dangerous position than when he was first brought to Rome. The Christians had been exposed to popular odium by the false charge of being concerned in the great Neronian conflagration of the city, and had been subjected to a most cruel persecution. The Apostle appears now to have been treated, not as an honourable state-prisoner, but as a felon (2 Tim. ii. 9). But he was at least allowed to write this Second Letter to his "dearly beloved son" Timothy; and though he expresses a confident expectation of his speedy death, he yet thought it sufficiently probable that it might be delayed for some time, to warrant him in urging Timothy to come to him from Ephesus. Meanwhile, though he felt his isolation, he was not in the least daunted by his danger. He was more than ready to die (iv. 8), and had a sustaining experience of not being deserted by his Lord. Once already, in this second imprisonment, he had appeared before the authorities; and "the Lord then stood by him and strengthened him," and gave him a favourable opportunity for the one thing always nearest to his heart, the public declaration of his Gospel.

This Epistle, surely no unworthy utterance at such an age and in such an hour even of a St. Paul, brings us, it may well be presumed, close to the end of his life. For what remains, we have the concurrent testimony of ecclesiastical antiquity, that he was beheaded at Rome, about the same time that St. Peter was crucified there. The earliest allusion to the death of St. Paul is in that sentence from Clement Romanus, already quoted, *ἐπὶ τὸ τέρμα τῆς δυσείας ἐλθὼν καὶ μαρτυρήσας ἐπὶ τῶν ἡγουμένων, οὕτως ἀπηλλοτρή τοῦ κόσμου*, which just fails of giving us any particulars upon which we can conclusively rely. The next authorities are those quoted by Eusebius in his *H. E.* ii. 25. Donatus, bishop of Corinth (A.D. 170), says that Peter and Paul went to Italy and taught there together, and suffered martyrdom about the same time. This, like most of the statements relating to the death of St. Paul, is mixed up with the tradition, with which we are not here immediately concerned, of the work of St. Peter at Rome. Caius of Rome, supposed to be writing within the 2nd century, names the grave of St. Peter on the Vatican, and that of St. Paul on the Ostian way. Eusebius himself entirely adopts the tradition that St. Paul was beheaded under Nero at Rome. Amongst other early testimonies, we have that of Tertullian, who says (*De Præsc. Hæret.* 36) that at Rome "Petrus passioni Dominicæ adequatur, Paulus Johannis [the Baptist] exitu coronatur;" and that of Jerome (*Int. Sc. Paulus*), "Hic ergo 14<sup>to</sup> Neronis anno (eodem die quo Petrus) Romæ pro Christo capite truncatus sepultusque est, in via Ostiensi." It would be useless to enumerate further testimonies of what is undisputed.

THE EPISTLE TO THE HEBREWS, see the article at head. The close observation of the life of Paul would lead, we think, to the conclusion, that the

thoughts and beliefs of that Epistle, to whomsoever the composition of it be attributed, are by no means alien to the Apostle's habits of mind.

It would also be beyond the scope of this article to attempt to exhibit the traces of St. Paul's Apostolic work in the history of the Church. But there is one indication, so exceptional as to deserve special mention, which shows that the difficulty of understanding the Gospel of St. Paul and of reconciling it with a true Judaism was very early felt. This is in the Apocryphal work called the Clementines (*τὰ Κλημεντῖνα*), supposed to be written before the end of the 2nd century. These curious compositions contain direct assaults (for though the name is not given, the references are plain and undisguised), upon the authority and the character of St. Paul. St. Peter is represented as the true Apostle, of the Gentiles as well as of the Jews, and St. Paul as *ὁ ἐχθρὸς ἀνθρώπων*, who opposes St. Peter and St. James. The portions of the Clementines which illustrate the writer's view of St. Paul will be found in Stanley's *Corinthians* (Introd. to 2 Cor.); and an account of the whole work, with references to the treatises of Schliemann and Baur, in Gieseler, *Eccles. Hist.* i. §58.

*Chronology of St. Paul's Life.*—It is usual to distinguish between the internal or absolute, and the external or relative, chronology of St. Paul's life. The former is that which we have hitherto followed. It remains to mention the points at which the N. T. history of the Apostle comes into contact with the outer history of the world. There are two principal events which serve as fixed dates for determining the Pauline chronology—the death of Herod Agrippa, and the accession of Festus; and of these the latter is by far the more important. The time of this being ascertained, the particulars given in the Acts enable us to date a considerable portion of St. Paul's life. Now it has been proved almost to certainty that Felix was recalled from Judaea and succeeded by Festus in the year 60 (Wieseler, pp. 66, &c.; Conybeare and Howson, ii. note C.). In the autumn, then, of A.D. 60 St. Paul left Caesarea. In the spring of 61 he arrived at Rome. There he lived two years, that is, till the spring of 63, with much freedom in his own hired house. After this we depend upon conjecture; but the Pastoral Epistles give us reasons, as we have seen, for deferring the Apostle's death until 67, with Eusebius, or 68, with Jerome. Similarly we can go backwards from A.D. 60. St. Paul was two years at Caesarea (Acts xiv. 27); therefore he arrived at Jerusalem on his last visit by the Pentecost of 58. Before this he had wintered at Corinth (Acts xx. 2, 3), having gone from Ephesus to Greece. He left Ephesus, then, in the latter part of 57, and as he stayed 3 years at Ephesus (Acts xx. 31), he must have come thither in 54. Previously to this journey he had spent "some time" at Antioch (Acts xviii. 23), and our chronology becomes indeterminate. We can only add together the time of a hasty visit to Jerusalem, the travels of the great second missionary journey, which includes 1½ year at Corinth, another indeterminate stay at Antioch, the important third visit to Jerusalem, another "long" residence at Antioch (Acts xiv. 28), the first missionary journey, again an indeterminate stay at Antioch (Acts xii. 25)—until we come to the second visit to Jerusalem, which nearly synchronised with the death of Herod Agrippa, in A.D. 44 (Wieseler, p. 130). Within this interval of some 10 years the most important date to fix is that of the third visit to Jerusalem; and there is a great concurrence of the best authorities in placing this visit in either 50 or 51.

St. Paul himself (Gal. ii. 1) places this visit 30 years after "either" his conversion or the first visit. In the former case we have 37 or 38 for the date of the conversion. The conversion was followed by 3 years (Gal. i. 18) spent in Arabia and Damascus, and ending with the first visit to Jerusalem; and the space between the first visit (36 or 41) and the second (44 or 45) is filled up by an indeterminate time, presumably 2 or 3 years at Tarsus (Acts ix. 30), and 1 year at Antioch (Acts xi. 26). The date of the martyrdom of Stephen can only be conjectured, and is very variously placed between A.D. 30 and the year of St. Paul's conversion. In the account of the death of Stephen St. Paul is called "a young man" (Acts vi. 5). It is not improbable therefore that he was between A.D. 0 and A.D. 5, so that he might be past 60 years of age when he calls himself "old the aged" in Philemon 9. More detailed conjectures will be found in almost every writer on St. Paul. *Comparative chronological tables* (showing the opinions of 30 and 34 critics) are given in Wieseler and Davidson; tables of events only in Conybeare and Howson, Alford, Jewett, and most others.

#### *Personal Appearance and Character of St. Paul.*

—We have no very trustworthy sources of information as to the personal appearance of St. Paul. Those which we have are referred to and used in Conybeare and Howson (i. ch. 7, end). There are the early pictures and mosaics described by Jameson, and passages from Malala, Socrates, and the apocryphal *Acta Pauli et Theae* concerning which see also Conybeare and Howson (i. 197). They all agree in ascribing to the Apostle a short stature, a long face with high forehead, a aquiline nose, close and prominent eyebrows. The characteristics mentioned are baldness, grey eyes, a clear complexion, and a winning expression. Of his temperament and character St. Paul is called the best painter. His speeches and letters come to us, as we read them, the truest impressions of those qualities which helped to make him the Apostle. We perceive the warmth and nobility of his nature, his deeply affectionate disposition, the tenderness of his sense of honour, the modesty and personal dignity of his bearing, his poetic sensibility, his heroic endurance; we perceive the combination of subtlety, tenacity, and vigour of his intellect; we perceive also a practical sense which we should have associated with a man of his temperament, and a tolerance which is almost alien to such impetuous convictions. And the power which harmonised all these endowments and drew them to a practical end was, beyond all question, knowledge of Jesus Christ in the Divine life. Personal allegiance to Christ as to a living Lord, with a growing insight into the relation of that Lord to each man and to the world, carried the Apostle forwards on a straight course through every multitude of personal fortunes and similar to some habits of thought which he had to overcome. The conviction that he had been entrusted with a mission concerning a Lord and Deliverer of men sustained and purified his love for his own people whilst it created in him such a love for others that he only knew himself as the servant of Christ for Christ's sake.

A remarkable attempt has recently been made by Professor Jewett, in his *Commentary on the Epistles*, to qualify what he considers a blind and indiscriminating admiration of St. Paul.

by representing him as having been, with all his excellences, a man "whose appearance and discourse made an impression of feebleness," "out of harmony with life and nature," a confused thinker, uttering himself "in broken words and hesitating forms of speech, with no beauty or comeliness of style," and so undecided in his Christian belief that he was preaching, in the 14th year after his conversion, a Gospel concerning Christ which he himself, in four years more, confessed to have been carnal. In these paradoxical views, however, Professor Jowett stands almost alone: the result of the freest, as of the most reverent, of the numerous recent studies of St. Paul and his works (amongst which Professor Jowett's own Commentary is one of the most interesting) having been only to add an independent tribute to the ancient admiration of Christendom. Those who judge St. Paul as they would judge any other remarkable man confess him unanimously to have been "one of the greatest spirits of all time;" whilst those who believe him to have been appointed by the Lord of mankind, and inspired by the Holy Ghost, to do a work in the world of almost unequalled importance, are lost in wonder as they study the gifts with which he was endowed for that work, and the sustained devotion with which he gave himself to it.

**Modern Authorities.**—It has not been thought necessary to load the pages of this article with references to the authors about to be mentioned, because in each of them it is easy for the student to turn at once to any part of St. Paul's life or writings with regard to which he may desire to consult them. A very long catalogue might be made of authors who have written on St. Paul; amongst whom the following may be recommended as of some independent value. In English, the work of Messrs. Conybeare and Howson, on the *Life and Epistles of St. Paul*, is at once the most comprehensive and the most popular. Amongst Commentaries, those of Professor Jowett on the *Epistles to the Thessalonians, Galatians, and Romans*, and of Professor Stanley on the *Epistles to the Corinthians*, are expressly designed to throw light on the Apostle's character and work. The general Commentaries of Dean Alford and Dr. Wordsworth include abundant matter upon everything relating to St. Paul. So does Dr. Davidson's *Introduction to the New Testament*, which gives also in great profusion the opinions of all former critics, English and foreign. Paley's well-known *Horae Paulinae*; Mr. Smith's work on the *Voyage and Shipwreck of St. Paul*; Mr. Tate's *Continuous History of St. Paul*; and Mr. Lewin's *St. Paul*, are exclusively devoted to Pauline subjects. Of the older works by commentators and others, which are thoroughly sifted by more recent writers, it may be sufficient to mention a book which had a great reputation in the last century, that of Lord Lyttelton on the *Conversion of St. Paul*. Amongst German critics and historians the following may be named:—Ewald, in his *Geschichte des Volkes Israel*, vol. vi., and his *Sendschreiben des Apostels Paulus*; Wieseler, *Chronologie des*

*Apostolischen Zeitalters*, which is universally accepted as the best work on the chronology of St. Paul's life and times; De Wette, in his *Eindeitung und his Exegetisches Handbuch*; Neander, *Pflanzung und Leitung der Christl. Kirche*; works on *Paulus*, by Baur, Hensen, Schrader, Schneckenburger; and the Commentaries of Olshausen, Meyer &c. In French, the work of Salvador on *Jésus Christ et sa Doctrine*, in the chapter *St. Paul et l'Eglise*, gives the view of a modern Jew; and the *Discourses on St. Paul*, by M. de Pressense, are able and eloquent. [J. L. D.]

#### PAVEMENT. [GABBATHA.]

**PAVILION.** 1. *Sûc*, properly an enclosed place, also rendered "tabernacle," "covert," and "den," once only "pavilion" (Ps. xxvii. 5).

2. *Succoth*, usually "tabernacle" and "booth." [SUCCOTH.]

3. *Shaphrâr*, and *Shaphrêr*, a word used once only in Jer. xliii. 10, to signify glory or splendour, and hence probably to be understood of the splendid covering of the royal throne. It is explained by Jarchi and others "a tent." [TENT.] [H. W. P.]

**PEACOCKS** (פִּינְיָן and פִּינְיָה, *tuqiyim*: *ra'aves*: pari). Amongst the natural products of the land of Tarshish which Solomon's fleet brought home to Jerusalem mention is made of "peacocks:" for there can, we think, be no doubt at all that the A. V. is correct in thus rendering *tuqiyim*, which word occurs only in 1 K. x. 22, and 2 Chr. ix. 21; most of the old versions, with several of the Jewish Rabbis being in favour of this translation. Some writers have, however, been dissatisfied with the rendering of "peacocks," and have proposed "parrots," as Huet (*Diss. de Nav. Sal.* 7, §6) and one or two others. Keil (*Diss. de Ophir*, p. 104, and *Comment. on 1 K. x. 22*), with a view to support his theory that Tarshish is the old Phœnician Tartessus in Spain, derives the Hebrew name from *Tucca*, a town of Mauretania and Numidia, and concludes that the "*Aves Numidicæ*" (Guinea fowls) are meant: which birds, however, in spite of their name, never existed in Numidia, nor within a thousand miles of that country!

There can be no doubt that the Hebrew word is of foreign origin. Gesenius (*Thes.* p. 1502) cites many authorities to prove that the *tucca* is to be traced to the Tamil or Malabaric *tojai*, "peacock:" which opinion has been recently confirmed by Sir E. Tennent (*Ceylon*, ii, p. 102, and i. p. xx. 3rd ed.), who says, "It is very remarkable that the terms by which these articles (ivory, apes, and peacocks) are designated in the Hebrew Scriptures, are identical with the Tamil names, by which some of them are called in Ceylon to the present day,—*tukeyim* may be recognized in *tokei*, the modern name for these birds." Thus Keil's objection "that this supposed *tojai* is not yet itself sufficiently ascertained" (*Comment. on 1 K. x. 22*), is satisfactorily met.<sup>4</sup>

Peacocks are called "Persian birds" by Aristophanes, *Aves*, 484; see also *Acharn.* 63; *Diod. Sic.* ii. 53.

\* פִּינְיָן, from פִּינְיָן, "enclose" (Gen. 952); *σκηνή*; *tabernaculum*.

\* פִּינְיָה, from same root; *σκηνη*; *tabernaculum*; also 1 Sam. xxiv. 12. *latibulum*. In 1 K. xx. 16, *Σοχαῖο*, *malaculum*.

\* פִּינְיָה and כֶּרֶם פִּינְיָן (Gen. 1169).

<sup>4</sup> The Hebrew names for apes and ivory are clearly traceable to the Sanscrit; but though *tuqiyim* does not appear in Sanscrit, it has been derived from the Sanscrit word *s'ikkin*, meaning furnished with a crest. (Max Müller, *Science of Language* p. 190).

Peacocks were doubtless introduced into Persia from India or Ceylon; perhaps their first introduction dates from the time of Solomon; and they gradually extended into Greece, Rome, and Europe generally. The ascription of the quality of vanity to the peacock is as old as the time of Aristotle, who says (*Hist. An.* i. 1, §15), "Some animals are jealous and vain like the peacock." The A. V. in Job xxxix. 13, speaks of "the goodly wings of the peacocks;" but this is a different Hebrew word, and has undoubted reference to the "ostrich." [W. H.]

**PEARL** (פֶּרֶל, *gābšh*: γαβšs: *eminenti*:-).

The Heb. word occurs, in this form, only in Job xxviii. 18, where the price of wisdom is contrasted with that of *rāmōth* ("coral") and *gābšh*; and the same word, with the addition of the syllable *el* (אֵל), is found in Ez. xiii. 11, 13, xxxviii. 22, with *abnē*, "stones," i. e. "stones of ice." The ancient versions contribute nothing by way of explanation. Schultens (*Comment. in Job*, l. c.) leaves the word untranslated: he gives the signification of "pearls" to the Heb. term *perūthim* (A. V. "rubies") which occurs in the same verse. Gesenius, Fürst, Rosenmüller, Maurer, and commentators generally, understand "crystal" by the term, on account of its resemblance to ice. Lee (*Comment. on Job*, l. c.) translates *rāmōth veyābšh* "things high and massive." Carey renders *gābšh* by "mother-of-pearl," though he is by no means content with this explanation. On the whole the balance of probability is in favour of "crystal," since *gābšh* denotes "he" (not "haikstones," as Carey supposes, without the addition of *abnē*, "stones") in the passages of Ezekiel where the word occurs. There is nothing to which ice can be so well compared as to crystal. The objection to this interpretation is that crystal is not an article of much value; but perhaps reference may here be made to the beauty and pure lustre of rock crystal, or this substance may by the ancient Orientals have been held in high esteem.

Pearls (μαργαρίται), however, are frequently mentioned in the N. T.: comp. Matt. xiii. 45, 46, where the kingdom of heaven is likened unto "a merchant-man seeking goodly pearls." Pearls formed part of women's attire (1 Tim. ii. 9; Rev. xvii. 4). "The twelve gates" of the heavenly Jerusalem were twelve pearls (Rev. xxi. 21); perhaps "mother-of-pearl" is here more especially intended.

Pearls are found inside the shells of various species of *Mollusca*. They are formed by the deposit of the nacreous substance around some foreign body as a nucleus. The *Unio margaritifera*, *Mytilus edulis*, *Ostrea edulis*, of our own country, occasionally furnish pearls; but "the pearl of great price" is doubtless a fine specimen yielded by the pearl oyster (*Avicula margaritifera*) still found in abundance in the Persian Gulf, which has long been celebrated for its pearl fisheries. In Matt. vii. 6 pearls are used metaphorically for any thing of value; or perhaps more especially for "wise sayings," which in Arabic, according to Schultens (*Hariri Consens.* i. 12, ii. 102), are called pearls. (See Parkhurst, *Gr. Lex.* s. v. Μαργαρίτης. As to פֶּרֶל, see RUBIES.) [W. H.]

**PED'AHĒL** (פֶּדְאֵהֶל: פֶּדְאָהֶל: *Phedaēl*). The son of Ammihud, and prince of the tribe of Naphtali (Num. xxxiv. 28), one of the twelve appointed

to divide the land west of Jordan among the nine and a half tribes.

**PEDAH'ZUB** (פֶּדְאִהֶזֶב: פֶּדְאִהֶזֶב: *Phadassar*). Father of Gamaliel, the chief of the tribe of Manasseh at the time of the Exodus (Num. i. 10, ii. 20, vii. 54, 59, x. 23).

**PEDAIAH** (פֶּדְאִיָּה: פֶּדְאִיָּה: *Alex. Elebid*: *Phadua*). 1. The father of Zebudah, mother of king Jehoiakim (2 K. xxiii. 36). He is described as "of Rimah," which has not with certainty been identified.

2. (פֶּדְאִיָּה: *Phadaias*). The brother of Shealtiel, or Shealtiel, and father of Zerubbabel, who is usually called the "son of Shealtiel," being, as Lord A. Harvey (*Genealogies*, p. 100) conjectures, in reality, his uncle's successor and heir, in consequence of the failure of issue in the direct line (1 Chr. iii. 17-19).

3. (פֶּדְאִיָּה: *Phadaias*). Son of Parosh, that is, one of the family of that name, who assisted Nehemiah in repairing the walls of Jerusalem (Neh. iii. 25).

4. (פֶּדְאִיָּה: *Phadaias*). Apparently a priest; one of those who stood on the left hand of Ezra, when he read the law to the people (Neh. viii. 4). In 1 Esdr. ii. 44, he is called PHALDAIUS.

5. (פֶּדְאִיָּה: *Phadaias*; F. A. פֶּדְאִיָּה). A Benjamite, ancestor of Sallu (Neh. xi. 7).

6. (פֶּדְאִיָּה: *Phadaias*). A Levite in the time of Nehemiah appointed by him one of the "treasurers over the treasury," whose office it was "to distribute unto their brethren" (Neh. xiii. 13).

7. (פֶּדְאִיָּה: *Phadaias*; *Alex. פֶּדְאִיָּה*). The father of Joel, prince of the half tribe of Manasseh in the reign of David (1 Chr. xxvii. 20).

**PEKAH** (פֶּכָח: פֶּכָח: *Phaceas*; *Alex. פֶּכָח*). *Phaceas*, son of Kemaliah, originally a captain of Pekahiah king of Israel, murdered his master, seized the throne, and became the 18th sovereign (and last but one) of the northern kingdom. His native country was probably Gilead, as fifty Gileadites joined him in the conspiracy against Pekahiah; and if so, he furnishes an instance of the same undaunted energy which distinguished, for good or evil, so many of the Israelites who sprang from that country, of which Jephthah and Elijah were the most famous examples (Stanley, *S. & P.* 327). [ELLIAH.] Under his predecessors Israel had been much weakened through the payment of enormous tribute to the Assyrians (see especially 2 K. xv. 20), and by internal wars and conspiracies. Pekah seems steadily to have applied himself to the restoration of its power. For this purpose he sought for the support of a foreign alliance, and fixed his mind on the plunder of the sister kingdom of Judah. He must have made the treaty by which he proposed to share its spoil with Rezin king of Damascus, when Jotham was still on the throne of Jerusalem (2 K. xv. 37); but its execution was long delayed, probably in consequence of that prince's righteous and vigorous administration (2 Chr. xxvii.). When, however, his weak son Ahaz succeeded to the crown of David, the allies no longer hesitated, and formed the siege of Jerusalem. The history of the war, which is sketched under AHAS, is found in 2 K. xvi. and 2 Chr. xxviii.; and in the latter (ver. 6) we read that Pekah "slew in Judah one hundred and twenty thousand in one day, which were all valiant men," a statement which, even if we should be obliged to diminish the number now read in the text, from the uncertainty as to numbers attaching to our present

8. of the books of Chronicles (ABLIAH; CHRO-  
212; Kennicott, *Hebrew Text of the Old Test-  
ament Considered*, p. 532), proves that the charac-  
ter of his warfare was in full accordance with Gi-  
lilit precedents (Judg. xi. 33, xii. 6). The war  
amous as the occasion of the great prophecies in  
ah vii.-ix. Its chief result was the capture of  
Jewish port of Elath on the Red Sea; but the  
natural alliance of Damascus and Samaria was  
imbed through the final overthrow of the fero-  
as confederates by Tiglath-pileser, king of Assy-  
whom Ahaz called to his assistance, and who  
ed the opportunity of adding to his own domi-  
as and crushing a union which might have been  
gerous. The kingdom of Damascus was finally  
pressed, and Rezin put to death, while Pekah was  
rived of at least half of his kingdom, including all  
northern portion, and the whole district to the  
of Jordan. For though the writer in 2 K. xv. 29  
s us that Tiglath-pileser "took Ijon, and Abel-  
h-maschah, and Janoah, and Kedesh, and Hazor,  
Gilead, and Galilee, all the land of Naphtali,"  
from comparing 1 Chr. v. 26, we find that  
ad must include "the Reubenites and the Gad-  
and half the tribe of Manasseh." The inha-  
ants were carried off, according to the usual  
stice, and settled in remote districts of Assyria.  
ah himself, now fallen into the position of an  
yrian vassal, was of course compelled to abstain  
n further attacks on Judah. Whether his con-  
sed tyranny exhausted the patience of his sub-  
s, or whether his weakness emboldened them to  
ck him, we do not know; but, from one or the  
er cause, Hoshea the son of Elah conspired  
inst him, and put him to death. Josephus  
that Hoshea was his friend (φίλου τινός ἐπι-  
λεβόμενος αὐτῷ, *Ant.* ix. 13, §1). Comp. Is.  
16, which prophecy Hoshea was instrumental in  
lling. [HOSHEA.] Pekah ascended the throne  
757. He must have begun to war against  
ah B.C. 740, and was killed B.C. 737. The or-  
of events above given is according to the scheme  
wald's *Geschichte des Volkes Israel*, vol. iii.  
102. Mr. Rawlinson (*Bampton Lectures* for  
9, *Lect.* iv.) seems wrong in assuming two in-  
ons of Israel by the Assyrians in Pekah's time,  
one corresponding to 2 K. xv. 29, the other to  
xvi. 7-9. Both these narratives refer to the  
e event, which in the first place is mentioned  
ly in the short sketch of Pekah's reign, while,  
he second passage, additional details are given in  
longer biography of Ahaz. It would have been  
cely possible for Pekah, when deprived of half  
kingdom, to make an alliance with Rezin, and  
ttack Ahaz. We learn further from Mr. Raw-  
n that the conquests of Tiglath-pileser are  
tioned in an Assyrian fragment, though there  
difficulty, from the occurrence of the name  
vheim in the inscription, which may have pro-  
ed from a mistake of the engraver. Comp.  
title, *son of Khumri* (Omri), assigned to Jehu  
nother inscription; and see Rawlinson, note 35  
Lect. iv. As may be inferred from Pekah's  
nce with Rezin, his government was no im-  
vement, morally and religiously, on that of his  
decessors. [G. E. L. C.]

**PEKAHIAH** (פִּקְחִיָּהוּ, *Phakeias*; Alex.:  
*Phiceia*); son and successor of Menahem,  
the 17th king of the separate kingdom of Israel.  
er a brief reign of scarcely two years, a con-  
acy was organized against him by "one of his

retains' (probably of his body guard), Pekah,  
son of Remaliah, and who, at the head of fifty  
Gileadites, attacked him in his palace, murdered  
him and his friends Argob and Arich, and seized  
the throne. The date of his accession is B.C. 759,  
of his death 757. His reign was no better than  
those which had gone before; and the calf-worship  
was retained (2 K. xv. 23-26). [G. E. L. C.]

**PEKOD** (פֶּקֶד), an appellative applied to the  
Chaldeans. It occurs only twice, viz. in Jer. l.  
21, and Ex. xxiii. 23, in the latter of which it is  
connected with Shoa and Koa, as though these three  
were in some way subdivisions of "the Babylonians  
and all the Chaldeans." Authorities are undecided  
as to the meaning of the term. It is apparently  
connected with the root *pkad*, "to visit," and in  
its secondary senses "to punish," and "to appoint  
a ruler:" hence Pekod may be applied to Babylon  
in Jer. l. as significant of its impending punishment,  
as in the margin of the A. V. "visitation." But  
this sense will not suit the other passage, and hence  
Gesenius here assigns to it the meaning of "prefect"  
(*Thes.* p. 1121), as though it were but another form  
of *pkid*. It certainly is unlikely that the same  
word would be applied to the same object in two  
totally different senses. Hitzig seeks for the origin  
of the word in the Sanscrit *bhakta*, "noble"—  
Shoa and Koa being respectively "prince" and  
"lord;" and he explains its use in Jer. l. as a part  
for the whole. The LXX. treats it as the name of  
a district (Φακούκ; Alex. Φούκ) in Ezekiel, and as  
a verb (ἐκδικησον) in Jeremiah. [W. L. B.]

**PELATAH** (פֶּלְטָהוּ; *Phelata*; LXX. om. in Neh. viii.,  
φελία; Alex. φελεία: *Phaleia*). 1. A son of Eli-  
senaï, one of the last members of the royal line of  
Judah (1 Chr. iii. 24).  
2. One of the Levites who assisted Ezra in ex-  
pounding the law (Neh. viii. 7). He afterwards  
sealed the covenant with Nehemiah (Neh. x. 10).  
He is called BIATAS in 1 Esdr. ix. 48.

**PELATIAH** (פֶּלְטִיָּהוּ; *Phelitia*; *Pheltia*).  
The son of Amzi, and ancestor of Adaiah a priest at  
Jerusalem after the return from Babylon (Neh.  
xi. 12).

**PELATIAH** (פֶּלְטִיָּהוּ; *Pheltias*; *Pheltias*).  
1. Son of Hananiah the son of Zerubbabel (1 Chr.  
iii. 21). In the LXX. and Vulg. he is further  
described as the father of Josiah.  
2. (Φαλτις; Alex. *Pheltis*). One of the  
captains of the marauding band of five hundred  
Simeonites, who in the reign of Hazeiah made an  
expedition to Mount Seir and smote the fugitive  
Amalekites (1 Chr. iv. 42).  
3. (Φαλτία; *Pheltia*). One of the heads of the  
people, and probably the name of a family, who  
sealed the covenant with Nehemiah (Neh. x. 22).  
4. (פֶּלְטִיָּהוּ; *Pheltias*; *Pheltias*). The son of  
Benaiah, and one of the princes of the people against  
whom Ezekiel was directed to utter the words of  
doom recorded in Ez. xi. 5-12. The prophet in  
spirit saw him stand at the east gate of the Temple,  
and, as he spoke, the same vision showed him Pela-  
tiah's sudden death (Ez. xi. 1, 13).

**PELEG** (פֶּלֶג; *Phaleg*; *Phaleg*), a  
son of Eber, and brother of Joktan (Gen. x. 25,  
xi. 16). The only incident connected with his history  
is the statement that "in his days was the earth di-  
vided"—an event which was embodied in his name,

Peleg meaning "division." This notice refers, not to the general dispersion of the human family subsequently to the Deluge, but to a division of the family of Eber himself, the younger branch of whom (the Joktanids) migrated into southern Arabia, while the elder remained in Mesopotamia. The occurrence of the name *Phaliga* for a town at the junction of the Chaboras with the Euphrates is observable in consequence of the remark of Winer (*Realb.*) that there is no geographical name corresponding to Peleg. At the same time the late date of the author who mentions the name (Isidorus of Charax) prevents any great stress being laid upon it. The separation of the Joktanids from the stock whence the Hebrews sprang, finds a place in the Mosaic table, as marking an epoch in the age immediately succeeding the Deluge. [W. L. B.]

PELE/ET (פֶּלֶט: פֶּלֶט; Alex. Φαλέτ: *Phalet*).

1. A son of Jahdai in an obscure genealogy (1 Chr. ii. 47).

2. (Πωφαλήτ; Alex. Φαλήτ: *Phallet*). The son of Azmaveth, that is, either a native of the place of that name, or the son of one of David's heroes. He was among the Benjamites who joined David in Ziklag (1 Chr. xii. 3).

PELE/ETH (פֶּלֶת: פֶּלֶת: *Phleth*). 1. The father of On the Reubenite, who joined Dathan and Abiram in their rebellion (Num. xvi. 1). Josephus (*Ant.* iv. 2. §2), omitting all mention of On, calls Peleth Φαλαούς, apparently identifying him with ΠΑΛΛΟΥ the son of Reuben. In the LXX. Peleth is made the son of Reuben, as in the Sam. text and version, and one Heb. MS. supports this rendering.

2. (*Phaleth*). Son of Jonathan and a descendant of Jerahmeel through Onam, his son by Atarah (1 Chr. ii. 33).

PELETHITES (פֶּלֶתִּים: פֶּלֶתִּים: *Phlethi*), mentioned only in the phrase הַפֶּלֶתִּים וְהַחֲרֵתִּים, rendered in the A. V. "the Cherethites and the Pelethites." These two collectives designate a force that was evidently David's body-guard. Their names have been supposed either to indicate their duties, or to be gentile nouns. Gesenius renders them "executioners and runners," comparing the חֲרָצִים וְהַרְצִים, "executioners and runners" of a later time (2 K. xi. 4, 19); and the unused roots פָּרַת and פָּלַת, as to both of which we shall speak later, admit this sense. In favour of this view, the supposed parallel phrase, and the duties in which these guards were employed, may be cited. On the other hand, the LXX. and Vulg. retain their names untranslated; and the Syriac and Targ. Jon. translate them differently from the rendering above and from each other. In one place, moreover, the Gittites are mentioned with the Cherethites and Pelethites among David's troops (2 Sam. xv. 18); and elsewhere we read of the Cherethim, who bear the same name in the plural, either as a Philistine tribe or as Philistines themselves (1 Sam. xxx. 14; Ez. xxv. 16; Zeph. ii. 5). Gesenius objects that David's body-guard would scarcely have been chosen from a nation so hateful to the Israelites as the Philistines. But it must be remembered that David in his later years may have mistrusted his Israelite soldiers, and relied on the Philistine troops, some of whom, with Ittai the Gittite, who was evidently a Philistine, and not an Israelite from Geth [ITTAI],

were faithful to him at the time of Achish's rebellion. He also argues that it is improbable that two synonymous appellations should be thus used together; but this is on the assumption that both names signify Philistines, whereas they may designate Philistine tribes. (See *Theo.* pp. 719, 1107).

The Egyptian monuments throw a fresh light upon this subject. From them we find that kings of the xixth and xxth dynasties had in their service mercenaries of a nation called SHAYRETANA, which Rameses III. conquered, under the name "SHAYRETANA of the Sea." This king fought a naval battle with the SHAYRETANA of the Sea, in alliance with the TOKKAREE, who were evidently, from their physical characteristics, a kindred people to them, and to the PELESATU, or Philistines, also conquered by him. The TOKKAREE and the PELESATU both wear a peculiar dress. We thus learn that there were two peoples of the Mediterranean kindred to the Philistines, one of which supplied mercenaries to the Egyptian kings of the xixth and xxth dynasties. The name SHAYRETANA, of which the first letter was also pronounced KH, is almost letter for letter the same as the Hebrew Cherethim; and since the SHAYRETANA were evidently cognate to the Philistines, their identity with the Cherethim cannot be doubted. But if the Cherethim supplied mercenaries to the Egyptian kings in the thirteenth century B.C., according to our reckoning, it cannot be doubted that the same name in the designation of David's body-guard denotes the same people or tribe. The Egyptian SHAYRETANA of the Sea are probably the Cretans. The Pelethites, who, as already remarked, are not mentioned except with the Cherethites, have not yet been similarly traced in Egyptian geography, and it is rash to suppose their name to be the same as that of the Philistines, פֶּלֶתִּים, for פֶּלֶתִּים; for, as Gesenius remarks, this contraction is not possible in the Semitic languages. The similarity, however, of the two names would favour the idea which is suggested by the mention together of the Cherethites and Pelethites, that the latter were of the Philistine stock as well as the former. As to the etymology of the names, both may be connected with the migration of the Philistines. As already noticed, the former has been derived from the root פָּרַת, "he cut, cut off, destroyed," in Niphal "he was cut off from his country, driven into exile, or expelled," so that we might as well read "exiles" as "executioners." The latter, from פָּלַת, an unused root, the Arab فَلَّت, "he escaped, fled," both being cognate to פָּלַת, "he was smooth," thence "he slipped away escaped, and caused to escape," where the rendering "the fugitives" is at least as admissible as "the runners." If we compare these two names so rendered with the gentile name of the Philistine nation itself, פֶּלֶשֶׁתִּי, "a wanderer, stranger," from the unused root פָּלַשׁ, "he wandered or emigrated," these previous inferences seem to become irresistible. The appropriateness of the names of these tribes to the duties of David's body-

\* Michaelis Philistæos פֶּלֶתִּים dictos esse cernit, et pote exules (7. sed. Niph. no. 3) ut idem valet quod ἀλλότριοι (*Theo.* p. 719).

גורן would then be accidental, though it does not seem unlikely that they should have given rise to the adoption in later times of other appellations for the royal body-guard, definitely signifying "executioners and runners." If, however, הַרְצֵי הַמִּיתִים meant nothing but executioners and runners, it is difficult to explain the change הַרְצֵי הַמִּיתִים. [R. S. P.]

PELI'AS (Πελίας; Alex. Παιδείας: Pelias). A corruption of BEDEIAH (1 Esd. ix. 34; comp. Esr. x. 35). Our translators followed the Vulgate.

PELICAN (תַּרְסָן, káth: πελεκάν, ὄρνεον, χαμαιλιόν, καταρράκτης: onocrotalus, pelican). Amongst the unclean birds mention is made of the káth (Lev. xi. 18; Deut. xiv. 17). The suppliant psalmist compares his condition to "a káth in the wilderness" (Ps. cii. 6). As a mark of the desolation that was to come upon Edom, it is said that "the káth and the bittern should possess it" (Is. xxxiv. 11). The same words are spoken of Nineveh (Zeph. ii. 14). In these two last places the A. V. has "cormorant" in the text, and "pelican" in the margin. The best authorities are in favour of the pelican being the bird denoted by káth. The etymology of the name, from a word meaning "to vomit," lends also to the same conclusion, for it doubtless has reference to the habit which this bird has of pressing its under mandible against its breast, in order to assist it to disgorge the contents of its capacious pouch for its young. This is, with good reason, supposed to be the origin of the fable about the pelican feeding its young with its own blood, the red nail on the upper mandible serving to complete the delusion.\*

The expression "pelican of the wilderness" has, with no good reason, been supposed by some to prove that the káth cannot be denoted by this bird. Shaw (Tour. ii. 303, 8vo. ed.) says "the pelican must of necessity starve in the desert," as it is essentially a water bird. In answer to this objection, it will be enough to observe that the term mǝlbur ("wilderness") is by no means restricted to barren sandy spots destitute of water. "The idea," says Prof. Stanley, "is that of a wide open space, with or without actual pasture; the country of the nomads, distinguished from that of the agricultural and settled people" (S. & P. p. 486, 5th ed.). Pelicans (Pelecanus onocrotalus) are often seen associated in large flocks; at other times single individuals may be observed sitting in lonely and sensitive silence on the ledge of some rock a few feet above the surface of the water. (See Kitto, Pict. Bib. on Ps. cii. 6.) It is not quite clear what is the particular point in the nature or character of the pelican with which the psalmist compares his miserable condition. Some have supposed that it consists in the loud cry of the bird: compare "the voice of my sighing" (ver. 5). We are inclined to believe that reference is made to its general aspect as it sits in apparent melancholy mood, with its bill resting on its breast. There is, we think, little doubt but that

\* The reader is referred to a curious work by a Scotchman, Archibald Simpson by name, entitled "Hieroglyphica animalium, Vegetabilium et Metallorum, quæ in Scripturis sacris repuntur." Edinb. 1622, 4to. In this work are many wild fancies about the pelican, which serve to show the state of zoology, &c., at the period in which the book lived.

As a matter of fact, however, the pelican, after having

the pelican is the káth of the Hebrew Scriptures. Oedmann's opinion that the *Pelecanus graculus*, the shag cormorant (Vern. Sam. iii. 57), and Bochart's that the "bittern" is intended, are unsupported by any good evidence. The *P. onocrotalus* (common

*Pelecanus onocrotalus.*

pelican) and the *P. crispus* are often observed in Palestine, Egypt, &c. Of the latter Mr. Tristram observed an immense flock swimming out to sea within sight of Mount Carmel (*Ibis*, i. 37). [W. H.]

PELONITE, THE (יִלְוִיטָה: δ πελονί Alex. δ φαλλωνί, 1 Chr. xi. 27; δ φαλλωνί, 1 Chr. xi. 36; δ δκ φαλλωνί, 1 Chr. xxvii. 10: Phalonites, Phellonites). Two of David's mighty men, Helez and Ahijah, are called Pelonites (1 Chr. xi. 27, 36). From 1 Chr. xxvii. 10, it appears that the former was of the tribe of Ephraim, and "Pelonite" would therefore be an appellation derived from his place of birth or residence. But in the Targum of R. Joseph it is evidently regarded as a patronymic, and is rendered in the last mentioned passage "of the seed of Pelan." In the list of 2 Sam. xxiii. Helez is called (ver. 26) "the Paltite," that is, as Bertheau (on 1 Chr. xi.) conjectures, of Beth-Palet, or Beth-Phelet, in the south of Judah. But it seems probable that "Pelonite" is the correct reading. [See PALTITE.] "Ahijah the Pelonite" appears in 2 Sam. xxiii. 34 as "Eliam the son of Ahithophel the Gilonite," of which the former is a corruption; "Ahijah" forming the first part of "Ahithophel," and "Pelonite" and "Gilonite" differing only by D and L. If we follow the LXX. of 1 Chr. xxvii. the place from which Helez took his name would be of the form Phallu, but there is no trace of it elsewhere, and the LXX. must have had a differently pointed text. In Heb. *pelon* corresponds to the Greek δ δεινα, "such a one:" it still

filled its pouch with fish and mollusks, often does retire miles inland away from water, to some spot where it consumes the contents of its pouch.

\* *P. crispus* breeds in vast numbers in the flat plain of the Dobrudscha (in European Turkey); its habits there bear out your remark of the pelican retiring inland to digest its food.—H. B. TRISTRAM.

exists in Arabic and in the Spanish *Don Fuero*, "Mr. So-and-so." [W. A. W.]

#### PEN. [WRITING.]

**PENIEL** (פְּנִיֵּל, Samar. פְּנִיֵּל: *elbos* θεῶν: *Phnuel*, and so also *Peshito*). The name which Jacob gave to the place in which he had wrestled with God: "He called the name of the place 'Face of El,' for I have seen Elohim face to face" (Gen. xxxii. 30). With that singular correspondence between the two parts of this narrative which has been already noticed under **MAHANAIM**, there is apparently an allusion to the bestowal of the name in xxxiii. 10, where Jacob says to Esau, "I have seen thy face as one sees the face of Elohim." In xxxii. 31, and the other passages in which the name occurs, its form is changed to **PENUEL**. On this change the lexicographers throw no light. It is perhaps not impossible that Penuel was the original form of the name, and that the slight change to Peniel was made by Jacob or by the historian to suit his allusion to the circumstance under which the patriarch first saw it. The Samaritan Pentateuch has Penue-el in all. The promontory of the *Ras-es-Shukah*, on the coast of Syria above *Beirût*, was formerly called *Theoprosôpon*, probably a translation of Peniel, or its Phœnician equivalent. [G.]

**PENIN'NAH** (פְּנִינָה: *Penenna*: *Phenenna*), one of the two wives of Elkanah, the other being Hannah, the mother of Samuel (1 Sam. i. 2).

**PENNY, PENNYWORTH.** In the A. V., in several passages of the N. T., "penny," either alone or in the compound "pennyworth," occurs as the rendering of the Greek *δηνάριον*, the name of the Roman *denarius* (Matt. xx. 2, xxii. 19; Mark vi. 37, xii. 15; Luke xx. 24; John vi. 7; Rev. vi. 6). The denarius was the chief Roman silver coin, from the beginning of the coinage of the city to the early part of the third century. Its name continued to be applied to a silver piece as late as the time of the earlier Byzantines. The states that arose from the ruins of the Roman empire imitated the coinage of the imperial mints, and in general called their principal silver coin the denarius, whence the French name *denier* and the Italian *denaro*. The chief Anglo-Saxon coin, and for a long period the only one, corresponded to the denarius of the Continent. It continued to be current under the Normans, Plantagenets, and Tudors, though latterly little used. It is called penny, denarius, or denier, which explains the employment of the first word in the A. V. [R. S. P.]

**PENTATEUCH, THE.** The Greek name given to the five books commonly called the Five Books of Moses (*ἡ πεντάτευχος* sc. *βιβλος*; *Pentateuchus* sc. *liber*; the fivefold book; from *τεῦχος*, which meaning originally "vessel, instrument," &c., came in Alexandrine Greek to mean "book"). In the time of Ezra and Nehemiah it was called "the Law of Moses" (Ezr. vii. 6); or "the book of the Law of Moses" (Neh. viii. 1); or simply "the book of Moses" (Ezr. vi. 18; Neh. xiii. 1; 2 Chr. xiv. 4, xxiv. 12). This was beyond all reasonable doubt our existing Pentateuch. The book which was discovered in the temple in the reign of Josiah, and which is entitled (2 Chr. xxxiv. 14), "the book of the Law of Jehovah by the hand of Moses," was substantially it would seem the same volume, though it may have undergone some revision by Ezra. In 2 Chr. xxxiv. 30, it is styled

"the book of the Covenant," and so also in 2 K. xiii. 2, 21, whilst in 2 K. xxii. 8 Hilkiah says, "I have found 'the book of the Law.'" Still earlier in the reign of Jehoshaphat we find a "book of the Law of Jehovah" in use (2 Chr. xvii. 9). And this was probably the earliest designation, for a "book of the Law" is mentioned in Deuteronomy (xxi. 26), though it is questionable whether the name as there used refers to the whole Pentateuch, or only to Deuteronomy; probably, as we shall see, it applies only to the latter. The present Jews usually call the whole by the name of *Torah*, i. e. "the Law," or *Torât Mosheh*, "the Law of Moses." The Rabbinical title is חֲמִשָּׁה חֻמְשֵׁי הַתּוֹרָה, "the five-fifths of the Law." In the preface to the Wisdom of Jesus the son of Sirach, it is called "the Law," which is also a usual name for it in the New Testament (Matt. xii. 5, xxii. 36, 40; Luke x. 4; John vii. 5, 17). Sometimes the name of Moses stands briefly for the whole work ascribed to him (Luke xiv. 27). Finally, the whole Old Testament is sometimes called a *potiori parte*, "the Law" (Matt. v. 18; Luke xvi. 17; John vii. 49, x. 34, xii. 34). In John xv. 25; Rom. iii. 19, words from the *Psalms*, and in 1 Cor. xiv. 21 from *Isaiah*, are quoted as words of the Law.

The division of the whole work into five parts has by some writers been supposed to be original. Others (as Leusden, Hävernick and v. Lengerke), with more probability think that the division was made by the Greek translators. For the titles of the several books are not of Hebrew but of Greek origin. The Hebrew names are merely taken from the first words of each book, and in the first instance only designated particular sections and not whole books. The MSS. of the Pentateuch form a single roll or volume, and are divided not into books, but into the larger and smaller sections called *Parshiyoth* and *Sedarim*. Besides this, the Jews distribute all the laws in the Pentateuch under the two heads of affirmative and negative precepts. Of the former they reckon 248; because, according to the anatomy of the Rabbins, so many are the parts of the human body: of the latter they make 365, which is the number of days in the year, and also the number of veins in the human body. Accordingly the Jews are bound to the observance of 613 precepts: and in order that these precepts may be perpetually kept in mind, they are wont to carry a piece of cloth foursquare, at the four corners of which they have fringes consisting of 8 threads a-piece, fastened in 5 knots. These fringes are called פְּטִילֵי צִיץ, a word which in numbers denotes 600: add to this the 8 threads and the 5 knots, and we get the 613 precepts. The five knots denote the five books of Moses. (See Bab. Talmud. Maccoth, sect. 3; Maimon. *Pref. to Jid Ha-chazakah*; Leusden, *Philol.* p. 33.) Both Philo (*de Abraham*, ad init.) and Josephus (*c. Apion.* l. 8) recognise the division now current. As no reason for this division can satisfactorily be found in the structure of the work itself, Vaihinger supposes that the symbolical meaning of the number five led to its adoption. For ten is the symbol of completion or perfection, as we see in the ten commandments [and so in Genesis we have ten "generations"]; and therefore five is a number which as it were confesses imperfection and prophecies completion. The Law is not perfect without the Prophets, for the Prophets are in a special sense the heirs of the Promise; and it is the Promise which completes

This is questionable. There can be no doubt, however, that this division of the Pentateuch, the arrangement of the Psalter in five books, may be said of the five Megilloth (Canticles, Ruth, Lamentations, Esther), which in many Bibles are placed immediately after the Pentateuch.

Several names and contents of the Five Books refer to the articles on each Book, where affecting their integrity and genuineness is discussed. In the article on Genesis the design of the whole work is pointed out, only briefly observe here that this work with the record of Creation and the history of the primitive world, passes on to deal more with the early history of the Jewish people, giving at length the personal history of the great Fathers of the family: it then shows how the family grew into a nation in the land of its oppression and deliverance, the forty years' wandering in the wilderness, of the Law, with all its enactments both civil and religious, of the construction of the tabernacle, the numbering of the people, of the rights of the priesthood, as well as of many events which befell them before their entry into the Land of Canaan, and finally the last discourses and his death.

of the work in its existing form is now recognized. It is not a mere collection of parts carelessly put together at different times, but a work of design and purposeful composition. Even those who discover elements in the earlier books, and who deny that the Pentateuch was written by Moses, are still of the opinion that the work in its present form is a whole, and was at least reduced to its present form by a single reviser or editor.

Question has also been raised, whether the Pentateuch does not, properly speaking, constitute an integral portion of this work. To this Waldi (*Genesis*, i. 175), Knobel (*Genesis*, i. 2), Lengerke (*Kennan*, lxxiii.), and *Krit. Unters.* p. 91) give a reply in the affirmative. They seem to have been led to do so, because they imagine that the two documents, the Elohistic and Jehovistic, which characterize the contents of the Pentateuch, may still be traced, as streams, the waters of which never wholly dry up, though they flow in the same channel, through the book of Joshua; and partly because of some work which contains the promise of Gen. xv. must contain also—so they suppose—the fulfilment of the promise. But such a supposition is far too arbitrary and uncertain to supply a hypothesis which rests upon them. All that is probable is, that the book of Joshua is a final revision at the hands of Ezra, or some other prophet, at the same time with the Pentateuch.

that the Samaritans, who it is well known do not possess the other books of Scripture,

have besides the Pentateuch a book of Joshua (see *Chronicon Samaritanum*, &c., ed. Juyeboll, Lugd. Bat. 1848;), indicates no doubt an early association of the one with the other; but is no proof that they originally constituted one work, but rather the contrary. Otherwise the Samaritans would naturally have adopted the canonical recension of Joshua. We may therefore regard the Five Books of Moses as one separate and complete work. For a detailed view of the several books we must refer, as we have said, to the Articles where they are severally discussed. The questions which we have left for this article are those connected with the authorship and date of the Pentateuch as a whole.

It is necessary here at the outset to state the exact nature of the investigation which lies before us. Many English readers are alarmed when they are told, for the first time, that critical investigation renders it doubtful whether the whole Pentateuch in its present form was the work of Moses. On this subject there is a strange confusion in many minds. They suppose that to surrender the recognized authorship of a sacred book is to surrender the truth of the book itself. Yet a little reflection should suffice to correct such an error. For who can say now who wrote the books of Samuel, or Ruth, or Job, or to what authorship many of the Psalms are to be ascribed? We are quite sure that these books were not written by the persons whose names they bear. We are scarcely less sure that many of the Psalms ascribed to David were not written by him, and our own translators have signified the doubtfulness of the inscriptions by separating them from the Psalms, of which in the Hebrew text they were made to form a constituent part. These books of Scripture, however, and these divine poems, lose not a whit of their value or of their authority because the names of their authors have perished. Truth is not a thing dependent on names. So likewise, if it should turn out that portions of the Pentateuch were not written by Moses, neither their inspiration nor their trustworthiness is thereby diminished. All will admit that one portion at least of the Pentateuch—the 34th chapter of Deuteronomy, which gives the account of Moses' death—was not written by him. But in making this admission the principle for which we contend is conceded. Common sense compels us to regard this chapter as a later addition. Why then may not other later additions have been made to the work? If common sense leads us to such a conclusion in one instance, critical examination may do so on sufficient grounds in another.

At different times suspicions have been entertained that the Pentateuch as we now have it is not the Pentateuch of the earliest age, and that the work must have undergone various modifications and additions before it assumed its present shape. So early as the second century we find the author of the Clementine Homilies calling in question the authenticity of the Mosaic writings. According to different documents, the one Elohistic, the other Jehovistic, which moreover differ in statement; and consequently this book was not written by Moses, and is neither inspired nor trustworthy " (*Aids to Faith*, p. 190). How it follows that a book is neither inspired nor trustworthy because its authorship is unknown we are at a loss to conceive. A large part of the canon must be sacrificed, if we are only to receive books whose authorship is satisfactorily ascertained.

So early as the second century we find the author of the Clementine Homilies calling in question the authenticity of the Mosaic writings. According to different documents, the one Elohistic, the other Jehovistic, which moreover differ in statement; and consequently this book was not written by Moses, and is neither inspired nor trustworthy " (*Aids to Faith*, p. 190). as well as the Jehovist. He is peculiar in regarding the Jehovistic portion as an altogether original document, written in entire independence, and without the knowledge even of the Elohist record. A later editor or compiler, he thinks, found the two books, and threw them into one. Vaihinger (in Herzog's *Encyclopädie*) is also of opinion that portions of three original documents are to be found in the first four books, to which he adds some fragments of the 32nd and 34th chapters of Deuteronomy. The Fifth Book, according to him, is by a different and much later writer. The Pre-elohist he supposes to have flourished about 1200 B.C., the Elohist some 200 years later, the Jehovist in the first half of the 8th century B.C., and the Deuteronomist in the reign of Hezekiah.

Delitzsch agrees with the writers above mentioned in recognizing two distinct documents as the basis of the Pentateuch, especially in its earlier portions; but he entirely severs himself from them in maintaining that Deuteronomy is the work of Moses. His theory is this: the kernel or first foundation of the Pentateuch is to be found in the Book of the Covenant (Ex. xix.-xxiv.), which was written by Moses himself, and afterwards incorporated into the body of the Pentateuch, where it at present stands. The rest of the Laws given in the wilderness, till the people reached the plains of Moab, were communicated orally by Moses and taken down by the priests, whose business it was thus to provide for their preservation (Deut. xvii. 11, comp. xxiv. 8, xxxiii. 10; Lev. x. 11, comp. xv. 31). Inasmuch as Deuteronomy does not pre-suppose the existence in writing of the entire earlier legislation, but on the contrary recapitulates it with the greatest freedom, we are not obliged to assume that the proper codification of the Law took place during the forty years' wandering in the Desert. This was done, however, shortly after the occupation of the land of Canaan. On that sacred soil was the first definite portion of the history of Israel written; and the writing of the history itself necessitated a full and complete account of the Mosaic legislation. A man, such as Eleazar the son of Aaron, the priest (Num. xvi. 1, xxxi. 21), wrote the great work beginning with the first words of Genesis, including the Book of the Covenant, and perhaps gave only a short notice of the last discourses of Moses, because Moses had written them down with his own hand. A second—who may have been Joshua (see especially Deut. xxxii. 44; Josh. xxiv. 26, and comp. 1 Sam. x. 25), who was a prophet, and spoke as a prophet, or one of the elders on whom the spirit rested (Num. xi. 25), and many of whom survived Joshua (Josh. xxiv. 31)—completed the work, taking Deuteronomy, which Moses had written for his model, and incorporating it into his book. Somewhat in this manner arose the Pentateuch, each narrator further availing himself when he thought proper of other written materials.

Such is the theory of Delitzsch, which is in many ways worthy of consideration, and which has been adopted in the main by Kurtz (*Gesch. d. A. B.* and ii. §99, 8), who formerly was opposed to the theory of different documents, and sided with Hengstenberg and the critics of the conservative school. There is this difference, however, that Kurtz objects to the view that Deuteronomy existed before the other books, and that the rest of the Pentateuch was composed in writing before, not after, the occupation of

the Holy Land. Finally, Schultz, in his recent work on Deuteronomy, recognizes two original documents in the Pentateuch, the Elohist being the base and groundwork of the whole, but contends that the Jehovistic portions of the first four books, as well as Deuteronomy, except the concluding portion, were written by Moses. Thus he agrees with Delitzsch and Kurtz in admitting two documents and the Mosaic authorship of Deuteronomy, and with Stähelin in identifying the Deuteronomist with the Jehovist. That these three writers more nearly approach the truth than any others who have attempted to account for the phenomena of the existing Pentateuch, we are convinced. Which of the three hypotheses is best supported by facts and by a careful examination of the record we shall see hereafter.

One other theory has, however, to be stated before we pass on.

The author of it stands quite alone, and it is not likely that he will ever find any disciple bold enough to adopt his theory: even his great admirer Bunsen forsakes him here. But it is due to Ewald's great and deserved reputation as a scholar, and to his uncommon critical sagacity, briefly to state what that theory is. He distinguishes, then, seven different authors in the great Book of Origins or Primitive History (comprising the Pentateuch and Joshua). The oldest historical work, of which but a very few fragments remain, is the Book of the Wars of Jehovah. Then follows a biography of Moses, of which also but small portions have been preserved. The third and fourth documents are much more perfect: these consist of the Book of the Covenant, which was written in the time of Samson, and the Book of Origins, which was written by a priest in the time of Solomon. Then comes, in the fifth place, the third historian of the primitive times, or the first prophetic narrator, a subject of the northern kingdom in the days of Elijah or Joel. The sixth document is the work of the fourth historian of primitive times, or the second prophetic narrator, who lived between 800 and 750. Lastly comes the fifth historian, or third prophetic narrator, who flourished not long after Joel, and who collected and reduced into one corpus the various works of his predecessors. The real purposes of the history, both in its prophetic and its legal aspects, began now to be discerned. Some steps were taken in this direction by an unknown writer at the beginning of the 7th century B.C.; and then in a far more comprehensive manner by the Deuteronomist, who flourished in the time of Manasseh, and lived in Egypt. In the time of Jeremiah appeared the poet who wrote the Blessing of Moses, as it is given in Deuteronomy. A somewhat later editor incorporated the originally independent work of the Deuteronomist, and the lesser additions of his two colleagues, with the history as left by the fifth narrator, and thus the whole was finally completed. "Such," says Ewald (and his words, seriously meant, read like delicate irony), "were the strange fortunes which this great work underwent before it reached its present form."

Such is a brief summary of the views which have been entertained by a large number of critics, many of them men of undoubted piety as well as learning, who have found themselves compelled, after careful investigation, to abandon the older doctrine of the Mosaic authorship of the Pentateuch, and to adopt, in some form or other, the theory of a compilation from earlier documents.

On the other side, however, stands an array of names scarcely less distinguished for learning, who maintain not only that there is a unity of design in the Pentateuch—which is granted by many of those before mentioned—but who contend that this unity of design can only be explained on the supposition of a single author, and that this author could have been none other than Moses. This is the ground taken by Hengstenberg, Hävernick, Drechsler, Ranke, Welte, and Keil. The first mentioned of these writers has no doubt done admirable service in reconciling and removing very many of the alleged discrepancies and contradictions in the Pentateuch: but his zeal carries him in some instances to attempt a defence the very ingenuity of which betrays how unsatisfactory it is; and his attempt to explain the use of the Divine Names, by showing that the writer had a special design in the use of the one or the other, is often in the last degree arbitrary. Drechsler, in his work on the *Unity and Genuine-ness of Genesis* (1838), fares no better, though his remarks are the more valuable because in many cases they coincide, quite independently, with those of Hengstenberg. Later, however, Drechsler modified his view, and supposed that the several uses of the Divine Names were owing to a didactic purpose on the part of the writer, according as his object was to show a particular relation of God to the world, whether as Elohim or as Jehovah. Hence he argued that, whilst different streams flowed through the Pentateuch, they were not from two different fountain heads, but varied according to the motive which influenced the writer, and according to the fundamental thought in particular sections; and on this ground, too, he explained the characteristic phraseology which distinguishes such sections. Ranke's work (*Untersuchungen über den Pentateuch*) is a valuable contribution to the exegesis of the Pentateuch. He is especially successful in establishing the inward unity of the work, and in showing how inseparably the several portions, legal, genealogical, and historical, are interwoven together. Kurtz (in his *Einheit der Genesis*, 1846, and in the first edition of his first volume of the *Geschichte des Alten Bundes*) followed on the same side; but he has since abandoned the attempt to explain the use of the Divine Names on the principle of the different meanings which they bear, and has espoused the theory of two distinct documents. Keil, also, though he does not despair of the solution of the problem, confesses (*Luther. Zeitschr.* 1831-2, p. 235) that "all attempts as yet made, notwithstanding the acumen which has been brought to bear to explain the interchange of the Divine Names in Genesis on the ground of the different meanings which they possess, must be pronounced a failure." Ebrard (*Das Alter des Jéhovah-Namens*) and Tiele (*Stud. und Krit.* 1852-1) make nearly the same admission. This manifest doubtfulness in some cases, and desertion in others from the ranks of the more conservative school, is significant. And it is certainly unfair to claim consistency and unanimity of opinion for one side to the prejudice of the other. The truth is that diversities of opinion are to be found among those

who are opposed to the theory of different documents, as well as amongst those who advocate it. Nor can a theory which has been adopted by Delitzsch, and to which Kurtz has become a convert, be considered as either irrational or irrational. It may not be established beyond doubt, but the presumptions in its favour are strong; and, when properly stated, will it be found open to any serious objection.

11. We ask in the next place what is the testimony of the Pentateuch itself with regard to its authorship?

1. We find on reference to Ex. xxi. 3, 4, that "Moses came and told the people all the words of Jehovah and all the judgments," and that he subsequently "wrote down all the words of Jehovah." These were written on a roll called "the book of the covenant" (ver. 7), and "read in the audience of the people." These "words" and "judgments" were no doubt the Sinaitic legislation so far as it had as yet been given, and which constituted in fact the covenant between Jehovah and the people. Upon the renewal of this covenant after the slavery of the Israelites, Moses was again commanded by Jehovah to "write these words" (xxxix. 27). "And," it is added, "he wrote upon the tables the words of the covenant, the ten commandments." Leaving Deuteronomy aside for the present, there are only two other passages in which mention is made of the writing of any part of the Law, and these are Ex. xvii. 14, where Moses is commanded to write the defeat of Amalek in a book (or rather in the book, one already in use for the purpose\*); and Num. xxxiii. 2, where we are informed that Moses writ the journeyings of the children of Israel in the desert and the various stations at which they encamped. It obviously does not follow from these statements that Moses wrote all the rest of the first four books which bear his name. Nor on the other hand does this specific testimony with regard to certain portions justify us in coming to an opposite conclusion. So far nothing can be determined positively one way or the other. But it may be said that we have an express testimony to the Mosaic authorship of the Law in Deut. xxxi. 9-12, where we are told that "Moses wrote this Law" (וַיִּכְתֹּב מֹשֶׁה אֶת־הַתּוֹרָה), and delivered it to the custody of the priests with a command that it should be read before the people at the end of every seven years, in the Feast of Tabernacles. In ver. 24 it is further said that when he "had made an end of writing the words of this Law in a book till they were finished," he delivered it to the Levites to be placed in the side of the ark of the covenant of Jehovah, that it might be preserved as a witness against the people. Such a statement is no doubt decisive, but the question is, how far does it extend. Do the words "the Law" comprise all the Mosaic legislation contained in the last four books of the Pentateuch, or must they be confined only to Deuteronomy? The last is apparently the only tenable view. In Deut. xvii. 18, the direction is given that the king on his accession "shall write him a copy of this Law in a book out of that which is before the

\* Delitzsch, however, will not allow that וַיִּכְתֹּב means in the already existing book, but in one which was to be taken for the occasion; and he refers to Num. v. 23, 1 Sam. x. 25, 2 Sam. xl. 15, for a similar use of the article. וַיִּכְתֹּב he takes here, as in Ex. xxx. 8, to mean a separate leaf or plate on which the record was to be made. But the

three passages to which he refers do not help him. In the first two a particular book kept for the purpose is probably intended; and in 2 Sam. xi. 15, the book or roll meant which had already been mentioned in the previous verse. Hence the article is indispensable.

passage of the *Gifri*, says Deiltsch on Genesis, re of the oldest Midrashim of the school of Rashi in (Leut. xvii, 19, to which Rashi refers on Sota) clear as it is important: 'Let him (the king) **אֶת מִשְׁנֵה הָאֵל**' in a book for himself in and let him not be satisfied with one that he

has inherited from his ancestors. מִשְׁנָה means nothing else but מִשְׁנֵה תּוֹרָה (Deuteronomy). Not this exclusively, however, because in ver. 19 is said, to observe all the words of this Law. If so, then why is Deuteronomy only mentioned? Because on the day of assembly *Deuteronomy only was read.*"

the sight of the people;"—or th so in Num. xli. 3. "Now the man Moses was very meek, above all the men which were upon the face of the earth?" On the other hand, are not such words of praise just what we might expect from the friend and disciple—for such perhaps he was—who pronounced his eulogium after his death—"And there arose not a prophet since in Israel like unto Moses, whom Jehovah knew face to face" (Deut. xxxiv. 10)?

3. But there is other evidence, to a critical eye not a whit less convincing, which points in the same direction. If, without any theory casting its shadow upon us, and without any fear of consequences before our eyes, we read thoughtfully only the Book of Genesis, we can hardly escape the conviction that it partakes of the nature of a compilation. It has indeed a unity of plan, a coherence of parts, a shapeliness and an order, which satisfy us that as it stands it is the creation of a single mind. But it bears also manifest traces of having been based upon an earlier work; and that earlier work itself seems to have had embedded in it fragments of still more ancient documents. Before proceeding to prove this, it may not be unnecessary to state, in order to avoid misconception, that such a theory does not in the least militate against the divine authority of the book. The history contained in Genesis could not have been narrated by Moses from personal knowledge; but whether he was taught it by immediate divine suggestion, or was directed by the Holy Spirit to the use of earlier documents, is immaterial in reference to the inspiration of the work. The question may therefore be safely discussed on critical grounds alone.

We begin, then, by pointing out some of the phenomena which the Book of Genesis presents. At the very opening of the book, peculiarities of style and manner are discernible, which can scarcely escape the notice of a careful reader even of a translation, which certainly are no sooner pointed out than we are compelled to admit their existence.

The language of chapter i. 1-ii. 3 (where the first chapter ought to have been made to end) is totally unlike that of the section which follows, ii. 4-iii. 23. This last is not only distinguished by a peculiar use of the Divine Names—for here and nowhere else in the whole Pentateuch, except Ex. ix. 30, have we the combination of the two, Jehovah Elohim—but also by a mode of expression peculiar to itself. It is also remarkable for preserving an account of the Creation distinct from that contained in the first chapter. It may be said, indeed, that this account does not contradict the former, and might therefore have proceeded from the same pen. But, fully admitting that there is no contradiction, the representation is so different that it is far more natural to conclude that it was derived from some other, though not antagonistic source. It may be argued that here we have, not as in the first instance the Divine idea and method of Creation, but the actual relation of man to the world around him, and especially to the vegetable and animal kingdoms; that this is therefore only a resumption and explanation of some things which had been mentioned more broadly and generally before. Still in any case it cannot be denied that this second account has the character of a supplement; that it is designed, if not to correct, at least to explain the other. And this fact, taken in connection with the peculiarities of the phraseology and the use of the Divine Names in the same section, is quite sufficient to justify the supposition that we

have here an instance, not of independent narrations, but of compilation from different sources.

To take another instance. Chapter xiv. is copied all doubt an ancient monument—papyrus-roll it may have been, or inscription on stone, which has been copied and transplanted in its original form into our present Book of Genesis. Anyhow it is in its whole character: distinct too, again, from the rest of the book in its use of the name of God. Here we have El 'Elyon, "the Most High God," used by Melchizedec first, and then by Abraham, who adopts it and applies it to Jehovah, so it to show that it was one God whom he worshipped and whom Melchizedec acknowledged, though they knew Him under different appellations.

We believe, then, that at least these two portions of Genesis—chap. ii. 4-iii. 24, and chap. xiv.—are original documents, preserved, it may have been, like the genealogies, which are also a very prominent feature of the book, in the tents of the patriarchs, and made use of either by the Elohist or the Jehovist for his history. Indeed Elohist seems to be not far from the truth when he declares, "The early portion of the history was composed merely of separate small notices; whilst the family history of the Hebrews, on the contrary, runs in two continuous narratives: these, however, again have not only here and there some passages inserted from other sources, as chap. xiv., xxiii. 18-xxiv. 31, xxxvi. 1-43, xlix. 1-27, but even when the authors wrote more independently they often bring together traditions which in the course of time had taken a different form, and merely give them as they had received them, without intimating what is to be preferred" (*Find. in A. T.* ii. 91, §47).

We come now to a more ample examination of the question as to the distinctive use of the Divine Names. Is it the fact, as Astruc was the first to surmise, that this early portion of the Pentateuch, extending from Gen. i. to Ex. vi., does contain two original documents characterised by their equal use of the Divine Names and by other peculiarities of style? Of this there can be no reasonable doubt. We do find, not only scattered verses, but whole sections thus characterised. Throughout this portion of the Pentateuch the name יהוה (Jehovah) prevails in some sections, and אלהים (Elohim) in others. There are a few sections where both are employed indifferently; and there are, finally, sections of some length in which neither the one nor the other occurs. A list of these has been given in another article. [GENESIS.] And we find moreover that in connexion with this use of the Divine Names there is also a distinctive and characteristic phraseology. The style and idiom of the Jehovah sections is not the same as the style and idiom of the Elohim sections. After Ex. vi. 2-vii. 7, the name Elohim almost ceases to be characteristic of whole sections; the only exceptions to this rule being Ex. xiii. 17-19 and chap. xviii. Such a phenomenon as this cannot be without significance. If, as Hengstenberg and those who agree with him would persuade us, the use of the Divine Names is to be accounted for throughout by a reference to their etymology—if the author uses the one when his design is to speak of God as the Creator and the Judge, and the other when his object is to set forth God as the Redeemer—then it still cannot but appear remarkable that only up to a particular point do these names stamp separate sections of the narrative, whereas afterwards all such distinctive criterion fails. How is this fact to be accounted

for? Why is it that up to Ex. vi. each name has its own province in the narrative, broad and clearly defined, whereas in the subsequent portions the name Jehovah prevails, and Elohim is only interchanged with it here and there? But the alleged design in the use of the Divine Names will not bear a close examination. It is no doubt true that throughout the story of Creation in i. 1-ii. 3 we have Elohim—and this squares with the hypothesis. There is some plausibility also in the attempt to explain the compound use of the Divine Names in the next section, by the fact that here we have the transition from the History of Creation to the History of Redemption; that here consequently we should expect to find God exhibited in both characters, as the God who made and the God who redeems the world. That after the Fall it should be Jehovah who speaks in the history of Cain and Abel is on the same principle intelligible, viz. that this name harmonises best with the features of the narrative. But when we come to the history of Noah the criterion fails us. Why, for instance, should it be said that "Noah found grace in the eyes of Jehovah" (vi. 8), and that "Noah walked with Elohim" (vi. 9)? Surely on the hypothesis it should have been, "Noah walked with Jehovah," for Jehovah, not Elohim, is His Name as the God of covenant and grace and self-revelation. Hengstenberg's attempt to explain this phrase by an opposition between "walking with God" and "walking with the world" is remarkable only for its ingenuity. Why should it be more natural or more forcible even then to imply an opposition between the world and its Creator, than between the world and its Redeemer? The reverse is what we should expect. To walk with the world does not mean with the created things of the world, but with the *spirit* of the world; and the emphatic opposition to that spirit is to be found in the spirit which confesses its need and lays hold of the promise of Redemption. Hence to walk with *Jehovah* (not Elohim) would be the natural antithesis to walking with the world. So, again, how on the hypothesis of Hengstenberg, can we satisfactorily account for its being said in vi. 22, "Thus did Noah; according to all that God (*Elohim*) commanded him, so did he:" and in vii. 5, "And Noah did according unto all that *Jehovah* commanded him:" while again in vii. 9 *Elohim* occurs in the same phrase? The elaborate ingenuity by means of which Hengstenberg, Drechsler, and others, attempt to account for the specific use of the several names in these instances is in fact its own refutation. The stern constraint of a theory could alone have suggested it.

The fact to which we have referred that there is this distinct use of the names Jehovah and Elohim in the earlier portion of the Pentateuch, is no doubt to be explained by what we are told in Ex. vi. 2, "And Elohim spake unto Moses, and said unto him, I am Jehovah: and I appeared unto Abraham, unto Isaac, and unto Jacob as El-Shaddai, but by my name Jehovah was I not known to them." Does this mean that the name Jehovah was literally unknown to the Patriarchs? that the first revelation of it was that made to Moses in chap. iii. 13, 14? where we read: "And Moses said unto God, Behold, when I come unto the children of Israel, and shall say unto them, The God of your fathers hath sent me unto you; and they shall say to me, What is His Name? what shall I say unto them? And God said unto Moses, I AM THAT I AM and He said, Thus shalt thou say

unto the children of Israel, I AM hath sent me unto you."

This is undoubtedly the first *explanation* of the name. It is now, and now first, that Israel is to be made to understand the full import of that Name. This they are to learn by the redemption out of Egypt. By means of the deliverance they are to recognize the character of their deliverer. The God of their fathers is not a God of power only, but a God of faithfulness and of love, the God who has made a covenant with His chosen, and who therefore will not forsake them. This seems to be the meaning of the "I AM THAT I AM" (אֲנִי אֲנִי, *ani ani*), or as it may perhaps be better rendered, "I am He whom I prove myself to be." The abstract idea of self-existence can hardly be conveyed by this name; but rather the idea that God is what He is *in relation to His people*. Now, in this sense it is clear God had not fully made Himself known before.

The name Jehovah may have existed, though we have only two instances of this in the history,—the one in the name Moriah (Gen. xxii. 2), and the other in the name of the mother of Moses (Ex. vi. 20), who was called Jochebed; both names formed by composition from the Divine name Jehovah. It is certainly remarkable that during the patriarchal times we find no other instance of a proper name so compounded. Names of persons compounded with El and Shaddai we do find, but not with Jehovah. This fact abundantly shows that the name Jehovah was, if not altogether unknown, at any rate not understood. And thus we have "an undesigned coincidence" in support of the accuracy of the narrative. God says in Exodus, He was not known by that name to the patriarchs. The Jehovistic writer of the patriarchal history, whether Moses or one of his friends, uses the name freely as one with which he himself was familiar, but it never appears in the history and life of the Patriarchs as one which was familiar to them. On the other hand, passages like Gen. iv. 26, and ix. 26, seem to show that the name was not altogether unknown. Hence Astruc remarks: "Le passage de l'Exode bien entendu ne prouve point que le nom de Jehova fut un nom de Dieu inconnu aux Patriarches et révélé à Moïse le premier, mais prouve seulement que Dieu n'avait pas fait connaître aux Patriarches toute l'étendue de la signification de ce nom, au lieu qu'il l'a manifestée à Moïse." The expression in Ex. vi. 3, "I was not known, or did not make myself known," is in fact to be understood with the same limitation as when (John i. 17) it is said, that "Grace and truth came by Jesus Christ" as in opposition to the Law of Moses, which does not mean that there was no Grace or Truth in the Old Covenant; or as when (John vii. 39) it is said, "The Holy Ghost was not yet, because Jesus was not yet glorified," which does not of course exclude all operation of the Spirit before.

Still this phenomenon of the distinct use of the Divine names would scarcely of itself prove the point, that there are two documents which form the groundwork of the existing Pentateuch. But there is other evidence pointing the same way. We find, for instance, the same story told by the two writers, and their two accounts manifestly interwoven; and we find also certain favourite words and phrases which distinguish the one writer from the other.

(1.) In proof of the first, it is sufficient to read the history of Noah.

Jehovah commanded Moses, so Aaron laid it up before the Testimony (i. e. the Ark) to be kept. And the children of Israel did eat manna forty years, until they came to a land inhabited; they did eat manna until they came unto the borders of the land of Canaan." Then follows the remark, "Now an omer is the tenth part of an ephah." It is clear then that this passage was written not only after the Ark was made, but after the Israelites had entered the Promised Land. The plain and obvious intention of the writer is to tell us when the manna ceased, not, as Hengstenberg contends, merely how long it continued. So it is said (Josh. v. 12), "And the manna ceased on the morrow after they had eaten of the old corn of the land," &c. The observation, too, about the omer could only have been made when the omer as a measure had fallen into disuse, which it is hardly supposable could have taken place in the lifetime of Moses. Still these passages are not absolutely irreconcilable with the Mosaic authorship of the book. Verse 35 may be a later gloss only, as Le Clerc and Rosenmüller believed.

The difficulty is greater with a passage in the book of Genesis. The genealogical table of Esau's family (chap. xxxvi.) can scarcely be regarded as a *later* interpolation. It does not interrupt the order and connexion of the book; on the contrary, it is a most essential part of its structure; it is one of the ten "generations" or genealogical registers which form, so to speak, the backbone of the whole. Here we find the remark (ver. 31), "And these are the kings that reigned in the land of Edom, before there reigned any king over the children of Israel." Le Clerc supposed this to be a later addition, and Hengstenberg confesses the difficulty of the passage (*Auth. d. Pentat.* ii. 202). But the difficulty is not set aside by Hengstenberg's remark that the reference is to the prophecy already delivered in xxxv. 11, "Kings shall come out of thy city." No unprejudiced person can read the words, "before there reigned any king over the children of Israel," without feeling that when they were written, kings had already begun to reign over Israel. It is a simple historical fact that for centuries after the death of Moses no attempt was made to establish a monarchy amongst the Jews. Edom indeed (Judg. viii. 22, 23) might have become king, or perhaps rather military dictator, but was wise enough to decline with firmness the dangerous honour. His son Abimelech, less scrupulous and more ambitious, prevailed upon the Amalekites to make him king, and was acknowledged, it would seem, by other cities, but he perished after a turbulent reign of three years, without being able to perpetuate his dynasty. Such facts are not indicative of any desire on the part of the Israelites at that time to be ruled by kings. There was no deep-rooted national tendency to monarchy which could account for the observation in Gen. xxxvi. the part of a writer who lived centuries before monarchy was established. It is impossible not to feel in the words, as Ewald observes, that the writer almost envies Edom because she had enjoyed the blessings of a regular well-ordered kingdom so long before Israel. An historical remark of this kind, it must be remembered, is widely absent from the provision made in Deuteronomy

for the possible case that at some later time a monarchy would be established. It is one thing for a writer framing laws, which are to be the heritage of his people and the basis of their constitution for all time, to prescribe what shall be done when they shall elect a king to reign over them. It is another thing for a writer comparing the condition of another country with his own to say that the one had a monarchical form of government long before the other. The one might be the dictate of a wise sagacity forecasting the future; the other could only be said at a time when both nations alike were governed by kings. In the former case we might even recognise a spirit of prophecy: in the latter this is out of the question. Either then we must admit that the book of Genesis did not exist as a whole till the times of David and Solomon, or we must regard this particular verse as the interpolation of a later editor. And this last is not so improbable a supposition as Vaihinger would represent it. Perfectly true it is that the whole genealogical table could have been no later addition: it is manifestly an integral part of the book. But the words in question, ver. 31, may have been inserted later from the genealogical table in 1 Chr. i. 43; and if so, it may have been introduced by Ezra in his revision of the Law.\*

Similar remarks may perhaps apply to Lev. xviii. 28: "That the land spue not you out also when ye defile it, as it spued out the nation that was before you." This undoubtedly assumes the occupation of the Land of Canaan by the Israelites. The great difficulty connected with this passage, however, is that it is not a supplementary remark of the writer's, but that the words are the words of God directing Moses what he is to say to the children of Israel (ver. 1). And this is not set aside even if we suppose the book to have been written, not by Moses, but by one of the elders after the entrance into Canaan.

(b.) In several instances older names of places give place to those which came later into use in Canaan. In Gen. xiv. 14, and in Deut. xxiv. 1, occurs the name of the well-known city of Dan. But in Josh. xix. 47 we are distinctly told that this name was given to what was originally called Leshem (or Laish) by the children of Dan after they had wrested it from the Canaanites. The same account is repeated still more circumstantially in Judg. xviii. 27-29, where it is positively asserted that "the name of the city was Laish at the first." It is natural that the city should be called Dan in Deut. xxiv., as that is a passage written beyond all doubt after the occupation of the Land of Canaan by the Israelites. But in Genesis we can only fairly account for its appearance by supposing that the old name Laish originally stood in the MS., and that Dan was substituted for it on some later revision. [DAN.]

In Josh. xiv. 15 comp. xv. 13, 54; and Judg. i. 10 we are told that the original name of Hebron before the conquest of Canaan was Kirjath-Aria. In Gen. xliii. 2 the older name occurs, and the explanation is added (evidently by some one who wrote later than the occupation of Canaan), "the same is Hebron." In Gen. xlii. 18 we find the name of Hebron standing alone and without any explanation. Hence Keil supposes that this was the

\* Psalm xiv. furnishes a curious instance of the way in which a passage may be introduced into an earlier book. Paul quoting this psalm in Rom. iii. 10, supplies other

passages of Scripture to his quotation. Hence the LXX have transferred these passages from the Epistle into the Psalms and have been followed by the Vulg. and Arab.

original name, that the place came to be called Kirjath-Arba in the interval between Abraham and Moses, and that in the time of Joshua it was customary to speak of it by its ancient instead of its more modern name. This is not an impossible supposition; but it is more obvious to explain the apparent anachronism as the correction of a later editor, especially as the correction is actually given in so many words in the other passage (xxiii. 2).

Another instance of a similar kind is the occurrence of Horeb in Num. xiv. 45, xxi. 1-3, compared with Judg. i. 17. It may be accounted for, however, thus:—In Num. xxi. 3 we have the origin of the name explained. The book of Numbers was written later than this, and consequently, even in speaking of an earlier event which took place at the same spot, the writer might apply the name, though at that point of the history it had not been given. Then in Judg. i. 17 we have the *Canaanite* name Zephath (for the Canaanites naturally would not have adopted the Hebrew name given in token of their victory), and are reminded at the same time of the original Hebrew designation given in the Wilderness.

So far, then, judging the work simply by what we find in it, there is abundant evidence to show that, though the main bulk of it is Mosaic, certain detached portions of it are of later growth. We are not obliged, because of the late date of these portions, to bring down the rest of the book to later times. This is contrary to the express claim advanced by large portions at least to be from Moses, and to other evidence, both literary and historical, in favour of a Mosaic origin. On the other hand, when we remember how entirely during some periods of Jewish history the Law seems to have been forgotten, and again how necessary it would be after the seventy years of exile to explain some of its archaisms and to add here and there short notes to make it more intelligible to the people, nothing can be more natural than to suppose that such later additions were made by Ezra and Nehemiah.

III. We are now to consider the evidence lying outside of the Pentateuch itself, which bears upon its authorship and the probable date of its composition. This evidence is of three kinds: first, direct mention of the work as already existing in the later books of the Bible; secondly, the existence of a book substantially the same as the present Pentateuch amongst the Samaritans; and, lastly, allusions less direct, such as historical references, quotations, and the like, which presuppose its existence.

1. We have direct evidence for the authorship of the Law in Josh. i. 7, 8, "according to all the Law which Moses my servant commanded thee,"—"this book of the Law shall not depart out of thy mouth,"—and viii. 31, 34, xxiii. 6 (in xxiv. 26, "the book of the Law of God"), in all which places Moses is said to have written it. This agrees with what we have already seen respecting Deuteronomy and certain other portions of the Pentateuch which are ascribed in the Pentateuch itself to Moses. They cannot, however, be cited as proving that the Pentateuch in its present form and in all its parts is Mosaic.

The book of Judges does not speak of the book of the Law. A reason may be alleged for this difference between the books of Joshua and Judges; in the eyes of Joshua, the friend and immediate successor of Moses, the Law would possess unspeakable value. It was to be his guide as the Captain

of the people, and on the basis of the Law was to rest all the life of the people both civil and religious, in the land of Canaan. He had received, moreover, from God Himself, an express charge to observe and do according to all that was written in the Law. Hence we are not surprised at the prominent position which it occupies in the book which tells us of the exploits of Joshua. In the book of Judges on the other hand, where we see the nation departing widely from the Mosaic institutions, lapsing into idolatry and falling under the power of foreign oppressors, the absence of all mention of the book of the Law is easily to be accounted for.

It is a little remarkable, however, that no direct mention of it occurs in the books of Samuel. Considering the express provision made for a monarchy in Deuteronomy, we should have expected that on the first appointment of a king some reference would have been made to the requirements of the Law. A prophet like Samuel, we might have thought, could not fail to direct the attention of the newly made king to the Book in accordance with which he was to govern. But if he did this, the history does not tell us so; though there are, it is true, allusions which can only be interpreted on the supposition that the Law was known. The first mention of the Law of Moses after the establishment of the monarchy is in David's charge to his son Solomon, on his death-bed (1 K. ii. 3). From that passage there can be no doubt that David had himself framed his rule in accordance with it, and was desirous that his son should do the same. The words "as it is written in the Law of Moses," show that some portion, at any rate, of our present Pentateuch is referred to, and that the Law was received as the Law of Moses. The alliance, too, seems to be to parts of Deuteronomy, and therefore favours the Mosaic authorship of that book. In viii. 9, we are told that "there was nothing in the ark save the two tables of stone which Moses put there at Horeb." In viii. 53, Solomon uses the words, "As Thou spakest by the hand of Moses Thy servant;" but the reference is too general to prove anything as to the authorship of the Pentateuch. The reference may be either to Ex. iii. 5, 6, or to Deut. xiv. 2.

In 2 K. xi. 12, "the testimony" is put into the hands of Josiah at his coronation. This must have been a book containing either the whole of the Mosaic Law, or at least the Book of Deuteronomy, a copy of which, as we have seen, the king was expected to make with his own hand at the time of his accession.

In the Books of Chronicles far more frequent mention is made of "the Law of Jehovah," or "the book of the Law of Moses;"—a fact which may be accounted for partly by the priestly character of those books. Thus we find David's preparation for the worship of God is "according to the Law of Jehovah" (1 Chr. xvi. 40). In his charge to Solomon occur the words "the Law of Jehovah my God, the statutes and the judgments which Jehovah charged Moses with concerning Israel" (1 Chr. ii. 13). In 2 Chr. xii. it is said that Rehoboam "forsook the Law of Jehovah;" in xiv. 4, that Asa commended Judah "to seek Jehovah the God of their fathers, and to do the law and the commandment." In xv. 3, the prophet Azariah reminds Asa that "now for a long season Israel hath been without the true God, and without a *Sanctifying priest*, and without *Law*;" and in xxvi. 18 we find Jehoshaphat appointing certain priests

with priests and Levites, to whom: "they Judah, and had the book of the Law of with them." In xxv. 4, Amasai is said acted in a particular instance "as it is in the Law of the book of Moses." In i. 21, Hezekiah's regulations are expressly in accordance with "the Law of." In xxxiii. 8, the writer is quoting the law in reference to the Temple:—"so that take heed to do all that I have commanded ording to the whole Law and the statutes, ordinances by the hand of Moses." In , occurs the memorable passage in which he priest is said to have "found a book of of Jehovah (given) by Moses." This happened in the eighteenth year of the reign of Josiah. (xxv. 26, that life had been regulated in accordance with what was "written in the Law of Jehovah.") and Nehemiah we have mention several of the Law of Moses, and here there cannot but that our present Pentateuch is meant; there is no reason to suppose that any later of it took place. At this time, then, the Pentateuch was regarded as the work of Ezra iii. 2, "as it is written in the Law of man of God;" vi. 18, "as it is written in of Moses;" vii. 6, Ezra it is said "was scribe in the Law of Moses." In Neh. "the commandments, judgments, &c., which commanded Thy servant Moses," viii. 1, &c., the remarkable account of the reading of the book of the Law of Moses." See also ix. 3, 1-3.

books of Chronicles, though undoubtedly on ancient records, are probably in their form as late as the time of Ezra. Hence it is supposed that if the reference is to the Pentateuch in Ezra, the present Pentateuch can be referred to in Chronicles. But this is not the case. The Book of Ezra speaks of as it existed in the time of the writer; and of Chronicles speak of it as it existed before. Hence the author of the latter (who has been Ezra) in making mention of the Law refers of course to that recension of it which the particular periods over which his histories. Substantially, no doubt, it was the same; and there was no special reason why the reader should tell us of any corrections and additions which in the course of time had been introduced.

In ix. 11, 13, the Law of Moses is mentioned here again, a book differing in nothing from the present Pentateuch is probably meant. There are all the passages of the Old Testament in which "the Law of Moses," "the book of the Law," or such like expressions occur, denoting the existence of a particular book, the authorship of which was ascribed to Moses. In the Psalms and in the Psalms, though there are many references to the Law, evidently as a written document, there are none as to its authorship. But we have hitherto adduced from the historical books a questionably strong; first, in favour of the existence of the main body of the Pentateuch—more particularly of Genesis and the legal portions of the remaining books; and next, as showing a universal belief amongst the Jews that the work was written by Moses.

2. Conclusive proof of the early composition of the Pentateuch, it has been argued, exists in the fact that the Samaritans had their own copies of it, not differing very materially from those possessed by the Jews, except in a few passages which had probably been purposely tampered with and altered, such for instance as Ex. xii. 40; Deut. xxvii. 4. The Samaritans, it is said, must have derived their Book of the Law from the Ten Tribes, whose land they occupied; on the other hand it is out of the question to suppose that the Ten Tribes would be willing to accept religious books from the Jews. Hence the conclusion seems to be irresistible that the Pentateuch must have existed in its present form before the separation of Israel from Judah; the only part of the O. T. which was the common heritage of both.

If this point could be satisfactorily established, we should have a limit of time in one direction for the composition of the Pentateuch. It could not have been later than the times of the earliest kings. It must have been earlier than the reign of Solomon, and indeed than that of Saul. The history becomes at this point so full, that it is scarcely credible that a measure so important as the codification of the Law, if it had taken place, could have been passed over in silence. Let us, then, examine the evidence. What proof is there that the Samaritans received the Pentateuch from the Ten Tribes? According to 2 K. xvii. 24-41, the Samaritans were originally heathen colonists belonging to different Assyrian and Arabian tribes, who were transplanted by Shalmaneser to occupy the room of the Israelites whom he had carried away captive. It is evident, however, that a considerable portion of the original Israelitish population must still have remained in the cities of Samaria. For we find (2 Chr. xxx. 1-20) that Hezekiah invited the remnant of the Ten Tribes who were in the land of Israel to come to the great Passover which he celebrated, and the different tribes are mentioned (vers. 10, 11) who did, or did not respond to the invitation. Later, Sennacherib adopted the policy of Shalmaneser and a still further deportation took place (Ezr. iv. 2). But even after this, though the heathen element in all probability preponderated, the land was not swept clean of its original inhabitants. Josiah, it is true, did not like Hezekiah invite the Samaritans to take part in the worship at Jerusalem. But finding himself strong enough to disregard the power of Assyria, now on the decline, he virtually claimed the land of Israel as the rightful apportionment of David's throne, adopted energetic measures for the suppression of idolatry, and even exterminated the Samaritan priests. But what is of more importance as showing that some portion of the Ten Tribes was still left in the land, is the fact, that when the collection was made for the repairs of the Temple, we are told that the Levites gathered the money "of the hand of Manasseh and Ephraim, and of all the remnant of Israel," as well as "of Judah and Benjamin" (2 Chr. xxxiv. 9). And so also, after the discovery

with Sanballat in the government of Judaea, as well as the mention of Arabians in the army of Samaria ('Illustrations of Egyptian History,' &c., in the *Trans. of Roy. Soc. Lit.* 1860, part I. p. 148, 149)

various and interesting fact, for the knowledge of which we are indebted to Sir H. Rawlinson, that Sargon the Great, king of Assyria, and carrying off the Israelites, settled them in Samaria. This is the first time the Arabians came to be associated

with Sanballat in the government of Judaea, as well as the mention of Arabians in the army of Samaria ('Illustrations of Egyptian History,' &c., in the *Trans. of Roy. Soc. Lit.* 1860, part I. p. 148, 149)

very of the Book of the Law, Josiah bound not only "all who were present in Judah and Benjamin" to stand to the covenant contained in it, but he "took away all the abominations out of all the countries that pertained to the children of Israel, and made all that were present in Israel to serve, even to serve Jehovah their God. And all his days they departed not from serving Jehovah the God of their fathers" (2 Chr. xxxiv. 32, 33).

Later yet, during the vice-royalty of Gedaliah, we find still the same feeling manifested on the part of the Ten Tribes which had shown itself under Hezekiah and Josiah. Eighty devotees from Shechem, from Shiloh, and from Samaria, came with all the signs of mourning, and bearing offerings in their hand, to the Temple at Jerusalem. They thus testified both their sorrow for the desolation that had come upon it, and their readiness to take a part in the worship there, now that order was restored. And this, it may be reasonably presumed, was only one party out of many who came on a like errand. All these facts prove that, so far was the intercourse between Judah and the remnant of Israel from being embittered by religious animosities, that it was the religious bond that bound them together. Hence it would have been quite possible during any portion of this period for the mixed Samaritan population to have received the Law from the Jews.

This is far more probable than that copies of the Pentateuch should have been preserved amongst those families of the Ten Tribes who had either escaped when the land was shaven by the razor of the king of Assyria, or who had struggled back thither from their exile. If even in Jerusalem itself the Book of the Law was so scarce, and had been so forgotten, that the pious king Josiah knew nothing of its contents till it was accidentally discovered; still less probable is it that in Israel, given up to idolatry and wasted by invasions, any copies of it should have survived.

On the whole we should be led to infer that there had been a gradual fusion of the heathen settlers with the original inhabitants. At first the former, who regarded Jehovah as only a local and national deity like one of their own false gods, endeavoured to appease Him by adopting in part the religious worship of the nation whose land they occupied. They did this in the first instance, not by mixing with the resident population, but by sending to the king of Assyria for one of the Israelitish priests who had been carried captive. But, in process of time, the amalgamation of races became complete and the worship of Jehovah superseded the worship of idols, as is evident both from the wish of the Samaritans to join in the Temple-worship after the Captivity, and from the absence of all idolatrous symbols on Gerizim. So far, then, the history leaves us altogether in doubt as to the time at which the Pentateuch was received by the Samaritans. Copies of it might have been left in the northern kingdom after Shalmaneser's invasion, though this is hardly probable; or they might have been introduced thither during the religious reforms of Hezekiah or Josiah.

But the actual condition of the Samaritan Pentateuch is against any such supposition. It agrees so remarkably with the existing Hebrew Pentateuch, and that, too, in those passages which are manifest interpolations and corrections as late as the time of Ezra, that we must look for some other period to which to refer the adoption of the Books of Moses by the Samaritans. This we find after

the Babylonish exile, at the time of the of the rival worship on Gerizim. Till from Babylon there is no evidence that ritans regarded the Jews with any dislike or hostility. But the married suspicion with which Nehemiah met the when he was rebuilding the walls of Jerusalem evoked their wrath. From this time they were declared and open enemies. The between the two nations was further ag the determination of Nehemiah to break riages which had been contracted between Samaritans. Manasseh the brother of priest (so Josephus calls him, and not himself acting high-priest, was one of the he refused to divorce his wife, and took his father-in-law Sanballat, who counsel loss of his priestly privilege in Jerusalem him high-priest of the new Samaritan Gerizim. With Manasseh many other who refused to divorce their wives, felt It seems highly probable that these the Pentateuch with them, and adopted it of the new religious system which they in A full discussion of this question would place here. It is sufficient merely to the existence of a Samaritan Pentateuch, rially differing from the Hebrew Pentateuch upon the question of the antiquity of And we incline to the view of Proskauer Book vi. chap. iii.) that the Samaritan it was in fact a transcript of Ezra's version; same view is virtually adopted by Osee Pent. Sam. pp. 8, 9).

3. We are now to consider evidence of indirect kind, which bears not so much Messic authorship as on the early work as a whole. This has been ever, if satisfactorily made out is, at least, an argument that Moses wrote the Pentateuch. Hengstenberg has tried to show that of the books, by their allusions and quotations the existence of the Books of the Law. He moreover the influence of the Law upon the life civil and religious of the nation who settlement in the land of Canaan. In spirit transfused into all the national historical, poetic and prophetic literature except on the basis of the Pentateuch as existing before the entrance of the Jews into Canaan, the whole of their history and occupation of the land becomes so manifestly It is impossible not to feel that this is, is, if established, peculiarly convincing, and proportion as it is indirect and inferential, the reach of the ordinary weapons of criticism.

Now, beyond all doubt, there are numerous striking references both in the Pentateuch and in the Books of Kings to passages which are found in the present Pentateuch. One thing is clear, that the theory of men like Von Roon, Bunsen, and others, who suppose the Pentateuch to have been written in the times of the late Egyptian empire, is absurd. It is established in the most convincing manner that the legal portions of the Pentateuch already existed in writing before the division of the two kingdoms. Even as regards the historical portions, there are often in the text verbal coincidences of expression, and more than probable that these are not accidental. All this has been argued with much learning by most indefatigable research, and it is an established

success by Hengstenberg in his *Authentic Books*. We will satisfy ourselves with some of the most striking passages in coincidences between the later books and such (omitting Deuteronomy for the present).

who prophesied only in the kingdom of Amos, who prophesied in both kingdoms; and whose ministry was confined to Israel, references which imply the existence of a Law. The following comparison of the books will satisfy us on this point:—Joel ii. 2, 14; ii. 3 with Gen. ii. 8, 9 (comp. xiii. with Num. xiv. 13; ii. 20 with Ex. x. 19; E. V.) with Gen. vi. 12; ii. 13 with Ex. v. [iii.] 18 with Num. xv. 1.—Again, with Num. xxi. 28; ii. 7 with Ex. xxiii. 6; ii. 8 with Ex. xxii. 25 &c.; ii. 9 with 32 &c.; iii. 7 with Gen. xviii. 17; iv. 4 xiv. 3, and Deut. xiv. 28, xxvi. 12; v. 12 xxiv. 31 (comp. Ex. xxiii. 6 and Am. 17 with Ex. xii. 12; v. 21 &c. with 35, Lev. xxiii. 36; vi. 1 with Num. i. with Gen. xxvii. 25 (this is probably the Hengstenberg's is wrong); vi. 8 with 19; vi. 14 with Num. xxiv. 8; viii. xxi. 2, Lev. xxv. 39; ix. 13 with Lev. (comp. Ex. iii. 8).—Again, Hosea i. 2 ix. 5-7; ii. 1 [i. 10] with Gen. xxii. 17, i. 2 [i. 11] with Ex. i. 10; iii. 2 with Ex. 9 with Lev. vi. 17 &c., and vii. 1 &c.; Lev. xxvi. 26; iv. 17 with Ex. xxii. 9, with Ex. x. 9; vi. 2 with Gen. xvii. 18; Ex. xxxiv. 12-16; xii. 6 [A. V. 5] with xii. 10 [9] with Lev. xxiii. 43; xii. 15 Gen. ix. 5.

Books of Kings we have also references as 1 K. ix. 42 to Lev. xxvii. 29; xxi. 3 to 23, Num. xxxvi. 8; xxi. 10 to Num. comp. Deut. xvii. 6, 7, xix. 15; xxii. 17 xvii. 16, 17.—2 K. iii. 20 to Ex. xxix. 1 to Lev. xxv. 39 &c.; v. 27 to Ex. i. xii. 10; vi. 18 to Gen. xix. 11; vii. 28 ii. 29; vii. 2, 19 to Gen. vii. 11; vii. 3 i. 46 (comp. Num. v. 3).

If, as appears from the examination of ancient Jewish literature, the Pentateuch is a canonical book; if, moreover, it was a well known that its words had become words among the people; and if the old appeal to it as a recognized and well-remembered—how comes it to pass that in the time of Josiah, one of the latest kings, its status as a canonical book seems to have been forgotten? Yet such was evidently the circumstances, as narrated in 2 Chr. &c., were these:—In the eighteenth year of the king, who had already taken active measures for the suppression of idolatry, determined the necessary repairs of the Temple, which had become seriously dilapidated, and to worship of Jehovah in its purity. He directed Hilkiah the high-priest to take the monies that were contributed for the repairs during the progress of the work, Hilkiah, busy in the Temple, came upon a copy of the Law—which must have long lain

neglected and forgo a man—and told Shaphan the scribe of his discovery. The effect produced by this was very remarkable. The king, to whom Shaphan read the words of the book, was filled with consternation when he learnt for the first time how far the nation had departed from the Law of Jehovah. He sent Hilkiah and others to consult the prophetess Huldah, who only confirmed his fears. The consequence was that he held a solemn assembly in the house of the Lord, and “read in their ears all the words of the book of the covenant that was found in the house of the Lord.”

How are we to explain this surprise and alarm in the mind of Josiah, betraying as it does such utter ignorance of the Book of the Law, and of the severity of its threatenings—except on the supposition that as a written document it had well nigh perished? This must have been the case, and it is not so extraordinary a fact perhaps as it appears at first sight. It is quite true that in the reign of Jehoshaphat pains had been taken to make the nation at large acquainted with the Law. That monarch not only instituted “teaching priests,” but we are told that as they went about the country they had the Book of the Law with them. But that was 300 years before, a period equal to that between the days of Luther and our own; and in such an interval great changes must have taken place. It is true that in the reign of Ahab the prophet Iseiah directed the people, who in their hopeless infatuation were seeking counsel of ventriloquists and necromancers, to turn “to the Law and to the Testimony;” and Hezekiah, who succeeded Ahab, had no doubt reigned in the spirit of the prophet’s advice. But the next monarch was guilty of outrageous wickedness, and filled Jerusalem with idols. How great a desolation might one wicked prince effect, especially during a lengthened reign! To this we must add, that at no time, in all probability, were there many copies of the Law existing in writing. It was probably then the custom, as it still is in the East, to trust largely to the memory for its transmission. Just as at this day in Egypt, persons are to be found, even illiterate in other respects, who can repeat the whole Kurân by heart, and as some modern Jews are able to recite the whole of the Five Books of Moses, so it probably was then: the Law, for the great bulk of the nation, was orally preserved and inculcated. The ritual would easily be perpetuated by the mere force of observance, though much of it doubtless became perverted, and some part of it perhaps obsolete, through the neglect of the priests. Still it is against the perfunctory and lifeless manner of their worship, not against their total neglect, that the burning words of the prophets are directed. The command of Moses, which laid upon the king the obligation of making a copy of the Law for himself, had of course long been disregarded. Here and there perhaps only some prophet or righteous man possessed a copy of the sacred book. The bulk of the nation were without it. Nor was there any reason why copies should be brought under the notice of the king. We may understand this by a parallel case. How easy it would have been in our own country, before the invention of printing, for a similar circumstance to have happened. How many

Grove’s very interesting paper on Nabhiotic maritans in *Variation Tourists*, 1861. Spoken service of the year kippoor in the Samaritan temple says that the recitation of the Pentateuch continued through the night, “without even the

feeble lamp which on every other night of the year but this burns in front of the holy books. The two priests and a few of the people know the whole of the Torah by heart” (p. 346).

copies, do we suppose of the Scriptures were made? Such as did exist would be in the hands of a few learned men, or more probably in the libraries of monasteries.<sup>b</sup> Even after a translation, like Wiclif's, had been made, the people as a whole would know nothing whatever of the Bible; and yet they were a Christian people, and were in some measure at least instructed out of the Scriptures, though the volume itself could scarcely ever have been seen. Even the monarch, unless he happened to be a man of learning or piety, would remain in the same ignorance as his subjects. Whatever knowledge there was of the Bible and of religion would be kept alive chiefly by means of the Liturgies used in public worship. So it was in Judah. The oral transmission of the Law and the living witness of the prophets had superseded the written document, till at last it had become so scarce as to be almost unknown. But the hand of God so ordered it that when king and people were both zealous for reformation, and ripest for the reception of the truth, the written document itself was brought to light.

On carefully weighing all the evidence hitherto adduced, we can hardly question, without a literary scepticism which would be most unreasonable, that the Pentateuch is to a very considerable extent as early as the time of Moses, though it may have undergone many later revisions and corrections, the last of these being certainly as late as the time of Ezra. But as regards any direct and unimpeachable testimony to the composition of the whole work by Moses we have it not. Only one book out of the five—that of Deuteronomy—claims in express terms to be from his hand. And yet, strange to say, this is the very book in which modern criticism refuses most peremptorily to admit the claim. It is of importance therefore to consider this question separately.

All allow that the Book of the Covenant in Exodus, perhaps a great part of Leviticus and some part of Numbers, were written by Israel's greatest leader and prophet. But Deuteronomy, it is alleged, is in style and purpose so utterly unlike the genuine writings of Moses that it is quite impossible to believe that he is the author. But how then set aside the express testimony of the book itself? How explain the fact that Moses is there said to have written all the words of this Law, to have consigned it to the custody of the priests, and to have charged the Levites sedulously to preserve it by the side of the ark? Only by the bold assertion that the fiction was invented by a later writer, who chose to personate the great Lawgiver in order to give the more colour of consistency to his work! The author first feigns the name of Moses that he may gain the greater consideration under the shadow of his name, and then proceeds to re-enact, but in a broader and more spiritual manner, and with true prophetic inspiration, the chief portions of the earlier legislation.

But such an hypothesis is devoid of all probability. For what writer in later times would ever have presumed, unless he were equal to Moses, to correct or supplement the Law of Moses? And if he were equal to Moses why borrow his name (as Ewald supposes the Deuteronomist to have done), in order to lend greater weight and sanction to his

work? The truth is, those who make such a supposition import modern ideas into ancient writings. They forget that what might be allowable to a modern writer of fiction would not have been tolerated in one who claimed to have a Divine commission, who came forward as a prophet to rebuke and to reform the people. Which would be more worthy to win their obedience, "Thus saith Jehovah," or "Moses wrote all these words?"

It has been argued indeed that in thus assuming a feigned character the writer does in more than is done by . . . author of Ecclesiastes. He in no manner takes the name of Solomon that he may gain a better hearing for his words of wisdom. But the cases are not parallel. The Preacher only pretends to give an old man's view of life, as seen by one who had had a large experience and no common reputation for wisdom. Deuteronomy claims to be a Law imposed on the highest authority, and demanding implicit obedience. The first is a record of the struggles, disappointments, and victory of a human heart. The last is an absolute rule of life, to which nothing may be added, and from which nothing may be taken (iv. 2, xxi. 1).

But, besides the fact that Deuteronomy claims to have been written by Moses, there is other evidence which establishes the great antiquity of the book.

1. It is remarkable for its allusions to Egypt, which are just what would be expected supposing Moses to have been the author. Without tiring upon it that in such passages as ix. 15-18, or xi. 1, xi. 18-20 (comp. Ex. xii. 16), where the garment is given to wear the Law after the fashion of an amulet, or xxvii. 1-8, where writing on skins covered with plaster is mentioned, are prime references to Egyptian customs, we may point to more certain examples. In ix. 5 there is an allusion to Egyptian regulations in time of war; in xiv. 2 to the Egyptian festal days; in xi. 18 to the Egyptian mode of irrigation. The references which Delitzsch sees in xii. 5 to the custom of the Egyptian priests to hold solemn processions in the masks of different deities, and in vii. 9 to Egyptian mining operations, are by no means so certain. Again, among the curses threatened are the sicknesses of Egypt, xviii. 60 (comp. vii. 17). According to xviii. 68, Egypt is the type of all the oppressors of Israel: "Remember that thou wast a slave in the land of Egypt," is an expression which is several times made use of as a motive enforcing the obligations of the law (i. 10, xii. 18, 22; see the same appeal in Lev. xii. 34, a passage occurring in the remarkable section Lev. xvii.-xx., which has so much affinity with Deuteronomy). Lastly, references to the sojourning in Egypt are numerous: "We were Pharaoh's bondmen in Egypt," &c. (vi. 21-23; see also vi. 8, ix. 1, xi. 3); and these occur even in the laws, as in the law of the king (xvii. 16), which would be very extraordinary if the book had only been written at the time of Manasseh.

The phraseology of the book, and the archaism found in it, stamp it as of the same age with the rest of the Pentateuch. The form *NFT*, instead of *NFT*, for the feminine of the pronoun which occurs in all 195 times in the Pentateuch, is found 50 times in Deuteronomy. Nowhere do we find

<sup>b</sup> That even in monasteries the Bible was a neglected and almost unknown book, is clear from the story of Luther's conversion.

<sup>c</sup> It is a significant fact that Ewald, who will have it

that Deuteronomy was written in the reign of Manasseh, is obliged to make his supposed author live in Egypt in order to account plausibly for the Egyptianisms and Egyptian customs which is discernible in the book.

in this book, though. In the rest of the Pentateuch it occurs 11 times. In the same way, the other books, Deuteronomy has  $\text{נָשָׂא}$  of a masculine gender instead of the feminine  $\text{נָשָׂה}$ , which is only xiii. 19). It has also the third pers. pret. in prose occurs only in the Pentateuch (*Lehrbuch*, §142b). The demonstrative  $\text{הַזֶּה}$ , which (according to Ewald, §183a, is characteristic of the Pentateuch) occurs in Deut. 22, xix. 11, and nowhere else out of the Pentateuch, except in the late book, 1 Chr. xx. 8, *Numa* Ezia, v. 15. The use of the  $\text{נָשָׂא}$  is comparatively rare in later writings, but in Deuteronomy with the other books of the Pentateuch; and so is the old and rare form of  $\text{נָשָׂא}$ , and the termination of the future  $\text{נָשִׂיא}$ , as last, according to König (*A. T. Stud.*), more common in the Pentateuch than in the other books: it occurs 58 times in Deuteronomy. In the preterite, viii. 3, 16, a like termination occurs; on the peculiarity of which (90b, note) remarks, as being the original form. Other archaisms which are found in the whole five books are: the shortening of  $\text{לֵךְ}$  to  $\text{לֵךְ}$ , i. 33;  $\text{לֵךְ}$ , xxi. 12, &c.;  $\text{קָרָא}$ ="to meet;" the construction with  $\text{לֵךְ}$  of the object (for instance, the interchange of the older  $\text{בְּשֶׁבַע}$  (xiv. 4) for the usual  $\text{בְּשֶׁבַע}$ ; the use of  $\text{זָכָר}$  (instead of  $\text{זָכָר}$ , i. 16, xx. 13, a form which disappears after the Pentateuch; many ancient words,  $\text{אֵבֶר}$ ,  $\text{יָקָם}$ ,  $\text{שָׁנָה}$  (*שָׁנָה*, Ex. xiii. 12). These are some which occur besides only in Deuteronomy, or else in very late writers, or, who, as is always the case in the decay of a language, studiously imitated the oldest forms; and are found afterwards only in poetry, (vii. 13, xxviii. 4, &c.), and  $\text{מִתִּים}$ , so in Deuteronomy. Again, this book has a number of words which have an archaic character.  $\text{הָרָמָה}$  (for the later  $\text{מִנְהָר}$ , *Ex. xiii. 12*) (instead of the old Canaanite  $\text{הָרָמָה}$ , "offspring of the flocks;"  $\text{יִצְרָן}$ , which as a name of a place is borrowed, Is. xlv. 2;  $\text{הָרָה}$ , i. 41, "to be silent;"  $\text{הָעֵנִי}$  (xv. 2), lit. "to put like a collar on the neck;" "to play the lord;"  $\text{מִדָּוָה}$ , "sickness." The use of figures is another characteristic of Deuteronomy. See xxix. 17, 18; i. 31, 44; viii. 5; xxviii. 29, 49. Of comparisons there are but few (*Delitzsch* says in the other books. The results are most when we compare Deuteronomy with the Book of the Covenant (Ex. xix.-xxiv.) on the one hand with Ps. xc. (which is said to be Mosaic) on the other. To cite but one example: the images of fire and of the bearing on eagles' wings in the Book of the Covenant and in Ps. xc. Comp. Ex. xxiv. 17, with Deut. iv. 11, and Ex. xix. 4, with Deut. xxxii. 11. Not to mention numberless undesigned coincidences between Ps. xc. and the book of Deuteronomy. Chap. xxxii., we need only here cite

the  $\text{מַעֲשֵׂה יָדַי}$  (Ps. xc. 17), "work of the hands," as descriptive of human action generally which runs through the whole of Deut. ii. 7, xiv. 29, xvi. 15, xxiv. 19, xxviii. 12, xxx. 9. The same close affinity, both as to matter and style, exists between the section to which we have already referred in Leviticus (ch. xvii.-xx.), so manifestly different from the rest of that book; the Book of the Covenant (Ex. xix.-xxiv.) and Deuteronomy.

In addition to all this, and very much more might be said—for a whole harvest has been gleaned on this field by Schultz in the Introduction to his work on Deuteronomy—in addition to all these peculiarities which are arguments for the Mosaic authorship of the Book, we have here, too, the evidence strong and clear of post-Mosaic times and writings. The attempt by a wrong interpretation of 2 K. xxii. and 2 Chr. xxxiv. to bring down Deuteronomy as low as the time of Manasseh fails utterly. A century earlier the Jewish prophets borrow their words and their thoughts from Deuteronomy. Amos shows how intimate his acquaintance was with Deuteronomy by such passages as ii. 9, iv. 11, ix. 7, whose matter and form are both coloured by those of that book. Hosea, who is richer than Amos in these references to the past, whilst, as we have seen, full of allusions to the whole Law (vi. 7, xii. 4 &c., xiii. 9, 10), in one passage, viii. 12, using the remarkable expression "I have written to him the ten thousand things of my Law," manifestly includes Deuteronomy (comp. xi. 8 with Deut. xxix. 22), and in many places shows that that book was in his mind. Comp. iv. 13 with Deut. xii. 2; viii. 13 with Deut. xxviii. 68; xi. 3 with Deut. i. 31; xiii. 6 with Deut. viii. 11-14. Isaiah begins his prophecy with the words, "Hear, O heavens, and give ear, O earth," taken from the mouth of Moses in Deut. xxxii. 1. In fact, echoes of the tones of Deuteronomy are heard throughout the solemn and majestic discourse with which his prophecy opens. (See Caspari, *Beiträge zur Ethik*, in *d. Buch Isaia*, p. 203-210.) The same may be said of Micah. In his protest against the apostasy of the nation from the Covenant with Jehovah, he appeals to the mountains as the sure foundations of the earth, in like manner as Moses, Deut. xxxii. 1, to the heavens and the earth. The controversy of Jehovah with His people (Mic. vi. 3-5) is a compendium as it were of the history of the Pentateuch from Exodus onwards, whilst the expression  $\text{בֵּית עֶבְרִי}$ , "Slave-house" of Egypt is taken from Deut. vii. 8, xiii. 5. In vi. 8, there is no doubt an allusion to Deut. x. 12, and the threatenings of vi. 13-16 remind us of Deut. xxviii. as well as of Lev. xxvi.

Since, then, not only Jeremiah and Ezekiel, but Amos and Hosea, Isaiah and Micah, speak in the words of Deuteronomy, as well as in words borrowed from other portions of the Pentateuch, we see at once how untenable is the theory of those who, like Ewald, maintain that Deuteronomy was composed during the reign of Manasseh, or, as Volzinger does, during that of Hezekiah.

But, in truth, the Book speaks for itself. No imitator could have written in such a strain. We scarcely need the express testimony of the work to its own authorship. But, having it, we find all the internal evidence conspiring to show that it came from Moses. Those magnificent discourses, the grand roll of which can be heard and felt even in a translation, came warm from the heart and fresh from

the lips of Israel's Lawgiver. They are the outpourings of a solicitude which is nothing less than parental. It is the father uttering his dying advice to his children, no less than the Prophet counselling and admonishing his people. What book can vie with it either in majesty or in tenderness? What words ever bore more surely the stamp of genuineness? If Deuteronomy be only the production of some timorous reformer, who, conscious of his own weakness, tried to borrow dignity and weight from the name of Moses, then assuredly all arguments drawn from internal evidence for the composition of any work are utterly useless. We can never tell whether an author is wearing the mask of another, or whether it is he himself who speaks to us.

In spite therefore of the dogmatism of modern critics, we declare unhesitatingly for the Mosaic authorship of Deuteronomy.

Briefly, then, to sum up the results of our inquiry.

1. The Book of Genesis rests chiefly on documents much earlier than the time of Moses, though it was probably brought to very nearly its present shape either by Moses himself, or by one of the elders who acted under him.

2. The Books of Exodus, Leviticus, and Numbers, are to a great extent Mosaic. Besides those portions which are expressly declared to have been written by him (see above), other portions, and especially the legal sections, were, if not actually written, in all probability dictated by him.

3. Deuteronomy, excepting the concluding part, is entirely the work of Moses, as it professes to be.

4. It is not probable that this was written before the three preceding books, because the legislation in Exodus and Leviticus as being the more formal is manifestly the earlier, whilst Deuteronomy is the spiritual interpretation and application of the Law. But the letter is always before the spirit; the thing before its interpretation.

5. The first composition of the Pentateuch as a whole could not have taken place till after the Israelites entered Canaan. It is probable that Joshua, and the elders who were associated with him, would provide for its formal arrangement, custody, and transmission.

6. The whole work did not finally assume its present shape till its revision was undertaken by Ezra after the return from the Babylonish captivity.

#### IV. Literature:

1. Amongst the earlier Patristic expositors may be mentioned—

Augustine, *De Genesi contra Manich.*; *De Genesi ad litteram*; *Locutiones (Gen.—Jud.)*; and *Quaestiones in Heptateuchum*.

Jerome, *Liber Quaestionum Hebraicarum in Genesim*.

Chrysostom, *In Genesim, Homiliae et Sermones*. (Opp. Montfaucon, vol. vi. With these will also be found those of Severian of Gabala.)

Theodoret, *Quaestiones in Gen., Ex., Lev., Numer., Deut., &c.*

Ephraem Syrus, *Explanat. in Genesim*.

Cyril of Alexandria, *Glaphyra in libros Moysi*.

2. In the middle ages we have the Jewish commentators—Isaaki or Rashi (an abbreviation of his name Rabbi Solomon Isaaki, sometimes wrongly called Jarchi) of Troyes, in the 11th century; Aben-Ezra of Toledo in the 12th; David Kimchi of Narbonne in the 13th.

3. Of the Reformation period:—

The Commentary of Calvin on the Five Books is a masterpiece of exposition.

#### PENTECOST

Luther wrote, both in German and in Latin Commentaries on Genesis, the last being done but a short time before his death.

4. Later we have the Commentaries of Calvesius in his *Biblia Illustrata*, and Mercerus, in *Genesis*, Rivetus, *Exercitationes in Genesim*, and Comenarius in *Exordium*; in his *Opp. Theolog.* vol. i. Bas. 1651; Grotius, *Annot. ad Vet. Test. in Opp.* vol. i. Le Clerc (Clericus), *Moysi Prophetæ, Lib. V.*; is the 1st vol. of his work on the Old Testament, Amst. 1710, with a special dissertation, *De Scriptore Pentateuchi Moysi*; Spence, *De Legibus Hebraeorum*.

5. The number of books written on this subject in Germany alone, during the last century, is very considerable. Reference may be made to the General Introductions of Michaelis, Eichhorn (5 vols. 1825), Jahn (1814), De Wette (7th ed. 1852), Keil (14 ed. 1853), Hävernick (1856), Bleek (1861), Stähelin (1862). Further, on the one hand, to Hengstenberg's *Authentic des Pentateuchs* (1836, 1839); Ranke's *Untersuchungen* (1834); Drechsel, *Fayheit Ge., der Genesis* (1838); König, *Alt. 2d* (2 Hef. 1839); Kurtz, *Genes. des Alten Testaments* (2nd ed. 1853); and on the other to Engel, *Geschichte des Volkes Israel*; von Lengua, *Eanaan* (1844); Stähelin, *Krit. Untersuchungen* (1843); Bertheau, *Die sieben Gruppen, &c.*

As Commentaries on the whole or parts of the Pentateuch may be consulted—

(1) Critical:—Rosenmüller, *Schedia*, vol. i. Ar. ed. (1821); Knobel (on all the books), in the *Kuregef. Ereget. Handbuch*; Tuch, *Die Genesis* (1838); Schumann, *Genesis* (1829); Bunsen, *Bibelwerk*.

(2) Exegetical:—Baumgarten, *Theol. Comment.* (1843); Schröder, *Das Erste Buch Moysi* (1846); Delitzsch, *Genesis* (3rd ed. 1861); Schultz, *Deuteronomium* (1859). Much will be found here on the general question of the authorship and date of the Pentateuch in the Introductions to the last two of these works.

In England may be mentioned Graves' *Lectures on the last four Books of the Pentateuch*, who argues strenuously for the Mosaic authorship. So also do Rawlinson on *The Pentateuch*, in *Aids to Faith*, 1862; and McCaul on the *Mosaic Comment.* in the same volume; though the former admits that Moses made free use of ancient documents in compiling Genesis.

Davidson, on the other hand, in *Horne's Introduction*, vol. ii. (10th ed. 1856), argues for two documents, and supposes the Jehuist to have written in the time of the Judges, and the Elisha & that of Joshua, and the two to have been incorporated in one work in the reign of Saul or David. He maintains, however, the Mosaic authorship of Deuteronomy.

The chief American writers who have treated of the Pentateuch are Stuart, *Introduction to the Old Testament*; and Bush, *Commentaries on the last Books*. (J. J. S. P.)

#### PENTECOST (חַג הַשָּׁבוּעוֹת)

(Ex. xiii. 16); ἡμέρη ὀκτωκτῶν ἡμερῶν; solemnitas mensis primitiarum; "the feast of harvest, the first fruits of thy labour;" חַג שָׁבֻעַת (Ex. xxiv. 22; Deut. xvi. 10); ἡμέρη ὀκτωκτῶν ἡμερῶν; solemnitas hebdomadarum; "the feast of weeks;" יוֹם הַחֲבוּרִים (Num. xxi. 20, d. 16; xxii. 17); ἡμέρη τῶν σέβας; das pentecosten

"the day of first fruits." In later times it appears to have been called יוֹם הַמִּטְעֵן (see Joseph. *B. J.* ii. 3. §1); and hence, ἡμέρα τῆς Πεντηκοστῆς (Tob. ii. 1; 2 Macc. xii. 32; Acts ii. 1, xx. 16; 1 Cor. xvi. 8). But the more common Jewish name was פֶּנֶטֶסְטָא (in Chaldee, ܦܢܬܝܫܬܐ; Ἀσπετά, in Joseph. *Ant.* iii. 10. §6). The second of the great festivals of the Hebrews. It fell in due course on the sixth day of Sivan, and its rites, according to the Law, were restricted to a single day. The most important passages relating to it are, Ex. xxiii. 16, Lev. xxiii. 15-22, Num. xxviii. 26-31, Deut. xvi. 9-12.

1. The time of the festival was calculated from the second day of the Passover, the 16th of Nisan. The Law prescribes that a reckoning should be kept from "the morrow after the Sabbath" (Lev. xxiii. 11, 15) [PASSOVER, II. 3] to the morrow after the completion of the seventh week, which would of course be the fiftieth day (Lev. xxiii. 15, 16; Deut. xvi. 9). The fifty days formally included the period of grain-harvest, commencing with the offering of the first sheaf of the barley-harvest in the Passover, and ending with that of the two first loaves which were made from the wheat-harvest, at this festival.

It was the offering of these two loaves which was the distinguishing rite of the day of Pentecost.

\* This word in the O. T. is applied to the seventh day of the Passover and the eighth day of Tabernacles, but not to the day of Pentecost. [PASSOVER, note 1, p. 714.] On its application to Pentecost, which is found in the Mishna (*Abod. Zar. i. 2*, and *Chagigah*, ii. 4. &c.), in the Targum (Num. xxviii. 26), in Josephus, and elsewhere (see § v.).

† There has been from early times some difference of opinion as to the meaning of the words כֹּחֶרֶת הַשַּׁבָּת. It has however been generally held, by both Jewish and Christian writers of all ages, that the Sabbath here spoken of is the first day of holy convocation of the Passover, the 16th of Nisan, mentioned Lev. xxiii. 7. In like manner the word שַׁבָּת is evidently used as a designation of the day of atonement (Lev. xxi. 32); and שַׁבְּתוֹן (*sabbati observatio*) is applied to the first and eighth days of Tabernacles and to the Feast of Trumpets. That the LXX. so understood the passage in question can hardly be doubted from their calling it "the morrow after the first day" (i. e. of the festival): ἡ εἰσφορά τῆς πρώτης. The word in vers. 15 and 16 has also been understood as "week," used in the same manner as *σάββατα* in the N. T. (Matt. xxviii. 1; Luke xxviii. 12; John xx. 1, &c.). But some have insisted on taking the Sabbath to mean nothing but the seventh day of the week, or "the Sabbath of creation," as the Jewish writers have called it; and they see a difficulty in understanding the same word in the general sense of week as a period of seven days, contending that it can only mean a regular week, beginning with the first day, and ending with the Sabbath. Hence the Galatian (or Antiochian) party, and in later times the Karaites, supposed that the offering was offered on the day following the weekly Sabbath which might happen to fall within the seven days of the Passover. The day of Pentecost would thus always fall on the first day of the week. Hitzig (*Eastern and Western*, Heidelberg, 1837) has put forth the notion that the Hebrews regularly began a new week at the commencement of the year, so that the 7th, 14th, and first of Nisan were always Sabbath days. He imagines that "the morrow after the Sabbath" from which Pentecost was reckoned, was the 22nd day of the month, the day for the proper termination of the Passover. He is well answered by Bähr (*Symbolik*, ii. 620), who refers especially to John. v. 11, as proving, in connexion with the law Lev. xxiii. 14, that the offering was offered on the 16th

They were to be leavened. Each loaf was to contain the tenth of an ephah (i. e. about 3½ quarts; of the finest wheat-flour of the new crop (Lev. xxiii. 17). The flour was to be the produce of the land. The loaves, along with a peace-offering of two lambs of the first year, were to be waved before the Lord and given to the priests. At the same time a special sacrifice was to be made of seven lambs of the first year, one young bullock and two rams, as a burnt-offering (accompanied by the proper meat and drink offerings), and a kid for a sin-offering (Lev. xxiii. 18, 19). Besides these offerings, if we adopt the interpretation of the Rabbinical writers, it appears that an addition was made to the daily sacrifice of two bullocks, one ram, and seven lambs, as a burnt-offering (Num. xxviii. 27). At this, as well as the other festivals, a five-will offering was to be made by each person who came to the sanctuary, according to his circumstances (Deut. xvi. 10). [PASSOVER, p. 714, note 1.] It would seem that its festive character partook of a more free and hospitable liberality than that of the Passover, which was rather of the kind which belongs to the mere family gathering. In this respect it resembled the Feast of Tabernacles. The Levite, the stranger, the fatherless, and the widow, were to be brought within its influence (Deut. xvi. 11, 14). The mention of the gleanings to be left in the fields at harvest for "the poor and the stranger," in connexion with

of the month. It should be observed that the words in that passage, עֶבֶר הָאֶרֶץ, mean merely *corn of the land*, not as in A. V. "the old corn of the land." "The morrow after the Passover" (כֹּחֶרֶת הַשַּׁבָּת) might at first sight seem to express the 16th of Nisan; but the expression may, on the whole, with more probability, be taken as equivalent with "the morrow after the Sabbath," that is, the 16th day. See Keil on Josh. v. 11; Masius and Drusius, on the same text, in the *Crit. Sac.* Bähr, *Symbol.* ii. 621; Selden, *de Anno Mundi*, ch. 7; Par tenora, in *Chagigah*, ii. 4; Buxt. *Syn. Jud.* xx.; Fagius, in Lev. xxiii. 15; Drusius, *Notæ Marginales* in Lev. xxiii. 16. It is worthy of remark that the LXX. omit τῆς εἰσφοράς τοῦ πρώτου, according to the texts of Tischendorf and Thelae.

\* The עֶבֶר הָאֶרֶץ, or tenth (in A. V. "tenth deal") is explained in Num. v. 18, עֶשְׂרִית הָאֶפָה, "the tenth part of an ephah." It is sometimes called עֶבֶר, *omer*, literally, a *handful* (Ex. xvi. 36), the same word which is applied to the first sheaf of the Passover. (See Joseph. *Ant.* viii. 2. §9.) [WEIGHTS AND MEASURES.]

† This is what is meant by the words in Lev. xxiii. 17, which stand in the A. V. "out of your habitations" and in the Vulgate, "ex omnibus habitaculis vestris." The Hebrew word is not בֵּית, a *house*, as the *home of a family*, but כְּנָפֶיךָ, a *plume of abode*, as the *territory of a nation*. The LXX. has, ἀπὸ τῆς κατοικίας ὑμῶν; Jonathan, "e loco habitaculorum vestrum." See Drusius, in *Crit. Sac.*

\* The differing statements respecting the proper sacrifices for the day in Lev. xxiii. 18, and Num. xxviii. 27, are thus reconciled by the Jewish writers (Mishna, *Menaḥoth*, iv. 2, with the notes of Bartenora and Maimonides). Josephus appears to add the two statements together, not quite accurately, and does not treat them as relating to two distinct sacrifices (*Ant.* iii. 10. §6). He enumerates, as the whole of the offerings for the day, a single loaf, two lambs for a peace-offering, three bullocks, two rams and fourteen lambs for a burnt-offering, and two kids for a sin-offering. Bähr, Winer, and other modern critics, regard the statements as discordant, and prefer that of Num. xxviii. as being most in harmony with the sacrifices set as belonging to the other festivals.

Pentecost, may perhaps have a bearing on the liberality which belonged to the festival (Lev. xxiii. 22). At Pentecost (as at the Passover) the people were to be reminded of their bondage in Egypt, and they were especially admonished of their obligation to keep the divine law (Deut. xvi. 12).

II. Of the information to be gathered from Jewish writers respecting the observance of Pentecost, the following particulars appear to be the best worthy of notice. The flour for the loaves was sifted with peculiar care twelve times over. They were made either the day before, or, in the event of a Sabbath preceding the day of Pentecost, two days before the occasion (*Menachoth*, vi. 7, xi. 9). They are said to have been made in a particular form. They were seven palms in length and four in breadth (*Menachoth*, xi. 4, with Maimonides' note). The two lambs for a peace-offering were to be waved by the priest, before they were slaughtered, along with the loaves, and afterwards the loaves were waved a second time along with the shoulders of the lambs. One loaf was given to the high-priest and the other to the ordinary priests who officiated<sup>1</sup> (Maimon. in *Tamid*, c. 8, quoted by Otho). The bread was eaten that same night in the Temple, and no fragment of it was suffered to remain till the morning (Joseph. *B. J.* vi. 5, §3; *Ant.* iii. 10, §6).

Although, according to the Law, the observance of Pentecost lasted but a single day, the Jews in foreign countries, since the Captivity, have prolonged it to two days. They have treated the Feast of Trumpets in the same way. The alteration appears to have been made to meet the possibility of an error in calculating the true day.<sup>2</sup> It is said by Bartenora and Maimonides that, while the Temple was standing, though the religious rites were confined to the day, the festivities, and the bringing in of gifts, continued through seven days (Notes to *Chagigah*, ii. 4). The Hallel is said to have been sung at Pentecost as well as at the Passover (Lightfoot, *Temple Service*, §5). The concourse of Jews who attended Pentecost in later times appears to have been very great (Acts ii.; Joseph. *Ant.* xiv. 13, §14, xvii. 10, §2; *B. J.* ii. 3, §1).

No occasional offering of first-fruits could be made in the Temple before Pentecost (*Biccurin*, i. 3, 6). Hence probably the two loaves were designated "the first of the first-fruits" (Ex. xxiii. 19) [PASSOVER, p. 715, note \*], although the offering of the omer had preceded them. The proper time for offering first-fruits was the interval between Pentecost and Tabernacles (*Bicc.* i. 6, 10; comp. Ex. xxiii. 16). [FIRST FRUITS.]

The connexion between the omer and the two

<sup>1</sup> In like manner, the leavened bread which was offered with the ordinary peace-offering was waved and given to the priest who sprinkled the blood (Lev. vii. 13, 14).

<sup>2</sup> Lightfoot, *Exercit. Heb.* Acts ii. 1; Reland, *Ant.* iv. 4, 5; Selden, *De Ann.* c. vii.

<sup>3</sup> He elsewhere mentions the festival of Pentecost with the same marked respect. He speaks of a peculiar feast kept by the Therapeutae as *προεόρτιος μεγίστητος ἑορτῆς* αὐτῶν Πεντηκοστῆς (*De Vit. Contemp.* v. 334).

<sup>4</sup> According to the most generally received interpretation of the word *δευτερόπρωτος* (Luke vi. 1), the period was marked by a regularly designated succession of Sabbaths, similar to the several successions of Sundays in our own calendar. It is assumed that the day of the omer was called *δευτέρα* (in the LXX., Lev. xxiii. 11, ἡ ἐναυριον τῆς πρώτης). The Sabbath which came next after it was called *δευτερόπρωτος*; the second, *δευτεροδευτερος*; the third, *δευτερόπρωτος*; and so onwards, till Pentecost. This

loaves of Pentecost appears never to have been lost sight of. The former was called by Philo, *προεόρτιος ἑτέρας ἑορτῆς μετέστροφος* (*De Sept.* §21, v. 25; comp. *De Decem Orac.* iv. 302, ed. Tauch). The interval between the Passover and Pentecost was evidently regarded as a religious season.<sup>1</sup> The custom has probably been handed down from ancient times, which is observed by the modern Jews, of keeping a regular computation of the fifty days by a formal observance, beginning with a short prayer on the evening of the day of the omer, and continued on each succeeding day by a solemn declaration of its number in the succession, at evening prayer, while the members of the family are standing with respectful attention<sup>2</sup> (Buxt. *Syn. Jud.* xx. p. 440).

III. Doubts have been cast on the common interpretation of Acts ii. 1, according to which the Holy Ghost was given to the Apostles on the day of Pentecost. Lightfoot contends that the passage, *τῇ συμπληροῦσθαι τῇ ἡμέρᾳ τῆς Πεντηκοστῆς*, means, *when the day of Pentecost had passed*, and considers that this rendering is countenanced by the words of the Vulgate, "*cum compleret dies Pentecostes*." He supposes that Pentecost fell that year on the Sabbath, and that it was on the ensuing Lord's day that *ἦσαν ἑκατὼς ἡμερῶν* ἐπὶ τὸ αὐτὸ (*Exercit.* in Acts ii. 1). Hitzig, on the other hand (*Ostern und Pfingsten*, Heidelberg, 1837), would render the words, "As the day of Pentecost was approaching its fulfilment." Neander has replied to the latter, and has maintained the common interpretation (*Planting of the Christian Church*, i. 5, Bohn's ed.).

The question on what day of the week the Pentecost fell, must of course be determined by the mode in which the doubt is solved regarding the day on which the Last Supper was eaten. [PASSOVER, III.] If it was the legal paschal supper, on the 14th of Nisan, and the Sabbath during which our Lord lay in the grave was the day of the omer, Pentecost must have followed on the Sabbath. But if the supper was eaten on the 13th, and He was crucified on the 14th, the Sunday of the Resurrection must have been the day of the omer, and Pentecost must have occurred on the first day of the week.

IV. There is no clear notice in the Scriptures of any historical significance belonging to Pentecost. But most of the Jews of later times have regarded the day as the commemoration of the giving of the Law on Mount Sinai. It is made out from Ex. xii. that the Law was delivered on the fiftieth day after the deliverance from Egypt (Selden, *De Jur. Nat.*

explanation was first proposed by Scaliger (*De Emend. Temp.* lib. vi. p. 687), and has been adopted by Frischmuth, Petrus, Casaubon, Lightfoot, Godwyn, Carpov, and many others.

<sup>1</sup> The less educated of the modern Jews regard the fifty days with strange superstition, and, it would seem, are always impatient for them to come to an end. In fact their continuance, they have a dread of sudden death, as the effect of malaria, and of the influence of evil spirits on children. They relate with gross exaggeration the case of a great mortality which, during the first twenty-three days of the period, befel the pupils of Akiba, the great Mishnaic doctor of the second century, at Jaffa. They do not ride, or drive, or go on the water, unless they are impelled by absolute necessity. They are careful not to whistle in the evening, lest it should bring ill luck. They scrupulously put off marriage till Pentecost. (Stanley, *In Via Jerosolymitanae* (Paris, 1860), p. 124; Mills, *British Jews*, p. 207.)

in. 11). It has been conjectured that a connection between the event and the festival may be hinted at in the reference to the observance of the Law in Deut. xvi. 12. But neither nor Josephus has a word on the subject. However, a tradition of a custom which we suppose to be at least as ancient as the latter times, that the night before Pentecost was specially appropriated for thanking God for the giving of the Law.<sup>2</sup> Several of the Fathers noticed evidence of the day of the giving of the Law at the time of the festival, and made use of it. Thus says, "Supputemus numerum, et invenimus quinquagesimo die egressionis Israel ex egipto in vertice montis Sinai legem datam."

Pentecostes celebratur solemnitas, et postea in sacramentum Spiritus Sancti descensione ut" (*Epist. ad Philolam, Mansio XII.*). Justin speaks in a similar manner: "Pentecostiam, id est, a passione et resurrectione quinquagesimum diem celebramus, quo sanctum Spiritum Paraclitum quem promissit: quod futurum etiam per Judaeorum significatum est, cum quinquagesimo die abrahamem oris occisione, Moyses digito Dei legem accepit in monte" (*Contra Faustum, ii. c. 12*). The later Rabbis spoke with reverence of the commemoration of the Law as a subject in the institution of the feast. Maior says, "Festum septimanarum est dies ille, data fuit. Ad hujus diei honorem pertinet es a praecedenti solenni festo (Pascha) ad aequalem diem numerantur" (*Moré Nivuchim*). Abubabel recognises the fact, but denies that anything to do with the institution of it, observing, "lex divina non opus habet actione diei, quo ejus memoria recolatur." "causa festi septimanarum est initium rituum" (*in Lev. 262*). But in general the writers of modern times have expressed themselves on the subject without hesitation, and, in the use of the day, as it is now observed, the Law is kept prominently in view.<sup>3</sup>

If the feast of Pentecost stood without any connexion with any other rites, we should have certain warrant in the Old Testament for regarding it as more than the divinely appointed thanksgiving for the yearly supply of the useful sort of food. Every reference to it seems to bear immediately upon the completion of the grain-harvest. It might have been a festival, having no proper reference to the lot of the chosen race. It might have taken the religion of any people who merely felt that God who gives rain from heaven and seasons, and who fills our hearts with food and peace (Acts xiv. 17). But it was, as we have seen, essentially linked on to the Passover, that which, above all others, expressed the fact of the chosen and separated from other nations.

It expressly states that it was at the Feast of Pentecost that the giving of the Law was commemorated (Acts ii. 1). [TRUMPETS, FEAST OF.]

Heb. in Act. ii. 1. Schlötgen conjectures that the occasion there spoken of were assembled to offer this purpose, in accordance with Jewish custom. The Jews adorn their houses with flowers, and dance on their heads, with the declared purpose of expressing their joy in the possession of the Law. They also fasted as is prepared with milk, because the giving of the Law is likened to milk. (Compare the expression "the sincere milk of the word," 1 Pet. ii. 2.)

It was not an insulated day. It stood as the culminating point of the Pentecostal season. If the offering of the omer was a supplication for the Divine blessing on the harvest which was just commencing, and the offering of the two loaves was a thanksgiving for its completion, each rite was brought into a higher significance in consequence of the omer forming an integral part of the Passover. It was thus set forth that He who had delivered His people from Egypt, who had raised them from the condition of slaves to that of free men in immediate covenant with Himself, was the same that was sustaining them with bread from year to year. The inspired teacher declared to God's chosen one, "He maketh peace in thy borders, He filleth thee with the finest of the wheat" (Ps. cxlviii. 14). If we thus regard the day of Pentecost as the solemn termination of the consecrated period, intended, as the seasons came round, to teach this lesson to the people, we may see the fitness of the name by which the Jews have mostly called it, עֲצֵרֶת, the concluding assembly. [PASSOVER, p. 714, note 1.]

As the two loaves were leavened, they could not be offered on the altar, like the unleavened sacrificial bread. [PASSOVER, IV. 3 (b).] Abubabel (in Lev. xiii.) has proposed a reason for their not being leavened which seems hardly to admit of a doubt. He thinks that they were intended to represent the best produce of the earth in the actual condition in which it ministers to the support of human life. Thus they express, in the most significant manner, what is evidently the idea of the festival.

We need not suppose that the grain-harvest in the Holy Land was in all years precisely completed between the Passover and Pentecost. The period of seven weeks was evidently appointed in conformity with the Sabbatical number, which so frequently recurs in the arrangements of the Mosaic Law. [FEASTS; JUBILEE.] Hence, probably, the prevailing use of the name, "The Feast of Weeks," which might always have suggested the close religious connexion in which the festival stood to the Passover.

It is not surprising that, without any direct authority in the O. T., the coincidence of the day on which the festival was observed with that on which the Law appears to have been given to Moses, should have strongly impressed the minds of Christians in the early ages of the Church. The Divine Providence had ordained that the Holy Spirit should come down in a special manner, to give spiritual life and unity to the Church, on that very same day in the year on which the Law had been bestowed on the children of Israel which gave to them national life and unity. They must have seen that, as the possession of the Law had completed the deliverance of the Hebrew race wrought by the hand of Moses, so the gift of the Spirit perfected the work of Christ in the establishment of His kingdom upon earth.

It is a fact of some interest, though in no wise connected with the present argument, that, in the service of the synagogue, the book of Ruth is read through at Pentecost, from the connexion of its subject with harvest. (Buxt. Syn. Jud. xx.; La Vie Juive en Abasse pp. 129, 142.)

So Godwyn, Lightfoot, Roland, Bähr. The full name appears to have been עֲצֵרֶת הַלֶּחֶם הַשֵּׁנִי, the concluding assembly of the Passover. The designation of the offering of the omer used by Philo, προσφορὰ ἑρπιδος ἐστὶν προσφοράς, strikingly tends to the same purpose.

It may have been on this account that Pentecost was the last Jewish festival (as far as we know) which St. Paul was anxious to observe (Acts xx. 16, 1 Cor. xvi. 8), and that Whitsuntide came to be the first annual festival instituted in the Christian Church (Hessey's *Bampton Lectures*, pp. 88, 96). It was rightly regarded as the Church's birthday, and the Pentecostal season, the period between it and Easter, bearing as it does such a clear analogy to the fifty days of the old Law, thus became the ordinary time for the baptism of converts (Tertullian, *De Bapt.* c. 19; Jerome, in *Zech.* xiv. 8).

(Carpzov, *App. Crit.* iii. 5; Reland, *Ant.* iv. 4; Lightfoot, *Temple Service*, §3; *Exercit.* in *Act.* ii. 1; Bähr, *Symbolik*, iv. 3; Spencer, *De Ley. Heb.* i. 12, iii. viii. 2; Meyer, *De Fest. Heb.* ii. 13; Hupfeld, *De Fest. Heb.* ii.; Iken, *De Duobus Panisibus Pentecost.* Brem. 1729; Mishna, *Menachoth* and *Biccurim*, with the Notes in Surenhusius; Drusus, *Notae Majores in Lev.* xxiii. 15, 21 (*Crit. Sac.*); Otho, *Lex. Rab. s. Festa*; Buxtorf, *Syn. Jud.* c. xx.) [S. C.]

**PENUEL** (פְּנֻֿֿל) in Gen. εἰδος θεοῦ, elsewhere פְּנֻֿֿל: *Phanuel*. The usual, and possibly the original, form of the name of a place which first appears under the slightly different form of **PENTEL** (Gen. xxii. 30, 31). From this narrative it is evident that it lay somewhere between the torrent Jabbok and Succoth (comp. xxii. 22 with xxiii. 17). This is in exact agreement with the terms of its next occurrence, when Gideon, pursuing the hosts of the Midianites across the Jordan into the uplands of Gilead, arrives first at Succoth, and from thence mounts to Penuel (Judg. viii. 5, 8). It had then a tower, which Gideon destroyed on his return, at the same time slaying the men of the place because they had refused him help before (ver. 17). Penuel was rebuilt or fortified by Jeroboam at the commencement of his reign (1 K. xii. 25), no doubt on account of its commanding the fords of Succoth and the road from the east of Jordan to his capital city of Shechem, and also perhaps as being an ancient sanctuary. Succoth has been identified with tolerable certainty at *Sakât*, but no trace has yet been found of Penuel. [G.]

**PE'OR** (פְּעֹֿֿר, "the Peor," with the def. article: *roû* \*פְּעֹֿֿר: *mons Phœhor*). A mountain in Moab, from whence, after having without effect ascended the lower or less sacred summits of Bamoth-Baal and Pisgah, the prophet Balaam was conducted by Balak for his final conjurations (Num. xxiii. 28 only).

Peor—or more accurately, "the Peor"—was "facing Jeshimon." The same thing is said of Pisgah. But unfortunately we are as yet ignorant of the position of all three, so that nothing can be inferred from this specification.

In the *Onomasticon* ("Fogor," "Bethphogor," "Danaba") it is stated to be above the town of Libias (the ancient Beth-aram), and opposite Jericho. The towns of Bethpeor and Dinhaba were on the mountain, six miles from Libias, and seven from Hesboun, respectively. A place named *Fikharah* is mentioned in the list of towns south of *Es-Salt* in the appendix to the 1st edit. of Dr. Robinson's *Diab. Rec.* (iii. App. 169), and this is placed by Van de Velde at the head of the *Wady Eshteh*,

\* The LXX. have here represented the Hebrew letter *sin* by *g*, as they have also in Sagr el, Gummurah, Athallah, &c.

## PERAZIM, MOUNT

8 miles N. E. of *Hesboun*. But in our present ignorance of these regions all this must be mere conjecture. Gesenius (*Thes.* 1119 a) gives it as his opinion that Baal-Peor derived his name from the mountain, not the mountain from him.

A Peor, under its Greek garb of *Phagor*, appears among the eleven names added by the LXX. to the list of the allotment of Judah, between Bethlehem and Aitan (Etham). It was known to Eusebius and Jerome, and is mentioned by the latter in his translation of the *Onomasticon* as *Phaora*. It probably still exists under the name of *Beit Fâghôr* or *Kirbet Fâghôr*, 5 miles S.W. of Bethlehem, barely a mile to the left of the road from Hebron (Tobler, *3tte Wanderung*). It is somewhat singular that both Peor and Pisgah, names so prominently connected with the East of Jordan, should be found also on the West.

The LXX. also read the name, which in the Hebrew text is *Pau* and *Pai*, as *Peor*; since in both cases they have *Phayôr*.

2. (פְּעֹֿֿר, without the article: *פְּעֹֿֿר: idem Phœhor; Phœhor; Beel Phœhor*). In four passages (Num. xxv. 18, twice; xxxi. 16; Josh. xxi. 17) Peor occurs as a contraction for Baal-peor; always in reference to the licentious rites of Shittim which brought such destruction on Israel. In the three first cases the expression is, the "matter," or "for the sake" (literally "word" in each) "of Peor;" in the fourth, "iniquity, or crime, of Peor." [G.]

**PERA'ZIM, MOUNT** (הַר פְּרָצִים: *mons divisiōrum*). A name which occurs in Is. xxviii. 21 only,—unless the place which designates be identical with the BAAL-PERAZIM mentioned as the scene of one of David's victories over the Philistines. Isaiah, as his manner was (comp. x. 26), is referring to some ancient triumphs of the arms of Israel as symbolical of an event shortly to happen—

Jehovah shall rise up as at Mount Perazim.  
He shall be wroth as in the valley of Gibeon.

The commentators almost unanimously take his reference to be to David's victories, above alluded to, at Baal Perazim, and Gibeon (Gesenius; Strachey), or to the former of these on the one hand, and Joshua's slaughter of the Canaanites at Gibeon and Beth-horon on the other (Eichhorn; Rosenmüller; Michaelis). Ewald alone—perhaps with greater critical sagacity than the rest—doubts that David's victory is intended, "because the prophets of this period are not in the habit of choosing such examples from his history" (*Propheten*, i. 261).

If David's victory is alluded to in this passage of the prophet, it furnishes an example, similar to that noticed under OREB, of the slight and casual manner in which events of the gravest importance are sometimes passed over in the Bible narrative. But for this later reference no one would infer that the events reported in 2 Sam. v. 18-25, and 1 Chr. xiv. 8-17, had been important enough to serve as a parallel to one of Jehovah's most tremendous judgments. In the account of Josephus (*Ant.* vi. 4, §1), David's victory assumes much larger proportions than in Samuel and Chronicles. The attack is made not by the Philistines only, but by "all Syria and Phœnicia, with many other warlike nations besides." This is a good instance of the manner in

\* Perhaps considering the word as derived from *פָּרַץ*, which the LXX. usually render by *δεδρῆναι*.

which Josephus, apparently from records now lost to us, supplements and completes the scanty narratives of the Bible, in agreement with the casual references of the Prophets or Psalmists. He places the scene of the encounter in the "groves of weeping" as if alluding to the Baca of Ps. lxxxiv.

The title *Mount Perazim*, when taken in connexion with the *Baal Perazim* of 2 Sam. v. seems to imply that it was an eminence with a heathen sanctuary of Baal upon it. [BAAL, vol. i. p. 148.] [G.]

**PERESH** (פֶּרֶשׁ; *φάρις*: *Phares*). The son of Machir by his wife Maachah (1 Chr. vii. 16).

**PEREZ** (פֶּרֶז; *φάρις*: *Phares*). The "children of Perez," or Pharez, the son of Judah, appear to have been a family of importance for many centuries. In the reign of David one of them was chief of all the captains of the host for the first month (1 Chr. xxvii. 3; and of those who returned from Babylon, to the number of 468, some occupied a prominent position in the tribe of Judah, and are mentioned by name as living in Jerusalem (Neh. xi. 4, 6). [PHAREZ.]

**PEREZ-UZZAH** (פֶּרֶז עֲזָה; *Διακωτή 'Οζά*: *diakōtē Oza*), 1 Chr. xiii. 11; and

**PEREZ-UZZAH** (פֶּרֶז עֲזָה; *percussio Oza*), 2 Sam. vi. 8. The title which David conferred on the threshing-floor of Nachon, or Cidon, in commemoration of the sudden death of Uzzah: "And David was wroth because Jehovah had broken this breach on Uzzah and he<sup>a</sup> called the place 'Uzzah's breaking' unto this day." The word *perez* was a favourite with David on such occasions. He employs it to commemorate his having "broken up" the Philistine force in the valley of Rephaim (2 Sam. v. 20). [BAAL PERAZIM.] He also uses it in a subsequent reference to Uzzah's destruction in 1 Chr. xv. 13.

It is remarkable that the statement of the continued existence of the name should be found not only in Samuel and Chronicles, but also in Josephus, who says (*Ant.* vii. 4, §2), as if from his own observation, "the place where he died is even now (*ἐτι νῦν*) called 'the cleaving of Oza.'"

The situation of the spot is not known. [NACHON.] If this statement of Josephus may be taken literally, it would however be worth while to make some search for traces of the name between Jerusalem and Kirjath-jearim. [G.]

**PERFUMES** (קְטֹרֶת). The free use of perfumes was peculiarly grateful to the Orientals (*Prov.* xvii. 9), whose olfactory nerves are more than usually sensitive to the offensive smells engendered by the heat of their climate (Burckhardt's *Travels*, ii. 85). The Hebrews manufactured their perfumes chiefly from spices imported from Arabia, though to a certain extent also from aromatic plants growing in their own country. [SPICES.] The modes in which they applied them were various: occasionally a bunch of the plant itself was worn about the person as a nosegay, or enclosed in a bag (*Cant.* i. 13); or the plant was reduced to a powder and used in the way of fumigation (*Cant.* iii. 6); or, again, the aromatic qualities were extracted by

some process of boiling, and were then mixed with oil, so as to be applied to the person in the way of ointment (*John* xii. 3); or, lastly, the scent was carried about in smelling-bottles<sup>b</sup> suspended from the girdle (*Is.* iii. 20). Perfumes entered largely into the Temple service, in the two forms of incense and ointment (*Ex.* xxx. 22-38). Nor were they less used in private life: not only were they applied to the person, but to garments (*Ps.* xlv. 8; *Cant.* iv. 11), and to articles of furniture, such as beds (*Prov.* vii. 17). On the arrival of a guest the same compliments were probably paid in ancient as in modern times; the rooms were fumigated; the person of the guest was sprinkled with rose-water; and then the incense was applied to his face and beard (*Dan.* ii. 46; *Lane's Mod. Eg.* ii. 14). When a royal personage went abroad in his litter, attendants threw up "pillars of smoke"<sup>c</sup> about his path (*Cant.* iii. 6). Nor is it improbable that other practices, such as scenting the breath by chewing frankincense (*Lane*, i. 246), and the skin by washing in rose-water (Burckhardt's *Arab.* i. 68), and fumigating drinkables (*Lane*, i. 185; Burckhardt, i. 52), were also adopted in early times. The use of perfumes was omitted in times of mourning, whence the allusion in *Is.* iii. 24, "instead of sweet smell there shall be stink." The preparation of perfumes in the form either of ointment or incense was a recognised profession<sup>d</sup> among the Jews (*Ex.* xxx. 25, 35; *Exod.* x. 1). [W. L. B.]

**PERGA** (Πέργη), an ancient and important city of Pamphylia, situated on the river Cestius, at a distance of 60 stadia from its mouth, and celebrated in antiquity for the worship of Artemis (Diana), whose temple stood on a hill outside the town (*Strab.* xiv. 607; *Cic. Ferr.* i. 20; *Plin.* v. 26; *Mela*, i. 14; *Ptol.* v. 5, §7). The goddess and the temple are represented in the coins of Perga. The Cestius was navigable to Perga; and St. Paul landed here on his voyage from Paphos (*Acts* xiii. 13). He visited the city a second time on his return from the interior of Pamphylia, and preached the Gospel there (*Acts* xiv. 25). For further details see PAMPHYLIA. There are still extensive remains of Perga at a spot called by the Turks *Esti-Kalei*, (*Leake, Asia Minor*, p. 132; *Fellows, Asia Minor*, p. 190).

**PERGAMOS** (ἡ Πέργαμος, or τὸ Πέργαμον). A city of Mysia, about three miles to the N. of the river *Bakyr-kehui*, the Cæicus of antiquity, and twenty miles from its present mouth. The name was originally given to a remarkable hill, presenting a conical appearance when viewed from the plain. The local legends attached a sacred character to this place. Upon it the Cabiri were said to have been witnesses of the birth of Zeus, and the whole of the land belonging to the city of the same name which afterwards grew up around the original Pergamos, to have belonged to these. The sacred character of the locality, combined with its natural strength, seems to have made it, like some others of the ancient temples, a bank for chiefs who desired to accumulate a large amount of specie; and Lyzi-machus, one of Alexander's successors, deposited there an enormous sum—no less than 9000 talents—in the care of an Asiatic eunuch named

<sup>a</sup> Or, with equal accuracy, and perhaps more convenience, "one called it," that is, "it was called"—as in *N. K.* xviii. 4. [NECHUSHTAN.]

<sup>b</sup> קְטֹרֶת; *ktoret*; lit. "houses of the soul."

<sup>c</sup> A similar usage is recorded of the Indian princes

"Quam rex semet in publico conspici patitur, turbula argentea ministri ferunt, totumque iter per quod iteri destinavit odorem complent" (*Caesars* viii. 9, §23).

<sup>d</sup> קָנָן; A. V. "apothecary."

**Philetærus.** In the troublous times which followed the break up of the Macedonian conquests, this officer betrayed his trust, and by successful temporizing, and perhaps judicious employment of the funds at his command, succeeded in retaining the treasure and transmitting it at the end of twenty years to his nephew Eumenes, a petty dynast in the neighbourhood. Eumenes was succeeded by his cousin Attalus, the founder of the Attalic dynasty of Pergamene kings, who by allying himself with the rising Roman power laid the foundation of the future greatness of his house. His successor, Eumenes II., was rewarded for his fidelity to the Romans in their wars with Antiochus and Perseus by a gift of all the territory which the former had possessed to the north of the Taurus range. The great wealth which accrued to him from this source he employed in laying out a magnificent residential city, and adorning it with temples and other public buildings. His passion, and that of his successor, for literature and the fine arts, led them to form a library which rivalled that of Alexandria; and the impulse given to the art of preparing sheepskins for the purpose of transcription, to gratify the taste of the royal *dilettanti*, has left its record in the name *parchment* (*charta pergamena*). Eumenes's successor, Attalus II., is said to have bid 600,000 sesterces for a picture by the painter Aristides, at the sale of the plunder of Corinth; and by so doing to have attracted the attention of the Roman general Mummius to it, who sent it off at once to Rome, where no foreign artist's work had then been seen. For another picture by the same artist he paid 100 talents. But the great glory of the city was the so-called Nicephorium, a grove of extreme beauty, laid out as a thank-offering for a victory over Antiochus, in which was an assemblage of temples, probably of all the deities, Zeus, Athenè, Apollo, Aesculapius, Dionysus, and Aphrodité. The temple of the last was of a most elaborate character. Its façade was perhaps inlaid after the manner of *pietra dura* work; for Philip V. of Macedonia, who was repulsed in an attempt to surprise Pergamos during the reign of Attalus II., vented his spite in cutting down the trees of the grove, and not only destroying the Aphrodisium, but injuring the stones in such a way as to prevent their being used again. At the conclusion of peace it was made a special stipulation that this damage should be made good.

The Attalic dynasty terminated B.C. 133, when Attalus III., dying at an early age, made the Romans his heirs. His dominions formed the province of *Asia propria*, and the immense wealth which was directly or indirectly derived from this legacy, contributed perhaps even more than the spoils of Carthage and Corinth to the demoralization of Roman statesmen.

The sumptuousness of the Attalic princes had raised Pergamos to the rank of the first city in Asia as regards splendour, and Pliny speaks of it as without a rival in the province. Its prominence, however, was not that of a commercial town, like Ephesus or Corinth, but arose from its peculiar features. It was a sort of union of a pagan cathedral city, an university town, and a royal residence, embellished during a succession of years by kings who all had a passion for expenditure and ample means of gratifying it. Two smaller streams, which flowed from the north, embracing the town between them, and then fell into the Caicus, afforded ample means of storing water, without which, in those

intitudes, ornamental cultivation (or indeed cultivation of any kind) is out of the question. The larger of those streams—the *Beryama-ichai*, a Cetus of antiquity—has a fall of more than 150 feet between the hills to the north of Pergamos and its junction with the Caicus, and it brings down a very considerable body of water. Both the Nicephorium, which has been spoken of above, and the Grove of Aesculapius, which became yet more celebrated in the time of the Roman empire, doubtless owed their existence to the means of irrigation thus available; and furnished the appliances for those licentious rituals of pagan antiquity which flourished wherever there were groves and hill-altars. Under the Attalic kings, Pergamos became a city of temples, devoted to a sensuous worship; and being in its origin, according to pagan notions, sacred place, might not unnaturally be viewed by Jews and Jewish Christians, as one "where was the throne of Satan" (*ὅπου ὁ θρόνος τοῦ Σατανᾶ*, Rev. ii. 13).

After the extinction of its independence, the moral character of Pergamos seems to have been put even more prominently forward. Coins and inscriptions constantly describe the Pergamenes as *νεοκῆποι νεοκῆποι πᾶσι τῆς Ἀσίας*. This title always indicates the duty of maintaining a religious worship of some kind (which indeed naturally goes together with the usufruct of religious property). What the deities were to which this title has reference especially, it is difficult to say. In the time of Martial, however, Aesculapius had acquired so much prominence that he is called *Pergameus deus*. His grove was recognised by the Roman senate in the reign of Tiberius as possessing the rights of sanctuary. Pausanias, too, in the course of his work, refers more than once to the Aesculapian ritual at Pergamos as a sort of standard. From the circumstance of this notoriety of the Pergamene Aesculapius, from the title *Ἰατρίη* being given to him, from the *aspid* (which Judaical Christians would regard as a symbol of evil) being his characteristic emblem, and from the fact that the medical practice of antiquity included charms and incantations among its agencies, it has been supposed that the expressions *ὁ θρόνος τοῦ Σατανᾶ* and *ὅπου ὁ Σατανᾶς κατοικεῖ* have an especial reference to this one pagan deity, and not to the whole city as a sort of focus of idolatrous worship. But although undoubtedly the Aesculapian worship of Pergamos was the most famous, and in later times became continually more predominant from the fact of its being combined with an excellent medical school (which among others produced the celebrated Galen), yet an inscription of the time of Marcus Antoninus distinctly puts Zeus, Athenè, Dionysus, and Aesclepius in a co-ordinate rank, as all being special tutelary deities of Pergamos. It seems unlikely, therefore, that the expressions above quoted should be so interpreted as to isolate one of them from the rest.

It may be added, that the charge against a portion of the Pergamene Church that some among them were of the school of Balaam, whose policy was "to put a stumbling-block before the children of Israel, by inducing them *φάγειν εἰδωλῶματα καὶ ποτεῖσθαι*" (Rev. ii. 14), is in both its particulars very inappropriate to the Aesculapian ritual. It points rather to the Dionysian and Aphroditic worship; and the sin of the Nicolaitans, which is condemned, seems to have consisted in a participation in this, arising out of a social amalgamation of themselves with the native population. Now, from the time of the war with Antiochus at least, it is certain that there was

table Jewish population in Pergamene territory. The decree of the Pergamenes quoted by *Ant.* xiv. 10, §22, seems to indicate Jews had farmed the tithes in some of the soil of their territory, and likewise were nobles. They are—in accordance with the expressed wish of the Roman senate—allowed to levy portions on all vessels except those belonging to kings. The growth of a large and wealthy class leads to its obtaining a share in political life and the only bar to the admission of Jews to citizenship in Pergamon would be their refusal to take any part in the religious ceremonies which were an essential part of every religious festival in pagan times. The more lax, however, regard such a proceeding as a purely formal violation of obedience, and reconcile themselves to it as they did to "bowing himself in the house of God" when in attendance upon his sovereign. It is worth noticing, with reference to this fact, that a Pergamene inscription published by *Levy* mentions by two names (*Nicostratus*, who called *Trypho*) an individual who served the gymnasium. Of these two names the former one, is likely to have been borne by some special body to which he belonged, and the latter to have been adopted when, by assuming the position of an official, he merged himself in the general Greek population.

**PERIDA** (פֶּרִידָא: *Peridā*; *Alex.* *Περειδά*: *Perēidā*). The children of Perida returned from Babylon with Zerubbabel (*Neh.* vii. 57). In *Ezra* the name appears as *PERUDA*, and in 1 *Esd.* as *PHARIDA*. One of Kennicott's MSS. has *la* in *Neh.*

#### PERIZZITE, THE, AND PERIZZITES

in all cases in the Heb. singular: of *Perizzite* in *Ezra* only *δ Περεισθελ*: *Pherezaeus*). One of the nations inhabiting the Land of Promise before the time of its conquest by Israel. They are mentioned in the catalogue of *Gen.* x. 1; so that their name is like that of other small tribes, such as the *Amorites* and the similarly named *Gerizzites*, is left intact. They are continually mentioned in the Bible so frequently occurring to express the *Progeny* (*Gen.* xv. 20; *Ex.* iii. 8, 17; *xxiii.* 23, *l.* xxxiv. 11; *Deut.* vii. 1, *xx.* 17; *Josh.* iii. 1, *xxiv.* 11; *Judg.* iii. 5; *Ezra.* ix. 1; *Neh.* vi. 1). They appear, however, with somewhat greater prominence on several occasions. On Abram's first entry into the land it is said to have been occupied by "the Canaanite and the Perizzite" (*Gen.* xii. 6).

Jacob also, after the massacre of the Shechemites, uses the same expression, complaining that they had "made him to stink among the inhabitants of the land, among the Canaanites and the Perizzites" (*xxiv.* 30). So also in the detailed records of conquest given in the opening of the book of *Judg.* evidently from a distinct source to those in *Josh.* Judah and Simeon are said to have found territory occupied by "the Canaanite and the Perizzite" (*Judg.* i. 4, 5).

with Bezek (a place not yet discovered) as their stronghold, and Adoni-bezek their most noted chief. And thus too a late tradition, preserved in 2 *Esd.* i. 21, mentions only "the Canaanites, the Pherezeites, and the Philistines," as the original tenants of the country. The notice just cited from the book of *Judg.* locates them in the southern part of the Holy Land. Another independent and equally remarkable fragment of the history of the conquest seems to speak of them as occupying, with the *Rephaim*, or giants, the "forest country" on the western flanks of Mount Carmel (*Josh.* xvii. 15-18). Here again the Canaanites only are named with them. As a tribe of mountaineers, they are enumerated in company with *Amorites*, *Hittites*, and *Jebusites* in *Josh.* xi. 3, *xii.* 8; and they are catalogued among the remnants of the old population whom Solomon reduced to bondage, both in 1 *K.* ix. 20, and 2 *Chr.* viii. 7. By *Josephus* the *Perizzites* do not appear to be mentioned.

The signification of the name is not by any means clear. It possibly meant rustics, dwellers in open, unwall'd villages, which are denoted by a similar word. *Ewald* (*Geschichte*, i. 317) inclines to believe that they were the same people with the *Hittites*. But against this there is the fact that both they and the *Hittites* appear in the same lists; and that not only in mere general formulas, but in the records of the conquest, as above. *Redalob* has examined the whole of these names with some care (in his *Alttestam. Namen der Israeliten*, 1846), and his conclusion (p. 103) is that, while the *Chitroth* were villages of tribes engaged in the care of cattle, the *Perizzites* were inhabited by peasants engaged in agriculture, like the *Fellahs* of the Arabs. [G.]

**PERSEPOLIS** (Περσέπολις; *Persepolis*) is mentioned only in 2 *Macc.* ix. 2, where we hear of Antiochus Epiphanes attempting to burn its temples, but provoking a resistance which forced him to fly ignominiously from the place. It was the capital of Persia Proper, and the occasional residence of the Persian court from the time of Darius Hystaspis, who seems to have been its founder, to the invasion of Alexander. Its wanton destruction by that conqueror is well known. According to *Q. Curtius* the destruction was complete, as the chief building material employed was cedar-wood, which caused the conflagration to be rapid and general (*De Rebus Alex. Magn.* v. 7). Perhaps the temples, which were of stone, escaped. At any rate, if ruined, they must have been shortly afterwards restored, since they were still the depositories of treasure in the time of Epiphanes.

Persepolis has been regarded by many as identical with *Pasargadae*, the famous capital of Cyrus (see *Niebuhr's Lectures on Ancient History*, i. 115; *Osseley, Travels*, ii. 316-318). But the positions are carefully distinguished by a number of ancient writers (*Strab.* xv. 3, §6, 7; *Plin.* *H. N.* vi. 26; *Arrian.* *Exp. Alex.* vii. 1; *Ptolemy.* vi. 4); and the ruins, which are identified beyond any reasonable doubt, show that the two places were more than 40 miles apart. *Pasargadae* was at *Murgab*, where the tomb of Cyrus may still be seen; *Persepolis* was 42 miles to the south of this, near *Istakher*, on the site now called the *Chehl-Minar*, or Forty Pillars. Here, on a platform hewn out of the solid rock, the sides of which face the four cardinal points,

to be alluded to, and translated accordingly. In *Josh.* xvi. 10 they add the *Perizzites* to the *Canaanites* as inhabitants of Gazer.

*MANASSEH*, vol. ii. 220a.

*Per-hap-perazi*, A. V. "country villages" (1 *Sam.* xxi. 10); *Per-hap-perazi*, "unwall'd towns" (*Josh.* iii. 8). These passages the LXX. understand as the *Perizzites*.

are the remains of two great palaces, built respectively by Darius Hystaspis and his son Xerxes, besides a number of other edifices, chiefly temples. These ruins have been so frequently described that it is unnecessary to do more than refer the reader to the best accounts which have been given of them (Niebuhr, *Reise*, ii. 121; Chardin, *Voyages*, ii. 245; Ker Porter, *Travels*, i. 374; Heeren, *Asiatic Nations*, i. 143-196; Rich, *Residence in Kurdistan*, vol. ii. pp. 218-222; Fergusson, *Palaces of Ninus and Persepolis Restored*, pp. 89-124, &c.). They are of great extent and magnificence, covering an area of many acres. At the foot of the rock on which they are placed, in the plain now called *Merdisht*, stood probably the ancient town, built chiefly of wood, and now altogether effaced.

Persepolis may be regarded as having taken the place of Pasargadae, the more ancient capital of

Persia Proper, from the time of Darius Hystaspis. No exact reason can be given for this change, which perhaps arose from mere royal caprice, Darius having taken a fancy to the locality, near which he made his tomb. According to Athenæus the court resided at Persepolis during three months of each year (*Deipnosoph.*, xii. p. 513, F.), but the conflicting statements of other writers (Xen. *Cyrop.* viii. 5, §22; Plut. *de Exil.* ii. p. 604; Zonar. i. 26, &c.) make this uncertain. We cannot doubt, however, that it was one of the royal residences; and we may well believe the statement of Strabo, that, in the later times of the empire, it was, next to Susa, the richest of all the Persian cities (*Geograph.* xv. 3, §6). It does not seem to have long survived the blow inflicted upon it by Alexander; for after the time of Antiochus Epiphanes it disappears altogether from history as an inhabited place. [G. G.]

Persepolis.

**PERSEUS** (Περσεύς: *Persēs*), the eldest (illegitimate or supposititious?) son of Philip V. and last king of Macedonia. After his father's death (B.C. 179) he continued the preparations for the renewal of the war with Rome, which was seen to be inevitable. The war, which broke out in B.C. 171, was at first ably sustained by Persens; but in 169 he was defeated by L. Aemilius Paullus at Pydna, and shortly afterwards surrendered with his family to his conquerors. He graced the triumph of Paullus, and died in honourable retirement at Alba. The defeat of Perseus put an end to the independence of Macedonia, and extended even to Syria the terror of the Roman name (1 Macc. viii. 5). [B. F. W.]

**PERSIA** (Πέρς, i. e. Πέρσις: *Persis*), was strictly the name of a tract of no very large dimensions on the Persian Gulf, which is still known as *Fars*, or *Farsistan*, a corruption of the ancient appellation. This tract was bounded, on the west, by Susiana or Elam, on the north by Media, on the east by the Persian Gulf, and on the east by Carmania, the modern *Kerman*. It was, speaking generally, arid and unproductive region (Hærod. ix. 122; *Art. Lex. Alex.* v. 4; *Plat. Leg.* iii. p. 695, A.); but contained some districts of considerable fertility. The west part of the country was that towards the south, on the borders of the Gulf, which has a climate and soil like Arabia, being sandy and almost without streams, subject to pestilential winds, and in many places covered with particles of salt. Above this miserable region is a tract very far superior to it, consisting of rocky mountains—the continuation of Zagros, among which are found a good many fertile valleys and plains, especially towards the north, in the vicinity of Shiraz. Here is an important stream, the *Endamir*, which flowing through the beautiful valley of *Merdisht*, and by the ruins of Persepolis, is then separated into numerous channels for the purpose of irrigation, and after fertilizing a large tract of country (the district of *Amyjan*), ends its course in the salt lake of *Bak*.

oranges, and lemons, are produced in this region; and the wine of *Shiraz* is throughout Asia. Further north an arid succeeds, the outskirts of the Great extends from Kernan to Mazenderan, and to Lake Zerrah.

*Strabo*, vi. 4) divides Persia into a number of provinces, among which the most important are those of the north, which was called Media (Herod. i. 13.; Steph. *Παρθάνα*), and Mardyané on the south, the country of the Mardi. The chief cities were Sardis, the ancient, and Persepolis, the new. Pasargadae was situated near the mouth of the *Murgab*, 42 miles nearly due north, and appears to have been the residence of Darius, who chose the site in the valley of the Bendamir, *chh Minar* or "Forty Pillars" still to be seen. Among other cities of Persia were Parnetaca and Gabae in the north, and Taos upon the coast. *Plin. H. N.* vi. 25, *Strabo*, vi. 4; Kinneir's *Persian* 54-80; Malcolm, *History of Persia* Porter, *Travels*, i. 458, *Journey from Bushire to Per-*

district of *Fars* is the true name, the name is more commonly used in Scripture and by profane writers for the entire tract which came by included within the limits of the empire. This empire extended from India on the east to Egypt upon the west, and included, besides Europe and Africa, the eastern Asia between the Black Sea, the Caspian, and the north, the Arabian desert, and the Indian Ocean upon according to Herodotus (iii. 89), divided into twenty governments,

but from the inscriptions it appears that the number varied times, and, when the empire was at its height, considerably exceeded the number upon his tomb *Rustam* (Darius mentions no thirty countries as subject to Persia Proper. These are—Media, Parthia, Aria, Bactria, Sogdiana, Zarmugia, Arachosia, Sattagydia, Scythia, Babylonia, Assyria, Arabia, Cappadocia, Sardis, Ionia, (European) Ionia, the country of the Egean, the country of the Buthians, the Cushites or Ethiopians, and the Colchians.

The passage in Scripture where Persia is designated which has been called "the land of the East" is Ez. xxxviii. 5. Elsewhere the word is used.

[G. R.]

**ΠΕΡΣΙΑ** (*Persai*; *Persae*). The people who inhabited the country called "Persia," and who thence conquered the world. There is reason to believe that they were of the same race as the Medes, and of the great Arian stock, which names established their sway over the western Mesopotamia and Bactria. The

name in the form of the name is *Paras*, which the Hebrew *פָּרַס* fairly represents, and which remains but little changed in the modern "Paras." It is conjectured to signify "the Tigers."

1. *Character of the nation.*—The Persians were a people of lively and impressive minds, brave and impetuous in war, witty, passionate, for Orientals truthful, not without some spirit of generosity, and of more intellectual capacity than the generality of Asiatics. Their faults were vanity, impulsiveness, a want of perseverance and solidity, and an almost slavish spirit of sycophancy and servility towards their lords. In the times anterior to Cyrus they were noted for the simplicity of their habits, which offered a strong contrast to the luxuriousness of the Medes; but from the date of the Median overthrow, this simplicity began to decline; and it was not very long before their manners became as soft and effeminate as those of any of the conquered peoples. They adopted the flowing Median robe (Fig. 1) which was probably of silk, in lieu of the old national costume

Fig. 1. Median dress.

Fig. 2. Old Persian dress.

(Fig. 2)—a close-fitting tunic and trousers of leather (Herod. i. 71; compare i. 135); beginning at the same time the practice of wearing on their persons chains, bracelets, and collars of gold, with which precious metal they also adorned their horses. Polygamy was commonly practised among them; and besides legitimate wives a Persian was allowed any number of concubines. They were fond of the pleasures of the table, indulging in a great variety of food, and spending a long time over their meals, at which they were accustomed to swallow large quantities of wine. In war they fought bravely, but without discipline, generally gaining their victories by the vigour of their first attack; if they were strenuously resisted, they soon flagged; and if they suffered a repulse, all order was at once lost, and the retreat speedily became a rout.

2. *Religion.*—The religion which the Persians brought with them into Persia Proper seems to have been of a very simple character, differing from

natural religion in little, except that it was deeply tainted with Dualism. Like the other Aryans, the Persians worshipped one Supreme God, whom they called *Aura-mazda* (*Oromasdes*)—a term signifying (as is believed) "the Great Giver of Life." From *Oromasdes* came all blessings—"he gave the earth, he gave the heavens, he gave mankind, he gave life to mankind" (Inscriptions, *passim*)—he settled the Persian kings upon their thrones, strengthened them, established them, and granted them victory over all their enemies. The royal inscriptions rarely mention any other god. Occasionally, however, they indicate a slight and modified polytheism. *Oromasdes* is "the chief of the gods," so that there are other gods besides him; and the highest of these is evidently *Mithra*, who is sometimes invoked to protect the monarch, and is beyond a doubt identical with "the sun." To the worship of the sun as *Mithra* was probably attached, as in India, the worship of the moon, under the name of *Homa*, as the third greatest god. Entirely separate from these—their active resister and antagonist—was *Ahriman* (*Arimanius*) "the Death-dealing"—the powerful, and (probably) self-existing Evil Spirit, from whom war, disease, frost, hail, poverty, sin, death, and all other evils, had their origin. *Ahriman* was Satan, carried to an extreme—believed to have an existence of his own, and a real power of resisting and defying God. *Ahriman* could create spirits, and as the beneficent *Auramazda* had surrounded himself with good angels, who were the ministers of his mercies towards mankind, so *Ahriman* had surrounded himself with evil spirits, to carry out his malevolent purposes. Worship was confined to *Auramazda*, and his good spirits; *Ahriman* and his demons were not worshipped, but only hated and feared.

The character of the original Persian worship was simple. They were not destitute of temples, as Herodotus asserts (Herod. i. 131; compare *Beh. Inscr.* col. i. par. 14, §5); but they had probably no altars, and certainly no images. Neither do they appear to have had any priests. Processions were formed, and religious chants were sung in the temples, consisting of prayer and praise intermixed, whereby the favour of *Auramazda* and his good spirits was supposed to be secured to the worshippers. Beyond this it does not appear that they had any religious ceremonies. Sacrifices, apparently, were unknown; though thank-offerings may have been made in the temples.

From the first entrance of the Persians, as immigrants, into their new territory, they were probably brought into contact with a form of religion very different from their own. Magianism, the religion of the Scythic or Turanian population of Western Asia, had long been dominant over the greater portion of the region lying between Mesopotamia and India. The essence of this religion was worship of the elements—more especially, of the subtlest of all, fire. It was an ancient and imposing system, guarded by the venerable hierarchy of the Magi, boasting its fire-altars where from time immemorial the sacred flame had burnt without intermission, and claiming to some extent mysterious and miraculous powers. The simplicity of the Aryan religion was speedily corrupted by its contact with this powerful rival, which presented special attractions to a rude and credulous people. There was a short struggle for pre-eminence, after which the rival systems came to terms. Dualism was retained, together with the names of *Auramazda* and *Ahriman*, and the special worship of the sun and

moon under the appellations of *Mithra* and *Homa*; but to this was superadded the worship of the elements and the whole ceremonial of Magianism, including the divination to which the Magian priesthood made pretence. The worship of other deities as *Tanata* or *Anaitis*, was a still later addition to the religion, which grew more complicated as time went on, but which always maintained as its leading and most essential element that Dualistic principle whereon it was originally based.

3. *Language*.—The language of the ancient Persians was closely akin to the Sanskrit, or ancient language of India. We find it in its earliest stage in the *Zendavesta*—the sacred book of the whole Aryan race, where, however, it is corrupted by a large admixture of later forms. The inscriptions of the Achaemenian kings give us the language in its second stage, and, being free from these later additions, are of the greatest importance towards determining what was primitive, and what more recent in this type of speech. Modern Persian is its degenerate representative, being, as it is, a motley idiom, largely impregnated with Arabic; still, however, both in its grammar and its vocabulary, it is mainly Aryan; and historically, it must be regarded as the continuation of the ancient tongue, just as Italian is of Latin, and modern of ancient Greek.

4. *Division into tribes, &c.*—Herodotus tells us that the Persians were divided into ten tribes, of which three were noble, three agricultural, and four nomadic. The noble tribes were the *Pasargadae*, who dwelt, probably, in the capital and its immediate neighbourhood; the *Maraphians*, who are perhaps represented by the modern *Máfee*, a Persian tribe which prides itself on its antiquity; and the *Maspianians*, of whom nothing more is known. The three tribes engaged in agriculture were called the *Panthialaeans*, the *Derusians*, and the *Germanians*, or (according to the true orthography) the *Carnians*. These last were either the actual inhabitants of *Kerman*, or settlers of the same race, who remained in Persia while their fellow-tribemen occupied the adjoining regions. The nomadic tribes are said to have been the *Dahi*, who appear in Scripture as the "Dehavites" (Ezr. iv. 9), the *Mardi*, mountaineers famous for their thievish habits (Soph. Byz.), together with the *Sagartians* and the *Derbices* or *Dropici*, colonists from the regions east of the Caspian. The royal race of the Achaemenians was a phratry or clan of the *Pasargadae* (Herod. i. 126); to which it is probable that most of the noble houses likewise belonged. Little is heard of the *Maraphians*, and nothing of the *Maspianians*, is history; it is therefore evident that their nobility was very inferior to that of the leading tribe.

5. *History*.—In remote antiquity it would appear that the Persians dwelt in the region east of the Caspian, or possibly in a tract still nearer India. The first Fargard of the *Vendidad* seems to describe their wanderings in these countries, and shows the general line of their progress to have been from east to west, down the course of the *Oxus*, and then, along the southern shores of the Caspian Sea, to *Rhages*, and *Media*. It is impossible to determine the period of these movements; but there can be no doubt that they were anterior to B.C. 880, at which time the Assyrian kings seem for the first time to have come in contact with Aryan tribes east of Mount Zagros. Probably the Persians accompanied the *Medes* in their migration from *Khorassan*, and, after the latter people took possession of the tract extending from the river *Kur* to *Ispahan*, proceeded still further

south, and occupied the region between Media and the Persian Gulf. It is uncertain whether they are to be identified with the *Bartas* or *Partas* of the Assyrian monuments. If so, we may say that from the middle of the 9th to the middle of the 8th century B.C. they occupied south-eastern Armenia, but by the end of the 8th century had removed into the country, which thenceforth went by their name. The leader of this last migration would seem to have been a certain Achaemenes, who was recognized as king of the newly-occupied territory, and founded the famous dynasty of the Achaemenidae, about B.C. 700. Very little is known of the history of Persia between this date and the accession of Cyrus the Great, near a century and a half later. The crown appears to have descended in a right line through four princes—Tespas, Cambyses I., Cyrus I., and Cambyses II., who was the father of Cyrus the Conqueror. Tespas must have been a prince of some repute, for his daughter, Atossa, married Pharnaces, king of the distant Cappadocians (Diod. Sic. ap. Phot. *Bibliotheca*, p. 1158). Later, however, the Persians found themselves unable to resist the growing strength of Media, and became tributary to that power about B.C. 630, or a little earlier. The line of native kings was continued on the throne, and the internal administration was probably untouched; but external independence was altogether lost until the revolt under Cyrus.

Of the circumstances under which this revolt took place we have no certain knowledge. The stories told by Herodotus (i. 108-129) and Nicolas of Damascus (*Fr.* 66) are internally improbable; and they are also in variance with the monuments, which prove Cyrus to have been the son of a Persian king. [See CYRUS.] We must therefore disregard them, and be content to know that after about seventy or eighty years of subjection, the Persians revolted from the Medes, engaged in a bloody struggle with them, and finally succeeded, not only in establishing their independence, but in changing places with their masters, and becoming the ruling people.

The probable date of the revolt is B.C. 558, success, by transferring to Persia the dominion previously in the possession of the Medes, placed at the head of an empire, the bounds of which were the Halys upon the west, the Euxine upon the north, Babylonia upon the south, and upon the east the salt desert of Iran. As usual in the East, success led on to others. Croesus the Lydian, who had united most of Asia Minor under his empire, venturing to attack the newly-risen power, was repulsed, and afterwards defeated and taken prisoner by Cyrus, who took his capital, and added the Lydian empire to his dominions. This was followed closely by the submission of the settlements on the Asiatic coast, and by the conquest of Caria, Cnossus, and Lycia. The empire was soon afterwards extended greatly to the north-east and east. Cyrus rapidly overthrew the flat countries beyond the Caspian, planting which he called after himself (*Arr. Exp.* i. 3), on the Jaxartes (*Jyhus*); after which he had pushed his conquests still further east, adding to his dominions the districts of Babel, Candahar, Seistan, and Beloochistan, were thenceforth included in the empire. (*Arr. Pers. Exc.* § 5, et seq.; and compare *H. N.* vi. 23.) In B.C. 539 or 538, Babylon

was attacked, and after a stout defence fell before his irresistible bands. [PABYLON.] This victory first brought the Persians into contact with the Jews. The conquerors found in Babylon an oppressed race—like themselves, abhorers of idols—and professors of a religion in which to a great extent they could sympathize. This race, which the Babylonian monarchs had torn violently from their native land and settled in the vicinity of Babylon, Cyrus determined to restore to their own country; which he did by the remarkable edict recorded in the first chapter of Ezra (*Ezr.* i. 2-4). Thus commenced that friendly connexion between the Jews and Persians, which prophecy had already foreshadowed (*Is.* xlv. 28, xlv. 1-4), and which forms so remarkable a feature in the Jewish history. After the conquest of Babylon, and the consequent extension of his empire to the borders of Egypt, Cyrus might have been expected to carry out the design, which he is said to have entertained (*Herod.* i. 153), of an expedition against Egypt. Some danger, however, seems to have threatened the north-eastern provinces, in consequence of which his purpose was changed; and he proceeded against the Massagetæ or the Derbices, engaged them, but was defeated and slain. He reigned, according to Herodotus, twenty-nine years.

Persian Warriors. (From Persepolis.)

Under his son and successor, Cambyses III., the conquest of Egypt took place (B.C. 525), and the Persian dominions were extended southward to Elephantine and westward to Euesperidæ on the North-African coast. This prince appears to be the Ahasuerus of Ezra (iv. 6), who was asked to alter Cyrus's policy towards the Jews, but apparently declined all interference. We have in Herodotus (book iii.) a very complete account of his warlike expeditions, which at first resulted in the successes above mentioned, but were afterwards unsuccessful, and even disastrous. One army perished in an attempt to reach the temple of Ammon, while another was reduced to the last straits in an expedition against Ethiopia. Perhaps it was in consequence of these misfortunes that, in the absence of Cambyses with the army, a conspiracy was formed against him at court, and a Median priest, Gomates (*Gumtata*; by name, professing to be Smerdis (*Bardiya*), the son of Cyrus, whom his brother, Cambyses, had put to death secretly, obtained quiet possession of the throne. Cambyses was in Syria when news reached him of this bold attempt; and there is reason to believe that, seized with a sudden disgust, and despairing of the recovery of his crown, he fled to the last resort of the unfortunate, and ended his life by suicide (*Behistun Inscription*, col. i. par. 11).

§10). His reign had lasted seven years and five months.

Gomates the Magian found himself thus, without a struggle, master of Persia (B.C. 522). His situation, however, was one of great danger and delicacy. There is reason to believe that he owed his elevation to his fellow-religionists, whose object in placing him upon the throne was to secure the triumph of Magianism over the Dualism of the Persians. It was necessary for him therefore to accomplish a religious revolution, which was sure to be distasteful to the Persians, while at the same time he had to keep up the deception on which his claim to the crown was professedly based, and to prevent any suspicion arising that he was not Smerdis, the son of Cyrus. To combine these two aims was difficult; and it would seem that Gomates soon discarded the latter, and entered on a course which must have soon caused his subjects to feel that their ruler was not only no Achaemenian, but no Persian. He destroyed the national temples, substituting for them the fire-altars, and abolished the religious chants and other sacred ceremonies of the Oromasians. He reversed the policy of Cyrus with respect to the Jews, and forbade by an edict the further building of the Temple (Ezr. iv. 17-22). [ARTAXERXES.] He courted the favour of the subject-nations generally by a remission of tribute for three years, and an exemption during the same space from forced military service (Herod. iii. 67). Towards the Persians he was haughty and distant, keeping them as much as possible aloof from his person, and seldom showing himself beyond the walls of his palace. Such conduct made him very unpopular with the proud people which held the first place among his subjects, and, the suspicion that he was a mere pretender having after some months ripened into certainty, a revolt broke out, headed by Darius, the son of Hystaspes, a prince of the blood-royal, which in a short time was crowned with complete success. Gomates quitted his capital, and, having thrown himself into a fort in Media, was pursued, attacked, and slain. Darius, then, as the chief of the conspiracy, and after his father the next heir to the throne, was at once acknowledged king. The reign of Gomates lasted seven months.

The first efforts of Darius were directed to the re-establishment of the Oromasidian religion in all its purity. He "rebuilt the temples which Gomates the Magian had destroyed, and restored to the people the religious chants and the worship of which Gomates the Magian had deprived them" (*Beh. Inscr.* Col. i. par. 14). Appealed to in his second year, by the Jews, who wished to resume the construction of their Temple, he not only allowed them, confirming the decree of Cyrus, but assisted the work by grants from his own revenues, whereby the Jews were able to complete the Temple as early as his sixth year (Ezr. vi. 1-15). During the first part of the reign of Darius the tranquillity of the empire was disturbed by numerous revolts. The provinces regretted the loss of those exemptions which they had obtained from the weakness of the Pseudo-Smerdis, and hoped to shake off the yoke of the new prince before he could grasp firmly the reins of government. The first revolt was that of Babylon, where a native, claiming to be Nebuchadnezzar, the son of Nabonadius, was made king; but Darius speedily crushed this revolt and executed the pretender. Shortly afterwards a far more extensive rebellion broke out. A Mede, named Phraortes, came forward and, announcing himself to be

"Kathrites, of the race of Cyaxares," assumed the royal title. Media, Armenia, and Assyria immediately acknowledged him—the Median soldiers at the Persian court revolted to him—Parthia and Hyrcania after a little while declared in his favour—while in Sagartia another pretender, making a similar claim of descent from Cyaxares, induced the Sagartians to revolt; and in Margiana, Arachotia, and even Persia Proper, there were insurrections against the authority of the new king. His courage and activity, however, seconded by the valour of his Persian troops and the fidelity of some satraps, carried him successfully through these and other similar difficulties; and the result was, that, after five or six years of struggle, he became as firmly seated on his throne as any previous monarch. His talents as an administrator were, upon this, brought into play. He divided the whole empire into satrapies, and organised that somewhat complicated system of government on which they were henceforth administered (Rawlinson's *Herodotus*, ii. 555-568). He built himself a magnificent palace at Persepolis, and another at Susa [PERSEPOLIS, SHUSHAN]. He also applied himself, like his predecessors, to the extension of the empire; conducted an expedition into European Scythia, from which he returned without disgrace; conquered Thrace, Paeonia, and Macedonia towards the west, and a large portion of India on the east, besides (apparently) bringing into subjection a number of petty nations (see the *Naksh-e-Rostam* inscription). On the whole he must be pronounced, next to Cyrus, the greatest of the Persian monarchs. The latter part of his reign was, however, clouded by reverses. The disaster of Mardonius at Mount Athos was followed shortly by the defeat of Datis at Marathon; and, before any attempt could be made to avenge that blow, Egypt rose in revolt (B.C. 486), massacred its Persian garrison, and declared itself independent. In the palace at the same time there was dissension; and when, after a reign of thirty-six years, the fourth Persian monarch died (B.C. 485), leaving his throne to a young prince of strong and ungoverned passions, it was evident that the empire had reached its highest point of greatness, and was already verging towards its decline.

Xerxes, the eldest son of Darius by Atossa, daughter of Cyrus, and the first son born to Darius after he mounted the throne, seems to have obtained the crown, in part by the favour of his father, over whom Atossa exercised a strong influence, in part by right, as the eldest male descendant of Cyrus the founder of the empire. His first act was to reduce Egypt to subjection (B.C. 484), after which he began at once to make preparations for his invasion of Greece. It is probable that he was the Ahasuerus of Esther. [AHASUERUS.] The great feast held in Shushan the palace in the third year of his reign, and the repudiation of Vasthi, fall into the period preceding the Grecian expedition, while it is probable that he kept open house for the "princes of the provinces," who would from time to time visit the court, in order to report the state of their preparations for the war. The marriage with Esther, in the seventh year of his reign, falls into the year immediately following his flight from Greece, when he undoubtedly returned to Susa, relinquishing warlike enterprises, and henceforth devoting himself to the pleasures of the seraglio. It is unnecessary to give an account of the well-known expedition against Greece, which ended so disastrously for the invaders. Persia was taught

by the defeat of Salamis and Plataea the danger of encountering the Greeks on their side of the Aegean, while she learned at Mycale the retaliation which she had to expect on her own shores at the hands of her infuriated enemies. For a while some vague idea of another invasion seems to have been entertained by the court; \* but discreeter counsels prevailed, and, relinquishing all aggressive designs, Persia from this point in her history stood upon the defensive, and only sought to maintain her own territories intact, without anywhere trenching upon her neighbours. During the rest of the reign of Xerxes, and during part of that of his son and successor, Artaxerxes, she continued at war with the Greeks, who destroyed her fleets, plundered her coasts, and stirred up revolt in her provinces; but at last, in B.C. 449, a peace was concluded between the two powers, who then continued on terms of amity for half a century.

A conspiracy in the seraglio having carried off Xerxes (B.C. 465), Artaxerxes his son, called by the Greeks *Μακρόχειρ*, or "the Long-Handed," succeeded him, after an interval of seven months, during which the conspirator Artabanus occupied the throne. This Artaxerxes, who reigned forty years, is beyond a doubt the king of that name who stood in such a friendly relation towards Ezra (Ezr. vii. 11-28; and Nehemiah (Neh. ii. 1-9, &c.). [ARTAXERXES.] His character, as drawn by Ctesias, is mild but weak; and under his rule the disorders of the empire seem to have increased rapidly. An insurrection in Bactria, headed by his brother Hystaspes, was with difficulty put down in the first year of his reign (B.C. 464), after which a revolt broke out in Egypt, headed by Inarus the Libyan and Amyrtaeus the Egyptian, who, receiving the support of an Athenian fleet, maintained themselves for six years (B.C. 460-455) against the whole power of Persia, but were at last overcome by Megabyzus, satrap of Syria. This powerful and haughty noble soon afterwards (B.C. 447; on the occasion of a difference with the court, himself became a rebel, and entered into a contest with his sovereign, which at once betrayed and increased the weakness of the empire. Artaxerxes is the last of the Persian kings who had any special connexion with the Jews, and the last but one mentioned in Scripture. His successors were Xerxes II., Sogdianus, Darius Nothus, Artaxerxes Mnemon, Artaxerxes Ochus, and Darius Codomannus, who is probably the "Darius the Persian" of Nehemiah (Neh. ii. 22). These monarchs reigned from B.C. 424 to B.C. 330. None were of much capacity; and during their reigns the decline of the empire was visibly arrested for a day, unless it were by Xerxes, who reconquered Egypt, and gave some signs of vigour. Had the younger Cyrus succeeded in his attempt, the regeneration of Persia was, perhaps, possible. After his failure the seraglio was at once more powerful and more cruel. Eunuchs and women governed the kings, and directed the favours of the crown, or wielded its powers, as their interests or passions moved them. Riotous and loyalty were alike dead, and the empire must have fallen many years before it did, had not the Persians early learnt to turn the sword against one another, and at the same time raised the character of their own armies by

the employment, on a large scale, of Greek mercenaries. The collapse of the empire under the attack of Alexander is well known, and requires no description here. On the division of Alexander's dominions among his generals Persia fell to the Seleucidae, under whom it continued till after the death of Antiochus Epiphanes, when the conquering Parthians advanced their frontier to the Euphrates, and the Persians came to be included among their subject-tribes (B.C. 164). Still their nationality was not obliterated. In A.D. 226, three hundred and ninety years after their subjection to the Parthians, and five hundred and fifty-six years after the loss of their independence, the Persians shook off the yoke of their oppressors, and once more became a nation. The kingdom of the Sassanidae, though not so brilliant as that of Cyrus, still had its glories; but its history belongs to a time which scarcely comes within the scope of the present work.

**PERSIS** (Περσίς). A Christian woman at Rome (Rom. xvi. 12) whom St. Paul salutes, and commends with special affection on account of some work which she had performed with singular diligence (see Origen *in loco*). [W. T. B.]

**PER UDA** (פֶּרֶאֱדָא: *Pharudā*). The same as PERIDA (Ezr. ii. 55). The LXX. reading is supported by one of Kennicott's MSS.

**PESTILENCE.** [PLAGUE.]

**PETER** (Πέτρος, the Greek for נָדָב, *Kephās*, *Cephas*, i.e. "a stone" or "rock," on which name see Note at the end of this article). His original name was Simon, שִׁמְעוֹן, i.e. "hearer." The two names are commonly combined, Simon Peter, but in the early part of his history, and in the interval between our Lord's death and resurrection, he is more frequently named Simon; after that event he bears almost exclusively the more honourable designation Peter, or, as St. Paul sometimes writes, Cephas. The notices of this Apostle's early life are few, but not unimportant, and enable us to form some estimate of the circumstances under which his character was formed, and prepared for his great work. He was the son of a man named Jonas (Matt. xvi. 17; John i. 43, xxi. 16), and was brought up in his father's occupation, a fisherman on the sea of Tiberias.\* The occupation was of course a humble one, but not, as is often assumed, mean or servile, or incompatible with some degree of mental culture. His family were probably in easy circumstances. He and his brother Andrew were partners of John and James, the sons of Zebedee, who had hired servants; and from various indications in the sacred

\* The force collected in Pamphylia, which Climon defeated and dispersed (Neh. ii. 46), seems to have been used for aggressive purposes.

\* There is a tradition that his mother's name was Johanna (Coteler, *Pall. Apost.* ii. 63).

narrative we are led to the conclusion that their social position brought them into contact with men of education. In fact the trade of fishermen, supplying some of the important cities on the coasts of that inland lake, may have been tolerably remunerative, while all the necessities of life were cheap and abundant in the singularly rich and fertile district where the Apostle resided. He did not live, as a mere labouring man, in a hut by the sea-side, but first at Bethsaida, and afterwards in a house at Capernaum, belonging to himself or his mother-in-law, which must have been rather a large one, since he received in it not only our Lord and his fellow-disciples, but multitudes who were attracted by the miracles and preaching of Jesus. It is certain that when he left all to follow Christ, he made what he regretted, and what seems to have been admitted by his Master, to have been a considerable sacrifice. The habits of such a life were by no means unfavourable to the development of a vigorous, earnest, and practical character, such as he displayed in after years. The labours, the privations, and the perils of an existence passed in great part upon the waters of that beautiful but stormy lake, the long and anxious watching through the nights, were calculated to test and increase his natural powers, his fortitude, energy, and perseverance. In the city he must have been brought into contact with men engaged in traffic, with soldiers, and foreigners, and may have thus acquired somewhat of the flexibility and geniality of temperament all but indispensable to the attainment of such personal influence as he exercised in after-life. It is not probable that he and his brother were wholly uneducated. The Jews regarded instruction as a necessity, and legal enactments enforced the attendance of youths in schools maintained by the community.<sup>b</sup> The statement in Acts iv. 13, that "the council perceived they (i. e. Peter and John) were unlearned and ignorant men," is not incompatible with this assumption. The translation of the passage in the A. V. is rather exaggerated, the word rendered "unlearned" (*idiotai*) being nearly equivalent to "laymen," i. e. men of ordinary education, as contrasted with those who were specially trained in the schools of the Rabbis. A man might be thoroughly conversant with the Scriptures, and yet be considered ignorant and unlearned by the Rabbis, among whom the opinion was already prevalent that "the letter of Scripture was the mere shell, an earthen vessel containing heavenly treasures, which could only be discovered by those who had been taught to search for the hidden cabalistic meaning." Peter and his kinsmen were probably taught to read the Scriptures in childhood. The history of their country, especially of the great events of early days, must have been familiar to them as attendants at the synagogue, and their attention was there directed to those portions of Holy Writ from which the Jews derived their anticipations of the Messiah.

The language of the Apostles was of course the form of Aramaic spoken in northern Palestine, a sort of *patois*, partly Hebrew, but more nearly

allied to the Syriac.<sup>c</sup> Hebrew, even in its classical form, was then spoken only by men of learning, the leaders of the pharisees and scribes.<sup>d</sup> The men of Galilee were, however, noted for rough and inaccurate language, and especially for vulgarities of pronunciation.<sup>e</sup> It is doubtful whether our Apostle was acquainted with Greek in early life. It is certain that there was more intercourse with foreigners in Galilee than in any district of Palestine, and Greek appears to have been a common, if not the principal, medium of communication. Within a few years after his call St. Peter seems to have conversed fluently in Greek with Cornelius, at least there is no intimation that an interpreter was employed, while it is highly improbable that Cornelius, a Roman soldier, should have used the language of Palestine. The style of both of St. Peter's Epistles indicates a considerable knowledge of Greek—it is pure and accurate, and in grammatical structure equal to that of St. Paul. That may, however, be accounted for by the fact, for which there is very ancient authority, that St. Peter employed an interpreter in the composition of his Epistles, if not in his ordinary intercourse with foreigners.<sup>f</sup> There are no traces of acquaintance with Greek authors, or of the influence of Greek literature upon his mind, such as we find in St. Paul, nor could we expect it in a person of his station even had Greek been his mother-tongue. It is on the whole probable that he had some rudimental knowledge of Greek in early life,<sup>g</sup> which may have been afterwards extended when the need was felt, but not more than would enable him to discourse intelligently on practical and devotional subjects. That he was an affectionate husband, married in early life to a wife who accompanied him in his Apostolic journeys, are facts inferred from Scripture, while very ancient traditions, recorded by Clement of Alexandria (whose connexion with the church founded by St. Mark gives a peculiar value to his testimony) and by other early but less trustworthy writers, inform us that her name was Perpetua, that she bore a daughter, or perhaps other children, and suffered martyrdom. It is uncertain at what age he was called by our Lord. The general impression of the Gospels is that he was an old man at the date of his death, A.D. 64, but this need not imply that he was much older than our Lord. He was probably between thirty and forty years of age at the date of his call.

That call was preceded by a special preparation. He and his brother Andrew, together with their partners James and John, the sons of Zebedee, were disciples of John the Baptist (John i. 35). They were in attendance upon him when they were first called to the service of Christ. From the circumstances of that call, which are recorded with graphic minuteness by St. John, we learn some important facts touching their state of mind and the personal character of our Apostle. Two disciples, one named by the Evangelist St. Andrew, the other in all probability St. John himself, were standing with the Baptist at Bethany on the Jordan, when he pointed out Jesus as He walked, and said, Behold the

<sup>b</sup> A law to this effect was enacted by Simon ben-Shealach, one of the great leaders of the Pharisaic party under the Asmonean princes. See Jost, *Geschichte des Judenthums*, i. 246.

<sup>c</sup> See E. Renan, *Histoire des Langues Sémitiques*, p. 224. The only extant specimen of that *patois* is the *Book of Adam* or 'Codex Nasiraeus,' edited by Norberg, Lund, Goth. 1815, 6.

<sup>d</sup> See Buxtorf, s. v. *לשון קדש*.

<sup>e</sup> See Reuss, *Geschichte der H. S.* §41.

<sup>f</sup> Reuss (l. c. §49) rejects this as a mere hypothesis but gives no reason. The tradition rests on the authority of Clement of Alexandria, Irenaeus, and Tertullian. See the notes on Euseb. *H. E.* iii. 39, v. 8, and vi. 25.

<sup>g</sup> Even highly educated Jews, like Josephus, spoke Greek imperfectly (see *Ant.* xx. 11, §2). On the antagonism to Greek influence, see Jost, l. c. i. 186, and M. Meier, *Les Doctrines religieuses des Juifs*, i. c. 2.

That is, the antitype of the victims of all true Israelites, and they more: the teaching of John,<sup>1</sup> believed; tonement for sin. The two at once and upon His invitation abode with

Andrew then went to his brother th unto him, We have found the bited One, of whom they had read. Simon went at once, and when him He said, Thou art Simon the thou shalt be called Cephas. The is of course deeply significant. As name of doubtful meaning, according talent to Johanan or John, i. e. grace according to Lange, who has some neful observations, signifying dove) iple the name Simon, i. e. hearer, but ne of the twelve on whom the Church 'ed, he was hereafter (*κληθήσεται*) to or Stone. It seems a natural im- ne words refer primarily to the ori- of Simon: that our Lord saw in m, steadfast, not to be overthrown, r tried; and such was generally the the Fathers: but it is perhaps a r inference that Jesus thus describes hat he was, but as what he would His influence—a man with predia- abilities not unfitted for the office d, but one whose permanence and depend upon union with the living re may expect to find Simon, as the t once rough, stubborn, and mutable, identified with the Rock, will remain veable unto the end.<sup>1</sup>

It led to no immediate change in St. l position. He and his fellow dis- henceforth upon our Lord as their ere not commanded to follow him as es. There were several grades of the Jews, from the occasional hearer, who gave up all other pursuits in a master. At the time a recognition and office sufficed. They returned to here they pursued their usual business, urther intimation of His will. call is recorded by the other three he narrative of St. Luke being appa- entary<sup>2</sup> to the brief, and so to speak, s given by Matthew and Mark. It the sea of Galilee near Capernaum— disciples, Peter and Andrew, James e fishing. Peter and Andrew were ur Lord then entered Simon Peter's ressed the multitude on the shore; lusion of the discourse He wrought hich He foreshadowed the succes in the new, but analogous, occupa- to be theirs, that of fishers of men. nes and John followed. From that e were certainly enrolled formally ciples, and although as yet invested al character, accompanied Him in

Tholuck, and Lange, on the Gospel of ibes this character well, as that firmness, s of power, which, if not purified, easily e. The deepest and most beautiful ob- ne of Origen on John, tom. ii. c. 30. nt of great difficulty, and hotly contested, great weight hold the occurrences to be act; but the generally of commentators,

His journeys, those especially in the north of Palestine.

Immediately after that call our Lord went to the house of Peter, where He wrought the miracle of healing on Peter's wife's mother, a miracle succeeded by other manifestations of divine power which produced a deep impression upon the people. Some time was passed afterwards in attendance upon our Lord's public ministrations in Galilee, Decapolis, Peraea, and Judaea: though at intervals the disciples returned to their own city, and were witnesses of many miracles, of the call of Levi, and of their Master's reception of outcasts, whom they in common with their zealous but prejudiced countrymen had despised and shunned. It was a period of training, of mental and spiritual discipline preparatory to their admission to the higher office to which they were destined. Even then Peter received some marks of distinction. He was selected, together with the two sons of Zebedee, to witness the raising of Jairus' daughter.

The special designation of Peter, and his eleven fellow disciples took place some time afterwards, when they were set apart as our Lord's immediate attendants, and as His delegates to go forth wherever He might send them, as apostles, announcers of His kingdom, gifted with supernatural powers as credentials of their supernatural mission (see Matt. x. 2-4; Mark iii. 13-19, the most detailed account— Luke vi. 13). They appear then first to have received formally the name of Apostles, and from that time Simon bore publicly, and as it would seem all but exclusively, the name Peter, which had hitherto been used rather as a characteristic appellation than as a proper name.

From this time there can be no doubt that St. Peter held the first place among the Apostles, to whatever cause his pre-eminence is to be attributed. There was certainly much in his character which marked him as a representative man; both in his strength and in his weakness, in his excellences and his defects he exemplifies the changes which the natural man undergoes in the gradual transformation into the spiritual man under the personal influence of the Saviour. The precedence did not depend upon priority of call, or it would have devolved upon his brother Andrew, or that other disciple who first followed Jesus. It seems scarcely probable that it depended upon seniority, even supposing, which is a mere conjecture, that he was older than his fellow disciples. The special designation by Christ, alone accounts in a satisfactory way for the facts that he is named first in every list of the Apostles, is generally addressed by our Lord as their representative, and on the most solemn occasions speaks in their name. Thus when the first great secession took place in consequence of the offence given by our Lord's mystic discourse at Capernaum (see John vi. 66-69), "Jesus said unto the twelve, Will ye also go away? Then Simon Peter answered Him, Lord, to whom shall we go? Thou hast the words of eternal life: and we believe and are sure that Thou art that Christ, the Son of

including some of the most earnest and devout in Germany and England, appear now to concur in the view which I have here taken. Thus Trench *On the Parables*, Neander, Lücke, Lange, and Ebrard. The object of Strass, who denies the identity, is to make out that St. Peter's account is a mere myth. The most satisfactory attempt to account for the variations is that of Spanheim, *Dubia Evangelica*, ii. 341

the living God." Thus again at Caesarea Philippi, soon after the return of the twelve from their first missionary tour, St. Peter (speaking as before in the name of the twelve, though, as appears from our Lord's words, with a peculiar distinctness of personal conviction) repeated that declaration, "Thou art the Christ, the Son of the living God." The confirmation of our Apostle in his special position in the Church, his identification with the rock on which that Church is founded, the ratification of the powers and duties attached to the apostolic office,<sup>2</sup> and the promise of permanence to the Church, followed as a reward of that confession. The early Church regarded St. Peter generally, and most especially on this occasion, as the representative of the apostolic body, a very distinct theory from that which makes him their head, or governor in Christ's stead. Even in the time of Cyprian, when communion with the Bishop of Rome as St. Peter's successor for the first time was held to be indispensable, no powers of jurisdiction, or supremacy, were supposed to be attached to the admitted pre-eminence of rank.<sup>3</sup> *Primus inter pares* Peter held no distinct office, and certainly never claimed any powers which did not belong equally to all his fellow Apostles.

This great triumph of Peter, however, brought other points of his character into strong relief. The distinction which he then received, and it may be his consciousness of ability, energy, zeal, and absolute devotion to Christ's person, seem to have developed a natural tendency to rashness and forwardness bordering upon presumption. On this occasion the exhibition of such feelings brought upon him the strongest reproof ever addressed to a disciple by our Lord. In his affection and self-confidence Peter ventured to reject as impossible the announcement of the sufferings and humiliation which Jesus predicted, and heard the sharp words—"Get thee behind me, Satan, thou art an offence

unto me—for thou savourest not the things that are of God, but those that be of men." But as Peter's first fall; a very ominous one; not a stumbling stone,<sup>4</sup> not a defender, but an antagonist and deadly enemy of the faith, who if spiritual should give place to the letter merely dealing with the things of God. It is recalled that on other occasions when St. Peter avowed his faith and devotion, he displayed at the same time immediately afterwards, a more than usual deficiency in spiritual discernment and judgment. Thus a few days after that fall he was seen together with John and James to witness the transfiguration of Christ, but the next day he then uttered words that he was completely bewildered, and unable at the time to comprehend the meaning of the transaction.<sup>5</sup> Thus again, when his zeal and courage prompted him to leap to ship and walk on the water to go to Jesus (Mat. xiv. 29), a sudden failure of faith withdrew the sustaining power; he was about to sink when he was at once reproved and saved by his Lord. Such traits, which occur not infrequently, point us for his last great fall, as well as for his conduct after the Resurrection, when his natural office perished and his deficiencies supplied by the power from on High.<sup>6</sup> We find a mixture of strength and weakness in his conduct when called upon to pay tribute-money for himself and his Lord; his faith had the upper hand, and was rewarded by a significant miracle (Mat. xviii. 24-27). The question which about the same time Peter asked of Lord as to the extent to which forgiveness should be carried, indicated a great absence of spirituality from the Jewish standing point, and showed how far as yet he and his brethren were from understanding the true purport of Christian love (Mat. xviii. 21). We find a new blending of opposite qualities in the discourse recorded by the synoptical evangelists (Mat. 16

<sup>2</sup> The accounts which have been given of the precise import of this declaration may be summed up under these heads:—1. That our Lord spoke of Himself, and not of St. Peter, as the rock on which the Church was to be founded. This interpretation expresses a great truth, but it is irreconcilable with the context, and could scarcely have occurred to an unbiassed reader, and certainly does not give the primary and literal meaning of our Lord's words. It has been defended, however, by candid and learned critics, as Glass and Dalziel. 2. That our Lord addresses Peter as the type or representative of the Church, in his capacity of chief disciple. This is Augustine's view, and it was widely adopted in the early Church. It is hardly borne out by the context, and seems to involve a false metaphor. The Church would in that case be founded on itself in its type. 3. That the rock was not the person of Peter, but his confession of faith. This rests on much better authority, and is supported by stronger arguments. The authorities for it are given by Suicer, v. Πέτρος, §1. n. 3. Yet it seems to have been originally suggested as an explanation, rather than an interpretation, which it certainly is not in a literal sense. 4. That St. Peter himself was the rock on which the Church would be built, as the representative of the Apostles, as professing in their name the true faith, and as entrusted specially with the duty of preaching it, and thereby laying the foundation of the Church. Many learned and candid Protestant divines have acquiesced in this view (e.g. Pearson, Hammond, Bengel, Rosenkötter, Schleiermacher, Kuinoel, Bloomfield, &c.). It is borne out by the facts that St. Peter on the day of Pentecost, and during the whole period of the establishment of the Church, was the chief agent in all the work of the ministry, in preaching, in admitting both Jews and Gentiles, and laying down the

terms of communion. This view is wholly incompatible with the Roman theory, which makes him the representative of Christ, not personally, but in a sense of office essential to the permanent existence and unity of the Church. Passaglia, the latest and most universalist, takes more pains to refute this theory than view; but wholly without success: it holds that St. Peter did not retain, even assuming that he at first held, any primacy of rank after receiving his special work; that he never exercised any authority or independently of the other Apostles; that he never did not transmit whatever position he ever held to any of his colleagues after his decease. At least, during his residence there, the chief authority rested on St. James; not in those any trace of a permanent jurisdiction for centuries after the founding of the Church. The same arguments, moreover, would apply to the keys. The promise was literally made to St. Peter preached at Pentecost, admitted to baptism, confirmed the Samaritans, and with Cornelius, the representative of the Gentile in the Church. Whatever privileges may have fallen upon personally died with him. The authority required for permanent government of the Church was therefore to be deposited in the episcopate, & remained the apostolic body, and succeeded in its work.

<sup>3</sup> See an admirable discussion of this point in the *Anfänge der Christlichen Kirche*.

<sup>4</sup> Lightfoot suggests that with our former meaning of the term "rock." An amazing proof of the blindness of party feeling. See *Notes on the Gal. xli. p. 277*.

<sup>5</sup> As usual, the least favourable view of St. Peter's conduct and feelings is given by St. Mark, xli. 29 and

17; Mark x. 28; Luke xviii. 28), *Io*, we have left all and followed Thee. It certainly bespeaks a consciousness of sincerity, a spirit of self-devotion and self-sacrifice, though it conveys an impression of something like ambition; but in that instance the good undoubtedly predominated, as is shown by the Lord's answer. He does not reprove Peter, who spoke, as usual, in the name of the twelve, but takes that opportunity of uttering the strongest reprimand touching the future dignity and paramount authority of the Apostles, a prediction recorded by St. Matthew only.

Towards the close of our Lord's ministry St. Peter's characteristics become especially prominent. Together with his brother, and the two sons of Zebedee, he listened to the last awful predictions and warnings delivered to the disciples in reference to the second advent (Matt. xxiv. 3; Mark xiii. 3, who alone mentions these names; Luke xxi. 7). At the last supper Peter seems to have been particularly earnest in the request that the traitor might be pointed out, expressing of course a general feeling, which some inward consciousness of infirmity may have added force. After the supper his words drew out the meaning of the significant, almost sacramental act of our Lord in washing His disciples' feet, an occasion on which we find the same mixture of goodness and frailty, humility and deep affection, with a certain taint of self-will, which was at once washed into submissive reverence by the voice of Jesus. Then too it was that he made those reiterated protestations of unalterable fidelity, so soon to be falsified by his miserable fall. That event is, however, of such critical import in its bearings upon the character and position of the Apostle, that it cannot be dismissed without a careful, if not an exhaustive discussion.

Jesus had left the guest-chamber when St. Peter put the question, Lord, whither goest Thou? words which modern theologians generally represent as avowing of idle curiosity, or presumption, but in which the early Fathers (as Chrysostom and Augustine) recognized the utterance of love and devotion. The answer was a promise that Peter should follow his Master, but accompanied with an intimation of recent unfitness in the disciple. Then came the first protestation, which elicited the sharp and stern rebuke, and distinct prediction of Peter's denial (John xiii. 36-38). From comparing this account with those of the other evangelists (Matt. xxvi. 33-5; Mark xiv. 29-31; Luke xxii. 33, 34), it seems evident that with some diversity of circumstances both the protestation and warning were thrice repeated. The tempter was to sift all the disciples, but our Apostle's faith was to be preserved from failing by the special intercession of Christ, he being thus singled out either as the representative of the whole only, or as seems more probable, because his character was one which had special need of supernatural aid. St. Mark, as usual, records two points which enhance the force of the warning and the guilt of Peter, viz., that the cock would crow twice, and that after such warning he repeated his protestation with greater vehemence. Chrysostom, who judges the Apostle with fairness and candour, attributes this vehemence to his great love, and more particularly to the delight which he felt when assured that he was not the traitor, yet not without certain admixture of forwardness and ambition such as had previously been shown in the dispute at pre-eminence. The fiery trial soon came. After the agony of Gethsemane, when the three, Peter,

James, and John were, as on former occasions, selected to be with our Lord, the only witnesses of His passion, where also all three had alike failed to prepare themselves by prayer and watching, the arrest of Jesus took place. Peter did not shrink from the danger. In the same spirit which had dictated his promise he drew his sword, alone against the armed throng, and wounded the servant (*τὸν δοῦλον*, not a servant) of the high-priest, probably the leader of the band. When this bold but unauthorized attempt at rescue was reproved, he did not yet forsake his Master, but followed Him with St. John into the focus of danger, the house of the high-priest. There he sat in the outer hall. He must have been in a state of utter confusion: his faith, which from first to last was bound up with hope, his special characteristic, was for the time powerless against temptation. The danger found him unarmed. Thrice, each time with greater vehemence, the last time with blasphemous asseveration, he denied his Master. The triumph of Satan seemed complete. Yet it is evident that it was an obscuration of faith, not an extinction. It needed but a glance of his Lord's eye to bring him to himself. His repentance was instantaneous, and effectual. The light in which he himself regarded his conduct, is clearly shown by the terms in which it is related by St. Mark. The inferences are weighty as regards his personal character, which represents more completely perhaps than any in the New Testament, the weakness of the natural and the strength of the spiritual man: still more weighty as bearing upon his relations to the apostolic body, and the claims resting upon the assumption that he stood to them in the place of Christ.

On the morning of the resurrection we have proof that St. Peter, though humbled, was not crushed by his fall. He and St. John were the first to visit the sepulchre; he was the first who entered it. We are told by Luke (in words still used by the Eastern Church as the first salutation on Easter Sunday) and by St. Paul, that Christ appeared to him first among the Apostles—he who most needed the comfort was the first who received it, and with it, as may be assumed, an assurance of forgiveness. It is observable, however, that on that occasion he is called by his original name, Simon, not Peter; the higher designation was not restored until he had been publicly reinstated, so to speak, by his Master. That reinstatement took place at the sea of Galilee (John xxi.), an event of the very highest import. We have there indications of his best natural qualities, practical good sense, promptness and energy; slower than St. John to recognize their Lord, Peter was the first to reach Him: he brought the net to land. The thrice repeated question of Christ, referring doubtless to the three protestations and denials, were thrice met by answers full of love and faith, and utterly devoid of his hitherto characteristic failing, presumption, of which not a trace is to be discerned in his later history. He then received the formal commission to feed Christ's sheep not certainly as one endowed with exclusive or paramount authority, or as distinguished from his fellow-disciples, whose fall had been marked by less aggravating circumstances; rather as one who had forfeited his place, and could not resume it without such an authorization. Then followed the

\* A fact very perplexing to the Tübingen school being utterly irreconcilable with their theory of antagonism between the Apostles.

prediction of his martyrdom, in which he was to find the fulfilment of his request to be permitted to follow the Lord.

With this event closes the first part of St. Peter's history. It has been a period of transition, during which the fisherman of Galilee had been trained first by the Baptist, then by our Lord, for the great work of his life. He had learned to know the Person and appreciate the offices of Christ: while his own character had been chastened and elevated by special privileges and humiliations, both reaching their climax in the last recorded transactions. Henceforth, he with his colleagues were to establish and govern the Church founded by their Lord, without the support of His presence.

The first part of the Acts of the Apostles is occupied by the record of transactions, in nearly all of which Peter stands forth as the recognized leader of the Apostles; it being, however, equally clear that he neither exercises nor claims any authority apart from them, much less over them. In the first chapter it is Peter who points out to the disciples (as in all his discourses and writings drawing his arguments from prophecy) the necessity of supplying the place of Judas. He states the qualifications of an Apostle, but takes no special part in the election. The candidates are selected by the disciples, while the decision is left to the searcher of hearts. The extent and limits of Peter's primacy might be inferred with tolerable accuracy from this transaction alone. To have one spokesman, or foreman, seems to accord with the spirit of order and humility which ruled the Church, while the assumption of power or supremacy would be incompatible with the express command of Christ (see Matt. xxiii. 10). In the 2nd chapter again, St. Peter is the most prominent person in the greatest event after the resurrection, when on the day of Pentecost the Church was first invested with the plenitude of gifts and powers. Then Peter, not speaking in his own name, but with the eleven (see ver. 14), explained the meaning of the miraculous gifts, and shewed the fulfilment of prophecies (accepted at that time by all Hebrews as Messianic), both in the outpouring of the Holy Ghost and in the resurrection and death of our Lord. This discourse, which bears all the marks of Peter's individuality, both of character and doctrinal views,\* ends with an appeal of remarkable boldness.

It is the model upon which the apologetic discourses of the primitive Christians were generally constructed. The conversion and baptism of three thousand persons, who continued steadfastly in the Apostle's doctrine and fellowship, attested the power of the Spirit which spoke by Peter on that occasion.

The first miracle after Pentecost was wrought by St. Peter (Acts iii.); and St. John was joined with him in that, as in most important acts of his ministry; but it was Peter who took the cripple by the hand, and bade him "in the name of Jesus of Nazareth rise up and walk;" and when the people ran together to Solomon's porch, where the Apostles, following their Master's example were wont to teach, Peter was the speaker: he convinces the people of their sin, warns them of their danger, points out the fulfilment of prophecy, and the spe-

cial objects for which God sent His Son first to the children of the old covenant.<sup>a</sup>

The boldness of the two Apostles, of Peter more especially as the spokesman, when "filled with the Holy Ghost" he confronted the full assembly, headed by Annas and Caiaphas, produced a deep impression upon those cruel and unscrupulous hypocrites; an impression enhanced by the fact that the words came from ignorant and unlearned men. The words spoken by both Apostles, when commanded not to speak at all nor teach in the name of Jesus, have ever since been the watchwords of martyrs (iv. 19, 20).

This first miracle of healing was soon followed by the first miracle of judgment. The first open and deliberate sin against the Holy Ghost, a sin combining ambition, fraud, hypocrisy, and blasphemy, was visited by death, sudden and awful as under the old dispensation. St. Peter was the minister in that transaction. As he had first opened the gate to penitents (Acts ii. 37, 38), he now closed it to hypocrites. The act stands alone, without a precedent or parallel in the Gospel; but Peter acted simply as an instrument, not pronouncing the sentence, but denouncing the sin, and that in the name of his fellow Apostles and of the Holy Ghost. Penalties similar in kind, though far different in degree, were inflicted, or commanded on various occasions by St. Paul. St. Peter appears, perhaps in consequence of that act, to have become the object of a reverence bordering, as it would seem, on superstition (Acts v. 15), while the numerous miracles of healing wrought about the same time, showing the true character of the power dwelling in the Apostles, gave occasion to the second persecution. Peter then came into contact with the noblest and most interesting character among the Jews, the learned and liberal tutor of St. Paul, Gamaliel, whose caution, gentleness, and dispassionate candour, stand out in strong relief contrasted with his colleagues, but make a faint impression compared with the steadfast and uncompromising principles of the Apostles, who after undergoing an illegal scourging, went forth rejoicing that they were counted worthy to suffer shame for the name of Jesus. Peter is not specially named in connection with the appointment of deacons, an important step in the organization of the Church; but when the Gospel was first preached beyond the precincts of Judea, he and St. John were at once sent by the Apostles to confirm the converts at Samaria, a very important statement at this critical point, proving clearly his subordination to the whole body, of which he was the most active and able member.

Up to that time it may be said that the Apostles had one great work, viz., to convince the Jews that Jesus was the Messiah; in that work St. Peter was the master builder, the whole structure rested upon the doctrines of which he was the principal teacher: hitherto no words but his are specially recorded by the writer of the Acts. Henceforth he remains prominent, but not exclusively prominent, among the propagators of the Gospel. At Samaria he and John established the precedent for the most important rite not expressly enjoined in Holy Writ, viz., confirmation, which the Western Church<sup>b</sup> has

touching the object of the writer of the Acts; identical in spirit, as issuing from the same source.

<sup>a</sup> Not so the Eastern, which combines the act with baptism, and leaves it to the officiating priest. It is one of the points upon which Photius and other Eastern controversialists lay special stress.

\* See Schmid, *Biblische Theologie*, II. 183; and Weiss, *Der Petrinische Lehrbegriff*, p. 19.

<sup>b</sup> This speech is at once strikingly characteristic of St. Peter, and a proof of the fundamental harmony between his teaching and the more developed and systematic doctrines of St. Paul: differing in form, to an extent utterly incompatible with the theory of Baur and Schweigler.

to belong exclusively to the functions of successors to the ordinary powers of the Church. Then also St. Peter was convicted.

Magus, the first teacher of heresy. [Acts.] As in the case of Ananias he had committed the first sin against holiness, so in this case he declared the penalty due to the sin against the name. About three years later (Acts ix. 26, and Gal. i. 17, 18) we have an account of the first meeting of St. Peter and St. Paul. In the Acts it is stated generally that St. Peter was first distrusted by the disciples, and the Apostles upon the recommendation of St. Paul.

From the Galatians we learn that St. Paul went to Jerusalem specially to see Peter; and that he was with him fifteen days, and that James and other Apostles were present at the time. It is to be noted that this account, which while it marks the independence of St. Paul, marks also the position of St. Peter as the most eminent of the Apostles, not on the authority of the writer but on that of St. Paul—as though it were intended to obviate all possible misconceptions as to the mutual relations of the Apostles of the Church to the Gentiles. This interview was followed by other events marking Peter's position as the chief apostolic head of the Church.

His first apostolic tour of visitation to the Gentiles is recorded in the Acts (Acts ix. 32), in the course of which two miracles were wrought on Aeneas and Tabitha, a vision with which the most signal transgression of the day of Pentecost is recorded, the conversion of Cornelius. That was the crown and consummation of Peter's ministry. Peter who had been the resurrection to the Jews, baptized the Samaritans, confirmed the first Samaritans, and the advice or co-operation of any of them, under direct communication from St. Paul, threw down the barrier which separated the Gentiles from Israelites, first principles which in their gradual application developed in the complete union of Gentile and Hebrew elements in the Church. The narrative of this event, which stands out prominently in the Acts, is twice repeated. The chief points to be noted are: first, the peculiar fitness of Cornelius, both as a Roman citizen and as a man of God-fearing and liberal worshipper, to be a recipient of the Gospel; and secondly, the state of the Church at that time. Whatever may have been his views touching the heathen, the idea had not yet crossed him that they could become Christians without first becoming Jews. As a believing Hebrew he could not contemplate the removal of Gentile disqualifications, without assurance that the enactments of the Law concerning them were abrogated by the Lord. The vision could not therefore be the product of a subjective impression. It was speaking, objectively, presented to his external influence. Yet the will of the Church was not controlled, it was simply enlightenment in the state of trance did not overcome his reluctance. It was not until the vision was fully restored, and he had received the meaning of the vision, that he recognized the distinction of cleanness and uncleanness.

On which objection has been made, but shown to be strictly correct.

ness in outward things belonged to a temporary dispensation. It was no mere acquiescence in a positive command, but the development of a spirit full of generous impulses, which found utterance in the words spoken by Peter on that occasion—both in the presence of Cornelius, and afterwards at Jerusalem. His conduct gave great offence to all his countrymen (Acts xi. 2), and it needed all his authority, corroborated by a special manifestation of the Holy Ghost, to induce his fellow-Apostles to recognize the propriety of this great act, in which both he and they saw an earnest of the admission of Gentiles into the Church on the single condition of spiritual repentance. The establishment of a Church in great part of Gentile origin at Antioch, and the mission of Barnabas, between whose family and Peter there were the bonds of near intimacy, set the seal upon the work thus inaugurated by St. Peter.

This transaction was soon followed by the imprisonment of our Apostle. Herod Agrippa having first tested the state of feeling at Jerusalem by the execution of James, one of the most eminent Apostles, arrested Peter. The hatred, which at that time first showed itself as a popular feeling, may most probably be attributed chiefly to the offence given by Peter's conduct towards Cornelius. His miraculous deliverance marks the close of this second great period of his ministry. The special work assigned to him was completed. He had founded the Church, opened its gates to Jews and Gentiles, and distinctly laid down the conditions of admission. From that time we have no continuous history of Peter. It is quite clear that he retained his rank as the chief Apostle, equally so, that he neither exercised nor claimed any right to control their proceedings. At Jerusalem the government of the Church devolved upon James the brother of our Lord. In other places Peter seems to have confined his ministrations to his countrymen—as Apostle of the circumcision. He left Jerusalem, but it is not said where he went. Certainly not to Rome, where there are no traces of his presence before the last years of his life; he probably remained in Judea, visiting and confirming the Churches; some old but not trustworthy traditions represent him as preaching in Caesarea and other cities on the western coast of Palestine; six years later we find him once more at Jerusalem, when the Apostles and elders came together to consider the question whether converts should be circumcised. Peter took the lead in that discussion, and urged with remarkable cogency the principles settled in the case of Cornelius. Purifying faith and saving grace (xv. 9 and 11) remove all distinctions between believers. His arguments, adopted and enforced by James, decided that question at once and for ever. It is, however, to be remarked, that on that occasion he exercised no one power which Romanists hold to be inalienably attached to the chair of Peter. He did not preside at the meeting; he neither summoned nor dismissed it; he neither collected the suffrages, nor pronounced the decision.<sup>2</sup>

It is a disputed point whether the meeting between St. Paul and St. Peter, of which we have an account in the Galatians (ii. 1-10) took place at this time. The great majority of critics believe that it did, and this hypothesis, though not without difficulties, seems more probable than any other.

<sup>2</sup> In accordance with this representation, St. Paul names James before Cephas and John (Gal. ii. 9).

which has been suggested.<sup>7</sup> The only point of real importance was certainly determined before the Apostles separated, the work of converting the Gentiles being henceforth specially entrusted to Paul and Barnabas, while the charge of preaching to the circumcision was assigned to the elder Apostles, and more particularly to Peter (Gal. ii. 7-9). This arrangement cannot, however, have been an exclusive one. St. Paul always addressed himself first to the Jews in every city: Peter and his old colleagues undoubtedly admitted and sought to make converts among the Gentiles. It may have been in full force only when the old and new Apostles resided in the same city. Such at least was the case at Antioch, where St. Peter went soon afterwards. There the painful collision took place between the two Apostles; the most remarkable, and, in its bearings upon controversies at critical periods, one of the most important events in the history of the Church. St. Peter at first applied the principles which he had lately defended, carrying with him the whole Apostolic body, and on his arrival at Antioch ate with the Gentiles, thus showing that he believed all ceremonial distinctions to be abolished by the Gospel: in that he went far beyond the strict letter of the injunctions issued by the Council.<sup>8</sup> That step was marked and condemned by certain members of the Church of Jerusalem sent by James. It appeared to them one thing to recognize Gentiles as fellow Christians, another to admit them to social intercourse, whereby ceremonial defilement would be contracted under the law to which all the Apostles, Barnabas and Paul included, acknowledged allegiance.<sup>9</sup> Peter, as the Apostle of the circumcision, fearing to give offence to those who were his special charge, at once gave up the point, suppressed or disguised his feelings,<sup>10</sup> and separated himself not from communion, but from social intercourse with the Gentiles. St. Paul, as the Apostle of the Gentiles, saw clearly the consequences likely to ensue, and could ill brook the misapplication of a rule often laid down in his own writings concerning compliance with the prejudices of weak brethren. He held that Peter was infringing a great principle, withstood him to the face, and using the same arguments which Peter had urged at the Council, pronounced his conduct to be indefensible. The statement that Peter compelled the Gentiles to Judaize, probably means, not that he enjoined circumcision, but that his conduct, if persevered in, would have that effect, since they would naturally take any steps which might remove the barriers to familiar intercourse with the first Apostles of Christ. Peter was wrong, but it was an error of judgment; an act contrary to his own feelings and wishes, in

deference to those whom he looked upon as representing the mind of the Church; that he was actuated by selfishness, national pride, or any remains of superstition, is neither asserted nor implied in the strong censure of St. Paul: nor, much as we must admire the earnestness and wisdom of St. Paul, whose clear and vigorous intellect was in this case stimulated by anxiety for his own special charge, the Gentile Church, should we overlook Peter's singular humility in submitting to public reproof from one so much his junior, or his magnanimity both in adopting St. Paul's conclusions (as we must infer that he did from the absence of all trace of continued resistance), and in remaining on terms of brotherly communion (as is testified by his own written words), to the end of his life (1 Pet. v. 10; 2 Pet. iii. 15, 16).

From this time until the date of his Epistle, we have no distinct notices in Scripture of Peter's abode or work. The silence may be accounted for by the fact that from that time the great work of propagating the Gospel was committed to the marvellous energies of St. Paul. Peter was probably employed for the most part in building up, and completing the organization of Christian communities in Palestine and the adjoining districts. There is, however, strong reason to believe that he visited Corinth at an early period; this seems to be implied in several passages of St. Paul's first epistle to that Church,<sup>11</sup> and it is a natural inference from the statements of Clement of Rome (1 *Epistle to the Corinthians*, c. 4). The fact is positively asserted by Dionysius, bishop of Corinth (A.D. 180 at the latest), a man of excellent judgment, who was not likely to be misinformed, nor to make such an assertion lightly in an epistle addressed to the Bishop and Church of Rome.<sup>12</sup> The reference to collision between parties who claimed Peter, Apollos, Paul, and even Christ for their chiefs, involves no opposition between the Apostles themselves, such as the fabulous Clementines and modern infidelity assume. The name of Peter as founder, or joint founder, is not associated with any local Church save those of Corinth, Antioch,<sup>13</sup> or Rome, by early ecclesiastical tradition. That of Alexandria may have been established by St. Mark after Peter's death. That Peter preached the Gospel in the countries of Asia, mentioned in his first Epistle, appears from Origen's own words (*κατασκευάσαι τοίχους*) to be a mere conjecture, not in itself improbable, but of little weight in the absence of all positive evidence, and of all personal reminiscences in the Epistle itself. From this Epistle, however, it is to be inferred that towards the end of his life, St. Peter either visited, or resided

<sup>7</sup> Lange (*Das apostolische Zeitalter*, II. 378) fixes the date about three years after the Council. Wieseler has a long excursus to show that it must have occurred after St. Paul's second apostolic journey. He gives some weighty reasons, but wholly fails in the attempt to account for the presence of Barnabas, a fatal objection to his theory. See *Der Brief an die Galater*, Excursus, p. 579. On the other side are Theodoret, Pearson, Eichhorn, Olshausen, Meyer, Neander, Howson, Schaff, &c.

<sup>8</sup> This decisively overthrows the whole system of Baur, which rests upon an assumed antagonism between St. Paul and the elder Apostles, especially St. Peter. St. Paul grounds his reproof upon the inconsistency of Peter, not upon his Judaizing tendencies.

<sup>9</sup> See Acts xviii. 18-21, xx. 16, xxi. 18-24, passages borne out by numerous statements in St. Paul's Epistles.

<sup>10</sup> ἐπιστρέψας, συννενοήσας, ὑπέκρινε, must be

understood in this sense. It was not hypocrisy in the sense of an affectation of holiness, but in that of an outward deference to prejudices which certainly neither Peter nor Barnabas any longer shared.

<sup>11</sup> See Routh, *Rel. Sacrae*, I. 179.

<sup>12</sup> The attempt to set aside the evidence of Dionysius on the ground that he makes an evident mistake in attributing the foundation of the Corinthian Church to Peter and Paul, is futile. If Peter took any part in organizing the Church, he would be spoken of as a joint founder. Schaff supposes that Peter may have first visited Corinth on his way to Rome towards the end of his life.

<sup>13</sup> It is to be observed that even St. Leo represents the relation of St. Peter to Antioch as precisely the same with that in which he stands to Rome (Ep. 52).

<sup>14</sup> Origen, ap. Euseb. III. 1, adopted by Epiphanius (*Adv. xxvii.*) and Jerome (*Catal.* c. 1).

Hebrew Christians, to whom the Epistle appears to have been specially, though not exclusively addressed.<sup>a</sup> The assumption that Silvanus was employed in the composition of the Epistle is not borne out by the expression, "by Silvanus, I have written unto you," such words according to ancient usage applying rather to the bearer than to the writer or amanuensis. Still it is highly probable that Silvanus, considering his rank, character, and special connexion with those Churches, and with their great Apostle and founder, would be consulted by St. Peter throughout, and that they would together read the Epistles of St. Paul, especially those addressed to the Churches in those districts: thus, partly with direct intention, partly it may be unconsciously, a Pauline colouring, amounting in passages to something like a studied imitation of St. Paul's representations of Christian truth, may have been introduced into the Epistle. It has been observed above that there is good reason to suppose that St. Peter was in the habit of employing an interpreter; nor is there anything inconsistent with his position or character in the supposition that Silvanus, perhaps also St. Mark, may have assisted him in giving expression to the thoughts suggested to him by the Holy Spirit. We have thus at any rate, a not unsatisfactory solution of the difficulty arising from correspondences both of style and moles of thought in the writings of two Apostles who differed so widely in gifts and acquirements.<sup>b</sup>

The objects of the Epistle, as deduced from its contents, coincide with these assumptions. They were:—1. To comfort and strengthen the Christians in a season of severe trial. 2. To enforce the practical and spiritual duties involved in their calling. 3. To warn them against special temptations attached to their position. 4. To remove all doubt as to the soundness and completeness of the religious system which they had already received. Such an attestation was especially needed by the Hebrew Christians, who were wont to appeal from St. Paul's authority to that of the elder Apostles, and above all to that of Peter. The last, which is perhaps the very principal object, is kept in view throughout the Epistle, and is distinctly stated, ch. v. ver. 12.

These objects may come out more clearly in a brief analysis.

The Epistle begins with salutations and general description of Christians (i. 1, 2), followed by a statement of their present privileges and future inheritance (3-5); the bearings of that statement upon their conduct under persecution (6-9); reference, according to the Apostle's wont, to prophecies concerning both the sufferings of Christ and the salvation of His people (10-12); exhortations based upon those promises to earnestness, sobriety, hope, obedience, and holiness, as results of knowledge of redemption, of atonement by the blood of Jesus, and of the resurrection, and as proofs of spiritual regeneration by the word of God. Peculiar stress is laid upon the cardinal graces of faith, hope, and brotherly love, each connected with and resting upon the fundamental doctrines of the Gospel (13-25). Abstinence from the spiritual sins most

directly opposed to these graces is then enforced (ii. 1); spiritual growth is represented as dependent upon the nourishment supplied by the same Word which was the instrument of regeneration (2, 3); and then, by a change of metaphor, Christians are represented as a spiritual house, collectively and individually as living stones, and royal priests, elect, and brought out of darkness into light (4-10). This portion of the Epistle is singularly rich in thought and expression, and bears the peculiar impress of the Apostle's mind, in which Judaism is spiritualized, and finds its full development in Christ. From this condition of Christians, and more directly from the fact that they are thus separated from the world, pilgrims and sojourners, St. Peter deduces an entire system of practical and relative duties, self-control, care of reputation, especially for the sake of Gentiles; submission to all constituted authorities; obligations of slaves, urged with remarkable earnestness, and founded upon the example of Christ and His atoning death (11-25); and duties of wives and husbands (iii. 1-7). Then generally all Christian graces are commended, those which pertain to Christian brotherhood, and those which are especially needed in times of persecution, gentleness, forbearance, and submission to injury (8-17); all the precepts being based on imitation of Christ, with warnings from the history of the deluge, and with special reference to the baptismal covenant.

In the following chapter (iv. 1, 2) the analogy between the death of Christ and spiritual mortification, a topic much dwelt on by St. Paul, is urged with special reference to the sins committed by Christians before conversion, and habitual to the Gentiles. The doctrine of a future judgment is inculcated, both with reference to their heathen persecutors as a motive for endurance, and to their own conduct as an incentive to sobriety, watchfulness, fervent charity, liberality in all external acts of kindness, and diligent discharge of all spiritual duties, with a view to the glory of God through Jesus Christ (3-11).

This Epistle appears at the first draught to have terminated here with the doxology, but the thought of the fiery trial to which the Christians were exposed stirs the Apostle's heart, and suggests additional exhortations. Christians are taught to rejoice in partaking of Christ's sufferings, being thereby assured of sharing His glory, which even in this life rests upon them, and is especially manifested in their innocence and endurance of persecution: judgment must come first to cleanse the house of God, then to reach the disobedient: suffering according to the will of God, they may commit their souls to Him in well doing as unto a faithful Creator. Faith and hope are equally conspicuous in these exhortations. The Apostle then (v. 1-4) addresses the presbyters of the Churches, warning them as one of their own body, as a witness (*μαρτυρ*) of Christ's sufferings, and partaker of future glory, against negligence, covetousness, and love of power: the younger members he exhorts to submission and humility, and concludes this part with a warning against their spiritual enemy, and a solemn and

<sup>a</sup> This is the general opinion of the ablest commentators. The ancients were nearly unanimous in holding that it was written for Hebrew converts. But several passages are evidently meant for Gentiles: e. g. i. 14, 18; ii. 9, 10; iii. 6; iv. 3. Reuss, an original and able writer, is almost alone in the opinion that it was addressed chiefly to Gentile converts (p. 123). He takes *κατοικοι* and *κατασκευαστες* as = *Ἰουδαι*, Israelites by faith, not by ceremonial

observance (*nicht nach dem Cultus*). See also Weiss, *Der Petrinische Lehrbegriff*, p. 28, n. 2.

<sup>b</sup> The question has been thoroughly discussed by Hug. Ewald, Bertholdt, Weiss, and other critics. The most striking resemblances are perhaps i. Pet. i. 3, with Eph. i. 3-ii. 18, with Eph. vi. 5; iii. 1, with Eph. v. 22; and v. 8, with v. 21: but allusions nearly as distinct are found to the Romans, Corinthians, Colossians, Thessalonians, and Philemon.

ness, truly remarkable in those who believe that they have, and who in fact really have, irrefragable grounds for rejecting the pretensions of the Papacy.

The time and manner of the Apostle's martyrdom are less certain. The early writers imply, or distinctly state, that he suffered at, or about the same time (Dionysius, *κατὰ τὸν αὐτὸν καιρὸν*) with St. Paul, and in the Neronian persecution. All agree that he was crucified, a point sufficiently determined by our Lord's prophecy. Origen (ap. Eus. iii. 1), who could easily ascertain the fact, and though fanciful in speculation, is not inaccurate in historical matters, says that at his own request he was crucified with his head downwards. This statement was generally received by Christian antiquity: nor does it seem inconsistent with the fervent temperament and deep humility of the Apostle to have chosen such a death: one, moreover, not unlikely to have been inflicted in mockery by the instruments of Nero's wanton and ingenious cruelty.

The legend found in St. Ambrose is interesting, and may have some foundation in fact. When the persecution began, the Christians at Rome, anxious to preserve their great teacher, persuaded him to flee, a course which they had Scriptural warrant to recommend, and he to follow; but at the gate he met our Lord. Lord, whither goest thou? asked the Apostle, I go to Rome, was the answer, there once more to be crucified. St. Peter well understood the meaning of those words, returned at once and was crucified.<sup>9</sup>

Thus closes the Apostle's life. Some additional facts, not perhaps unimportant, may be accepted on early testimony. From St. Paul's words it may be inferred with certainty 'that he did not give up the ties of family life when he forsook his temporal calling. His wife accompanied him in his wanderings. Clement of Alexandria, a writer well informed in matters of ecclesiastical interest, and thoroughly trustworthy, says (*Strom.* iii. p. 448) that "Peter and Philip had children, and that both took about their wives, who acted as their coadjutors in ministering to women at their own homes; by their means the doctrine of the Lord penetrated without scandal into the privacy of women's apartments." Peter's wife is believed, on the same authority, to have suffered martyrdom, and to have been supported in the hour of trial by her husband's exhortation. Some critics believe that she is referred to in the salutation at the end of the first Epistle of St. Peter. The Apostle is said to have employed interpreters. Basilides, an early Gnostic, professed to derive his system from Glaucias, one of these interpreters. This shows at least the impression, that the Apostle did not understand Greek, or did not speak it with fluency. Of far more importance is the statement that St. Mark wrote his gospel under the teaching of Peter, or that he embodied in

that gospel the substance of our Apostles' oral instructions. This statement rests upon such an amount of external evidence,<sup>10</sup> and is corroborated by so many internal indications, that they would scarcely be questioned in the absence of a strong theological bias. The fact is doubly important in its bearings upon the Gospel, and upon the character of our Apostle. Chrysostom, who is followed by the most judicious commentators, seems first to have drawn attention to the fact, that in St. Mark's gospel every defect in Peter's character and conduct is brought out clearly, without the slightest extenuation, while many noble acts and peculiar marks of favour are either omitted, or stated with far less force than by any other Evangelist. Indications of St. Peter's influence, even in St. Mark's style, much less pure than that of St. Luke, are traced by modern criticism.<sup>11</sup>

The only written documents which St. Peter has left, are the First Epistle, about which no doubt has ever been entertained in the Church; and the Second, which has both in early times, and in our own, been a subject of earnest controversy.

FIRST EPISTLE.—The external evidence of authenticity is of the strongest kind. Referred to in the Second Epistle (iii. 1); known to Polycarp, and frequently alluded to in his Epistle to the Philippians; recognized by Papias (ap. Euseb. *H. E.* iii. 39); repeatedly quoted by Irenaeus, Clemens of Alexandria, Tertullian, and Origen; it was accepted without hesitation by the universal Church.<sup>12</sup> The internal evidence is equally strong. Schwieger the most reckless, and De Wette the most vacillating of modern critics, stand almost alone in their denial of its authenticity.

It was addressed to the Churches of Asia Minor, which had for the most part been founded by St. Paul and his companions. Supposing it to have been written at Babylon (see above), it is a probable conjecture that Silvanus, by whom it was transmitted to those Churches, had joined St. Peter after a tour of visitation, either in pursuance of instructions from St. Paul, then a prisoner at Rome, or in the capacity of a minister of high authority in the Church, and that his account of the condition of the Christians in those districts determined the Apostle to write the Epistle. From the absence of personal salutations, and other indications, it may perhaps be inferred that St. Peter had not hitherto visited the Churches; but it is certain that he was thoroughly acquainted both with their external circumstances and spiritual state. It is clear that Silvanus is not regarded by St. Peter as one of his own coadjutors, but as one whose personal character he had sufficient opportunity of appreciating (v. 12). Such a testimonial as the Apostle gives to the soundness of his faith, would of course have the greatest weight with the

<sup>9</sup> See Tillemont, *Mémoires*, i. p. 187, and 555. He shows that the account of Ambrose (which is not to be found in the Bened. edit.) is contrary to the apocryphal legend. Later writers rather value it as reflecting upon St. Peter's want of courage or constancy. That St. Peter, like all good men, valued his life, and suffered reluctantly, may be inferred from our Lord's words (John xxi.); but his flight is more in harmony with the principles of a Christian than wilful exposure to persecution. Origen refers to the words then said to have been spoken by our Lord, but quotes an apocryphal work (*On St. John*, tom. ii.).

<sup>10</sup> Papias and Clem. Alex., referred to by Eusebius, *H. E.* ii. 15; Tertullian, *c. Marc.* iv. c. 5; Irenaeus, iii. 1, and iv. 9. Petavius (on Epphanus, p. 428) observes that

Papias derived his information from John the Presbyter. For other passages see Fabricius (*Bibl. Gr.* tom. ii. 127). The slight discrepancy between Eusebius and Papias indicates independent sources of information.

<sup>11</sup> Gieseler, quoted by Davidson.

<sup>12</sup> No importance can be attached to the omission in the mutilated fragment on the Canon, published by Muralt. See Routh, *Rel. Sac.* i. 396, and the note of Fabricius, which Routh quotes, p. 424. Theodorus of Mopsuestia, a shrewd but rash critic, is said to have rejected it, as some of the Catholic epistles; but the statement is ambiguous. See Davidson (*Ant.* iii. 381), whose translation is incorrect.

Christians, to whom the Epistle appears to be especially, though not exclusively addressed. The assumption that Silvanus was employed in the dictation of the Epistle is not borne out by the title, "by Silvanus, I have written unto you," words according to ancient usage applying rather to a bearer than to the writer or amanuensis. It is highly probable that Silvanus, considering his character, and special connexion with those Jews, and with their great Apostle and founder, he consulted by St. Peter throughout, and they would together read the Epistles of St. Peter, especially those addressed to the Churches in districts: thus, partly with direct intention, it may be unconsciously, a Pauline colouring, lying in passages to something like a studied use of St. Paul's representations of Christian life may have been introduced into the Epistle. It has been observed above that there is good reason to suppose that St. Peter was in the habit of employing an interpreter; nor is there anything inconsistent with his position or character in the supposition that Silvanus, perhaps also St. Mark, may have assisted him in giving expression to the thoughts dictated to him by the Holy Spirit. We have thus, therefore, a not unsatisfactory solution of the discrepancy arising from correspondences both of style and of thought in the writings of two men who differed so widely in gifts and acquirements.

The objects of the Epistle, as deduced from its title, coincide with these assumptions. They are—1. To comfort and strengthen the Christians in season of severe trial. 2. To enforce the practical spiritual duties involved in their calling. 3. To warn them against special temptations attached to their position. 4. To remove all doubt as to the necessity and completeness of the religious system they had already received. Such an attestation is especially needed by the Hebrew Christians, who were wont to appeal from St. Paul's authority to the elder Apostles, and above all to that of Peter. The last, which is perhaps the very principal object, is kept in view throughout the Epistle, distinctly stated, ch. v. ver. 12. The objects may come out more clearly in a summary.

The Epistle begins with salutations and general exhortations to Christians (i. 1, 2), followed by a statement of their present privileges and future inheritance (3-5); the bearings of that statement on their conduct under persecution (6-9); and, according to the Apostle's wont, to provide for the future, concerning both the sufferings of Christ and the resurrection of His people (10-12); exhortations upon those promises to earnestness, sobriety, obedience, and holiness, as results of knowledge of redemption, of atonement by the blood of Christ, and of the resurrection, and as proofs of regeneration by the word of God. Peculiar stress is laid upon the cardinal graces of faith, hope, charity, love, each connected with and resting upon the fundamental doctrines of the Gospel. Abstinence from the spiritual sins most

is the general opinion of the ablest commentators. The texts were nearly unanimous in holding that it was written for Hebrew converts. But several passages seem to be meant for Gentiles: e. g. i. 14, 18; ii. 9, 10; iii. 2. Reus, an original and able writer, is almost of the opinion that it was addressed chiefly to converts (p. 133). He takes *κακοπαγε* and *κακοπαγεις* as *ᾠμῶν*, Israelites by faith, not by ceremonial

directly opposed to those graces is then enforced (ii. 1); spiritual growth is represented as dependent upon the nourishment supplied by the same Word which was the instrument of regeneration (2, 3); and then, by a change of metaphor, Christians are represented as a spiritual house, collectively and individually as living stones, and royal priests, elect, and brought out of darkness into light (4-10). This portion of the Epistle is singularly rich in thought and expression, and bears the peculiar impress of the Apostle's mind, in which Judaism is spiritualized, and finds its full development in Christ. From this condition of Christians, and more directly from the fact that they are thus separated from the world, pilgrims and sojourners, St. Peter deduces an entire system of practical and relative duties, self-control, care of reputation, especially for the sake of Gentiles; submission to all constituted authorities; obligations of slaves, urged with remarkable earnestness, and founded upon the example of Christ and His atoning death (11-25); and duties of wives and husbands (iii. 1-7). Then generally all Christian graces are commended, those which pertain to Christian brotherhood, and those which are especially needed in times of persecution, gentleness, forbearance, and submission to injury (8-17): all the precepts being based on imitation of Christ, with warnings from the history of the deluge, and with special reference to the baptismal covenant.

In the following chapter (iv. 1, 2) the analogy between the death of Christ and spiritual mortification, a topic much dwelt on by St. Paul, is urged with special reference to the sins committed by Christians before conversion, and habitual to the Gentiles. The doctrine of a future judgment is inculcated, both with reference to their heathen persecutors as a motive for endurance, and to their own conduct as an incentive to sobriety, watchfulness, fervent charity, liberality in all external acts of kindness, and diligent discharge of all spiritual duties, with a view to the glory of God through Jesus Christ (3-11).

This Epistle appears at the first draught to have terminated here with the doxology, but the thought of the fiery trial to which the Christians were exposed stirs the Apostle's heart, and suggests additional exhortations. Christians are taught to rejoice in partaking of Christ's sufferings, being thereby assured of sharing His glory, which even in this life rests upon them, and is especially manifested in their innocence and endurance of persecution: judgment must come first to cleanse the house of God, then to reach the disobedient: suffering according to the will of God, they may commit their souls to Him in well doing as unto a faithful Creator. Faith and hope are equally conspicuous in these exhortations. The Apostle then (v. 1-4) addresses the presbyters of the Churches, warning them as one of their own body, as a witness (*μαρτυρῶν*) of Christ's sufferings, and partaker of future glory, against negligence, covetousness, and love of power: the younger members he exhorts to submission and humility, and concludes this part with a warning against their spiritual enemy, and a solemn and

observance (*nicht nach dem Cultus*). See also Weiss, *Der Petrinische Lehrbegriff*, p. 28, n. 2.

\* The question has been thoroughly discussed by Hug, Ewald, Bertholdt, Weiss, and other critics. The most striking resemblances are perhaps 1 Pet. i. 3, with Eph. i. 3; ii. 18, with Eph. vi. 8; iii. 1, with Eph. v. 22; and v. 8, with v. 21: but allusions nearly as distinct are found to the Hebrews, Corinthians, Colossians, Ephesians, and Philippians.

most beautiful prayer to the God of all grace. Lastly, he mentions Silvanus with special commendation, and states very distinctly what we have seen reason to believe was a principal object of the Epistle, viz., that the principles inculcated by their former teachers were sound, the true grace of God, to which they are exhorted to adhere. A salutation from the Church in Babylon and from St. Mark, with a parting benediction, closes the Epistle.

The harmony of such teaching with that of St. Paul is sufficiently obvious, nor is the general arrangement or mode of discussing the topics unlike that of the Apostle of the Gentiles; still the indications of originality and independence of thought are at least equally conspicuous, and the Epistle is full of what the Gospel narrative and the discourses in the Acts prove to have been characteristic peculiarities of St. Peter. He dwells more frequently than St. Paul upon the future manifestation of Christ, upon which he bases nearly all his exhortations to patience, self-control, and the discharge of all Christian duties. There is not a shadow of opposition here, the topic is not neglected by St. Paul, nor does St. Peter omit the Pauline argument from Christ's sufferings; still what the Germans call the eschatological element predominates over all others. The Apostle's mind is full of one thought, the realization of Messianic hopes. While St. Paul dwells with most earnestness upon justification by our Lord's death and merits, and concentrates his energies upon the Christian's present struggles, St. Peter fixes his eye constantly upon the future coming of Christ, the fulfilment of prophecy, the manifestation of the promised kingdom. In this he is the true representative of Israel, moved by those feelings which were best calculated to enable him to do his work as the Apostle of the circumcision. Of the three Christian graces hope is his special theme. He dwells much on good works, but not so much because he sees in them necessary results of faith, or the complement of faith, or outward manifestations of the spirit of love, aspects most prominent in St. Paul, St. James, and St. John, as because he holds them to be tests of the soundness and stability of a faith which rests on the fact of the resurrection, and is directed to the future in the developed form of hope.

But while St. Peter thus shows himself a genuine Israelite, his teaching is directly opposed to Judaizing tendencies. He belongs to the school, or, to speak more correctly, is the leader of the school, which at once vindicates the unity of the Law and the Gospel, and puts the superiority of the latter on its true basis, that of spiritual development. All his practical injunctions are drawn from Christian, not Jewish principles, from the precepts, example, life, death, resurrection, and future coming of Christ. The Apostle of the circumcision says not a word in this Epistle of the perpetual obligation, the dignity, or even the bearings of the Mosaic Law. He is full of the Old Testament; his style and thoughts are charged with its imagery, but he contemplates and applies its teaching in the light of the Gospel; he regards the privileges and glory of the ancient people of God entirely in their spiritual development in the Church of Christ. Only one who had been brought up as a Jew could have had his spirit so impregnated with these thoughts; only one who had been thoroughly emancipated by the Spirit of

Christ could have risen so completely above the prejudices of his age and country. This is a point of great importance, showing how utterly opposed the teaching of the original Apostles, whom St. Peter certainly represents, was to that Judaistic narrowness which speculative rationalism has imputed to all the early followers of Christ, with the exception of St. Paul. There are in fact more traces of what are called Judaizing views, more of sympathy with national hopes, not to say prejudices, in the Epistles to the Romans and Galatians, than in this work. In this we see the Jew who has been born again, and exchanged what St. Peter himself calls the unbearable yoke of the law for the liberty which is in Christ. At the same time it must be admitted that our Apostle is far from tracing his principles to their origin, and from drawing out their consequences with the vigour, spiritual discernment, internal sequence of reasoning, and systematic completeness which are characteristic of St. Paul. A few great facts, broad solid principles on which faith and hope may rest securely, with a spirit of patience, confidence, and love, suffice for his speculative mind. To him objective truth was the main thing; subjective struggles between the intellect and spiritual consciousness, such as we find in St. Paul, and the intuitions of a spirit absorbed in contemplation like that of St. John, though not by any means alien to St. Peter, were in him wholly subordinated to the practical tendencies of a simple and energetic character. It has been observed with truth, that both in tone and in form the teaching of St. Peter bears a peculiarly strong resemblance to that of our Lord, in discourses bearing directly upon practical duties. The great value of the Epistle to believers consists in this resemblance; they feel themselves in the hands of a safe guide, of one who will help them to trace the hand of their Master in both dispensations, and to confirm and expand their faith.

SECOND EPISTLE.—The Second Epistle of St. Peter presents questions of far greater difficulty than the former. There can be no doubt that, whether we consider the external or the internal evidence, it is by no means easy to demonstrate its genuineness. We have few references, and none of a very positive character, in the writings of the early Fathers; the style differs materially from that of the First Epistle, and the resemblance, amounting to a studied imitation, between this Epistle and that of St. Jude, seems scarcely reconcilable with the position of St. Peter. Doubts as to its genuineness were entertained by the greatest critics of the early Church; in the time of Eusebius it was reckoned among the disputed books, and was not formally admitted into the Canon until the year 393, at the Council of Hippo. The opinion of critics of what is called the liberal school, including all shades from Lücke to Baur, has been decidedly unfavourable, and that opinion has been adopted by some able writers in England. There are, however, very strong reasons why this verdict should be reconsidered. No one ground on which it rests is unsound. The rejection of this book affects the authority of the whole Canon, which, in the opinion of one of the keenest and least scrupulous critics (Rieser) of modern Germany, is free from any other error. It is not a question as to the possible authorship of a work like that of the Hebrews, which does not bear

<sup>1</sup> The reading *εργα* is in all points preferable to that of the *lectus receptus*, *εργασια*.

\* Thus Riesa, *Pierre n'a pas de système*. See also Stricker and Weiss pp. 14, 17.

the writer's name: this Epistle must either be dismissed as a deliberate forgery, or accepted as the last production of the first among the Apostles of Christ. The Church, which for more than fourteen centuries has received it, has either been imposed upon by what must in that case be regarded as a Satanic device, or derived from it spiritual instruction of the highest importance. If received, it bears attestation to some of the most important facts in our Lord's history, casts light upon the feelings of the Apostolic body in relation to the elder Church and to each other, and, while it confirms many doctrines generally inculcated, is the chief, if not the only, voucher for eschatological views touching the destruction of the framework of creation, which from an early period have been prevalent in the Church.

The contents of the Epistle seem quite in accordance with its asserted origin.

The customary opening salutation is followed by an enumeration of Christian blessings and exhortation to Christian duties, with special reference to the maintenance of the truth which had been already communicated to the Church (i. 1-13). Referring then to his approaching death, the Apostle assigns as grounds of assurance for believers his own personal testimony as eye-witness of the transfiguration, and the sure word of prophecy, that is the testimony of the Holy Ghost (14-21). The danger of being misled by false prophets is dwelt upon with great earnestness throughout the second chapter, their covetousness and gross sensuality combined with pretences to spiritualism, in short all the permanent and fundamental characteristics of Antinomianism, are described, while the overthrow of all opponents of Christian truth is predicted (ii. 1-29) in connexion with prophecies touching the second advent of Christ, the destruction of the world by fire, and the promise of new heavens and a new earth wherein dwelleth righteousness. After an exhortation to attend to St. Paul's teaching, in accordance with the less explicit admonition in the previous Epistle, and an emphatic warning, the Epistle closes with the customary ascription of glory to our Lord and Saviour Jesus Christ.

We may now state briefly the answers to the objections above stated.

1. With regard to its recognition by the early Church, we observe that it was not likely to be read frequently; it was addressed to a portion of the Church not at that time much in intercourse with the rest of Christendom: the documents of a primitive Church are far too scanty to give weight to the argument (generally a questionable one) from silence. Although it cannot be proved to have been referred to by any author earlier than Origen, passages from Clement of Rome, Hermas, Justin Martyr, Theophilus of Antioch, and Irenaeus, suggest acquaintance with this Epistle: to these may be added a probable reference in the Martyrdom of Pionius, quoted by Westcott, *On the Canon*, p. 87, and another in the Apology of Melito, published in 1841 by Dr. Cureton. It is also distinctly stated by Eusebius, *H. E.* vi. 14, and by Photius, *col.*

108, that Clement of Alexandria wrote a commentary on all the disputed Epistles, in which this was certainly included. It is quoted twice by Origen, but unfortunately in the translation of Rufinus, which cannot be relied upon. Didymus refers to it very frequently in his great work on the Trinity. It was certainly included in the collection of Catholic Epistles known to Eusebius and Origen, a very important point made out by Olshausen, *Opuscula Theol.* p. 29. It was probably known in the third century in different parts of the Christian world: in Cappadocia to Firmilian, in Africa to Cyprian, in Italy to Hippolytus, in Phoenicia to Methodius. A large number of passages has been collected by Dieblein, which, though quite insufficient to prove its reception, add somewhat to the probability that it was read by most of the early Fathers. The historical evidence is certainly inconclusive, but not such as to require or to warrant the rejection of the Epistle. The silence of the Fathers is accounted for more easily than its admission into the Canon after the question as to its genuineness had been raised. It is not conceivable that it should have been received without positive attestation from the Churches to which it was first addressed. We know that the autographs of Apostolic writings were preserved with care. It must also be observed that all motive for forgery is absent. This Epistle does not support any hierarchical pretensions, nor does it bear upon any controversies of a later age.

2. The difference of style may be admitted. The only question is, whether it is greater than can be satisfactorily accounted for, supposing that the Apostle employed a different person as his amanuensis. That the two Epistles could not have been composed and written by the same person is a point scarcely open to doubt. Olshausen, one of the fairest and least prejudiced of critics, points out eight discrepancies of style, some perhaps unimportant, but others almost conclusive, the most important being the appellations given to our Saviour, and the comparative absence of references to the Old Testament in this Epistle. If, however, we admit that some time intervened between the composition of the two works, that in writing the first the Apostle was aided by Silvanus, and in the second by another, perhaps St. Mark, that the circumstances of the Churches addressed by him were considerably changed, and that the second was written in greater haste, not to speak of a possible decay of faculties, the differences may be regarded as insufficient to justify more than hesitation in admitting its genuineness. The resemblance to the Epistle of St. Jude may be admitted without affecting our judgment unfavourably. Supposing, as some eminent critics have believed, that this Epistle was copied by St. Jude, we should have the strongest possible testimony to its authenticity; but if, on the other hand, we accept the more general opinion of modern critics, that the writer of this Epistle copied St. Jude, the following considerations have great weight. It seems quite

St. Paul's observations on the Epistle of St. James are equally applicable to this. It would be, compassing, little known to Gentile converts, while the party gradually died out, and was not at any time mixed up with the general movement of the Church. The literary documents of the Hebrew Christians are few, and this Epistle would be of little use to them. Had the book not been supported by

strong external credentials, its general reception or circulation seem unaccountable.

<sup>b</sup> The passages are quoted by Guerike, *Einleitung*, p. 462.

<sup>c</sup> See Dr. Wordsworth's Commentary on 2 Peter. His chief ground is that St. Peter predicts a state of affairs which St. Jude describes as actually existing. A very strong ground, admitting the authenticity of both Epistles.

incredible that a forger, personating the chief among the Apostles, should select the least important of all the Apostolical writings for imitation; whereas it is probable that St. Peter might choose to give the stamp of his personal authority to a document bearing so powerfully upon practical and doctrinal errors in the Churches which he addressed. Considering, too, the characteristics of our Apostle, his humility, his impressionable mind, so open to personal influences, and his utter forgetfulness of self when doing his Master's work, we should hardly be surprised to find that part of the Epistle which treats of the same subjects coloured by St. Jude's style. Thus in the First Epistle we find everywhere, especially in dealing with kindred topics, distinct traces of St. Paul's influence. This hypothesis has moreover the advantage of accounting for the most striking, if not all the discrepancies of style between the two Epistles.

3. The doubts as to its genuineness appear to have originated with the critics of Alexandria, where, however, the Epistle itself was formally recognised at a very early period. Those doubts, however, were not quite so strong as they are now generally represented. The three greatest names of that school may be quoted on either side. On the one hand there were evidently external credentials, without which it could never have obtained circulation; on the other, strong subjective impressions, to which these critics attached scarcely less weight than some modern inquirers. They rested entirely, so far as can be ascertained, on the difference of style. The opinions of modern commentators may be summed up under three heads. Many, as we have seen, reject the Epistle altogether as spurious, supposing it to have been directed against forms of Gnosticism prevalent in the early part of the second century. A few<sup>4</sup> consider that the first and last chapters were written by St. Peter or under his dictation, but that the second chapter was interpolated. So far, however, is either of these views from representing the general results of the latest investigations, that a majority of names,<sup>5</sup> including nearly all the writers of Germany opposed to Rationalism, who in point of learning and ability are at least upon a par with their opponents, may be quoted in support of the genuineness and authenticity of this Epistle. The statement that all critics of eminence and impartiality concur in rejecting it is simply untrue, unless it be admitted that a belief in the reality of objective revelation is incompatible with critical impartiality, that belief being the only common point between the numerous defenders of the canonicity of this document. If it were a question now to be decided for the first time upon the external or internal evidences still accessible, it may be admitted that it would be far more difficult to maintain this than any other document in the New Testament; but the judgment of the early Church is not to be reversed without far stronger arguments than have been adduced, more especially as the Epistle is entirely free from objections which might be brought, with more show of reason, against others now all but universally received; inculcating no new doctrine, bearing on no controversies of post-

Apostolical origin, supporting no heterodox innovations, but simple, earnest, devout, and eminently practical, full of the characteristic graces of the Apostle, who, as we believe, inculcated the best proof of faith and hope to the Church.

Some Apocryphal writings of very early date obtained currency in the Church as containing the substance of the Apostle's teaching. The fragments which remain are not of much importance, as could they be conveniently discussed in this volume. The *Preaching* (*κέρρυμα*) or *Doctrine* (*διδασκαλία*) of Peter,<sup>6</sup> probably identical with a work called by Irenæus the *Preaching* of Paul, or of Paul and Peter, quoted by Lactantius, may have contained some traces of the Apostle's teaching, if, as Grabe, Ziegler, and others supposed, it was published soon after his death. The passages, however, quoted by Clement of Alexandria are for the most part wholly unconnected with Peter's mode of treating doctrinal or practical subjects.<sup>7</sup> Another work, called the *Revelation of Peter* (*ἀποκάλυψις Πέτρου*), was held in much esteem for centuries. It was commented on by Clement of Alexandria, quoted by Theodoret in the *Synodus*, named together with the *Revelation* of St. John in the *Fragment on the Canon* published by Nestor (but with the remark, "quam quidem et non legi in Ecclesia noluit"), and according to Symeon (*E. H.* vii. 19) was read once a year in the Churches of Palestine. It is said, but not with authority, to have been preserved among the Gnostic Christians. Eusebius looked on it as questionable not of heretic origin. From the fragments of notices it appears to have consisted chiefly of denunciations against the Jews, and predictions of the fall of Jerusalem, and to have been of a wild and superstitious character. The most complete account of this curious work is given by Lunde in the preface introduction to the *Revelation* of St. John, p. 61.

The legends of the Clementines are wholly devoid of historical worth; but from these traditions, originating with an obscure and heretical sect, have been derived some of the most mischievous questions of modern rationalists, especially as regards the assumed antagonism between St. Paul and the earlier Apostles. It is important to observe, however, that in none of these spurious documents, which belong undoubtedly to the two first centuries, there are any indications that our Apostle was regarded as in any peculiar sense connected with the Church of Rome, or that he exercised a canonical authority over the Apostolic body, of which he was the recognised leader or representative. [1. 1. 1.]

[CEPHAS (*Κηφᾶς*) occurs in the following passages: John i. 42; 1 Cor. i. 12; in 22, in 28, in Gal. ii. 9, i. 18, ii. 10, 14 (the last three verses to the text of Lachmann and Tischendorf). This is the Chaldean word *Cephas*, כֶּפֶס, rock: a translation of, or derivation from, the Hebrew כֶּהֱן, "a rock," a rare word, found only in 1 Sam. i. and Jer. iv. 20. It must have been the word actually pronounced by our Lord in Matt. xvi. 18, at subsequent occasions when the Apostle was named

<sup>4</sup> E. g. Bunsen, Ullmann, and Lange.  
<sup>5</sup> Nitzsche, Platt, Dahlman, Windischmann, Heydenreich, Guerike, Pott, Augusti, Olshausen, Thiersch, Stier, and Dietrich.  
<sup>6</sup> The two names are believed by some - i. e. Cave, Urabe, Ittig, Mill, &c. - to belong to the same work. See

Schleemann, *Die Clementinen*, p. 231.  
<sup>7</sup> Rufinus and Jerome allude to a work named *libellus "Judeum Petri"*; for which Cave assumes by conjecture, adopted by Nitzsche, Heydenreich, &c. as Schleemann, that Eusebius found ground for rejection of read apocryph.

by Him or other Hebrews by his new name. By it he was known to the Corinthian Christians. In the ancient Syriac version of the New Test. (Peshito), it is uniformly found where the Greek has *Petros*. When we consider that our Lord and the Apostles spoke Chaldee, and that therefore (as already remarked) the Apostle must have been always addressed as Cephas, it is certainly remarkable that throughout the Gospels, no less than 97 times, with one exception only, the name should be given in the Greek form, which was of later introduction, and unintelligible to Hebrews, though intelligible to the far wider Gentile world among which the Gospel was about to begin its course. Even in St. Mark, where more Chaldee words and phrases are retained than in all the other Gospels put together, this is the case. It is as if in our English Bibles the name were uniformly given, not Peter, but Rock; and it suggests that the meaning contained in the appellation is of more vital importance, and intended to be more carefully seized at each recurrence, than we are apt to recollect. The commencement of the change from the Chaldee name to its Greek synonym is well marked in the interchange of the two in Gal. ii. 7, 8, 9 (Stanley, *Apostolic Age*, 116, 7.)

**PETHAHIAH** (פֶּתְחִיָּה: *Phetia*; Alex. *Φεθια*: *Phetia*). 1. A priest, over the 19th course in the reign of David (1 Chr. xxiv. 16).

2. (*Φεθια*: *Phatati*, *Phathathia*.) A Levite in the time of Ezra, who had married a foreign wife (Esr. x. 23). He is probably the same who, with others of his tribe, conducted the solemn service on the occasion of the fast, when "the seed of Israel separated themselves from all strangers" (Neh. ix. 5), though his name does not appear among those who sealed the covenant (Neh. x.).

3. (*Φεθια*: *Phathathia*.) The son of Meshezebel and descendant of Zerach the son of Judah (Neh. xi. 24), who was "at the king's hand in all matters concerning the people." The "king" here is explained by Rashi to be Darius: "he was an associate in the counsel of the king Darius for all matters affecting the people, to speak to the king concerning them."

**PETHO'R** (פֶּתוֹר: *Phetourd*), a town of Mesopotamia where Balaam resided (Num. xxii. 5; Deut. xxiii. 4). Its position is wholly unknown. [W. L. B.]

**PETHUEL** (פֶּתוּעַל: *Phetueal*: *Phatuel*). The father of the prophet Joel (Joel i. 1).

**PEULTHAI** (פֶּלְטָחַי: *Phelathi*; Alex. *Φολαθ*: *Phollathi*). Properly "Peullethai;" the eighth son of Obad-edom (1 Chr. xxvi. 5).

**PHA'ATH MO'AB** (פֶּהֶאֶת מוֹאָב: *Phaath Moab*; Alex. *Φααθ Μωαβ*: *Phaath Moab*). 1 Esd. v. 11 = PAHATH MOAB. In this passage the number (2812) agrees with that in Ezra, and disagrees with Nehemiah.

**PHACARETH** (פֶּחָרֶת: *Phareth*; Alex. *Φακαρέθ*: *Phacareth*) = POCHEREETH of Zebeim (1 Esd. v. 34).

**PHAISUR** (פֶּהֶסוּר: *Phaisur*; Alex. *Φαισού*: *Fuscure*). PASHUR, the priestly family (1 Esd. ix. 22).

**PHALDAIUS** (Φαλδαῖος: *Fuldeus*) = PEDAIAN 4 (1 Esd. ix. 44).

**PHALE'AS** (Φαλαῖος: *Hellu*) = PADON (1 Esd. v. 29).

**PHA'LEC** (פֶּהֶלֶק: *Phaley*). PELEG the son of Eber (Luke iii. 35).

**PHAL'LU** (פֶּהֶלְלִי: *Phallu*; Alex. *Φαλλού*).

*Phallu*). Phallu the son of Reuben is so called in the A. V. of Gen. xlv. 9.

**PHALTI** (פֶּחְלִי: *Phalti*). The son of Laish of Gallim, to whom Saul gave Michal in marriage after his mad jealousy had driven David forth as an outlaw (1 Sam. xxv. 44). In 2 Sam. iii. 15 he is called PHALTIEL. Ewald (*Gesch.* iii. 129) suggests that this forced marriage was a piece of policy on the part of Saul to attach Phalti to his house. With the exception of this brief mention of his name, and the touching little episode in 2 Sam. iii. 16, nothing more is heard of Phalti. Michal is there restored to David. "Her husband went with her along weeping behind her to Bahurim," and there, in obedience to Abner's abrupt command, "Go, return," he turns and disappears from the scene.

**PHALTIEL** (פֶּחְלִיֵּאל: *Phaltiel*). The same as PHALTI (2 Sam. iii. 15).

**PHAN'UEL** (פֶּהֶנּוּעַל: *Phanuel*). The father of Anna, the prophetess of the tribe of Aser (Luke ii. 36).

**PHAR'ACIM** (פֶּהֶרָעִים: *Pharaim*; Alex. *Φαρακίμ*: *Pharaim*). The "sons of Pharacim" were among the servants of the Temple who returned with Zerubbabel, according to the list in 1 Esd. v. 31. No corresponding name is found in the parallel narratives of Ezra and Nehemiah.

**PHAR'AOH** (פֶּהֶרָאוֹ: *Pharao*; Alex. *Φαραώ*: *Pharao*), the common title of the native kings of Egypt in the Bible, corresponding to P-RA or PH-RA, "the Sun," of the hieroglyphics. This identification, respecting which there can be no doubt, is due to the Duke of Northumberland and General Felix (Rawlinson's *Herod.* ii. p. 293). It has been supposed that the original was the same as the Coptic *στρο*, "the king," with the article, *πιστρο*, *φοτρο*; but this word appears not to have been written, judging from the evidence of the Egyptian inscriptions and writings, in the times to which the Scriptures refer. The conjecture arose from the idea that Pharaoh must signify, instead of merely implying, "king," a mistake occasioned by a too implicit confidence in the exactness of ancient writers (Joseph. *Ant.* viii. 6, §2; Euseb. ed. Scal. p. 20, v. 1.).

By the ancient Egyptians the king was called "the Sun," as the representative on earth of the god RA, or "the Sun." It was probably on this account that more than one of the Pharaohs bear in the nomen, in the second royal ring, the title "ruler of Heliopolis," the city of Ra, HAK-AN, as in the case of Rameses III., a distinction shared, though in an inferior degree, if we may judge from the frequency of the corresponding title, by Thebes, but by scarcely any other city.\* One of the most common regal titles, that which almost always precedes the nomen, is "Son of the Sun," SA-RA. The prenomen, in the first royal ring, regularly commences with a disk, the character which represents the sun, and this name, which the king took on his accession, thus comprises the title Pharaoh: for instance, the prenomen of Psammitichus II., the successor of Necho, is RA-NUFI-HAT, "Pharaoh" or "Ra of the god heart." In the period before the sixth dynasty, when

\* The kings who bear the former title are chiefly of the name Rameses, "Born of Ra," the god of Heliopolis, which renders the title especially appropriate.

There was out a single ring, the use of the word RA was not invariable, many names not commencing with it, as SHUFU or KHUFU, the king of the 17th dynasty who built the Great Pyramid. It is difficult to determine, in rendering these names, whether the king or the divinity be meant: perhaps in royal names no distinction is intended, both Pharaoh and Ra being meant.

The word Pharaoh occurs generally in the Bible, and always in the Pentateuch, with no addition, for the king of Egypt. Sometimes the title "king of Egypt" follows it, and in the cases of the last two native kings mentioned, the proper name is added, Pharaoh-Necho, Pharaoh-Hophra, with sometimes the further addition "king, or the king, of Egypt." It is remarkable that Shishak and Zerah (if, as we believe, the second were a king of Egypt), and the Ethiopians So and Tirhakah, are never distinctly called Pharaoh (the mention of a Pharaoh during the time of the Ethiopians probably referring to the Egyptian Sethos), and that the latter were foreigners and the former of foreign extraction.

As several kings are only mentioned by the title "Pharaoh" in the Bible, it is important to endeavour to discriminate them. We shall therefore here state what is known respecting them in order, adding an account of the two Pharaohs whose proper names follow the title.

1. *The Pharaoh of Abraham.*—The Scripture narrative does not afford us any clear indications for the identification of the Pharaoh of Abraham. At the time at which the patriarch went into Egypt, according to Hales's as well as Usher's chronology, it is generally held that the country, or at least Lower Egypt, was ruled by the Shepherd kings, of whom the first and most powerful line was the 17th dynasty, the undoubted territories of which would be first entered by one coming from the east. Manetho relates that Salatis, the head of this line, established at Avaris, the Zoan of the Bible, on the eastern frontier, what appears to have been a great permanent camp, at which he resided for part of each year. [ZOAN.] It is noticeable that Sarah seems to have been taken to Pharaoh's house immediately after the coming of Abraham; and if this were not so, yet, on account of his flocks and herds, the patriarch could scarcely have gone beyond the part of the country which was always more or less occupied by nomad tribes. It is also probable that Pharaoh gave Abraham camels, for we read, that Pharaoh "entreated Abram well for Sarah's sake: and he had sheep, and oxen, and he asses, and menservants, and maidservants, and she asses, and camels" (Gen. xii. 16), where it appears that this property was the gift of Pharaoh, and the circumstance that the patriarch afterwards held an Egyptian bondswoman, Hagar, confirms the inference. If so, the present of camels would argue that this Pharaoh was a Shepherd king, for no evidence has been found in the sculptures, paintings, and inscriptions of Egypt, that in the Pharaonic ages the camel was used, or even known there, and this omission can be best explained by the supposition that the animal was hateful to the Egyptians as of great value to their enemies the Shepherds.

The date at which Abraham visited Egypt (according to the chronology we hold most probable), was about B.C. 2081, which would accord with the

time of Salatis, the head of the 17th dynasty, according to our reckoning.

2. *The Pharaoh of Joseph.*—The history of Joseph contains many particulars as to the Pharaoh whose minister he became. We first hear of him as the arbitrary master who imprisoned his two sons, and then, on his birthday-feast, reinstated the one and hanged the other. We next read of his dreams, how he consulted the magicians and wise men of Egypt, and on their failing to interpret them, by the advice of the chief of the cupbearers, sent for Joseph from the prison, and after he had heard his interpretations and counsel, chose him as governor of the country, taking, as it seems, the advice of his servants. The sudden advancement of a despised stranger to the highest place under the king is important in showing his absolute power and manner of governing. From this time we read more of Joseph than of Pharaoh. We are told, however, that Pharaoh finally received Joseph's kindred, allowing them to dwell in the land of Goshen, where he had sons. The last mention of a Pharaoh in Joseph's history is in the account of the death and burial of Jacob. It has been supposed from the following passage that the position of Joseph had then become changed. "Joseph spake unto the house of Pharaoh, saying, If now I have found grace in your eyes, I pray you, in the ears of Pharaoh, saying, My father made me swear, saying, Lo, I die: and ye shall bury me: and ye shall open mine eyes, and ye shall bury me in the land of Canaan; there shalt thou bury me. Now therefore let me go up, I pray thee, and bury my father: and I will come again. And Pharaoh said, God, and bury thy father, according as he hath said: and thou shalt swear." (Gen. i. 4-6). The account of the embalming of Jacob, in which we are told that "Joseph commanded his servants the physicians to embalm his father" (ver. 2), shows the position of Joseph, which is more distinctly proved by the narrative of the subsequent journey into Palestine. "And Joseph went up to bury his father: and with him went up all the servants of Pharaoh, the elders of his house, and all the elders of the land of Egypt, and all the house of Joseph, and his wife, and his father's house: only their little ones, and their flocks, and their herds, they left in the land of Goshen. And there went up with him his chariots and horsemen: and it was a very great company" (7-9). To make such an expedition this, with perhaps risk of a battle, would not doubt require special permission, and in Joseph's whole history we can understand that he would have hesitated to ask a favour for himself while it is most natural that he should be explained that he had no further motive in the journey. The fear of his brethren that after their father's death he would take vengeance on them for his former cruelty, and his declaration that he would nourish them and their little ones, prove he held a high position. His dying charge too indicates that the persecution had then commenced, so that it had not seems quite clear from the narrative at the beginning of Exodus. It then appears that Joseph retained his position until Jacob's death, and it is therefore probable, nothing being known to the contrary, that the Pharaoh who sent Joseph governor was on the throne during the time that seems to have held office, twenty-six years. It may suppose that the "new king" who did not Joseph" (Ex. i. 8) was head of a new race. It is very unlikely that he was the immediate successor of this Pharaoh, as the interval between

\* It has been erroneously asserted that a hieroglyphic representing the head and neck of the camel is found on the Egyptian monuments.

appointment of the governor to the beginning of the oppression was not less than eighty years, and probably much more.

The chief points for the identification of the line to which this Pharaoh belonged, are that he was a despotic monarch, ruling all Egypt, who followed Egyptian customs, but did not hesitate to set them aside when he thought fit; that he seems to have desired to gain complete power over the Egyptians; and that he favoured strangers. These particulars certainly appear to lend support to the idea that he was an Egyptianized foreigner rather than an Egyptian; and M. Mariette's recent discoveries at Zoan, or Avaris, have positively settled what was the great difficulty to most scholars in the way of this view, for it has been ascertained that the shepherds, of at least one dynasty, were so thoroughly Egyptianized that they executed monuments of an Egyptian character, differing alone in a peculiarity of style. Before, however, we state the main heads of argument in favour of the idea that the Pharaoh of Joseph was a Shepherd, it will be well to mention the grounds of the theories that make him an Egyptian. Baron Bunsen supposed that he was Sesertesen I., the head of the xiith dynasty, on account of the mention in a hieroglyphic inscription of a famine in that king's reign. This identification, although receiving some support from the statement of Herodotus, that Sesostria, a name reasonably traceable to Sesertesen, divided the land and raised his chief revenue from the rent paid by the holders, must be abandoned, since the calamity recorded does not approach Joseph's famine in character, and as the age is almost certainly too remote. According to our reckoning this king began to reign about B.C. 2080, and Baron Bunsen places him much earlier, so that this idea is not tenable, unless we take the long chronology of the Judges, and hold the sojourn in Egypt to have lasted 430 years. If we take the Rabbinical date of the Exodus, Joseph's Pharaoh would have been a king of the xviiiith dynasty, unless, with Bunsen, we lengthen the Hebrew chronology before the Exodus as arbitrarily as, in adopting that date, we shorten it after the Exodus. To the idea that this king was of the xviiiith dynasty there is this objection, which we hold to be fatal, that the monuments of that line, often recording the events of almost every year, present no trace of the remarkable circumstances of Joseph's rule. Whether we take Ussher's or Hales's date of the Exodus, Joseph's government would fall before the xviiiith dynasty, and during the Shepherd period. (By the Shepherd period is generally understood the period after the xiith dynasty and before the xviiiith, during which the foreigners were dominant over Egypt, although it is possible that they already held part of the country at an earlier time.) If, discarding the idea that Joseph's Pharaoh was an Egyptian, we turn to the old view that he was one of the Shepherd kings, a view almost inevitable if we infer that he ruled during the Shepherd period, we are struck with the fitness of all the circumstances of the Biblical narrative. These foreign rulers, or at least some of them were Egyptianized, yet the account of Manetho, if we somewhat lessen the colouring that we may suppose national hatred gave it, is now shown to be correct in making them disregard the laws and religion of the country they had subdued. They were evidently powerful military despots. As foreigners ruling what was treated as a conquered country, if not actually won by force of arms, they would have

encouraged foreign settlers, particularly in their own especial region in the east of Lower Egypt, where the Pharaoh of Joseph seems to have had cattle (Gen. xlvii. 5, 6). It is very unlikely, unless we suppose a special interposition of Providence, that an Egyptian Pharaoh, with the acquiescence of his counsellors, should have chosen a Hebrew slave as his chief officer of state. It is stated by Eusebius that the Pharaoh to whom Jacob came was the Shepherd Apophis; and although it may be replied that this identification was simply a result of the adjustment of the dynasties to his view of Hebrew chronology, it should be observed that he seems to have altered the very dynasty of Apophis, both in its number (making it the xviith instead of the xvth), and in its duration, as though he were convinced that this king was really the Pharaoh of Joseph, and must therefore be brought to his time. Apophis belonged to the xvth dynasty, which was certainly of Shepherds, and the most powerful foreign line, for it seems clear that there was at least one if not two more. This dynasty, according to our view of Egyptian chronology, ruled for either 284 years (Africanus), or 259 years 10 months (Josephus), from about B.C. 2080. If Hales's chronology, which we would slightly modify, be correct, the government of Joseph fell under this dynasty, commencing about B.C. 1876, which would be during the reign of the last but one or perhaps the last king of the dynasty, was possibly in the time of Apophis, who ended the line according to Africanus. It is to be remarked that this dynasty is said to have been of Phœnicians, and if so was probably of a stock predominantly Shemite, a circumstance in perfect accordance with what we know of the government and character of Joseph's Pharaoh, whose act in making Joseph his chief minister finds its parallels in Shemite history, and in that of nations which derived their customs from Shemites. An Egyptian king would scarcely give so high a place to any but a native, and that of the military or priestly class; but, as already remarked, this may have been due to Divine interposition.

This king appears, as has been already shewn, to have reigned from Joseph's appointment (or, perhaps, somewhat earlier, since he was already on the throne when he imprisoned his servants), until Jacob's death, a period of at least twenty-six years, from B.C. cir. 1876 to 1850, and to have been the fifth or sixth king of the xvth dynasty.

3. *The Pharaoh of the Oppression.*—The first persecutor of the Israelites may be distinguished as the Pharaoh of the Oppression, from the second, the Pharaoh of the Exodus, especially as he commenced, and probably long carried on, the persecution. Here, as in the case of Joseph's Pharaoh, there has been difference of opinion as to the line to which the oppressor belonged. The general view is that he was an Egyptian, and this at first sight is a probable inference from the narrative, if the line under which the Israelites were protected be supposed to have been one of Shepherds. The Biblical history here seems to justify clearer deductions than before. We read that Joseph and his brethren and that generation died, and that the Israelites multiplied and became very mighty and filled the land. Of the events of the interval between Jacob's death and the oppression we know almost nothing; but the calamity to Ephraim's house, in the slaughter of his sons by the men of Gath, born as it seems in Egypt [BERIAH], renders it probable that the Israelites had become a tributary tribe, settled in Goshen, and be-

ginning to show that warlike vigour that is so strong a feature in the character of Abraham, that is not wanting in Jacob's, and that fitted their posterity for the conquest of Canaan. The beginning of the oppression is thus narrated:—"Now there arose a new king over Egypt, which knew not Joseph" (Ex. i. 8). The expression "a new king" (comp. "another king," Acts vii. 18) does not necessitate the idea of a change of dynasty, but favours it. The next two verses are extremely important:—"And he said unto his people, Behold, the people of the children of Israel [are] more and mightier than we: come on, let us deal wisely with them; lest they multiply, and it come to pass that, when there falleth out any war, they join also unto our enemies, and fight against us, and [so] get them up out of the land" (9, 10). Here it is stated that Pharaoh ruled a people of smaller numbers and less strength than the Israelites, whom he feared lest they should join with some enemies in a possible war in Egypt, and so leave the country. In order to weaken the Israelites he adopted a subtle policy which is next related. "Therefore they did set over them taskmasters to afflict them with their burdens. And they built for Pharaoh treasure cities, Pithom and Raameses" (11). The name of the second of these cities has been considered a most important point of evidence. They multiplied notwithstanding, and the persecution apparently increased. They were employed in brickmaking and other labour connected with building, and perhaps also in making pottery (Ps. lxxxi. 6). This bondage producing no effect, Pharaoh commanded the two Hebrew midwives to kill every male child as it was born; but they deceived him, and the people continued to increase. He then made a fresh attempt to enfeeble them. "And Pharaoh charged all his people, saying, Every son that is born ye shall cast into the river, and every daughter ye shall save alive" (22). How long this last infamous command was in force we do not know, probably but for a short time, unless it was constantly evaded, otherwise the number of the Israelites would have been checked. It may be remarked that Aaron was three years older than Moses, so that we might suppose that the command was issued after his birth; but it must also be observed that the fear of the mother of Moses, at his birth, may have been because she lived near a royal residence, as appears from the finding of the child by Pharaoh's daughter. The story of his exposure and rescue shows that even the oppressor's daughter could feel pity, and disobey her father's command; while in her saving Moses, who was to ruin her house, is seen the retributive justice that so often makes the tyrant pass by and even protect, as Pharaoh must have done, the instrument of his future punishment. The etymology of the name of Moses does not aid us: if Egyptian, it may have been given by a foreigner; if foreign, it may have been given by an Egyptian to a foreign child. It is important that Pharaoh's daughter adopted Moses as her son, and that he was taught in all the wisdom of Egypt. The persecution continued, "And it came to pass in those days, when Moses was grown, that he went out unto his brethren, and looked on their burdens: and he spied an Egyptian smiting an Hebrew, one of his brethren. And he looked this way and that way, and when he saw that [there was]

\* When Moses went to see his people and slew the Egyptian, he does not seem to have made any journey.

no man, he slew the Egyptian, and hid him in the sand" (ii. 11, 12). When Pharaoh attempted to slay Moses he fled into the land of Midian. From the statement in Hebrews that he "refused to be called the son of Pharaoh's daughter; choosing rather to suffer affliction with the people of God than to enjoy the pleasures of sin for a season; esteeming the reproach of Christ greater riches than the treasures in Egypt" (xi. 24-26), it is evident that the adoption was no mere form, and this is a point of evidence not to be slighted. While Moses was in Midian Pharaoh died, and the narrative implies that this was shortly before the events preceding the Exodus.

This Pharaoh has been generally supposed to have been a king of the xviii<sup>th</sup> or xix<sup>th</sup> dynasty; we believe that he was of a line earlier than either. The chief points in the evidence in favour of the former opinion are the name of the city Raames, whence it has been argued that one of the oppressors was a king Rameses, and the probable change of line. The first king of this name known was head of the xix<sup>th</sup> dynasty, or last king of the xviii<sup>th</sup>. According to Manetho's story of the Exodus, a story so contradictory to historical truth as scarcely to be worthy of mention, the Israelites left Egypt in the reign of Menptah, who was great grandson of the first Rameses, and son and successor of the second. This king is held by some Egyptologists to have reigned about the time of the Rabbinical date of the Exodus, which is virtually the same as that which has been supposed to be obtainable from the genealogies. There is however good reason to place these kings much later; in which case Rameses I. would be the oppressor; but then the building of Raameses could not be placed in his reign without a disregard of Hebrew chronology. But the argument that there is no earlier known king Rameses loses much of its weight when we bear in mind that one of the sons of Aahmes, head of the xviii<sup>th</sup> dynasty, who reigned about two hundred years before Rameses I., bore the same name, besides that very many names of kings of the Shepherd-period, perhaps of two whole dynasties, are unknown. Against this one fact, which is certainly not to be disregarded, we must weigh the general evidence of the history, which shows us a king apparently governing a part of Egypt, with subjects inferior to the Israelites, and fearing a war in the country. Like the Pharaoh of the Exodus, he seems to have dwelt in Lower Egypt, probably at Avaris.\* Compare this condition with the power of the kings of the later part of the xviii<sup>th</sup> and of the xix<sup>th</sup> dynasties; rulers of an empire, governing a united country from which the head of their line had driven the Shepherds. The view that this Pharaoh was of the beginning or middle of the xviii<sup>th</sup> dynasty seems at first sight extremely probable, especially if it be supposed that the Pharaoh of Joseph was a Shepherd king. The expulsion of the Shepherds at the commencement of this dynasty would have naturally caused an immediate or gradual oppression of the Israelites. But it must be remembered that what we have just said of the power of some kings of this dynasty is almost as true of their predecessors. The silence of the historical monuments is also to be weighed, when we bear in mind how numerous they are, and that we might expect many of the events of the oppression to be recorded if the Exodus were not noticed. If we

\* And the burying in sand shows that the place was in a part of Egypt like Goshen, encompassed by sandy deserts.

assign this Pharaoh to the age before the xviii<sup>th</sup> dynasty, which our view of Hebrew chronology would probably oblige us to do, we have still to determine whether he were a Shepherd or an Egyptian. If a Shepherd, he must have been of the xvth or the xviii<sup>th</sup> dynasty; and that he was Egyptianized does not afford any argument against this supposition, since it appears that foreign kings, who can only be assigned to one of these two lines, had Egyptian names. In corroboration of this view we quote a remarkable passage that does not seem otherwise explicable: "My people went down aforetime into Egypt to sojourn there; and the Assyrian oppressed them without cause" (Is. lii. 4): which may be compared with the allusions to the Exodus in a prediction of the same prophet respecting Assyria (x. 24, 26). Our inference is strengthened by the discovery that kings bearing a name almost certainly an Egyptian translation of an Assyrian or Babylonian regal title are among those apparently of the Shepherd age in the Turin Papyrus (Lepsius, *Ägyptische Buch*, taf. xviii. xix. 275, 285).

The reign of this king probably commenced a little before the birth of Moses, which we place B.C. 1732, and seems to have lasted upwards of forty years, perhaps much more.

4. *The Pharaoh of the Exodus.*—What is known of the Pharaoh of the Exodus is rather biographical than historical. It does not add much to our means of identifying the line of the oppressors excepting by the indications of race his character affords. His life is spoken of in other articles. [PLAGUES, &c.] His acts show us a man at once impious and superstitious, alternately rebelling and submitting. At first he seems to have thought that his magicians could work the same wonders as Moses and Aaron, yet even then he begged that the frogs might be taken away, and to the end he prayed that a plague might be removed, promising a concession to the Israelites, and as soon as he was repulsed failed to keep his word. This is not strange in a character principally influenced by fear, and history abounds in parallels to Pharaoh. His vacillation only ended when he lost his army in the Red Sea, and the Israelites were finally delivered out of his hand. Whether he himself was drowned has been a long-considered matter of uncertainty, as it is not so stated in the account of the Exodus. Another passage, however, appears to affirm it (Ps. cxxxvi. 15). It seems to be too great a latitude of criticism either to argue that the expression in this passage indicates the overthrow but not the death of the king, or that the Hebrew expression "shaken off" or "removed" is very literal, or that it is only a Semitic expression. Besides, throughout the history his end is foreshadowed, and is, positively foretold in Ex. ix. 15; though the passage may be rendered "For now I might have cut off my hand, and might have smitten thee people with pestilence; and thou wouldest have been cut off from the earth," as by Kalisch (*Levi* in loc.), instead of as in the A. V. Though we have already stated our reasons for rejecting the theory that places the Exodus under the xviii<sup>th</sup> dynasty, it may be well to notice an additional conclusive argument for rejecting as unhistorical the tale preserved by Manetho, which makes the son of Ramesses II., the Pharaoh in whom the Israelites left Egypt. This tale was in current in Egypt, but it must be remarked that the historian gives it only on the authority of M. Mariette's recent discoveries have

added to the evidence we already had on the subject. In this story the secret of the success of the rebels was that they had allotted to them by Amenophis, or Menptah, the city of Avaris formerly held by the Shepherds, but then in ruins. That the people to whom this place was given were working in the quarries east of the Nile is enough of itself to throw a doubt on the narrative, for there appear to have been no quarries north of those opposite Memphis, from which Avaris was distant nearly the whole length of the Delta; but when it is found that this very king, as well as his father, adorned the great temple of Avaris, the story is seen to be essentially false. Yet it is not improbable that some calamity occurred about this time, with which the Egyptians wilfully or ignorantly confounded the Exodus: if they did so ignorantly, there would be an argument that this event took place during the Shepherd period, which was probably in after times an obscure part of the annals of Egypt.

The character of this Pharaoh finds its parallel among the Assyrians rather than the Egyptians. The impiety of the oppressor and that of Sennacherib are remarkably similar, though Sennacherib seems to have been more resolute in his resistance than Pharaoh. This resemblance is not to be overlooked, especially as it seems to indicate an idiosyncrasy of the Assyrians and kindred nations, for national character was more marked in antiquity than it is now in most peoples, doubtless because isolation was then general and is now special. Thus, the Egyptian monuments show us a people highly reverencing their gods and even those of other nations, the most powerful kings appearing as suppliants in the representations of the temples and tombs; in the Assyrian sculptures, on the contrary, the kings are seen rather as protected by the gods than as worshipping them, so that we understand how in such a country the famous decree of Darius, which Daniel disobeyed, could be enacted. Again the Egyptians do not seem to have supposed that their enemies were supported by gods hostile to those of Egypt, whereas the Assyrians considered their gods as more powerful than those of the nations they subdued. This is important in connection with the idea that at least one of the Pharaohs of the oppression was an Assyrian.

Respecting the time of this king we can only say that he was reigning for about a year or more before the Exodus, which we place B.C. 1652.

Before speaking of the later Pharaohs we may mention a point of weight in reference to the identification of these earlier ones. The accounts of the campaigns of the Pharaohs of the xviii<sup>th</sup>, xix<sup>th</sup> and xx<sup>th</sup> dynasties have not been found to contain any reference to the Israelites. Hence it might be supposed that in their days, or at least during the greater part of their time, the Israelites were not yet in the Promised Land. There is, however, an almost equal silence as to the Canaanite nations. The land itself, KANANA or KANAAN, is indeed mentioned as invaded, as well as those of KHEITA and AMAR, referring to the Hittites and Amorites; but the latter two must have been branches of those nations seated in the valley of the Orontes. A recently-discovered record of Thothmes III., published by M. de Rougé, in the *Revue Archéologique* (Nov. 1861, pp. 344, seqq.), contains many names of Canaanite towns conquered by that king, but not one recognized as Israelite. These Canaanite names are, moreover, on the Israelite borders, not in the heart of the country. It is interesting that a great

battle is shown to have been won by this king at Megiddo. It seems probable that the Egyptians either abstained from attacking the Israelites from a recollection of the calamities of the Exodus, or that they were on friendly terms. It is very remarkable that the Egyptians were granted privileges in the Law (Deut. xxiii. 7), and that Shishak, the first king of Egypt after the Exodus whom we know to have invaded the Hebrew territories, was of foreign extraction, if not actually a foreigner.

5. *Pharaoh, father-in-law of Mered.*—In the genealogies of the tribe of Judah, mention is made of the daughter of a Pharaoh, married to an Israelite; "Bithiah the daughter of Pharaoh, which Mered took" (1 Chr. iv. 18). That the name Pharaoh here probably designates an Egyptian king we have already shown, and observed that the date of Mered is doubtful, although it is likely that he lived before, or not much after, the Exodus. [BITHIAH.] It may be added that the name Miriam, of one of the family of Mered (17), apparently his sister, or perhaps a daughter by Bithiah, suggests that this part of the genealogies may refer to about the time of the Exodus. This marriage may tend to aid us in determining the age of the sojourn in Egypt. It is perhaps less probable that an Egyptian Pharaoh would have given his daughter in marriage to an Israelite, than that a Shepherd king would have done so, before the oppression. But Bithiah may have been taken in war after the Exodus, by the surprise of a caravan, or in a foray.

6. *Pharaoh, father-in-law of Hadad the Edomite.*—Among the enemies who were raised up against Solomon was Hadad, an Edomite of the blood royal, who had escaped as a child from the slaughter of his nation by Joab. We read of him and his servants, "And they arose out of Midian, and came to Paran; and they took men with them out of Paran, and they came to Egypt, unto Pharaoh king of Egypt; who gave him an house, and appointed him victuals, and gave him land. And Hadad found great favour in the sight of Pharaoh, so that he gave him to wife the sister of his own wife, the sister of Tahpenes the queen. And the sister of Tahpenes bare him Genubath his son, whom Tahpenes weaned in Pharaoh's house: and Genubath was in Pharaoh's household among the sons of Pharaoh" (1 K. xi. 18-20). When, however, Hadad heard that David and Joab were both dead, he asked Pharaoh to let him return to his country, and was unwillingly allowed to go (21, 22). Probably the fugitives took refuge in an Egyptian mining-station in the peninsula of Sinai, and so obtained guides to conduct them into Egypt. There they were received in accordance with the Egyptian policy, but with the especial favour that seems to have been shown about this time towards the eastern neighbours of the Pharaohs, which may reasonably be supposed to have led to the establishment of the xxiid dynasty of foreign extraction. For the identification of this Pharaoh we have chronological indications, and the name of his wife. Unfortunately, however, the history of Egypt at this time is extremely obscure, neither the monuments nor Manetho giving us clear information as to the kings. It appears that towards the latter part of the xth dynasty the high-priests of Amen, the god of Thebes, gained great power, and at last supplanted the Rameses family, at least in Upper Egypt. At the same time a line of Tanite kings, Manetho's xxiid dynasty, seems to have ruled in Lower Egypt. From the latest part of the xth

dynasty three houses appear to have reigned at the same time. The feeble xth dynasty was probably soon extinguished, but the priest-rulers and the Tanites appear to have reigned contemporaneously until they were both succeeded by the Bubastid of the xxiid dynasty, of whom Sheshonk I., the Shishak of the Bible, was the first. The monuments have preserved the names of several of the high-priests, perhaps all, and probably of some of the Tanites; but it is a question whether Manetho's Tanite line does not include some of the former, and we have no means of testing the accuracy of its numbers. It may be reasonably supposed that the Pharaoh or Pharaohs spoken of in the Bible is ruling in the time of David and Solomon, not Tanites, as Tanis was nearest to the Israelite territory. We have therefore to compare the chronological indications of Scripture with the list of this dynasty. Shishak, as we have shown elsewhere, must have begun to reign in about the 24th or 25th year of Solomon (B.C. 925-907). [CHRONOLOGY.] The conquest of Elam probably took place some 50 years earlier. It may therefore be inferred that Hadad fled to a king of Egypt who may have ruled at least 25 years, probably ceasing to govern before Solomon married the daughter of a Pharaoh early in his reign; but it seems unlikely that the protector of David's enemy would have given his daughter to Solomon, unless he were a powerless king, which appears was not the case with Solomon's father-in-law. This would give a reign of 25 years, or 25 + x separated from the close of the dynasty by a period of 25 or 25 years. According to Africanus, the list of the xxiid dynasty is as follows: Smenkides, 26 years; Psusennes, 46; Nephelcheres, 4; Amenhotep, 7; Ososchor, 6; Psinaches, 9; Psusennes, 14; but Eusebius gives the second king 41, and the last, 35 years, and his numbers make up the sum of 130 years, which Africanus and he agree in assigning to the dynasty. If we take the numbers of Eusebius, Ososchor would probably be the Pharaoh to whom Hadad fled, and Psusennes II. the father-in-law of Solomon; but the numbers of Africanus would substitute Psusennes I., and probably Psinaches. We cannot, however, be sure that the reigns did not overlap, or were not separated by intervals, and the numbers are not to be considered reliable until tested by the monuments. The royal names of the period have been searched in vain for any one resembling Tahpenes. If the Egyptian equivalent to the similar geographical name Tahpanhes be known, we might have some clue to that of this queen. [TAHPENES; TAHAPANES.]

7. *Pharaoh, father-in-law of Solomon.*—In the narrative of the beginning of Solomon's reign, see the account of the deaths of Adonijah, Joab and Shimei, and the deprivation of Abiathar, we read: "And the kingdom was established in the hand of Solomon. And Solomon made affinity with Pharaoh king of Egypt, and took Pharaoh's daughter, and brought her into the city of David, and he had made an end of building his own house, and the house of the LORD, and the wall of Jerusalem round about" (1 K. ii. 46, iii. 1). The events mentioned before the marriage belong altogether to the very commencement of Solomon's reign, excepting the matter of Shimei, which extending through three years is carried on to its completion. The circumstance that the queen was brought into the city of David while Solomon's house, and the Temple, and the city-wall, were building, shows that the marriage

not later than the eleventh year of the reign of the Temple was finished, having been in the fourth year (vi. 1, 37, 38). It is out that this alliance was before Solomon's day into idolatry (iii. 3), of which the queen does not seem to have been one of. From this chronological indication it is at the marriage must have taken place between 24 and 11 years before Shishak's accession must be recollected that it seems certain that his father-in-law was not the Pharaoh reigning when Hadad left Egypt. Both as already shown, cannot yet be identified in his list. [PHARAOH'S DAUGHTER.] Pharaoh led an expedition into Palestine, thus incidentally mentioned, where the Pharaoh of Gezer by Solomon is recorded: "Pharaoh of Egypt had gone up, and taken Gezer, and with fire, and slain the Canaanites in the city, and given it [for] a present daughter, Solomon's wife" (ix. 16). This curious historical circumstance, for it is in the reign of David or Solomon, more in the latter, an Egyptian king apparently on friendship with the Israelite monarch, an expedition into Palestine, and besieged a Canaanite city. This occurrence warns the supposition that similar expeditions have occurred in earlier times without a war against the Canaanites. Its incidental mention also shows of inferring, from the silence of Scripture in earlier expeditions, that nothing of the place. [PALESTINE, p. 667, a.] Egyptian alliance is the first indication, says of Moses, of that leaning to Egypt distinctly forbidden in the Law, and the most disastrous consequences in later native kings of Egypt and the Ethiopians supported the Hebrews, and were to make war upon them, but they remained tributaries, and exposed them to the kings of Assyria. If the Hebrews incur a direct punishment for their leaning it must have weakened their trust in the Pharaoh, and paralyzed their efforts to defend against the Assyrians and their party. The kings of Egypt mentioned in the Bible are, probably Zerah, and So. The first of these were of the xxiind dynasty, if the mention of Zerah with Userken be accepted, and was doubtless one of the two Shebeks of the xxiind dynasty, which was of Ethiopians. The dynasty was a line of kings of foreign origin, retained foreign names, and it is noticed that Zerah is called a Cushite in the Bible (i. 9; comp. xvi. 8). Shebek was probably a foreign name. The title "Pharaoh" was not once given to these kings in the Bible, as they were not Egyptians, and did not have Egyptian names. The Shepherd kings, it is marked, adopted Egyptian names, and one of the earlier sovereigns called Pharaoh in the Bible may be conjectured to have been notwithstanding that they bear this title. [ZERAH; SO.]

Pharaoh, the opponent of Sennacherib.—In

the narrative of Sennacherib's war with Hezekiah, mention is made not only of "Tirhakah king of Cush," but also of "Pharaoh king of Mizraim." Rabshakeh thus taunted the king of Judah for having sought the aid of Pharaoh: "Lo, thou trustest in the staff of this broken reed, on Egypt; whereon if a man lean, it will go into his hand, and pierce it: so [is] Pharaoh king of Egypt to all that trust in him" (Is. xxxvi. 6). The comparison of Pharaoh to a broken reed is remarkable, as the common hieroglyphics for "king," restricted to Egyptian sovereigns, SU-TEN, strictly a title of the ruler of Upper Egypt, commence with a bent reed, which is an ideographic symbolical sign proper to this word, and is sometimes used alone without any phonetic complement. This Pharaoh can only be the Sethos whom Herodotus mentions as the opponent of Sennacherib, and who may be reasonably supposed to be the Set of Manetho, the last king of his xliiind dynasty. Tirhakah, as an Ethiopian, whether then ruling in Egypt or not, is, like So, apparently not called Pharaoh. [TIRHAKAH.]

9. Pharaoh Necho.—The first mention in the Bible of a proper name with the title Pharaoh is in the case of Pharaoh Necho, who is also called Necho simply. His name is written Necho, נֶכֶח, and Nechoh, נֶחֱח, and in hieroglyphics NEKU. This king was of the Salte xxvith dynasty, of which Manetho makes him either the fifth ruler (Africannus) or the sixth (Eusebius). Herodotus calls him Nekos, and assigns to him a reign of sixteen years, which is confirmed by the monuments.<sup>6</sup> He seems to have been an enterprising king, as he is related to have attempted to complete the canal connecting the Red Sea with the Nile, and to have sent an expedition of Phoenicians to circumnavigate Africa, which was successfully accomplished. At the commencement of his reign (B.C. 610), he made war against the king of Assyria, and being encountered on his way by Josiah, defeated and slew the king of Judah at Megiddo. The empire of Assyria was then drawing to a close, and it is not unlikely that Necho's expedition tended to hasten its fall. He was marching against Carchemish on the Euphrates, a place already of importance in the annals of the Egyptian wars of the xixth dynasty (*Sel. Pap. Sallier*, 2.). As he passed along the coast of Palestine, Josiah disputed his passage, probably in consequence of a treaty with Assyria. The king of Egypt remonstrated, sending ambassadors to assure him that he did not make war upon him, and that God was on his side. "Nevertheless Josiah would not turn his face from him, but disguised himself, that he might fight with him, and hearkened not unto the words of Necho from the mouth of God, and came to fight in the valley of Megiddo." Here he was wounded by the archers of the king of Egypt, and died (comp. 2 Chr. xxxv. 20-24; 2 K. xxiii. 29, 30). Necho's assertion that he was obeying God's command in warring with the Assyrians seems here to be confirmed. Yet it can scarcely be understood as more than a conviction that the war was predestined, for it ended in the destruction of Necho's army and the curtailment of his empire. Josiah seems from the

ing to this historian, he was the son of Psammetichus I. to this monuments do not corroborate. It says that he married NEET-APERT, daughter of Psammetichus I. and queen SHEETUN-NEET-APERT. Like her mother, to have been

the heiress of an Egyptian royal line, and supposes that he was the son of Psammetichus by a second wife (see *Histoire d'Egypte*, p. 252, comp. 249). If he married Neet-APERT, he may have been called by Manetho by the name of the son of Psammetichus.

narrative to have known he was wrong in opposing the king of Egypt; otherwise an act so contrary to the Egyptianizing policy of his house would scarcely have led to his destruction and be condemned in the history. Herodotus mentions this battle, relating that Necho made war against the Syrians, and defeated them at Magdohus, after which he took Cadytis, "a large city of Syria" (ii. 159). There can be no reasonable doubt that Magdohus is Megiddo, and not the Egyptian town of that name [MIGDOL], but the identification of Cadytis is difficult. It has been conjectured to be Jerusalem, and its name has been supposed to correspond to the ancient title "the Holy," *הקדושה*, but it is elsewhere mentioned by Herodotus as a great coast-town of Palestine near Egypt (iii. 5), and it has therefore been supposed to be Gaza. The difficulty that Gaza is not beyond Megiddo would perhaps be removed if Herodotus be thought to have confounded Megiddo with the Egyptian Magdohus, but this is not certain. (See Sir Gardner Wilkinson's note to *Her.* ii. 159, ed. Rawlinson.) It seems possible that Cadytis is the Hittite city KETESH, on the Orontes, which was the chief stronghold in Syria of those captured by the kings of the xviii and xix dynasties. The Greek historian adds that Necho dedicated the dress he wore on these occasions to Apollo at the temple of Branchidae (*l. c.*). On Josiah's death his son Jehoahaz was set up by the people, but dethroned three months afterwards by Pharaoh, who imposed on the land the moderate tribute of a hundred talents of silver and a talent of gold, and put in his place another son of Josiah, Eliakim, whose name he changed to Jehoikim, conveying Jehoahaz to Egypt, where he died (2 K. xiii. 30-34; 2 Chr. xxxi. 1-4). Jehoikim appears to have been the elder son, so that the deposing of his brother may not have been merely because he was made king without the permission of the conqueror. Necho seems to have soon returned to Egypt: perhaps he was on his way thither when he deposed Jehoahaz. The army was probably posted at Carchemish, and was there defeated by Nebuchadnezzar in the fourth year of Necho (B.C. 607), that king not being, as it seems, then at its head (*Jer.* xli. 1, 2, 6, 10). This battle led to the loss of all the Asiatic dominions of Egypt; and it is related, after the mention of the death of Jehoikim, that "the king of Egypt came not again any more out of his land: for the king of Babylon had taken from the river of Egypt unto the river Euphrates all that pertained to the king of Egypt" (2 K. xiv. 7). Jeremiah's prophecy of this great defeat by Euphrates is followed by another, of its consequence, the invasion of Egypt itself; but the latter calamity did not occur in the reign of Necho, nor in that of his immediate successor, Psammetichus II., but in that of Hophra, and it was yet future in the last king's reign when Jeremiah had been carried into Egypt after the destruction of Jerusalem.

10. *Pharaoh Hophra*.—The next king of Egypt mentioned in the Bible is Pharaoh Hophra, the second successor of Necho, from whom he was separated by the six years' reign of Psammetichus II. The name Hophra is in hieroglyphics WAH-(P)IRAHAT, and the last syllable is equally omitted by Herodotus, who writes Apries, and by Manetho, who writes Uaphris. He came to the throne about B.C. 589, and ruled nineteen years. Herodotus makes him son of Psammetichus II., whom he calls Psammis, and great-grandson of Psammetichus I. The his-

torian relates his great prosperity, how he attacked Sidon, and fought a battle at sea with the king of Tyre, until at length an army which he had dispatched to conquer Cyrene was routed, and the Egyptians, thinking he had purposely caused its overthrow to gain entire power, no doubt by substituting mercenaries for native troops, revolted, and set up Amasis as king. Apries, only supported by the Carian and Ionian mercenaries, was routed in a pitched battle. Herodotus remarks in narrating this, "It is said that Apries believed that there was not a god who could cast him down from his eminence, so firmly did he think that he had established himself in his kingdom." He was taken prisoner, and Amasis for a while treated him with kindness, but when the Egyptians blamed him, "he gave Apries over into the hands of his former subjects, to deal with as they chose. Then the Egyptians took him and strangled him" (ii. 161-169). In the Bible it is related that Zedekiah, the last king of Judah, was aided by a Pharaoh against Nebuchadnezzar, in his fulfilment of a treaty, and that an army came out of Egypt, so that the Chaldeans were obliged to raise the siege of Jerusalem. The city was first besieged in the ninth year of Zedekiah, B.C. 590, and was captured in his eleventh year, B.C. 588. It was evidently continuously invested for a length of time before it was taken, so that it is most probable that Pharaoh's expedition took place during 590 or 589. There may, therefore, be some doubt whether Psammetichus II. be not the king here spoken of; but it must be remembered that the siege may be supposed to have lasted some time before the Egyptians could have heard of it and marched to relieve the city, and also that Hophra may have come to the throne as early as B.C. 590. The Egyptian army returned without effecting its purpose (*Jer.* xvi. 5-8; *Ez.* xvii. 11-18; comp. 2 K. xiv. 14). Afterwards a remnant of the Jews fled to Egypt, and seem to have been kindly received. From the prophecies against Egypt and against these fugitives we learn more of the history of Hophra; and here the narrative of Herodotus, of which we have given the chief heads, is a valuable commentary. Isaiah speaks of the arrogance of this king in words which strikingly recall those of the Greek historian. The prophet describes him as a great crocodile lying in his rivers, and saying "My river [is] mine own, and I have made [it] for myself" (*Isa.* lv. 7). Pharaoh was to be overthrown and his country invaded by Nebuchadnezzar (*Isa.* lxxii., *xxx.*, *xxxv.*, *xxxvi.*). This prophecy was yet unfulfilled in B.C. 574 (*Isa.* 17-20). Jeremiah, in Egypt, yet more distinctly prophesied the end of Pharaoh, warning the Jews,—"Thus saith the LORD; Behold, I will give Pharaoh-hophra king of Egypt into the hand of his enemies, and into the hand of them that seek his life, as I gave Zedekiah king of Judah into the hand of Nebuchadnezzar king of Babylon, his enemy, and he sought his life" (*xli.* 9). In another place, when foretelling the defeat of Necho's army, the same prophet says,—"Behold, I will punish Amos in Sin and Pharaoh, and Egypt, with their gods, and their kings; even Pharaoh, and [all] them that trust in him: and I will deliver them into the hand of those that seek their lives, and into the hand of Nebuchadnezzar king of Babylon, and into the hand of his servants" (*xli.* 25, 26). These passages, which entirely agree with the account Herodotus gives of the death of Apries, make it not improbable that the invasion of Nebuchadnezzar was the cause of that disaffection of his subjects which

birth and death of this Pharaoh. Not spoken of by any reliable preceding Berosus (Cory, *Ant. Frag.*), but the silence of Herodotus and others is a matter of surprise, as well as the Syrian records in cuneiform of other unrecorded elsewhere or only in date annals. No subsequent mention in Scripture, but there are pre-referring to the misfortunes of later second Persian conquest, when the Pharaoh had no more a prince of the land (2 Chr. ix. 13) was fulfilled. [R. S. P.]

**PHARAOH'S DAUGHTER; PHARAOH, DAUGHTER OF.** Three Egyptian princesses of Pharaohs, are mentioned in the

life of Moses, daughter of the Pharaoh who oppressed the Israelites. She appears to have been something more than ordinary to be indicated in the passage in which the faith of Moses (xi. 23-26), in "Pharaoh's daughter," perhaps that she was the only daughter. She was at least forty years after she saved Moses to be implied in Hebrews (i. c.) when he fled to Midian. Artapanus, a historian of uncertain date, has preserved traditions current among Jews, calls this princess Merthis, the oppressor, Palmanothes, and was married to Chenesephres, who reigned above Memphis, for that at that time many kings of Egypt, but that she became sovereign of the whole Egypt. (*Hist. Græc.* iii. pp. 220 seqq.) She is supposed to be a corruption of equivalent of Amen-hept, the Egyptian king of the xviiiith dynasty, and actually applied to one of the sixteenth, name, Menphoth, is wholly different from others. No one of these however we know, a daughter with a name like this, nor is there any king with a name of this time. These kings, however, do not belong to the period of the dynasties. The tradition is valuable excepting as showing that one of the Pharaohs given by Manetho and others is correct. [See PHARAOH, 3.]

Life of Mered an Israelite, daughter of an uncertain age, probably of about Exodus. [See BITHIAH; PHARAOH, 7.]

Solomon, most probably daughter of the dynasty. She was married to Solomon, and apparently treated with as has been supposed that the Song of Solomon on the occasion of this marriage; we think, repugnant to sound criticism brought into the city of David after a house was built for him, because Solomon would not have a house of David, which had been the ark having been there (2 Chr. xii. 13). [R. S. P.]

**THE WIFE OF.** The wife of the king who received Haddad the Philistine in Scripture. She is called

"queen," and her name, Tahpenes, is given. Her husband was most probably of the xxist dynasty. [TAHPENES; PHARAOH, 6.] [R. S. P.]

**PHAR'ATHONI** (*Pharath*; Joseph. *Ant. Jud.* vi. 103). One of the cities of Judaea fortified by Bacchides during his contests with Jonathan Maccabæus (1 Macc. ix. 50). In both MSS. of the LXX. the name is joined to the preceding—Thamnatha-Pharathon; but in Josephus, the Syriac, and Vulgate, the two are separated. Ewald (*Geschichte*, iv. 373) adheres to the former. Pharathon doubtless represents an ancient Pirathon, though hardly that of the Judges, since that was in Mt. Ephraim, probably at *Perata*, a few miles west of *Nabbus*, too far north to be included in Judaea properly so called. [G.]

**PHARES** (*Phares*; Pharez or Perez, the son of Judah (Matt. i. 3; Luke iii. 33).

**PHAREZ.** 1. (PEREZ, 1 Chr. xxvii. 3; PHARES, Matt. i. 3, Luke iii. 33, 1 Ead. v. 5). (*Pharez*; *Phares*, "a breach." Gen. xxxviii. 29), twin son, with Zarah, or Zerah, of Judah and Tamar his daughter-in-law. The circumstances of his birth are detailed in Gen. xxxviii. Pharez seems to have kept the right of primogeniture over his brother Zerah, as, in the genealogical lists, his name comes first. The house also which he founded was far more numerous and illustrious than that of the Zarahites. Its remarkable fertility is alluded to in Ruth iv. 12, "Let thy house be like the house of Pharez, whom Tamar bare unto Judah." Of Pharez's personal history or character nothing is known. We can only speak of him therefore as a demarch, and exhibit his genealogical relations. At the time of the sojourn in the wilderness the families of the tribe of Judah were: of Shelah, the family of the Shelanites, or Shilonites; of Pharez, the family of the Pharezites; of Zerah, the family of the Zarahites. And the sons of Pharez were, of Hezron the family of the Hezronites, of Hamul the family of the Hamulites (Num. xvi. 20, 21). After the death, therefore, of Er and Onan without children, Pharez occupied the rank of Judah's second son, and moreover, from two of his sons sprang two new chief houses, those of the Hezronites and Hamulites. From Hezron's second son Ram, or Aram, sprang David and the kings of Judah, and eventually Jesus Christ. [GENEALOGY OF JESUS CHRIST.] The house of Caleb was also incorporated into the house of Hezron [CALEB], and so were reckoned among the descendants of Pharez. Another line of Pharez's descendants were reckoned as sons of Manasseh by the second marriage of Hezron with the daughter of Machir (1 Chr. ii. 21-23). In the census of the house of Judah contained in 1 Chr. iv., drawn up apparently in the reign of Hezekiah (iv. 41), the houses enumerated in ver. 1 are Pharez, Hezron, Carmi, Hur, and Shobal. Of these all but Carmi (who was a Zarahite, Josh. vii. 1) were descendants of Pharez. Hence it is not unlikely that, as is suggested in the margin of A. V., *Carmi* is an error for *Chelubai*. Some of the sons of Shelah are mentioned separately at ver. 21, 22. [PAHATH-MOAB.] In the reign of David the house of Pharez seems to have been eminently distinguished. The chief of all the captains of the host for the first month,

\* Whence our translators borrowed the final ' of this name does not appear: there is nothing in either of the originals to suggest it. The Geneva Vers. has it *ka*.

Pharez, the son of Zabdai (1 Chr. xvii. 2, 3), famous for his prowess (1 Chr. xi. 11), and called "the chief among the captains" (ib. and 2 Sam. xiii. 8), was of the sons of Perez, or Pharez. A considerable number of the other mighty men seem also, from their patronymic or gentile names, to have been of the same house, those namely who are called Bethlehemites, Palittes (1 Chr. ii. 23, 47) Tekoites, Netophathites,\* and Ithrites (1 Chr. ii. 53, iv. 7). Zabab the son of Ahlai, and Jacob, and his brothers, Ahishai and Asahel, we know were Pharazites (1 Chr. ii. 31, 36, 54, xi. 41). And the royal house itself was the head of the family. We have no means of assigning to their respective families those members of the tribe of Judah who are incidentally mentioned after David's reign, as Adnah, the chief captain of Judah in Jehoshaphat's reign, and Jehohanan and Amasiah, his companions (2 Chr. xvii. 14-16); but that the family of Pharez continued to thrive and multiply, we may conclude from the numbers who returned from captivity. At Jerusalem alone 468 of the sons of Perez, with Athaliah, or Uthai, at their head, were dwelling in the days of Zerubbabel (1 Chr. ix. 4; Neh. xi. 4-6). Zerubbabel himself of course being of the family (1 Esdr. v. 5). Of the lists of returned captives in Esr. ii. Neh. vii., in Nehemiah's time, the following seem to have been of the sons of Pharez, judging as before from the names of their ancestors, or the towns to which they belonged: the children of Bari (Esr. ii. 10; comp. 1 Chr. ix. 4); of Bigvai (ii. 14; comp. Esr. viii. 14); of Ater (ii. 16; comp. 1 Chr. ii. 20, 54); of Jorah, or Hariph (ii. 18; Neh. vii. 24; comp. 1 Chr. ii. 51), of Beth-lehem and Netophah (ii. 21, 22; comp. 1 Chr. ii. 54); of Kirjath-arim (ii. 25; comp. 1 Chr. ii. 50, 53); of Iluvai (ii. 32; comp. 1 Chr. ii. 5); and, judging from their position, many of the intermediate ones also (comp. also the lists in Esr. x. 25-43; Neh. x. 14-27). Of the builders of the wall named in Neh. iii. the following were of the house of Pharez: Zaccor the son of Imri (ver. 2, by comparison with 1 Chr. ix. 4, and Esr. viii. 14, where we ought, with many MSS., to read Zaccor for Zabdai); Zadok the son of Buana (ver. 8, by comparison with 2 Sam. xiii. 29, where we find that Buana was a Netophathite, which agrees with Zadok's place here next to the Tekoites, since Beth-lehem, Netophah, and Tekoa, are often in close juxtaposition, comp. 1 Chr. ii. 54, iv. 4, 5, Esr. ii. 21, 22, Neh. vii. 26, and the situation of the Netophathites close to Jerusalem, among the Benjamites, Neh. xii. 28, 29, compared with the mixture of Benjamites with Pharazites and Zarhites in Neh. iii. 2-7; the Tekoites (ver. 5 and 27, compared with 1 Chr. ii. 24, iv. 5); Jehoiahi, the son of Paseah (ver. 6, compared with 1 Chr. ix. 12, where Paseah, or Chelubite, is apparently descended from Ashur, the father of Tekoa); Rephaiah, the son of Hur (ver. 9, compared with 1 Chr. ii. 20, 50, iv. 4, 5, Beth-lephah); Hanan (ver. 13 and 30), with the inhabitants of Zanoah (compared with 1 Chr. ix. 18); perhaps Mulehiah the son of Rechab (ver. 14, compared with 1 Chr. ii. 55); Nehemiah, son of Azbuk, ruler of Beth-zur (ver. 16, compared with 1 Chr. ii. 45); and perhaps Baruch, son of Zabbai, or Zaccai (ver. 20), if for Zaccai we read Zaccor as the mention of the other, or

\* Material the Netophathite was however a Zarbite  
 On xvii. 13), while Heled, or Heled, the descendant  
 of Jehoiada, was a Pharise (1 Chr. xxvii. 15).

second, piece<sup>10</sup> makes probable, as well as his proximity to Meremoth in this second piece, as Zaccar was to Meremoth in their first piece (ver. 2, 4).

The table on the opposite page displays the chief descendants of the house of Pharez, and shows its relative greatness, as compared with the other houses of the tribe of Judah. It will be observed that many of the details are more topographical than genealogical, and that several towns in Dan, Simeon, and Benjamin, as Eshtaol, Zorah, Etam, and Gibeon, seem to have been peopled with Pharez's descendants. The confusion between the elder and younger Caleb is inextricable, and suggests the suspicion that the elder Caleb or Chelubai may have had no real, but only a genealogical existence, intended to embrace all those families who on the settlement in Canaan were reckoned to the house of Caleb, the son of Jephunneh, the Kenezite.

2. (Φάρος: *Phares*) = PAROSH (1 Esdr. viii. 30; comp. Ezr. viii. 3). [A. C. H.]

PHAR'IRA (Φαρίρα; A. ex. Φαρίδα: *Pharida*)  
= PERIDA or PERUDA (1 Esdr. v. 33).

PHARISEES (*Φαρισαῖοι*: *Phariseæ*), a religious party or school amongst the Jews at the time of Christ, so called from *Perishin*, the Aramaic form of the Hebrew word *Perashin*, "separated." The name does not occur either in the Old Testament or in the Apocrypha; but it is usually considered that the Pharisees were essentially the same with the Assideans (i. e. *chasidim* = golly men, saints) mentioned in the 1st Book of Maccabees i. 42, vii. 13-17, and in the 2nd Book xiv. 6. And those who admit the existence of Maccabean Psalms find allusions to the Assideans in Psalms lxxix. 2, xcvi. 10, cxxxi. 9, 16, cxli. 9, where *chasidim* is translated "saints" in the A. V. (See Fürst's *Handwörterbuch*, i. 420, b.) In the 2nd Book of Maccabees, supposed by Geiger to have been written by a Pharisee (*Überschrift und Uebersetzungen der Bibel*, p. 226), there are two passages which tend to illustrate the meaning of the word "separated;" one in xiv. 3, where Alcimus, who had been high-priest, is described as having defiled himself wilfully "in the times of the mingling"—*ἐν τοῖς χρόις τοῦ μιγέλας χρόνους*,—and another in xiv. 38, where the zealous Razis is said to have been accused of Judaism, "in the former times when there was no mingling," *ἐν τοῖς ἑμποσθεν χρόνοις τοῦ ἀμιγέλας*. In both cases the expression "mingling" refers to the time when Antiochus Epiphanes had partially succeeded in breaking down the barrier which divided the Jews from his other subjects; and it was in the resolute determination to resist the adoption of Grecian customs, and the slightest departure from the requirements of their own law, that the "Separated" took their rise as a party. Compare 1 Mac. i. 13-15, 41-49, 62, 63. Subsequently, however (and perhaps not wholly at first), this by no means exhausted the meaning of the word "Pharisees."

A knowledge of the opinions and practices of this party at the time of Christ is of great importance for entering deeply into the genius of the Christian religion. A cursory perusal of the Gospels is sufficient to show that Christ's teaching was in some respects thoroughly antagonistic to theirs. He denounced them in the bitterest language; and in the sweeping charges of hypocrisy which he made against them as a class, he might even, at first sight, seem

to have departed from that spirit of meekness,\* of gentleness in judging others, and of abstinence from the imputation of improper motives, which is one of the most characteristic and original charms of His own precepts. See Matt. xv. 7, 8, xiii. 5, 13, 14, 15, 23; Mark vii. 6; Luke xi. 42-44, and compare Matt. vii. 1-5, xi. 29, xii. 19, 20; Luke vi. 28, 37-42. Indeed it is difficult to avoid the conclusion that His repeated denunciations of the Pharisees mainly exasperated them into taking measures for causing his death; so that in one sense He may be said to have shed His blood, and to have laid down His life in protesting against their practice and spirit. (See especially verses 53, 54 in the xith chapter of Luke, which follow immediately upon the narration of what he said while dining with a Pharisee.) Hence to understand the Pharisees is, by contrast, an aid towards understanding the spirit of uncorrupted Christianity.

**Authorities.**—The sources of information respecting the Pharisees are mainly threefold. 1st. The writings of Josephus, who was himself a Pharisee (Vit. 2), and who in each of his great works professes to give a direct account of their opinions (B. J. ii. 8, §2-14; Ant. xviii. 1, §2, and compare xiii. 10, §5-6, xvii. 2, §4, xiii. 16, §2, and Vit. 38). The value of Josephus's accounts would be much greater, if he had not accommodated them, more or less, to Greek ideas, so that in order to arrive at the exact truth, not only much must be added, but likewise much of what he has written, must be re-translated, as it were, into Hebrew conceptions. 2ndly. The New Testament, including St. Paul's Epistles, in addition to the Gospels and the Acts of the Apostles. St. Paul had been instructed by an illustrious Rabbi (Acts xxii. 3); he had been a rigid Pharisee (xxiii. 6, xvi. 5), and the remembrance of the galling bondage from which he had escaped (Gal. iv. 9, 10, v. 1) was probably a human element in that deep spirituality, and that uncompromising opposition to Jewish ceremonial observances, by which he pre-eminently contributed to make Christianity the religion of the civilized world. 3rdly. The first portion of the Talmud, called the Mishna, or "second law." This is by far the most important source of information respecting the Pharisees; and it may safely be asserted that it is nearly impossible to have adequate conceptions respecting them, without consulting that work. It is a digest of the Jewish traditions, and a compendium of the whole ritual law, reduced to writing in its present form by Rabbi Jehudah the Holy, a Jew of great wealth and influence, who flourished in the 2nd century. He succeeded his father Simeon as patriarch of Tiberias, and held that office at least thirty years. The precise date of his death is disputed; some placing it in a year somewhat antecedent to 194, A.D. (see Graetz, *Geschichte der Juden*, iv. p. 251), while others place it as late as 220 A.D., when he would

have been about 81 years old (*Jost's Geschichte des Judenthums und seiner Sekten*, ii. p. 115). The Mishna is very concisely written, and requires notes. This circumstance led to the Commentaries called Gemara<sup>b</sup> (i. e. Supplement, Completion, according to Buxtorf), which form the second part of the Talmud, and which are very commonly meant when the word "Talmud" is used by itself. The language of the Mishna is that of the later Hebrew, purely written on the whole, though with a few grammatical Aramaisms, and interspersed with Greek, Latin, and Aramaic words which had become naturalized. The work is distributed into six great divisions or orders. The first (*Zeraim*) relates to "seeds," or productions of the land, and it embraces all matters connected with the cultivation of the soil, and the disposal of its produce in offerings or tithes. It is preceded by a treatise on "Blessings" (*Berachoth*). The 2nd (*Mefil*) relates to festivals and their observance. The 3rd (*Nashim*) to women, and includes regulations respecting betrothals, marriages, and divorces. The 4th (*Nesikin*) relates to damages sustained by men of man, beasts, or things; with decisions on points of issue between man and man in commercial dealings and compacts. The 5th (*Kodshin*) treats of holy things, of offerings, and of the Temple-service. The 6th (*Toharoth*) treats of what is clean and unclean. These 6 Orders are subdivided into 61 Treatises, reckoned by Maimonides; but want of space precludes describing their contents; and the mention of the titles would give little information without any description. For obtaining accurate knowledge on these points, the reader is referred to Samuel's admirable edition of the *Mishna* in 6 vols. 4to, Amsterdam, 1698, 1703, which contains not only a Latin translation of the text, but likewise simple prefaces and explanatory notes, including those of the celebrated Maimonides. Others may prefer the German translation of Jost, in an edition of the Mishna wherein the Hebrew text is printed; but the German is in Hebrew letters, 4 vols. 4to, Berlin. And an English reader may obtain an excellent idea of the whole work from an English translation of 18 of its Treatises by Dr. S. J. Raphall, London, 1843. There is no reasonable doubt, that although it may include a few passages of a later date, the Mishna was composed, as a whole, in the 2nd century, and represents the traditions which were current amongst the Pharisees at the time of Christ. This may be shown in the following way. 1st. Josephus, whose Autobiography was apparently not written later than A.D. 100, the third year of the reign of Trajan, is an authority to show that up to that period no important change had been introduced since Christ's death; and the general facts of Jewish history render it morally impossible that there should have been any essential alteration either in the *crux* of Israel, the epoch of the great Jewish revolt in Egypt

\* This is thus noticed by Milton, from the point of view of his own peculiar ecclesiastical opinions:—"The invincible warrior Zeal, shaking loosely the slack reins, drives over the heads of scarlet prelates, and such as are insolent to maintain traditions, bruising their stiff necks under his flaming wheels. Thus did the true prophets of old combat with the false. Thus Christ Himself, the fountain of meekness, found acrimony enough to be still pulling and veering the prelatical Pharisees."—Apology for Smectymnua.

<sup>b</sup> There are two Gemaras: one of Jerusalem, in which there is said to be no passage which can be proved to be later than the first half of the 4th century; and the other

of Babylon, completed about 500 A.D. The latter is the most important, and by far the longest. It was arranged by Chiacini to be fifteen times as long as the Mishna. The whole of the Gemara has never been translated, though a proposal to make such a translation was brought before the public by Chiacini (*Thésor de l'Antiquité épliquée à la Réforme des Israélites*, A.D. 1839). But Chiacini died in 1832. Fifteen treatises of the Jerusalem Gemara, and two of the Babylonian, are given, accompanied by a Latin translation, in Ugolini's *Thesaurus*, vols. lxxi. lxx. Some interpret Gemara to be identical in meaning with Talmud, signifying "doctrine."

Cyrene, and Cyprus; or in the reign of Hadrian, during which there was the disastrous second rebellion in Judaea. And it was at the time of the suppression of this rebellion that Rabbi Jehudah was born; the tradition being that his birth was on the very same day that Rabbi Akiba was flayed alive and put to death, A.D. 136-137. 2ndly. There is frequent reference in the Mishna to the sayings and decisions of Hillel and Shammai, the celebrated leaders of two schools among the Pharisees, differing from each other on what would seem to Christians to be comparatively unimportant points. But Hillel and Shammai flourished somewhat before the birth of Christ; and, except on the incredible supposition of forgeries or mistakes on a very large scale, their decisions conclusively furnish particulars of the general system in force among the Pharisees during the period of Christ's teaching. There is likewise occasional reference to the opinion of Rabbi Gamaliel, the grandson of Hillel, and the teacher of St. Paul. 3rdly. The Mishna contains numerous ceremonial regulations, especially in the 5th Order, which pre-suppose that the Temple-service is still subsisting, and it cannot be supposed that these were invented after the destruction of the Temple by Titus. But these breathe the same general spirit as the other traditions, and there is no sufficient reason for assuming any difference of date between the one kind and the other. Hence for facts concerning the system of the Pharisees, as distinguished from an appreciation of its merits or defects, the value of the Mishna as an authority is greater than that of all other sources of information put together.

Referring to the Mishna for details, it is proposed in this article to give a general view of the peculiarities of the Pharisees; afterwards to notice their opinions on a future life and on free-will; and finally, to make some remarks on the proselytizing spirit attributed to them at the time of Christ. Points noticed elsewhere in this Dictionary will be as far as possible avoided. Hence information respecting Corban and Phylacteries, which in the New Testament are peculiarly associated with the Pharisees, must be sought for under the appropriate titles. See CORBAN and FRONTLETS.

1. The fundamental principle of the Pharisees assumed to them with all orthodox modern Jews is, that by the side of the written law regarded as a summary of the principles and general laws of the Hebrew people, there was an oral law to complete and to explain the written law. It was an article of faith that in the Pentateuch there was no precept, and no regulation, ceremonial, doctrinal, or legal, of which God had not given to Moses all explanations necessary for their application, with the order to transmit them by word of mouth (Klein's *Vérité sur le Talmud*, p. 8). The classical passage in the Mishna on this subject is the following:—"Moses received the (oral) law from Sinai, and delivered it to Joshua, and Joshua to the elders, and the elders to the prophets, and the prophets to the men of the Great

Synagogue" (*Pirke Abôth*, i.). This remarkable statement is so destitute of what would at the present day be deemed historical evidence, and would, it might be supposed, have been rendered so incredible to a Jew by the absence of any distinct allusion to the fact in the Old Testament, that it is interesting to consider by what process of argument the principle could ever have won acceptance. It may be conceived in the following way. The Pentateuch, according to the Rabbins, contains 613 laws; including 248 commands, and 365 prohibitions; but whatever may be the number of the laws, however minutely they may be anatomized, or into whatever form they may be thrown, there is nowhere an allusion to the duty of prayer, or to the doctrine of a future life. The absence of the doctrine of a future life has been made familiar to English theologians by the author of "The divine Legation of Moses;" and the fact is so undeniable, that it is needless to dwell upon it farther. The absence of any injunction to pray has not attracted equal attention, but seems to be almost equally certain. The only passage which by any ingenuity has ever been interpreted to enjoin prayer is in Ex. xxiii. 25, where the words are used, "And ye shall serve Jehovah your God." But as the Pentateuch abounds with specific injunctions as to the mode of serving Jehovah; by sacrifices, by meat-offerings, by drink-offerings, by the rite of circumcision, by observing festivals, such as the Sabbath, the Passover, the feast of weeks, and the feast of tabernacles, by obeying all His ceremonial and moral commands, and by loving Him, it is contrary to sound rules of construction to import into the general word "serve" Jehovah the specific meaning "pray to" Jehovah, when that particular mode of service is nowhere distinctly commanded in the law. There being then thus no mention either of a future life, or of prayer as a duty,<sup>a</sup> it would be easy for the Pharisees at a time when prayer was universally practised, and a future life was generally believed in or desired, to argue from the supposed inconceivability of a true revelation not commanding prayer, or not asserting a future life, to the necessity of Moses having treated of both orally. And when the principle of an oral tradition in two such important points was once admitted, it was easy for a skilful controversialist to carry the application of the principle much farther by insisting that there was precisely the same evidence for numerous other traditions having come from Moses as for those two; and that it was illogical, as well as presumptuous to admit the two only, and to exercise the right of selection and private judgment respecting the rest.

It is not to be supposed that all the traditions which bound the Pharisees were believed to be direct revelations to Moses on Mount Sinai. In addition to such revelations, which were not disputed, although there was no proof from the written law to support them, and in addition to interpretations received from Moses, which were either implied

<sup>a</sup> A passage in Deuteronomy (xvii. 8-11) has been interpreted so as to serve as a basis for an oral law. But that passage seems merely to prescribe obedience to the priests, the Levites, and to the judges in civil and criminal matters of controversy between man and man. A fanciful application of the words 'וְלִפְנֵי ה' in ver. 11 has favoured the traditional interpretation. In the 'Festival Prayers' of the English Jews, p. 22 for Pentecost, it is stated, of God, in a

prayer, "He explained it (the law) to His people face to face, and on every point are ninety-eight explanations."

<sup>b</sup> Mahomet was preceded both by Christianity and by the latest development of Judaism: from both of which he borrowed much. See, as to Judaism, Geiger's essay, *Was hat Mohammed aus dem Judenthum aufgenommen?* Still, one of the most marked characteristics of the Koran is the unwearied reiteration of the duty of prayer, and of the certainty of a future state of retribut

in the written law or to be elicited from them by reasoning, there were three other classes of traditions. 1st. Opinions on disputed points, which were the result of a majority of votes. To this class belonged the secondary questions on which there was a difference between the schools of Hillel and Shammai. 2ndly. Decrees made by prophets and wise men in different ages, in conformity with a saying attributed to the men of the Great Synagogue, "Be deliberate in judgment; train up many disciples; and make a fence for the law." These carried prohibitions further than the written law or oral law of Moses, in order to protect the Jewish people from temptations to sin or pollution. For example, the injunction "Thou shalt not seethe a kid in his mother's milk,"\* Ex. xiii. 19, xxiv. 26; Deut. xiv. 21; was interpreted by the oral law to mean that the flesh of quadrupeds might not be cooked, or in any way mixed with milk for food; so that even now amongst the orthodox Jews milk may not be eaten for some hours after meat. But this was extended by the wise men to the flesh of birds; and now, owing to this "fence to the law," the admixture of *poultry* with any milk, or its preparations, is rigorously forbidden. When once a decree of this kind had been passed, it could not be reversed; and it was subsequently said that not even Elijah himself could take away anything from the 18 points which had been determined on by the school of Shammai and the school of Hillel. 3rdly. Legal decisions of proper ecclesiastical authorities on disputed questions. Some of these were attributed to Moses, some to Joshua, and some to Ezra. Some likewise to Rabbis of later date, such as Hillel and Gamaliel. However, although in these several ways, *all* the traditions of the Pharisees were not deemed direct revelations from Jehovah, there is no doubt that all became invested, more or less, with a peculiar sanctity; so that, regarded collectively, the study of them and the observance of them became as imperative as the study and observance of the precepts in the Bible.

Viewed as a whole, they treated men like children, formalizing and defining the minutest particulars of ritual observances. The expressions of "bondage," of "weak and beggarly elements," and of "burden too heavy for men to bear," faithfully represent the impression produced by their multiplicity. An elaborate argument might be advanced for many of them individually, but the sting of them consisted in their aggregate number, which would have a tendency to quench the fervour and the freshness of a spiritual religion. They varied in character, and the following instances may be given of three different classes:—1st, of those which, admitting certain principles, were points reasonable to define; 2ndly, of points defined which were superfluously particularized; and 3rdly, of points defined where the discussion of them at all was superstitious and puerile. Of the first class the very first decision in the Mishna is a specimen. It defines the period up to which a Jew is bound, as his evening service, to repeat the Shema. The Shema is the celebrated passage in Deut. vi. 4-9, commencing, "Hear, O Israel: the Lord our God is one Lord, and thou shalt love the Lord thy God with all thine heart, and with all thy soul, and with all thy might." It is a tradition that every

Israelite is bound to recite this passage twice a day, twenty-four hours, morning and evening—his *first* authority is supposed to be found in verse 7, where "is said of these words, 'Thou shalt talk of them . . . when thou liest down and when thou risest up.'" The compulsory recitation of even these words twice a day might be objected to as leading to formalism; but, accepting the recitation as a religious duty, it might not be unreasonable that the range of time permitted for the recitation should be defined. The following is the decision on this point in the Mishna, *Berachoth* i. "From what time do they recite the Shema in the evening? From the time that the priests are admitted to eat their oblations till the end of the first watch. The words of Rabbi Eliezer; but the wise men say, up to midnight. Rabban Gamaliel says, until the column of dawn has arisen. Case: His sons returning from a house of entertainment said, We have not yet recited the Shema; to whom he said, If the column of dawn has not yet arisen, you are bound to recite it. But not this alone; but wherever the wise men have said 'to midnight,' their injunction is to keep until the column of dawn has arisen. . . . If so, why did the wise men say till midnight? It was to keep men far from transgression." The following is an instance of the second class. It relates to the lighting candles on the eve of the Sabbath, which is the duty of every Jew: it is found in the Mishna, in the treatise *Shabbath*, c. ii., and is printed in the Hebrew and English Psephoth-book according to the form of the German and Polish Jews, p. 55, from which, to avoid objections, the translation, and others, where it is possible, are taken. "With what sort of wick and oil are the candles of the Sabbath to be lighted, and with what are they not to be lighted? They are not to be lighted with the woolly substance that grows upon oxen, nor with undressed flax, nor with silk, nor with rushes, nor with leaves out of the wilderness, nor with moss that grows on the surface of water, nor with pitch, nor with wax, nor with oil made of cotton-seed, nor with the fat of the tail or the entrails of beasts. Nathan Hameady saith it may be lighted with boiled suet; but the wise men say, be it boiled or not boiled, it may not be lighted with it. It may not be lighted with beard oil on festival-days. Rabbi Ishmael says it may not be lighted with train-oil because of honour to the Sabbath; but the wise men allow of all sorts of oil, with mixed oil, with oil of nuts, oil of radish-seed, oil of fish, oil of gourd-seed, of man and gum. Rabbi Tarphon saith they are not to be lighted on with oil of olives. Nothing that grows out of the woods is used for lighting but flax, and nothing that grows out of woods doth not pollute by the pollution of a tent but flax; the wick of date that is doubled, and has not been singed, Rabbi Elazar saith it is unclean, and may not be lighted withal. Rabbi Akiba saith it is clean, and may be lighted withal. A man may not split a shell of an egg and fill it with oil and put it in the socket of a candlestick, because it shall blaze, through the candlestick be of earthenware; but Rabbi Jehoshua permits it: if the potter made it with a hole through at first, it is allowed, because it is in the same vessel. No man shall fill a platter with oil, and put it place next to the lamp, and put the head of the

\* Although this prohibition occurs three times, no light is thrown upon its meaning by the context. The most probable conjecture is that given under the head of *Isolates*

(1. 559 b), that it was aimed against some pagan idolaters. Mr. Luing gives a similar explanation of the German prohibition in Scandinavia against eating breaded

such in a platter to make it drop the oil; but Rabbi Jehudah permits it." Now in regard to details of this kind, admitting it was not unreasonable to make some regulations concerning lighting candles, it certainly seems that the above particulars are too minute, and that all which was really essential could have been brought within a much smaller compass. 3rdly. A specimen of the 3rd class may be pointed out in the beginning of the treatise on festivals (*Moed*), entitled *Beitzah*, an *Egg*, from the following case of the egg being the first point discussed in it. We are gravely informed that "an egg laid on a festival may be eaten, according to the school of Shammai; but the school of Hillel says it must not be eaten." In order to understand this important controversy, which reminds us of the two parties in a well-known work, who took their names from the end on which each held that an egg ought to be broken, it must be observed that, for a reason into which it is unnecessary to enter at present, it was admitted on all hands, both by the school of Hillel and the school of Shammai, that if a bird which was neither to be eaten nor killed laid an egg on a festival, the egg was not to be eaten. The only point of controversy was respecting an egg laid by a hen that would be afterwards eaten. Now the school of Hillel interdicted the eating of such an egg, on account of a passage in the 5th verse of the 16th chapter of Exodus, wherein Jehovah said to Moses respecting the people who gathered manna, "on the sixth day they shall prepare that which they bring in." For it was inferred from these words that on a common day of the week a man might "prepare" for the Sabbath, or prepare for a feast-day, but that he might not prepare for the Sabbath on a feast-day, nor for a feast-day on the Sabbath. Now, as an egg laid on any particular day was deemed to have been "prepared" the day before, an egg laid on a feast-day following a Sabbath might not be eaten, because it was prepared on the Sabbath, and the eating of it would involve a breach of the Sabbath. And although all feast-days did not fall on a day following the Sabbath, yet as many did, it was deemed better, *ex majori cautela*, "as a fence to the law," to interdict the eating of an egg which had been laid on any feast-day, whether such day was or was not the day after the Sabbath (see Surenhusius's Mishna, ii. 282). In a world wherein the objects of human interest and wonder are nearly endless, it certainly does seem a degradation of human intelligence to exercise it on matters so trifling and petty.

In order, however, to observe regulations on points of this kind, mixed with others less objectionable, and with some which, regarded from a certain point of view, were in themselves individually not unreasonable, the Pharisees formed a kind of society. A member was called a *chabér* (חָבֵר), and those among the middle and lower classes who were not members were called "the people of the land," or the vulgar. Each member undertook, in the presence of three other members, that he would remain true to the laws of the association. The conditions were various. One of transcendental importance was that a member should refrain from everything that was not tithed (comp. Matt. xxiii. 23, and Luke xviii. 12). The Mishna says, "He who undertakes to be trustworthy (a word with a technical Pharisaical meaning) tithes whatever he eats, and whatever he sells, and whatever he buys, and

does not eat and drink with the people of the land.\* This was a point of peculiar delicacy, for the portion of produce reserved as tithes for the priests and Levites was *holy*, and the enjoyment of what was holy was a deadly sin. Hence a Pharisee was bound, not only to ascertain as a buyer whether the articles which he purchased had been duly tithed, but to have the same certainty in regard to what he ate in his own house and when taking his meals with others. And thus Christ, in eating with publicans and sinners, ran counter to the first principles, and shocked the most deeply-rooted prejudices, of Pharisaism; for, independently of other obvious considerations, He ate and drank with "the people of the land," and it would have been assumed as undoubted that He partook on such occasions of food which had not been duly tithed.

Perhaps some of the most characteristic laws of the Pharisees related to what was clean (*tahór*) and unclean (*ámé*). Among all Oriental nations there has been a certain tendency to symbolism in religion; and if any symbolism is admitted on such a subject, nothing is more natural than to symbolize purity and cleanliness of thought by cleanliness of person, dress, and actions. Again, in all climates, but especially in warm climates, the sanitary advantages of such cleanliness would tend to confirm and perpetuate this kind of symbolism; and when once the principle was conceded, superstition would be certain to attach an intrinsic moral value to the rigid observance of the symbol. In addition to what might be explained in this manner, there arose among the Jews—partly from opposition to idolatrous practices, or to what savoured of idolatry, partly from causes which it is difficult at the present day even to conjecture, possibly from mere prejudice, individual antipathy, or strained fanciful analogies—peculiar ideas concerning what was clean and unclean, which at first sight might appear purely conventional. But, whether their origin was symbolical, sanitary, religious, fanciful, or conventional, it was a matter of vital importance to a Pharisee that he should be well acquainted with the Pharisaical regulations concerning what was clean and what was unclean; for, as among the modern Hindoos (some of whose customs are very similar to those of the Pharisees), every one technically unclean is cut off from almost every religious ceremony, so, according to the Levitical law every unclean person was cut off from all religious privileges, and was regarded as defiling the sanctuary of Jehovah (Num. xix. 20; compare Ward's *Hindoo History, Literature, and Religion*, ii. 147). On principles precisely similar to those of the Levitical laws (Lev. xx. 25, xxii. 4-7), it was possible to incur these awful religious penalties either by eating or by touching what was unclean in the Pharisaical sense. In reference to eating, independently of the slaughtering of holy sacrifices, which is the subject of two other treatises, the Mishna contains one treatise called *Cholin*, which is specially devoted to the slaughtering of fowls and cattle for domestic use (see Surenhusius, v. 114; and De Sola and Raphall, p. 325). One point in its very first section is by itself vitally distinctive; and if the treatise had contained no other regulation, it would still have raised an insuperable barrier between the free social intercourse of Jews and other nations. This point is, "that any thing slaughtered by a heathen should be deemed unfit to be eaten, like the carcass of an animal that had died of itself, and like such carcass should pollute the

ners in who carried it." On the reasonable assumption that under such circumstances animals used for food would be killed by Jewish slaughterers, regulations the most minute are laid down for their guidance. In reference likewise to *touching* what is unclean, the Mishna abounds with prohibitions and distinctions no less minute; and by far the greatest portion of the 6th and last "Order" relates to impurities contracted in this manner. Referring to that "Order" for details, it may be observed that to any one fresh from the perusal of them, and of others already adverted to, the words "Touch not, taste not, handle not," seem a correct but almost a pale summary of their drift and purpose (Col. ii. 21); and the stern antagonism becomes vividly visible between them and Him who proclaimed boldly that a man was defiled not by any thing he ate, but by the bad thoughts of the heart alone (Matt. xv. 11); and who, even when the guest of a Pharisee, pointedly abstained from washing his hands before a meal, in order to rebuke the superstition which attached a moral value to such a ceremonial act. (See Luke xi. 37-40; and compare the Mishna vi. 480, where there is a distinct treatise, *Yadaim*, on the washing of hands.)<sup>5</sup>

It is proper to add that it would be a great mistake to suppose that the Pharisees were wealthy and luxurious, much more that they had degenerated into the vices which were imputed to some of the Roman popes and cardinals during the 200 years preceding the Reformation. Josephus compared the Pharisees to the sect of the Stoics. He says that they lived frugally, in no respect giving in to luxury, but that they followed the leadership of reason in what it had selected and transmitted as a good (*Ant.* xviii. 1, § 3). With this agrees what he states in another passage, that the Pharisees had so much weight with the multitude, that if they said anything against a king or a high priest they were at once believed (xiii. 10, § 5); for this kind of influence is more likely to be obtained by a religious body over the people, through austerity and self-denial, than through wealth, luxury, and self-indulgence. Although there would be hypocrites among them, it would be unreasonable to charge all the Pharisees as a body with hypocrisy, in the sense wherein we at the present day use the word. A learned Jew, now living, charges against them rather the holiness of works than hypocritical holiness — *Wertheiligkeit, nicht Scheinheiligkeit* (Heizfeld, *Geschichte des Volkes Israel*, iii. 359). At any rate they must be regarded as having been some of the most intense formalists whom the world has ever seen; and, looking at the average standard of excellence among mankind, it is nearly certain that men whose lives were spent in the ceremonial observances of the Mishna, would cherish feelings of self-complacency and spiritual pride not justified

by intrinsic moral excellence. The supercilious contempt towards the poor publican, and towards the tender penitent love that bathed Christ's feet with tears, would be the natural result of such a system of life.

It was alleged against them, on the highest spiritual authority, that they "made the word of God of no effect by their traditions." This would be true in the largest sense, from the parent form of religion in the Old Testament being almost incompatible with such endless forms (Mic. vi. 8); but it was true in another sense, from some of the traditions being decidedly at variance with genuine religion. The evasions connected with *Cashan* are well known. To this may be added the following instances:—It is a plain precept of morality and religion that a man shall pay his debts (Ps. lxxv. 21); but, according to the treatise of the Mishna called *Arooth zarah*, i. 1, a Jew was prohibited from paying money to a heathen three days before any heathen festival, just as if a debtor had any business to meddle with the question of how his creditor might spend his own money. In this way, *Cashan* or *Cleero* might have been kept for a while out of his legal rights by an ignoble Jewish money-dealer in the Transiberian district. In some instances, such a delay in the payment of debts might have ruined a heathen merchant. Again, it was an injunction of the Pentateuch that an Israelite should "love his neighbour as himself" (Lev. xix. 18); and although in this particular passage it might be argued that by "neighbour" was meant a brother Israelite, it is evident that the spirit of the precept went much farther (Luke x. 27-29, &c.). In plain violation of it, however, a Jewish midwife is forbidden, in the *Avodah zarah*, ii. 1, to assist a heathen mother in the labours of childbirth, so that through this prohibition a heathen mother and child might have been left to perish for want of a Pharisee's professional assistance. A great Roman satirist, in holding up to view the unsocial customs of the Roman Jews, specifies as two of their traditions that they were not to show the way, or point out springs of water to any but the circumcised.

"Tradidit arcane quodcumque volumine Mosa,  
Non monstrare vias eadem nisi sacra cadunt  
Quæstium ad fontem solus deducere corpus."

JERUSALEM, 1794

Now the truth of this statement has in our times been formally denied, and it seems certain that neither of these particular prohibitions is found in the Mishna; but the regulation respecting the Jewish custom was more unsocial and cruel than the two just referred to in the satirist's lines; and individual Pharisees, while the spirit of antagonism to the Romans was at its height, may have supplied instances of the imputed churlishness, although not justified by the letter of their traditions. In that

<sup>5</sup> At the present day a strict orthodox Jew may not eat meat of any animal, unless it has been killed by a Jewish butcher. According to Mr. L. Disraeli (*The Genius of Judaism*, p. 154), the butcher searches the animal for any blemish, and, on his approval, causes a leaden seal, stamped with the Hebrew word *edukhr* (lawful), to be attached to the meat, attesting its "cleanness." Mr. Disraeli likewise points out that in Herodotus (ii. 32) a seal is recorded to have been used for a similar purpose by Egyptian priests, to attest that a bull about to be sacrificed was "clean," *καθαρός*. The Greek and Hebrew words are perhaps akin in origin, *ed* and *th* being frequently interchanged in language.

<sup>6</sup> The Egyptians appear to have had ideas of "circum-

ness" through fasting, touching, and handling, greatly analogous to those of the Levitical law and of the Pharisees. The priests would not endure even to look at him, deeming them not clean, *καθαροὶ οὐκ ἔσονται* *οὐκ ἔσονται καθαροὶ* (*καθαρός* is the Greek word in the LXX for *tāhōr*). "No Egyptian," says Herodotus, "would kiss a Greek with a kiss, nor use a Greek knife, or spit, or caress; or taste the meat of an ox which had been cut by a Greek knife. They drank out of beaten vessels, rinsing them perpetually. And if any one accidentally touched a pig, he would plunge into the Nile, without stopping to undress" (*Herodotus*, ii. 37, 41, 47). And as to Jews regarded all other nations, the Egyptians regarded all other nations, including the Jews, as *unclean*.

Juvenal did really somewhat understate what was true in principle, not of the Jews universally, but of the most important religious party among the Jews, at the time when he wrote.

An analogy has been pointed out by Geiger (p. 104) between the Pharisees and our own Puritans; and in some points there are undoubted features of similarity, beginning even with their names. Both were innovators: the one against the legal orthodoxy of the Sadducees, the others against Episcopacy. Both of them had republican tendencies: the Pharisees glorifying the office of rabbi, which depended on learning and personal merit, rather than that of priest, which, being hereditary, depended on the accident of birth; while the Puritans in England abolished monarchy and the right of hereditary legislation. Even in their zeal for religious education there was some resemblance: the Pharisees exerting themselves to instruct disciples in their schools with an earnestness never equalled in Rome or Greece; while in Scotland the Puritans set the most brilliant example to modern Europe of parochial schools for the common people. But here comparison ceases. In the most essential points of religion they were not only not alike, but they were directly antagonistic. The Pharisees were under the bondage of forms in the manner already described; while, except in the strict observance of the Sabbath, the religion of the Puritans was in theory purely spiritual, and they assailed even the ordinary forms of Popery and Prelacy with a bitterness of language copied from the denunciations of Christ against the Pharisees.

II. In regard to a future state, Josephus presents the ideas of the Pharisees in such a light to his Greek readers, that whatever interpretation his ambiguous language might possibly admit, he obviously would have produced the impression on Greeks that the Pharisees believed in the transmigration of souls. Thus his statement respecting them is, "They say that every soul is imperishable, but that the soul of good men only passes over (or transmigrates) into another body—*μεταβαίνει εἰς ἕτερον σώμα*—while the soul of bad men is chastised by eternal punishment" (*B. J.* ii. 8, §14; compare ii. 8, §5, and *Ant.* xviii. 1, §3, and Boettcher, *De Jæferio*, pp. 519, 552). And there are two passages in the Gospels which might countenance this idea: one in Matt. xiv. 2, where Herod the tetrarch is represented as thinking that Jesus was John the Baptist risen from the dead (though a different colour is given to Herod's thoughts in the corresponding passage, Luke ix. 7-9); and another in John ix. 2, where the question is put to Jesus whether the blind man himself had sinned, or his parents, that he was born blind? Notwithstanding these passages, however, there does not appear to be sufficient reason for doubting that the Pharisees believed in a resurrection of the dead very much in the same sense as the early Christians. This is most in accordance with St. Paul's statement to

the chief priests and council (*Acts* xxiii. 6), that he was a Pharisee, the son of a Pharisee, and that he was called in question for the hope and resurrection of the dead—a statement which would have been peculiarly disingenuous, if the Pharisees had merely believed in the transmigration of souls; and it is likewise almost implied in Christ's teaching, which does not insist on the doctrine of a future life as anything new, but assumes it as already adopted by his hearers, except by the Sadducees, although he condemns some unspiritual conceptions of its nature as erroneous (*Matt.* xxii. 30; *Mark* xii. 25; *Luke* xx. 34-36). On this head the Mishna is an illustration of the ideas in the Gospels, as distinguished from any mere transmigration of souls; and the peculiar phrase, "the world to come," of which *ὁ αἰὼν ὁ ἐρχόμενος* was undoubtedly only the translation, frequently occurs in it (*העולם הבא*, *Aboth*,

ii. 7, iv. 16; comp. *Mark* x. 30; *Luke* xviii. 30). This phrase of Christians, which is anterior to Christianity, but which does not occur in the O. T., though fully justified by certain passages to be found in some of its latest books,<sup>1</sup> is essentially different from Greek conceptions on the same subject; and generally, in contradistinction to the purely temporal blessings of the Mosaic legislation, the Christian ideas that this world is a state of probation, and that every one after death will have to render a strict account of his actions, were expressed by Pharisees in language which it is impossible to misunderstand:—"This world may be likened to a courtyard in comparison of the world to come; therefore prepare thyself in the antechamber that thou mayest enter into the dining-room" (*Aboth*, iv. 16). "Everything is given to man on security, and a net is spread over every living creature; the shop is open, and the merchant credits; the book is open, and the hand records; and whosoever chooses to borrow may come and borrow: for the collectors are continually going round daily, and obtain payment of man, whether with his consent or without it; and the judgment is true justice; and all are prepared for the feast" (*Aboth*, iii. 16). "Those who are born are doomed to die, the dead to live, and the quick to be judged; to make us know, understand, and be informed that He is God; He is the Former, Creator, Intelligent Being, Judge, Witness, and suing Party, and will judge thee hereafter. Blessed be He; for in His presence there is no unrighteousness, forgetfulness, respect of persons, nor acceptance of a bribe; for everything is His. Know also that everything is done according to the account, and let not thine evil imagination persuade thee that the grave is a place of refuge for thee: for against thy will wast thou formed, and against thy will wast thou born; and against thy will dost thou live, and against thy will wilt thou die; and against thy will must thou hereafter render an account, and receive judgment in the presence of the Supreme King of kings, the Holy God,

punishment for sins which the blind man afterwards committed: just as it has been suggested, in a remarkable passage, that the death before 1688 of the Princess Anne's infant children (three in number) was a preceding punishment for her subsequent abandonment of her father, James II. See Stewart's *Philosophy*, vol. II. App. vi., and the Commentaries of the *Werke* and *Lecke*, *ad locum*.

<sup>1</sup> The earliest text in support of the expression is perhaps "the new heavens and the new earth" promised by Isaiah (*Isa.* lvi. 17-22). Compare *Deut.* vii. 27, *Is.* xlvi. 10.

\* At least five different explanations have been suggested of the passage John ix. 2. First, That it alludes to a Jewish doctrine of the transmigration of souls. 2dly. That it refers to an Alexandrine doctrine of the pre-existence of souls, but not to their transmigration. 3dly. That the words mean, "Did this man sin, as the Greeks say, or did his parents sin, as we say, that he was born blind?" 4thly. That it involves the Rabbinical idea of the possibility of an infant's sinning in his mother's womb. 5thly. That it is founded on the predestinarian notion that the blindness from birth was a preceding

blessed is he" (*Avoth*, iv. 17). Still it must be borne in mind that the actions of which such a strict account was to be rendered were not merely those referred to by the spiritual prophets Isaiah and Micah (Is. i. 16, 17; Mic. vi. 2), nor even those enjoined in the Pentateuch, but included those fabulously supposed to have been orally transmitted by Moses on Mount Sinai, and the whole body of the traditions of the elders. They included, in fact, all those ceremonial "works," against the efficacy of which, in the deliverance of the human soul, St. Paul so emphatically protested.

III. In reference to the opinions of the Pharisees concerning the freedom of the will, a difficulty arises from the very prominent position which they occupy in the accounts of Josephus, whereas nothing vitally essential to the peculiar doctrines of the Pharisees seems to depend on those opinions, and some of his expressions are Greek, rather than Hebrew. "There were three sects of the Jews," he says, "which had different conceptions respecting human affairs, of which one was called Pharisees, the second Sadducees, and the third Essenes. The Pharisees say that some things, and not all things, are the work of fate; but that some things are in our own power to be and not to be. But the Essenes declare that Fate rules all things, and that nothing happens to man except by its decree. The Sadducees, on the other hand, take away Fate, holding that it is a thing of nought, and that human affairs do not depend upon it; but in their estimate all things are in the power of ourselves, as being ourselves the causes of our good things, and meeting with evils through our own inconsiderateness" (comp. *xviii.* 1, §3, and *B. J.* ii. 8, §14). On reading this passage, and the others which bear on the same subject in Josephus's works, the suspicion naturally arises that he was biased by a desire to make the Greeks believe that, like the Greeks, the Jews had philosophical sects amongst themselves. At any rate his words do not represent the opinions as they were really held by the three religious parties. We may feel certain, that the influence of fate was not the point on which discussions respecting free-will turned, though there may have been differences as to the way in which the interposition of God in human affairs was to be regarded. Thus the ideas of the Essenes are likely to have been expressed in language approaching to the words of Christ (*Matt.* x. 29, 30, vi. 25-34), and it is very difficult to believe that the Sadducees, who accepted the authority of the Pentateuch and other books of the Old Testament, excluded God, in their conceptions, from all influence on human actions. On the whole, in reference to this point, the opinion of Grätz (*Geschichte der Juden*, iii. 509) seems not improbable, that the real difference between the Pharisees and Sadducees was at first practical and political. He conjectures that the wealthy and aristocratical Sadducees in their wars and negotiations with the Syrians entered into matters of policy and calculations of prudence, while the zealous Pharisees, disdainful worldly wisdom, laid stress on doing what seemed right, and on leaving the event to God; and that this led to differences in formal theories and metaphysical statements. The precise nature of those differences we do not certainly know, as no writing of a Sadducee on the subject has been preserved by the Jews, and on matters of this kind, it is unsafe to trust unreservedly the statements of an adversary. [SADDUCEES.]

IV. In reference to the spirit of proselytism

among the Pharisees, there is indisputable authority for the statement that it prevailed to a very great extent at the time of Christ (*Matt.* xxiii. 15); and attention is now called to it on account of its probable importance in having paved the way for the early diffusion of Christianity. The district of Palestine, which was long in proportion to its breadth, and which yet, from Dan to Beersheba, was only 160 Roman miles, or not quite 140 English miles long, and which is represented as having been civilized, wealthy, and populous 1500 years before Christ, would under any circumstances have been too small to continue maintaining the whole growing population of its children. But, through kidnapping (*Joel* iii. 6), through leading into captivity by military incursions and retention enemies (*2 K.* xvii. 6, xviii. 11, xiv. 15; *Am.* i. 6, 9), through flight (*Jer.* xlii. 4-7), through commerce (*Joseph. Ant.* ix. 2, §3), and probably through ordinary emigration, Jews at the time of Christ had become scattered over the fairest portions of the civilized world. On the day of Pentecost, that great festival on which the Jews suppose Moses to have brought the perfect law down from heaven (*Festival Prayers for Pentecost*, p. 8), Jews are said to have been assembled with one accord in one place at Jerusalem, "from every region under heaven." Admitting that this was an Oriental hyperbole (comp. *John* xxi. 25), there must have been some foundation for it in fact; and the enumeration of the various countries from which Jews are said to have been present gives a vivid idea of the widely-spread existence of Jewish communities. Now it is not unlikely, though it cannot be proved from Josephus (*Ant.* ix. 2, §3), the missions and organized attempts to produce conversions, although unknown to Greek philosophers, existed among the Pharisees (*De Wette, Evangelical Handbook*, *Matt.* xxiii. 15). But, at any rate, the then existing regulations or customs of synagogues afforded facilities which do not exist now either in synagogues or Christian churches for presenting new views to a congregation (*Acts* xvi. 2; *1 Cor.* iv. 18). Under such auspices the proselyting spirit of the Pharisees inevitably stimulated a thirst for inquiry, and accustomed the Jews to theological controversies. Thus there existed precedents and favouring circumstances for efforts to make proselytes, when the greatest of all missionaries, a Jew by race, a Pharisee by education, a Greek by language, and a Roman citizen by birth, preaching the resurrection of Jesus to those who for the most part already believed in the resurrection of the dead, confronted the elaborate ritual-system of the written and oral law by a pure spiritual religion; and thus obtained the co-operation of many Jews themselves in breaking down every barrier between Jew, Pharisee, Greek, and Roman, and in endeavouring to unite all mankind by the brotherhood of a common Christianity.

*Literature.*—In addition to the New Testament, Josephus, and the Mishna, it is proper to add Epiphanius *Adversus Hæreses*, lib. i. vii.; and the Notes of Jerome to *Matth.* xiii. 23, xiii. 6, &c., though the information given by both these writers is very imperfect.

In modern literature, see several treatises in *Lipsius's Thesaurus*, vol. xxii.; and Lightfoot's *Hebræus on Matth.* iii. 7, where a curious biblical description is given of seven sects of Pharisees, which, from its being destitute of any intrinsic value, is not inserted in this article. See *Thesaurus*

*Brucker's Historie Critica Philosophiæ*, ii. 744-759; Milman's *History of the Jews*, ii. 71; Ewald's *Geschichte des Volkes Israel*, iv. 415-419; and the *Jahrhundert des Heils*, p. 5 &c. of Gfröber, who has insisted strongly on the importance of the Mishna, and has made great use of the Talmud generally. See also the following works by modern Jewish writers: Jost, *Geschichte des Judenthums und seiner Sekten*, i. 196; Grätz, *Geschichte der Juden*, iii. 508-518; Herzfeld, *Geschichte des Volkes Israel*, iii. 358-362; and Geiger, *Urschrift und Uebersetzungen der Bibel*, p. 103 &c. [E. T.]

**PHA'ROSH** (פָּרוֹשׁ: *pharos*: *Pharos* Elsewhere **PAROSH**. The same variation is found in the Geneva Version (Ezr. viii. 3).

**PHARPAR** (פָּרְפָּר, f. e. *Parpar*: *Ἀφραφά*; Alex. *Φαρφαρά*: *Pharphar*). The second of the two "rivers of Damascus"—Abana and Pharpar—alluded to by Naaman (2 K. v. 12).

The two principal streams in the district of Damascus are the *Barada* and the *Awaj*:—in fact, there are no others worthy of the name of "river." There are good grounds for identifying the *Barada* with the Abana, and there seems therefore to be no alternative but to consider the *Awaj* as being the *Pharpar*. But though in the region of Damascus, the *Awaj* has not, like the *Barada*, any connexion with the city itself. It does not approach it nearer than 8 miles, and is divided from it by the ridge of the *Jebel Aswad*. It takes its rise on the S.E. slopes of Hermon, some 5 or 6 miles from *Beit Jenn*, close to a village called *Arny*, the name of which it bears during the first part of its course. It then runs S.E. by *Kefr Hnucur* and *Sasa*, but soon recovering itself by a turn northwards, ultimately ends in the *Bahret Hijaneh*, the most southerly of the three lakes or swamps of Damascus, nearly due east of, and about 40 miles from, the point at which it started. The *Awaj* has been investigated by Dr. Thomson, and is described by him in the *Bibliotheca Sacra* for May, 1849; see also Robinson (*D. R.* iii. 447, 8). It is evidently much inferior to the *Barada*, for while that is extraordinarily copious, and also perennial in the hottest seasons, this is described as a small lively stream, not unfrequently dry in the lower part of its course. On the maps of Kiepert (1856) and Van de Velde (1858) the name of *Wady Barbar* is found, apparently that of a valley parallel to the *Arny* near *Kefr Hnucur*; but what the authority for this is the writer has not succeeded in discovering. Nor has he found any name on the maps or in the lists of Dr. Robinson answering to *Tutrah*, توتري, by which Pharpar is rendered in the Arabic version of 2 K. v. 12.

The tradition of the Jews of Damascus, as reported by Schwarz (54, also 20, 27), is curiously subversive of our ordinary ideas regarding these streams. They call the river *Fijeh* (that is the *Barada*) the Pharpar, and give the name *Amana* or *Karmion* (an old Talmudic name, see vol. i. p. 26) to a stream which Schwarz describes as running from a fountain called *el Barady*, 1½ mile from *Beth Djuna* (*Beit Jenn*), in a N.E. direction, to Damascus (see also the reference to the Nubian

geographer by Gesenius, *Theo.* 11:32 a). What is intended by this the writer is at a loss to know. [G.]

**PHAR'ZITES, THE** (פָּרְזִיטִים: *pharazitai*: Alex. *Φαρσίται*: *Pharesitai*). The descendants of Pharez, the son of Judah (Num. xxi. 20). They were divided into two branches, the *Hezronites* and the *Hamulites*.

**PHASE'AH** (פָּזַעַח: *phazai*; Alex. *Φασηά*: *Phasea*). **PASEAH** 2 (Neh. vii. 51).

**PHASE'LIS** (Φασηλῖς: *Phaselis*). A town on the coast of Asia Minor, on the confines of Lycia and Pamphylia, and consequently ascribed by the ancient writers sometimes to one and sometimes to the other. Its commerce was considerable in the sixth century B.C., for in the reign of Amasis it was one of a number of Greek towns which carried on trade somewhat in the manner of the Hæmætic confederacy in the middle ages. They had a common temple, the *Hellenium*, at Naucratis in Egypt, and nominated *προστάται* for the regulation of commercial questions and the decision of disputes arising out of contracts, like the *prud'hommes* of the Middle Ages, who presided over the courts of pie powder (*pieds poudrés*, *pillars*) at the different staples. In later times Phaselis was distinguished as a resort of the Pamphylian and Cilician pirates. Its port was a convenient one to make, for the lofty mountain of Solyma (now *Takhtulu*), which backed it at a distance of only five miles, is nearly 8000 feet in height, and constitutes an admirable landmark from a great distance. Phaselis itself stood on a rock of 50 or 100 feet elevation above the sea, and was joined to the main by a low isthmus, in the middle of which was a lake, now a pestiferous marsh. On the eastern side of this were a closed port and a roadstead, and on the western a larger artificial harbour, formed by a mole run out into the sea. The remains of this may still be traced to a considerable extent below the surface of the water. The masonry of the pier which protected the small eastern port is nearly perfect. In this sheltered position the pirates could lie safely while they sold their booty, and also refit, the whole region having been anciently so thickly covered with wood as to give the name of *Pityusa* to the town. For a time the Phaselites confined their relations with the Pamphylians to the purposes just mentioned; but they subsequently joined the piratical league, and suffered in consequence the loss of their independence and their town lands in the war which was waged by the Roman consul Publius Servilius Isauricus in the years 77-75 B.C. But at the outset the Romans had to a great extent fostered the pirates, by the demand which sprang up for domestic slaves upon the change of manners brought about by the spoliation of Carthage and Corinth. It is said that at this time many thousand slaves were passed through Delos—which was the mart between Asia and Europe—in a single day; and the proverb grew up there, *Ἐμπορεῖ, κατὰ πλεονον ἑταίου πάντα πέπραται*. But when the Cilicians had acquired such power and audacity as to sweep the seas as far as the Italian coast, and interrupt the supplies of corn, it became time to interfere, and the expedition of Servilius commenced the work which was afterwards completed by Pompey the Great.

<sup>a</sup> The A at the commencement of this name suggests some definite article; but no trace of it appears in the text.

<sup>b</sup> Such is the meaning of the word *Pharpar*, treated as Hebrew, according to Gesenius and Fürst. Dr. Pusey however (*Comm.* on Amos i. 3), renders it "swayed."

It is in the interval between the growth of the Ciban piracy and the Servilian expedition that the incidents related in the First Book of Maccabees occurred. The Romans are represented as requiring all their allies to render up to Simon the high-priest any Jewish exiles who may have taken refuge among them. After naming Ptolemy, Demetrius (king of Syria), Attalus (king of Pergamus), Ariarathes (of Pontus), and Arsaces (of Parthia), as recipients of these missives, the author adds that the consul also wrote:—*eis p̄sas tās x̄aras kal Sam̄p̄m* (Grotius conjectures *Sam̄p̄m*, and one MS. has *Meσan̄s̄m*) *kal S̄parīd̄n̄ais kal eis Δ̄h̄lon kal eis M̄nd̄on kal eis Σικῡōna kal eis τ̄h̄n Kap̄lan kal eis Σ̄d̄mon kal eis τ̄h̄n Παμφυλ̄lan kal eis τ̄h̄n Λυκ̄lan kal eis Ἀλικαρνασσ̄ον, kal eis Ρ̄d̄don kal eis Φασ̄ηλ̄ (δ̄α kal eis Κ̄w kal eis Σ̄ιθ̄n kal eis Ἀραδ̄on kal eis Γόρτυραν kal Κν̄ιδ̄on, kal Κ̄d̄ρον kal Κυρ̄ηγ̄ν* (1 Macc. xv. 23). It will be observed that all the places named, with the exception of Cyprus and Cyrene, lie on the highway of marine traffic between Syria and Italy. The Jewish slaves, whether kidnapped by their own countrymen (Ex. xxi. 16) or obtained by raids (2 K. v. 2), appear in early times to have been transmitted to the west coast of Asia Minor by this route (see Ez. xxvii. 13; Joel iii. 6).

The existence of the mountain Solyma, and a town of the same name, in the immediate neighbourhood of Phaselis, renders it probable that the descendants of some of these Israelites formed a population of some importance in the time of Strabo (Herod. ii. 178; Strab. xiv. c. 3; Liv. xxxvii. 23; Mela, i. 14; Deauro, *Karamania*, pp. 53-56). [J. W. B.]

**PHASIRON** (Φασιρῶν: *Phasiron*; *Pasiron*), the name of the head of an Arab tribe, "the children of Phasiron" (1 Macc. ix. 66), defeated by Jonathan, but of whom nothing more is known. [B. F. W.]

**PHASSARON** (Φασσούρος: *Phassurus*). **PA-SHUR** (1 Esdr. v. 25).

**PHÈBE**. [PHOEBE.]

**PHÉNICE**. 1. See PHOENICE, PHOENICIA. 2. More properly PHOENIX (Φοινίξ, Acts xvii. 12), though probably our translators meant it to be pronounced *Phénice* in two syllables, as opposed to *Phenice* (Φοινίκη, Acts xi. 19) in three.

The place under our present consideration was a town and harbour on the south coast of CRETE: and the name was doubtless derived from the Greek word for the palm-tree, which Theophrastus says was indigenous in the island. [PALM-TREE.] The ancient notices of Phoenix converge remarkably to establish its identity with the modern *Lutro*. Besides Ptolemy's longitudes, we have Pliny's statement that it was (as *Lutro* is) in the narrowest part of the island. Moreover, we find applied to this locality, by the modern Greeks, not only the word *Phinika*, which is clearly *Phoenix*, but also the words *Anopolis* and *Aradena*. Now Stephanus Byzantinus says that Anopolis is the same with Aradena, and Hierocles says that Aradena is the same with Phoenix. The last authority adds also that the island of CLAUDA is very near. We see further that all these indications correspond exactly with what we read in the Acts. St. Paul's ship was at FAIR HAVENS, which is some miles to the E. of *Lutro*; but she was bound to the westward, and the sailors wished to reach Phoenix (xxvii. 8-12); and it was in making the attempt that they were caught by the gale and driven to Clauda (ib. 13-16).

Still there were till lately two difficulties in the matter, and the recent and complete removal of them is so satisfactory, that they deserve to be mentioned. First, it used to be asserted, by persons well acquainted with this coast, that there is no such harbour *nearabouts* at all affording a safe anchorage. This is simply an error of fact. The matter is at rest by abundant evidence, and especially by the late survey of our own officers, an extract from whose drawing, showing the excellent soundings of the harbour, was first published (1852) in the first edition of the *Life and Epistles of St. Paul*, ii. p. 332. An account by recent travellers will be found in the second edition of Smith's *Voyage and Shipwreck of St. Paul*, p. 256. The other difficulty is a verbal one. The sailors in the Acts describe Phoenix as *ἀμείνα τῇ Κρητῇ βλάστον κατὰ λίβα καὶ κατὰ χάρον*, whereas *Lutro* is precisely sheltered from these winds. But it ought to have been remembered that seamen do not pronounce a harbour because of its exposure to certain winds: and the perplexity is at once removed either by taking *κατὰ* as expressing the direction in which the wind blows, or by bearing in mind that a sailor speaks of everything from his own point of view. The harbour of Phoenix or *Lutro* does "look"—from the water towards the land which encloses it—in the direction of "south-west and north-west." [J. S. H.]

**PHERESITES** (Φερεῖται: *Pheresites*), 1 Esdr. viii. 69; = **PERIZZITES**; comp. Ex. ix. 1.

**PEREZITE**; **PEREZITES** (Ἰσραὴλ: *Pherezites*; *Pherezites*), Jud. v. 16; 1 Esdr. i. 21. The latter of these passages contains a statement in accordance with those of Gen. xlii. 7, xxix. 30; Judg. i. 4, &c., noticed under **PERIZZITE**.

**PHICHOL** (פִּיכֹל; Samar. כִּלְכִּל: *Phichol*; Alex. *Φικολ*; Joseph. *Φικολος*: *Phichol*), chief captain of the army of Abimelech, king of the Philistines of Gerar in the days of both Abraham (Gen. xxi. 22, 32) and Isaac (xxvi. 26). Josephus mentions him on the second occasion only. On the other hand the LXX. introduce *Abimelech*, *Abimelech's* other companion, on the first also. By Genesis the name is treated as Hebrew, and as meaning the "mouth of all." By Fürst (*Hebräer*, ii. 215 a), it is derived from a root כִּלְכִּל, to be strong. But Hitzig (*Philistaeer*, §57) refers it to the Samarit. *phichula*, a tamarisk, pointing out that Abraham had planted a tamarisk in Beersheba, and comparing the name with Elah, Berous, Tappunch, and other names of persons and places signifying different kinds of trees; and with the name *Φιγαλος*, a village of Palestine (Joseph. Ant. xii. 4, §2), and *Φιγαλία* in Greece. Stark (*Gaza*, &c., p. 96) more cautiously avoids such speculations. The natural conclusion from these mere conjectures is that *Phichol* is a Philistine name, the meaning and derivation of which are lost to us. [G.]

**PHILADELPHIA** (ἡ Φιλαδέλφεια: *Philadelphia*). A town on the confines of Lydia and Phrygia Catacecaumene, built by Attalus II., king of Pergamus. It was situated on the lower slopes of Tmolus, on the southern side of the valley of the *Ain-é-ghid* Son, a river which is probably the *Cogamus* of antiquity, and falls into the *Wadi-ekem* (the *Hermus*) in the neighbourhood of *Sary-Akion* (Sardis), about 23 miles to the west of the site of Philadelphia. This latter is still represented by a town called *Allah-shehr* (city of God). Its elevation is 952 feet above the sea. The region around

is highly volcanic, and geologically speaking belongs to the district of Phrygia Catacecaumene, on the western edge of which it lies. The soil was extremely favourable to the growth of vines, celebrated by Virgil for the soundness of the wine they produced; and in all probability Philadelphia was built by Attalus as a mart for the great wine-producing region, extending for 500 stades in length by 400 in breadth; for its coins have on them the head of Bacchus or a female Bacchant. Strabo compares the soil with that in the neighbourhood of Catania in Sicily; and modern travellers describe the appearance of the country as resembling a billowy sea of disintegrated lava, with here and there vast trap-dykes protruding. The original population of Philadelphia seems to have been Macedonian, and the national character to have been retained even in the time of Pliny. There was, however, as appears from Rev. iii. 9, a synagogue of Hellenizing Jews there, as well as a Christian Church. The locality continued to be subject to constant earthquakes, which in the time of Strabo rendered even the town-walls of Philadelphia unsafe; but its inhabitants held pertinaciously to the spot, perhaps from the profit which naturally accrued to them from their city being the staple of the great wine-district. But the expense of reparation was constant, and hence perhaps the poverty of the members of the Christian Church (*οἱ δὲ . . . οἱ μὲν ἔχουσιν ὄναμα*, Rev. iii. 8), who no doubt were a portion of the urban population, and heavily taxed for public purposes, as well as subject to private loss by the destruction of their own property. Philadelphia was not of sufficient importance in the Roman times to have *aw-courts* of its own, but belonged to a jurisdiction of which Sardis was the centre.

It has been supposed by some that Philadelphia occupied the site of another town named Callatebus, of which Herodotus speaks, in his account of Xerxes's march, as famous for the production of a sugar from the *holcus soryolum* and sweetwort (*ἐν τῇ ἰσθμῷ θαλασσοῦ μέλι ἐκ μυρίας τε καὶ πυρῶν ῥαβδῶν*, vii. 31). But by the way in which he mentions Callatebus (of which the name is only known from him) it would seem to have been not far from the Maeander, from which the ruins of *Aluk-siehr* cannot be less distant than from 30 to 40 miles, while they are very near the Cogamus. The enormous plane-tree, too, which struck Xerxes's attention, and the abundance of the *μυρία*, point to a region well furnished with springs of water, which is the case with the northern side of the Maeander, where Xerxes crossed it, and not so with the vicinity of *Aluk-siehr*. At the same time the Persian king, in his two days' march from Cydrara to Sardis, must have passed very near the site of the future Philadelphia. (Strab. xii. c. 8, xiii. c. 4; Virg. Georg. ii. 98; Herod. vii. 31; Plin. i. c. v. 29; Arundell, *Discoveries in Asia Minor*, i. 34 &c.; Tchihatcheff, *Asie Mineure*, i. 237 &c. [J. W. B.]

**PHILARCHES** This word occurs as a proper name in A.V. in 2 Macc. viii. 32, where it is really the name of an office (*ὁ φυλάρχης* = *ὁ φάλαρχος*, "the commander of the cavalry." The Greek text seems to be decisive as to the true rendering; but the Latin version ("et Philarchen qui cum Timotheo erat . . .") might easily give rise to the error, which is very strangely supported by Grimm, *ad loc.* [B. F. W.]

**PHILEMON** *Φιλέμων*: *Philemon*), the name

of the Christian to whom Paul addressed his epistle in behalf of Onesimus. He was a native probably of Colossae, or at all events lived in that city when the Apostle wrote to him; first, because Onesimus was a Colossian (Col. iv. 9); and secondly, because Archippus was a Colossian (Col. iv. 17), whom Paul associates with Philemon at the beginning of his letter (Philem. 1, 2). Wieseler (*Chronologie*, p. 452) argues, indeed, from Col. iv. 17, that Archippus was a Laodicean; but the *εφεσω* in that passage on which the point turns, refers evidently to the Colossians (of whom Archippus was one therefore), and not to the church at Laodicea spoken of in the previous verse, as Wieseler inadvertently supposes. Theodoret (*Proem. in Epist. ad Phil.*) states the ancient opinion in saying that Philemon was a citizen of Colossae, and that his house was pointed out there as late as the fifth century. The legendary history supplies nothing on which we can rely. It is related that Philemon became bishop of Colossae (*Constit. Apost.* vii. 46), and died as a martyr under Nero.

It is evident from the letter to him that Philemon was a man of property and influence, since he is represented as the head of a numerous household, and as exercising an expensive liberality towards his friends and the poor in general. He was indebted to the Apostle Paul as the medium of his personal participation in the Gospel. All interpreters agree in assigning that significance to *εμετέραν μοι προσοφείλεις* in Philem. 19. It is not certain under what circumstances they became known to each other. If Paul visited Colossae when he passed through Phrygia on his second missionary journey (Acts xvi. 8), it was undoubtedly there, and at that time, that Philemon heard the gospel and attached himself to the Christian party. On the contrary, if Paul never visited that city in person, as many critics infer from Col. ii. 1, then the best view is that he was converted during Paul's protracted stay at Ephesus (Acts xix. 10), about A.D. 54-57. That city was the religious and commercial capital of Western Asia Minor. The Apostle laboured there with such success that "all they who dwelt in Asia heard the word of the Lord Jesus." Phrygia was a neighbouring province, and among the strangers who repaired to Ephesus and had an opportunity to hear the preaching of Paul, may have been the Colossian Philemon.

It is evident that on becoming a disciple, he gave no common proof of the sincerity and power of his faith. His character, as shadowed forth in the epistle to him, is one of the noblest which the sacred record makes known to us. He was full of faith and good works, was docile, confiding, grateful, was forgiving, sympathizing, charitable, and a man who on a question of simple justice needed only a hint of his duty to prompt him to go even beyond it (*ὁπὲρ ὁ λόγος προήσους*). Any one who studies the epistle will perceive that it ascribes to him these varied qualities; it bestows on him a measure of commendation, which forms a striking contrast with the ordinary reserve of the sacred writers. It was through such believers that the primitive Christianity evinced its divine origin, and spread so rapidly among the nations. [H. B. H.]

**PHILEMON, THE EPISTLE OF PAUL TO,** is one of the letters (the others are Ephesians, Colossians, Philippians) which the Apostle wrote during his first captivity at Rome. The arguments which show that he wrote the epistle to the Colossians in that city and at that period, involu-

the same conclusion in regard to this; for it is evident from Col. iv. 7, 9, as compared with the contents of this epistle, that Paul wrote the two letters at the same time, and forwarded them to their destination by the hands of Tychicus and Onesimus who accompanied each other to Colossæ. A few modern critics, as Schulz, Schott, Böttger, Meyer, maintain that this letter and the others assigned usually to the first Roman captivity, were written during the two years that Paul was imprisoned at Caesarea (Acts xxiii. 35, xxiv. 27). But this opinion, though supported by some plausible arguments, can be demonstrated with reasonable certainty to be incorrect. [COLOSSIANS, EPISTLE TO THE.]

The time when Paul wrote may be fixed with much precision. The Apostle at the close of the letter expresses a hope of his speedy liberation. He speaks in like manner of his approaching deliverance, in his epistle to the Philippians (ii. 23, 24), which was written during the same imprisonment. Presuming, therefore, that he had good reasons for such an expectation, and that he was not disappointed in the result, we may conclude that this letter was written by him about the year A.D. 63, or early in A.D. 64; for it was in the latter year, according to the best chronologists, that he was freed from his first Roman imprisonment.

Nothing is wanting to confirm the genuineness of this epistle. The external testimony is unimpeachable. It is not quoted so often by the earlier Christian fathers as some of the other letters; its brevity and the fact that its contents are not didactic or polemic, account for that omission. We need not urge the expressions in Ignatius, cited as evidence of that apostolic Father's knowledge and use of the epistle; though it is difficult to regard the similarity between them and the language in v. 20 as altogether accidental. See Kirchhofer's *Quellensammlung*, p. 205. The Canon of Muratori which comes to us from the second century (Credner, *Geschichte des Kanons*, p. 69), enumerates this as one of Paul's epistles. Tertullian mentions it, and says that Marcion admitted it into his collection. Sinope in Pontus, the birth-place of Marcion, was not far from Colossæ where Philemon lived, and the letter would find its way to the neighbouring churches at an early period. Origen and Eusebius include it among the universally acknowledged writings (*ὁμολογούμενα*) of the early Christian times. It is so well attested historically, that as De Wette says (*Einführung ins Neue Testament*, p. 278), its genuineness on that ground is beyond doubt.

Nor does the epistle itself offer anything to conflict with this decision. It is impossible to conceive of a composition more strongly marked within the same limits by those unstudied assonances of thought, sentiment, and expression, which indicate an author's hand, than this short epistle as compared with Paul's other productions. Paley has a paragraph in his *Horæ Paulinæ*, which illustrates this feature of the letter in a very just and forcible manner. It will be found also that all the historical allusions which the Apostle makes to events in his own life, or to other persons with whom he was connected, harmonize perfectly with the statements or incidental intimations contained in the Acts of the Apostles or the other epistles of Paul. It belongs to a commentary to point out the instances of such agreement.

Baur (*Paulus*, p. 475) would divest the Epistle

of its historical character, and make it the personified illustration from some later writer, of the idea that Christianity unites and equalises in a higher sense those whom outward circumstances have separated. He does not impugn the external evidence. But, not to leave his theory wholly unsupported, he suggests some linguistic objections to Paul's authorship of the letter, which must be pronounced unfounded and frivolous. He finds, for example, certain words in the Epistle, which are alleged to be not Pauline; but to justify that assertion, he must deny the genuineness of such other letters of Paul, as happen to contain these words. He admits that the Apostle could have said *οὐδὲν ἔχω* twice, but thinks it suspicious that he should say it three times. A few terms he adduces, which are not used elsewhere in the epistles; but to argue from these that they disprove the apostolic origin of the epistle, is to assume the absurd principle that a writer, after having produced two or three compositions, must for the future confine himself to an unvarying circle of words, whatever may be the subject he discusses, or whatever the interval of time between his different writings.

The arbitrary and purely subjective character of such criticisms can have no weight against the varied testimony admitted as decisive by Christian scholars for so many ages, upon which the canonical authority of the Epistle to Philemon is founded. They are worth repeating only as illustrating Baur's own remark, that modern criticism in assailing this particular book runs a greater risk of exposing itself to the imputation of an excessive distrust, a morbid sensibility to doubt and denial, than in questioning the claims of any other epistle ascribed to Paul.

Our knowledge respecting the occasion and object of the letter we must derive from declarations or inferences furnished by the letter itself. For the relation of Philemon and Onesimus to each other, the reader will see the articles on those names. Paul, so intimately connected with the master and the servant, was anxious naturally to effect a reconciliation between them. He wished also (waiving the *ἀνῆκεν*, the matter of duty or right) to give Philemon an opportunity of manifesting his Christian love in the treatment of Onesimus, and his regard, at the same time, for the personal convenience and wishes, not to say official authority, of his spiritual teacher and guide. Paul used his influence with Onesimus (*ἀρεσκόμενος*, in ver. 12) to induce him to return to Colossæ, and place himself again at the disposal of his master. Whether Onesimus assented merely to the proposal of the Apostle, or had a desire at the same time to revisit his former home, the epistle does not enable us to determine. On his departure, Paul put into his hand this letter as evidence that Onesimus was a true and approved disciple of Christ, and entitled as such to be received not as a servant, but above as a servant, as a brother in the faith, as the representative and equal in that respect of the Apostle himself, and worthy of the same consideration and love. It is instructive to observe how entirely Paul identifies himself with Onesimus, and pleads his cause as if it were his own. He intercedes for him as his own child, promises reparation if he had done any wrong, demands for him not only a remission of all penalties, but the reception of sympathy, affection, Christian brotherhood; and while he solicits these favours for another, conceals to receive them with the same gratitude and sense of obligation as if they were bestowed on himself.

such was the purpose and such the argument of the Epistle.

The result of the appeal cannot be doubted. It may be assumed from the character of Philemon that the Apostle's intercession for Onesimus was not unavailing. There can be no doubt that, agreeably to the express instructions of the letter, the past was forgiven; the master and the servant were reconciled to each other; and, if the liberty which Onesimus had asserted in a spirit of independence was not conceded as a boon or right, it was enjoyed at all events under a form of servitude which henceforth was such in name only. So much must be regarded as certain; or it follows that the Apostle was mistaken in his opinion of Philemon's character, and his efforts for the welfare of Onesimus were frustrated. Chrysostom declares, in his impassioned style, that Philemon must have been less than a man, must have been alike destitute of sensibility and reason (*ποῖος λίθος, ποῖος θῆριον*), not to be moved by the arguments and spirit of such a letter to fulfil every wish and intimation of the Apostle. Surely no fitting response to his pleadings for Onesimus could involve less than a cessation of everything oppressive and harsh in his civil condition, as far as it depended on Philemon to mitigate or neutralise the evils of a legalised system of bondage, as well as a cessation of everything violative of his rights as a Christian. How much further than this an impartial explanation of the epistle obliges us or authorises us to go, has not yet been settled by any very general consent of interpreters. Many of the best critics construe certain expressions (*τὸ ἀγαθόν* in ver. 14, and *ὅτι ἐπὶ ᾧ λέγεις* in ver. 21) as conveying a distinct expectation on the part of Paul that Philemon would liberate Onesimus. Nearly all agree that he could hardly have failed to confer on him that favour, even if it was not requested in so many words, after such an appeal to his sentiments of humanity and justice. Thus it was, as Dr. Wordsworth remarks (*St. Paul's Epistles*, p. 328), "by Christianising the master that the Gospel enfranchised the slave. It did not legislate about mere names and forms, but it went to the root of the evil, it spoke to the heart of man. When the heart of the master was filled with divine grace and was warmed with the love of Christ, the rest would soon follow. The lips would speak kind words, the hands would do liberal things. Every Onesimus would be treated by every Philemon as a beloved brother in Christ."

The Epistle to Philemon has one peculiar feature—its *aesthetical character* it may be termed—which distinguishes it from all the other epistles, and demands a special notice at our hands. It has been admired deservedly as a model of delicacy and skill in the department of composition to which it belongs. The writer had peculiar difficulties to overcome. He was the common friend of the parties at variance. He must conciliate a man who supposed that he had good reason to be offended. He must commend the offender, and yet neither deny nor aggravate the imputed fault. He must assert the new ideas of Christian equality in the face of a system which hardly recognised the humanity of the enslaved. He could have placed the question on the ground of his own personal rights, and yet must waive them in order to secure an act of spontaneous kindness. His success must be a triumph of love, and nothing be demanded for the sake of the justice which could have claimed everything. He limits his request to a forgiveness of the alleged wrong,

FOR 11

and a restoration to favour and the enjoyment of future sympathy and affection, and yet would so guard his words as to leave scope for all the generosity which benevolence might prompt towards one whose condition admitted of so much alleviation. These are contrarieties not easy to harmonise; but Paul, it is confessed, has shown a degree of self-denial and a tact in dealing with them, which in being equal to the occasion could hardly be greater.

There is a letter extant of the younger Pliny (*Epist.* ix. 21) which he wrote to a friend whose servant had deserted him, in which he intercedes for the fugitive, who was anxious to return to his master, but dreaded the effects of his anger. Thus the occasion of the correspondence was similar to that between the Apostle and Philemon. It has occurred to scholars to compare this celebrated letter with that of Paul in behalf of Onesimus; and as the result they hesitate not to say, that not only in the spirit of Christian love, of which Pliny was ignorant, but in dignity of thought, argument, pathos, beauty of style, eloquence, the communication of the Apostle is vastly superior to that of the polished Roman writer.

Among the later Commentaries on this Epistle may be mentioned those of Rothe (*Interpretatio Historico-Exegetica*, Bremæ, 1844), Hagenbach (one of his early efforts, Basel, 1829), Zloch (Zürich, 1846, excellent), Meyer, De Wette, Ewald (brief notes with a translation, Göttingen, 1857), Alford, Wordsworth, Ellicott, and the Bible Union (U. S. A. 1860). The celebrated Lavater preached thirty-nine sermons on the contents of this brief composition, and published them in two volumes. [H. B. H.]

PHILETUS (*Φίλητος*: *Philetus*) was possibly a disciple of Hymenæus, with whom he is associated in 2 Tim. ii. 17, and who is named without him in an earlier Epistle (1 Tim. i. 20). Waterland (*Importance of the Doctrine of the Holy Trinity*, ch. iv., Works, iii. 459) condenses in a few lines the substance of many dissertations which have been written concerning their opinions, and the sentence which was inflicted upon at least one of them. "They appear to have been persons who believed the Scriptures of the O. T., but misinterpreted them, allegorizing away the doctrine of the Resurrection, and resolving it all into figure and metaphor. The delivering over unto Satan seems to have been a form of excommunication declaring the person reduced to the state of a heathen; and in the Apostolical age it was accompanied with supernatural or miraculous effects upon the bodies of the persons so delivered." Walchius is of opinion that they were of Jewish origin; Hammond connects them with the Gnostics; Vitringa (with less probability) with the Sadducees. They understood resurrection to signify the knowledge and profession of the Christian religion, or regeneration and conversion, according to J. G. Walchius, whose lengthy dissertation, *De Hymenæo et Phileto*, in his *Miscellanea Sacra*, a. 1744, pp. 81-121, seems to exhaust the subject. Amongst writers who preceded him may be named Vitringa, *Observ. Sacr.* iv. 9, pp. 922-930; Buiddæus, *Ecclesia Apostolica*, v. pp. 297-305. See also, on the heresy, Burton, *Exemption Lectures*, and Dean Ellicott's notes on the Pastoral Epistles; and Potter on *Church Government*, ch. v., with reference to the sentence. The names of Philetus and Hymenæus occur separately among those of Caesar's household whose relics have been found in the Columbaria at Rome. [W. T. B.]

3 H

**PHILIP** (Φίλιππος: *Philippus*). 1. The father of Alexander the Great (1 Macc. i. 1- vi. 2), king of Macedonia, B.C. 359-336.

2. A Phrygian, left by Antiochus Epiph. as governor at Jerusalem (c. B.C. 170), where he behaved with great cruelty (2 Macc. v. 22), burning the fugitive Jews in caves (2 Macc. vi. 11), and taking the earliest measures to check the growing power of Judas Macc. (2 Macc. viii. 8). He is commonly identified with,

3. The foster-brother (συντροφός, 2 Macc. ix. 29) of Antiochus Epiph., whom the king upon his death-bed appointed regent of Syria and guardian of his son Antiochus V., to the exclusion of Lysias (B.C. 164, 1 Macc. vi. 14, 15; 55). He returned with the royal forces from Persia (1 Macc. vi. 56) to assume the government, and occupied Antioch. But Lysias, who was at the time besieging "the Sanctuary" at Jerusalem, hastily made terms with Judas, and marched against him. Lysias stormed Antioch, and, according to Josephus (*Ant.* xii. 9, §7), put Philip to death. In 2 Macc. Philip is said to have fled to Ptol. Philometor on the death of Antiochus (2 Macc. ix. 29), though the book contains traces of the other account (xiii. 23). The attempts to reconcile the narratives (Winer, s. v.) have no probability.

4. Philip V., king of Macedonia, B.C. 220-179. His wide and successful endeavours to strengthen and enlarge the Macedonian dominion brought him into conflict with the Romans, when they were engaged in the critical war with Carthage. Desultory warfare followed by hollow peace lasted till the victory of Zama left the Romans free for more vigorous measures. Meanwhile Philip had consolidated his power, though he had degenerated into an unscrupulous tyrant. The first campaigns of the Romans on the declaration of war (B.C. 200) were not attended by any decisive result, but the arrival of Flaminius (B.C. 198) changed the aspect of affairs. Philip was driven from his commanding position, and made unsuccessful overtures for peace. In the next year he lost the fatal battle of Cynoscephalæ, and was obliged to accede to the terms dictated by his conquerors. The remainder of his life was spent in vain endeavours to regain something of his former power; and was embittered by cruelty and remorse. In 1 Macc. viii. 5, the defeat of Philip is coupled with that of Perseus as one of the noblest triumphs of the Romans.

[B. F. W.]

Philip V. of Macedonia.

**PHILIP THE APOSTLE** (Φίλιππος: *Philippus*). The Gospels contain comparatively scanty notices of this disciple. He is mentioned as being

of Bethsaida, the city of Andrew and Peter (John i. 44), and apparently was among the Galilean peasants of that district who flocked to him, on preaching of the Baptist. The manner in which St. John speaks of him, the repetition by him of the salient words with which Andrew had brought to Peter the good news that the Christ had at last appeared, all indicate a previous friendship with the sons of Jonah and of Zebedee, and a consequent participation in their Messianic hopes. The close union of the two in John vi. and xii. suggests that he may have owed to Andrew the first tidings that the hope had been fulfilled. The statement that Jesus found him (John i. 43) implies a previous seeking. To him first in the whole circle of the disciples<sup>5</sup> were spoken the words so full of meaning, "Follow me" (*Ibid.*). As soon as he has learnt to know his Master, he is eager to communicate his discovery to another who had also shared the same expectations. He speaks to Nathanael, probably on his arrival in Cana (*comp.* John xii. 2. Ewald, *Gesch.* v. p. 251), as though they had not seldom communed together, of the intimations of a better time, of a divine kingdom, which they found in their sacred books. We may well believe that he, like his friend, was an "Israelite indeed" whom there was no guile.<sup>6</sup> In the lists of the twelve Apostles, in the Synoptic Gospels, his name is as uniformly at the head of the second group of four, as the name of Peter is at that of the first (Matt. x. 3; Mark iii. 18; Luke vi. 14); and the facts recorded by St. John give the reason of this priority. In those lists again we find his name uniformly coupled with that of Bartholomæus, and this has led to the hypothesis that the latter is identical with the Nathanael of John i. 45, the one being the personal name, the other, like Nathanael or Bartholomæus, a patronymic. *Thomson* (*John*, p. 9) looks on the two as brothers, but the words mention of "τὸν θῖον ἀδελφόν" in v. 41, and its omission here, is, as Alford remarks (*on* Matt. x. 3), against this hypothesis.

Philip apparently was among the first company of disciples who were with the Lord at the commencement of His ministry, at the marriage of Cana, on His first appearance as a prophet in Jerusalem (John ii.). When John was cast into prison, and the work of declaring the glad tidings of the kingdom required a new company of preachers, we may believe that he, like his companions and friends, received a new call to a more constant discipleship (Matt. iv. 18-22). When the Twelve were specially set apart for their office, he was numbered among them. The first three Gospels tell us nothing more of him individually. St. John, with his characteristic fullness of personal reminiscences, records a few significant utterances. The earnest, simple-hearted faith which dawned itself in his first conversion, required, it would seem, an education; one stage of this may be traced according to Clement of Alexandria (*Strom.* iii. 26), in the history of Matt. vii. 21. He recognized, as a recognized fact, that Philip was the disciple who urged the plea, "Suffer me first to go and bury my father," and who was reminded of a higher duty, perhaps also of the command previously given, by the command, "Let the dead bury their dead; follow

<sup>5</sup> Gresswell's suggestion (*Disser.* on *Harmony*, xxxii.) that the Apostle was an inhabitant (ἀπὸ) of Bethsaida, but a native (ἐκ) of Capernaum, is to be noticed, but hardly to be received.

<sup>6</sup> It has been assumed, on the authority of Jewish tradition (*see* v.), that his call to the apostleship involved the abandonment, for a time, of his wife and daughter.

them on." When the Galilean crowds had lusted on their way to Jerusalem to hear the preaching of Jesus (John vi. 5-9), and were faint with hunger, it was to Philip that the question was put, "Whence shall we buy bread that these may eat?" "And thus he said," St. John adds, "to prove him, for he himself knew what He would do." The answer, "Two hundred pennyworth of bread is not sufficient for them that every one may take a little," shows how little he was prepared for the work of divine power that followed.\* It is noticeable that here, as in John i., he appears in close connexion with Andrew.

Another incident is brought before us in John xii. 20-22. Among the pilgrims who had come to keep the passover at Jerusalem were some Gentile proselytes (Hellenes) who had heard of Jesus, and desired to see Him. The Greek name of Philip may have attracted them. The zealous love which he had shown in the case of Nathanael may have made him prompt to offer himself as their guide. But it is characteristic of him that he does not take them at once to the presence of his Master. "Philip cometh and telleth Andrew, and again Andrew and Philip tell Jesus." The friend and fellow-townsmen to whom probably he owed his own introduction to Jesus of Nazareth is to introduce these strangers also.<sup>4</sup>

There is a connexion not difficult to be traced between this fact and that which follows on the last recurrence of Philip's name in the history of the Gospels. The desire to see Jesus gave occasion to the utterance of words in which the Lord spoke more distinctly than ever of the presence of His Father with Him, to the voice from heaven which manifested the Father's will (John xii. 28). The words appear to have sunk into the heart of at least one of the disciples, and he brooded over them. The strong cravings of a passionate but unenlightened faith led him to feel that one thing was yet wanting. They heard their Lord speak of His Father and of their Father. He was going to His Father's house. They were to follow Him there. But why should they not have even now a vision of the Divine glory? It was part of the child-like simplicity of his nature that no reserve should hinder the expression of the craving, "Lord, shew us the Father, and it sufficeth us" (John xiv. 8). And the answer to that desire belonged also specially to him. He had all along been eager to lead others to see Jesus. He had been with Him, looking on Him from the very commencement of His ministry, and yet he had not known Him. He had thought of the glory of the Father as consisting in something else than the Truth, Righteousness, Love that he had witnessed in the Son. "Have I been so long time with you, and yet hast thou not known me, Philip? He that hath seen me hath seen the Father. How sayest thou, Shew us the Father?" No other fact connected with the name of Philip is recorded in the Gospels. The close relation in which we have seen him standing to the sons of Zebedee and Nathanael might lead us to think of him as one of the two unnamed disciples in the list of fishermen on the Sea of Tiberias who meet us in John xxi. He is among the company of disciples at Jerusalem after the Ascension (Acts i. 13), and on the day of Pentecost.

<sup>4</sup> Bengel draws from this narrative the inference that was part of Philip's work to provide for the daily maintenance of the company of the Twelve.

<sup>5</sup> The national pride of some Spanish theologians has led them to claim these Hellenes as their countrymen,

After this all is uncertain and apocryphal. He is mentioned by Clement of Alexandria as having had a wife and children, and as having sanctioned the marriage of his daughters instead of binding them to vows of chastity (*Strom.* iii. 52; *Euseb.* *H. E.* iii. 30), and is included in the list of those who had borne witness of Christ in their lives, but had not died what was commonly looked on as a martyr's death (*Strom.* iv. 73). Polycrates (*Euseb.* *H. E.* iii. 31), bishop of Ephesus, speaks of him as having fallen asleep in the Phrygian Hierapolis, as having had two daughters who had grown old unmarried, and a third, with special gifts of inspiration (*Ev. 'Αγίου Πνεύματος πολιτευσαμένη*), who had died at Ephesus. There seems, however, in this mention of the daughters of Philip, to be some confusion between the Apostle and the Evangelist. Eusebius in the same chapter quotes a passage from Caius in which the four daughters of Philip, prophetesses, are mentioned as living with their father at Hierapolis and as buried there with him, and himself connects this fact with Acts xxi. 8, as though they referred to one and the same person. Polycrates in like manner refers to him in the Easter Controversy, as an authority for the Quartodeciman practice (*Euseb.* *H. E.* v. 24). It is noticeable that even Augustine (*Serm.* 266) speaks with some uncertainty as to the distinctness of the two Philips. The apocryphal 'Acta Philippi' are utterly wild and fantastic, and if there is any grain of truth in them, it is probably the bare fact that the Apostle or the Evangelist laboured in Phrygia, and died at Hierapolis. He arrives in that city with his sister Maximine and his friend Bartholomew.<sup>6</sup> The wife of the proconsul is converted. The people are drawn away from the worship of a great serpent. The priests and the proconsul seize on the Apostles and put them to the torture. St. John suddenly appears with words of counsel and encouragement. Philip, in spite of the warning of the Apostle of Love reminding him that he should return good for evil, curses the city, and the earth opens and swallows it up. Then his Lord appears and reproves him for his vindictive anger, and those who had descended to the abyss are raised out of it again. The tortures which Philip had suffered end in his death, but, as a punishment for his offence, he is to remain for forty days excluded from Paradise. After his death a vine springs up on the spot where his blood had fallen, and the juice of the grapes is used for the Eucharistic cup (*Tischendorf, Acta Apocrypha*, p. 75-94). The book which contains this narrative is apparently only the last chapter of a larger history, and it fixes the journey and the death as after the eighth year of Trajan. It is uncertain whether the other apocryphal fragment professing to give an account of his labours in Greece is part of the same work, but it is at least equally legendary. He arrives in Athens clothed like the other Apostles, as Christ had commanded, in an outer cloak and a linen tunic. Three hundred philosophers dispute with him. They find themselves baffled, and send for assistance to Ananias the high-priest at Jerusalem. He puts on his pontifical robes, and goes to Athens at the head of five hundred warriors. They attempt to seize on the Apostle, and are all smitten with blindness. The heavens open, the form of the Son

and so to explain the reverence which places the patron saint of so many of their kings on a level with Saint Iag, as the patron saint of the people (*Acta Sanctorum*, May 1).

<sup>6</sup> The union of the two names is significant, and points to the Apostle.

of Men appears, and all the idols of Athens fall to the ground; and so on through a succession of marvels, ending with his remaining two years in the city, establishing a Church there, and then going to preach the Gospel in Parthia (Tischendorf, *Acta Apocr.* p. 95-104.). Another tradition represents Scythia as the scene of his labours (Abdias, *Hist. Apost.* in Fabricius, *Cod. Apoc. N. T.* i. 739), and throws the guilt of his death upon the Ebionites (*Acta Sanctorum*, May 1). [E. H. P.]

**PHILIP THE EVANGELIST.** The first mention of this name occurs in the account of the dispute between the Hebrew and Hellenistic disciples in Acts vi. He is one of the Seven appointed to superintend the daily distribution of food and alms, and so to remove all suspicion of partiality. The fact that all the seven names are Greek, makes it at least very probable that they were chosen as belonging to the Hellenistic section of the Church, representatives of the class which had appeared before the Apostles in the attitude of complaint. The name of Philip stands next to that of Stephen; and this, together with the fact, that these are the only two names (unless Nicolas be an exception; comp. NICOLAS) of which we hear again, tends to the conclusion that he was among the most prominent of those so chosen. He was, at any rate, well reported of as "full of the Holy Ghost, and wisdom," and had so won the affections of the great body of believers as to be among the objects of their free election, possibly (assuming the votes of the congregation to have been taken for the different candidates) gaining all but the highest number of suffrages. Whether the office to which he was thus appointed gave him the position and the title of a Deacon of the Church, or was special and extraordinary in its character, must remain uncertain (comp. DEACON).

The after-history of Philip warrants the belief, in any case, that his office was not simply that of the later Diaconate. It is no great presumption to think of him as contributing hardly less than Stephen to the great increase of disciples which followed on this fresh organisation, as sharing in that wider, more expansive teaching which shows itself for the first time in the oration of the proto-martyr, and in which he was the forerunner of St. Paul. We should expect the man who had been his companion and fellow-worker to go on with the work which he left unfinished, and to break through the barriers of a simply national Judaism. And so accordingly we find him in the next stage of his history. The persecution of which Saul was the leader must have stopped the "daily ministrations" of the Church. The teachers who had been most prominent were compelled to take to flight, and Philip was among them. The cessation of one form of activity, however, only threw him forward into another. It is noticeable that the city of Samaria is the first scene of his activity (Acts viii.). He is the precursor of St. Paul in his work, as Stephen had been in his teaching. It falls to his lot, rather than to that of an Apostle, to take that first step in the victory over Jewish prejudice and the expansion of the Church, according to its Lord's command. As a preparation for that work there may have been the Messianic hopes which were cherished by the Samaritans no less than by the Jews (John v. 25), the recollection of the two days which had

witnessed the presence there of Christ and His disciples (John iv. 40), even perhaps the craving for spiritual powers which had been roused by the strange influence of Simon the Sorcerer. The scene which brings the two into contact with each other, in which the magician has to acknowledge a power over nature greater than his own, is interesting, rather as belonging to the life of the heresiarch than to that of the Evangelist. [SIMON MAGUS.] It suggests the inquiry whether we can trace through the distortions and perversions of the "hero of the romance of heresy," the influence of that phase of Christian truth which was likely to be presented by the preaching of the Hellenistic Evangelist.

This step is followed by another. He is directed by an angel of the Lord to take the road that led down from Jerusalem to Gaza on the way to Egypt. (For the topographical questions connected with this history, see GAZA.) A chariot passes by in which there is a man of another race, whose complexion or whose dress showed him to be a native of Ethiopia. From the time of Psammethicus [comp. MANASSEH] there had been a large body of Jews settled in that region, and the court or chamberlain at the court of Candace might easily have come across them and their sacred books, might have embraced their faith, and become by circumcision a proselyte of righteousness. He had been on a pilgrimage to Jerusalem. He may have heard there of the new sect. The history that follows is interesting as one of the few records in the N. T. of the process of individual conversion, and one which we may believe St. Luke obtained, during his residence at Caesarea, from the Evangelist himself. The devout proselyte reciting the prophecy which he does not understand—the Evangelist-preacher running at full speed till he overtakes the chariot—the abrupt question—the simple-hearted answer—the unfolding, from the starting-point of the prophecy, of the glad tidings of Jesus—the craving for the means of admission to the blessing of fellowship with the new society—the simple baptism in the first stream or spring—the instantaneous, abrupt departure of the missionary-preacher, as of one carried away by a Divine impulse—these help us to represent to ourselves much of the life and work of that remote past. On the hypothesis which has just been suggested, we may think of it as being the incident to which the mind of Philip himself recurred with most satisfaction.

A brief sentence tells us that he continued his work as a preacher at Azotus (Ashdod) and among the other cities that had formerly belonged to the Philistines, and, following the coast-line, came to Caesarea. Here for a long period, not less than eighteen or nineteen years, we lose sight of him. He may have been there when the new convert Saul passed through on his way to Tarsus (Acts ix. 30). He may have contributed by his labours to the eager desire to be guided further into the Truth which led to the conversion of Cornelius. We can hardly think of him as giving up all at once the missionary habits of his life. Caesarea, however, appears to have been the centre of his activity. The last glimpse of him in the N. T. is in the account of St. Paul's journey to Jerusalem. It is to his house, as to one well known to them, that St. Paul and his companions turn for shelter.

\* The verse which inserts the requirement of a confession of faith as the condition of baptism appears to have been the work of a transcriber anxious to bring the

narrative into harmony with ecclesiastical usage. (Comp. Alford, Meyer, Tischendorf, *ib. loc.*)

He is still known as "one of the Seven." His work has gained for him the yet higher title of Evangelist (comp. EVANGELIST). He has four daughters, who possess the gift of prophetic utterance, and who apparently give themselves to the work of teaching instead of entering on the life of home (Acts xxi. 8, 9). He is visited by the prophets and elders of Jerusalem. At such a place as Caesarea the work of such a man must have helped to bridge over the ever-widening gap which threatened to separate the Jewish and the Gentile Churches. One who had preached Christ to the hated Samaritan, the swarthy African, the despised Philistine, the men of all nations who passed through the seaport of Palestine, might well welcome the arrival of the Apostle of the Gentiles (comp. J. P. Lange, in Herzog's *Real-encyclopädi.* s. v. "Philippus").

The traditions in which the Evangelist and the Apostle who bore the same name are more or less confounded have been given under PHILIP THE APOSTLE. According to another, relating more distinctly to him, he died Bishop of Tralles (*Acts Sanct.* June 6). The house in which he and his daughters had lived was pointed out to travellers in the time of Jerome (*Epist. Paulae*, §8). (Comp. Ewald, *Geschichte*, vi. 175, 208-214; Baumgarten, *Apostel-Geschichte*, §15, 16.) [E. H. P.]

PHILIP HEROD I., II. [HEROD; vol. i. p. 794.]

PHILIPPI (Φιλιπποι: *Philippi*). A city of Macedonia, about nine miles from the sea, to the N. W. of the island of Thasos, which is twelve miles distant from its port Neapolis, the modern Kavalla. It is situated in a plain between the ranges of Pangaeus and Haemus. St. Paul, when, on his first visit to Macedonia in company with Silas, he embarked at Thessalonica, made a straight run to Samothrace, and from thence to Neapolis, which he reached on the second day (Acts xvi. 11). This was built on a rocky promontory, on the western side of which is a roundstead, furnishing a safe refuge from the Etesian winds. The town is cut off from the interior by a steep line of hills, anciently called Symbolon, connected towards the N.E. with the western extremity of Haemus, and towards the S.W., less continuously, with the eastern extremity of Pangaeus. A steep track, following the course of an ancient paved road, leads over Symbolon to Philippi, the solitary pass being about 1800 feet above the sea-level. At this point the traveller arrives in little more than half an hour's riding, and almost immediately begins to descend by a yet steeper path into the plain. From a point near the watershed, a simultaneous view is obtained both of Kavalla and of the ruins of Philippi. Between Pangaeus and the nearest part of Symbolon the plain is very low, and there are large accumulations of water. Between the foot of Symbolon and the site of Philippi, two Turkish cemeteries are passed, the gravestones of which are all derived from the ruins of the ancient city, and in the immediate neighbourhood of the one first reached is the modern Turkish village *Bereketli*. This is the nearest village to the ancient ruins, which are not at the present time inhabited at all. Near the second cemetery are some ruins on a slight eminence, and also a khan, kept by a Greek family. Here is a large monumental block of marble, 12 feet high and 7 feet square, apparently the pedestal of a statue, as on the top a hole exists, which was obviously intended for its receptor. This hole is pointed out by local tradition as the crib out of

which Alexander's horse, Bucephalus, was accustomed to eat his oats. On two sides of the block is a mutilated Latin inscription, in which the names of Caius Vibius and Cornelius Quartus may be deciphered. A stream employed in turning a mill bursts out from a sedge pool in the neighbourhood, and probably finds its way to the marshy ground mentioned as existing in the S.W. portion of the plain.

After about twenty minutes' ride from the khan, over ground thickly strewn with fragments of marble columns, and slabs that have been employed in building, a river-bed 66 feet wide is crossed, through which the stream rushes with great force, and immediately on the other side the walls of the ancient Philippi may be traced. Their direction is adjusted to the course of the stream; and at only 350 feet from its margin there appears a gap in their circuit indicating the former existence of a gate. This is, no doubt, the gate out of which the Apostle and his companion passed to the "prayer meeting" on the banks of a river, where they made the acquaintance of Lydia, the Thyatiran seller of purple. The locality, just outside the walls, and with a plentiful supply of water for their animals, is exactly the one which would be appropriated as a market for itinerant traders, "quorum copiosius fœnuncque apelles," as will appear from the parallel case of the Egerian fountain near Rome, of whose desecration Juvenal complains (*Sat.* iii. 13). Lydia had an establishment in Philippi for the reception of the dyed goods which were imported from Thyatira and the neighbouring towns of Asia; and were dispersed by means of pack-animals among the mountain clans of the Haemus and Pangaeus, the agents being doubtless in many instances her own co-religionists. High up in Haemus lay the tribe of the Satrae, where was the oracle of Dionysus,—not the rustic deity of the Attic vine-dressers, but the prophet-god of the Thracians (*δ Ὀππῆς πόρις*, Eurip. *Hecub.* 1267). The "damsel with the spirit of divination" (*παιδίον ἐχούσα πνεύμα πρόφης*) may probably be regarded as one of the hierodules of this establishment, hired by Philippian citizens, and frequenting the country-market to practise her art upon the villagers who brought produce for the consumption of the town. The fierce character of the mountaineers would render it imprudent to admit them within the walls of the city; just as in some of the towns of North Africa, the Kabyles are not allowed to enter, but have a market allotted to them outside the walls for the sale of the produce they bring. Over such an assemblage only a summary jurisdiction can be exercised; and hence the proprietors of the slave, when they considered themselves injured, and hurried Paul and Silas into the town, to the *agora*,—the civic market where the magistrates (*ἄρχοντες*; sat,—were at once turned over to the military authorities (*στρατηγοί*), and these, naturally assuming that a stranger frequenting the extra-mural market must be a Thracian mountaineer or an itinerant trader, proceeded to inflict upon the ostensible cause of a riot (the merits of which they would not attempt to understand), the usual treatment in such cases. The idea of the Apostle possessing the Roman franchise, and consequently an exemption from corporal outrage, never occurred to the rough soldier who ordered him to be scourged; and the whole transaction seems to have passed so rapidly that he had no time to plead his citizenship, of which the military authorities first heard the next day. But the illegal treatment (*ὕβρις*) obvious

wrote a deep impression on the mind of its victim, as is evident, not only from his refusal to take his discharge from prison the next morning (Acts xvi. 37), but from a passage in the Epistle to the Church at Thessalonica (1 Thess. ii. 2), in which he reminds them of the circumstances under which he first preached the Gospel to them (*προαθύντες καὶ ἐπισθεντες, καθὼς οἴσθε, ἐν Φιλίπποις*). And subsequently at Jerusalem, under parallel circumstances of tumult, he warns the officer (to the great surprise of the latter) of his privilege (Acts xxii. 25).

The Philippi which St. Paul visited, the site of which has been described above, was a Roman colony founded by Augustus, and the remains which strew the ground are no doubt derived from that city. The establishment of Philip of Macedonia was probably not exactly on the same site; for it is described by Appian as being on a hill, and it may perhaps be looked for upon the elevation near the second cemetery. Philip is said to have occupied it and fortified the position by way of a defence against the neighbouring Thracians, so that the nucleus of his town, at any rate, would have been of the nature of an acropolis. Nothing would be more natural than that the Roman town should have been built in the immediate neighbourhood of the existing Greek one, on a site more suitable for architectural display.

Philip, when he acquired possession of the site, found there a town named *Datus* or *Datum*, which was in all probability in its origin a factory of the Phoenicians, who were the first that worked the gold-mines in the mountains here, as in the neighbouring Thasos. Appian says that those were in a hill (*ὄρος*) not far from Philippi, that the hill was sacred to Dionysus, and that the mines went by the name of "the sanctuary" (*τὰ ἱερὸν*). But he shows himself quite ignorant of the locality, to the extent of believing the plain of Philippi to lie open to the river Strymon, whereas the massive wall of Pangaea is really interposed between them. In all probability the "hill of Dionysus" and the "sanctuary" are the temple of Dionysus high up the mountains among the Satrae, who preserved their independence against all invaders down to the time of Herodotus at least. It is more likely that the gold-mines coveted by Philip were the same as those at *Scapte Hyle*, which was certainly in this immediate neighbourhood. Before the great expedition of Xerxes, the Thasians had a number of settlements on the main, and this among the number, which produced them 80 talents a year as rent to the state. In the year 463 B.C., they ceded their possessions on the continent to the Athenians; but the colonists, 10,000 in number, who had settled on the Strymon and pushed their encroachments eastward as far as this point, were crushed by a simultaneous effort of the Thracian tribes (Thucydides, i. 103, iv. 102; Herodotus, ix. 75; Pausanias, i. 29, 4). From that time until the rise of the Macedonian power, the mines seem to have remained in the hands of native chiefs; but when the affairs of Southern Greece became thoroughly embroiled by the policy of Philip, the Thasians made an attempt to repossess themselves of this valuable territory, and sent a colony to the site—then going by the name of "the Springs" (*Κρηναῖες*). Philip, however, aware of the importance of the position, expelled them and founded Philippi, the last of all his creations. The mine—at that time, as was not wonderful under the circumstances, had become

almost insignificant in their produce; but their new owner contrived to extract more than 1000 talents a year from them, with which he minted the gold coinage called by his name.

The proximity of the gold-mines was of course the origin of so large a city as Philippi, but the plain in which it lies is of extraordinary fertility. The position too was on the main road from Rome to Asia, the Via Egnatia, which from Thessalonica to Constantinople followed the same course as the existing post-road. The usual course was to take ship at Brundisium and land at Dyrrachium, from whence a route led across Epirus to Thessalonica. Ignatius was carried to Italy by this route, when sent to Rome to be cast to wild beasts.

The ruins of Philippi are very extensive, but present no striking feature except two gateways, which are considered to belong to the time of Claudius. Traces of an amphitheatre, theatre, or stadium—for it does not clearly appear which—are also visible in the direction of the hills on the N.E. side. Inscriptions both in the Latin and Greek languages, but more generally in the former, are found.

St. Paul visited Philippi twice more, once immediately after the disturbances which arose at Ephesus out of the jealousy of the manufacturers of silver shrines for Artemis. By this time the hostile relation in which the Christian doctrine necessarily stood to all purely ceremonial religions was perfectly manifest; and wherever its teachers appeared, popular tumults were to be expected, and the jealousy of the Roman authorities, who dreaded civil disorder above everything else, to be feared. It seems not unlikely that the second visit of the Apostle to Philippi was made specially with the view of counteracting this particular danger. The Epistle to the Philippians which was written to them from Rome, indicates that at that time some of the Christians there were in the custody of the military authorities as seditious persons, through some proceedings or other connected with their faith (*ὅμιν ἐχαρίσθη τὸ ὑπὲρ Χριστοῦ, ὃ πλεον τὸ εἰς αὐτὸν πιστεῖν ἀλλὰ καὶ τὸ ὑπὲρ αὐτοῦ πάσχειν τὸν αὐτὸν ἀγῶνα ἔχοντες οἷον εἶδετε ἐν ἐμοὶ καὶ νῦν ἀκούετε ἐν ἐμοὶ*; Phil. i. 29). The reports of the provincial magistrates to Rome would of course describe St. Paul's first visit to Philippi as the origin of the troubles there; and if this were believed, it would be put together with the charge against him by the Jews at Jerusalem which induced him to appeal to Caesar, and with the disturbances at Ephesus and elsewhere; and the general conclusion at which the Government would arrive, might not improbably be that he was a dangerous person and should be got rid of. This will explain the strong exhortation in the first eighteen verses of chapter ii., and the peculiar way in which it winds up. The Philippian Christians, who are at the same time suffering for their profession, are exhorted in the most earnest manner, not to firmness (as one might have expected), but to moderation, to abstinence from all provocation and ostentation of their own sentiments (*μηδὲν κατὰ ἐπιθεῖαν μηδὲ ἀντιποιθεῖσθαι*, ver. 3), to humility, and consideration for the interests of others. They are to achieve their salvation with fear and trembling, and without quarrelling and disputing, in order to escape all blame—from such charges, that is, as the Roman colonists would bring against them. If with all this prudence and temperance in the profession of their faith, their faith is still made a penal offence, the Apostle is well

hesitant to take the consequences,—to precede them in martyrdom for it,—to be the libation poured out upon them the victims (*ἐὶ καὶ σπένδονται ἐπὶ τῇ θυσίᾳ καὶ λειτουργίᾳ τῆς πίστεως ὑμῶν, χαίρει καὶ συγχάριε πᾶσιν ὑμῖν*, ver. 17). Of course the Jewish formalists in Philippi were the parties most likely to misrepresent the conduct of the new converts; and hence (after a digression on the subject of Epaphroditus) the Apostle reverts to cautions against them, such precisely as he had given before,—consequently by word of mouth. “Beware of those dogs”—(for they will not be children at the table, but eat the crumbs underneath)—“those doers (and bad doers too) of the law—those flesh-monglers (for *circumcised* I won’t call them, we being the true circumcision, &c.” (iii, 2, 3). Some of these enemies St. Paul found at Rome, who “told the story of Christ insincerely” (*κατ’ ἑγγύλιαν εὐχ ἄγνους*, i. 17) in the hope to increase the severity of his imprisonment by exciting the jealousy of the Court. These he opposes to such as “preached Christ” (*ἀκηρύξαντες*) loyally, and consoles himself with the reflection that, at all events, the story circulated, whatever the motives of those who circulated it.

The Christian community at Philippi distinguished itself in liberality. On the Apostle’s first visit he was hospitably entertained by Lydia, and when he afterwards went to Thessalonica, where his reception appears to have been of a very mixed character, the Philippians sent him supplies more than once, and were the only Christian community that did so (Phil. iv. 15). They also contributed readily to the collection made for the relief of the poor at Jerusalem, which St. Paul conveyed to them at his last visit (2 Cor. viii. 1-6). And it would seem as if they sent further supplies to the Apostle after his arrival at Rome. The necessity for these seems to have been urgent, and some delay to have taken place in collecting the requisite funds; so that Epaphroditus, who carried them, risked his life in the endeavour to make up for lost time (*μήτερι θανάτῳ ἤγγισεν παραβουλευσάμενος τῇ βουλῇ, ὡς ἀνακληρώσῃ τὸ ὑμῶν ἐστέργμα τῆς πρὸς μὲ λειτουργίας*, Phil. ii. 30). The delay, however, seems to have somewhat stung the Apostle at the time, who fancied his beloved flock had forgotten him (see iv. 10-17). Epaphroditus fell ill with fever from his efforts, and nearly died. On recovering he became home-sick, and wandering in mind (*ἀδυνατών*) from the weakness which is the sequel of fever; and St. Paul, although intending soon to send Timothy to the Philippian Church, thought it desirable to let Epaphroditus go without delay to them, who had already heard of his sickness, and carry with him the letter which is included in the *Letter*—one which was written after the Apostle’s imprisonment at Rome had lasted a considerable time. Some domestic troubles connected with religion had already broken out in the community. Euodia (the name of a female, not Euodias, as in A. V.; see EUODIAS) and Syntyche, perhaps deaconesses, are exhorted to agree with one another in the matter of their common faith; and St. Paul addresses some one, whom he calls “true yoke-fellow,” to “help” these women, that is, in the work of their reconciliation, since they had done good service to the Apostle in his trials at Philippi.

a. Tertullian refers to it in the same way, *de Præscriptura*, cxxvi., naming Philippi as one of these Apostolic churches “in which at this day [A.D. 200] the very seats

Possibly a claim on the part of these females to superior insight in spiritual matters may have caused some irritation; for the Apostle immediately goes on to remind his readers, that the peace of God is something superior to the highest intelligence (*ὑπερ-ἄνωγα πάντα νοῦν*).

When St. Paul passed through Philippi a third time he does not appear to have made any considerable stay there (Acts xx. 6). He and his companion are somewhat loosely spoken of as sailing from Philippi; but this is because in the common apprehension of travellers the city and its port were regarded as one. Whoever embarked at the Piræus might in the same way be said to set out on a voyage from Athens. On this occasion the voyage to Troas took the Apostle five days, the vessel being probably obliged to coast in order to avoid the contrary wind, until coming off the headland of Sarpædon, whence she would be able to stand across to Troas with an E. or E.N.E. breeze, which at that time of year (after Easter) might be looked for. (Strab. *Fragment*. lib. vii.; Thucyd. i. 100, iv. 102; Herod. ix. 75; Diod. Sic. xvi. 3 seqq.; Appian. *Bell. Civ.* iv. 101 seqq.; Pausan. i. 28, §4; Hackett’s *Journey to Philippi in the Bible Union Quarterly* for August, 1860.) [J. W. B.]

#### PHILIPPIANS, EPISTLE TO THE.

1. The canonical authority, Pauline authorship and integrity of this Epistle were unanimously acknowledged up to the end of the 18th century. Marcion (A.D. 140) in the earliest known Canon held common ground with the Church touching the authority of this Epistle (Tertullian, *Adv. Marcion.* iv. 5, v. 20): it appears in the Muratorian Fragment (Houth, *Reliquiæ Sacrae*, i. 395); among the “acknowledged” books in Eusebius (*H. E.* iii. 25); in the lists of the Council of Laodicea, A.D. 365, and the Synod of Hippo, 393; and in all subsequent lists, as well as in the Peshito and later versions. Even contemporary evidence may be claimed for it. Philippian Christians who had contributed to the collections for St. Paul’s support at Rome, who had been eye and ear-witnesses of the return of Epaphroditus and the first reading of St. Paul’s Epistle, may have been still alive at Philippi when Polycarp wrote (A.D. 107) his letter to them, in which (ch. 2, 3) he refers to St. Paul’s Epistle as a well-known distinction belonging to the Philippian Church. It is quoted as St. Paul’s by Irenæus, iv. 18, §4; Clem. Alex. *Pædag.* i., 6, §52, and elsewhere; Tertullian, *Adv. Mar.* v. 20, *De Res. Carn.* ch. 23. A quotation from it (Phil. ii. 6) is found in the Epistle of the Church of Lyons and Vienne, A.D. 177 (Eusebius, *H. E.* v. 2). The testimonies of later writers are innumerable. But F. C. Baur (1845), followed by Schweigler (1846), has argued from the phraseology of the Epistle and other internal marks, that it is the work not of St. Paul, but of some Gnostic forger in the 2nd century. He has been answered by Lünemann (1847), Brückner (1848), and Reisch (1850). Even if his inference were a fair consequence from Baur’s premises, it would still be neutralized by the strong evidence in favour of Pauline authorship, which Paley, *Horæ Paulinæ*, ch. 7, has drawn from the Epistle as it stands. The arguments of the Tübingen school are briefly stated in Reuss, *Gesch. A. N. T.* §130-133, and at greater

of the Apostles preside over their regions, in which the authentic epistles themselves of the Apostles are read speaking with the voice and representing the face of each.

length in Wiesinger's *Commentary*. Most persons who read them will be disposed to concur in the opinion of Dean Alford (*N. T.* vol. iii. p. 27, ed. 1856), who regards them as an instance of the insanity of hyper-criticism. The canonical authority and the authorship of the Epistle may be considered as unshaken.

There is a break in the sense at the end of the second chapter of the Epistle, which every careful reader must have observed. It is indeed quite natural that an Epistle written amid exciting circumstances, personal dangers, and various distractions should bear in one place at least a mark of interruption. Le Moynes (1685) thought it was anciently divided into two parts. Heinrichs (1810) followed by Paulus (1817) has conjectured from this abrupt recommencement that the two parts are two distinct epistles, of which the first, together with the conclusion of the Ep. (iv. 21-23) was intended for public use in the Church, and the second exclusively for the Apostle's special friends in Philippi. It is not easy to see what sufficient foundation exists for this theory, or what illustration of the meaning of the Epistle could be derived from it. It has met with a distinct reply from Krause (1811 and 1818); and the integrity of the Epistle has not been questioned by recent critics. Ewald (*Send-schreiben des A. Paulus*, p. 431) is of opinion that St. Paul sent several epistles to the Philippians: and he refers to the texts ii. 12 and iii. 18, as partly proving this. But some additional confirmation or explanation of his conjecture is requisite before it can be admitted as either probable or necessary.

2. *Where written.*—The constant tradition that this Epistle was written at Rome by St. Paul in his captivity, was impugned first by Oeder (1731), who, disregarding the fact that the Apostle was in prison, i. 7, 13, 14, when he wrote, imagined that he was at Corinth (see Wolf's *Curse Philologicae*, iv. 168, 270); and then by Paulus (1799), Schulz (1829), Böttger (1837) and Rilliet (1841), in whose opinion the Epistle was written during the Apostle's confinement at Caesarea (Acts xxiv. 23); but the references to the "palace" (praetorium, i. 13), and to "Caesar's household," iv. 22, seem to point to Rome rather than to Caesarea; and there is no reason whatever for supposing that the Apostle felt in Caesarea that extreme uncertainty of life connected with the approaching decision of his cause, which he must have felt towards the end of his captivity at Rome, and which he expresses in this Epistle, i. 19, 20, ii. 17, iii. 10; and further, the dissemination of the Gospel described in Phil. i. 12-18, is not even hinted at in St. Luke's account of the Caesarean captivity, but is described by him as taking place at Rome: compare Acts xxiv. 23 with xviii. 30, 31. Even Reus (*Geach.* N. T. 1860), who assigns to Caesarea three of St. Paul's Epistles, which are generally considered to have been written at Rome, is decided in his conviction that the Epistle to the Philippians was written at Rome.

3. *When written.*—Assuming then that the Epistle was written at Rome during the imprisonment mentioned in the last chapter of the Acts, it may be shown from a single fact that it could not have been written long before the end of the two years. The distress of the Philippians on account of Epaphroditus' sickness was known at Rome when the Epistle was written; this implies four journeys, separated by some indefinite intervals, to or from Philippi and Rome, between the commence-

ment of St. Paul's captivity and the writing of the Epistle. The Philippians were informed of his imprisonment, sent Epaphroditus, were informed of their messenger's sickness, sent their message of condolence. Further, the absence of St. Luke's name from the salutations to a Church where he was well-known, implies that he was absent from Rome<sup>b</sup> when the Epistle was written: so does St. Paul's declaration, ii. 26, that no one who remained with him felt an equal interest with Timothy in the welfare of the Philippians. And, by comparing the mention of St. Luke in Col. iv. 14, and Philem. 24 with the abrupt conclusion of his narrative in the Acts, we are led to the inference that he left Rome after those two Epistles were written and before the end of the two years' captivity. Lastly, it is obvious from Phil. i. 20, that St. Paul, when he wrote, felt his position to be very critical, and we know that it became more precarious as the two years drew to a close. In A.D. 62 the infamous Tigellinus succeeded Burrus the upright Praetorian praefect in the charge of St. Paul's person; and the marriage of Poppaea brought his imperial judge under an influence, which if equalled, was hostile to St. Paul. Assuming that St. Paul's acquittal and release took place in 63, we may date the Epistle to the Philippians early in that year.

4. *The writer's acquaintance with the Philippians.*—St. Paul's connexion with Philippi was of a peculiar character, which gave rise to the writing of this Epistle. That city, important as a mart for the produce of the neighbouring gold-mines, and as a Roman stronghold to check the rude Thracian mountaineers, was distinguished as the scene of the great battle fatal to Brutus and Cassius, B.C. 42. [PHILIPPI.] In A.D. 51 St. Paul entered its walls, accompanied by Silas, who had been with him since he started from Antioch, and by Timothy and Luke, whom he had afterwards attached to himself; the former at Derbe, the latter quite recently at Troas. It may well be imagined that the patience of the zealous Apostle had been tried by his mysterious repulse, first from Asia, then from Bithynia and Mysia, and that his expectations had been stirred up by the vision which hastened his departure with his new-found associate, Luke, from Troas. A swift passage brought him to the European shore at Neapolis, whence he took the road about ten miles long across the mountain ridge called Symbolum to Philippi (Acts xvi. 12). There, at a greater distance from Jerusalem than any Apostle had yet penetrated, the long-restrained energy of St. Paul was again employed in laying the foundation of a Christian Church. Seeking first the lost sheep of the house of Israel, he went on a sabbath-day with the few Jews who resided in Philippi, to their small *Proseucha* on the bank of the river Gangitis. The missionaries sat down and spoke to the assembled women. One of them, Lydia, not born of the seed of Abraham, but a proselyte, whose name and occupation, as well as her birth, connect her with Asia, gave heed unto St. Paul, and she and her household were baptized, perhaps on the same sabbath-day. Her house became the residence of the missionaries. Many days they resorted to the *Proseucha*, and the result of their short sojourn in Philippi was the conversion of many persons (xvi. 40), including at last their jailer and his household. Philippi was endured:

<sup>b</sup> Was St. Luke at Philippi?—the true question mentioned in 1. 3

e and contents of the Epistle.—St. Paul's ating is plainly this: while acknowledging of the Philippians and the personal ser- eir messenger, to give them some informa- ing his own condition, and some advice theirs. Perhaps the intensity of his d the distraction of his prison, prevented ing out his plan with undeviating close- the preparations for the departure of tus, and the thought that he would soon ong the warm-hearted Philippians, filled ith recollections of them, and revived his s towards those fellow-heirs of his hope of o were so deep in his heart, i. 7, and so is prayers, i. 4.

he inscription (i. 1-2) in which Timothy

as the second father of the Church is joined with Paul, he sets forth his own condition (i. 3-26). his prayers, care, and wishes for his Philippians, with the troubles and uncertainty of his imprisonment, and his hope of eventually seeing them again. Then (i. 27-ii. 18) he exhorts them to those particular virtues which he would rejoice to see them practising at the present time—fearless endurance of persecution from the outward heathen; unity among themselves, built on Christ-like humility and love; and an exemplary life in the face of unbelievers. He hopes soon to hear a good report of them (ii. 19-30), either by sending Timothy, or by going himself to them, as he now sends Epaphroditus whose diligent service is highly commended. Reverting (iii. 1-21) to the tone of joy which runs through the preceding descriptions and exhortations—as in i. 4, 18, 25, ii. 2, 16, 17, 18, 28—he bids them take heed that their joy be in the Lord, and warns them as he had often previously warned them (probably in his last two visits), against admitting itinerant Judaizing teachers, the tendency of whose doctrine was towards a vain confidence in mere earthly things; in contrast to this, he exhorts them to follow him in placing their trust humbly but entirely in Christ, and in pressing forward in their Christian course, with the Resurrection-day constantly before their minds. Again (iv. 1-9), adverting to their position in the midst of unbelievers, he beseeches them, even with personal appeals, to be firm, united, joyful in the Lord; to be full of prayer and peace, and to lead such a life as must approve itself to the moral sense of all men. Lastly (iv. 10-23), he thanks them for the contribution sent by Epaphroditus for his support, and concludes with salutations and a benediction.

6. *Effect of the Epistle.*—We have no account of the reception of this Epistle by the Philippians. Except doubtful traditions that Erastus was their first bishop, and with Lydia and Parmena was martyred in their city, nothing is recorded of them for the next forty-four years. But, about A.D. 107, Philippi was visited by Ignatius, who was conducted through Neapolis and Philippi, and across Macedonia in his way to martyrdom at Rome. And his visit was speedily followed by the arrival of a letter from Polycarp of Smyrna, which accompanied, in compliance with a characteristic request of the warm-hearted Philippians, a copy of all the letters of Ignatius which were in the possession of the Church of Smyrna. It is interesting to compare the Philippians of A.D. 63, as drawn by St. Paul with their successors in A.D. 107 as drawn by the disciple of St. John. Steadfastness in the faith, and a joyful sympathy with sufferers for Christ's sake, seem to have distinguished them at both periods (Phil. i. 5, and Polyc. Ep. i.). The character of their religion was the same throughout, practical and emotional rather than speculative: in both Epistles there are many practical suggestions, much interchange of feeling, and an absence of doctrinal discussion. The Old Testament is scarcely, if at all, quoted: as if the Philipppian Christians had been gathered for the most part directly from the heathen. At each period false teachers were seeking, apparently in vain, an entrance into the Philipppian Church, first Judaizing Christians, seemingly putting out of sight the Resurrection and the Judgment which afterwards the Gnosticising Christians

which will be noticed. Resurrection was one of the in Church (See 1 Cor. xv. 12.)

2 Tim. ii. 18; Polycarp, vii.; Irenæus, ii. 31; and the other passages quoted by Dean Elliott on 2 Tim. ii. 18.

openly denied (Phil. iii., and Polyc. vi., vii.). At both periods the same tendency to petty internal quarrels seems to prevail (Phil. i. 27, ii. 14, iv. 2, and Polyc. ii., iv., v., xii.). The student of ecclesiastical history will observe the faintly-marked organisation of bishops, deacons, and female coadjutors to which St. Paul refers (Phil. i. 1, iv. 3), developed afterwards into broadly-distinguished priests, deacons, widows, and virgins (Polyc. iv., v., vi.). Though the Macedonian Churches in general were poor, at least as compared with commercial Corinth (2 Cor. viii. 2), yet their gold-mines probably exempted the Philippians from the common lot of their neighbours, and at first enabled them to be conspicuously liberal in alms-giving, and afterwards laid them open to strong warnings against the love of money (Phil. iv. 15; 2 Cor. viii. 3; and Polyc. iv., vi., xi.).

Now, though we cannot trace the immediate effect of St. Paul's Epistle on the Philippians, yet no one can doubt that it contributed to form the character of their Church, as it was in the time of Polycarp. It is evident from Polycarp's Epistle that the Church, by the grace of God and the guidance of the Apostle, had passed through those trials of which St. Paul warned it, and had not gone back from the high degree of Christian attainments which it reached under St. Paul's oral and written teaching (Polyc. i. iii., ix., xi.). If it had made no great advance in knowledge, still unsound teachers were kept at a distance from its members. Their sympathy with martyrs and confessors glowed with as warm a flame as ever, whether it was kindled by Ignatius or by Paul. And they maintained their ground with meek firmness among the heathen, and still held forth the light of an exemplary, though not a perfect Christian life.<sup>4</sup>

7. *The Church at Rome.*—The state of the Church at Rome should be considered before entering on the study of the Epistle to the Philippians. Something is to be learned of its condition about A.D. 58 from the Epistle to the Romans, about A.D. 61 from Acts xviii. Possibly the Gospel was planted there by some who themselves received the seed on the day of Pentecost (Acts ii. 10). The converts were drawn chiefly from Gentile proselytes to Judaism, partly also from Jews who were such by birth, with possibly a few converts direct from heathenism. In A.D. 58, this Church was already eminent for its faith and obedience: it was exposed to the machinations of schismatical teachers; and it included two conflicting parties, the one insisting more or less on observing the Jewish law in addition to faith in Christ as necessary to salvation, the other repudiating outward observances even to the extent of depriving their weak brethren of such as to them might be really edifying. We cannot gather from the Acts whether the whole Church of Rome had then accepted the teaching of St. Paul as conveyed in his Epistle to them. But it is certain that when he had been two years in Rome, his oral teaching was partly rejected by a party which perhaps may have been connected with the former of those above mentioned. St. Paul's presence in Rome, the freedom of speech allowed to him, and the per-

sonal freedom of his fellow-labourers were the means of infusing fresh missionary activity into the Church (Phil. i. 12-14). It was in the wars of Clodius that Epaphroditus was worn out (ii. 30). Messages and letters passed between the Apostle and distant Churches; and doubtless Churches near to Rome, and both members of the Church and inquirers into the new faith at Rome addressed themselves to the Apostle, and to those who were known to be in constant personal communication with him. And thus in his bondage he was a cause of the advancement of the Gospel. From his prison, as from a centre, light streamed into Caesar's household and far beyond (iv. 22, i. 12-19).

8. *Characteristic features of the Epistle.*—Strangely full of joy and thanksgiving amidst adversity, like the Apostle's midnight hymn from the depth of his Philippian dungeon, this Epistle went forth from his prison at Rome. In most other epistles he writes with a sustained effort to instruct, or with sorrow, or with indignation; he is striving to supply imperfect, or to correct erroneous teaching, to put down scandalous iniquity, or to heal schism in the Church which he addresses. But in this Epistle, though he knew the Philippians intimately, and was not blind to the faults and tendencies to fault of some of them, yet he mentions no evil so characteristic of the whole Church as to call for general censure on his part, or amendment on theirs. Of all his Epistles to Churches, none has so little of an official character as this. He withholds his title of "Apostle" in the inscription. We lose sight of his high authority, and of the subordinate position of the worshippers by the very side; and we are admitted to see the free action of a heart glowing with inspired Christian love, and to hear the utterance of the highest friendship addressed to equal friends conscious of a communion which is not earthly and temporal, but in Christ for eternity. Who that bears in mind the condition of St. Paul in his Roman prison, can read unmoved of his continual prayers for his distant friends, his constant sense of their fellowship with him, his joyful remembrance of their past Christian course, his confidence in their future, his tears yearning after them all in Christ, his eagerness to communicate to them his own circumstances and feelings, his carefulness to prepare them to repel any evil from within or from without which might dim the brightness of their spiritual graces? Love, at once tender and watchful, that love which "is of God," is the key-note of this Epistle; and in this Epistle only we hear no undertone of any distant feeling. Just enough, and no more, is shown of his own harassing trials to let us see how deep in his heart was the spring of that feeling, and how he was refreshed by its sweet and soothing flow.

9. *Text, translation, and commentaries.*—The Epistle to the Philippians is found in all the principal uncial manuscripts, viz. in A, B, C, D, E, F, G, I, K. In C, however, the verses preceding i. 22, and those following iii. 5, are wanting.

Our A. V. of the Epistle published in 1611, on the work of that company of King James's translators who sat at Westminster, consisting of men

<sup>4</sup> It is not easy to suppose that Polycarp was without a copy of St. Paul's Epistle. Yet it is singular that though he mentions it twice, it is almost the only Epistle of St. Paul which he does not quote. This fact may at least be regarded as additional evidence of the genuineness of Polycarp's Epistle. No forger would have been guilty of such an omission. Its authenticity was first questioned

by the Magdeburg Centuriators, and by Basil, whom Pearson answered (*Prodician Ignat.* i. 2); also by Semler and more recently by Zeiler, Schlemmer, Rume, and others; of whose criticism Ewald says, that it is greatest injustice to Polycarp that now in the present of should deny that this Epistle proceeded from him (*ibid.* i. vii. 277. ed. 1857).

persons, of whom Dr. Barlow, afterwards Bishop of Rochester, was one. It is, however, substantially the same as the translation made by some unknown person for Archbishop Parker, published in the Bishops' Bible, 1568. See Bagster's *Hexapla*, preface. A revised edition of the A. V. by Four Clergymen, is published (1861) by Parker and Bourn.

A complete list of works connected with this *Epistle* may be found in the Commentary of Rheinwald. Of Patristic commentaries, those of Chrysostom (translated in the Oxford *Library of the Fathers*, 1843), Theodoret, and Theophylact, are still extant; perhaps also that of Theodore of Mopsestia in an old Latin translation (see *Journ. of Class. and Sac. Phil.* iv. 302). Among later works may be mentioned those of Calvin, 1539; Estius, 1614; Duille, 1659 (translated by Sherman, 1843); Ridley, 1548; Airay's *Sermons*, 1618; J. Ferguson, 1656; the annotated English New Testaments of Hammond, Fell, Whitby, and Macknight; the Commentaries of Peirce, 1733; Storr, 1783 (translated in the *Edinburgh Biblical Cabinet*); Am Ende, 1798; Rheinwald, 1827; T. Passavant, 1834; St. Matthies, 1835; Van Heigel, 1838; Hölemann, 1839; Rilliet, 1841; De Wette, 1847; Meyer, 1847; Neander, 1849 (translated into English, 1851); Wiesinger, 1850 (translated into English, 1850); Kähler, 1855; Professor Eadie; Dean Ellicott, 1861, and those included in the recent editions of the Greek N. T. by Dean Alford and Canon Wordsworth. [W. T. B.]

**PHILISTIA** (פְּלִשְׁתִּים, *Pelishthim*: ἀλλόφρονας). The word thus translated (in Ps. lx. 8; lxxvii. 4; cviii. 9) is in the original identical with that elsewhere rendered PALESTINE. [See that article, p. 860b.] "Palestine" originally meant nothing but the district inhabited by the "Philistines," who are called by Josephus Παλαιστῖνοι, "Palestines." In fact the two words are the same, and the difference in their present form is but the result of gradual corruption. The form Philistia does not occur anywhere in LXX. or Vulgate. The nearest approach to it is Luther's *Philistäu*. [G.]

**PHILISTINES** (פְּלִשְׁתִּים: Φυλιστινῆς, *Allophronas*: *Philistim*). The origin of the Philistines is nowhere expressly stated in the Bible; but as the prophets describe them as "the Philistines from Caphtor" (Am. ix. 7), and "the remnant of the maritime district of Caphtor" (Jer. xlvii. 4), it is *prima facie* probable that they were the "Caphtorians" which came out of Caphtor who expelled the Avim from their territory and occupied it in their place (Deut. ii. 23), and that these again were the Caphtorians mentioned in the Mosaic genealogical table among the descendants of Mizraim (Gen. x. 14). But in establishing this conclusion certain difficulties present themselves: in the first place, it is observable that in Gen. x. 14 the Philistines are connected with the Cushim rather than the Caphtorians. It has generally been assumed that the

text has suffered a transposition, and that the parenthetical clause "out of whom came Philistines" ought to follow the words "and Caphtorim." This explanation is, however, inadmissible: for (1) there is no external evidence whatever of any variation in the text, either here or in the parallel passage in 1 Chr. i. 12; and (2) if the transposition were effected, the desired sense would not be gained; for the words rendered in the A. V. "out of whom" really mean "whence," and denote a local movement rather than a genealogical descent, so that, as applied to the Caphtorim, they would merely indicate a sojourn of the Philistines in their land, and not the identity of the two races. The clause seems to have an appropriate meaning in its present position: it looks like an interpolation into the original document with the view of explaining when and where the name Philistine was first applied to the people whose proper appellation was Caphtorim. It is an etymological as well as an historical memorandum; for it is based on the meaning of the name Philistine, viz. "emigrant," and is designed to account for the application of that name. But a second and more serious difficulty arises out of the language of the Philistines; for while the Caphtorim were Hamitic, the Philistine language is held to have been Semitic.\* It has hence been inferred that the Philistines were in reality a Semitic race, and that they derived the title of Caphtorim simply from a residence in Caphtor (Ewald, i. 331; Moers, *Phoeniz*, iii. 258), and it has been noticed in confirmation of this, that their land is termed Canaan (Zeph. ii. 5). But this is inconsistent with the express assertion of the Bible that they were Caphtorim (Deut. ii. 23), and not simply that they came from Caphtor; and the term Canaan is applied to their country, not ethnologically but etymologically, to describe the trading habits of the Philistines. The difficulty arising out of the question of language may be met by assuming either that the Caphtorim adopted the language of the conquered Avim (a not unusual circumstance where the conquered form the bulk of the population), or that they diverged from the Hamitic stock at a period when the distinctive features of Hamitism and Semitism were yet in embryo. A third objection to their Egyptian origin is raised from the application of the term "uncircumcised" to them (1 Sam. xvii. 26; 2 Sam. i. 20), whereas the Egyptians were circumcised (Herod. ii. 36). But this objection is answered by Jer. ix. 25, 26, where the same term is in some sense applied to the Egyptians, however it may be reconciled with the statement of Herodotus.

The next question that arises relates to the early movements of the Philistines. It has been very generally assumed of late years that Caphtor represents Crete, and that the Philistines migrated from that island, either directly or through Egypt, into Palestine. This hypothesis presupposes the Semitic origin of the Philistines; for we believe that there

were ἀλλόφρονας, as opposed to ἀμιόφρονας (Stark's *Gloss*, p. 67 ff.). Other derivations of the name Philistine have been proposed, as that it originated in a transposition of the word *shephelith* (פְּלִשְׁתִּים) applied to the Philistine plain; or, again, that it is connected with Pelagii, as Hitzig supposes.

\* Hitzig, in his *Urgeschichte d. Phil.*, however, maintains that the language is Indo-European, with a view to prove the Philistines to be Pelagii. He is, we believe, singular in his view.

# • פְּלִשְׁתִּים.

b The name is derived from the root פֿלִשׁ and the *loshapho* *folana*, "to migrate;" a term which is said to be still current in Abyssinia (Knobel, *Völkert.* p. 201). c Egyptian monuments it appears under the form of *philit* (Brugsch, *Hist. d'Egypte*, p. 187). The rendering of the name in the LXX., ἀλλόφρονας, "strangers," is probably in reference to the etymological meaning of the name, though it may otherwise be regarded as having originated with the Israelites, to whom the Philistines

are no traces of Hamitic settlements in Crete, and consequently the Biblical statement that Caphtorim was descended from Mizraim forms an *a priori* objection to the view. Moreover, the name Caphtor can only be identified with the Egyptian Coptos. [CAPHTOR.] But the Cretan origin of the Philistines has been deduced, not so much from the name Caphtor,<sup>4</sup> as from that of the Cherethites. This name in its Hebrew form<sup>5</sup> bears a close resemblance to Crete, and is rendered Cretans in the LXX. A further link between the two terms has been apparently discovered in the term *cdri*,<sup>6</sup> which is applied to the royal guard (2 K. xi. 4, 19), and which sounds like Carians. The latter of these arguments assumes that the Cherethites of David's guard were identical with the Cherethites of the Philistine plain, which appears in the highest degree improbable.<sup>8</sup> With regard to the former argument, the mere coincidence of the names cannot pass for much without some corroborative testimony. The Bible furnishes none, for the name occurs but thrice (1 Sam. xxx. 14; Ez. xxv. 16; Zeph. ii. 5), and apparently applies to the occupants of the southern district; the testimony of the LXX. is invalidated by the fact that it is based upon the mere sound of the word (see Zeph. ii. 6, where *cereth* is also rendered Crete); and lastly, we have to account for the introduction of the classical name of the island side by side with the Hebrew term Caphtor. A certain amount of testimony is indeed adduced in favour of a connexion between Crete and Philistia; but, with the exception of the vague rumour, recorded but not adopted by Tacitus<sup>9</sup> (*Hist.* v. 3), the evidence is confined to the town of Gaza, and even in this case is not wholly satisfactory.<sup>1</sup> The town, according to Stephanus Byzantinus (*s. v.* Γάζα), was termed Minoa, as having been founded by Minos, and this tradition may be traced back to, and was perhaps founded on, an inscription on the coins of that city, containing the letters ΜΕΙΝΩ; but these coins are of no higher date than the first century B.C., and belong to a period when Gaza had attained a decided Greek character (Joseph. *B. J.* ii. 6, §3). Again, the worship of the god Marna, and its identity with the Cretan Jove, are frequently mentioned by early writers (Movers, *Phoeniz.* i. 662); but the name is Phœnician, being the *maran*, "lord" of 1 Cor. xvi. 22, and it seems more probable that Gaza and Crete derived the worship from a common source,

<sup>4</sup> The only ground furnished by the Bible for this view is the application of the term rendered "island" to Caphtor in Jer. xlvii. 4. But this term also means *maritime district*; and "the maritime district of Caphtor" is but another term for Philistia itself.

<sup>5</sup> כִּרְתִּים.

<sup>6</sup> כְּדָרִי.

<sup>8</sup> It has been held by Ewald (i. 330) and others, that the Cherethites and Pelethites (2 Sam. xx. 23) were Cherethites and Philistines. The objections to this view are: (1) that it is highly improbable that David would select his officers from the hereditary foes of his country, particularly so immediately after he had enforced their submission; (2) that there seems no reason why an undue prominence should have been given to the Cherethites by placing that name first, and altering Philistines into Pelethites, so as to produce a peronomasia; (3) that the names subsequently applied to the same body (2 K. xi. 19) are appellatives; and (4) that the terms admit of a probable explanation from Hebrew roots.

<sup>9</sup> Among other accounts of the origin of the Jews, he gives this:—"Judæus, Creta insula protugus, novissima Libyæ insidisse:" and, as part of the same tradition,

Phœnicia. Without therefore asserting that migrations may not have taken place from Crete to Philistia, we hold that the evidence adduced to prove that they did is insufficient.

The last point to be decided in connexion with the early history of the Philistines is, the time when they settled in the land of Canaan. If we were to restrict ourselves to the statements of the Bible, we should conclude that this took place before the time of Abraham: for they are noticed in his day as a pastoral tribe in the neighbourhood of Gerar (Gen. xxi. 32, 34, xxvi. 1, 8); and this partition accords well with the statement in Deut. ii. 23, that the Avim dwelt in Hazerim, i. e. in nomadic encampments; for Gerar lay in the south country, which was just adapted to such a life. At the time of the exodus they were still in the same neighbourhood, but grown sufficiently powerful to inspire the Israelites with fear (Ex. xiii. 17, xv. 14). When the Israelites arrived, they were in full possession of the Shephelah from the "river of Egypt" (*el-Arish*) in the south, to Ekron in the north (Josh. xv. 4, 47), and had formed a confederacy of five powerful cities—Gaza, Ashdod, Ashkelon, Gath, and Ekron (Josh. xiii. 3). The interval that elapsed between Abraham and the exodus seems sufficient to allow for the alteration that took place in the position of the Philistines, and their transformation from a pastoral tribe to a settled and powerful nation. But such a view has not met with acceptance among modern critics, partly because it leaves the migrations of the Philistines wholly unconnected with any known historical event, and partly because it does not serve to explain the great increase of their power in the time of the Judges. To meet these two requirements a double migration on the part of the Philistines, or of the two branches of that nation, has been suggested. Knobel, for instance, regards the Philistines proper as a branch of the same stock as that to which the Hyksos belonged, and he discovers the name Philistine in the opprobrious name Philition, or Philitis, bestowed on the shepherd kings (Herod. ii. 128): their first entrance into Canaan from the Casluhim would thus be subsequent to the patriarchal age, and coincident with the expulsion of the Hyksos. The Cherethites he identifies with the Caphtorim who displaced the Avim; and these he regards as Cretans who did not enter Canaan before the period of the Judges. The former part of his theory is inconsistent with the

adds that the name Judæus was derived from *Idæa*, a circumstance which suggests a foundation for the story. The statement seems to have no more real weight than the reported connexion between Hierosolyma and the Solymi of Lycia. Yet it is accepted as evidence that the Philistines, whom Tacitus is supposed to describe as Jews, came from Crete.

<sup>1</sup> The resemblance between the names Apem and Caphtor (Keil, *Erkl.* ii. 236), Phalæstina and Philistia (Ewald, i. 330), is too slight to be of any weight. Added to which, those places lie in the part of Crete most remote from Palestine.

<sup>2</sup> At what period these cities were originally founded, we know not: but there are good grounds for believing that they were of Canaanitish origin, and had previously been occupied by the Avim. The name Gath is certainly Canaanitish: so most probably are Gaza, Ashdod, and Ekron. Ashkelon is doubtful; and the terminations both of this and Ekron may be Philistine. Gaza is mentioned as early as in Gen. x. 19 as a city of the Canaanites; and this as well as Ashdod and Ekron were in Joshua's day the asylum of the Canaanitish Anakim (Josh. x. 2).

actions of the Philistines in the book of Genesis; these, therefore, he regards as additions of a later date<sup>1</sup> (*Volkert*, p. 218 ff.). The view adopted by Movers is, that the Philistines were carried westward from Palestine into Lower Egypt by the stream of the Hyksos movement at a period subsequent to Abraham; from Egypt they passed to Crete, and returned to Palestine in the early period of the Judges (*Phoenix*, iii. 258). This is inconsistent with the notices in Joshua.<sup>1</sup> Ewald, in the second edition of his *Geschichte* propounds the hypothesis of a double immigration from Crete, the first of which took place in the ante-patriarchal period, as a consequence either of the Canaanitish settlement or of the Hyksos movement, the second in the time of the Judges (*Gesch.* i. 329-331). We cannot regard the above views in any other light than as speculations, built up on very slight data, and unsatisfactory, inasmuch as they fail to reconcile the statements of Scripture. For they all imply (1) that the notice of the Caphtorim in Gen. x. 14 applies to an entirely distinct tribe from the Philistines, as Ewald (i. 331, note) himself allows; (2) that either the notices in Gen. xx., xxvi., or those in Josh. xv. 45-47, or perchance both, are interpolations; and (3) that the notice in Deut. ii. 23, which certainly bears marks of high antiquity, belongs to a late date, and refers solely to the Cherethites. But, beyond these inconsistencies, there are two points which appear to militate against the theory of the second immigration in the time of the Judges: (1) that the national title of the nation always remained Philistine, whereas, according to these theories, it was the Cretan or Cherethite element which led to the great development of power in the time of the Judges; and (2) that it seems to be shown why a sea-faring race like the Cretans, coming direct from Caphtor in their ships (as Knobel, p. 224, understands "Caphtorim from Caphtor" to imply), would seek to occupy the quarters of a nomad race living in encampments, in the wilderness region of the south.<sup>2</sup> We hesitate, therefore, to endorse any of the proffered explanations, and, while we allow that the Biblical statements are remarkable for their fragmentary and parenthetical nature, we are not prepared to fill up the gaps. If those statements cannot be received as they stand, it is questionable whether any amount of criticism will supply the connecting links. One point can, we think, be satisfactorily shown, viz., that the hypothesis of a second immigration is not needed in order to account for the growth of the Philistine power. Their geographical position and their relations to neighbouring nations will account for it. Between the times of Abraham and Joshua, the Philistines had changed their quarters, and had advanced northwards into the Shephelah or plain of Philistia. This plain has been in all ages remarkable for the extreme richness of its soil; its fields of standing corn, its vineyards and olive-yards, are in-

cidentally mentioned in Scripture (Judg. x. 5), and in time of famine the land of the Philistines was the hope of Palestine (2 K. viii. 2). We should, however, fail to form a just idea of its capacities from the scanty notices in the Bible. The crops which it yielded were alone sufficient to ensure national wealth. It was also adapted to the growth of military power; for while the plain itself permitted the use of war-chariots, which were the chief arm of offence, the occasional elevations which rise out of it offered secure sites for towns and strongholds. It was, moreover, a commercial country; from its position it must have been at all times the great thoroughfare between Phœnicia and Syria in the north, and Egypt and Arabia in the south. Ashdod and Gaza were the keys of Egypt, and commanded the transit trade, and the stores of frankincense and myrrh which Alexander captured in the latter place prove it to have been a depot of Arabian produce (Plut. *Alex.* cap. 25). We have evidence in the Bible that the Philistines traded in slaves with Edom and southern Arabia (Am. i. 6; Joel iii. 3, 5), and their commercial character is indicated by the application of the name Canaan to their land (Zeph. ii. 5). They probably possessed a navy; for they had ports attached to Gaza and Ashkelon; the LXX. speaks of their ships in its version of Is. xi. 14; and they are represented as attacking the Egyptians out of ships. The Philistines had at an early period attained proficiency in the arts of peace; they were skilful as smiths (1 Sam. xiii. 20), as armourers (1 Sam. xvii. 5, 6), and as builders, if we may judge from the prolonged sieges which several of their towns sustained. Their images and the golden mice and emeralds (1 Sam. vi. 11) imply an acquaintance with the founder's and goldsmith's arts. Their wealth was abundant (Judg. xvi. 5, 18), and they appear in all respects to have been a prosperous people.

Possessed of such elements of power, the Philistines had attained in the time of the Judges an important position among eastern nations. Their history is, indeed, almost a blank; yet the few particulars preserved to us are suggestive. About B.C. 1209 we find them engaged in successful war with the Sidonians, the effect of which was so serious to the latter power that it involved the transference of the capital of Phœnicia to a more secure position on the island of Tyre (Justin, xviii. 3). About the same period, but whether before or after is uncertain, they were engaged in a naval war with Rameses III. of Egypt, in conjunction with other Mediterranean nations: in these wars they were unsuccessful (Brugsch, *Hist. d'Egypte*, p. 185, 187), but the notice of them proves their importance, and we cannot therefore be surprised that they were able to extend their authority over the Israelites, devoid as these were of internal union, and harassed by external foes. With regard to their tactics and the objects that they had in

<sup>1</sup> The sole ground for questioning the historical value of these notices is that Abimelech is not termed king of the Philistines in xx. 2, but king of Gerar. The land is, however, termed the Philistines' land. It is gratuitously assumed that the latter is a case of *prolepseis*, and that the subsequent notice of the king of the Philistines in xxvi. 1 is the work of a later writer who was misled by the *prolepseis*.

<sup>2</sup> The grounds for doubting the genuineness of Josh. xv. 45-47 are: (1) the omission of the total number of the towns; and (2) the notice of the "daughter-" or *deir* towns and "villages." The second objection

furnishes the answer to the first; for as the "daughters" are not enumerated, the totals could not possibly be given. And the "daughters" are not enumerated, because they were not actually in possession of the Israelites, and indeed were not known by name.

<sup>3</sup> The Avim probably lived in the district between Gerar and Gaza. This both accords best with the notice of their living in *hazerim*, and is also the district in which the remnant of them lingered; for in Josh. xiii. 3, 4, the words "from the south" are best connected with "the Avims," as in the Vulgate.

view in their attacks on the Israelites, we may form a fair idea from the scattered notices in the books of Judges and Samuel. The warfare was of a guerrilla character, and consisted of a series of *raids* into the enemy's country. Sometimes these extended only just over the border, with the view of plundering the threshing-floors of the agricultural produce (1 Sam. xiii. 1); but more generally they penetrated into the heart of the country and seized a commanding position on the edge of the Jordan valley, whence they could secure themselves against a combination of the trans- and cis-Jordanite divisions of the Israelites, or prevent a return of the fugitives who had hurried across the river on the alarm of their approach. Thus at one time we find them crossing the central district of Benjamin and posting themselves at Michmash (1 Sam. xiii. 16), at another time following the coast road to the plain of Esdraelon and reaching the edge of the Jordan valley by Jezreel (1 Sam. xix. 11). From such posts as their head-quarters, they sent out detached bands to plunder the surrounding country (1 Sam. xiii. 17), and, having obtained all they could, they erected a column<sup>a</sup> as a token of their supremacy (1 Sam. x. 5, xiii. 3), and retreated to their own country. This system of incursions kept the Israelites in a state of perpetual disquietude: all commerce was suspended, from the insecurity of the roads (Judg. v. 6); and at the approach of the foe the people either betook themselves to the natural hiding-places of the country, or fled across the Jordan (1 Sam. xiii. 6, 7). By degrees the ascendancy became complete, and a virtual disarmament of the population was effected by the suppression of the smiths (1 Sam. xiii. 19). The profits of the Philistines were not confined to the goods and chattels they carried off with them. They seized the persons of the Israelites and sold them for slaves; the earliest notice of this occurs in 1 Sam. xiv. 21, where, according to the probably correct reading<sup>b</sup> followed by the LXX., we find that there were numerous slaves in the camp at Michmash: at a later period the prophets inveigh against them for their traffic in human flesh (Joel iii. 6; Am. i. 6): at a still later period we hear that "the merchants of the country" followed the army of Gorgias into Judaea for the purpose of buying the children of Israel for slaves (1 Macc. iii. 41), and that these merchants were Philistines is a fair inference from the subsequent notice that Nicanor sold the captive Jews to the "cities upon the sea coast" (2 Macc. viii. 11). There can be little doubt, too, that tribute was exacted from the Israelites, but the notices of it are confined to passages of questionable authority, such as the rendering of 1 Sam. xiii. 21 in the LXX., which represents

<sup>a</sup> The Hebrew term *metrib*, which implies this practice, is rendered "garrison" in the A. V., which neither agrees with the context nor gives a true idea of the Philistine tactics. Stark, however, dissents from this view, and explains the term of military officers (*Gaza*, p. 164).

<sup>b</sup> עֲבָרִים, and not עֲבָרִים.

<sup>c</sup> The true text may have been הַמִּצְדֹּת, instead of הַמִּצְדֹּת.

<sup>d</sup> The apparent discrepancy between Judg. i. 18, iii. 3, has led to suspicions as to the text of the former, which are strengthened by the rendering in the LXX., καὶ οὐκ ἀναπαύσαντες, presupposing in the Hebrew the reading לָכֵן לֹא יָלְכָד. The testimony of the LXX is weakened by the circumstances (1) that it inter-

polates a notice of Ashdod and its suburbs (supra), a peculiar term in lieu of the *ἄσπας* applied to the three other towns; and (2) that the term ἀναπαύσαντες is given as the equivalent for לָכֵן, which occurs in no other instance. Of the two, therefore, the Greek text is more open to suspicion. Stark (*Gaza*, p. 126) regards the passage as an interpolation.

A brief notice occurs in Judg. x. 7 of invasions by the Philistines and Ammonites, followed by particulars which apply exclusively to the latter people. It has been hence supposed that the brief reference to the Philistines is in anticipation of Samson's history. In Herwig's *Real-lexikon* (s. v. "Philister") it is rather unnecessarily assumed that the text is imperfect, and that the words "that year" refer to the Philistines, and the "c. 40 years" to the Ammonites.

the Philistines as making a charge of three shekels a tool for sharpening them; and again the expression "Mecheh-ammah" in 2 Sam. viii. 1, which is rendered in the Vulg. *frenum tributi*, and by Symmachus *τῆς δευτέρου τοῦ φόρου*. In each of the passages quoted, the versions presuppose a *port* which yields a better sense than the existing one.

And now to recur to the Biblical narrative:—The territory of the Philistines, having been once occupied by the Canaanites, formed a portion of the promised land, and was assigned to the tribe of Judah (Josh. xv. 2, 12, 45-47). No portion, however, of it was conquered in the lifetime of Joshua (Josh. xiii. 2), and even after his death no permanent conquest was effected (Judg. iii. 3, though, on the authority of a somewhat doubtful passage,<sup>a</sup> we are informed that the three cities of Gaza, Ashkelon, and Ekron were taken (Judg. i. 18). The Philistines, at all events, soon recovered these, and commenced an aggressive policy against the Israelites, by which they gained a complete ascendancy over them. We are unable to say at what intervals their incursions took place, as nothing is recorded of them in the early period of the Judges. But they must have been frequent, inasmuch as the national spirit of the Israelites was so entirely broken that they even reprobated any attempt at deliverance (Judg. xv. 12). Individual heroes were raised up from time to time whose achievements might well kindle patriotism, such as Shamgar the son of Anath (Judg. iii. 31), and still more Samson (Judg. xiii.-xvi.): but neither of these men succeeded in permanently throwing off the yoke.<sup>b</sup> Of the former only a single daring feat is recorded, the effect of which appears, from Judg. v. 6, 7, to have been very shortlived. The true series of deliverances commenced with the latter, of whom it was predicted that "he shall begin to deliver" (Judg. xiii. 5), and were carried on by Samuel, Saul, and David. The history of Samson furnishes us with some idea of the relations which existed between the two nations. As a "borderer" of the tribe of Dan, he was thrown into frequent contact with the Philistines, whose supremacy was so established that no bar appears to have been placed to free intercourse with their country. His early life was spent on the verge of the Shepherd between Zorah and Eshtaol, but when his actions had aroused the active hostility of the Philistines he withdrew into the central district and found a secure post on the rock of Etam, to the S.W. of Bethlehem. Thither the Philistines followed him without opposition from the inhabitants. His achievements belong to his personal history: it is clear that they were the isolated acts of an individual, and altogether unconnected with any na-

polates a notice of Ashdod and its suburbs (supra), a peculiar term in lieu of the *ἄσπας* applied to the three other towns; and (2) that the term ἀναπαύσαντες is given as the equivalent for לָכֵן, which occurs in no other instance. Of the two, therefore, the Greek text is more open to suspicion. Stark (*Gaza*, p. 126) regards the passage as an interpolation.

A brief notice occurs in Judg. x. 7 of invasions by the Philistines and Ammonites, followed by particulars which apply exclusively to the latter people. It has been hence supposed that the brief reference to the Philistines is in anticipation of Samson's history. In Herwig's *Real-lexikon* (s. v. "Philister") it is rather unnecessarily assumed that the text is imperfect, and that the words "that year" refer to the Philistines, and the "c. 40 years" to the Ammonites.

al movement; for the revenge of the Philistines throughout directed against Samson personally. If there was an organised but unsuccessful resistance to the encroachments of the Philistines, they had penetrated into the central district and met at Aphek (1 Sam. iv. 1). The production of the ark on this occasion demonstrates the stress of the emergency, and its loss marked the depth of Israel's degradation. The next action: place under Samuel's leadership, and the tide of success turned in Israel's favour: the Philistines again penetrated into the mountainous country: Jerusalem: at Mizpeh they met the cowed of the Israelites, who, encouraged by the signs of Divine favour, and availing themselves of the ice produced by a thunderstorm, inflicted on them a total defeat. For the first time, the Israelites had their pillar or "stel" at Eben-ezer as the sign of victory. The results were the recovery of the border towns and their territories "from even unto Gath," i. e. in the northern district. The success of Israel may be partly attributed to their peaceful relations at this time with the Amorites (1 Sam. vii. 9-14). The Israelites attributed their past weakness to their want of unity, and they desired a king, with the special object of leading them against the foe (1 Sam. viii.). It is a significant fact that Saul first felt irritation in the presence of a pillar (A. V. "gar-a") erected by the Philistines in commemoration of victory (1 Sam. x. 5, 10). As soon as he was prepared to throw off the yoke, he occupied with army a position at Michmash, commanding the pass leading to the Jordan valley, and his heroic son Jonathan gave the signal for a rising by throwing the pillar which the Philistines had set there. The challenge was accepted; the Philistines invaded the central district with an immense force, and, having dislodged Saul from Mizpah, occupied it themselves, and sent forth victory bands into the surrounding country. The Israelites shortly after took up a position on the other side of the ravine at Gath, and, availing themselves of the confusion consequent upon Jonathan's daring feat, inflicted a tremendous slaughter on the enemy (1 Sam. xiii. xiv.). No attempt made by the Philistines to regain their supremacy for about twenty-five years, and the scene of next contest shows the altered strength of the parties: it was no longer in the central country, in a ravine leading down to the Philistine plain, valley of Elah, the position of which is about miles S.W. of Jerusalem: on this occasion the success of young David secured success to Israel, the foe was pursued to the gates of Gath and on (1 Sam. xvii.). The power of the Philistines, however, still intact on their own territory, proved by the flight of David to the court of Achish (1 Sam. xxi. 10-15), and his subsequent abode

at Ziklag (1 Sam. xxvii.), where he was secured from the attacks of Saul. The border warfare was continued; captures and reprisals, such as are described as occurring at Keilah (1 Sam. xxiii. 1-5), being probably frequent. The scene of the next conflict was far to the north, in the valley of Esdraelon, whither the Philistines may have made a plundering incursion similar to that of the Midianites in the days of Gideon. The battle on this occasion proved disastrous to the Israelites: Saul himself perished, and the Philistines penetrated across the Jordan, and occupied the forsaken cities (1 Sam. xxxi. 1-7). The dimensions which followed the death of Saul were naturally favourable to the Philistines: and no sooner were these brought to a close by the appointment of David to be king over the united tribes, than the Philistines attempted to counterbalance the advantage by an attack on the person of the king: they therefore penetrated into the valley of Rephaim, S.W. of Jerusalem, and even pushed forward an advanced post as far as Bethlehem (1 Chr. x. 16). David twice attacked them at the former spot, and on each occasion with signal success, in the first case capturing their images, in the second pursuing them "from Gath until thou come to Gazer" (2 Sam. v. 17-25; 1 Chr. xiv. 8-16).

Henceforth the Israelites appear as the aggressors: about seven years after the defeat at Rephaim, David, who had now consolidated his power, attacked them on their own soil, and took Gath with its dependencies (1 Chr. xviii. 1), and thus (according to one interpretation of the obscure expression "Metheg-ammah" in 2 Sam. viii. 1) "he took the arm-buckle out of the hand of the Philistines" (Bertheau, *Comm.* on 1 Chron.), or (according to another) "he took the bridle of the metropolis out of the hand of the Philistines" (Gesen. *Thes.* p. 113)—meaning in either case that their ascendancy was utterly broken. This indeed was the case: for the minor engagements in David's lifetime probably all took place within the borders of Philistia: Gath, which is given as the scene of the second and third combats, being probably identical with Gath, where the fourth took place (2 Sam. xxi. 15-22; comp. LXX., some of the copies of which read Γάθ instead of Γάβ). The whole of Philistia was included in Solomon's empire, the extent of which is described as being "from the river unto the land of the Philistines, unto the border of Egypt" (1 K. iv. 21; 2 Chr. ix. 26), and again "from Tiphshah even unto Gaza" (1 K. iv. 24; A. V. "Azzah"). The several towns probably remained under their former governors, as in the case of Gath (1 K. ii. 39), and the sovereignty of Solomon was acknowledged by the payment of tribute (1 K. iv. 21). There are indications, however, that his hold on the Philistine country was by no means established: for we find him securing the passes that led up

The text states the force at 30,000 chariots and 6000 men (1 Sam. xiii. 5): these numbers are, however, out of proportion. The chariots were probably 1000, present reading being a mistake of a copyist who read the final  $\zeta$  of Israel, and thus converted the number 30,000.

There is some difficulty in reconciling the geographical statements in the narrative of this campaign. Most of the "Geba" of Samuel, we have "Gibeah" in Judges. The latter lies N.W. of Jerusalem; and there is a Geba in the same neighbourhood, lying more to the E. in the valley of Rephaim is placed S.W. of Jerusalem, neither of these places. Thienius (on 2 Sam. v. 18)

transplants the valley to the N.W. of Jerusalem; while Bertheau (on 1 Chr. xiv. 16) identifies Geba with the Gibeath of Josh. xv. 57, and the Jebel noticed by Robinson (il. 6, 16) as lying W. of Bethlehem. Neither of these explanations can be accepted. We must assume that the direct retreat from the valley to the plain was cut off, and that the Philistines were compelled to flee northwards, and regained the plain by the pass of Bethoron, which lay between Gibeah (as well as between Geba) and Gazer.

The Hebrew text, as it at present stands, in 1 K. iv. 21, will not bear the sense here put upon it; but a comparison with the parallel passage in 2 Chr. shows that the word  $\text{גִּבְעָה}$  has dropped out before the "land of the E."

from the plain to the central district by the fortification of Gezer and Bethoron (1 K. ix. 17), while no mention is made either of Gaza or Ashdod, which fully commanded the coast-road. Indeed the expedition of Pharaoh against Gezer, which stood at the head of the Philistine plain, and which was quite independent of Solomon until the time of his marriage with Pharaoh's daughter, would lead to the inference that Egyptian influence was paramount in Philistia at this period (1 K. ix. 16). The division of the empire at Solomon's death was favourable to the Philistine cause: Rehoboam secured himself against them by fortifying Gath and other cities bordering on the plain (2 Chr. xi. 8): the Israelite monarchs were either not so prudent or not so powerful, for they allowed the Philistines to get hold of Gibeon, commanding one of the defiles leading up from the plain of Sharon to Samaria, the recovery of which involved them in a protracted struggle in the reigns of Nadab and Zimri (1 K. xv. 27, xvi. 15). Judah meanwhile had lost the tribute; for it is recorded, as an occurrence that marked Jehoshaphat's success, that "some of the Philistines brought presents" (2 Chr. xvii. 11). But this subjection was of brief duration: in the reign of his son Jehoram they avenged themselves by invading Judah in conjunction with the Arabians, and sacking the royal palace (2 Chr. xxi. 16, 17). The increasing weakness of the Jewish monarchy under the attacks of Hazael led to the recovery of Gath, which had been captured by that monarch in his advance on Jerusalem from the western plain in the reign of Jehoash (2 K. xii. 17), and was probably occupied by the Philistines after his departure as an advanced post against Judah. At all events it was in their hands in the time of Uzziah, who dismantled (2 Chr. xxvi. 6) and probably destroyed it: for it is adduced by Amos as an example of Divine vengeance (Am. vi. 2), and then disappears from history. Uzziah at the same time dismantled Jabneh (Jamnia) in the northern part of the plain, and Ashdod, and further erected forts in different parts of the country to intimidate the inhabitants (2 Chr. xxvi. 6). The prophecies of Joel and Amos prove that these measures were provoked by the aggressions of the Philistines, who appear to have formed leagues both with the Edomites and Phoenicians, and had reduced many of the Jews to slavery (Joel iii. 4-6; Am. i. 6-10). How far the means adopted by Uzziah were effectual we are not informed; but we have reason to suppose that the Philistines were kept in subjection until the time of Ahaz, when, relying upon the difficulties produced by the Syrian attacks, they attacked the border-cities in the Shephelah, and "the south" of Judah (2 Chr. xxviii. 18). Isaiah's declarations (xiv. 29-32) throw light upon the events subsequent to this: from them we learn that the Assyrians, whom Ahaz summoned to his aid, proved themselves to be the "cockatrice that should come out of the serpent's (Judah's) root," by ravaging the Philistine plain. A few years later the Philistines, in conjunction with the Syrians and Assyrians ("the adversaries of Rezin"), and perhaps as the subject-allies of the latter, carried on a series of attacks on the kingdom of Israel (Is. ix. 11, 12).

\* The passage in Zech. ix. 5-7 refers, in the opinion of those who assign an earlier date to the concluding chapters of the book, to the successful campaign of Uzziah. Internal evidence is in favour of this view. The alliance with Tyre is described as "the expectation" of Ekron: *Yezai* was to lose her king, i. e. her independence: Ash-

Hezekiah's reign inaugurated a new policy, in which the Philistines were deeply interested: that monarch formed an alliance with the Egyptians, as a counterpoise to the Assyrians, and the possession of Philistia became henceforth the turning-point of the struggle between the two great empires of the East. Hezekiah, in the early part of his reign, re-established his authority over the whole of it, "even unto Gaza" (2 K. xviii. 8). This movement was evidently connected with his rebellion against the king of Assyria, and was undertaken in conjunction with the Egyptians; for we find the latter people shortly after in possession of the five Philistine cities, to which alone we are able to refer the prediction in Is. xix. 18, when coupled with the fact that both Gaza and Ashkelon are termed Egyptian cities in the annals of Sargon (Bunsen's *Egypt*, iv. 603). The Assyrians under Tartan, the general of Sargon, made an expedition against Egypt, and took Ashdod, as the key of that country (Is. xx. 1, 4, 5). Under Sennacherib Philistia was again the scene of important operations: in his first campaign against Egypt Ashkelon was taken and its dependencies were plundered; Ashdod, Ekron, and Gaza submitted, and received as a reward a portion of Hezekiah's territory (Rawlinson, i. 477); in his second campaign other towns on the verge of the plain, such as Libnah and Lachish, were also taken (2 K. xviii. 14, xix. 8). The Assyrian supremacy, though shaken by the failure of this second expedition, was restored by Esar-haddon, who claims to have conquered Egypt (Rawlinson, i. 481); and it is probable that the Assyrians retained their hold on Ashdod until its capture, after a long siege, by the Egyptian monarch Psammetichus (Herod. ii. 157), the effect of which was to reduce the population of that important place to a mere "remnant" (Jer. xiv. 20). It was about this time, and possibly while Psammetichus was engaged in the siege of Ashdod, that Philistia was traversed by a vast Scythian horde on their way to Egypt: they were, however, diverted from their purpose by the king, and retraced their steps, plundering on their retreat the rich temple of Veas at Ashkelon (Herod. i. 105). The description of Zephaniah (ii. 4-7), who was contemporary with this event, may well apply to this terrible scourge, though more generally referred to a Chaldean invasion. The Egyptian ascendancy was not as yet re-established, for we find the next king, Neco, compelled to besiege Gaza (the *Cadytis* of Herodotus, ii. 159) on his return from the battle of Megiddo. After the death of Neco, the contest was renewed between the Egyptians and the Chaldeans under Nebuchadnezzar, and the result was specially disastrous to the Philistines: Gaza was again taken by the former, and the population of the whole plain was reduced to a mere "remnant" by the invading armies (Jer. xlvii.). The "old hatred" that the Philistines bore to the Jews was exhibited in acts of hostility at the time of the Babylonish captivity (Ex. xxv. 15-17): but on the return this was somewhat abated, for some of the Jews married Philistine women, to the great scandal of their rulers (Neh. xiii. 23, 24). From this time the history of Philistia is absorbed in the struggles of the neighbouring kingdoms. In B.C. 332, Ashkelon should be depopulated: a "bastard," i. e. one who was excluded from the congregation of Israel on the score of impure blood, should dwell in Ashdod, holding 'Yus dependency of Judah: and Ekron should become "a Jebusite," subject to Judah.

the Great traversed it on his way to Egypt, captured Gaza, then held by the Persians under , after a two months' siege. In 312 the armies metrius Poliorcetes and Ptolemy fought in the neighbourhood of Gaza. In 198 Antiochus the , in his war against Ptolemy Epiphanes, in Philistia and took Gaza. In 166 the Philistines joined the Syrian army under Gorgias in its on Judaea (1 Macc. iii. 41). In 148 the ents of the rival kings Demetrius II. and under Balas, under Apollonius and Jonathan tively, contended in the Philistine plain: han took Ashdod, triumphantly entered Ashkelon, and received Ekron as his reward (1 Macc. -89). A few years later Jonathan again ded into the plain in the interests of Antiochus and captured Gaza (1 Macc. xi. 60-62). No er notice of the country occurs until the cap- of Gaza in 97 by the Jewish king Alexander us in his contest with Lathyrus (Joseph. xiii. 13, §3; *B. J.* i. 4, §2). In 63 Pompey ed Philistia to the province of Syria (*Ant.* xiv. ), with the exception of Gaza, which was as- to Herod (xv. 7, §3), together with Jamnia, d, and Ashkelon, as appears from xvii. 11. The three last fell to Salome after Herod's , but Gaza was re-annexed to Syria (xvii. 11. ). The latest notices of the Philistines as a , under their title of ἀλλόφυλοι, occur in c. iii.-v. The extension of the name from istrict occupied by them to the whole country, the familiar form of PALESTINE, has already oticed under that head.

th regard to the institutions of the Philistines nformation is very scanty. The five chief had, as early as the days of Joshua, consti- themselves into a confederacy, restricted, ver, in all probability, to matters of offence. Each was under the government of a , whose official title was *seren* (Josh. xiii. 3; iii. 3 &c.), and occasionally *adr* (1 Sam. 30, xxix. 6). Gaza may be regarded as hav- exercised an hegemony over the others, for in sts of the towns it is mentioned the first . xiii. 3; Am. i. 7, 8), except where there especial ground for giving prominence to er, as in the case of Ashdod (1 Sam. vi. 17). always stands last, while Ashdod, Ashkelon, and Gath interchange places. Each town ad its own territory, as instanced in the of Gath (1 Chr. xviii. 1), Ashdod (1 Sam. and others, and each possessed its dependent or "daughters" (Josh. xv. 45-47; 1 Chr. 1; 2 Sam. i. 20; Ex. xvi. 27, 57), and its (Josh. i. c.). In later times Gaza had a of five hundred (Joseph. *Ant.* xiii. 13, §3). Philistines appear to have been deeply imbued superstition: they carried their idols with on their campaigns (2 Sam. v. 21), and pro- their victories in their presence (1 Sam. ii). They also carried about their persons of some kind that had been presented before als (2 Macc. xii. 40). The gods whom they worshipped were Dagon, who possessed us both at Gaza (Judg. xvi. 23) and at Ashdod . v. 3-5; 1 Chr. x. 10; 1 Macc. x. 83); eth, whose temple at Ashkelon was far-famed m. xxii. 10; Herod. i. 105; Baal-zebub,

Two derivations have been proposed for this : by Ewald (l. 332), אֲשֶׁל, "axle," by Ge- (Thes. p. 973) and Kell in Josh. xiii. 3, the

whose fane at Ekron was consulted by Asa (2 K. i. 2-6); and Derceto, who was honoured at Ashkelon (Diod. Sic. ii. 4), though unnoticed in the Bible. Priests and diviners (1 Sam. vi. 2) were attached to the various seats of worship. (The special authorities for the history of the Philistines are Stark's *Gaza*; Knobel's *Völkertafel*; Movers' *Phoenizien*; and Hitzig's *Urgeschichte*.) [W. L. B.]

**PHILOLOGUS** (Φιλόλογος; *Philologus*). A Christian at Rome to whom St. Paul sends his salutation (Rom. xvi. 15). Origen conjectures that he was the master of a Christian household which included the other persons named with him. Pseudo-Hippolytus (*De I. XX. Apostolis*) makes him one of the 70 disciples, and bishop of Sinope. His name is found in the Columbarium "of the freedmen of Livia Augusta" at Rome; which shows that there was a Philologus connected with the imperial household at the time when it included many Julias. [W. T. B.]

**PHILOSOPHY.** It is the object of the following article to give some account (I.) of that development of thought among the Jews which answered to the philosophy of the West; (II.) of the recognition of the preparatory (propædæutic) office of Greek philosophy in relation to Christianity; (III.) of the systematic progress of Greek philosophy as forming a complete whole; and (IV.) of the contact of Christianity with philosophy. The limits of the article necessarily exclude everything but broad statements. Many points of great interest must be passed over unnoticed; and in a fuller treatment there would be need of continual exceptions and explanations of detail, which would only create confusion in an outline. The history of ancient philosophy in its religious aspect has been strangely neglected. Nothing, as far as we are aware, has been written on the pre-Christian era answering to the clear and elegant essay of Matter on post-Christian philosophy (*Histoire de la Philosophie dans ses rapports avec la Religion depuis l'ère Chrétienne*, Paris, 1854). There are useful hints in Carové's *Vorhalle des Christenthums* (Jena, 1851), and Ackermann's *Das Christliche im Plato* (Hamb. 1835). The treatise of Denis, *Histoire des Théories et des Idées morales dans l'Antiquité* (Paris, 1856), is limited in range and hardly satisfactory. Döllinger's *Vorhalle zur Gesch. d. Christenthums* (Regensburg, 1857) is comprehensive, but covers too large a field. The brief survey in De Pressensac's *Hist. des trois premiers Siècles de l'Eglise Chrétienne* (Paris, 1858) is much more vigorous, and on the whole just. But no one seems to have apprehended the real character and growth of Greek philosophy so well as Zeller (though with no special attention to its relations to religion) in his history (*Die Philosophie der Griechen*, 2te Aufl. Tüb. 1856), which for subtlety and completeness is unrivalled.

#### I. THE PHILOSOPHIC DISCIPLINE OF THE JEWS.

Philosophy, if we limit the word strictly to describe the free pursuit of knowledge of which truth is the one complete end, is essentially of Western growth. In the East the search after wisdom has always been connected with practice: it has remained there, what it was in Greece at first, a part of religion. The history of the Jews offers no exception to this remark: there is no Jewish philo-

latter being supported by the analogy of an Arabic expression.

sophy properly so called. Yet on the other hand speculation and action meet in truth; and perhaps the most obvious lesson of the Old Testament lies in the gradual construction of a divine philosophy by fact, and not by speculation. The method of Greece was to proceed from life to God; the method of Israel (so to speak) was to proceed from God to life. The axioms of one system are the conclusions of the other. The one led to the successive abandonment of the noblest domains of science which man had claimed originally as his own, till it left bare systems of morality; the other, in the fulness of time, prepared many to welcome the Christ—the Truth.

From what has been said, it follows that the philosophy of the Jews, using the word in a large sense, is to be sought for rather in the progress of the national life than in special books. These, indeed, furnish important illustrations of the growth of speculation, but the history is written more in acts than in thoughts. Step by step the idea of the family was raised into that of the people; and the kingdom furnished the basis of those wider promises which included all nations in one kingdom of heaven. The social, the political, the cosmotheological relations of man were traced out gradually in relation to God.

The philosophy of the Jews is thus essentially a moral philosophy, resting on a definite connexion with God. The doctrines of Creation and Providence, of an Infinite Divine Person and of a responsible human will, which elsewhere form the ultimate limits of speculation, are here assumed at the outset. The difficulties which they involve are but rarely noticed. Even when they are canvassed most deeply, a moral answer drawn from the great duties of life is that in which the questioner finds repose. The earlier chapters of Genesis contain an introduction to the direct training of the people which follows. Premature and partial developments, kingdoms based on godless might, stand in contrast with the slow foundation of the divine polity. To distinguish rightly the moral principles which were successively called out in this latter work, would be to write a history of Israel; but the philosophical significance of the great crises through which the people passed, lies upon the surface. The call of Abraham set forth at once the central lesson of faith in the Unseen, on which all others were raised. The father of the nation was first isolated from all natural ties before he received the promise: his heir was the son of his extreme age; his inheritance was to him "as a strange land." The history of the patriarchs brought out into yet clearer light the sovereignty of God: the younger was preferred before the elder; suffering prepared the way for safety and triumph. God was seen to make a covenant with man, and his action was written in the records of a chosen family. A new era followed. A nation grew up in the presence of Egyptian culture. Persecution united elements which seem otherwise to have been on the point of being absorbed by foreign powers. God revealed Himself now to the people in the wider relations of Lawgiver and Judge. The solitary discipline of the desert familiarized them with His majesty and His mercy. The wisdom of Egypt was hallowed to new uses. The promised land was gained by the open working of a divine Sovereign. The outlines of national faith were written in defeat and victory; and the work of the theocracy closed. Human passion then claimed a dominant influence. The people required a king. A fixed Temple was substituted for the shifting Tabernacle. Times of disruption and disaster fol-

lowed; and the voice of prophets declared the spiritual meaning of the kingdom. In the midst of sorrow and defeat and desolation, the horizon of hope was extended. The kingdom which waited prematurely founded was seen to be the image of a nobler "kingdom of God." The nation, bound in connexion with "all the kindred of the earth." The Captivity confirmed the lesson, and after it the Dispersion. The moral effects of these, and the influence which Persian, Greek, and Roman, the ideators of all the wisdom of the East and West exercised upon the Jews, have been elsewhere noticed. [CYRUS; DISPERSION.] The dense discipline closed before the special human discipline began. The personal relations of God to the individual, the family, the nation, mankind, were established in ineffaceable history, and their other truth were brought into harmony with these in the long period of silence which separates the two Testaments. But the harmony was not always perfect. Two partial forms of religious philosophy rose. On the one side the predominance of the Jewish element gave rise to the Kabbala; on the other to the predominance of the Greek element issued in the Alexandrine theosophy.

Before these one-sided developments of the truth were made, the fundamental ideas of the Jewish government found expression in words of wide life. The Psalms, which, among the wide infinite lessons which they convey, give a deep insight into the need of a personal apprehension of truth, everywhere declare the absolute sovereignty of God over the material and moral worlds. The devout scholar cannot fail to be struck with the frequency of natural imagery, and with the close contact which is assumed to exist between man and God as parts of one vast Order. The control of divine elements by One All-wise Governor, standing in a clear contrast with the destination of isolated spirits, is no less essentially characteristic of Hebrew thought distinguished from Greek thought. In the roll of action Providence stands over against the universal kingdom against the individual will, the true and the right against the beautiful. In speculation may find little scope, but spiritual guidance by these great laws will seem more to fit most deeply the intellectual culture of those who compare especially Ps. viii., lxxviii., lxxviii., lxxxix., xcvi., xcvi., xcvi., xcvi., xcvi., etc. It will be seen that the same character is found in Psalms of every date. This late and very remarkable development in the philosophy of Nature see the article *JOHN OF LYON* [vol. i. 556]; Dillmann, *Das B. Hebr.*, etc.

One man above all is distinguished among the Jews as "the wise man." The description given of his writings serves as a commentary of the national view of philosophy. "And his wisdom excelled the wisdom of all the sages of the east country and all the wisdom of Egypt. And he spake three thousand parables, all his songs were a thousand and five, and he wrote trees, from the cedar that is in Lebanon even to the hyssop that springeth out of the wall; he wrote also of beasts, and of fowl, and of creeping things, and of fishes." (1 K. iv. 32-33). The lesson of practical duty, the full utterance of "the word of the Lord" (Ibid. 29), the careful study of God's command, this is the sum of wisdom. Yet a higher practical aim of this philosophy leads to the recognition of the most sublime truth. Wisdom was gradually felt to be a Person, thrust by God at

holding converse with men (Prov. viii.). She was seen to stand in open enmity with "the strange woman," who sought to draw them aside by sensuous attractions; and thus a new step was made towards the central doctrine of Christianity—the Incarnation of the Word.

Two books of the Bible, Job and Ecclesiastes, of which the latter at any rate belongs to the period of the close of the kingdom, approach more nearly than any others to the type of philosophical discussions. But in both the problem is moral and not metaphysical. The one deals with the evils which afflict "the perfect and upright;" the other with the vanity of all the pursuits and pleasures of earth. In the one we are led for an answer to a vision of "the enemy" to whom a partial and temporary power over man is conceded (Job i. 6-12); in the other to that great future when "God shall bring every work to judgment" (Ecc. xii. 14). The method of inquiry is in both cases abrupt and irregular. One clue after another is followed out, and at length abandoned; and the final solution is obtained, not by a consecutive process of reason, but by an authoritative utterance, which faith welcomes as the truth, towards which all partial efforts had tended. (Compare Maurice, *Moral and Metaphysical Philosophy*, first edition.)

The Captivity necessarily exercised a profound influence upon Jewish thought. [Comp. CYRUS, vol. i. p. 380.] The teaching of Persia seems to have been designed to supply important elements in the education of the chosen people. But it did yet more than this. The imagery of Ezekiel (chap. i.), gave an apparent sanction to a new form of mystical speculation. It is uncertain at what date this earliest *Kabbala* (i. e. Tradition) received a definite form; but there can be no doubt that the two great divisions of which it is composed, "the chariot" (*Merkabah*, Ex. i.) and "the Creation" (*Bereshith*, Gen. i.), found a wide development before the Christian era. The first dealt with the manifestation of God in Himself; the second with His manifestation in Nature; and as the doctrine was handed down orally, it received naturally, both from its extent and form, great additions from foreign sources. On the one side it was open to the Persian doctrine of emanation, on the other to the Christian doctrine of the Incarnation; and the tradition was deeply impressed by both before it was first committed to writing in the seventh or eighth century.

At present the original sources for the teaching of the Kabbala are the *Sepher Yetzirah*, or Book of Creation, and the *Sepher Hazzohar*, or Book of Splendour. The former of these dates in its present form from the eighth, and the latter from the thirteenth century (Zunz, *Gott. Anz. vortr. d. Juden*, 1851; Jellinek, *Moses ben Schemot de Leon*, 1851). Both are based upon a system of ideas. In the Book of Creation the *Chaldean* ideas are given in their simplest form, and some points of comparison with the system of Pythagoreans. The book begins with an enumeration of the thirty-two ways of wisdom seen in the creation of the world; and the analysis of this is supposed to contain the key to the mystery of Nature. The primary division is into 22. The number 10 represents the ten *Sephiroth* (figures), which answer to the ideal world; 22, on the other hand, the number of the Hebrew alphabets to the world of objects; the object being the idea as a word, formed of letters, to a number. Twenty-two again is equal to 3 + 7 + 12;

and each of these numbers, which constantly recurs in the O. T. Scriptures, is invested with a peculiar meaning. Generally the fundamental conceptions of the book may be thus represented. The ultimate Being is Divine Wisdom (*Chochmah*, σοφία). The universe is originally a harmonious thought of Wisdom (Number, *Sephirah*); and the thoughts is afterwards expressed in letters, which form, as words, the germ of things. Man, with his twofold nature, thus represents in some sense the whole universe. He is the Microcosm, in which the body clothes and veils the soul, as the phenomenal world veils the spirit of God. It is impossible to follow out here the details of this system, and its development in Zohar; but it is obvious how great an influence it must have exercised on the interpretation of Scripture. The calculation of the numerical worth of words (comp. Rev. xiii. 18; *Gematria*, Buxtorf, *Lex. Rabb.* 446), the resolution of words into initial letters of new words (*Notaricon*, Buxtorf, 1339), and the transposition or interchange of letters (*Temurah*), were used to obtain the inner meaning of the text; and these practices have continued to affect modern exegesis (Lutierbeck, *Neutest. Lehrbegriff*, i. 223-254; Reuss, *Kabbala*, in Herzog's *Encyclop.*; Joel, *Die Relig.-Phil. d. Zohar*, 1849; Jellinek, as above; Westcott, *Introduct. to Gospels*, 131-134; Franck, *La Kabbale*, 1843 OLD TESTAMENT, B §1).

The contact of the Jews with Persia thus gave rise to a traditional mysticism. Their contact with Greece was marked by the rise of distinct sects. In the third century B.C. the great doctor Antigonus of Socho bears a Greek name, and popular belief pointed to him as the teacher of Sadoc and Boethus, the supposed founders of Jewish rationalism. At any rate, we may date from this time the twofold division of Jewish speculation which corresponds to the chief tendencies of practical philosophy. The Sadducees appear as the supporters of human freedom in its widest scope; the Pharisees of a religious Stoicism. At a later time the cycle of doctrine was completed, when by a natural reaction the Essenes established a mystic Asceticism. The characteristics of these sects are noticed elsewhere. It is enough now to point out the position which they occupy in the history of Judaism (comp. *Introduct. to Gospels*, pp. 60-66). At a later period the FOURTH BOOK OF MACCAREES (q. v.) is a very interesting example of Jewish moral (Stoic) teaching.

The conception of wisdom which appears in the Book of Proverbs was elaborated with greater detail afterwards [WISDOM OF SALOMON], both in Palestine [ECCLESIASTICUS] and in Egypt; but the doctrine of the Word is of greater speculative interest. Both doctrines, indeed, sprang from the same cause, and indicate the desire to find some mediating power between God and the world, and to remove the direct appearance and action of God from a material sphere. The personification of Wisdom represents only a secondary power in relation to God; the Logos, in the double sense of Reason (*Logos noûs*) and Word (*Logos phrasion*), both in relation to God and in relation to the universe. The first use of the term Word (*Memra*), based upon the common formula of the prophets, is in the Targum of Onkelos (first cent. A.C.), in which "the Word of God" is commonly substituted for God in His immediate, personal relations with man (*Introduct. to Gospels*, p. 137); and it is probable that round this traditional rendering a fuller doctrine grew up. But there is a clear

difference between the idea of the Word then prevalent in Palestine and that current at Alexandria. In Palestine the Word appears as the outward mediator between God and man, like the Angel of the Covenant; at Alexandria it appears as the spiritual connexion which opens the way to revelation. The preface to St. John's Gospel includes the element of truth in both. In the Greek apocryphal books there is no mention of the Word (yet comp. *Wisd.* xviii. 15). For the Alexandrine teaching it is necessary to look alone to Philo (c. B.C. 20—A.D. 50); and the ambiguity in the meaning of the Greek term, which has been already noticed, produces the greatest confusion in his treatment of the subject. In Philo language dominates over thought. He has no one clear and consistent view of the Logos. At times he assigns to it divine attributes and personal action; and then again he affirms decidedly the absolute indivisibility of the Divine nature. The tendency of his teaching is to lead to the conception of a twofold personality in the Godhead, though he shrinks from the recognition of such a doctrine (*De Monarch.* §5; *De Somn.* §37; *Quod. det. pot. ins.* §24; *De Somn.* §39, &c.). Above all, his idea of the Logos was wholly disconnected from all Messianic hopes, and was rather the philosophic substitute for them. (*Introd. to Gospels.* 138-141; Dähne, *Jud.-Alex. Relig.-Philos.* 1834; Gifford, *Philo*, &c. 1835; Dörner, *Die Lehre v. d. Person Christi*, i. 23 ff.; Lücke, *Comm.* i. 207, who gives an account of the earlier literature.)

## II. THE PATRISTIC RECOGNITION OF THE PRAEDEUTIC OFFICE OF GREEK PHILOSOPHY.

The Divine discipline of the Jews was, as has been seen, in nature essentially moral. The lessons which it was designed to teach were embodied in the family and the nation. Yet this was not in itself a complete discipline of our nature. The reason, no less than the will and the affections, had an office to discharge in preparing man for the Incarnation. The process and the issue in the two cases were widely different, but they were in some sense complementary. Even in time this relation holds good. The divine kingdom of the Jews was just overthrown when free speculation arose in the Ionian colonies of Asia. The teaching of the last prophet nearly synchronised with the death of Socrates. All other differences between the discipline of reason and that of revelation are implicitly included in their fundamental difference of method. In the one, man boldly aspired at once to God, in the other, God disclosed Himself gradually to man. Philosophy failed as a religious teacher practically (*Rom.* i. 21, 22), but it bore noble witness to an inward law (*Rom.* ii. 14, 15). It laid open instinctive wants which it could not satisfy. It deared away error, when it could not found truth. It swayed the foremost minds of a nation, when it left the mass without hope. In its purest and grandest forms it was "a schoolmaster to bring men to Christ" (*Clem. Alex. Strom.* i. §28).

This function of ancient philosophy is distinctly recognised by many of the greatest of the fathers. The principle which is involved in the doctrine of Justin Martyr or "the Seminal Word" finds a clear and systematic expression in Clement of Alexandria. (Comp. *Relepenning, Origenes*, i. p. 137-9.) "Every race of men participated in the Word. And they who lived with the Word were Christians, even if they were held to be godless *ἀθεοὶ*," as for example, among the Greeks, Socrates

and Heraclitus, and those like them" (*Just. Mart. Ap.* i. 46; comp. *Ap.* i. 3, 28; and *ib.* 10, 16). "Philosophy," says Clement, "before the coming of the Lord, was necessary to Greeks for righteous men; and now it proves useful for godliness, being in some sort a preliminary discipline (*πρωτάκια νεοδότης*) for those who reap the fruits of the faith through demonstration. . . . Perhaps we may say that it was given to the Greeks with this special object (*ὑπονοούμενος*), for it brought (*ἡδαιγώγει*) the Greek nation to Christ, as the law brought the Hebrews" (*Clem. Alex. Strom.* i. 3, §28; comp. 9, §43, and 16, §80). In this sense he does not scruple to say that "Philosophy was given as a peculiar testament (*διαθήκη*) to the Greeks, as forming the basis of the Christian philosophy" (*Strom.* vi. 8, §67; comp. 6, §41). Origen, himself a pupil of Ammonius Saccas, speaks with less precision as to the educational power of Philosophy, but his whole works bear witness to its influence. The truths which philosophers taught, he says, referring to the words of St. Paul, were from God, for "God manifested these to them, and all things that have been nobly said" (*c. Col.* vi. 3; *Psalm* 119). Augustine, while depreciating the claims of the great Gentile teachers, allows that "some of them made great discoveries, so far as they received help from Heaven, while they erred as far as they were hindered by human frailty" (*Aug. De Civ. d. i.*; comp. *De Doctr. Chr.* ii. 18). They had, as he elsewhere says, a distant vision of the truth, and learnt from the teaching of nature what properly learnt from the Spirit (*Serm.* lxxvii. 3, *ed. 26*).

But while many thus recognised in Philosophy the free witness of the Word speaking among men, the same writers in other places sought to explain the partial harmony of Philosophy and Revelation by an original connexion of the two. This attempt, which in the light of a clearer criticism is now to be essentially fruitless and even suicidal, was at least more plausible in the first centuries. A multitude of writings were then current bearing the names of the Sibyl or Hystaspes, which were obviously based on the O. T. Scriptures, and as long as they were received as genuine it was impossible to doubt that Jewish doctrines were spread in the West before the rise of Philosophy. And on the other hand, when the Fathers ridicule with the bitterest scorn the contradictions and errors of philosophy, it must be remembered that they spoke often not from a conflict with degenerate professors of systems which had long lost all real life. Some, indeed, there were, chiefly among the Latins, who consistently inveighed against Philosophy. But even Tertullian, who is among its fiercest adversaries, allows that at times the philosophers lay open truth by a happy chance or blind good fortune, and yet more by that "general feeling with which God was pleased to endow the soul" (*Tert. De Ia. l.*). The use which was made of heathen speculation by heretical writers was one great cause of its disparagement by their catholic antagonists. Irenaeus endeavours to reduce the Gnostic teachers to a dilemma: either the philosophers with whom they argued knew the truth or they did not; if they did, the Incarnation was superfluous; if they did not, whence comes the agreement of the true and the false? (*Adv. Haer.* ii. 14, 7). Hippolytus allows out the connexion of different sects with older teachers in elaborate detail. Tertullian, with characteristic energy, declares that "Philosophy furnishes the arms and the subjects of heresy." What

(he asks) has Athens in common with Jerusalem? the Academy with the Church? heretics with Christians? Our training is from the Porch of Solomon. . . . Let those look to it who bring forward a Stoic, a Platonic, a dialectic Christianity. We have no need of curious inquiries after the coming of Christ Jesus, nor of investigation after the Gospel" (Tert. *De Praescr. Haer.* 7).

This variety of judgment in the heat of controversy was inevitable. The full importance of the history of ancient Philosophy was then first seen when all rivalry was over, and it became possible to contemplate it as a whole, animated by a great law, often trembling on the verge of Truth, and sometimes by a "bold venture" claiming the heritage of Faith. Yet even now the relations of the "two old covenants"—Philosophy and the Hebrew Scriptures—to use the language of Clement—have been traced only imperfectly. What has been done may encourage labour, but it does not supersede it. In the porticoes of Eastern churches Pythagoras and Plato are pictured among those who prepared the way for Christianity (Stanley, p. 41); but in the West, Sibyls and not Philosophers are the chosen representatives of the divine element in Gentile teaching.

### III. THE DEVELOPMENT OF GREEK PHILOSOPHY.

The complete fitness of Greek Philosophy to perform this propædæutic office for Christianity, as an exhaustive effort of reason to solve the great problems of being, must be apparent after a detailed study of its progress and consummation; and even the simplest outline of its history cannot fail to preserve the leading traits of the natural (or even necessary) law by which its development was governed.

The various attempts which have been made to derive Western Philosophy from Eastern sources have signally failed. The external evidence in favour of this opinion is wholly insufficient to establish it (Ritter, *Gesch. d. Phil.* i. 159 &c.; Thirlwall, *Hist. of Gr.* ii. 130; Zeller, *Gesch. d. Phil. d. Griechen*, i. 18-34; Max Müller, *On Language*, 84note), and on internal grounds it is most improbable. It is true that in some degree the character of Greek speculation may have been influenced, at least in its earliest stages, by religious ideas which were originally introduced from the East; but this indirect influence does not affect the real originality of the Greek teachers. The spirit of pure philosophy (as has been already seen) wholly alien from Eastern thought; and it was comparatively late before even a Greek ventured to separate philosophy from religion. But in Greece the separation, when once effected, remained essentially complete. The opinions of the ancient philosophers might or might not be outwardly reconcilable with the popular faith; but philosophy and faith were independent. The very value of Greek teaching lies in the fact that it was, as far as is possible, a result of human reason, or, if Faith asserts its prerogative, distinction is sharply marked. In this we have the power and weakness of the human mind written at once on the grandest scale and in the most intimate characters.

The various classifications of the Greek schools have been proposed the simplest and truest is that which divides the history of Philosophy into three great periods, the first reaching to the Sophists, the next to the death of Plato, the third to the Christian era. In the

first period the world objectively is the great object of inquiry, in the second, the "ideas" of things, truth, and being; in the third, the chief interest of philosophy falls back upon the practical conduct of life. Successive systems overlap each other, both in time and subjects of speculation, but broadly the sequence which has been indicated will hold good (Zeller, *Die Philosophie der Griechen*, i. 111 &c.). After the Christian era philosophy ceased to have any true vitality in Greece, but it made fresh efforts to meet the changed conditions of life at Alexandria and Rome. At Alexandria Platonism was vivified by the spirit of Oriental mysticism, and afterwards of Christianity: at Rome Stoicism was united with the vigorous virtues of active life. Each of these great divisions must be passed in rapid review.

1. *The pre-Socratic Schools.*—The first Greek philosophy was little more than an attempt to follow out in thought the mythic cosmogonies of earlier poets. Gradually the depth and variety of the problems included in the idea of a cosmogony became apparent, and, after each clue had been followed out, the period ended in the negative teaching of the Sophists. The questions of creation, of the immediate relation of mind and matter, were pronounced in fact, if not in word, insoluble, and speculation was turned into a new direction.

What is the one permanent element which underlies the changing forms of things?—this was the primary inquiry to which the *Ionian* school endeavoured to find an answer. THALES (cir. B.C. 610-625), following, as it seems, the genealogy of Hesiod, pointed to moisture (water) as the one source and supporter of life. ANAXIMENES (cir. B.C. 570-480) substituted air for water, as the more subtle and all-pervading element; but equally with Thales he neglected all consideration of the force which might be supposed to modify the one primal substance. At a much later date (cir. B.C. 450) DIOGENES of Apollonia, to meet this difficulty, represented this elementary "air" as endowed with intelligence (*νόησις*), but even he makes no distinction between the material and the intelligent. The atomic theory of DEMOCRITUS (cir. B.C. 460-357), which stands in close connexion with this form of Ionic teaching, offered another and more plausible solution. The motion of his atoms included the action of force, but he wholly omitted to account for its source. Meanwhile another mode of speculation had arisen in the same school. In place of one definite element ANAXIMANDER (B.C. 610-547) suggested the unlimited: *τὸ ἄπειρον* as the adequate origin of all special existences. And somewhat more than a century later ANAXAGORAS summed up the result of such a line of speculation. "All things were together; then mind (*νοῦς*) came and disposed them in order" (Diog. Laert. ii. 6). Thus we are left face to face with an ultimate dualism.

The *Eleatic* school started from an opposite point of view. Thales saw moisture present in material things, and pronounced this to be their fundamental principle: XENOPHANES (cir. B.C. 530-50) "looked up to the whole heaven and said that the One is God" (Arist. *Met.* i. 5, *τὸ εἷς ἐστὶν φησὶ τὸν θεόν*). "Thales saw gods in all things; Xenophanes saw all things in God" (Thirlwall, *Hist. of Gr.* ii. 136). That which is, according to Xenophanes, must be one, eternal, infinite, unmovable, unchangeable. PARMENIDES of Elea (B.C. 500) substituted abstract "being" for "God" in the system of Xenophanes, and distinguished with

precision the functions of sense and reason. Sense teaches us of "the many," the false [phenomena]; reason of "the one," the true [the absolute]. ZENO of Elea (cir. B.C. 450) developed with logical ingenuity the contradictions involved in our perceptions of things (in the idea of *motion*, for instance), and thus formally prepared the way for scepticism. If the one alone is, the phenomenal world is an illusion. The sublime aspiration of Xenophanes, when followed out legitimately to its consequences, ended in blank negation.

The teaching of HERACLITUS (B.C. 500) offers a complete contrast to that of the Eleatics, and stands far in advance of the earlier Ionic school, with which he is historically connected. So far from contrasting the existent and the phenomenal, he boldly identified being with change. "There ever was, and is, and shall be, an everliving fire, unceasingly kindled and extinguished in due measure" (*ἀπτόμενον μέτρα καὶ ἀπσβεννύμενον μέτρα*, Clem. Alex. *Strom.* v. 14, §105). Rest and continuance is death. That which is is the instantaneous balance of contending powers (Diog. Laert. ix. 7, διὰ τῆς ἐναντιοποροῦς ἡρμόσθαι τὰ ὄντα). Creation is the play of the Creator. Everywhere, as far as his opinions can be grasped, Heraclitus makes noble "guesses at truth;" yet he "gives "fate" (*εἰσπαμένη*) as the supreme creator" (Stob. *Ecl.* i. p. 59, ap. Ritter & Preller, §42). The cycles of life and death run on by its law. It may have been by a natural reaction that from these wider speculations he turned his thoughts inward. "I investigated myself," he says, with conscious pride (Plut. *adv. Col.* 1118, c.); and in this respect he foreshadows the teaching of Socrates, as Zeno did that of the Sophists.

The philosophy of PYTHAGORAS (cir. B.C. 840-510) is subordinate in interest to his social and political theories, though it supplies a link in the course of speculation; others had laboured to trace a unity in the world in the presence of one underlying element or in the idea of a whole; he sought to combine the separate harmony of parts with total unity. Numerical unity includes the finite and the infinite; and in the relations of number there is a perfect symmetry, as all spring out of the fundamental unit. Thus numbers seemed to Pythagoras to be not only "patterns" of things (*τῶν ὄντων*), but causes of their being (*τῆς οὐσίας*). How he connected numbers with concrete being it is impossible to determine; but it may not be wholly fanciful to see in the doctrine of transmigration of souls an attempt to trace in the successive forms of life an outward expression of a harmonious law in the moral as well as in the physical world. (The remains of the pre-Socratic philosophers have been collected in a very convenient form by F. Mullach in *Didot's Biblioth. Gr.*, Paris, 1860.)

The first cycle of philosophy was thus completed. All the great primary problems of thought had been stated, and typical answers rendered. The relation of spirit and matter was still unsolved. Speculation issued in dualism (Anaxagoras), materialism (Democritus), or pantheism (Xenophanes). On one side reason was made the sole criterion of truth (Parmenides); on the other, experience (Heraclitus). As yet there was no rest, and the Sophists prepared the way for a new method.

Whatever may be the moral estimate which is formed of the Sophists, there can be little doubt as to the importance of their teaching as preparatory

to that of Socrates. All attempts to view it certainly by a study of the world had failed; and it not seem, then, that truth is subjective? "He is the measure of all things." Sensations are modified by the individual; and may not the same good universally? The conclusion was applied to morals and politics with fearless skill. The hold on absolute truth and right was well-nigh loosened, but meanwhile the Sophists were perfecting an instrument which was to be turned against the language, in their hands, acquired a power unknown before, when words assumed the place of things. Plato might ridicule the pedantry of the Sophists, but Socrates reaped a rich harvest from it.

2. *The Socratic Schools.*—In the second period of Greek philosophy the scene and subject were both changed. Athens became the centre of questions which had hitherto chiefly lived a life among the more mixed populations of the colonies. And at the same time inquiry was turned from the outward world to the inward, from theories of its origin and relation of things to theories of its knowledge of them. A philosophy of ideas, in the term in its widest sense, succeeded a philosophy of nature. In three generations Greek speculation reached its greatest glory in the teaching of Socrates, Plato, and Aristotle. When the sovereignty of Greece ceased, all higher philosophy ceased with it. In the hopeless turmoil of civil disturbance which followed, men's thoughts were chiefly fixed on questions of personal duty.

The famous sentence in which Aristotle (*Et. M.* 4) characterizes the teaching of Socrates (468-399) places his scientific position in the clearest light. There are two things, he says, which were rightly attributed to Socrates, inductive method and general definition (*τοὺς ὑπερενταύχους λόγους καὶ τὸ ὀρίσασθαι καθόλου*). By the first he laboured to discover the permanent element which underlies the changing forms of appearance in the varieties of opinion; by the second he fixed the truth which he had thus gained. But, beside this, Socrates rendered another service to truth. He changed not only the method but also the subject of philosophy (*Vic. Acad. Prof.* i. 4). He occupied in his investigations the primary question which had hitherto been held by Pythagoras. The great aim of his induction was to establish the sovereignty of Virtue; and before entering on his speculations he determined to obey the Ionic maxim and "know himself" (Plat. *Phaedr.* 229). It was a necessary consequence of a first step in this direction that Socrates regarded all the rest which he derived as like to kind. Knowledge (*ἐπιστήμη*) was equally absolute and authoritative whether it referred to the laws of practical operations or to questions of morality. A conclusion in geometry and a conclusion on conduct were set forth as true in the same sense. The name of only another name for ignorance (*Arist. Eth. Nic.* 9, 4; *Arist. Eth. Eud.* i. 5). Everyone was supposed to have within him a faculty naturally leading to right action, just as the moral law itself decides rightly as to relations of space and time when each step in the proposition is clear. Socrates practically neglected the determinative power of the will. His great play was unconsciously connected with this fundamental moral system. He affirmed the existence of a moral law of right and wrong. He connected philosophy with action, both in detail and in general. On one side he upheld the supremacy of Common Sense

the other the working of Providence. Not the least fruitful characteristic of his teaching was what may be called its desultoriness. He formed no complete system. He wrote nothing. He attracted and impressed his readers by his many-sided nature. He helped others to give birth to thoughts, to use his favourite image, but he was barren himself (Plat. *Theæt.* p. 150). As a result of this, the most conflicting opinions were maintained by some of his professed followers who carried out isolated fragments of his teaching to extreme conclusions. Some adopted his method (Euclides, cir. B.C. 400, the *Megarians*); others his subject. Of the latter, one section, following out his proposition of the identity of self-command (*ἑαυτοῦ ἐντολή*) with virtue, professed an utter disregard of everything material (Antisthenes, cir. B.C. 366, the *Cynics*), while the other (Aristippus, cir. B.C. 366, the *Cynemics*), inverting the maxim that virtue is necessarily accompanied by pleasure, took immediate pleasure as the rule of action.

These "minor Socratic schools" were, however, premature and imperfect developments. The truths which they distorted were embodied at a later time in more reasonable forms. PLATO alone (B.C. 430-347), by the breadth and nobleness of his teaching, was the true successor of Socrates; with fuller detail and greater elaborateness of parts, his philosophy was as many-sided as that of his master. Thus it is impossible to construct a consistent Platonic system, though many Platonic doctrines are sufficiently marked. Plato, indeed, possessed two commanding powers, which, though apparently incompatible, are in the highest sense complementary: a matchless destructive dialectic, and a creative imagination. By the first he refuted the great fallacies of the Sophists on the uncertainty of knowledge and right, carrying out in this the attacks of Socrates; by the other he endeavoured to bridge over the interval between appearance and reality, and gain an approach to the eternal. His famous doctrines of Ideas and Recollection (*ἀνάμνησις*) are a solution by imagination of a logical difficulty. Socrates had shown the existence of general notions; Plato felt constrained to attribute to them a substantive existence (Arist. *Met.* M. 4). A glorious vision gave completeness to his view. The unembodied spirits were exhibited in immediate presence of the "ideas" of things (*Phaedr.* 247); the law of their embodiment was sensibly portrayed; and the more or less vivid remembrance of supramundane realities in this life was traced to antecedent facts. All men were thus supposed to have been face to face with Truth; the object of teaching was to bring back impressions latent but uneffaced.

The "myths" of Plato, to one of the most famous of which reference has just been made, play a most important part in his system. They answer in the philosopher to Faith in the Christian. In dealing with immortality and judgment he leaves the way of reason, and ventures, as he says, on a rude raft to brave the dangers of the ocean (*Phaed.* 25 D; *Gorg.* 523 A). "The peril and the prize are nolle and the hope is great" (*Phaed.* 114, C.). Such tales, he admits, may seem puerile and ridiculous; and if there were other surer and clearer means of gaining the desired end, the judgment would be just (*Gorg.* 527 A). But as it is, thus only can he connect the seen and the unseen. The myths, then, mark the limit of his dialectics. They are not merely a poetical picture of truth already gained, or a popular illustration of his

teaching, but real efforts to penetrate beyond the depths of argument. They show that his method was not commensurate with his instinctive desires; and point out in intelligible outlines the subjects on which man looks for revelation. Such are the relations of the human mind to truth (*Phaedr.* 248-249); the pre-existence and immortality of the soul (*Meno.* 81-3; *Phaedr.* 110-2; *Tim.* 41); the state of future retribution (*Gorg.* 523-5; *Rep.* x. 614-6); the revolutions of the world (*Polit.* 265). Compare also *Sympos.* 189-91; 203-5; Zeller, *Philos. d. Griech.* 361-3, who gives the literature of the subject).

The great difference between Plato and ARISTOTLE (B.C. 384-322) lies in the use which Plato thus made of imagination as the exponent of instinct. The dialectic of Plato is not inferior to that of Aristotle, and Aristotle exhibits traces of poetic power not unworthy of Plato; but Aristotle never allows imagination to influence his final decision. He elaborated a perfect method, and he used it with perfect fairness. His writings, if any, contain the highest utterance of pure reason. Looking back on all the earlier efforts of philosophy, he pronounced a calm and final judgment. For him many of the conclusions which others had maintained were valueless, because he showed that they rested on feeling, and not on argument. This stern severity of logic gives an indescribable pathos to those passages in which he touches on the highest hopes of men; and perhaps there is no more truly affecting chapter in ancient literature than that in which he states in a few unimpassioned sentences the issue of his inquiry into the immortality of the soul. Part of it may be immortal, but that part is impersonal (*De An.* iii. 5). This was the sentence of reason, and he gives expression to it without a word of protest, and yet as one who knew the extent of the sacrifice which it involved. The conclusion is, as it were, the epitaph of free speculation. Laws of observation and argument, rules of action, principles of government remain, but there is no hope beyond the grave.

It follows necessarily that the Platonic doctrine of ideas was emphatically rejected by Aristotle, who gave, however, the final development to the original conception of Socrates. With Socrates "ideas" (general definitions) were mere abstractions; with Plato they had an absolute existence; with Aristotle they had no existence separate from things in which they were realized, though the form (*μορφή*), which answers to the Platonic idea, was held to be the essence of the thing itself (comp. Zeller, *Philos. d. Griech.* i. 119, 120).

There is one feature common in essence to the systems of Plato and Aristotle which has not yet been noticed. In both, Ethics is a part of Politics. The citizen is prior to the man. In Plato this doctrine finds its most extravagant development in theory, though his life, and, in some places, his teaching, were directly opposed to it (e.g. *Gorg.* p. 527 D). This practical inconsequence was due, it may be supposed, to the condition of Athens at the time, for the idea was in complete harmony with the national feeling; and, in fact, the absolute subordination of the individual to the body includes one of the chief lessons of the ancient world. In Aristotle the "political" character of man is defined with greater precision, and brought within narrower limits. The breaking-up of the small Greek states had prepared the way for more comprehensive views of human fellowship, without destroying

the fundamental truth of the necessity of social union for perfect life. But in the next generation this was lost. The wars of the Succession obliterated the idea of society, and Philosophy was content with aiming at individual happiness.

The coming change was indicated by the rise of a school of sceptics. The scepticism of the Sophists marked the close of the first period, and in like manner the scepticism of the Pyrrhonists marks the close of the second (STILPO, cir. B.C. 290; PYRRHON, cir. B.C. 290). But the Pyrrhonists rendered no positive service to the cause of Philosophy, as the Sophists did by the refinement of language. Their immediate influence was limited in its range, and it is only as a symptom that the rise of the school is important. But in this respect it foreshows the character of after-Philosophy by denying the foundation of all higher speculations. Thus all interest was turned to questions of practical morality. Hitherto morality had been based as a science upon mental analysis, but by the Pyrrhonists it was made subservient to law and custom. Immediate experience was held to be the rule of life (comp. Ritter and Preller, §350).

3. *The post-Socratic Schools.*—After Aristotle, Philosophy, as has been already noticed, took a new direction. The Socratic schools were, as has been shown, connected by a common pursuit of the permanent element which underlies phenomena. Socrates placed Virtue, truth in action, in a knowledge of the ideas of things. Plato went further, and maintained that these ideas are alone truly existent. Aristotle, though differing in terms, yet only followed in the same direction, when he attributed to Form, not an independent existence, but a fashioning, vivifying power in all individual objects. But from this point speculation took a mainly personal direction. Philosophy, in the strict sense of the word, ceased to exist. This was due both to the circumstances of the time and to the exhaustion consequent on the failure of the Socratic method to solve the deep mysteries of being. Aristotle had, indeed, laid the wide foundations of an inductive system of physics, but few were inclined to continue his work. The physical theories which were brought forward were merely adaptations from earlier philosophers.

In dealing with moral questions two opposite systems are possible, and have found advocates in all ages. On the one side it may be said that the character of actions is to be judged by their results; or the other, that it is to be sought only in the actions themselves. Pleasure is the test of right in one case; an assumed, or discovered, law of our nature in the other. If the world were perfect and the balance of human faculties undisturbed, it is evident that both systems would give identical results. As it is, there is a tendency to error on each side, which is clearly seen in the rival schools of the Epicureans and Stoics, who practically divided the suffrages of the mass of educated men in the centuries before and after the Christian era.

EPICURUS (B.C. 352-270) defined the object of Philosophy to be the attainment of a happy life. The pursuit of truth for its own sake he regarded as superfluous. He rejected dialectics as a useless study, and accepted the senses, in the widest acceptance of the term [EPICUREANS, i. 570], as the criterion of truth. Physics he subordinated

entirely to Ethics (Cic. *de Fin.* i. 7). Epicurus differed widely from the Cyrenaics in his view of happiness. The happiness at which the wise man aims is to be found, he said, not in momentary gratification, but in lifelong pleasure. It does not consist necessarily in excitement or motion, as often in absolute tranquillity (*ἀταραξία*). "The wise man is happy even on the rack" (Diog. Laert. x. 118), for "virtue alone is inseparable from pleasure" (id. 138). To live happily and to live wisely, nobly, and justly, are convertible phrases (id. 140). But it followed as a corollary from this view of happiness, that the Gods, who were held to be supremely happy and eternal, were absolutely free from the distractions and emotions consequent on any care for the world or man (id. 133; comp. Lucr. ii. 645-7). All things were supposed to come into being by chance, and so pass away, and to study of Nature was chiefly useful as dispelling the superstitious fears of the Gods and death by which the multitude are tormented. It is obvious in such teaching would degenerate in practice. No individual was left master of his own life, but he all regard to any higher law than a refined selfishness.

While Epicurus asserted in this manner the loss of one part of man's nature in the conduct of life, ZENO of Citium (cir. B.C. 280), with equal pertinacity, advocated a purely spiritual (intellectual) union. The opposition between the two was complete. In infinite, chance-formed worlds of the one side or against the one harmonious world of the other, on the one side are Gods regardless of material time, on the other a Being permeating and vivifying creation. This difference necessarily found a clear expression in Ethics. For when the Stoics held that there were only two principles of things, Fate (*τὸ πᾶν*), and God, Fate, Reason—the forces were many by which it was fashioned and guided (*τὸ ποιοῦν*)—it followed that the active principle in man is of Divine origin, and that his duty is to live conformably to nature (*τὸ ἀναλογισθῆναι τὴ φύσιν*). By "Nature" some understood the nature of man, others the nature of the universe, but both agreed in regarding it as a general law of the whole, and not particular passions or desires. Good, therefore, was but one. All external things were indifferent. Reason was the absolute summit of man. Thus the doctrine of the Stoics, like that of Epicurus, practically left man to himself. He it was worse in its final results than Epicurus, for it made him his own god.\*

In one point the Epicureans and Stoics were agreed. They both regarded the happiness of culture of the individual as the highest good. His systems belonged to a period of corruption and decay. They were the efforts of the mind to support himself in the ruins of the state. And at the same time this assertion of individual independence and breaking down of local conventional notions an important work in preparation for Christianity. It was for the Gentile world an indirect answer responding to the Dispersion of the Jews. The men, owned their fellowship as they had before. Isolating superstitions were destroyed by the arguments of the Epicureans. The conscience of the human race was vigorously affirmed by the Stoics (comp. Antoninus, iv. 6, 35, with Cassiodorus).

\* This statement, which is true generally, is open to many exceptions. The famous hymn of Cleanthes is one

of the noblest expressions of belief in their time (Mullach, *Proleg. Stoicæ*, p. 121).

Meanwhile in the New Academy Platonism degenerated into scepticism. Epicurus found an authoritative rule in the senses. The Stoics took refuge in what seems to answer to the modern doctrine of "common sense," and maintained that the senses give a direct knowledge of the object. CARNEADES (B.C. 213-129) combated these views, and showed that sensation cannot be proved to declare the real nature, but only some of the effects, of things. Thus the slight philosophical basis of the later schools was undermined. Scepticism remained as the last issue of speculation; and, if we may believe the declaration of Seneca (*Quaest. Nat.* vii. 82), Scepticism itself soon ceased to be taught as a system. The great teachers had sought rest, and in the end they found unrest. No science of life could be established. The reason of the few failed to create an esoteric rule of virtue and happiness. For in this they all agreed, that the blessings of philosophy were not for the mass. A "Gospel preached to the poor" was as yet unknown.

But though the Greek philosophers fell short of their highest aim, it needs no words to show the work which they did as pioneers of a universal Church. They revealed the wants and the instincts of men with a clearness and vigour elsewhere unattainable, for their sight was dazzled by no reflections from a purer faith. Step by step great questions were proposed—Fate, Providence—Conscience, Law—the State, the Man—and answers were given, which are the more instructive because they are generally one-sided. The discussions, which were primarily restricted to a few, in time influenced the opinions of the many. The preacher who spoke of "an unknown God" had an audience who could understand him, not at Athens only or Rome, but throughout the civilized world.

The complete course of Philosophy was run before the Christian era, but there were yet two mixed systems afterwards which offered some novel features. At Alexandria Platonism was united with various elements of Eastern speculation, and for several centuries exercised an important influence on Christian doctrine. At Rome Stoicism was vivified by the spirit of the old republic, and exhibited the extreme Western type of Philosophy. Of the first nothing can be said here. It arose only when Christianity was a recognised spiritual power, and was influenced both positively and negatively by the Gospel. The same remark applies to the efforts to quicken afresh the forms of Paganism, which found their climax in the reign of Julian. These have no independent value as an expression of original thought; but the Roman Stoicism calls for brief notice from its supposed connexion with Christian morality (SENECA, † A.D. 65; EPICETUS, † cir. A.D. 115; M. AURELIUS ANTONINUS, 121-180). The belief in this connexion found a singular expression in the apocryphal correspondence of St. Paul and Seneca, which was widely received in the early Church (Jerome, *De Vir. ill.* xii.). And lately a distinguished writer

(Mill, *On Liberty*, p. 58, quoted by Stanley, *Eastern Ch. Lect.* vi.), apparently with approbation) has speculated on the "tragic fact" that Constantine, and not Marcus Aurelius, was the first Christian emperor. The superficial coincidences of Stoicism with the N. T. are certainly numerous. Coincidences of thought, and even of language, might easily be multiplied (Gataker, *Antoninus*, Pref. pp. xi. &c.), and in considering these it is impossible not to remember that Semitic thought and phraseology must have exercised great influence on Stoic teaching (Grant, *Oxford Essays*, 1858 p. 82).<sup>b</sup> But beneath this external resemblance of Stoicism to Christianity, the later Stoics were fundamentally opposed to it. For good and for evil they were the Pharisees of the Gentile world. Their highest aspirations are mixed with the thanksgiving "that they were not as other men are" (comp. *Anton.* i.). Their worship was a sublime egotism.<sup>c</sup> The conduct of life was regarded as an art, guided in individual actions by a conscious reference to reason (*Anton.* iv. 2, 3, v. 32), and not a spontaneous process rising naturally out of one vital principle.<sup>d</sup> The wise man, "wrapt in himself" (vii. 28), was supposed to look with perfect indifference on the changes of time (iv. 49); and yet beneath this show of independence he was a prey to a hopeless sadness. In words he appealed to the great law of fate which rapidly sweeps all things into oblivion as a source of consolation (iv. 2, 14, vi. 15); but there is no confidence in any future retribution. In a certain sense the elements of which we are composed are eternal (v. 13), for they are incorporated in other parts of the universe, but we shall cease to exist (iv. 14, 21, vi. 24, vii. 10). Not only is there no recognition of communion between an immortal man and a personal God, but the idea is excluded. Man is but an atom in a vast universe, and his actions and sufferings are measured solely by their relation to the whole (*Anton.* x. 5, 6, 20, xii. 26, vi. 45, v. 22, vi. 9). God is but another name for "the mind of the universe" (*δ τοῦ ὅλου νοῦς*, v. 30), "the soul of the world" (iv. 40), "the reason that ordereth matter" (vi. 1), "universal nature" (*ἡ τῶν ὅλων φύσις*, vii. 33, ix. 1; comp. x. 1), and is even identified with the world itself (*τοῦ γεννῆστος κόσμου*, xii. 1; comp. Gataker on iv. 23). Thus the Stoicism of M. Aurelius gives many of the moral precepts of the Gospel (Gataker, *Pref.* p. xviii.), but without their foundation, which can find no place in his system. It is impossible to read his reflections without emotion, but they have no creative energy. They are the last strain of a dying creed, and in themselves have no special affinity to the new faith. Christianity necessarily includes whatever is noblest in them, but they affect to supply the place of Christianity, and do not lead to it. The real elements of greatness in M. Aurelius are many, and truly Roman; but the study of his *Meditations* by the side of the N. T. can leave little doubt that he could not have helped

<sup>b</sup> Clitum, the birthplace of Zeno, was a Phoenician colony; Herillus, his pupil, was a Carthaginian; Chrysippus was born at Soli or Tarsus; of his scholars and successors, Lucius and Antipater were natives of Tarsus, and Diogenes of Babylon. In the next generation, Posidonius was a native of Apamea in Syria; and Epictetus, the noblest of Stoics, was born at Hircopolis in Phrygia.

<sup>c</sup> Seneca, *Ep.* 53, 11: "Est aliquid quo sapienter antequam natus: ille beneficio naturae non timet, suo sapienter." Comp. *Ep.* 41. *Anton.* xii. 26: *ὁ ἐκείνου νοῦς θεός καὶ*

*ἐκείνου ἀνθρώπου*. Comp. v. 10.

<sup>d</sup> This explains the well-known reference of Marcus Aurelius to the Christians. They were ready to die "of mere obstinacy" (*κατὰ φιλήν παράστατον*, i. e. faith), whereas, he says, this readiness ought to come "from personal judgment after due calculation" (*ἀπὸ ἰδιαίτης κρίσεως . . . λογισμῶν* . . . xi. 3). So also Epictetus (*Disc.* ix. 7, 6) contrasts the fortitude gained by "habit" by the Gallians, with the true fortitude based on "reason and demonstration."

to give a national standing-place to a Catholic Church.\*

#### IV. CHRISTIANITY IN CONTACT WITH ANCIENT PHILOSOPHY.

The only direct trace of the contact of Christianity with Western Philosophy in the N. T. is in the account of St. Paul's visit to Athens, where "certain philosophers of the Epicureans and of the Stoics" (Acts xvii. 18)—the representatives, that is, of the two great moral schools which divided the West—"encountered him;" and there is nothing in the apostolic writings to show that it exercised any important influence upon the early Church (comp. 1 Cor. i. 22-4.). But it was otherwise with Eastern speculation, which, as it was less scientific in form, penetrated more deeply through the mass of the people. The "philosophy" against which the Colossians were warned (Col. ii. 8) seems undoubtedly to have been of Eastern origin, containing elements similar to those which were afterwards embodied in various shapes of Gnosticism, as a selfish asceticism and a superstitious reverence for angels (Col. ii. 16-23); and in the Epistles to Timothy, addressed to Ephesus, in which city St. Paul anticipated the rise of false teaching (Acts xx. 30), two distinct forms of error may be traced, in addition to Judaism, due more or less to the same influence. One of these was a vain spiritualism, insisting on ascetic observances and interpreting the resurrection as a moral change (1 Tim. iv. 1-7; 2 Tim. ii. 16-18); the other a materialism allied to sorcery (2 Tim. iii. 13, γόφρες). The former is that which is peculiarly "false-styled gnosis" (1 Tim. vi. 20), abounding in "profane and old wives' fables" (1 Tim. iv. 7) and empty discussions (i. 6, vi. 20); the latter has a close connexion with earlier tendencies at Ephesus (Acts xix. 19), and with the traditional accounts of Simon Magus (comp. Acts viii. 9), whose working on the early Church, however obscure, was unquestionably most important. These antagonistic and yet complementary forms of heresy found a wide development in Later times; but it is remarkable that no trace of dualism, of the distinction of the Creator and the Redeemer, the Demiurge and the true God, which formed so essential a tenet of the Gnostic schools, occurs in the N. T. (comp. Thiersch, *Versuch zur Herst. d. hist. Stundp.* &c., 231-304).

The writings of the sub-apostolic age, with the exception of the famous anecdote of Justin Martyr (*Diad.* 2-4), throw little light upon the relations of Christianity and Philosophy. The heretical systems again are too obscure and complicated to illustrate more than the general admixture of foreign (especially Eastern) tenets with the apostolic teaching. One book, however, has been preserved in various shapes, which, though still unaccountably neglected in Church histories, contains a vivid delineation of the speculative struggle which Christianity had to maintain with Judaism and Heathenism. The Clementine *Homilies* (ed. Drossel, 1853) and *Recognitions* (ed. Gersdorf, 1838) are a kind of Philosophy of Religion, and in subtlety and richness of thought yield to no early Christian writings. The picture which the supposed author draws of his early religious doubts is evidently taken from

life (Clem. *Recogn.* i. 1-8; Neander, *Ch. Hist.* &c. E. T.); and in the discussions which follow there are clear traces of Western as well as Eastern philosophy (Uhlhorn, *Die Hom. u. Recogn. d. Clem. Rom.* pp. 464 &c.).

At the close of the second century, when the Church of Alexandria came into marked intellectual pre-eminence, the mutual influence of Christianity and Neo-Platonism opened a new field of speculation, or rather the two systems were presented in forms designed to meet the acknowledged wants of the time. According to the commonly received report, Origen was the scholar of Ammonius Saccas, who first gave consistency to the later Platonism, and for a long time he was the contemporary of Plotinus (A.D. 205-270), who was its noblest exponent. Neo-Platonism was, in fact, an attempt to seize the spirit of Christianity apart from its historic basis and human elements. The separation between the two was absolute; and yet the splendour of the one-sided spiritualism of the Neo-Platonists attracted in some cases the admiration of the Christian Fathers (Basil, Theodoret), and the wide circulation of the writings of the pseudo-Dionysius the Areopagite served to propagate many of their doctrines under an orthodox name among the schoolmen and mystics of the middle ages (1127, *Neo-Platonismus u. Christenthum*, 1836; *Herzog Encyclop.* s. v. *Neo-Platonismus*).

The want which the Alexandrine Fathers endeavoured to satisfy is in a great measure the want of our own time. If Christianity be Truth, it must have points of special connexion with all nations and all periods. The difference of character in the constituent writings of the N. T. are evidently typical, and present the Gospel in a form (if technical language may be used) now ethical, now logical, now mystical. The varieties of aspect thus indicated combine to give the idea of a harmonious whole. Clement rightly maintained that there is "gnosis" in Christianity distinct from the errors of Gnosticism. The latter was a premature attempt to connect the Gospel with earlier systems, to form a result of conflict grounded on Faith (Müller, *Patrologie*, 424 &c.). Christian Philosophy may be in one sense a contradiction in terms, for Christianity confessedly derives its first principles from revelation, and not from simple reason; but there is no less a true Philosophy of Christianity which aims to show how completely these, by their form, their substance, and their consequences, meet the instincts and aspirations of all ages. The exposition of such a Philosophy would be the work of a modern Origen.

[B. P. G.]

**PHINEES** (Heb. פִּנְחָס; Phineas). 1. The son of Eleazar son of Aaron, the great hero of the Jewish priesthood (1 Esdr. v. 5; vii. 2, 27-9; 1 Esdr. i. 26; Eccles. xlv. 23; 1 Mac. ii. 26).

2. Phineas the son of Eli, 2 Esdr. i. 20, for the insertion of the name in the genealogy of Ezra (in this place only) is evidently an error, since Eli belonged to the line of Eleazar, and Eli to that of Ithamar. It probably arose from a confusion of the name with that of the great Phineas, who was Ezra's forefather.

3. A Priest or Levite of the time of Ezra, 4 Esdr. (1 Esdr. viii. 63).

ignorance. It seems that the philosopher would be seen (in word) the believer. Comp. Lactantius, *Mort. c. 26*.

\* Here the LXX. has *φύσις*.

\* The writings of Epictetus contain in the main the same system, but with somewhat less arrogance. It may be remarked that the silence of Epictetus and M. Aurelius as to the teaching of Christianity can hardly be explained by

א. (שׂוֹרֵי: שִׁמְעוֹן) 1 Eadr. v. 31. [PABER, 2.] [G.]

**PHINEHAS** (פִּינְחָס, i. e. Pinchas: פִּינְחָס; but once in Pent. and uniformly elsewhere, פִּינְחָס; *Jen. Pseudonyms: Phinees*). Son of Eleazar and grandson of Aaron (Ex. vi. 25). His mother is recorded as one of the daughters of Putiel, an unknown person, who is identified by the Rabbis with Jethro the Midianite (*Targ. Pseudoj.* on Exod. vi. 25. *Wagenseil's Nota* viii. 6). Phinehas is memorable for having while quite a youth, by his zeal and energy at the critical moment of the licentious idolatry of Shittim, appeased the divine wrath and put a stop to the plague which was destroying the nation (Num. xxv. 7). For this he was rewarded by the special approbation of Jehovah, and by a promise that the priesthood should remain in his family for ever (10-13). This seems to have raised him at once to a very high position in the nation, and he was appointed to accompany as priest the expedition by which the Midianites were destroyed (xxii. 6). Many years later he also headed the party who were despatched from Shiloh to remonstrate against the Altar which the trans-Jordanic tribes were reported to have built near Jordan (Josh. xxii. 13-32). In the partition of the country he received an allotment of his own—a hill on Mount Ephraim which bore his name—Gibeath-Pinchas. Here his father was buried (Josh. xxiv. 33).

During the life of Phinehas he appears to have been the chief of the great family of the Korahites or Korhites who guarded the entrances to the sacred tent and the whole of the sacred camp (1 Chr. ix. 20). After Eleazar's death he became high priest—the 3rd of the series. In this capacity he is introduced as giving the oracle to the nation during the struggle with the Benjamites on the matter of Gibeah (Judg. xx. 28). Where the Ark and tabernacle were stationed at that time is not clear. From ver. 1 we should infer that they were at Mizpeh, while from vers. 18, 26, it seems equally probable that they were at Bethel (which is also the statement of Josephus, *Ant.* v. 2, §11). Or the Hebrew words in these latter verses may mean, not Bethel the town, but, as they are rendered in the A. V., "house of God," and refer to the tabernacle at Shiloh. But wherever the Ark may have been, there was the aged priest "standing before it," and the oracle which he delivered was one which must have been fully in accordance with his own vehement temper, "Shall we go out to battle . . . or shall we cease?" And the answer was, "Go up: for to-morrow I will deliver them into your hand."

The memory of this champion of Jehovah was very dear to the Jews. The narrative of the Pentateuch presents him as the type of an ardent and devoted priest. The numerous references to him in the later literature all adopt the same tone. He is commemorated in one of the Psalms (cvi. 30, 31) in the identical phrase which is consecrated for ever by its use in reference to the great act of faith of Abraham; a phrase which perhaps more than any other in the Bible binds together the old and new dispensations—"that was counted to him for righteousness unto all generations for evermore" (comp. *Jen.* xv. 6; *Rom.* iv. 3). The "covenant" made with him is put into the same rank for dignity and sanctity with that by which the throne was assured to King David (*Ecclus.* xiv. 25). The zeal of Antiochus the Maccabee is sufficiently praised by comparing him with that of "Phineas against Zambri"

the son of Salom" (1 Macc. ii. 26). The priests who returned from the captivity are enrolled in the official lists as the sons of Phinehas (*Ezr.* viii. 2, 1 Eadr. v. 5). In the *Seder Olam* (ch. xx.) he is identified with "the Prophet" of Judg. vi. 8.

Josephus (*Ant.* iv. 6, §12), out of the venerable traditions which he uses with such excellent effect, adds to the narrative of the Pentateuch a statement that "so great was his courage and so remarkable his bodily strength, that he would never relinquish any undertaking, however difficult and dangerous, without gaining a complete victory." The later Jews are fond of comparing him to Elijah, if indeed they do not regard them as one and the same individual (see the quotations in Meyer, *Chron. Hebr.* 845; Fabricius, *Codex pseudoepig.* 894 note). In the Targum Pseudojonathan of Num. xxv. the slaughter of Zimri and Cozbi is accompanied by twelve miracles, and the covenant made with Phinehas is expanded into a promise, that he shall be "the angel of the covenant, shall live for ever, and shall proclaim redemption at the end of the world." His Midianite origin (already noticed) is brought forward as adding greater lustre to his zeal against Midian, and enhancing his glorious destiny.

The verse which closes the Book of Joshua is ascribed to Phinehas, as the description of the death of Moses at the end of Deuteronomy is to Joshua (*Baba Bathra*, in Fabricius, 893). He is also reported to be the author of a work on sacred names (*ibid.*), which however is so rare that Fabricius had never seen it.

The succession of the posterity of Phinehas in the high-priesthood was interrupted when Eli, of the race of Ithamar, was priest; but it was resumed in the person of Zadok, and continued in the same line to the destruction of Jerusalem. [*HIGH PRIEST*, vol. i. 809, &c.] One of the members of the family—Manasseh son of Johanan, and brother of Jaddua—went over to the Samaritans, and they still boast that they preserve the succession (see their Letter to Scaliger, in Eikhorn's *Repertorium*, xiii. 262).

The tomb of Phinehas, a place of great resort to both Jews and Samaritans, is shown at *Averath*, four miles S. E. of *Nablus*. It stands in the centre of the village, enclosed within a little area or compound, which is overshadowed by the thickly-travelled foliage of an ancient vine. A small mosque joins the wall of the compound. Outside the village, on the next hill, is a larger enclosure, containing the tomb of Eleazar, and a cave ascribed to Elijah, overshadowed by two venerable terebinth trees, surrounded by arcades, and forming a retired and truly charming spot. The local tradition asserts that *Averath* and its neighbourhood are the "Hill of Phinehas."

In the Apocryphal Books his name is given as PHINEES.

2. Second son of Eli (1 Sam. i. 3; ii. 34; iv. 4, 11, 17, 19; xiv. 3.) He was not of the same line as his illustrious and devoted namesake, but of the family of Ithamar. [*ELI*.] Phinees was killed with his brother by the Philistines when the ark was captured. He had two sons, Ahitub, the eldest—whose sons Ahijah and Ahimelech were high-priests at Shiloh and Nob in the time of Saul (xiv. 3)—and Ichabod. He is introduced, apparently by mistake, in the genealogy of Ezra in 2 Eadr. i. 2a. [PHINEES, 2.]

3. A Levite of Ezra's time (*Ezr.* viii. 33), un-

the meaning be that Eleazar was of the family of the great Phinehas. In the parallel passage of 1 Esdr. he is called PHINEES. [G.]

**PHILSON** (Φεισών; Alex. Φισών: *Phison*). The Greek form of the name PISON (Ecclus. xxiv. 25).

**PHLEG'ON** (Φλέγων; *Phlegon*). A Christian at Rome whom St. Paul salutes (Rom. xvi. 14). Pseudo-Hippolytus (*De LXX. Apostolis*) makes him one of the seventy disciples and bishop of Marathon. He is said to have suffered martyrdom on April 8th (*Martyrologium Romanum*, apud Estium), on which day he is commemorated in the calendar of the Byzantine Church. [W. T. B.]

**PHOE'BE** (Φοίβη; *Phoebe*), the first, and one of the most important, of the Christian persons the detailed mention of whom fills nearly all the last chapter of the Epistle to the Romans. What is said of her (Rom. xvi. 1, 2) is worthy of especial notice, because of its bearing on the question of the deaconesses of the Apostolic Church. On this point we have to observe, (1) that the term *διδάκωνας*, here applied to her, though not in itself necessarily an official term, is the term which would be applied to her, if it were meant to be official; (2) that this term is applied in the *Apostolical Constitutions* to women who ministered officially, the deaconess being called *ἡ δίδάκωνας*, as the deacon is called *ὁ δίδάκωνας*; (3) that it is now generally admitted that in 1 Tim. iii. 11, St. Paul applies it to himself; (4) that in the passage before us Phoebe is called the *διδάκωνας* of a particular church, which seems to imply a specific appointment; (5) that the church of CENCHREAE, to which she belonged, could only have been a small church: whence we may draw a fair conclusion as to what was customary, in the matter of such female ministration, in the larger churches; (6) that, whatever her errand to Rome might be, the independent manner of her going there seems to imply (especially when we consider the secluded habits of Greek women) not only that she was a widow or a woman of mature age, but that she was acting officially; (7) that she had already been of great service to St. Paul and others (*προσέστανε πολλῶν, καὶ ἐμοῦ αὐτοῦ*), either by her wealth or her energy, or both; a statement which closely corresponds with the description of the qualifications of the enrolled widows in 1 Tim. v. 10; (8) that the duty which we here see Phoebe discharging implies a personal character worthy of confidence and respect. [J. S. H.]

**PHOEN'ICE, PHOENIC'IA** (Φοινίκη; *Phoenice*: rarely in Latin. *Phoenicia*: see Faccioliati's *Lexicon*, s. v.), a tract of country, of which Tyre and Sidon were the principal cities, to the north of Palestine, along the coast of the Mediterranean Sea; bounded by that sea on the west, and by the mountain range of Lebanon on the east. The name was not the one by which its native inhabitants called it, but was given to it by the Greeks; probably from the palm-tree, *φοινίς*, with which it may then have abounded; just as the name Brasil was given by Europeans to a large territory in South America, from the Brasil-wood which a part of it supplied to Europe. The palm-tree is seen, as an emblem, on some coins of Aradus, Tyre, and Sidon;

## PHOENICE, PHOENICIA

and there are now several palm-trees within the circuit of modern Tyre, and along the coast at various points; but the tree is not at the present day one of the characteristic features of the country. Its native name of Phoenicia was *Kenan* (Kenan) or *Knā*, signifying lowland, so named in contrast to the adjoining Aram, i. e. Highland; the Hebrew name of Syria. The name *Kenan* is preserved in a name of Laodicea, of the time of Antiochus Epiphanes, wherein Laodicea is styled "a another city in *Kenan*," כנען אום לאודיקה. And *Knā* or *Knā* (Χνᾶ) is mentioned distinctly by Herodotus, the grammarian, as the old name of Phoenicia, in *Περὶ νοτιῶν λέξεων*, under the word *Ἀφνί*. Hence, as Phoenicians or Canaanites were the most powerful of all tribes in Palestine at the time of its invasion by Joshua, the Israelites, in speaking of their own territory as it was before the conquest, called it "the land of *Canaan*."

The length of coast to which the name *Phoenice* was applied varied at different times, and may be regarded under different aspects before and after the loss of its independence. 1. What now is termed Phoenicia Proper was a narrow tabular plain, extending from the pass of *Sidi el-Begat* to *Abyad*, the "Promontorium Album" of the ancients, about six miles south of Tyre, to the *Sidi el-Begat*, the ancient *Bestrenus*, two miles north of Sidon (Levinson's *Bib. Res.* ii. 473). The plain is only 28 miles in length, and, considering the great importance of Phoenicia in the world's history, it may well be added to other instances in Italy, and Palestine, which show how little the intellectual influence of a city or state has depended on the extent of its territory. Its average breadth is about a mile (Porter's *Handbook for Syria*, p. 395; but near Sidon, the mountains come to a distance of two miles, and near Tyre to a distance of five miles (Kenrick's *Phoenicia*, p. 19). The name of Phoenicia, thus understood, is called by *Strabo* (*Ant.* v. 3, § 1), the great plain of the city of Sidon, *τὸ μέγα πεδῖον Σιδωνος πόλεως*. In its northern extremity was situated *Sidon*, in the old latitude of 33° 34' 05"; and scarcely more than 17 geographical miles to the south was Tyre, at the latitude of 33° 17' (Admiral Smyth's *Mediterranean*, p. 469); so that in a straight line the two renowned cities were less than 28 English miles distant from each other. Except the 1500 years of the New Testament, was situated between them, eight miles south of Sidon, to which *Strabo* (*l. c.* xvii. 9; *Orind.* 20; *Luke* ix. 28), a longer district, which afterwards became entitled to the name of *Plemonia*, extended to the coast to a point marked by the island of *Aradus*, and by *Antaradus* towards the south; the whole boundary remaining the same as in Phoenicia Proper. Phoenicia, thus defined, is estimated by *Strabo* (*History of Greece*, vii. 354), to have been only 120 miles in length; while its breadth, across Lebanon and the sea, never exceeded 20 miles, and was generally much less. This estimate is reasonable, allowing for the bends of the coast, and the direct distance in latitude between Tyre and Antaradus (*Tortosa*) is equivalent to 10 English miles; and six miles to the south of Tyre, as mentioned, intervene before the beginning of the coast

as from Hecataeus. It is, however, in this passage an assertion of the grammarian himself; though it is not probable that he had in his mind the range of Lebanon

\* Through mistake, a sentence of Herodian, *τὸ Χνᾶ, οὗτοι γὰρ πρότερον ἢ Φοινίκη ἑκαλεῖτο*, is printed in the *Fragmenta Historicorum Graecorum*, p. 17 (Paris, 1841), as an extract from Hecataeus of Miletus, and is usually quoted

at *Ba al-Abyad*. The claim of the whole of this district to the name of Phœnicia rests on the probable fact, that the whole of it, to the north of the great plain of Sidon, was occupied by Phœnician colonists; not to mention, that there seems to have been some kind of political connexion, however loose, between all the inhabitants (Diodorus, xvi. 11). Scarcely 16 geographical miles farther north than Sidon was Berytus; with a roadstead so well suited for the purposes of modern navigation that, under the modern name of *Beirut*, it has eclipsed both Sidon and Tyre as an emporium for Syria. Whether this Berytus was identical with the *Beithan* and *Berothai* of Ezekiel xlvii. 16, and of 3 Samuel viii. 8, is a disputed point. [BE-ROTHAI.] Still farther north was Byblus, the *Tebal* of the Bible (Ez. xvii. 9), inhabited by seamen and sailors. Its inhabitants are supposed to be alluded to in the word *Giblin*, translated "stone-squares" in the authorized version of 1 K. v. 18 (32). It still retains in Arabic the kindred name of *Jebeil*. Then came Tripolis (now *Tarabulus*), said to have been founded by colonists from Tyre, Sidon, and Aradus, with three distinct towns, each a furlong apart from one another, each with its own walls, and each named from the city which supplied its colonists. General meetings of the Phœnicians seem to have been held at Tripolis (Isid. xvi. 41), as if a certain local jealousy had prevented the selection for this purpose of Tyre, Sidon, or Aradus. And lastly, towards the extreme point north was Aradus itself, the *Arvad* of Gen. x. 18, and Ez. xvii. 8; situated, like Tyre, on a small island near the mainland, and founded by exiles from Sidon. The whole of Phœnicia Proper is well watered by various streams from the adjoining hills: of these the two largest are the *Kadsiniyeh*, a few miles north of Tyre—the ancient name of which, strange to say, is not certain, though it is conjectured to have been the *Leontes*—and the *Bostrenus*, already mentioned, north of Sidon. The soil is fertile, although now generally ill-cultivated; but in the neighbourhood of Sidon there are rich gardens and orchards; "and here," says Mr. Porter, "are oranges, lemons, figs, almonds, plums, apricots, peaches, pomegranates, pears, and bananas, all growing luxuriantly, and forming a forest of finely-tinted foliage" (*Handbook for Syria*, ii. 398). The havens of Tyre and Sidon afforded water of sufficient depth for all the requirements of ancient navigation, and the neighbouring range of the Lebanon, in its extensive forests, furnished what then seemed a nearly inexhaustible supply of timber for ship-building. To the north of *Bostrenus*, between that river and *Beirut*, lies the only bleak and barren part of Phœnicia. It is crossed by the ancient *Tamyras* or *Damuras*, the modern *Nahr el-Damir*. From *Beirut*, the plains are again fertile. The principal streams are the *Lycus*, now the *Nahr el-Keb*, not far north from *Beirut*; the *Adonis*, now the *Nahr Ibrahim*, about five miles south of *Gabal*; and the *Eleutherus*, now the *Nahr el-Kelb*, in the bend between Tripolis and Antaratad.

In reference to the period when the Phœnicians had lost their independence, scarcely any two Greek and Roman writers give precisely the same geographical boundaries to Phœnicia. Herodotus uses an expression which seems to imply that he regarded its northern extremity, as corresponding with the

Myriandrian Bay, or Bay of Issus (iv. 38). It is doubtful where exactly he conceived it to terminate at the south (iii. 5). Ptolemy is distinct in making the river *Eleutherus* the boundary, on the north, and the river *Chorseus*, on the south. The *Chorseus* is a small stream or torrent, south of Mount Carmel and of the small Canaanitish city *Dor*, the inhabitants of which the tribe of Manasseh was confessedly unable to drive out (Judg. i. 27). This southern line of Ptolemy coincides very closely with the southern boundary of Pliny the Elder, who includes *Dor* in Phœnicia, though the southern boundary specified by him is a stream called *Crocodilon*, now *Nahr Zurka*, about two miles to the north of *Caesarea*. Pliny's northern boundary, however, is different, as he makes it include *Antaratad*. Again, the geographer *Strabo*, who was contemporary with the beginning of the Christian era, differs from *Herodotus*, *Ptolemy*, and *Pliny*, by representing Phœnicia as the district between *Orthusia* and *Pelusion* (xvi. 21), which would make it include not only Mount Carmel, but likewise *Caesarea*, *Joppa*, and the whole coast of the *Philistines*.

In the Old Testament, the word Phœnicia does not occur, as might be expected from its being a Greek name. In the Apocrypha, it is not defined, though spoken of as being, with *Coele-Syria*, under one military commander (2 Macc. iii. 5, 8, viii. 8, x. 11; 3 Macc. iii. 15). In the New Testament, the word occurs only in three passages, *Acts* xi. 19, xv. 3, xxi. 2; and not one of these affords a clue as to how far the writer deemed Phœnicia to extend. On the other hand, *Josephus* possibly agreed with *Strabo*; for he expressly says that *Caesarea* is situated in Phœnicia (*Ant.* xv. 9, §6); and although he never makes a similar statement respecting *Joppa*, yet he speaks, in one passage, of the coast of Syria, Phœnicia, and Egypt, as if Syria and Phœnicia exhausted the line of coast on the Mediterranean Sea to the north of Egypt (*B. J.* iii. 9, §2). [E. T.]

**PHOENICIANS.** The name of the race who in earliest recorded history inhabited Phœnicia, and who were the great maritime and commercial people of the ancient world. For many centuries they bore somewhat of the same relation to other nations which the Dutch bore, though less exclusively, to the rest of Europe in the 17th century. They were, moreover, pre-eminent in colonization as well as in trade; and in their settlement of Carthage, producing the greatest general of antiquity, they proved the most formidable of all antagonists to Rome in its progress to universal empire. A complete history, therefore, of the Phœnicians would occupy a large extent of ground which would be foreign to the objects of this Dictionary. Still some notice is desirable of such an important people, who were in one quarter the nearest neighbours of the Israelites, and indirectly influenced their history in various ways. Without dwelling on matters which belong more strictly to the articles *TYRE* and *SIDON*, it may be proper to touch on certain points connected with the language, race, trade, and religion of the Phœnicians, which may tend to throw light on Biblical history and literature. The communication of letters by the Phœnicians to the European nations will likewise deserve notice.

1. The Phœnician language belonged to that family of languages which, by a name not altogether free from objection, but now generally adopted, is called "Semitic." Under this name are

<sup>a</sup> So called from the descendants of Shem (Gen. x. 1-20); nearly all of whom, as represented by nations,

are known to have spoken cognate languages. There have been hitherto two objections to the name.—1st That the

included three distinct branches:—1st, Arabic, to which belongs Aethiopian as an offshoot of the Southern Arabic or Himyaritic. 2ndly, Aramaic, the vernacular language of Palestine at the time of Christ, in which the few original words of Christ which have been preserved in writing appear to have been spoken (Matt. xxvii. 46; Mark v. 41; and mark especially Matt. xvi. 18, which is not fully significant either in Greek or Hebrew). Aramaic, as used in Christian literature, is called Syriac, and as used in the writings of the Jews, has been very generally called Chaldee. 3rdly, Hebrew, in which by far the greatest part of the Old Testament was composed. Now one of the most interesting points to the Biblical student, connected with Phœnician, is, that it does not belong to either of the two first branches, but to the third; and that it is in fact so closely allied to Hebrew, that Phœnician and Hebrew, though different dialects, may practically be regarded as the same language. This may be shown in the following way:—1st, in passages which have been frequently quoted (see especially Gesenius's *Monumenta Scripturae Linguae Phœniciae*, p. 231), testimony is borne to the kinship of the two languages by Augustine and Jerome, in whose time Phœnician or Carthaginian was still a living language. Jerome, who was a good Hebrew scholar, after mentioning, in his Commentaries on Jeremiah, lib. v. c. 25, that Carthage was a Phœnician colony, proceeds to state—"Unde et Pœni sermone corrupto quasi Phœni appellantur, quorum lingua Hebræae lingue magna ex parte confinis est." And Augustine, who was a native of Africa, and a bishop there of Hippo, a Tyrian colony, has left on record a similar statement several times. In one passage he says of the two languages, "Istae lingue non multum inter se differunt" (*Questiones in Heptateuchum*, vii. 16). In another passage he says, "Cognatæ sunt istae lingue et vicinae, Hebræa, et Punica, et Syra" (*In Joann. Tract.* 15). Again, on Gen. xviii. 9, he says of a certain mode of sneaking (Gen. viii. 9), "Locutio est, quam propterea Hebræorum puto, quia et Punice lingue familiarissima est, in qua multa invenimus Hebræis verbis consonantia" (lib. i. locut. 24). And on another occasion, remarking on the word Messiah, he says, "quod verbum Punice lingue consonum est, sicut alia Hebræa multa et poene omnia" (*Contra Iulianum Petilianum*, ii. c. 104). 2ndly, These statements are fully confirmed by a passage of Carthaginian preserved in the *Pœnulus* of Plautus, act v. scene 1, and accompanied by a Latin translation as part of the play. There is no doubt that the Carthaginians and the Phœnicians were the same race; and the Carthaginian extract is undeniably intelligible through Hebrew to Hebrew scholars (see Bochart's *Canaan*; and especially Gesenius's *Monumenta Phœniciae*, p. 357-382, where the passage is translated with notes, and full justice is done to the previous translation of Bochart). 3rdly, The close kinship of the two languages is, moreover, strikingly confirmed by very many Phœnician and Carthaginian names of places and persons, which, destitute of meaning in Greek and Latin,

language of the Egyptians and Assyrians (see ver. 22) belonged to a different family. 2ndly, That the Phœnicians, as Canaanites, are derived from Ham (Gen. x. 6). If the recent interpretations of Assyrian inscriptions are admitted to prove the identity of Assyrian with Aramaic or Syriac, the objection to the word "Semitic" nearly disappears. Mr. Max Müller, a high authority on such a point, regards it as certain, that the inscriptions of

through which languages they have become widely known, and having sometimes in those languages occasioned false etymologies, become really significant in Hebrew. Thus through Hebrew it is known that Tyre, as *Tîr*, signifies "a rock," referring doubtless to the rocky island on which the city was situated: that Sidon, as *Tsidôn*, means "Fishing" or "Fishery," which was probably its occupation of its first settlers: that Carthage, as it was originally called, "Carthada," means "New Town," or "Newton;" and that Byrsa, which, as a Greek name, suggested the etymological notion of the Bull's Hide (*Aeneid*, l. 360-7), was simply the citadel of Carthage—*Carthagina arces*, as Virgil accurately termed it: the Carthaginian name of it, softened by the Greeks into *Bôpora*, being merely the Hebrew word *Botrah*, "citadel;" identical with the word called *Botrah* in the English Version of Isaiah lxiii. 1. Again, through Hebrew, the names of celebrated Carthaginians, though sometimes disfigured by Greek and Roman writers, acquire a meaning. Thus Dido is found to belong to the same root as David, "beloved;" meaning "be-love," or "delight;" i. e. the love or delight either of Baal or of her husband: Hasmudol is the man "whose help Baal is;" Hamilcar the man whom the god "Milkar graciously granted" (comp. Hannibal; *Ædæpor*): and, with the substitution of Baal for El or God, the name of the renowned Hannibal is found to be identical in form and meaning with the name of Hanniel, who is mentioned in Num. xxxiv. 23 as the prince of the tribe of Manasseh: Hanniel meaning the grace of God, and Hannibal the grace of Baal. 4thly, The same conclusion arises from the examination of Phœnician inscriptions, preserved to the present day; all of which can be interpreted, with more or less certainty, through Hebrew. Such inscriptions are of three kinds:—1st, on gems and seals; 2ndly, on coins of the Phœnicians and of their colonies; 3rdly, on stone. The first class are few, unimportant, and for the most part of uncertain age. The oldest known coins with Phœnician words belong to Tarsus and other Cilician cities, and were struck in the period of the Persian dominion. But coins are likewise in existence of Tyre, Sidon, and other cities of Phœnicia; though all such are of later date, and belong to the period either of the Seleucidæ, or of the Romans. Moreover, other coins have been found belonging to cities in Sicily, Sardinia, Africa, and Spain. The inscriptions on stones are either of a public or a private character. The former are comparatively few in number, but relate to various subjects: such, for example, as the dedication of a temple, or the commemoration of a Numidian victory over the Romans. The private inscriptions were either in the nature of obelisks erected as testimonials of gratitude to some deity, or were sepulchral memorials engraved on tombstones. Phœnician inscriptions on stone have been found not only in all the countries last mentioned, except Spain, but likewise in the island of Cyprus near Citium, in Malta, at Attene, at Marseilles, and at Sidon.\*

Nineveh, as well as of Babylon, are Semitic.—*Lectures on the Science of Language*, p. 360.

\* Movers and Flûgel, supported by the Egyptian Magnum, adopt "melidâ" or "melidâ," as the etymology of Dido, in the sense of "travelled," or "wanderer." Although a possible derivation, this seems less probable itself, and less countenanced by Hebrew analogies.

\* In 1837 a collection of all Phœnician inscriptions

II. Concerning the original race to which the Phœnicians belonged, nothing can be known with certainty, because they are found already established along the Mediterranean Sea at the earliest dawn of authentic history, and for centuries afterwards there is no record of their origin. According to Herodotus (vi. 89), they said of themselves in his time that they came in days of old from the shores of the Red Sea—and in this there would be nothing in the slightest degree improbable, as they spoke a language analogous to that of the Arabians, who inhabited the east coast of that sea; and both Hebrew and Arabic, as well as Aramaic, are seemingly derived from some one Semitic language now lost. Still neither the truth nor the falsehood of the tradition can now be proved; for language, although affording strong presumptions of race, is not conclusive on the point, as is shown by the language at present spoken by the descendants of the Normans in France. But there is one point respecting their race which can be proved to be in the highest degree probable, and which has peculiar interest as bearing on the Jews, viz. that the Phœnicians were of the same race as the Canaanites. This remarkable fact, which, taken in connexion with the language of the Phœnicians, leads to some interesting results, is rendered probable by the following circumstances:—1st. The native name of Phœnicia, as already pointed out, was *Canaan*, a name signifying "lowland." [PHOENICIA.] This was well given to the narrow strip of plain between the Lebanon and the Mediterranean Sea, in contrast to the elevated mountain range adjoining; but it would have been inappropriate to that part of Palestine conquered by the Israelites, which was undoubtedly a hill-country (see Meyer, *Das Phœnizische Alterthum*, Theil 1 p. 5); so that, when it is known that the Israelites at the time of their invasion found in Palestine a powerful tribe called the Canaanites, and from them called Palestine, the land of Canaan, it is obviously suggested that the Canaanites came originally from the neighbouring plain, called Canaan, along the sea-coast. 2dly. This is further confirmed through the name in Africa whereby the Carthaginian Phœnicians called themselves, as attested by Augustine, who states that the peasants in his part of Africa, if asked of what race they were, would answer, in Punic or Phœnician, "Canaanites." "Interrogati rustici nostri quid sint, Punicæ respondentes, Canani, corruptè vellet sicut in talibus unâ litterâ (accusate enim dicere debebant Chanani) quid aliud respondent quam Chananaei" (*Opera Omnia*, iv. 1285; *Exposit. Epist. ad Rom.* §13). 3dly. The conclusion thus suggested is strongly supported by the tradition that the names of persons and places in the land of Canaan—not only when the Israelites invaded it, but likewise previously, when there were yet but a few of them, and Abraham is said to have visited it—were Phœnician or Hebrew: such, for example, as Abimelek, "Father of the king" (Gen. xx. 2); Melchizedek, "King of righteousness" (xiv. 18); Kirjath-sepher, "city of the book" (Josh. xv. 15).

Gen known, with translations and notes, was published by Gossius, the great Hebrew lexicographer, who by his vast knowledge and unrivalled clearness has done more than any one scholar since Buxtorf to facilitate the study of Hebrew. His opinion on the relation of Phœnician to Hebrew is, "Omnino hoc tenendum est, plerique et poene omnes cum Hebræis convenire, sive radices spectas, sive ætatem et formationem et flectendorum rationem" (*Lex. Hebrææ* p. 267).

\* It seems to be admitted by philologists that either

As this obviously leads to the conclusion that the Hebrews adopted Phœnician as their own language, or, in other words, that what is called the Hebrew language was in fact "the language of Canaan," as a prophet called it (Is. xix. 18), and this not merely poetically, but literally and in philological truth; and as this is repugnant to some preconceived notions respecting the peculiar people, the question arises whether the Israelites might not have translated Canaanitish names into Hebrew. On this hypothesis the names now existing in the Bible for persons and places in the land of Canaan would not be the original names, but merely the translations of those names. The answer to this question is, 1st. That there is not the slightest direct mention, nor any indirect trace, in the Bible, of any such translation. 2dly. That it is contrary to the analogy of the ordinary Hebrew practice in other cases; as, for example, in reference to the names of the Assyrian monarchs (perhaps of a foreign dynasty) Pul, Tiglath-Pileser, Sennacherib, or of the Persian monarchs Darius, Ahasuerus, Artaxerxes, which remain unintelligible in Hebrew, and can only be understood through other Oriental languages. 3dly. That there is an absolute silence in the Bible as to there having been any difference whatever in language between the Israelites and the Canaanites, although in other cases where a difference existed, that difference is somewhere alluded to, as in the case of the Egyptians (Ps. lxxxi. 5, cxiv. 1), the Assyrians (Is. xxvii. 11), and the Chaldees (Jer. v. 15). Yet in the case of the Canaanites there was stronger reason for alluding to it; and without some allusion to it, if it had existed, the narration of the conquest of Canaan under the leadership of Joshua would have been singularly imperfect.

It remains to be added on this point, that although the previous language of the Hebrews must be mainly a matter for conjecture only, yet it is most in accordance with the Pentateuch to suppose that they spoke originally Aramaic. They came through Abraham, according to their traditions, from Ur of the Chaldees in Mesopotamia, where Aramaic at a later period is known to have been spoken; they are instructed in Deuteronomy to say that an Aramaean (Syrian) ready to perish was their father: (xxvi. 5); and the two earliest words of Aramaic contained in the Bible, *Yegar shehâbâd*, are, in the Book of Genesis, put into the mouth of Laban, the son of Abraham's brother, and first cousin of Isaac (xxxi. 47).<sup>4</sup>

III. In regard to Phœnician trade, as connected with the Israelites, the following points are worthy of notice. 1. Up to the time of David, not one of the twelve tribes seems to have possessed a single harbour on the sea-coast: it was impossible therefore that they could become a commercial people. It is true that according to Judg. i. 31, combined with Josh. xix. 26, Acher or Acre, with its excellent harbour, had been assigned to the tribe of Asher; but from the same passage in Judges it seems certain that the tribe of Asher did not really obtain possession of Acre, which continued to be held by

Hebrew, Aramaic, or Arabic, is derived the one from the other; just as the same may be said of Italian, Spanish, and Portuguese (see Lewis, *On the Romance Languages*, p. 42). It is a question, however, which of the three languages, Hebrew, Aramaic, and Arabic, is likely to resemble most the original Semitic language. First, one of the best Aramaic scholars now living, is in favour of Aramaic (*Lehrjahrbuch der Aramäischen Idioms*, p. 2). But his opinion has been strongly impugned in favour of Hebrew (Beck's *Einführung in das A. T.* p. 76).

the Canaanites. However wisely, therefore, the Israelites might regard the wealth accruing to their neighbours the Phoenicians from trade, to vie with them in this respect was out of the question. But from the time that David had conquered Edom, an opening for trade was afforded to the Israelites. The command of Ezion-geber near Elath, in the land of Edom, enabled them to engage in the navigation of the Red Sea. As they were novices, however, at sailing, as the navigation of the Red Sea, owing to its currents, winds, and rocks, is dangerous even to modern sailors, and as the Phoenicians, during the period of the independence of Edom, were probably allowed to trade from Ezion-geber, it was politic in Solomon to permit the Phoenicians of Tyre to have docks, and build ships at Ezion-geber on condition that his sailors and vessels might have the benefit of their experience. The results seem to have been strikingly successful. The Jews and Phoenicians made profitable voyages to Ophir in Arabia, whence gold was imported into Judaea in large quantities; and once in three years still longer voyages were made, by vessels which may possibly have touched at Ophir, though their imports were not only gold, but likewise silver, ivory, apes, and peacocks, 1 K. x. 22. [TARSHISH.] There seems at the same time to have been a great direct trade with the Phoenicians for cedar-wood (ver. 27), and generally the wealth of the kingdom reached an unprecedented point. If the union of the tribes had been maintained, the whole sea-coast of Palestine would have afforded additional sources of revenue through trade; and perhaps even ultimately the "great plain of Sidon" itself might have formed part of the united empire. But if any possibilities of this kind existed, they were destroyed by the disastrous secession of the ten tribes; a heavy blow from which the Hebrew race has never yet recovered during a period of nearly 3000 years.\*

2. After the division into two kingdoms, the curtain falls on any commercial relation between the Israelites and Phoenicians until a relation is brought to notice, by no means brotherly, as in the fleets which navigated the Red Sea, nor friendly, as between buyers and sellers, but humiliating and exasperating, as between the buyers and the bought. The relation is meant which existed between the two nations when Israelites were sold as slaves by Phoenicians. It was a custom in antiquity, when one nation went to war against another, for merchants to be present in one or other of the hostile camps, in order to purchase prisoners of war as slaves. Thus at the time of the Maccabees, when a large army was sent by Lysias to invade and subdue the land of Judah, it is related that "the merchants of the country, hearing the fame of them, took silver and gold very much with servants, and came into the camp to buy the children of Israel for slaves" (1 Macc. iii. 41), and when it is related that, at the capture of Jerusalem by Antiochus Epiphanes, the enormous number of 40,000 men were slain in battle, it is added that there were "no fewer

sold than slain" (2 Macc. v. 14; *Credner's Jod. p. 243*). Now this practice, which is thus illustrated by details at a much later period, undoubtedly prevailed in earlier times (*Odyss. x. 437*; *Herod. i. 1*), and is alluded to in a threatening manner against the Phoenicians by the prophet (*Joel iii. 4*, and *Am. i. 9, 10*), about 800 years before Christ.<sup>1</sup> The circumstances which led to the state of things may be thus explained. After the division of the two kingdoms, there is no trace of any friendly relation between the kingdom of Judah and the Phoenicians: the interest of the latter rather led them to cultivate the friendship of the kingdom of Israel; and the Israelitish king, Ahab, had a Sidonian princess as his wife (1 K. xxi. 31). Now, not improbably in consequence of these relations, when Jehoshaphat king of Judah endeavoured to restore the trade of the Jews in the Red Sea, and for this purpose built large ships at Ezion-geber to go to Ophir for gold, he did not admit the Phoenicians to any participation in the venture, and when king Ahaziah, Ahab's son, asked to have a share in it, his request was distinctly refused (1 K. xxi. 48, 49). That attempt to renew the trade of the Jews in the Red Sea failed, and in the reign of Jehoram, Jehoshaphat's son, Edom revolted from Judah and established its independence; so that if the Phoenicians wished to despatch trading vessels from Ezion-geber, Edom was the power which it was mainly their interest to conciliate, and not Judah. Under these circumstances the Phoenicians seem not only to have purchased and to have sold again as slaves, and probably in some instances to have kidnapped inhabitants of Judah, but even to have sold them to their enemies the Edomites (*Joel. Amos, as above*). This was regarded with horror as a departure from the old brotherly covenant, when Hiram was a great lover of David, and subsequently had the most friendly commercial relations with David's son; and this may be regarded as the original foundation of the hostility of the Hebrew prophets towards Phoenician Tyre. (*Is. xlviii. 13, xlviii.*)

3. The only other notice in the Old Testament of trade between the Phoenicians and the Israelites is in the account given by the prophet Ezekiel of the trade of Tyre (xxvii. 17). While this account supplies valuable information respecting the various commercial dealings of the most illustrious of Phoenician cities [TYRE], it likewise makes direct mention of the exports to it from Palestine. These were wheat, honey (*i. e.* syrup of grapes), oil, and balm. The export of wheat deserves attention concerning the other exports, see *HOFER, On, &c.*, because it shows how important it must have been to the Phoenicians to maintain friendly relations with their Hebrew neighbours, and especially with the adjoining kingdom of Israel. The wheat is called wheat of Minith,<sup>2</sup> which was a town of the Amorites, on the other side of Jordan, only once mentioned elsewhere in the Bible: and it is not certain whether Minith was a great inland city

\* After the disruption, the period of union was looked back to with endless longing.

In *Joel iii. 6* (*Heb. iv. 6*), "sons of the Ionians," *i. e.* of the Greeks, is the most natural translation of *Benek-Yavanim*. But there is a Yawan mentioned in *Arabia Felix*, and there is still a Yawan in Yemen: and both *Credner* and *Fürst* think that, looking to *Am. i. 9*, an Arabian people, and not Grecians, are here alluded to. The threat, however, of selling the Phoenicians in turn to the Sabaeans, "a people far off,"

which seems to imply that the Yavanim were not "far off," tends to make it improbable that the Yavanim were near the Sabaeans, as they would have been in *Arabia Felix*.

<sup>1</sup> In ver. 17 the word "Pannag" occurs, which is not found elsewhere. Opinions are divided as to whether it is the name of a place, like Minith, or the name of an article of food; "sweet cake," for example. Perhaps one can really do more than make a guess as to the place. The evidence for each meaning is somewhat slender.

them, where large purchases of corn were made, or whether the wheat in its neighbourhood was peculiarly good, and gave its name to all wheat of a certain fineness in quality. Still, whatever may be the correct explanation respecting Minnith, the only countries specified for exports of wheat are Judah and Israel, and it was through the territory of Israel that the wheat would be imported into Phœnicia. It is suggested by Heeren in his *Historical Researches*, ii. 117, that the fact of Palestine being thus, as it were, the granary of Phœnicia, explains in the clearest manner the lasting peace that prevailed between the two countries. He observes that with many of the other adjoining nations the Jews lived in a state of almost continual warfare; but that they never once engaged in hostilities with their nearest neighbours the Phœnicians. The fact itself is certainly worthy of special notice; and is the more remarkable, as there were not wanting tempting occasions for the interference of the Phœnicians in Palestine if they had desired it. When Elijah at the brook Kishon, at the distance of not more than thirty miles in a straight line from Tyre, put to death 450 prophets of Baal (1 K. xviii. 40), we can well conceive the agitation and anger which such a deed must have produced at Tyre. And at Sidon, more especially, which was only twenty miles farther distant from the scene of slaughter, the first impulse of the inhabitants must have been to march forth at once in battle array to strengthen the hands of Jezebel, their own princess, in behalf of Baal, their Phœnician God. When again afterwards, by means of falsehood and treachery, Jehu was enabled to massacre the worshippers of Baal in the land of Israel, we cannot doubt that the intelligence was received in Tyre, Sidon, and the other cities of Phœnicia, with a similar burst of horror and indignation to that with which the news of the Massacre on St. Bartholomew's day was received in all Protestant countries; and there must have been an intense desire in the Phœnicians, if they had the power, to invade the territories of Israel without delay and inflict signal chastisement on Jehu (2 K. x. 18-28). The fact that Israel was their granary would undoubtedly have been an element in restraining the Phœnicians, even on occasions such as these; but probably still deeper motives were likewise at work. It seems to have been part of the settled policy of the Phœnician cities to avoid attempts to make conquests on the continent of Asia. For this there were excellent reasons in the position of their small territory, which with the range of Lebanon on one side as a barrier, and the sea on the other, was naturally defensible by a wealthy power having command of the sea, against second or third-rate powers, but for the same reason was not well situated for offensive war on the land side. It may be added that a pacific policy was their manifest interest as a commercial nation, unless by war they were morally certain to obtain an important accession of territory, or unless a warlike policy was an absolute necessity to prevent the formidable pre-eminence of any one great neighbour. At last, however, they even carried their system of non-interference in continental wars too far, if it would have been possible for them by any alliances in Syria and Coele-Syria to prevent the establishment on the side of the Lebanon of one great empire. From that moment their ultimate doom was sealed, and it was merely a question of time as to the arrival of the fatal hour when they would lose

their independence. But too little is known of the details of their history to warrant an opinion as to whether they might at any time by any course of policy have raised up a barrier against the empire of the Assyrians or Chaldees.

IV. The religion of the Phœnicians is a subject of vast extent and considerable perplexity in details, but of its general features as bearing upon the religion of the Hebrews there can be no doubt. As opposed to Monotheism, it was a Pantheistic personification of the forces of nature, and in its most philosophical shadowing forth of the Supreme powers, it may be said to have represented the male and female principles of production. In its popular form, it was especially a worship of the sun, moon, and five planets, or, as it might have been expressed according to ancient notions, of the seven planets—the most beautiful, and perhaps the most natural, form of idolatry ever presented to the human imagination. These planets, however, were not regarded as lifeless globes of matter, obedient to physical laws, but as intelligent animated powers, influencing the human will, and controlling human destinies. An account of the different Phœnician gods named in the Bible will be found elsewhere [see BAAL, ASHTAROTH, ASHERAH, &c.]; but it will be proper here to point out certain effects which the circumstance of their being worshipped in Phœnicia produced upon the Hebrews.

1. In the first place, their worship was a constant temptation to Polytheism and idolatry. It is the general tendency of trade, by making merchants acquainted with different countries and various modes of thought, to enlarge the mind, to promote the increase of knowledge, and, in addition, by the wealth which it diffuses, to afford opportunities in various ways for intellectual culture. It can scarcely be doubted that, owing to these circumstances, the Phœnicians, as a great commercial people, were more generally intelligent, and as we should now say civilized, than the inland agricultural population of Palestine. When the simple-minded Jews, therefore, came in contact with a people more versatile and, apparently, more enlightened than themselves, but who nevertheless, either in a philosophical or in a popular form, admitted a system of Polytheism, an influence would be exerted on Jewish minds, tending to make them regard their exclusive devotion to their own one God, Jehovah, however transcendent His attributes, as unsocial and morose. It is in some such way that we must account for the astonishing fact that Solomon himself, the wisest of the Hebrew race, to whom Jehovah is expressly stated to have appeared twice—once, not long after his marriage with an Egyptian princess, on the night after his sacrificing 1000 burnt offerings on the high place of Gibeon, and the second time, after the consecration of the Temple—should have been so far beguiled by his wives in his old age as to become a Polytheist, worshipping, among other deities, the Phœnician or Sidonian goddess Ashtaroth (1 K. iii. 1-5, ix. 2, xi. 1-5). This is not for a moment to be so interpreted, as if he ever ceased to worship Jehovah, to whom he had erected the magnificent Temple, which in history is so generally connected with Solomon's name. Probably, according to his own erroneous conceptions, he never ceased to regard himself as a loyal worshipper of Jehovah, but he at the same time deemed this not incompatible with sacrificing at the altars of other gods likewise. Still the fact remains, that Solomon, who by his Temple in its ultimate results did so much for

establishing the doctrine of one only God, died himself a practical Polytheist. And if this was the case with him, Polytheism in other sovereigns of inferior excellence can excite no surprise. With such an example before him, it is no wonder that Ahab, an essentially bad man, should after his marriage with a Sidonian princess not only openly tolerate, but encourage, the worship of Baal; though it is to be remembered even in him, that he did not disavow the authority of Jehovah, but, when rebuked by his great antagonist Elijah, he rent his clothes, and put sackcloth on his flesh, and showed other signs of contrition evidently deemed sincere (1 K. xvi. 31, xxi. 27-29). And it is to be observed generally that although, before the reformation of Josiah (2 K. xxiii.), Polytheism prevailed in Judah as well as Israel, yet it seems to have been more intense and universal in Israel, as might have been expected from its greater proximity to Phœnicia: and Israel is sometimes spoken of as if it had set the bad example to Judah (2 K. xvii. 19; Jer. iii. 8); though, considering the example of Solomon, this cannot be accepted as a strict historical statement.

2. The Phœnician religion was likewise in other respects deleterious to the inhabitants of Palestine, being in some points essentially demoralizing. For example, it sanctioned the dreadful superstition of burning children as sacrifices to a Phœnician god. "They have built also," says Jeremiah, in the name of Jehovah (xix. 5), "the high places of Baal, to burn their sons with fire for burnt offerings unto Baal, which I commanded not, nor spake it, neither came it into my mind" (comp. Jer. xxxii. 35). This horrible custom was probably in its origin founded on the idea of sacrificing to a god what was best and most valuable in the eyes of the suppliant; but it could not exist without having a tendency to stifle natural feelings of affection, and to harden the heart. It could scarcely have been first adopted otherwise than in the infancy of the Phœnician race; but grown-up men and grown-up nations, with their moral feelings in other respects cultivated, are often the slaves in particular points of an early-implanted superstition, and it is worthy of note that, more than 250 years after the death of Jeremiah, the Carthaginians, when their city was besieged by Agathocles, offered as burnt sacrifices to the planet Saturn, at the public expense, 200 boys of the highest aristocracy; and, subsequently, when they had obtained a victory, sacrificed the most beautiful captives in the like manner (Diod. xx. 14, 65). If such things were possible among the Carthaginians at a period so much later, it is easily conceivable how common the practice of sacrificing children may have been at the time of Jeremiah among the Phœnicians generally: and if this were so, it would have been certain to prevail among the Israelites who worshipped the same Phœnician gods; especially as, owing to the intermarriages of their forefathers with Canaanites, there were probably few Israelites who may not have had some Phœnician blood in their veins (Judg. iii. 5). Again, parts of the Phœnician religion, especially

<sup>b</sup> Whatever else the arrested sacrifice of Isaac symbolizes (Gen. xxii. 13), it likewise symbolizes the substitution in sacrifices of the inferior animals for children. Faith, if commanded, was ready to sacrifice even children; but the Hebrews were spared this dreadful trial, and were permitted to substitute sheep, and goats, and bulls.

<sup>c</sup> In Hebrew there is a root *Kadash*, from which is *Kadosh*, a noun with the double meaning of the "East" and "ancient time." With the former sense, Cadmus

the worship of Astarte, tended to encourage dissoluteness in the relations of the sexes, and even to sanctify impurities of the most abominable description. Connected with her temples and images there were male and female prostitutes, whose polluted gains formed part of the sacred fund appropriated to the service of the goddess. And, to complete the deification of immorality, they were even known by the name of the "consecrated." Nothing can show more clearly how deeply this baneful example had eaten into the hearts and habits of the people, notwithstanding positive prohibitions and the repeated denunciations of the Hebrew prophets, than the almost incredible fact that, previous to the reformation of Josiah, this class of persons was allowed to have houses or tents close to the temple of Jehovah, whose treasury was perhaps even replenished by their gains. (2 K. xxiii. 7; Deut. xxiii. 17, 18; 1 K. xiv. 24, xv. 12, xxii. 46; Hos. iv. 14; Job xxxvi. 14; Lucian, *Lucius*, 35; *De Deâ Syrd*, 27, 51; Gesenius, *Thesaurus*, s. v. *קדש*, p. 1196; Movers, *Phœnicier*, i. p. 678, 68; Spencer, *De Legibus Hebræorum*, i. p. 561.)

V. The most important intellectual invention of man, that of letters, was universally ascribed by the Greeks and Romans to have been communicated by the Phœnicians to the Greeks. The earliest written statement on the subject is in Herodotus, v. 57, 58, who incidentally, in giving an account of Harmodius and Aristogeiton, says that they were by race Gephyraeans; and that he had ascertained by inquiry that the Gephyraeans were Phœnicians, amongst those Phœnicians who came over with Cadmus<sup>1</sup> into Boeotia, and instructing the Greeks in many other arts and sciences, taught them likewise letters. It was an easy step from this to believe, as many of the ancients believed, that the Phœnicians invented letters.

"Phœnices primi, famae ac creditur, and  
Mansurum rudibus vocem signare figuris."

LUCAN'S *Pharsal.* iii. 214, 221.

This belief, however, was not universal; and Pliny the Elder expresses his own opinion that they were of Assyrian origin, while he relates the opinion of Gellius that they were invented by the Egyptians, and of others that they were invented by the Syrians (*Nat. Hist.* vii. 57). Now, as Phœnicia has been shown to be nearly the same language as Hebrew, the question arises whether Hebrew throws any light on the time or the mode of the invention of letters, on the question of who invented them, or on the universal belief of antiquity that the knowledge of them was communicated to the Greeks by the Phœnicians. The answer is as follows: Hebrew literature is as silent as Greek literature respecting the precise date of the invention of letters, and the name of the inventor or inventors; but the name of the letters in the Hebrew alphabet is in accordance with the belief that the Phœnicians communicated the knowledge of letters to the Greeks: for many of the names of letters in the Greek alphabet, though without meaning in Greek,

might mean "Eastern," or one from the East, like the name "Norman," or "Fleming," or, still more closely, the "Western" or "Southern," in English. With the latter sense for *Kadash*, the name would mean "Olden" or "Ancient," and an etymological significance might be given to a line of Sophocles, in which Cadmus is mentioned:

"Ὁ γὰρ Κἀδμω τοῦ ὠδᾶς ὁδὸν ἔρηψεν."

*Only 79 p. 1*

have a meaning in the corresponding letters of Hebrew. For example: the four first letters of the Greek alphabet, Alpha, Beta, Gamma, Delta, are not to be explained through the Greek language; but the corresponding four first letters of the Hebrew alphabet, viz. Aleph, Beth, Gimel, Daleth, being essentially the same words, are to be explained in Hebrew. Thus in Hebrew Aleph or Eleph means an ox; Beth or Bayith a house; Gamal a camel; and Deleth a door. And the same is essentially, though not always so clearly, the case with almost all the sixteen earliest Greek letters said to have been brought over from Phœnicia by Cadmus, ΑΒΓΔΕΦΙΚΑΜΝΟΠΞΤ; and called on this account Phœnician or Cadmean letters (*Herodot.* l. c.; *Pliny, Hist. Nat.* vii. 57; *Jelf's Greek Gram.* l. p. 2). Moreover, as to writing, the ancient Hebrew letters, substantially the same as Phœnician, agree closely with ancient Greek letters—a fact which, taken by itself, would not prove that the Greeks received them from the Phœnicians, as the Phœnicians might possibly have received them from the Greeks; but which, viewed in connexion with Greek traditions on the subject, and with the significance of the letters in Hebrew, seems reasonably conclusive that the letters were transported from Phœnicia into Greece. It is true that modern Hebrew writing and the later Greek writing of antiquity have not much resemblance to each other; but this is owing partly to gradual changes in the writing of Greek letters, and partly to the fact that the character in which Hebrew Bibles are now printed, called the Assyrian or square character, was not the one originally in use among the Jews, but seems to have been learnt in the Babylonian captivity, and afterwards gradually adopted by them on their return to Palestine. (*Gesenius, Geschichte der Hebräischen Sprache und Schrift*, p. 156.)

As to the mode in which letters were invented, some clue is afforded by some of the early Hebrew and the Phœnician characters, which evidently imaged, although very rudely, like the drawing of very young children, to represent the object which the name of the letter signified. Thus the earliest Alpha has some vague resemblance to an ox's head, Beta to a camel's back, Daleth to the door of a house, Vau to a hook or peg. Again, the written name, called respectively, Lamed (an ox-goad), Ayin (an eye), Qoph (the back of the head), Reish or Roash (a head), and Tav (a cross), are all efforts, more or less successful, to portray the things signified by them. It is said that this is equally true of the Phœnician phonetic hieroglyphics; but, however this may be, there is no difficulty in understanding in the formation of an alphabet; when the representing the component sounds or half-sounds of a word by figures was once conceived. The original idea of thus representing sounds, particularly felicitous, was by no means new, and millions of men lived and died without arriving to any one of them.

In conclusion, it may not be unimportant to state, although so many letters of the Greek alphabet have a meaning in Hebrew or Phœnician, that the sixteenth letter, afterwards disused, and now given by the name of Igamma (from Dionysius, l. c.), unquestionably the same as the Hebrew letter Kaph).

The strongest argument of Gesenius against the invention of the letters is, that although doubtless of the names are both Aramaic and Hebrew, some are not Aramaic; at least, not in the Hebrew

yet their Greek names are not in the Hebrew or Phœnician, but in the Aramaic form. There is a peculiar form of the noun in Aramaic, called by grammarians the *status emphaticus*, in which the termination δ (N) is added to a noun, modifying it according to certain laws. Originally this termination was probably identical with the definite article "ha;" which, instead of being prefixed, was subjoined to the noun, as is the case now with the definite article in the Scandinavian languages. This form in δ is found to exist in the oldest specimen of Aramaic in the Bible, *Yeqer sahaduth*, in *Genesis xxxi. 47*, where *saheaduth*, testimony, is used by Laban in the *status emphaticus*. Now it is worthy of note that the names of a considerable proportion of the "Cadmean letters" in the Greek alphabet are in this Aramaic form, such as Alpha, Beta, Gamma, Delta, Eta, Theta, Iota, Kappa, Lambda; and although this fact by itself is not sufficient to support an elaborate theory on the subject, it seems in favour, as far as it goes, of the conjecture that when the Greeks originally received the knowledge of letters, the names by which the several letters were taught to them were Aramaic. It has been suggested, indeed, by Gesenius, that the Greeks themselves made the addition in all these cases, in order to give the words a Greek termination, as "they did with other Phœnician words, as melet, μάλητα, nevel, νάβλα." If, however, a list is examined of Phœnician words naturalized in Greek, it will not be found that the ending in δ has been the favourite mode of accommodating them to the Greek language. For example, the following sixteen words are specified by *Heek (Einleitung in die A. T.*, p. 69), as having been communicated through the Phœnicians to the Greeks: *νάρδος* = nérel; *κιννάμωμον* = kinna-môn; *σάπφειρος* = sapphr; *μόρρα*, *μόρον* = mor-kasia, *κασσία* = ketziah; *δασσως* = dazôn; *λίβανος*, *λίβανωτός* = levanôh; *βύσσος* = bûtz; *κόνινον* = kammon; *μύνα* = mian; *φύκος* = phuk; *σικκίμνος* = shikkim; *νάβλα* = nével; *κινύρα* = kinûr; *γάμηλος* = gâmal; *ἀρραβών* = arrabôn. Now it is remarkable that, of these sixteen, only four end in α in Greek which have not a similar termination in Hebrew; and, of these four, one is a late Alexandrine translation, and two are names of musical instruments, which, very probably, may first have been communicated to Greeks, through Syrians, in Asia Minor. And, under any circumstances, the proportion of the Phœnician words which end in α in Greek is too small to warrant the inference that any common practice of the Greeks in this respect will account for the seeming fact that nine out of the sixteen Cadmean letters are in the Aramaic *status emphaticus*. The inference, therefore, from their endings in α remains unshaken. Still this must not be regarded in any way as proving that the alphabet was invented by those who spoke the Aramaic language. This is a wholly distinct question, and far more obscure; though much deference on the point is due to the opinion of Gesenius, who, from the internal evidence of the names of the Semitic letters, has

signification: while the Syrians use other words to express the same ideas. Thus *קלף* in Aramaic means only 1000, and not an ox; the word for "door" in Aramaic is not *דלת*, but *תרע*: while the six following names of Cadmean letters are not Aramaic: *יו*, *יוד*, *כ*, *כים*, *ס*, *סב* (*סב* תו קוף פום).

arrived at the conclusion that they were invented by the Phoenicians (*Paläographie*, p. 294).

*Literature*.—In English, see Kenrick's *Phoenicia*, London, 1855; in Latin, the second part of Bochart's *Geographia Sacra*, under the title "Canaan," and Gesenius's work, *Scripturae Linguaeque Phoeniciae Monumenta quaeque supersunt*, Lipsiae, 1837; in German, the exhaustive work of Movers, *Die Phoenizier*, and *Das Phoenizische Alterthum*, 5 vols., Berlin, 1841-1856; an article on the same subject by Movers, in Ersch and Gruber's *Encyclopaedia*, and an article in the same work by Gesenius on *Paläographie*. See likewise, Gesenius's *Geschichte der Hebräischen Sprache und Schrift*, Leipzig, 1815; Bleek's *Einführung in das Alte Testament*, Berlin, 1860. Phoenician inscriptions discovered since the time of Gesenius have been published by Judas, *Étude démonstrative de la langue Phénicienne et de la langue Libyque*, Paris, 1847, and forty-five other inscriptions have been published by the Abbé Bourgade, Paris, 1852, fol. In 1845 a votive tablet was discovered at Marseilles, respecting which see Movers' *Phoenizische Texte*, 1847. In 1855, an inscription was discovered at Sidon on the sarcophagus of a Sidonian king named Eschmunazar, respecting which see Dietrich's *Zwei Sidonische Inschriften, und eine alte Phoenizische Königsinschrift*, Marburg, 1855, and Ewald's *Erklärung der grossen Phoenizischen Inschrift von Sidon*, Göttingen, 1856, 4to.; from the seventh volume of the *Abhandlungen der Königlich Preussischen Gesellschaft zu Göttingen*. Information respecting these works, and others on Phoenician inscriptions, is given by Bleek, pp. 64, 65. [E. T.]

PHOROS (Φόρος: *Phares, Foro*) = PAROSH (1 Esdr. v. 9, ix. 26).

PHRYGIA (Φρυγία: *Phrygia*). Perhaps there is no geographical term in the New Testament which is less capable of an exact definition. Many maps convey the impression that it was co-ordinate with such terms as Bithynia, Cilicia, or Galatia. But in fact there was no Roman province of Phrygia till considerably after the first establishment of Christianity in the peninsula of Asia Minor. The word was rather ethnological than political, and denoted, in a vague manner, the western part of the central region of that peninsula. Accordingly, in two of the three places where it is used, it is mentioned in a manner not intended to be precise (*διελθόντες τὴν Φρυγίαν καὶ τὴν Γαλατικὴν χώραν*, Acts xvi. 6; *διερχόμενος καθέξῃς τὴν Γαλατικὴν χώραν καὶ Φρυγίαν*, Acts xviii. 23), the former having reference to the second missionary journey of St. Paul, the latter to the third. Nor is the remaining passage (Acts ii. 10) inconsistent with this view, the enumeration of those foreign Jews who came to Jerusalem at Pentecost (though it does follow, in some degree, a geographical order) having no reference to political boundaries. By Phrygia we must understand an extensive district, which contributed portions to several Roman provinces, and varying portions at different times. As to its physical characteristics, it was generally a table-land, but with considerable variety of appearance and soil. Several towns mentioned in the New Testament were Phrygian towns; such, for instance, as Iconium and Colossae; but it is better to class them with the provinces to which they politically belonged. All over this district the Jews were probably numerous. They were first introduced there by Antiochus the Great (Joseph. *Ant.* xii. 3, §4); and we have abundant proof of their

presence there from Acts xiii. 14, xiv. 1, 18, as well as from Acts ii. 10. [See PHILIP, 83-4 a.] [J. S. H.]

PHUD (Φούδ) = PHUT (Jud. ii. 23; comp. Ez. xxvii. 10).

PHURAH (פּוּרָה: *Phur*; *Phur*). Galeb's servant, probably his armour-bearer (comp. 1 Sam. xiv. 1), who accompanied him in his midnight call to the camp of the Midianites (Judg. vii. 16, 17).

PHURIM (פּוּרִים: *phurim*), Latin, n. l. [PURIM.]

PHUT, PUT (פּוּט: *Phut*, *Albus*; *Phut*, *Phut*, *Libyes*, *Libya*, *Africa*), the third name in the list of the sons of Ham (Gen. x. 6; 1 Chr. i. 8, elsewhere applied to an African country or people. In the list it follows Cush and Mizraim, and precedes Canaan. The settlements of Cush emanated from Babylonia to Ethiopia above Egypt, those of Mizraim stretched from the Philistine frontier through Egypt and along the northern coast of Africa to the west; and the Canaanites were established at first in the land of Canaan, but afterwards were spread abroad. The order seems to be ascending towards the north: the Canaanites, then the settlements being the most southern, the Mizraim chain extending above them, though perhaps through a smaller region, at least at the first, and the Canaanites holding the most northern position. We cannot place the tract of Phut out of Africa, and it would thus seem that it was almost parallel to that of the Mizraim, as it could not be further to the north: this position would well agree with Libya. But it must be recollected that the order of the nations or tribes of the stocks of Cush, Mizraim, and Canaan, is not the same as that we have referred to be that of the principal names, and that it is also possible that Phut may be mentioned in a supplementary manner, perhaps as a nation or country dependent on Egypt.

The few mentions of Phut in the Bible clearly indicate, as already remarked, a country or people of Africa, and it must be added, probably not far from Egypt. It is noticeable that they occur only in the list of Noah's descendants and in the prophetic Scriptures. Isaiah probably makes mention of Phut as a remote nation or country, when the A. V. has PUT, as in the Mesopotamia (Is. lxvi. 19). Nahum, warning Nineveh by the fall of No-Amon, speaks of Cush and Mizraim in the strength of the Egyptian city, and Phut and Lubim as its helpers (iii. 9). Jeremiah tells of Phut in Necho's army with Cush and the Ludim (xli. 9). Ezekiel speaks of Phut with Persia and Lud as supplying mercenaries to Tyre (xxv. 16), and as sharing with Cush, Lud, and other helpers of Egypt, in her fall (xxx. 5); and again, with Persia, and Cush, perhaps in the sense of mercenaries, as warriors of the army of Gog (xxxviii. 5).

From these passages we cannot infer anything as to the exact position of this country or people, unless indeed in Nahum, Cush and Phut, Mizraim and Lubim, are respectively connected, which would indicate a position south of Egypt. The bearing of the Egyptian army, and importance of Phut to Egypt, make it reasonable to suppose that its position was very near.

In the ancient Egyptian inscriptions we find two names that may be compared to the Biblical Phut. The tribes or peoples called the Nine Sons of PETU or IX NA-PETU, might partly or wholly represent Phut. Their situation is doubtful, and they are never found in a geographical list, but only

al statements of the power and prowess. If one people be indicated by them, compare the Naphtuhim of the Bible. [M.] It seems unlikely that the Nine d correspond to Phut, as their name ur as a geographical term in use in the torical inscriptions, though it may be at several well-known names there take those of individual tribes; but this is ble explanation. The second name is ia, TO-PET, "the region of the Bow," TO-MERU-PET, "the region, the island," whence we conjecture the name of me. In the geographical lists the latter in that of a people, ANU-MERU-PET, ce all others, in the lists of the southern countries as well as the northern. The e read PET is an unstrung bow, which was read KENS, as a strung bow is wing, as if a determinative, the latter is a name of Nubia, perhaps, however, ag so large a territory as the names ioned. The reading KENS is extremely cause the word does not signify bow in as far as we are aware, and still more bow is used as the determinative of its which from the Egyptian usage as to ves makes it almost impossible that it employed as a determinative of KENS. KENS would therefore be followed by indicate that it was a part of Nubia. it may be illustrated by a passage of explained by Mr. Harris of Alexandria, use that the unstrung bow is the com- und, like the strung bow, is so used as symbol of Nubia. The historian relates ing of the Ethiopians unstrung a bow, to the messengers of Cambyses, telling y that when the king of the Persians so strong a bow so easily, he might come Ethiopians with an army stronger than (iii. 21, 22, ed. Rawlinson: Sir G. note). For the hieroglyphic names see *Geogr. Inschr.*

ic **ⲡⲏⲩⲁⲓⲧ** must also be com- Phut. The first syllable being the article, arly resembles the Hebrew name. It is the western part of Lower Egypt beyond and Champollion conjectures it to mean part of Egypt, so called by the Greeks, the Coptic name of the similar eastern

**ⲡⲁⲣⲁⲃⲓⲁ. ⲧⲁⲣⲁⲃⲓⲁ**, the ian part of Egypt and Arabian Nome *sous les Pharaons*, ii. pp. 28-31, 243). it may, the name seems nearer to M than to Phut. To take a broad view tion, al. the names which we have men- be reasonably connected with the Hebrew it may be supposed that the Naph- e Mizrites in the territory of Phut, rrmixed with peoples of the latter stock. rer, reasonable to suppose that the PET ent Egyptians, as a geographical desig- esponds to the Phut of the Bible, which efore denote Nubia or the Nubians, the e are strictly to follow the Egyptian is identification would account for the Phut after Mizraim in the list in Ge- tstanding the order of the other names; has been from remote times a depen-

ency of Egypt, excepting in the short period of Ethiopian supremacy, and the longer time of Ethiopian independence. The Egyptian name of Cush, KEESH, is applied to a wider region well corresponding to Ethiopia. The governor of Nubia in the time of the Pharaohs was called Prince of KEESH, perhaps because his authority extended beyond Nubia. The identification of Phut with Nubia is not repugnant to the mention in the prophets: on the contrary, the great importance of Nubia in their time, which comprehended that of the Ethiopian supremacy, would account for their speaking of Phut as a support of Egypt, and as furnishing it with warriors.

The identification with Libya has given rise to attempts to find the name in African geography, which we shall not here examine, as such mere similarity of sound is a most unsafe guide. [R. S. F.]

**PHUVAH** (פִּזְוָה: פִּזְוָה: פִּזְוָה). One of the sons of Issachar (Gen. xlii. 13), and founder of the family of the PUNITES. In the A. V. of Num. xxvi. 23 he is called PUA, though the Heb. is the same; and in 1 Chr. vii. 1, PUAH is another form of the name.

**PHYGELLUS** (Φύγελλος, or Φύγελος: *Phygellus*), 2 Tim. i. 15. A Christian connected with those in Asia of whom St. Paul speaks as turned away from himself. It is open to question whether their repudiation of the Apostle was joined with a declension from the faith (see *Buddaeus, Eccl. Apostol.* ii. 310), and whether the open display of the feeling of Asia took place—at least so far as Phygellus and Hermogenes were concerned—at Rome. It was at Rome that Onesiphorus, named in the next verse, showed the kindness for which the Apostle invokes a blessing on his household in Asia: so perhaps it was at Rome that Phygellus displayed that change of feeling towards St. Paul which the Apostle's former followers in Asia avowed. It seems unlikely that St. Paul would write so forcibly if Phygellus had merely neglected to visit him in his captivity at Rome. He may have forsaken (see 2 Tim. iv. 16) the Apostle at some critical time when his support was expected: or he may have been a leader of some party of nominal Christians at Rome, such as the Apostle describes at an earlier period (Phil. i. 15, 16) opposing him there.

Dean Ellicott, on 2 Tim. i. 15, who is at variance with the ancient Greek commentators as to the exact force of the phrase "they which are in Asia," states various opinions concerning their aversion from St. Paul. The Apostle himself seems to have foreseen it (Acts xx. 30); and there is nothing in the fact inconsistent with the general picture of the state of Asia at a later period which we have in the first three chapters of the Revelation. [W. T. B.]

**PHYLACTERY.** [FRONTLETS.]

**PI-BESETH** (ⲡⲓⲃⲉⲥⲉⲩ: *Boubasetos*: *Bubastus*), a town of Lower Egypt, mentioned but once in the Bible (Ex. xxx. 17). In hieroglyphics its name is written BAHEST, BAST, and HA-BAHEST, followed by the determinative sign for an Egyptian city, which was probably not pronounced.

The Coptic forms are **ⲡⲁⲥⲧ**, with the article **ⲡⲓ** prefixed, **ⲡⲓⲧⲁⲥⲧⲉ**, **ⲡⲓⲧⲁⲥⲧ**, **ⲡⲓⲧⲁⲥⲧⲉ**, **ⲡⲓⲧⲁⲥⲧⲉ**, **ⲡⲓⲧⲁⲥⲧⲉ**, and the Greek. *Boubasetis*, *Ba-basetos*. The first and second hieroglyphic names

Bubastis was situated on the west bank of the Phusiac or Bubastite branch of the Nile, in the Bubastite nome about 40 miles from the central part of Memphis. Herodotus speaks of its site as having been raised by those who dug the canals for Sesostri, and afterwards by the labour of criminals under Sabaco the Ethiopian, or, rather, the Ethiopian dominion. He mentions the temple of the goddess Bubastis as well worthy of description, being more beautiful than any other known to him. It lay in the midst of the city, which, having been raised on mounds, overlooked it on every side. An artificial canal encompassed it with the waters of the Nile, and was beautified by trees on its bank. There was only a narrow approach leading to a lofty gateway. The enclosure thus formed was surrounded by a low wall, bearing sculptures; within was the temple, surrounded by a grove of fine trees (ii. 137, 138). Sir Gardner Wilkinson observes that the ruins of the city and temple confirm this account. The height of the mounds and the site of the temple are very remarkable, as well as the beauty of the latter, which was "of the finest red granite." It "was surrounded by a sacred enclosure, about 600 feet square . . . beyond which was a larger circuit, measuring 940 feet by 1200, containing the minor one and the canal." The temple is entirely ruined, but the names of Rameses II. of the xixth dynasty, Userken I. (Osorkon I.) of the xxiii, and Nekht-har-heb (Nectanebo I.) of the xxxth, have been found here, as well as that of the eponymous goddess BAST. There are also remains of the ancient houses of the town, and, "amidst the houses on the N.W. side are the thick walls of a fort, which protected the temple below" (Notes by Sir G. Wilkinson in Rawlinson's *Herodotus*, vol. ii. pp. 219, plan, and 102). Bubastis thus had a fort, besides being strong from its height.

There are scarcely any historical notices of Bubastis in the Egyptian annals. In Herodotus it is related that in the time of Bocchoris, a later first king of the third dynasty (B.C. 670), Bubastis, the goddess of the earth opened at Bubastis, and perished (Cory's *Ancient Fragments*, 233 et seq. 98, 99). This is remarkable, since though acts of earthquakes are frequent in Egypt, such an earthquake is of very rare occurrence. The notice in the list connected with Bubastis is the cause of the third dynasty (B.C. 670). The Bubastis kings (Ibid. pp. 124, 125). They are either foreigners or partly of foreign extraction, and it is probable that they chose Bubastis as their capital, or as an occasional residence, on account of its nearness to the military station. [B.D.] Thus it must have been a city of great importance when Esarhaddon thus threatened to be-  
"The young men of Aven and of Bubastis shall fall by the sword: and these [cities] shall go into captivity" (xxx. 17). Heliopolis and Bubastis were near together, and both in the route of a march from the East marching against Memphis. [B.D.]

**PICTURE.** In two of the three parts which "picture" is used in A. V. of idolatrous representations, either independent or more usually stones "portrayed," i. e. carved in low relief, or engraved and coloured (Ex. 34; Layard, *Nin. & Bab.* ii. 265, 266). Low pictures, in the modern sense, were unknown to the Jews; but coloured sketches or drawings on walls or on wood, as mosaics, must have been familiar to them, as Euseb. Wilkinson, *Anc. Eg.* ii. 277). In later Jewish records (*chadras*, *perahs*) pictures had been sent by Alexandra to Antony (Joseph. *Ant.* xiv. 56). The "pictures of silver" of Ex. 35 were probably wall-surfaces or curtain designs, and the "apples of gold" upon the fruit or foliage, like Solomon's flowers and granares (1 K. vi., vii.). The walls of houses were ornamented with pictures or painted in [BUCKES.]

**PIECE OF GOLD.** The A. V. renders the elliptical expression "six thousand of a piece" as "six thousand pieces of gold," a passage respecting Naaman, relating to "took with him ten talents of silver and a thousand of gold, and ten changes of raiment" (2 Kings 5: 10)—supplies "pieces" in the next verse. The similar expression respecting silver and gold is found in the same chapter (2 Kings 5: 13).

\* 1. מַשְׁכֵּית, from מִשְׁכָּה, "behold," with אֶחָד; ἁλός σκός; *insignis lapis* (Lev. xxvi. 1); A. V. "figured stone" (Num. xxxiii. 52); τῖτλος; *titulus*. In Ez. viii. 12, with חֹר, *cauteri cruciatis; absconditum cubiculi*; A. V. "chamber of images"; Luther, *scheinsten kammer*.

2. שִׁכְיָה, from same root (Is. 41: 11):  
 loud; quondam pulcherrima; and: from  
 of gold in pectus of silver: LXX as  
 in lectis argentis: Luther.

the word understood appears to be shekels, probably justifies the insertion of that definite word. [PIECE OF SILVER.] The same expression, if a weight of gold be here meant, is also found in the following passage: "And king Solomon made two hundred targets [of] beaten gold: six hundred of gold went to one target" (1 K. x. 16). Here the A. V. supplies the word "shekels," and there seems no doubt that it is right, considering the number mentioned, and that a common weight must be intended. That a weight of gold is meant in Naaman's case may be inferred, because it is extremely unlikely that coined money was already invented at the time referred to, and indeed that it was known in Palestine before the Persian period. [MONEY; DARIO.] Rings or ingots of gold may have been in use, but we are scarcely warranted in supposing that any of them bore the name of shekels, since the practice was to weigh money. The rendering "piece of gold" is therefore very doubtful; and "shekels of gold," as designating the value of the whole quantity, not individual pieces, is preferable. [R. S. P.]

**PIECE OF SILVER.** The passages in the O. T. and those in the N. T. in which the A. V. uses this term must be separately considered.

I. In the O. T. the word "pieces" is used in the A. V. for a word understood in the Hebrew, if we except one case to be afterwards noticed. The phrase is always "a thousand" or the like "of silver" (Gen. xx. 16, xxxvii. 28, xlv. 22; Judg. ix. 4, xvi. 5; 2 K. vi. 25; Hos. iii. 2; Zech. xi. 12, 13). In similar passages the word "shekels" occurs in the Hebrew, and it must be observed that these are either in the Law, or relate to purchases, some of an important legal character, as that of the cave and field of Machpelah, that of the threshing-floor and oxen of Araunah, or to taxes, and the like (Gen. xxiii. 15, 16; Ex. xxi. 32; Lev. xxvii. 3, 6, 16; Josh. vii. 21; 2 Sam. xxiv. 24; 1 Chr. xxi. 25, where, however, shekels of gold are spoken of; 2 K. xv. 20; Neh. v. 15; Jer. xxxii. 9). There are other passages in which the A. V. supplies the word "shekels" instead of "pieces" (Deut. xxii. 19, 29; Judg. xvii. 2, 3, 4, 10; 2 Sam. xviii. 11, 12), and of these the first two require this to be done. It becomes then a question whether there is any ground for the adoption of the word "pieces," which is vague if actual coins be meant, and inaccurate if weights. The shekel, be it remembered, was the common weight for money, and therefore most likely to be understood in an elliptical phrase. When we find good reason for concluding that in two passages (Deut. xxii. 19, 20) this is the word understood, it seems incredible that any other should be in the other places. The exceptional case in which a word corresponding to "pieces" is found in the Hebrew is in the Psalms, where presents of submission are prophesied to be made of "pieces of silver," *תְּרִיבִּיטִים* (Lxxviii. 30, Heb. 31). The word *תְּרִיבִּיטִים*, which occurs nowhere else, if it preserve its radical meaning, from *תְּרִיבִּיט*, must signify a piece broken off, or a fragment: there is no reason to suppose that a coin is meant.

II. In the N. T. two words are rendered by the phrase "piece of silver," drachma, *δραχμή*, and *ἀργύριον*. (1.) The first (Luke xv. 8, 9) should be represented by drachma. It was a Greek silver coin, equivalent, at the time of St. Luke, to the Roman *as*, which is probably intended by the

Evangelist, as it had then wholly or almost superseded the former. [DRACHMA.] (2.) The second word is very properly thus rendered. It occurs in the account of the betrayal of our Lord for "thirty pieces of silver" (Matt. xxvi. 15, xlvii. 3, 5, 6, 9). It is difficult to ascertain what coins are here intended. If the most common silver pieces be meant, they would be denarii. The parallel passage in Zechariah (xi. 12, 13) must, however, be taken into consideration, where, if our view be correct, shekels must be understood. It may, however, be suggested that the two thirties may correspond, not as of exactly the same coin, but of the chief current coin. Some light may be thrown on our difficulty by the number of pieces. It can scarcely be a coincidence that thirty shekels of silver was the price of blood in the case of a slave accidentally killed (Ex. xxi. 32). It may be objected that there is no reason to suppose that shekels were current in our Lord's time; but it must be replied that the tetradrachms of depreciated Attic weight of the Greek cities of Syria of that time were of the same weight as the shekels which we believe to be of Simon the Macabee [MONEY], so that Josephus speaks of the shekel as equal to four Attic drachmae (*Ant.* iii. 8, §2). These tetradrachms were common at the time of our Lord, and the piece of money found by St. Peter in the fish must, from its name, have been of this kind. [STATERO.] It is therefore more probable that the thirty pieces of silver were tetradrachms than that they were denarii. There is no difficulty in the use of two terms, a name designating the denomination and "piece of silver," whether the latter mean the tetradrachm or the denarius, as it is a vague appellation that implies a more distinctive name. In the received text of St. Matthew the prophecy as to the thirty pieces of silver is ascribed to Jeremiah, and not to Zechariah, and much controversy has thus been occasioned. The true explanation seems to be suggested by the absence of any prophet's name in the Syriac version, and the likelihood that similarity of style would have caused a copyist inadvertently to insert the name of Jeremiah instead of that of Zechariah. [R. S. P.]

**PIETY.** This word occurs but once in A. V.: "Let them learn first to show piety at home" (*οὐκ ἔστιν ὁλκον εὐσεβεῖν*, better, "towards their own household," 1 Tim. v. 4). The choice of this word here instead of the more usual equivalents of "godliness," "reverence," and the like, was probably determined by the special sense of *pietas*, as "erga parentes" (*Cic. Partit.* 22, *Rep.* vi. 15, *Tac.* ii. 23). It does not appear in the earlier English versions, and we may recognise in its application in this passage a special felicity. A word was wanted for *εὐσεβεῖν* which, unlike "showing godliness," would admit of a human as well as a divine object, and this *piety* supplied. [E. H. P.]

**PIGEON.** [TURTLE-DOVE.]

**PI-HAHIROTH** (פִּי־חֲהִירוֹת, פִּי־חֲהִירוֹת; *Ἰσραῆλ*, τὸ στόμα *Εἰρῶ*, *Εἰρῶ*: *Phihahiroth*), a place before or at which the Israelites encamped, at the close of the third march from Rameses, when they went out of Egypt. Pi-hahiroth was before Migdol, and on the other hand were Bael-zephon and the sea (Ex. xiv. 2, 9; Num. xxxiii. 7, 8). The name is probably that of a natural locality, from the unlikelihood that there should have been a town or village in both parts of the country where it is placed in addition to Migdol and Bael-zephon, which seem to have been, if not towns, at

least military stations, and its name is susceptible of an Egyptian etymology giving a sense apposite to this idea. The first part of the word is apparently treated by its omission as a separate prefix (Num. xxi. 8), and it would therefore appear to be the masculine definite article PE, PA, or PEE.

Jablonsky proposed the Coptic ΠΙ-ΔΧΙ-ΡΩΤ, "the place where sedge grows," and this, or a similar name, the late M. Fulgence Frenel recognised in the modern *Ghuweybet-el-boos*, "the bed of reeds." It is remarkable that this name occurs near where we suppose the passage of the Red Sea to have taken place, as well as near Suez, in the neighbourhood usually chosen as that of this miracle; but nothing could be inferred as to place from such a name being now found, as the vegetation it describes is fluctuating. [EXODUS, THE.] [R. S. P.]

**PILATE, PONTIUS** (Πόντιος Πίλατος: *Pontius Pilatus*, his praenomen being unknown). The name indicates that he was connected, by descent or adoption, with the gens of the Pontii, first conspicuous in Roman history in the person of C. Pontius Telesinus, the great Samnite general.<sup>a</sup> He was the sixth Roman procurator of Judaea, and under him our Lord worked, suffered, and died, as we learn, not only from the obvious Scriptural authorities, but from Tacitus (*Ann.* xv. 44, "Christus, Tiberio imperitante, per procuratorem Pontium Pilatum supplicio adfectus erat").<sup>b</sup> A procurator (ἐπίτροπος, Philo, *Ley. ad Caenam*, and Joseph. *B. J.* ii. 9, §2; but less correctly ἡγεμὼν, Matt. xxvii. 2; and Joseph. *Ant.* xviii. 3, §1) was generally a Roman knight, appointed to act under the governor of a province as collector of the revenue, and judge in causes connected with it. Strictly speaking, procurators *Caesaris* were only required in the imperial provinces, i. e. those which, according to the constitution of Augustus, were reserved for the special administration of the emperor, without the intervention of the senate and people, and governed by his legate. In the senatorian provinces, governed by proconsuls, the corresponding duties were discharged by quaestors. Yet it appears that sometimes procurators were appointed in those provinces also, to collect certain dues of the *fiscus* (the emperor's special revenue), as distinguished from those of the *aerarium* (the revenue administered by the senate). Sometimes in a small territory, especially in one contiguous to a larger province, and dependent upon it, the procurator was head of

the administration, and had full military and judicial authority, though he was responsible to the governor of the neighbouring province. Thus Judaea was attached to Syria upon the deposition of Archelaus (A. D. 6), and a procurator appointed to govern it, with Caesarea for its capital. Already, during a temporary absence of Archelaus, it had been in charge of the procurator Sabinus; then, after the ethnarch's banishment, came Copronius; the third procurator was M. Ambivivus; the fourth Azzus Rufus; the fifth Valerius Gratus; and the sixth Pontius Pilate (Joseph. *Ant.* xviii. 2, §2), who was appointed A. D. 25-6, in the twelfth year of Tiberius. One of his first acts was to remove its headquarters of the army from Caesarea to Jerusalem. The soldiers of course took with them their standards, bearing the image of the emperor, into the Holy City. No previous governor had ventured on such an outrage.<sup>c</sup> Pilate had been obliged to send them in by night, and there were no bounds to the rage of the people on discovering what had thus been done. They poured down a crowd to Caesarea where the Procurator was then residing, and besought him to remove the images. After five days of discussion, he gave the signal to some concealed soldiers to surround the petitioners, and put them to death unless they ceased to trouble him; but this only strengthened their determination, and they declared themselves ready rather to submit to death than forego their resistance to an idolatrous innovation. Pilate then yielded, and the standards were by his orders brought down to Caesarea (Joseph. *Ant.* xviii. 3, §1, 2, *B. J.* ii. 9, §2-4). On two other occasions he nearly drove the Jews to insurrection; the first when, in spite of the warning about the images, he hung up in his palace at Jerusalem some gilt shields inscribed with the names of deities, which were only removed by an order from Tiberius (Philo, *ad Caenam*, §38, 2. 502), the second when he appropriated the revenue arising from the redemption of vows (Curtius comp. Mark vii. 11) to the construction of an aqueduct. This order led to a riot, which he suppressed by sending among the crowd soldiers with concealed daggers, who massacred a great number, not only of rioters, but of casual spectators.<sup>d</sup> (Joseph. *B. J.* ii. 9, §4). To these specimens of his administration, which rest on the testimony of profane authors, we must add the slaughter of certain Galileans, which was told to our Lord as a piece of irony (ἀπαγγέλλοντες, Luke xiii. 1), and on which He

<sup>a</sup> The cognomen Pilatus has received two explanations. (1.) As armed with the *pilum* or javelin; comp. "pilata agmina," Virg. *Aen.* xii. 121. (2.) As contracted from *pilatus*. The fact that the *pilcus* or cap was the badge of manumitted slaves (comp. Suetonius, *Nero*, c. 57, *Tiber.* c. 4), makes it probable that the epithet marked him out as a *libertus*, or as descended from one.—[E. H. P.]

<sup>b</sup> Of the early history of Pilate we know nothing; but a German legend fills up the gap strangely enough. Pilate is the bastard son of Tyrus, king of Mayence. His father sends him to Rome as a hostage. There he is guilty of a murder; but being sent to Pontus, rises into notice as subduing the barbarous tribes there, receives in consequence the new name of Pontius, and is sent to Judaea. It has been suggested that the twenty-second legion, which was in Palestine at the time of the destruction of Jerusalem, and was afterwards stationed at Mayence, may have been in this case either the bearers of the tradition or the inventors of the fable. (Comp. Vilmar's *Deutsch. Nation. Liter.* i. p. 217).—[E. H. P.]

<sup>c</sup> Herod the Great, it is true, had placed the Roman eagle on one of his new buildings; but this has been fol-

lowed by a violent outbreak, and the attempt had not been repeated (Ewald, *Geschichte*, iv. 569). The extent to which the scruples of the Jews on this point were respected by the Roman governors, is shown by the fact that no deity of either god or emperor is found on the money coined by them in Judaea before the war under Senn. (vid. v. 25, referring to De Saulcy, *Recherches sur la Numismatique Judaïque*, pl. viii. ix.). Assuming this, the deities with Caesar's image and superscription of Matt. xxi. must have been a coin from the Roman mint, or that of some other province. The latter was probably current for the common purposes of life. The shield alone was removed as a Temple-offering.—[E. H. P.]

<sup>d</sup> Ewald suggests that the Tower of Siloam may have been part of the same works, and that this was the reason why its fall was looked on as a judgment (Guthrie, v. 40; Luke xiii. 4). The Pharisaic reverence for statues was set apart for the Corban (Mark vii. 13), and their scruples as to admitting into it anything that had a impure origin (Matt. xxvii. 4), may be regarded, perhaps, as outgrowths of the same feeling.—[E. H. P.]

framed some remarks on the connexion between sin and calamity. It must have occurred at some feast at Jerusalem, in the outer court of the Temple, since the blood of the worshippers was mingled with their sacrifices; but the silence of Josephus about it seems to show that riots and massacres on such occasions were so frequent that it was needless to recount them all.

It was the custom for the procurators to reside at Jerusalem during the great feasts, to preserve order, and accordingly, at the time of our Lord's last passover, Pilate was occupying his official residence in Herod's palace; and to the gates of this palace Jesus, condemned on the charge of blasphemy, was brought early in the morning by the chief priests and officers of the Sanhedrim, who were unable to enter the residence of a Gentile, lest they should be defiled, and unfit to eat the passover (John xviii. 28). Pilate therefore came out to learn their purpose, and demanded the nature of the charge. At first they seem to have expected that he would have carried out their wishes without further inquiry, and therefore merely described our Lord as a *κακῶς δόξας* (disturber of the public peace), but as a Roman procurator had too much respect for justice, or at least understood his business too well to consent to such a condemnation, and as they knew that he would not enter into theological questions, any more than Gallio afterwards did on a somewhat similar occasion (Acts xviii. 14), they were obliged to devise a new charge, and therefore interpreted our Lord's claims in a political sense, accusing him of assuming the royal title, perverting the nation, and forbidding the payment of tribute to Rome (Luke xxiii. 3; an account plainly presupposed in John xviii. 33). It is plain that from this moment Pilate was distracted between two conflicting feelings: a fear of offending the Jews, who had already grounds of accusation against him, which would be greatly strengthened by any show of lukewarmness in punishing an offence against the imperial government, and a conscious conviction that Jesus was innocent, since it was absurd to suppose that a desire to free the nation from Roman authority was criminal in the eyes of the Sanhedrim. Moreover, this last feeling was strengthened by his own hatred of the Jews, whose religious scruples had caused him frequent trouble, and by a growing respect for the calm dignity and meekness of the sufferer. First he examined our Lord privately, and asked Him whether He was a king? The question which He in return put to His judge, "Sayest thou this of thyself, or did others tell it thee of me?" seems to imply that there was in Pilate's own mind a suspicion that the prisoner really was what He was charged with being; a suspicion which shows itself again in the later question, "Whence art thou?" (John xix. 8), in the increasing desire to release Him (12), and in the refusal to alter the inscription on the cross (22). In any case Pilate accepted as satisfactory Christ's assurance that His kingdom was not of this world, that is, not worldly in its nature or objects, and therefore not to be founded by this world's weapons, though he could not understand the assertion that it was to be established by bearing witness to the truth. His famous reply, "What is

truth?" was the question of a worldly-minded politician, sceptical because he was indifferent, one who thought truth an empty name, or at least could not see "any connexion between ἀλήθεια and βασιλεία, truth and policy" (Dr. C. Wordsworth, *Comm.* in loco). With this question he brought the interview to a close, and came out to the Jews and declared the prisoner innocent. To this they replied that His teaching had stirred up all the people from Galilee to Jerusalem. The mention of Galilee suggested to Pilate a new way of escaping from his dilemma, by sending on the case to Herod Antipas, tetrarch of that country, who had come up to Jerusalem to the feast, while at the same time this gave him an opportunity for making overtures of reconciliation to Herod, with whose jurisdiction he had probably in some recent instance interfered. But Herod, though propitiated by this act of courtesy, declined to enter into the matter, and merely sent Jesus back to Pilate dressed in a shining kingly robe (*δοῦντα λαμπρὰ*, Luke xxiii. 11), to express his ridicule of such pretensions, and contempt for the whole business. So Pilate was compelled to come to a decision, and first, having assembled the chief priests and also the people, whom he probably summoned in the expectation that they would be favourable to Jesus, he announced to them that the accused had done nothing worthy of death, but at the same time, in hopes of pacifying the Sanhedrim, he proposed to scourge Him before he released Him. But as the accusers were resolved to have His blood, they rejected this concession, and therefore Pilate had recourse to a fresh expedient. It was the custom for the Roman governor to grant every year, in honour of the passover, pardon to one condemned criminal. The origin of the practice is unknown, though we may connect it with the fact mentioned by Livy (v. 13) that at a Lectisternium "vinctis quoque dempta vincula." Pilate therefore offered the people their choice between two, the murderer Barabbas,\* and the prophet whom a few days before they had hailed as the Messiah. To receive their decision he ascended the *βῆμα*, a portable tribunal which was carried about with a Roman magistrate to be placed wherever he might direct, and which in the present case was erected on a tessellated pavement (*λιθόστρωτον*) in front of the palace, and called in Hebrew *Gabbatha*, probably from being laid down on a slight elevation (*גבבא*, "to be high"). As soon as Pilate had taken his seat, he received a mysterious message from his wife, according to tradition a proselyte of the gate (*θεοσεβής*), named Procla or Claudia Procula (*Evang. Nicod.* ii.), who had "suffered many things in a dream," which impelled her to entreat her husband not to condemn the Just One. But he had no longer any choice in the matter, for the rabble, instigated of course by the priests, chose Barabbas for pardon, and clamoured for the death of Jesus; insurrection seemed imminent, and Pilate reluctantly yielded. But, before issuing the fatal order, he washed his hands before the multitude, as a sign that he was innocent of the crime, in imitation probably of the ceremony enjoined in Deut. xxi., where it is ordered that when the perpetrator of a murder is not discovered, the elders of the city in which it occurs shall wash

\* Comp. BARABBAR. Ewald suggests that the insurrection of which St. Mark speaks must have been that connected with the appropriation of the Corban (*repra*), and that this explains the eagerness with which the people

demanding his release. He infers further, from his name, that he was the son of a Rabbi (Abba was a Rabbinic title of honour), and thus accounts for the part taken in his favour by the members of the Sanhedrim.—[E. H. F.]

their hands, with the declaration, "Our hands have not shed this blood, neither have our eyes seen it." Such a practice might naturally be adopted even by a Roman, as intelligible to the Jewish multitude around him. As in the present case it produced no effect, Pilate ordered his soldiers to inflict the scourging preparatory to execution; but the sight of unjust suffering so patiently borne seems again to have troubled his conscience, and prompted a new effort in favour of the victim. He brought him out bleeding from the savage punishment, and decked in the scarlet robe and crown of thorns which the soldiers had put on him in derision, and said to the people, "Behold the man!" hoping that such a spectacle would rouse them to shame and compassion. But the priests only renewed their clamours for His death, and, fearing that the political charge of treason might be considered insufficient, returned to their first accusation of blasphemy, and quoting the law of Moses (Lev. xxiv. 16), which punished blasphemy with stoning, declared that He must die "because He made himself the Son of God." But this title *υἱὸς θεοῦ* augmented Pilate's superstitious fears, already aroused by his wife's dream (*μαῶλας φροβήθη*, John xix. 7); he feared that Jesus might be one of the heroes or demigods of his own mythology; he took Him again into the palace, and inquired anxiously into his descent ("Whence art thou?") and his claims, but, as the question was only prompted by fear or curiosity, Jesus made no reply. When Pilate reminded Him of his own absolute power over Him, He closed this last conversation with the irresolute governor by the mournful remark, "Thou couldest have no power at all against me, except it were given thee from above; therefore he that delivered me unto thee hath the greater sin." God had given to Pilate power over Him, and power only, but to those who delivered Him up God had given the means of judging of His claims; and therefore Pilate's sin, in merely exercising this power, was less than theirs who, being God's own priests, with the Scriptures before them, and the word of prophecy still alive among them (John xi. 50, xviii. 14), had deliberately conspired for His death. The result of this interview was one last effort to save Jesus by a fresh appeal to the multitude; but now arose the formidable cry, "If thou let this man go, thou art not Caesar's friend," and Pilate, to whom political success was as the breath of life, again ascended the tribunal, and finally pronounced the desired condemnation.<sup>4</sup>

So ended Pilate's share in the greatest crime which has been committed since the world began. That he did not immediately lose his feelings of anger against the Jews who had thus compelled his acquiescence, and of compassion and awe for the

Sufferer whom he had unrighteously sentenced, is plain from his curt and angry refusal to alter the inscription which he had prepared for the cross (*ὁ γέγραφα, γέγραφα*), his ready acquiescence in the request made by Joseph of Arimathea that the Lord's body might be given up to him rather than consigned to the common sepulchre reserved for those who had suffered capital punishment, and to sullen answer to the demand of the Sanhedrin that the sepulchre should be guarded.<sup>5</sup> And here, as in Scripture is concerned, our knowledge of Pilate's life ends. But we learn from Josephus (*Ant. rom. 18, §1*) that his anxiety to avoid giving offence to Caesar did not save him from political disaster. The Samaritans were unquiet and rebellious. A leader of their own race had promised to disclose to them the sacred treasures which Moses was reported to have concealed in Mount Gerizim.<sup>6</sup> Pilate led his troops against them, and defeated them easily enough. The Samaritans complained to Vitellius, now president of Syria, and he sent Pilate to Rome to answer their accusations before the emperor (*Ibid. §2*). When he reached it, he found Titus dead and Caius (Caligula) on the throne, A.D. 36. Eusebius adds (*H. E. ii. 7*) that soon afterwards "wearied with misfortunes," he killed himself. As to the scene of his death there are various traditions. One is, that he was banished to Vienna Allobroges (Vienne on the Rhone), where a singular monument, a pyramid on a quadrangular base, 52 feet high, is called Pontius Pilate's tomb (*Dictionary of Geography*, art. "Vienna"). Another is, that he sought to hide his sorrows on the mountains by the lake of Lucerne, now called *Monst Pilatus*; and then, after spending years in its recesses, in remorse and despair rather than penitence, plunged into the dismal lake which occupies its summit. According to the popular belief, "a form is often seen to emerge from the gloomy waters, and go through the action of one washing his hands; and when it does so, dark clouds of mist gather first round the bosom of the Infernal Lake, such it has been styled of old, and then, wrapping the whole upper part of the mountain in darkness, passage is tempted a hurricane, which is sure to follow in a short space" (*Scott, Anne of Geierstein*, ch. I.). (See below.)

We learn from Justin Martyr (*Apol. I. pp. 70, 64*, Tertullian (*Apol. c. 21*), Eusebius (*H. E. ii. 7*), and others, that Pilate made an official report to Tiberius of our Lord's trial and condemnation; and in a homily ascribed to Chrysostom, though marked as spurious by his Benedictine editors (*Hom. vi. in Pasch. vol. vii. p. 368, D*), certain fragments (*Acta, or Commentarii Pontii*) are spoken of as well-known documents in common circulation. That it made such a report is highly probable, and it may

<sup>4</sup> The proceedings of Pilate in our Lord's trial supply many interesting illustrations of the accuracy of the Evangelists, from the accordance of their narrative with the known customs of the time. Thus Pilate, being only a procurator, had no quæstor to conduct the trial, and therefore examined the prisoner himself. Again, in early times Roman magistrates had not been allowed to take their wives with them into the provinces, but this prohibition had fallen into neglect, and latterly a proposal made by Cæcina to enforce it had been rejected (*Tac. Ann. iii. 33, 34*). Grutius points out that the word *ἀντιπρόσωπος*, used when Pilate sends our Lord to Herod (*Luke xxiii. 7*) is "propria Romani juris vox: nam *remittitur reus qui alienam comprehensionem nullius habet aut originis aut habitationis*" (see Alford, *in loco*). The tessellated pavement (*διδασκαλεῖον*) was so necessary to the terms of Justice, as well as the *ἀίμα*, that Julius

Cæsar carried one about with him on his expeditions (*Suet. Jul. c. 46*). The power of life and death was taken from the Jews when Judaea became a province (*Joseph. Ant. xxi. 9, §1*). Scourging before execution was a well-known Roman practice.

<sup>5</sup> Matt. xxvii. 65, *ἔστε ἀσφαλισμένοι ἑαυτοὺς ἀποὶ τῆς ἀνάστασης ὡς οὐλοῦνται*. Elliott would translate this, "I am a guard," on the ground that the watchmen were Roman soldiers, who were not under the command of the priests. But some might have been placed at their disposal during the feast, and we should rather expect *ἔστω* if in sentence were imperative.

<sup>6</sup> Ewald (*Geschichte v. 43*) ventures on the supposition that this Samaritan leader may have been Simon Baras. The description fits in well enough, but the story of imposture was so large, that there are but slight grounds for fixing on him in particular.—[K. H. F.]

have been in existence in Chrysostom's time; but the *Acta Pilati* now extant in Greek, and two Latin spurious from him to the emperor (Fabric. *Apoc.* i. 297, 298, iii. 111, 456), are certainly spurious. (For further particulars see below.)

The character of Pilate may be sufficiently inferred from the sketch given above of his conduct as our Lord's trial. He was a type of the rich and corrupt Romans of his age; a worldly-minded statesman, conscious of no higher wants than those of this life, yet by no means unmoved by feelings of justice and mercy. His conduct to the Jews, in the instances quoted from Josephus, though severe, was not thoughtlessly cruel or tyrannical, considering the general practice of Roman governors, and the difficulties of dealing with a nation so arrogant and perverse. Certainly there is nothing in the facts recorded by profane authors inconsistent with his desire, obvious from the Gospel narrative, to save our Lord. But all his better feelings were overpowered by a selfish regard for his own security. He would not encounter the least hazard of personal annoyance in behalf of innocence and justice; the unrighteous condemnation of a good man was a trifle in comparison with the fear of the emperor's frown and the loss of place and power. While we do not differ from Chrysostom's opinion that he was *κακός* (Chrys. i. 802, *adv. Judæos*, vi.), or that recorded in the Apostolical Constitutions (v. 14), that he was *ἀναίδης*, we yet see abundant reason for our Lord's merciful judgment, "He that delivered me unto thee hath the greater sin." At the same time his history furnishes a proof that worldliness and want of principle are sources of crimes no less awful than those which spring from deliberate and reckless wickedness. The unhappy notoriety given to his name by its place in the two universal creeds of Christendom is due, not to any desire of singling him out for shame, but to the need of fixing the date of our Lord's death, and so bearing witness to the claims of Christianity to rest on a historical basis (August. *De Fide et Sym.* c. v. vol. vi. p. 156; Pearson, *On the Creed*, pp. 239, 240, ed. Burt, and the authorities quoted in note c). The number of dissertations on Pilate's character and all the circumstances connected with him, his "facinora," his "Christum servandi studium," his wife's dream, his supposed letters to Tiberius, which have been published during the last and present centuries, is quite overwhelming. The student may consult with advantage Dean Alford's *Commentary*; Elliott, *Historical Lectures on the Life of our Lord*, sect. vii.; Neander's *Life of Christ*, §285 (Bohn); Wimer, *Realenzyklopädie*, art. "Pilatus;" Ewald, *Geschichte*, v. 30, &c. [G. E. L. C.]

**ACTA PILATI.**—The number of extant *Acta Pilati*, in various forms, is so large as to show that very early the demand created a supply of documents manifestly spurious, and we have no reason for looking on any one of those that remain as more authentic than the others. The taunt of Celsus that the Christians circulated spurious or distorted narratives under this title (Orig. c. *Cels.*), and the complaint of Eusebius (*H. E.* ix. 5) that the heathens made them the vehicle of blasphemous calumnies, show how largely the machinery of falsification was used on either side. Such of these documents as are extant are found in the collections

of Fabricius, Thilo, and Tischendorf. Some of them are but weak paraphrases of the Gospel history. The most extravagant are perhaps the most interesting, as indicating the existence of modes of thought at variance with the prevalent traditions. Of these anomalies the most striking is that known as the *Paradosis Pilati* (Tischendorf *Evang. Apoc.* p. 426). The emperor Tiberius, startled at the universal darkness that had fallen on the Roman Empire on the day of the Crucifixion, summons Pilate to answer for having caused it. He is condemned to death, but before his execution he prays to the Lord Jesus that he may not be destroyed with the wicked Hebrews, and pleads his ignorance as an excuse. The prayer is answered by a voice from Heaven, assuring him that all generations shall call him blessed, and that he shall be a witness for Christ at His second coming to judge the twelve tribes of Israel. An angel receives his head, and his wife dies filled with joy, and is buried with him. Startling as this imaginary history may be, it has its counterpart in the traditional customs of the Abyssinian Church, in which Pilate is recognised as a saint and martyr, and takes his place in the calendar on the 25th of June (Stanley, *Eastern Church*, p. 13; Neale, *Eastern Church*, i. 806). The words of Tertullian, describing him as "jam pro sua conscientia Christianus" (*Apol.* c. 21), indicate a like feeling, and we find traces of it also in the Apocryphal Gospel, which speaks of him as "uncircumcised in flesh, but circumcised in heart" (*Evang. Nicod.* i. 12, in Tischendorf, *Evang. Apoc.* p. 236).

According to another legend (*Mors Pilati*, in Tischendorf's *Evang. Apoc.* p. 432), Tiberius, hearing of the wonderful works of healing that had been wrought in Judæa, writes to Pilate, bidding him to send to Rome the man that had this divine power. Pilate has to confess that he has crucified him; but the messenger meets Veronica, who gives him the cloth which had received the impress of the divine features, and by this the emperor is healed. Pilate is summoned to take his trial, and presents himself wearing the holy and seamless tunic. This acts as a spell upon the emperor, and he forgets his wonted severity. After a time Pilate is thrown into prison, and there commits suicide. His body is cast into the Tiber, but as storms and tempests followed, the Romans take it up and send it to Vienne. It is thrown into the Rhone; but the same disasters follow, and it is sent on to Losania (Lucerne or Lausanne?). There it is sunk in a pool, fenced round by mountains, and even there the waters boil or bubble strangely. The interest of this story obviously lies in its presenting an early form (the existing text is of the 14th century) of the local traditions which connect the name of the procurator of Judæa with the Mount Pilatus that overlooks the Lake of Lucerne. The received explanation (Ruskin, *Modern Painters*, v. p. 128) of the legend, as originating in a distortion of the descriptive name Mons Pileatus (the "cloud-capped"), supplies a curious instance of the *genesis* of a mythus from a false etymology; but it may be questioned whether it rests on sufficient grounds, and is not rather the product of a pseudo-critic's finding in a name the starting-point, not the embodiment of a legend. Have we any evidence that

\* This reference is given in an article by Leyrer in Herzog's *Real-Encycl.*, but the writer has been unable to verify it. The nearest approach seems to be the assertion

that no judgment fell on Pilate for his alleged crime (M. 28).

as piles of wood or stone, which in later times grew into ornamented pillars in honour of the deity (Clem. Alex. *CoA. ad Gent.* c. iv.; *Strom.* i. 24<sup>a</sup>). Instances of this are seen in the Attic Hermae (Paus. iv. 33, 4), seven pillars significant of the planets (iii. 21, 9, also vii. 17, 4, and 22, 2, viii. 37); and Arnobius mentions the practice of pouring libations of oil upon them, which again recalls the case of Jacob (*Adv. Gent.* i. 335, ed. Gauthier).

The termini or boundary-marks were originally, perhaps always, rough stones or posts of wood, which received divine honours (Ov. *Fast.* ii. 641, 684). [IDOL. p. 850 b.]

Lastly, the figurative use of the term "pillar," in reference to the cloud and fire accompanying the Israelites on their march, or as in Cant. iii. 6 and Rev. x. 1, is plainly derived from the notion of an isolated column not supporting a roof. [H. W. P.]

# PILLAR, PLAIN OF THE (צֶדֶק הָאֵלֹהִים):

τῇ βαλάνῃ τῇ εὐρετῇ τῆς στάσεως; Alex. omits τῇ εὐρετῇ: *querant quas stabat*), or rather "oak of the pillar"—that being the real signification of the Hebrew word *elān*. A tree which stood near Shechem, and at which the men of Shechem and the house of Millo assembled, to crown Abimelech son of Gideon (Judg. ix. 6). There is nothing said by which its position can be ascertained. It possibly derived its name of *Muttāb* from a stone or pillar set up under it; and reasons have been already adduced for believing that this tree may have been the same with that under which Jacob buried the idols and idolatrous trinkets of his household, and under which Joshua erected a stone as a testimony of the covenant there re-executed between the people and Jehovah. [MEONENIM.] There was both time and opportunity during the period of commotion which followed the death of Joshua for this sanctuary to return into the hands of the Canaanites, and the stone left standing there by Joshua to become appropriated to idolatrous purposes as one of the *Muttāb*s in which the religion of the aborigines of the Holy Land delighted. [IDOL. p. 850.] The terms in which Joshua speaks of this very stone (Josh. xxiv. 27) almost seem to overstep the bounds of mere imagery, and would suggest and warrant its being afterwards regarded as endowed with miraculous qualities, and therefore a fit object for veneration. Especially would this be the case if the singular expression, "it hath heard all the words of Jehovah our God which He spoke to us," were intended to indicate that this stone had been brought from Sinai, Jordan, or some other scene of the communications of Jehovah with the people. The Samaritans still show a range of stones on the summit of Gerizim as those brought from the bed of Jordan by the twelve tribes. [G.]

**PILLED** (Gen. xxx. 37, 38): **PEELED** (Is. xviii. 2; Ez. xxix. 18). The verb "to pill" appears in old Eng. as identical in meaning with "to peel = to strip," and in this sense is used in the above passages from Gen. Of the next stage in this mean-

ing as = *peeler*, we have traces in the word "pil-lage," *pilier*. If the difference between the two forms be more than accidental, it would seem, as if in the English of the 17th century "peel" was used for the latter signification. The "people scattered and peeled," are those that have been plundered of all they have.<sup>a</sup> The soldiers of Nebuchadnezzar's army (Ez. xxix. 18), however, have their shoulder *peeled* in the literal sense. The skin is worn off with carrying earth to pile up the mounds during the protracted siege of Tyre. [E. H. P.]

**PIL'TAI** (פִּלְטָי: *Pheltai*). The representative of the priestly house of Moadiah, or Maadiah, in the time of Joiakim the son of Jehshua (Neh. xii. 17).

**PINE-TREE.** 1. *Tidhr*,<sup>a</sup> from a root signifying to *revolve*. What tree is intended is not certain. Gesenius inclines to think the oak, as implying duration. It has been variously explained to be the Indian plane, the larch, and the elm (Celsius, *Hierob.* ii. 271). But the rendering "pine," seems least probable of any, as the root implies either curvature or duration, of which the latter is not particularly applicable to the pine, and the former remarkably otherwise. The LXX. rendering in Is. xli. 19, *βραβυδάριον*, appears to have arisen from a confused amalgamation of the words *beresh* and *tidhr*, which follow each other in that passage. Of these *beresh* is sometimes rendered "cypress," and might stand for "juniper." That species of juniper which is called *savin*, is in Greek *βραβύς*. The word *dad* is merely an expression in Greek letters for *tidhr*. (Pliny, xiv. 11, 61; Schleusener, s. v.; Celsius, *Hierob.* i. 78.) [FIR.]

2. *Shemen*<sup>1</sup> (Neh. viii. 15), is probably the wild olive. The cultivated olive was mentioned just before (Gen. p. 1437). [H. W. P.]

**PINNACLE** (τὸ πτερύγιον; *pinnaculum*: only in Matt. iv. 5, and Luke iv. 9). The word is used in O. T. to render, 1. *Cánaph*,<sup>a</sup> a wing or border, e. g. of a garment (Num. xv. 38; 1 Sam. xv. 27, xxiv. 4). 2. *Snapptr*, fin of a fish (Lev. xi. 9. So Arist. *Anim.* i. 5, 14). 3. *Kátsāh*, edge; A. V. end (Ex. xxviii. 26). Hesychius explains πρ. as *ἀκρωτήριο*.

It is plain, 1. that τὸ πτερ. is not a pinnacle, but the pinnacle. 2. That by the word itself we should understand an edge or border, like a feather or a fin. The only part of the Temple which answered to the modern sense of pinnacle was the golden spikes erected on the roof, to prevent birds from settling there (Joseph. *B. J.* v. 5, §6). To meet the sense, therefore, of "wing," or to use our modern word founded on the same notion, "aisle," Lightfoot suggests the porch or vestibule which projected, like shoulders on each side of the Temple (Joseph. *B. J.* v. 5, §4; Vitruv. iii. 2).

Another opinion fixes on the royal porch adjoining the Temple, which rose to a total height of 400 cubits above the valley of Jehoshaphat (Joseph. *Ant.* xv. 11, §5, xx. 9, §7).

<sup>a</sup> σημαίνει ὁ στίλος τὸ ἀνεκρινιστὸν τοῦ Θεοῦ.

<sup>b</sup> A double translation of the Hebrew word: *εὐρετῇ* originated in the erroneous idea that the word is connected with *עָצָה* "to find."

<sup>c</sup> This is given in the margin of the A. V.

<sup>d</sup> Comp. "peeling their prisoners," Milton, *P. R.* iv.

<sup>e</sup> To peel the chiefs, the people to devour."

Dryden, *Hom. Iliad* (Richardson)

<sup>a</sup> פִּלְטָי; *peutay*; *pinnaculum* (Is. lx. 13); from פִּלְטָי "revolve" (Gen. p. 323). In Is. xli. 19, *βραβυδάριον* ulmus.

<sup>b</sup> פִּלְטָי; *ξύλον κυπαρίσσινον*; *ignum pulcherrimum*.

<sup>c</sup> 1. פִּלְטָי; *περύγιον* *pinna*.

<sup>d</sup> 2. פִּלְטָי; *πτερ* *pinna*.

<sup>e</sup> 3. פִּלְטָי; *πτερ*: *summitas*.

Eusebius tells us that it was from "the pinnacle" (*τὸ πτερον*) that St. James was precipitated, and it is said to have remained until the 4th century (Euseb. *H. E.* ii. 23; Williams, *Holy City*, §. 338).

Perhaps in any case *τὸ πτερον* means the battlement ordered by law to be added to every roof. It is in favour of this that the word *Consep* is used to indicate the top of the Temple (Dan. ix. 27; Hammond, Grotius, Calmet, De Wette, Lightfoot, *T. Hebr. on Matth.* iv.). [H. W. P.]

**PINCEN** (פִּנְצֵן; *Phinon*). One of the "dukes" of Edom; that is, head or founder of a tribe of that nation (Gen. xxxvi. 41; 1 Chr. i. 52). By Eusebius and Jerome (*Onomasticon*, *Φινών*, and "Fenon") the seat of the tribe is said to have been at PINCEN, one of the stations of the Israelites in the Wilderness; which again they identify with Phano, "between Petra and Zour," the site of the famous Roman copper-mines. No name answering to Pinon appears to have been yet discovered in Arabic literature, or amongst the existing tribes.

**PIPE** (פִּיפֵי, *chafli*). The Hebrew word so rendered is derived from a root signifying "to bore, perforate," and is represented with sufficient correctness by the English "pipe" or "flute," as in the margin of 1 K. i. 40. It is one of the simplest and therefore, probably, one of the oldest of musical instruments, and in consequence of its simplicity of form there is reason to suppose that the "pipe" of the Hebrews did not differ materially from that of the ancient Egyptians and Greeks. It is associated with the tabret (*tôph*) as an instrument of a peaceful and social character, just as in Shakspeare (*Much Ado*, ii. 3), "I have known when there was no music with him but the drum and fife, and now had he rather hear the *tabor* and the *pipe*"—the constant accompaniment of merriment and festivity (Luke vii. 32), and especially characteristic of "the piping time of peace." The pipe and tabret were used at the banquets of the Hebrews (Is. v. 12), and their bridal processions (Mishna, *Baba metsia*, vi. 1), and accompanied the simpler religious services, when the young prophets, returning from the high-place, caught their inspiration from the harmony (1 Sam. x. 5); or the pilgrims, on their way to the great festivals of their ritual, beguiled the weariness of the march with psalms sung to the simple music of the pipe (Is. xxx. 29). When Solomon was proclaimed king the whole people went up after him to Gihon, piping with pipes (1 K. i. 40). The sound of the pipe was apparently a soft wailing note, which made it appropriate to be used in mourning and at funerals (Matt. ix. 23), and in the lament of the prophet over the destruction of Moab (Jer. xlviii. 36). The pipe was the type of perforated wind-instruments, as the harp was of stringed instruments (1 Macc. iii. 45), and was even used in the Temple-choir, as appears from Ps. lxxvii. 7, where "the players on instruments" are properly "pipers." Twelve days in the year, according to the Mishna (*Arach.* ii. 3), the pipes sounded before the altar; at the slaying of the First Passover, the slaying of the Second Passover, the first feast-day of the Passover, the first feast-day of the Feast of Weeks, and the eight days of the Feast of Tabernacles. On the last-mentioned occasion the playing on pipes accompanied the drawing of water from the fountain of Sionah (*Succah*, iv. 1, v. 1) for five and six days. The pipes which were played before the altar were

of reed, and not of copper or bronze, because the former gave a softer sound. Of these there were not less than two nor more than twelve. In some times the office of mourning at funerals became a profession, and the funeral and deathbed were now without the professional piper or flute-player (*αὐλητής*, Matt. ix. 23), a custom which still exists (comp. Ovid, *Fast.* vi. 560, "cantabat cithara tibia funeribus"). It was incumbent on even the poorest Israelite, at the death of his wife, to provide at least two pipers and one woman to make lamentation. [MUSIC, vol. ii. p. 444 A.]

In the social and festive life of the Egyptians the pipe played as prominent a part as among the Hebrews. "While dinner was preparing, the party was enlivened by the sound of music; and a band, consisting of the harp, lyre, guitar, tambourine, double and single pipe, flute, and other instruments, played the favourite airs and songs of the country" (Wilkinson, *Anc. Eg.* ii. 222). In the latter combinations of instruments used in Egyptian bands, we generally find either the double pipe or the flute, and sometimes both; the former was played both by men and women, the latter exclusively by women. The Egyptian single pipe, as described by Wilkinson (*Anc. Eg.* ii. 222), was "a straight tube, without any flanges at its mouth; and, when played, was held with both hands. It was of moderate length, apparently not exceeding a foot and a half, and many have been found much smaller; but these may have belonged to the peasants, without mentioning a pipe among the instruments of the Egyptian band. . . . Some have three, others four holes . . . and some are furnished with a small mouthpiece" of reed or thick straw. This instrument must have been something like the *Nâg*, or dervish's flute, which is described by Mr. Lane (*Mosul, Eg.* ii. chap. xix) "a simple reed, about 18 inches in length, one-eighth of an inch in diameter at the upper extremity, and three-quarters of an inch at the lower. It is pierced with six holes in front, and furnished with another hole at the back. . . . In the hands of a good performer the *nâg* yields fine, sweet tones; but it requires much practice to sound it well." The double pipe, which is found so frequently in Egyptian paintings, as the *nâg* was, "consisted of two pipes, perhaps sometimes joined together by a common mouthpiece, and played with the corresponding hand. It was common to the Greeks and other people, and, from the mode of holding it, received the name of right and left pipe, the *tibia dextra* and *sinistra* of the Romans; the latter had but few holes, and, emitting a low sound, served as a base. The other had many holes and gave a sharp tone" (Wilkinson, *Anc. Eg.* ii. 309, 310). It was played on chiefly by women who danced as they played, and is mentioned by modern Egyptians in their accounts of a kind of reed, a rude instrument, used principally by peasants and camel-drivers out of doors (*ibid.* pp. 61, 62). In addition to these is also found in the same sculptures a kind of flute, held with both hands and sometimes so long that the player was obliged to stretch his arms to their full length while playing.

Any of the instruments above described and have been called by the Hebrews by the same term *chafli*, and it is not improbable that they might have derived their knowledge of them from Egypt. The single pipe is said to have been an invention of the Egyptians alone, who called it

to Oquir (Jul. Poll. *Onomast.* iv. 17), and as the material of which it was made was the lotus-wood (Ovid, *Fast.* iv. 190, "horrendo lotos adunca sono") there may be some foundation for the conjecture. Other materials mentioned by Julius Pollux are reed, brass, box-wood, and horn. Pliny (xvi. 66) adds silver and the bones of asses. Bartenora, in his note on *Arachim*, ii. 3, above quoted, identifies the *chálil* with the French *chalumeau*, which is the German *schalmeie* and our *shawm* or *shalm*, of which the clarinet is a modern improvement. The *shawm*, says Mr. Chappell (*Pop. Mus.* i. 35, note b), "was played with a reed like the wayte, or hautboy, but being a bass instrument, with about the compass of an octave, had probably more the tone of a bassoon." This can scarcely be correct, or Drayton's expression, "the shrillest shawm" (*Polyol.* iv. 356), would be inappropriate. [W. A. W.]

PIRA (of *de Περὰς*), 1 Esdr. v. 19. Apparently a repetition of the name CAPHIRA in the former part of the verse.

PIRAM (פִּירָם: פִּירָם; Alex. *Φεραδμ*: *Pharadmu*). The Amorite king of Jarmuth at the time of Joshua's conquest of Canaan (Josh. x. 3). With his four confederates he was defeated in the great battle before Gibeon, and fled for refuge to the cave at Makkedah, the entrance to which was closed by Joshua's command. At the close of the long day's slaughter and pursuit, the five kings were brought from their hiding-place, and hanged upon five trees till sunset, when their bodies were taken down and cast into the cave "wherein they had been hid" (Josh. x. 27).

PIR'ATHON (פִּירְאֲתוֹן: *Φαραθόν*; Alex. *Φαραθόν*: *Pharathon*), "in the land of Ephraim in the mount of the Amalekite;" a place named nowhere but in Judg. xii. 15, and there recorded only as the burial-place of Abdon ben-Hillel the Pirathonite, one of the Judges. Its site was not known to Eusebius or Jerome; but it is mentioned by the accurate old traveller hap-Parchi as lying about two hours west of Shechem, and called *Fer'ata* (*Asher's Benjamin of Tud.* ii. 426). Where it stood in the 14th cent. it stands still, and is called by the same name. It was reserved for Dr. Robinson to rediscover it on an eminence about a mile and a half south of the road from Jaffa by *Hableh* to *Nablés*, and just six miles, or two hours, from the last (Robinson, iii. 134).

Of the remarkable expression "the mount (or mountain district) of the Amalekite," no explanation has yet been discovered beyond the probable fact that it commemorates a very early settlement of that roving people in the highlands of the country.

Another place of the same name probably existed near the south. But beyond the mention of PHARATHON in 1 Mac. ix. 50, no trace has been found of it. [G.]

PIR'ATHONITE (פִּירְאֲתוֹנִי and פִּירְאֲתוֹנִי: *Φαραθωνίτης*, *Φαραθωνί*, *ἐκ Φαραθών*: *Pharathonites*), the native of, or dweller in, PIRATHON. Two such are named in the Bible. 1. Abdon ben-Hillel (Judg. xii. 13, 15), one of the minor judges

of Israel. In the original the definite article is present, and it should be rendered "the Pirathonite."

2. From the same place came "Beniah the Pirathonite of the children of Ephraim," captain of the eleventh monthly course of David's army (1 Chr. xxvii. 14) and one of the king's guard (2 Sam. xxiii. 30; 1 Chr. xi. 31). [G.]

PISGAH (פִּזְגָּה, with the def. article *הַפִּזְגָּה*, in Deut. iii. 17, xxxiv. 1, and in Joshua, elsewhere *τὸ λαζευμένον*\* or *ἡ λαζευρή*: *Phasgai*). An ancient topographical name which is found in the Pentateuch and Joshua only, in two connexions.

1. The top, or head, of the Pisgah (פִּזְגָּה), Num. xxi. 20, xxiii. 14; Deut. iii. 27, xxxiv. 1.

2. Ashdod hap-Pisgah, perhaps the springs, or roots, of the Pisgah, Deut. iii. 17, iv. 49; Josh. xii. 3, xiii. 20.

The latter has already been noticed under its own head. [ASHDOTH-PISGAH.] Of the former but little can be said. "The Pisgah" must have been a mountain range or district, the same as, or a part of that called the mountains of Abarim (comp. Deut. xxxii. 49 with xxxiv. 1). It lay on the east of Jordan, contiguous to the field of Moab, and immediately opposite Jericho. The field of Zophim was situated on it, and its highest point or summit—its "head"—was the Mount Nebo. If it was a proper name we can only conjecture that it denoted the whole or part of the range of the highlands on the east of the lower Jordan. In the late Targums of Jerusalem and Pseudojonathan, Pisgah is invariably rendered by *ramatha*,<sup>b</sup> a term in common use for a hill. It will be observed that the LXX. also do not treat it as a proper name. On the other hand Eusebius and Jerome (*Onomasticon*, "Abarim," "Fasga") report the name as existing in their day in its ancient locality. Mount Abarim and Mount Nabau were pointed out on the road leading from Livias to Hesbon (*i. e.* the *Wady Hesban*), still bearing their old names, and close to Mount Phogor (Peor), which also retained its name, whence, says Jerome (*à quo*), the contiguous region was even then called Phasgo. This connexion between Phogor and Phasgo is puzzling, and suggests a possible error of copyists.

No traces of the name Pisgah have been met with in later times on the east of Jordan, but in the Arabic garb of *Ras el-Feshkah* (almost identical with the Hebrew Roah hap-pisgah) it is attached to a well-known headland on the north-western end of the Dead Sea, a mass of mountain bounded on the south by the *Wady en-Nar*, and on the north by the *Wady Sidr*, and on the northern part of which is situated the great Mussulman sanctuary of *Noby Mâsa* (Moses). This association of the names of Moses and Pisgah on the west side of the Dead Sea—where to suppose that Moses ever set foot would be to stultify the whole narrative of his decease—is extremely startling. No explanation of it has yet been offered. Certainly that of M. de Sauley and of his translator,<sup>c</sup> that the *Ras-el-Feshkah* is identical with Pisgah, cannot be entertained. Against this the words of Deut. iii. 27, "Thou shalt not go over this Jordan," are decisive.

\* *Πῖζγα* from *Πῖζ*, a word which they actually translate by *λαζεύω* in Ex. xxxiv. 1, 4, Deut. x. 1.

<sup>b</sup> Probably the origin of the marginal reading of the A. V. "the hill."

<sup>c</sup> See De Sauley's *Voyage*, &c., and the notes to it. 66-67 of the English edition.

\* The singular manner in which the LXX. translators of the Pentateuch have fluctuated in their renderings of Pisgah between the proper name and the appellative, leads to the inference that their Hebrew text was different in some of the passages to ours. Mr. W. A. Wright has suggested that in the latter cases they may have read

Had the name of Moses alone existed here, it might with some plausibility be conceived that the reputation for sanctity had been at some time, during the long struggles of the country, transferred from east to west, when the original spot was out of the reach of the pilgrims. But the existence of the name *Peshkah*—and, what is equally curious, its non-existence on the east of Jordan—seems to preclude this suggestion. [G.]

**PISIDIA** (Πισιδία; *Pisidia*) was a district of Asia Minor, which cannot be very exactly defined, but it may be described sufficiently by saying that it was to the north of PAMPHYLIA, and stretched along the range of Taurus. Northwards it reached to, and was partly included in, PAPHLAGIA, which was similarly an indefinite district, though far more extensive. Thus ANTIOCH IN PISIDIA was sometimes called a Phrygian town. The occurrences which took place at this town give a great interest to St. Paul's first visit to the district. He passed through Pisidia twice, with Barnabas, on the first missionary journey, i. e. both in going from PERGA to ICONIUM (Acts xiii. 13, 14, 51), and in returning (xiv. 21, 24, 25; compare 2 Tim. iii. 11). It is probable also that he traversed the northern part of the district, with Silas and Timotheus, on the second missionary journey (xvi. 6); but the word *Pisidia* does not occur except in reference to the former journey. The characteristics both of the country and its inhabitants were wild and rugged; and it is very likely that the Apostle encountered here some of those "perils of robbers" and "perils of rivers" which he mentions afterwards. His routes through this region are considered in detail in *Life and Epp. of St. Paul* (2nd ed. vol. i. pp. 197-207, 240, 241), where extracts from various travellers are given. [J. S. H.]

**PISON** (פִּישׁוֹן; *Phisōn*). One of the four "heads" into which the stream flowing through Eden was divided (Gen. ii. 11). Nothing is known of it; the principal conjectures will be found under *EDEN* [vol. i. p. 484].

**PISPAH** (פִּסְפָּה; *Phaspha*). An Asherite: one of the sons of Jether, or Ithran (1 Chr. vii. 38).

**PIT**. In the A. V. this word appears with a figurative as well as a literal meaning. It passes from the facts that belong to the outward aspect of Palestine and its cities to states or regions of the spiritual world. With this power it is used to represent several Hebrew words, and the starting point which the literal meaning presents for the spiritual is, in each case, a subject of some interest.

1. *Shēol* (שְׁאוֹל), in Num. xvi. 30, 33; Job xvii. 16. Here the word is one which is used only of the hollow, shadowy world, the dwelling of the dead, and as such it has been treated of under *HELL*.

2. *Shachath* (שָׁחַת). Here, as the root שָׁחַח shows, the sinking of the pit is the primary thought (Gesen. *Thes.* s. v.). It is dug into the earth (Ps. ix. 16, ex. 85). A pit thus made and then covered lightly over, served as a trap by which animals or men might be ensnared (Ps. xxxv. 7). It thus became a type of sorrow and confusion, from which a man could not extricate himself, of the great doom which comes to all men, of the dreariness of death (Job xxxiii. 18, 24, 28, 30). To "go down to the pit," is to die without hope. It is the penalty of

evil-doers, that from which the righteous are delivered by the hand of God.

3. *Bôr* (בּוֹר). In this word, as in the cognate *Bêr*, the special thought is that of a pit or well dug for water (Gesen. *Thes.* s. v.). The power of deynonymising which goes on in all languages seems to have confined the former to the case of the well or cistern, dug into the rock, but no longer filled with water. Thus, where the same is both cases is figurative, and the same English word is used, we have pit (*bêr*) connected with the "deep water," "the waterflood," "the deep" (Ps. lxi. 16), while in pit (*=בּוֹר*), there is nothing but the "mud clay" (Ps. xl. 2). Its domineering feature is that there is "no water" in it (Zech. x. 11). So far the idea involved has been rather that of misery and despair than of death. But in the phrase "they that go down to the pit" (Job), it becomes even more constantly than the cognates already noticed (*Sheol*, *Shachath*), the representative of the world of the dead (Ezek. xxx. 1, 16, xxxii. 18, 24; Ps. xlviii. 1, cxxxvii. 7). There may have been two reasons for this transfer. 1. The wide deep excavation became the place of burial. The "graves were set in the sides of the pit" (*bôr*) (Ezek. xxxii. 24). To one looking into it a visibly the home of the dead, while the more mysterious *Sheol* carried the thoughts further to an invisible home. 2. The pit, however, in its sense, was never simply equivalent to burial-place. There is always implied in it a thought of eternal condemnation. This too had its origin apparently in the use made of the excavations, which had since never been wells, or had lost the supply of water. The prisoner in the land of his enemies, was left to perish in the pit (*bôr*) (Zech. ix. 11). The ground of all deliverance is that the captive exile is rescued from the slow death of starvation in it (Jeremiah, l. li. 14). The history of Jeremiah, cast into a dungeon, or pit (*bôr*) (Jer. xxxviii. 6, 7), led down into its depths with cords, sinking into the bottom (here also there is no water), with last by hunger staring him in the face, shows how terrible an instrument of punishment was such a place. The condition of the Athenian prisoners in the quarries of Syracuse (Thuc. vii. 87), the punishment of the σπείδοντες (Ctesias, *Peri Med.*), the oubliettes of mediæval prisons proved instances of cruelty, more or less analogous. It is not surprising that with these associations of material horror entering round, it should have intruded upon the idea of a place of punishment for the heavenly unjust, than did the *sheol* or the grave.

In Rev. ix. 1, 2, and elsewhere, the "bottomless pit," is the translation of τὸ ὄρυγος τῆς ἀβύσσου. The A. V. has rightly taken *ὄρυγος* here as the equivalent of *bôr* rather than *bêr*. The pit of the abyss is as a dungeon. It is opened and the abyss is as a prison (Rev. ix. 1, xx. 1). Satan is cast into it, as a prisoner (xx. 2). [J. S. H.]

**PITCH** (חַמֶּה, חֶמֶר, חֶמֶר; *Chameh*).

The three Hebrew terms above given all speak the same object, viz. mineral pitch or asphalt, under different aspects: *zepeleth* (the soft), the word of the Arabs, Wilkinson, *Ass. Eg.* ii. 120; *chameh*, a state, from a root signifying "to flow" (*cham*), its solid state, from its red colour, though explained in reference to the manner in which it is dug up (the former, however, being more common); the appearance of the two terms is supported by Ex. ii. 3; A. V. "pitch and slime". [J. S. H.]

12; idios; *Andria*, *lagena*; akin to Sanskrit *kud*  
 Also "barrel" (1 K. xvii, 12, xviii, 33).  
 660; Eickhoff, *Vergleich der Sprache*, p. 219.)  
 and *בבלי* - *ammon*; was, A.V. "bottle," only  
 11.

**PLAGUE, THE.** The disease now called the Plague, which has ravaged Egypt and neighbouring countries in modern times, is supposed to have prevailed there in former ages. Manetho, the Egyptian historian, speaks of "a very great plague" in the reign of Semempses, the seventh king of the first

3. In N. T. *κεράμιον*, twice only Mark xiv. 13, *logos*  
Luke xxi. 10, *amphora*.

dynasty, B.C. cir. 2500. The difficulty of determining the character of the pestilences of ancient and mediæval times, even when carefully described, warns us not to conclude that every such mention refers to the Plague, especially as the cholera has, since its modern appearance, been almost as severe a scourge to Egypt as the more famous disease, which, indeed, as an epidemic seems there to have been succeeded by it. Moreover, if we admit, as we must, that there have been anciently pestilences very nearly resembling the modern Plague, we must still hesitate to pronounce any recorded pestilence to be of this class unless it be described with some distinguishing particulars.

The Plague in recent times has not extended far beyond the Turkish Empire and the kingdom of Persia. It has been asserted that Egypt is its cradle, but this does not seem to be corroborated by the later history of the disease. It is there both sporadic and epidemic; in the first form it has appeared almost annually, in the second at rarer intervals. As an epidemic it takes the character of a pestilence, sometimes of the greatest severity. Our subsequent remarks apply to it in this form. It is a much- vexed question whether it is ever endemic; that such is the case is favoured by its rareness since sanitary measures have been enforced.

The Plague when most severe usually appears first on the northern coast of Egypt, having previously broken out in Turkey or North Africa west of Egypt. It ascends the river to Cairo, rarely going much further. Thus Mr. Lane has observed that the great plague of 1835 "was certainly introduced from Turkey" (*Modern Egyptians*, 5th ed. p. 3, note 1). It was first noticed at Alexandria, ascended to Cairo, and further to the southern part of Egypt, a few cases having occurred at Thebes; and it "extended throughout the whole of Egypt, though its ravages were not great in the southern parts" (*Ibid.*). The mortality is often enormous, and Mr. Lane remarks of the plague just mentioned:—"It destroyed not less than eighty thousand persons in Cairo, that is, one-third of the population; and far more, I believe, than two hundred thousand in all Egypt" (*Ibid.*).<sup>a</sup> The writer was in Cairo on the last occasion when this pestilence visited Egypt, in the summer of 1843, when the deaths were not numerous, although, owing to the Government's posting a sentry at each house in which any one had died of the disease, to enforce quarantine, there was much concealment, and the number was not accurately known (Mrs. Poole, *Englishwoman in Egypt*, ii. 32-35). Although since then Egypt has been free from this scourge, Benghazi (Hesperides), in the pashalic of Tripoli, was almost depopulated by it during part of the years 1860 and 1861. It generally appears in Egypt in mid-winter, and lasts at most for about six months.

The Plague is considered to be a severe kind of typhus, accompanied by buboes. Like the cholera it is most violent at the first outbreak, causing almost instant death; later it may last three days, and even longer, but usually it is fatal in a few hours. It has never been successfully treated, except in isolated cases or when the epidemic has seemed to have worn itself out. Depletion and stimulants have been tried, as with cholera, and stimulants with far better results. Great difference of opinion

has obtained as to whether it is contagious: as instances have, however, occurred in which it is known cause except contagion could have caused the disease.

In noticing the places in the Bible which may be supposed to refer to the Plague we must bear in mind that, unless some of its distinctive characteristics are mentioned, it is not safe to infer that this disease is intended.

In the narrative of the Ten Plagues there is, as we point out below [p. 826], none corresponding to the modern Plague. The plague of boils has to some extent some resemblance, and it might be urged that, as in other cases known scourges were sent (their miraculous nature being shown by their opportune occurrence and their intense character), so in this case a disease of the country, if indeed the Plague anciently prevailed in Egypt, might have been employed. Yet the ordinary Plague would rather exceed in severity this infliction than the unusual, which seems fatal to this supposition. [PLAGUE, THE TEN.]

Several Hebrew words are translated "pestilence" or "plague." (1) *מָוֶת*, properly "destruction," hence "a plague;" in LXX. commonly *ἐκκρίσις*. It is used with a wide signification for all sorts of pestilences, being employed even for murrain (Le. ii. 17). (2) *מָוֶת*, properly "death," hence "a deadly disease, pestilence." Gesenius compares the *Schwarze Pest*, or Black Death, of the middle ages. (3) *מָוֶת*, properly anything with which people are smitten, especially by God, therefore a plague or pestilence sent by Him. (4) *מָוֶת*, "pestilence" (Deut. xxiii. 24, A. V. "destruction"; Ps. xli. 4 "the pestilence [that] walketh in darkness"), and perhaps also *מָוֶת*, if we follow Gesenius, instead of reading with the A. V. "destruction," in Hos. vi. 14. (5) *מָוֶת*, properly "a flame," hence "a burning fever," "a plague" (Deut. xxiii. 24; Hab. iii. 5, where it occurs with *מָוֶת*). It is evident that not one of these words can be considered as designating by its signification the Plague. Whether the disease be mentioned must be judged from the sense of passages, not from the sense of words.

Those pestilences which were sent as special judgments, and were either supernaturally rapid in their effects, or in addition directed against particular culprits, are beyond the reach of human inquiry. But we also read of pestilences which, although sent as judgments, have the characteristics of modern epidemics, not being rapid beyond extent, nor directed against individuals. Thus in the remarkable threatenings in Leviticus and Deuteronomy, pestilence is spoken of as one of the entering judgments that were gradually to destroy the disobedient. This passage in Leviticus evidently refers to pestilence in besieged cities: "And I will bring a sword upon you, that shall avenger the quarrel of [my] covenant; and when ye are gathered together within your cities, I will send the pestilence among you; and ye shall be delivered into the hand of the enemy" (xxvi. 25). Famine in a besieged city would occasion pestilence. A special disease need be indicated in the parallel portion of Deuteronomy (xxvii. 21): "The Lord shall smite the pestilence cleave unto thee, until he [or "it"] have consumed thee from off the land whither thou goest to possess

<sup>a</sup> A curious story connected with this plague is given in the notes to the *Thousand and One Nights*, ch. iii.

it." The word rendered "pestilence" may, however, have a general signification, and comprise calamities mentioned afterwards, for there follows an enumeration of several other diseases and similar scourges (xxviii. 21, 22). The first disease here mentioned, has been supposed to be the Plague (Bunsen, *Bibelwerk*). It is to be remembered that "the botch of Egypt" is afterwards spoken of (27), by which it is probable that ordinary boils are intended, which are especially severe in Egypt in the present day, and that later still "all the diseases of Egypt" are mentioned (60). It therefore seems unlikely that so grave a disease as the Plague, if then known, should not be spoken of in either of these two passages. In neither place does it seem certain that the Plague is specified, though, in the one, if it were to be in the land it would fasten upon the population of besieged cities, and in the other, if then known, it would probably be alluded to as a terrible judgment in an enumeration of diseases. The notices in the prophets present the same difficulty; for they do not seem to afford sufficiently positive evidence that the Plague was known in those times. With the prophets, as in the Pentateuch, we must suppose that the diseases threatened or prophesied as judgments must have been known, or at least called by the names used for those that were known. Two passages might seem to be explicit. In Amos we read, "I have sent among you the pestilence after the manner of Egypt: your young men have I slain with the sword, and have taken away your horses; and I have made the stink of your camps to come up unto your nostrils" (Am. iv. 10). Here the reference is perhaps to the death of the firstborn, for the same phrase, "after the manner of Egypt," is used by Isaiah (x. 24, 26), with a reference to the Exodus, and perhaps to the oppression preceding it; and an allusion to past history seems probable, as a comparison with the overthrow of the cities of the plain immediately follows (Am. iv. 11). The prophet Zechariah also speaks of a plague with which the Egyptians, if refusing to serve God, should be smitten (xiv. 18), but the name, and the description which appears to apply to this scourge seem to show that it cannot be the Plague (12).

Hezekiah's disease has been thought to have been the Plague, and its fatal nature, as well as the mention of a boil, makes this not improbable. On the other hand, there is no mention of a pestilence among his people at the time.

There does not seem, therefore, to be any distinct notice of the Plague in the Bible, and it is most probable that this can be accounted for by supposing either that no pestilence of antiquity in the East was as marked in character as the modern Plague, or that the latter disease then frequently broke out there as an epidemic in crowded cities, instead of following a regular course.

(See Russell's *Natural History of Aleppo*; Clot-ey, *De la Peste*, and *Aperçu Général sur l'Égypte*, II. 348-350.) [R. S. P.]

**PLAGUES, THE TEN.** In considering the history of the Ten Plagues we have to notice the place where they occurred, and the occasion on which they were sent, and to examine the narrative of each judgment, with a view to ascertain what it was, and in what manner Pharaoh and the Egyptians were punished by it, as well as to see if we can trace any general connexion between the several judgments.

I. *The Place.*—Although it is distinctly stated

that the plagues prevailed throughout Egypt, save, in the case of some, the Israelite territory, the land of Goshen, yet the descriptions seem principally to apply to that part of Egypt which lay nearest to Goshen, and more especially to "the field of Zoan," or the tract about that city, since it seems almost certain that Pharaoh dwelt in Zoan, and that territory is especially indicated in Ps. lxxviii. 43. That the capital at this time was not more distant from Ramesses than Zoan is evident from the time in which a message could be sent from Pharaoh to Moses on the occasion of the Exodus. The descriptions of the first and second plagues seem especially to refer to a land abounding in streams and lakes, and so rather to the Lower than to the Upper Country. We must therefore look especially to Lower Egypt for our illustrations, while bearing in mind the evident prevalence of the plagues throughout the land.

II. *The Occasion.*—When that Pharaoh who seems to have been the first oppressor was dead, God sent Moses to deliver Israel, commanding him to gather the elders of his people together, and to tell them his commission. It is added, "And they shall hearken to thy voice: and thou shalt come, thou and the elders of Israel, unto the king of Egypt, and ye shall say unto him, The LORD God of the Hebrews hath met with us: and now let us go, we beseech thee, three days' journey into the wilderness, that we may sacrifice to the LORD our God. And I am sure that the king of Egypt will not let you go, no, not by a mighty hand. And I will stretch out my hand, and smite Egypt with all my wonders which I will do in the midst thereof: and after that he will let you go" (Ex. iii. 18-20). From what follows, that the Israelites should borrow jewels and raiment, and "spoil Egypt" (21, 22), it seems evident that they were to leave as if only for the purpose of sacrificing; but it will be seen that if they did so, Pharaoh, by his armed pursuit and overtaking them when they had encamped at the close of the third day's journey, released Moses from his engagement.

When Moses went to Pharaoh, Aaron went with him, because Moses, not judging himself to be eloquent, was diffident of speaking to Pharaoh. "And Moses said before the LORD, Behold, I [am] of uncircumcised lips, and how shall Pharaoh hearken unto me? And the LORD said unto Moses, See, I have made thee a god to Pharaoh: and Aaron thy brother shall be thy prophet" (Ex. vi. 30, vii. 1; comp. iv. 10-16). We are therefore to understand that even when Moses speaks it is rather by Aaron than himself. It is perhaps worthy of note that in the tradition of the Exodus which Manetho gives, the calamities preceding the event are said to have been caused by the king's consulting an Egyptian prophet; for this suggests a course which Pharaoh is likely to have adopted, rendering it probable that the magicians were sent for as the priests of the gods of the country, so that Moses was exalted by contrast with these vain objects of worship. We may now examine the narrative of each plague.

III. *The Plagues.*—1. *The Plague of Blood.*—When Moses and Aaron came before Pharaoh, a miracle was required of them. Then Aaron's rod became "a serpent" (A. V.), or rather "a crocodile" (רִמָּה). Its being changed into an animal revered by all the Egyptians, or by some of them, would have been an especial warning to Pharaoh. The Egyptian magicians called by the king produced

what seemed to be the same wonder, yet Aaron's rod swallowed up the others (vii. 3-12). This passage, taken alone, would appear to indicate that the magicians succeeded in working wonders, but, if it is compared with those others relating their opposition on the occasions of the first three plagues, a contrary inference seems more reasonable. In this case the expression, "they also did in like manner with their enchantments" (11) is used, and it is repeated in the cases of their seeming success on the occasions of the first plague (22), and the second (viii. 7), as well as when they failed on the occasion of the third plague (18). A comparison with other passages strengthens us in the inference that the magicians succeeded merely by juggling. [MAGIC.] Yet, even if they were able to produce any real effects by magic, a broad distinction should be drawn between the general and powerful nature of the wonders wrought by the hand of Moses and Aaron and their partial and weak imitations. When Pharaoh had refused to let the Israelites go, Moses was sent again, and, on the second refusal, was commanded to smite upon the waters of the river and to turn them and all the waters of Egypt into blood. The miracle was to be wrought when Pharaoh went forth in the morning to the river. Its general character is very remarkable, for not only was the water of the Nile smitten, but all the water, even that in vessels, throughout the country. The fish died, and the river stank. The Egyptians could not drink of it, and digged around it for water. This plague appears to have lasted seven days, for the account of it ends, "And seven days were fulfilled, after that the LORD had smitten the river" (vii. 13-23), and the narrative of the second plague immediately follows, as though the other had then ceased. Some difficulty has been occasioned by the mention that the Egyptians digged for water, but it is not stated that they so gained what they sought, although it may be conjectured that only the water that was seen was smitten, in order that the nation should not perish. This plague was doubly humiliating to the religion of the country, as the Nile was held sacred, as well as some kinds of its fish, not to speak of the crocodiles, which probably were destroyed. It may have been a marked reproof for the cruel edict that the Israelite children should be drowned, and could scarcely have failed to strike guilty consciences as such, though Pharaoh does not seem to have been alarmed by it. He saw what was probably an imitation wrought by the magicians, who accompanied him, as if he were engaged in some sacred rites, perhaps connected with the worship of the Nile. Events having some resemblance to this are mentioned by ancient writers: the most remarkable is related by Manetho, according to whom it was said that, in the reign of Nephthycheris, seventh king of the first dynasty, the Nile flowed mixed with honey for eleven days. Some of the historical notices of the earliest dynasties seem to be of very doubtful authenticity, and Manetho seems to treat this one as a fable, or, perhaps as a tradition. Nephthycheris, it must be remarked, reigned several hundred years before the Exodus. Those who have endeavoured to explain this plague by natural causes, have referred to the changes of colour to which the Nile is subject, the appearance of the Red Sea, and the so-called rain and dew of blood of the middle ages; the last two occasioned by small fungi of very rapid growth. But such theories do not explain why the wonder happened at a time of year when the Nile is most

clear, nor why it killed the fish and made the sea unfit to be drunk. These are the really important points, rather than the change into blood, which seems to mean a change into the opposite of blood. The employment of natural means in effecting a miracle is equally seen in the passage of the Red Sea; but the Divine power is proved by the intensifying or extending that means, and by the opportune occurrence of the result, and its due for a great moral purpose.

2. *The Plague of Frogs.*—When seven days had passed after the smiting of the river, Pharaoh threatened with another judgment, and, refusing to let the Israelites go, the second plague was sent. The river and all the open waters brought forth countless frogs, which not only covered the land, but filled the houses, even in the inner parts and vessels, for the ovens and kneading troughs are specified. The magicians again had some success in their opposition; yet Pharaoh, who very palaces were filled by the reptiles, caused Moses to pray that they might be removed, promising to let the Israelites go; but, on the removal of the plague, again hardened his heart (viii. 1-15). This must have been an especially trying judgment to the Egyptians, as frogs were included among the sacred animals, probably among those which were reverenced throughout Egypt, like the cat, but in the second class of objects of worship, like the crocodile. The frog was sacred to the goddess HEKET, who is represented with the head of this reptile. In hieroglyphics the frog signifies "very many," "millions," deduced from its abundance. In the present day they are abundant in Egypt, and in the summer and autumn their loud and incessant croaking is one of the sounds of the country gives some idea of this plague. They are not, however, heard in the spring, and there is any record, excepting the Biblical one, of their having been injurious to the inhabitants. It may be added that the supposed cause of the same plague elsewhere, quoted from ancient authors, and of doubtful authenticity.

3. *The Plague of Lice.*—The account of the third plague is not preceded by the notice of a warning to Pharaoh. We read that Moses commanded to stretch out his rod and smite the dust, which became, as the A. V. reads the word, "in man and beast." The magicians again showed opposition; but, failing, confessed that it was the word of God (viii. 16-19). There is much discussion as to the animals meant by the term *beast*. The Masoretic punctuation is *בְּחַיָּוִת*, which would probably make it a collective noun with *beast* (Heb. 12]; P. ex. 31), of which we have the singular *חַיָּוִת* in Isaiah (li. 6). It is therefore possible to conjecture that the first form was punctuated *בְּחַיָּוִת*, as the defective reading of the text, and it should also be observed that the LXX. has *βηέ*. The LXX. has *καίτοι*, and in some mss. *καίτοι*, *καίτοι*, mentioned by Bochart (p. 95), and Philo (*De Vita Mos.* l. 29 & 30; Mang.), as troublesome in Egypt. However, the *καίτοι* has *καίτοι* but *καίτοι* with which Bochart agrees (*Hebr. l. 29*). The etymology is doubtful, and probably is Egyptian. The narrative does not decide which is the more probable of the two renderings, excepting, indeed, that *καίτοι*

actly the same kind of animal attacked man and beasts, mosquitos would be the more likely cause. In this case the plague does not seem specially directed against the superstitions of the Egyptians: if, however, it were of lice, it would have been most distressing to their priests, who were very cleanly, apparently, like the Muslims as a religious duty. In the present day both fleas and lice are abundant in Egypt: the plague may be avoided, but there is no escape from them, which are so distressing and annoying. An increase of them would render life almost intolerable to beasts as well as men.

*The Plague of Flies.*—In the case of the second plague, as in that of the first, Moses was ordered to meet Pharaoh in the morning as he went forth to the water, and to threaten him with punishment if he still refused to give the Israelites to go and worship. He was to be punished by which the A. V. renders "swarms [of flies]," "arm [of flies]," or, in the margin, "a mixture [of some beasts]." These creatures were to be sent to the people, and fill both the houses and the land. Here, for the first time, we read that the Goshen, where the Israelites dwelt, was exempt from the plague. So terrible was it that Pharaoh granted permission for the Israelites to go into the land, which Moses refused to do, as the Egyptians would stone his people for sacrificing "abomination." Then Pharaoh gave them to sacrifice in the wilderness, provided they did not go far; but, on the plague being removed, broke his word (viii. 20-32). The proper meaning of the word *שָׂרָץ* is a question of extreme difficulty. The explanation of Josephus (*Ant.* ii. 14, §3), and all the Hebrew commentators, is that it is "a mixture," and here designates a mixture of animals, in accordance with the derivation of the root *שָׂרָץ*, "he mixed." Similarly, Jerome renders it *omne genus muscarum*, and Aquila *ἅπαντα*. The LXX., however, and Philo (*De Vita* i. 23, ii. 101, ed. Mang.), suppose it to signify *κυνόμυια*. The second of these explanations seems to be a compromise between the first and the third. It is almost certain, from two passages (Ex. viii. 29, 31; Hebrew, 25, 27), that the creature is intended. If so, what reason is in favour of the LXX. rendering? Oedmann (*Sammlungen*, ii. 150, ap. Ges. *Thes.* s. v.) cites the *blatta orientalis*, a kind of beetle, and of a dog-fly; but Gesenius objects that this creature devours things rather than stings men, as it is evident that the animal of this plague did or at least annoyed men, besides apparently filling the land. From Ps. lxxviii. 45, where we read "He sent the *שָׂרָץ*, which devoured them," it may have been a creature of devouring habits, as observed by Kalisch (*Comment. on Exod.* i. 1), who supports the theory that a beetle is intended. The Egyptian language might be hoped to give us a clue to the rendering of the LXX. and the Hebrew.

In hieroglyphics a fly is AF, and a bee SHEB, HEB. SH and KH being interchangeable, in some dialects; and in Coptic these two words are found in *ⲉⲛⲉϥ*, *ⲉϥ*, *ⲉⲃ*, *ⲉⲛⲉϥ*, *ⲉϥ*, *ⲉⲃ*, *ⲉⲛⲉϥ*, *ⲉϥ*, *ⲉⲃ*, *ⲉⲛⲉϥ*. We can therefore only conjecture from the description of the plague; and here it seems to have too hastily decided against the "beetle," since the beetle sometimes attacks men. Yet our experience does not bear out

the idea that any kind of beetle is injurious to man in Egypt; but there is a kind of gad-fly found in that country which sometimes stings men, though usually attacking beasts. The difficulty, however, in the way of the supposition that a stinging fly is meant is that all such flies are, like this one, plagues to beasts rather than men; and if we conjecture that a fly is intended, perhaps it is more reasonable to infer that it was the common fly, which in the present day is probably the most troublesome insect in Egypt. That this was a more severe plague than those preceding it, appears from its effect on Pharaoh, rather than from the mention of the exemption of the Israelites, for it can scarcely be supposed that the earlier plagues affected them. As we do not know what creature is here intended, we cannot say if there were any reference in this case to the Egyptian religion. Those who suppose it to have been a beetle might draw attention to the great reverence in which that insect was held among the sacred animals, and the consequent distress that the Egyptians would have felt at destroying it, even if they did so unintentionally. As already noticed, no insect is now so troublesome in Egypt as the common fly, and this is not the case with any kind of beetle, which fact, from our general conclusions, will be seen to favour the evidence for the former. In the hot season the flies not only cover the food and drink, but they torment the people by settling on their faces, and especially round their eyes, thus promoting ophthalmia.

5. *The Plague of the Murrain of Beasts.*—Pharaoh was next warned that, if he did not let the people go, there should be on the day following "a very grievous murrain," upon the horses, asses, camels, oxen, and sheep of Egypt, whereas those of the children of Israel should not die. This came to pass, and we read that "all the cattle of Egypt died; but of the cattle of the children of Israel died not one." Yet Pharaoh still continued obstinate (Ex. ix. 1-7). It is to be observed that the expression "all the cattle" cannot be understood to be universal, but only general, for the narrative of the plague of hail shows that there were still at a later time some cattle left, and that the want of universal terms in Hebrew explains this seeming difficulty. The mention of camels is important, since it appears to favour our opinion that the Pharaoh of the Exodus was a foreigner, camels apparently not having been kept by the Egyptians of the time of the Pharaohs. This plague would have been a heavy punishment to the Egyptians as falling upon their sacred animals of two of the kinds specified—the oxen and the sheep; but it would have been most felt in the destruction of the greatest part of their useful beasts. In modern times murrain is not an unfrequent visitation in Egypt, and is supposed to precede the Plague. The writer witnessed a very severe murrain in that country in 1842, which lasted nine months, during the latter half of that year and the spring of the following one, and was succeeded by the Plague, as had been anticipated (Mrs. Poole, *Englishwoman in Egypt*, ii. 32, i. 56, 114). "A very grievous murrain," forcibly reminding us of that which visited this same country in the days of Moses, has prevailed during the last three months—the letter is dated October 18th, 1842—"and the already distressed peasants feel the calamity severely, or rather (I should say) the few who possess cattle. Among the rich men of the country, the loss has been enormous. During our voyage up the Nile" in the July preceding, "we

observed several dead cows and buffaloes lying in the river, as I mentioned in a former letter; and some friends who followed us, two months after, saw many on the banks; indeed, up to this time, great numbers of cattle are dying in every part of the country" (*Id.* i. 114, 115). The similarity of the calamity in character is remarkably in contrast with its difference in duration: the miraculous murrain seems to have been as sudden and nearly as brief as the destruction of the firstborn (though far less terrible), and to have therefore produced, on ceasing, less effect than other plagues upon Pharaoh, nothing remaining to be removed.

6. *The Plague of Boils.*—The next judgment appears to have been preceded by no warning, excepting indeed that, when Moses publicly sent it abroad in Egypt, Pharaoh might no doubt have repented at the last moment. We read that Moses and Aaron were to take ashes of the furnace, and Moses was to "sprinkle it toward the heaven in the sight of Pharaoh." It was to become "small dust" throughout Egypt, and "be a boil breaking forth [with] blains upon man, and upon beast." This accordingly came to pass. The magicians now once more seem to have attempted opposition, for it is related that they "could not stand before Moses because of the boil; for the boil was upon the magicians, and upon all the Egyptians." Notwithstanding, Pharaoh still refused to let the Israelites go (*ix.* 8-12). This plague may be supposed to have been either an infliction of boils, or a pestilence like the Plague of modern times, which is an extremely severe kind of typhus fever, accompanied by swellings. [PLAGUE.] The former is, however, the more likely explanation, since, if the plague had been of the latter nature, it probably would have been less severe than the ordinary pestilence of Egypt has been in this nineteenth century, whereas with other plagues which can be illustrated from the present phenomena of Egypt, the reverse is the case. That this plague followed that of the murrain seems, however, an argument on the other side, and it may be asked whether it is not likely that the great pestilence of the country, probably known in antiquity, would have been one of the ten plagues; but to this it may be replied that it is more probable, and in accordance with the whole narrative, that extraordinary and unexpected wonders should be effected than what could be paralleled in the history of Egypt. The tenth plague, moreover, is so much like the great Egyptian disease in its suddenness, that it might rather be compared to it if it were not so wholly miraculous in every respect as to be beyond the reach of human inquiry. The position of the magicians must be noticed as indicative of the gradation of the plagues: at first they succeeded, as we suppose, by deception, in imitating what was wrought by Moses, then they failed, and acknowledged the finger of God in the wonders of the Hebrew prophet, and at last they could not even stand before him, being themselves smitten by the plague he was commissioned to send.

7. *The Plague of Hail.*—The account of the seventh plague is preceded by a warning, which Moses was commanded to deliver to Pharaoh, respecting the terrible nature of the plagues that were to ensue if he remained obstinate. And first of all of the hail it is said, "Behold, to-morrow about this time, I will cause it to rain a very grievous hail, such as hath not been in Egypt since the foundation thereof even until now." He was then told to collect his cattle and men into shelter, for that

everything haled upon should die. Accordingly, and of Pharaoh's servants as "feared the Lord," brought in their servants and cattle from the field. We read that "Moses stretched forth his rod toward heaven and the Lord sent thunder and hail, and the fire ran along upon the ground." Thus man and beast were smitten, and the herbs and every tree broken, even in the land of Goshen. Upon this Pharaoh acknowledged his wickedness and that of his people, and the righteousness of God, and promised if the plagues were withdrawn to let the Israelites go. Then Moses went forth from the city, and spread out his hands, and the plague ceased, when Pharaoh, supported by his servants, again broke his promise (*ix.* 13-35). The character of this and the following plagues must be carefully examined, so the warning seems to indicate an important turning point. The ruin caused by the hail was evidently far greater than that effected by any of the earlier plagues; it destroyed men, which these others seem not to have done, and not only men but beasts and the produce of the earth. In this case Moses, while addressing Pharaoh, openly warns his servants how to save something from the calamity. Pharaoh for the first time acknowledges his wickedness. We also learn that his people joined with him in the oppression, and that at this time he dwelt in a city. Hail is now extremely rare, but not unknown, in Egypt, and it is interesting that the narrative seems to imply that it sometimes falls there. Thunderstorms occur, but, though very loud and accompanied by rain and wind, they rarely do serious injury. We do not remember to have heard what in Egypt of a person struck by lightning, nor of any ruin excepting that of decayed buildings washed down by rain.

8. *The Plague of Locusts.*—Pharaoh was now threatened with a plague of locusts, to begin the next day, by which everything the hail had left was to be devoured. This was to exceed any his visitations that had happened in the time of the king's ancestors. At last Pharaoh's own servants, who had before supported him, remonstrated, as we read: "And Pharaoh's servants said unto him, How long shall this man be a snare unto us? let the men go, that they may serve the Lord thy God: knowest thou not yet that Egypt is destroyed?" Then Pharaoh sent for Moses and Aaron, and offered to let the people go, but added when they required that all should go, even with their flocks and herds: "And Moses stretched forth his rod over the land of Egypt, and the Lord brought an east wind upon the land all that day, and all [that] night; [and] when it was morrow, the east wind brought the locusts. And the locusts went up over all the land of Egypt, and covered all the coasts of Egypt: very grievous [were they]; before them there were no such herbs as trees, neither after them shall be such. For they covered the face of the whole earth, so that the land was darkened; and they did eat every herb of the land, and all the fruit of the trees which the hail had left; and there remained not any green thing in the trees, or in the herbs of the field, through all the land of Egypt." Then Pharaoh hastily sent to Moses and Aaron and confessed his sin against God and the Israelites, and begged them to forgive him. "Now therefore forgive, I pray thee, my sin only this once, and intreat the Lord your God, that He may take away from me this death only." So he accordingly prayed. "And the Lord turned a mighty strong west wind, which took away the

locusts, and cast them into the Red sea; there remained not one locust in all the coasts of Egypt." The plague being removed, Pharaoh again would not let the people go (x. 1-20). This plague has not the unusual nature of the one that preceded it, but it even exceeds it in severity, and so occupies its place in the gradation of the more terrible judgments that form the later part of the series. Its severity can be well understood by those who, like the writer, have been in Egypt in a part of the country where a flight of locusts has alighted. In this case the plague was greater than an ordinary visitation, since it extended over a far wider space, rather than because it was more intense; for it is impossible to imagine any more complete destruction than that always caused by a swarm of locusts. So well did the people of Egypt know what these creatures effected, that, when their coming was threatened, Pharaoh's servants at once remonstrated. In the present day locusts suddenly appear in the cultivated land, coming from the desert in a column of great length. They fly rapidly across the country, darkening the air with their compact ranks, which are undisturbed by the constant attacks of kites, crows, and vultures, and making a strange whizzing sound like that of fire, or many distant wheels. Where they alight they devour every green thing, even stripping the trees of their leaves. Rewards are offered for their destruction, but no labour can seriously reduce their numbers. Soon they continue their course, and disappear gradually in a short time, leaving the place where they have been a desert. We speak from recollection, but we are permitted to extract a careful description of the effects of a flight of locusts from Mr. Lane's manuscript notes. He writes of Nubia: "Locusts not unfrequently commit dreadful havoc in this country. In my second voyage up the Nile, when before the village of Boostân, a little above Ibreem, many locusts pitched upon the boat. They were beautifully variegated, yellow and blue. In the following night a southerly wind brought other locusts, in immense swarms. Next morning the air was darkened by them, as by a heavy fall of snow; and the surface of the river was thickly scattered over by those which had fallen and were unable to rise again. Great numbers came upon and within the boat, and alighted upon our persons. They were different from those of the preceding day; being of a bright yellow colour, with brown marks. The desolation they made was dreadful. In four hours a field of young durah [millet] was cropped to the ground. In another field of durah more advanced only the stalks were left. Nowhere was there space on the ground to set the foot without treading on many. A field of cotton-plants was quite stripped. Even the acacias along the banks were made bare, and palm-trees were stripped of the fruit and leaves. Last night we heard the creaking of the *sâkiyehs* [water-wheels], and the singing of women driving the cows which turned them: to-day not one *sâkiyeh* was in motion, and the women were going about howling, and vainly attempting to frighten away the locusts. On the preceding day I had preserved two of the more beautiful kind of these creatures with a solution of arsenic: on the next day some of the other locusts ate them almost entirely, poisoned as they were, unseen by me till they had nearly finished their meal. On the third day they were numerous, and gradually disappeared. Locusts are eaten by most of the Bedawes of Arabia, and by some of the Nubians. We ate a few, dressed in

the most approved manner, being stripped of the legs, wings, and head, and fried in butter. They had a flavour somewhat like that of the woodcock, owing to their food. The Arabs preserve them as a common article of provision by parboiling them in salt and water, and then drying them in the sun."

The parallel passages in the prophecy of Joel form a remarkable commentary on the description of the plague in Exodus, and a few must be here quoted, for they describe with wonderful exactness and vigour the devastations of a swarm of locusts. "Blow ye the trumpet in Zion, and sound an alarm in my holy mountain: let all the inhabitants of the land tremble: for the day of the LORD cometh, for [it is] nigh at hand; a day of darkness and of gloominess, a day of clotting and of thick darkness, as the morning spread upon the mountains: a great people and a strong; there hath not been ever the like, neither shall be any more after it, [even] to the years of many generations. A fire devoureth before them; and behind them a flame burneth: the land [is] as the garden of Eden before them, and behind, a desolate wilderness; yea, and nothing shall escape them. The appearance of them [is] as the appearance of horses; and as horsemen, so shall they run. Like the noise of chariots on the tops of the mountains shall they leap, like the noise of a flame of fire that devoureth the stubble, as a strong people set in battle array. . . . They shall run like mighty men; they shall climb the wall like men of war, and they shall march every one on his ways, and they shall not break their ranks. . . . The earth shall quake before them; the heavens shall tremble: the sun and the moon shall be dark, and the stars shall withdraw their shining" (ii. 1-5, 7, 10; see also 6, 8, 9, 11-25, Rev. ix. 1-12). Here, and probably also in the parallel passage of Rev., locusts are taken as a type of a destroying army or horde, since they are more terrible in the devastation they cause than any other creatures.

9. *The Plague of Darkness.*—After the plague of locusts we read at once of a fresh judgment. "And the LORD said unto Moses, Stretch out thine hand toward heaven, that there be darkness over the land of Egypt, that [one] may feel darkness. And Moses stretched forth his hand toward heaven; and there was a thick darkness in all the land of Egypt three days: they saw not one another, neither rose any from his place for three days: but all the children of Israel had light in their dwellings." Pharaoh then gave the Israelites leave to go if only they left their cattle, but when Moses required that they should take these also, he again refused (x. 21-29). The expression we have rendered "that [one] may feel darkness," according to the A. V. in the margin, where in the text the fiercer translation "darkness [which] may be felt" is given, has occasioned much difficulty. The LXX. and Vulg. give this rendering, and the moderns generally follow them. It has been proposed to read "and they shall grope in darkness," by a slight change of rendering and the supposition that the particle *u* is understood (Kalisch, *Comm. on Ex.* p. 171). It is unreasonable to argue that the forcible words of the A. V. are too strong for Semitic phraseology. The difficulty is, however, rather to be solved by a consideration of the nature of the plague. It has been illustrated by reference to the Samoom and the hot wind of the Khamaseen. The former is a sand-storm which occurs in the desert, seldom lasting according to Mr. Lane, more than a quarter of an hour or twenty minutes (*Mod. Eg.* 5th ed. p. 2).

but for the time often causing the darkness of twilight, and affecting man and beast. Mrs. Poole, on Mr. Lane's authority, has described the Samoom as follows:—"The 'Samoom,' which is a very violent, hot, and almost suffocating wind, is of more rare occurrence than the Khamaseen winds, and of shorter duration; its continuance being more brief in proportion to the intensity of its parching heat, and the impetuosity of its course. Its direction is generally from the south-east, or south-south-east. It is commonly preceded by a fearful calm. As it approaches, the atmosphere assumes a yellowish hue, tinged with red; the sun appears of a deep blood colour, and gradually becomes quite concealed before the hot blast is felt in its full violence. The sand and dust raised by the wind add to the gloom, and increase the painful effects of the heat and rarity of the air. Respiration becomes uneasy, perspiration seems to be entirely stopped; the tongue is dry, the skin parched, and a prickling sensation is experienced, as if caused by electric sparks. It is sometimes impossible for a person to remain erect, on account of the force of the wind; and the sand and dust oblige all who are exposed to it to keep their eyes closed. It is, however, most distressing when it overtakes travellers in the desert. My brother encountered at Kooa, in Upper Egypt, a samoom which was said to be one of the most violent ever witnessed. It lasted less than half an hour, and a very violent samoom seldom continues longer. My brother is of opinion that, although it is extremely distressing, it can never prove fatal, unless to persons already brought almost to the point of death by disease, fatigue, thirst, or some other cause. The poor camel seems to suffer from it equally with his master; and will often lie down with his back to the wind, close his eyes, stretch out his long neck upon the ground, and so remain until the storm has passed over" (*Englishman in Egypt*, i. 96, 97). The hot wind of the Khamaseen usually blows for three days and nights, and carries so much sand with it, that it produces the appearance of a yellow fog. It thus resembles the Samoom, though far less powerful and far less distressing in its effects. It is not known to cause actual darkness; at least the writer's residence in Egypt afforded no example either on experience or hearsay evidence. By a confusion of the Samoom and the Khamaseen wind it has even been supposed that a Samoom in its utmost violence usually lasts three days (*Kalisch, Com. Ex.* p. 170), but this is an error. The plague may, however, have been an extremely severe sandstorm, miraculous in its violence and its duration, for the length of three days does not make it natural, since the severe storms are always very brief. Perhaps the three days was the limit, as about the longest period that the people could exist without leaving their houses. It has been supposed that this plague rather caused a supernatural terror than actual suffering and loss, but this is by no means certain. The impossibility of moving about, and the natural fear of darkness which affects beasts and birds as well as men, as in a total eclipse, would have caused suffering, and if the plague were a sandstorm of unequalled severity, it would have produced the conditions of fever by its parching heat, besides causing much distress of other kinds. An evidence in favour of the wholly supernatural character of this plague is its preceding the last judgment of all, the death of the firstborn, as though it were a terrible foreshadowing of that great calamity.

10. *The Death of the Firstborn.*—Before the tenth plague Moses went to warn Pharaoh. "And Moses said, Thus saith the Lord, About midnight will I go out into the midst of Egypt: and all the firstborn in the land of Egypt shall die, from the firstborn of Pharaoh that sitteth upon his throne, even unto the firstborn of the maidservant that (s) behind the mill; and all the firstborn of beasts. And there shall be a great cry throughout all the land of Egypt, such as there was none like it, nor shall be like it any more." He then foretells that Pharaoh's servants would pray him to go free. Positive as is this declaration, it seems to have been a conditional warning, for we read, "And he went out from Pharaoh in heat of anger," and it is added that God said that Pharaoh would not hearken to Moses, and that the king of Egypt still refused to let Israel go (xi. 4-10). The passover was then instituted, and the houses of the Israelites sprinkled with the blood of the victims. The firstborn of the Egyptians were smitten at midnight, as Moses had forewarned Pharaoh. "And Pharaoh rose up in the night, he, and all his servants, and all the Egyptians; and there was a great cry in Egypt: for [there was] not a house where [there was] not one dead" (xii. 30). The clearly miraculous nature of this plague, in its severity, its falling upon man and beast, and the singling out of the firstborn, puts it wholly beyond comparison with any natural pestilence, even the severest recorded in history, whether of the peculiar Egyptian Plague, or other like epidemics. The Bible affords a parallel in the smiting of Sennacherib's army, and still more closely in some of the punishments of murmurers in the wilderness. The prevailing customs of Egypt furnished a curious illustration of the narrative of this plague to the writer. "It is well known that many ancient Egyptian customs are yet observed. Among these one of the most prominent is the weeping for the dead by the women of the household, as well as those hired to mourn. In the great cholera of 1848 I was at Cairo. This pestilence, as we all know, frequently follows the course of men. Thus, on that occasion, it ascended the Nile, and showed itself in great strength at Boulak, the port of Cairo, distant from the city a mile and a half to the westward. For some days it did not traverse this space. Every evening at sunset, it was the custom to go up to the terrace on the roof of one's house. There, in that calm still time, I heard all night the wail of the women of Boulak to the dead borne along in a great wave of agony a distance of two miles, the lamentation of a city smitten with pestilence. So, when the firstborn were smitten, 'there was a great cry in Egypt.'"

The history of the ten plagues strictly ends with the death of the firstborn. The passage of the Red Sea are discussed elsewhere (*EXODUS, THE; RED SEA, PASSAGE OF*). As it is only necessary to notice that with the last mentioned the recital of the wonders wrought in Egypt concludes, and the history of Israel as a separate people begins.

Having examined the narrative of the ten plagues, we can now speak of their general character.

In the first place, we have constantly kept in view the arguments of those who hold that the plagues were not miraculous, and, while fully admitting all the illustration that the physical history of Egypt has afforded us, both in our own observation and the observation of others, we have had no reason for the naturalistic view in a single

stance, while in many instances the illustrations from known phenomena have been so different as to bring out the miraculous element in the narrative with the greatest force, and in every case that element has been necessary, unless the narrative be deprived of its rights as historical evidence. Yet more, we have found that the advocates of a naturalistic explanation have been forced by their bias into a distortion and exaggeration of natural phenomena in their endeavour to find in them an explanation of the wonders recorded in the Bible.

In the examination we have made it will have been seen that the Biblical narrative has been illustrated by reference to the phenomena of Egypt and the manners of the inhabitants, and that, throughout, its accuracy in minute particulars has been remarkably shown, to a degree that is sufficient of itself to prove its historical truth. This in a narrative of wonders is of no small importance.

Respecting the character of the plagues, they were evidently nearly all miraculous in time of occurrence and degree rather than essentially, in accordance with the theory that God generally employs natural means in producing miraculous effects. They seem to have been sent as a series of warnings, each being somewhat more severe than its predecessor, to which we see an analogy in the warnings which the providential government of the world often puts before the sinner. The first plague corrupted the sweet water of the Nile and slew the fish. The second filled the land with frogs, which corrupted the whole country. The third covered man and beast with vermin or other annoying insects. The fourth was of the same kind and probably a yet severer judgment. With the fifth plague, the murrain of beasts, a loss of property began. The sixth, the plague of boils, was worse than the earlier plagues that had afflicted man and beast. The seventh plague, that of hail, exceeded those that went before it, since it destroyed everything in the field, man and beast and herb. The eighth plague was evidently still more grievous, since the devastation by locusts must have been far more thorough than that by the hail, and since at that time no greater calamity of the kind could have happened than the destruction of all remaining vegetable food. The ninth plague we do not sufficiently understand to be sure that it exceeded this in actual injury, but it is clear from the narrative that it must have caused great terror. The last plague is the only one that was general in the destruction of human life, for the effects of the hail cannot have been comparable to those it produced, and it completes the climax, unless indeed it be held that the passage of the Red Sea was the crowning point of the whole series of wonders, rather than a separate miracle. In this case its magnitude, as publicly destroying the king and his whole army, might even surpass that of the tenth plague.

The gradual increase in severity of the plagues is perhaps the best key to their meaning. They seem to have been sent as warnings to the oppressor, to afford him a means of seeing God's will and an opportunity of repenting before Egypt was ruined. It is true that the hardening of Pharaoh's heart is

a mystery which St. Paul leaves unexplained, answering the objector, "Nay but, O man, who art thou that repliest against God?" (Rom. ix. 20). Yet the Apostle is arguing that we have no right to question God's righteousness for not having mercy on all, and speaks of His long-suffering towards the wicked. The lesson that Pharaoh's career teaches us seems to be, that there are men whom the most signal judgments do not affect so as to cause any lasting repentance. In this respect the after-history of the Jewish people is a commentary upon that of their oppressor. [R. S. P.]

**PLAINS.** This one term does duty in the Authorised Version for no less than seven distinct Hebrew words, each of which had its own independent and individual meaning, and could not be—at least is not—interchanged with any other; some of them are proper names exclusively attached to one spot, and one has not the meaning of plain at all.

1. *Ábel* (עֵבֶל). This word perhaps answers more nearly to our word "meadow" than any other, its root having, according to Gesenius, the force of moisture like that of grass. It occurs in the names of ABEL-MAIM, ABEL-MEHOLOH, ABEL-SHITTIM, and is rendered "plain" in Judg. xi. 33, "plain of vineyards."

2. *Bik'ah* (בִּיקְעָה). From a root signifying "to cleave or rend" (Gesen. *Thes.* 232; Fürst, *Homb.* i. 212). Fortunately we are able to identify the most remarkable of the *Bik'ahs* of the Bible, and thus to ascertain the force of the term. The great Plain or Valley of Coele-Syria, the "hollow land" of the Greeks, which separates the two ranges of Lebanon and Antilebanon, is the most remarkable of them all. It is called in the Bible the Bika'ath Aven (Am. i. 5), and also probably the Bika'ath Lebanon (Josh. xi. 17, xii. 7; and Bika'ath-Mizpek (xi. 8), and is still known throughout Syria by its old name, as *el-Bek'a*, or *Ard el-Bek'a*. "A long valley, though broad," says Dr. Pusey (*Comment.* on Am. i. 5), "if seen from a height looks like a cleft;" and this is eminently the case with the "Valley of Lebanon" when approached by the ordinary roads from north or south.<sup>a</sup> It is of great extent, more than 60 miles long by about 5 in average breadth, and the two great ranges shut it in on either hand, Lebanon especially, with a very wall-like appearance. Not unlike it in this effect is the Jordan Valley at Jericho, which appears to be once mentioned under the same title in Deut. xxiv. 3 (A. V. "the valley of Jericho"). This, however, is part of the Aialah, the proper name of the Jordan Valley. Besides these the "plain of Megiddo" (2 Chr. xxxv. 22, Zech. xii. 11, A. V. "valley of M."), and "the plain of Ono" (Neh. vi. 2) have not been identified.

Out of Palestine we find denoted by the word *Bik'ah* "the plain in the land of Shinar" (Gen. xi. 2), the "plain of Mesopotamia" (Ez. iii. 22, 23, viii. 4, xxxvii. 1, 2), and the "plain in the province of Dura" (Dan. iii. 1).

*Bik'ah* perhaps appears, with other Arabic words, in Spanish as *leja*, a term applied to well-

<sup>a</sup> An entirely different word in Hebrew (though identical in English) from the name of the son of Adam, which is *Hevel*.

<sup>b</sup> For instance, from the mountain between Zebdany and Bautee, half an hour past the Roman bridge.

<sup>c</sup> For instance, the farm-house which "sparkle amid the eternal verdure of the Vega of Granada" are called

*carmenes*, a term derived through the Arabic from the Hebrew *carmel*, a vineyard, a rich spot—a Carmel. Another Semitic word naturalized in Spain is *Seville* (see further down, No. 6). But indeed there are most numerous. For other examples see *Glossaire des Mots Espagnols dérivés de l'Arabe*, par Eugène Ray, Leyden, 1861.

watered valleys between hills (Ford, *Handbk.* sect. iii.), and especially to the valley of Granada, the most extensive and most fruitful of them all, of which the Moors were accustomed to boast that it was larger and richer than the *Glhattah*, the Oasis of Damascus.

3. *Hac-Cicâr* (הַכֶּקֶר). This, though applied to a plain, has not (if the lexicographers are right) the force of flatness or extent, but rather seems to be derived from a root signifying roundness. In its topographical sense (for it has other meanings, such as a coin, a cake, or flat leaf) it is confined to the Jordan valley. This sense it bears in Gen. xiii. 10, 11, 12, xix. 17, 25-29; Deut. xixiv. 3; 2 Sam. xviii. 23; 1 K. vii. 46; 2 Chr. iv. 17; Neh. iii. 22, xii. 28. The LXX. translate it by *περίχωρος* and *περὶχωρος*, the former of which is often found in the N. T., where the English reader is familiar with it as "the region round about." It must be confessed that it is not easy to trace any connexion between a "circular form" and the nature or aspect of the Jordan valley, and it is difficult not to suspect that *Cicâr* is an archaic term which existed before the advent of the Hebrews, and was afterwards adopted into their language.

4. *Ham-Mishôr* (הַמִּישׁוֹר). This is by the lexicographers explained as meaning "straightforward," "plain," as if from the root *yâshar*, to be just or upright; but this seems far-fetched, and it is more probable that in this case also we have an archaic term existing from a pre-historic date. It occurs in the Bible in the following passages:—Deut. iii. 10, iv. 43; Josh. xiii. 9, 16, 17, 21, xx. 8; 1 K. xx. 23, 25; 2 Chr. xxvi. 10; Jer. xlviii. 8, 21. In each of these, with one exception, it is used for the district in the neighbourhood of Heshbon and Dibon—the *Belka* of the modern Arabs, their most noted pasture-ground; a district which, from the scanty descriptions we possess of it, seems to resemble the "Downs" of our own country in the regularity of its undulations, the excellence of its turf, and its fitness for the growth of flocks. There is no difficulty in recognising the same district in the statement of 2 Chr. xxvi. 10. It is evident from several circumstances that Uzziah had been a great conqueror on the east of Jordan, as well as on the shore of the Mediterranean (see Ewald's remarks, *Geschichte*, iii. 583 note), and he kept his cattle on the rich pastures of Philistines on the one hand, and Ammonites on the other. Thus in all the passages quoted above the word *Mishôr* seems to be restricted to one special district, and to belong to it as exclusively as *Shefelah* did to the low land of Philistia, or *Arabah* to the sunken district of the Jordan valley. And therefore it is puzzling to find it used in one passage (1 K. xx. 23, 25) apparently with the mere general sense of low land, or rather flat land, in which chariots could be manoeuvred—as opposed to uneven mountainous ground. There is some reason to believe that the scene of the battle in question was on the east side of the Sea of Gennesareth in the plain of *Jordan*; but this is no explanation of the difficulty, because we are not warranted in extending the *Mishôr* further than the mountains which bounded it on the north, and where the districts began which bore, like it, their own distinctive names of Gilead, Bashan, Argob, Golan, Hauran, &c. Perhaps the most feasible explanation is that

<sup>4</sup> Jerome, again, probably followed the Targum or other Jewish authorities, and they usually employ the rendering above mentioned. *Vatâ* alone endeavours to find a

the word was used by the Syrians of Damascus without any knowledge of its strict significance in the same manner indeed that it was employed in the later Syro-Chaldee dialect, in which *mayâ* is the favourite term to express several sense features which in the older and stricter language were denominated each by its own special name.

5. *Ha-Arâbâh* (הָעֲרָבָה). This again had of absolutely definite meaning—being restricted to the valley of the Jordan, and to its continuation east of the Dead Sea. [See ARABAH, vol. i. 25, 26, and for a description of the aspect of the region, PATAINE, vol. ii. 674, 675.] No doubt the *Arâbâh* was the most remarkable plain of the Holy Land—but to render it by so general and common a term as our translators have done in the majority of cases, is materially to diminish its force and emphasis in the narrative. This is equally the case with

6. *Ha-Shefelâh* (הַשְּׁפֵלָה), the inevitable designation of the depressed, flat or gently undulating region which intervened between the highlands of Judah and the Mediterranean, and was anciently in possession of the Philistines. [PARADOX, 6. SEPHELA.] To the Hebrews this, and this only, was The Shefelah; and to have spoken of a more general term would have been as important for natives of the Coast of Stirling or the Kent to designate them differently. *Shefelah* is some claims of its own to notice. It was one of the most tenacious of these old Hebrew terms. It appears in the Greek text and in the Authorized Version of the Book of Maccabees (1 Mac. ii. 9), and is preserved on each of its other occurrences even in such corrupt dialects as the Samaritan Version of the Pentateuch, and the Targum of Jonathan, and of Rabbi Joseph. And although it would appear to be no longer known to its original seat, it has transferred itself to other regions, and appears in Spain as *Sevilla*, and on the west coast of Africa as *Sofala*.

7. *Èlôn* (עֵלֹן). Our translators have uniformly rendered this word "plain," *deserting* the Vulgate,<sup>4</sup> which in about half the places has *concellis*. But this is not the rendering of the majority or the most trustworthy of the ancient versions. They regard the word as meaning a "valley" or "grove of oaks," a rendering supported by nearly all the commentators and interpreters of the present day. It has the advantage of being much more picturesque, and throws a new light on the English reader over many an incident in the lives of the Patriarchs and early kings of Israel. The passages in which the word occurs are translated "plain," are as follows:—Plain of Euphrates (Gen. xii. 6; Deut. xi. 30), Plain of Egypt (Gen. xiii. 18, xiv. 13; xviii. 1), Plain of Esau (Gen. iv. 11), Plain of the Philistines (Judg. i. 4), Plain of Mesopotamia (Gen. 37), Plain of Tabor (1 Sam. vii. 6).

8. The Plain of Esdraelon which to the traveller in the Holy Land forms the last of the three most remarkable depressions of the country, the original by neither of the above terms, *Èlôn*, an appellative noun frequently occurring in the Bible for the smaller valleys of the country—"the valley of Jezreel." *Esdrâel* may anciently have been considered to consist of two portions; the Valley of Jezreel for the

reason for it—not a satisfactory one. "The most frequent plains or meadows" (*Handbk.* i. 30).

and smaller, the Plain of Megiddo the Western and more extensive of the two. [G.]

**PLASTER.** The mode of making plaster-ment has been described above. [MORTER.] Plaster is mentioned thrice in Scripture: 1. (Lev. xiv. 42, 48), where when a house was infected with "leprosy," the priest was ordered to take away the portion of infected wall and re-plaster it (Michaelis, *Laws of Moses*, §211, iii. 297-305, ed. Smith). [HOUSE; LEPROSY.]

2. The words of the law were ordered to be engraved on Mount Ebal on stones which had been previously coated with plaster (Deut. xxvii. 2, 4; Josh. viii. 32). The process here mentioned was probably of a similar kind to that adopted in Egypt for receiving bas-reliefs. The wall was first made smooth, and its interstices, if necessary, filled up with plaster. When the figures had been drawn, and the stone adjacent cut away so as to leave them in relief, a coat of lime whitewash was laid on, and followed by one of varnish after the painting of the figures was complete. In the case of the natural rock the process was nearly the same. The ground was covered with a thick layer of fine plaster, consisting of lime and gypsum carefully smoothed and polished. Upon this a coat of lime whitewash was laid, and on it the colours were painted, and set by means of glue or wax. The whitewash appears in most instances to have been made of shell-limestone not much burnt, which of itself is tenacious enough without glue or other binding material (Long, quoting from Belzoni, *Eg. Ant.* ii. 49-50).

At Behistun in Persia, the surface of the inscribed rock-tablet was covered with a varnish to preserve it from weather; but it seems likely that in the case of the Ebal tablets the inscription was cut while the plaster was still moist (Layard, *Ninereh*, ii. 188; Vaux, *Nin. & Pers.* p. 172).

3. It was probably a similar coating of cement, on which the fatal letters were traced by the mystic hand "on the plaster of the wall" of Belshazzar's palace at Babylon (Dan. v. 5). We here obtain an incidental confirmation of the Biblical narrative. For while at Nineveh the walls are panelled with alabaster slabs, at Babylon, where no such material is found, the builders were content to cover their tiles or bricks with enamel or stucco, fifty termed plaster, fit for receiving ornamental designs (Layard, *Nin. and Bab.* p. 529; Diod. ii. 8). [BRICKS.] [H. W. P.]

**PLEIADES.** The Heb. word (מִלְכָּם, *milcham*) so rendered occurs in Job ix. 9, xxxviii. 31, and Am. v. 8. In the last passage our A. V. has "the seven stars," although the Geneva version translates the word "Pleiades" as in the other cases. In Job the LXX. has Πλειάδες, the order of the Hebrew words having been altered [see ORION], while in Amos there is no trace of the original, and it is difficult to imagine what the translators had before them. The Vulgate in each passage has a different rendering: *Hyades* in Job ix. 9, *Pleiades* in Job xxxviii. 31, and *Arcturus* in Am. v. 8. Of the other versions the Peshito-Syriac and Chaldee merely adopt the Hebrew word; Aquila in Job xxxviii. γυναικίαν in Job xxxviii. and Amos, and Theodotion in Amos give "Pleiades," while with remarkable inconsistency Aquila in Amos has "Ar-

turus." The Jewish commentators are no less at variance. R. David Kimchi in his *Lexicon* says "R. Jonah wrote that it was a collection of stars called in Arabic *Al Thuraiyd*. And the wise Rabin Abraham Aben Ezra, of blessed memory, wrote that the ancients said *Cindh* is seven stars, and they are at the end of the constellation Aries, and those which are seen are six. And he wrote that what was right in his eyes was that 't was a single star, and that a great one, which is called the left eye of Taurus: and *Cesil* is a great star, the heart of the constellation Scorpio." On Job xxxviii. 31, Kimchi continues: "Our Rabbis of blessed memory have said (*Berachoth*, 58, 2), *Cindh* hath great cold and bindeth up the fruits, and *Cesil* hath great heat and ripeneth the fruits: therefore He said, 'or loosen the bands of *Cesil*,' for it openeth the fruits and bringeth them forth." In addition to the evidence of R. Jonah, who identifies the Hebrew *cindh* with the Arabic *Al Thuraiyd*, we have the testimony of R. Isaac Israel, quoted by Hyde in his notes on the Tables of Ulugh Beigh (pp. 31-33, ed. 1665) to the same effect. That *Al Thuraiyd* and the Pleiades are the same is proved by the words of Aben Hagel (quoted by Hyde, p. 33): "Al Thuraiyd is the mansion of the moon, in the sign Taurus, and it is called the celestial hen with her chickens." With this Hyde compares the Fr. *pulcinelle*, and Eng. *Hen and chickens*, which are old names for the same stars: and Niebuhr (*Descr. de l'Arabie*, p. 101) gives as the result of his inquiry of the Jew at Saïd, "*Kimch*, Pleiades, qu'on appelle aussi en Allemagne la poule qui glousse." The "Ancients," whom Aben Ezra quotes (on Job xxxviii. 31), evidently understood by the seven small stars at the end of the constellation Aries the Pleiades, which are indeed in the left shoulder of the Bull, but so near the Ram's tail, that their position might properly be defined with reference to it. With the statement that "those which are seen are six" may be compared the words of Didymus on Homer, τῶν δὲ Πλειάδων οὐσῶν ἑπτὰ, πᾶν ἀμαυρὸς δ' ἐβδόμενος ἀστὴρ, and of Ovid (*Fast.* iv. 170)—

"Quae septem diel, sex tamen esse solent."

The opinion of Aben Ezra himself has been frequently misrepresented. He held that *Cindh* was a single large star, *Aldebaran* the brightest of the Hyades, while *Cesil* [A. V. "Orion"] was *Antares* the heart of Scorpio. "When there rise in the east," he continues, "the effects which are recorded appear." He describes them as *opposite* each other and the difference in Right Ascension between *Aldebaran* and *Antares* is as nearly as possible twelve hours. The belief of Aben Ezra had probably the same origin as the rendering of the Vulgate, *Hyades*.

One other point is deserving of notice. The Rabbis as quoted by Kimchi, attribute to *Cindh* great cold and the property of checking vegetation, while *Cesil* works the contrary effects. But the words of R. Isaac Israel on Job xxxviii. 31 (quoted by Hyde, p. 72), are just the reverse. He says, "the stars have operations in the ripening of the fruits, and such is the operation of *Cindh*. And some of them retard and delay the fruits from ripening, and this is the operation of *Cesil*. The interpretation is, 'Wilt thou bind the fruits which the constellation *Cindh* ripeneth and openeth; or wilt thou open the fruits which the constellation *Cesil* contracteth and bindeth up?'"

On the whole then, though it is impossible to

1. מִלְכָּם, Ch. מִלְכָּם; *coria*; *calc.* In Is. xxi. 9, *chalk-stone*.

2. מִלְכָּם *coria*; *calc.*

hed corresponds to its domestic and settled character. From the time of David onwards, in the reigns of the earlier kings, when the country was quiet and at peace, or, if not at peace, at so firmly fixed in its acquired territory that its wars were no struggle for existence, the poetry blossomed and bore fruit. We meet it at intervals up to the time of the Captivity, and it is chiefly characteristic of the age of the monarchy. Ewald has appropriately designated this the "artificial period" of Hebrew poetry. From the decline of the 8th century B.C. the decline of the poetry was rapid, and with its glory departed the glories of its literature. The poems of this period are distinguished by a smoothness of diction and an external polish which betray tokens of care and art; the style is less flowing and easy, except in rare instances, there is no dash of ancient vigour. After the Captivity we have again but the poems which formed part of the ritual services of the Temple. Whether *dramatic* poetry, properly so called, ever existed among the Jews, is, to say the least, extremely doubtful. The opinion of some writers that the Song of Songs, external form, is a rude drama, designed for the popular stage. But the evidence for this view is very slight, and no good and sufficient reasons have been adduced which would lead us to conclude that the amount of dramatic action exhibited in the poem is more than would be involved in an extended poetic dialogue in which more than two persons take part. Philosophy and the drama are alike to have been peculiar to the Indo-European nations, and to have manifested themselves among the Semitic tribes only in their simplest and most simple form.

*Lyrical Poetry.*—The literature of the Hebrews abounds with illustrations of all forms of lyrical poetry, in its most manifold and wide-ranging compass, from such short ejaculations as the songs of the two Lamechs and Ps. xv., cxvii., others, to the longer chants of victory and mourning, like the songs of Deborah and David (e.g. v., Ps. xviii.). The thoroughly national character of all lyrical poetry has been already noted. It is the utterance of the people's life in its varied phases, and expresses all its most earnest strivings and impulses. In proportion as expression is vigorous and animated, the idealised in lyric song is in most cases narrowed rather concentrated. One truth, and even one of a truth, is for the time invested with the test prominence. All these characteristics will be found in perfection in the lyric poetry of the Hebrews. One other feature which distinguishes it as a form and its capability for being set to a vocal accompaniment. The names by which the various kinds of songs were known among the Hebrews will supply some illustration of this.

**שִׁיר**, *shir*, a song in general, adapted for the voice alone.

**מִזְמוֹר**, *mizmor*, which Ewald considers a lyric, properly so called, but which rather seems to correspond with the Greek *ψαλμός*, a psalm, or song sung with any instrumental accompaniment.

**נְגִינָה**, *neginah*, which Ewald is of opinion is equivalent to the Greek *ψαλμός*, is more probably a *ky* expressly adapted for stringed instruments.

**מִשְׁכָּל**, *maskil*, of which it may be said that Ewald's suggestion be not correct, that it denotes

a lyrical song requiring nice musical skill, it is difficult to give any more probable explanation. [*MASCHIL.*]

5. **מִכְתָּם**, *michtam*, a term of extremely doubtful meaning. [*MICHTAM.*]

6. **שִׁירָה**, *shirayon* (Ps. vii. 1), a wild, irregular, dithyrambic song, as the word appears to denote; or, according to some, a song to be sung with variations. The former is the more probable meaning. [*SHIRAYON.*] The plural occurs in Hab. iii. 1.

But, besides these, there are other divisions of lyrical poetry of great importance, which have regard rather to the subject of the poems than to their form or adaptation for musical accompaniments. Of these we notice:—

1. **תְּהִלָּה**, *tehillah*, a hymn of praise. The plural *tehillim* is the title of the Book of Psalms in Hebrew. The 145th Psalm is entitled "David's Psalm of praise;" and the subject of the psalm is in accordance with its title, which is apparently suggested by the concluding verse, "the praises of Jehovah my mouth shall speak, and let all flesh bless His holy name for ever and ever." To this class belong the songs which relate to extraordinary deliverances, such as the songs of Moses (Ex. xv.) and of Deborah (Judg. v.), and the Psalms xviii. and lxxviii., which have all the air of chants to be sung in triumphal processions. Such were the hymns sung in the Temple services, and by a bold figure the Almighty is apostrophised as "Thou that inhabitest the praises of Israel," which rose in the holy place with the fragrant clouds of incense (Ps. xlii. 3). To the same class also Ewald refers the shorter poems of the like kind with those already quoted, such as Ps. xxx., xxxiii., cxxxviii., and lxxviii., which relate to less general occasions, and commemorate more special deliverances. The songs of victory sung by the congregation in the Temple, as Ps. xlvii., xlviii., xlv. 7-10, which is a short triumphal ode, and Ps. xxi., which praises Jehovah on the occasion of a great natural phenomenon, are likewise all to be classed in this division of lyric poetry. Next to the hymn of praise may be noticed,

2. **קִינָה**, *kinah*, the lament, or dirge, of which there are many examples, whether uttered over an individual or as an outburst of grief for the calamities of the land. The most touchingly pathetic of all is perhaps the lament of David for the death of Saul and Jonathan (2 Sam. i. 19-27), in which passionate emotion is blended with touches of tenderness of which only a strong nature is capable. Compare with this the lament for Absalom (2 Sam. iii. 33, 34) and for Absalom (2 Sam. xviii. 33). Of the same character also, doubtless were the songs which the singing men and singing women spake over Josiah at his death (2 Chr. xxxv. 25), and the songs of mourning for the disasters which befel the hapless land of Judah, of which Psalms xlii., lx., lxxii., cxxxvii., are examples (comp. Jer. vii. 29, ix. 10 [9]), and the Lamentations of Jeremiah the most memorable instances.

3. **שִׁיר יְדִידָה**, *shir yedidah*, a love song (Ps. xlv. 1), in its external form at least. Other kinds of poetry there are which occupy the middle ground between the lyric and gnomic, being lyric in form and spirit, but gnomic in subject. These may be classed as

4. **מָשָׁל**, *masal*, properly a similitude, and then a parable, or sententious saying, couched in poetic

language.\* Such are the songs of Balaam (Num. xiii. 7, 18; xiv. 3, 15, 20, 21, 23), which are eminently lyrical in character; the mocking ballad in Num. xxi. 27-30, which has been conjectured to be a fragment of an old Amorite war-song [NUMBERS, p. 384 a]; and the apologue of Jotham (Judg. ix. 7-20), both which last are strongly satirical in tone. But the finest of all is the magnificent prophetic song of triumph over the fall of Babylon (Is. xiv. 4-27). חִידָה, *chiddáh*, an enigma (like the riddle of Samson, Judg. xiv. 14), or "dark saying," as the A. V. has it in Ps. xlix. 5, lxxviii. 2. The former passage illustrates the musical, and therefore lyric character of these "dark sayings;" "I will incline mine ear to a parable, I will open my dark saying upon the harp." *Máshál* and *chiddáh* are used as convertible terms in Ez. xvii. 2. Lastly, to this class belongs מְלִיצָה, *mélitsáh*, a mocking, ironical poem (Hab. ii. 6).

5. תְּפִלָּה, *téphilláh*, prayer, is the title of Ps. xvii., lxxvii., xc., cii., cxlii., and Hab. iii. All these are strictly lyrical compositions, and the title may have been assigned to them either as denoting the object with which they were written, or the use to which they were applied. As Ewald justly observes, all lyric poetry of an elevated kind, in so far as it reveals the soul of the poet in a pure swift outpouring of itself, is of the nature of a prayer; and hence the term "prayer" was applied to a collection of David's songs, of which Ps. lxxii. formed the conclusion.

II. *Gnomic Poetry*.—The second grand division of Hebrew poetry is occupied by a class of poems which are peculiarly Shemitic, and which represent the nearest approaches made by the people of that race to anything like philosophic thought. Reasoning there is none: we have only results, and those rather the product of observation and reflection than of induction or argumentation. As lyric poetry is the expression of the poet's own feelings and impulses, so gnomic poetry is the form in which the desire of communicating knowledge to others finds vent. There might possibly be an intermediate stage in which the poets gave out their experiences for their own pleasure merely, and afterwards applied them to the instruction of others, but this could scarcely have been of long continuance. The impulse to teach makes the teacher, and the teacher must have an audience. It has been already remarked that gnomic poetry, as a whole, requires for its development a period of national tranquillity. Its germs are the floating proverbs which pass current in the mouths of the people, and embody the experiences of many with the wit of one. From this small beginning it arises, at a time when the experience of the nation has become matured, and the mass of truths which are the result of such experience have passed into circulation. The fame of Solomon's wisdom was so great that no less than three thousand proverbs are attributed to him, this being the form in which the Hebrew mind found its most congenial utterance. The sayer of sententious sayings was to the Hebrews the wise man, the philosopher. Of the earlier isolated proverbs but few examples remain. One of the earliest occurs in the mouth of David, and in his time it

was the cover of the ancients: "from the sick cometh wickedness" (1 Sam. xiv. 18 [14]). Late on, when the fortunes of the nation were clouded their experience was embodied in terms of misery and despondency: "The days are prolonged, and every vision faileth," became a saying and a proverb (Ez. xiii. 22); and the feeling that the people were suffering for the sins of their fathers took the form of a sentence, "The fathers have eaten ungrapes, and the children's teeth are set on edge" (Ez. xviii. 2). Such were the models which the gnomic poet had before him for imitation. These detached sentences may be fairly assumed to be the earliest form, of which the fuller apophthegm is the expansion, swelling into sustained sentences, and even dramatic dialogue.

III. *Dramatic Poetry*.—It is impossible to assert that no form of the drama existed among the Hebrew people; the most that can be done is to examine such portions of their literature as have come down to us, for the purpose of ascertaining how far any traces of the drama proper are discernible, and what inferences may be made from them. It is unquestionably true, as Ewald observes, that the Arab reciters of romances will many times in their own persons act out a complete drama in recitation, changing their voice and gesture with the change of person and subject. Something of this kind may possibly have existed among the Hebrews; but there is no evidence that it did exist, nor any grounds for making even a probable conjecture with regard to it. A rude kind of farce is described by Mr. Lane (*Mod. Eg. n. chap. vi*), the players of which "are called *Mudshshar'a*. These frequently perform at the festivals prior to weddings and circumcisions, at the houses of the great; and sometimes attract rings of auditors and spectators in the public places in Cairo. Their performances are scarcely worthy of description: it is chiefly by vulgar gestures and indecent actions that they amuse and obtain applause. The actors are only men and boys: the part of a woman being always performed by a man or boy in female attire." Thus gives a description of one of these plays, the plot of which was extremely simple. But the mere fact of the existence of these rude exhibitions among the Arabs and Egyptians of the present day is of no weight when the question to be decided is, whether the Song of Songs was designed to be so represented, as a simple pastoral drama. Of course, in considering such a question, reference is made only to the external form of the poem, and, in order to prove it, it must be shown that the dramatic is the only form of representation which it could assume, and not that, by the help of two actors and a chorus, it is capable of being exhibited in a dramatic form. All that has been done, in our opinion, is the latter. It is but fair, however, to give the views of those who hold the opposite. Ewald maintains that the Song of Songs is designed for a simple stage, because it develops a complete action and admits of definite pauses in the action, which are only suited to the drama. He distinguishes it in this respect from the Book of Job, which is dramatic in form only, though, as it is occupied with a sublime subject, he compares it with tragedy, while the Song of Songs, being taken from the common life of the nation, may be compared to comedy

\* Lowth (Is. xiv. 4) understands *máshál* to be "the external name for poetic style among the Hebrews, including every sort of it, as ranging under one, or other,

of all the characters, of sententious, figurative, and sublime."

The one comparison is probably as appropriate as the other. In Ewald's division the poem falls into 13 cantos of tolerably equal length, which have a certain beginning and ending, with a pause after each. The whole forms four acts, for which three actors are sufficient: a hero, a maiden, and a chorus of women, these being all who would be on the stage at once. The following are the divisions of the acts:—

First Act, l. 1—ll. 7 . . .	1st canto, l. 2—8.
	2nd " l. 9—ll. 7.
Second Act, ll. 8—lll. 5 . . .	3rd " ll. 8—17.
	4th " lll. 1—5.
	5th " lll. 6—11.
	6th " iv. 1—7.
	7th " iv. 8—v. 1.
Third Act, lll. 6—vlll. 4 . . .	8th " v. 2—8.
	9th " v. 9—vi. 3.
	10th " vi. 4—vll. 1.
	11th " vll. 2—10.
	12th " vll. 10—vlll. 4.
Fourth Act, vlll. 5—14 . . .	13th canto.

The latest work on the subject is that of M. Renan (*Le Cantique des Cantiques*), who has given a spirited translation of the poem, and arranged it in acts and scenes, according to his own theory of the manner in which it was intended to be represented. He divides the whole into 16 cantos, which form five acts and an epilogue. The acts and scenes are thus arranged:—

First Act, l. 2—ll. 7 . . .	Scene 1. l. 2—4.
	" 2. l. 7—11.
	" 3. l. 12—ll. 7.
Second Act, ll. 8—lll. 5 . . .	Scene 1. ll. 8—17.
	" 2. lll. 1—5.
Third Act, lll. 6—v. 1 . . .	Scene 1. lll. 6—11.
	" 2. iv. 1—4.
	" 3. iv. 7—v. 1.
Fourth Act, v. 2—vll. 3 . . .	of a single scene.
	Scene 1. vll. 4—9.
Fifth Act, vll. 4—vlll. 4 . . .	" 2. vll. 10—vlll. 11.
	" 3. vll. 12—vlll. 4.
	" 4. vlll. 5—7.
Epilogue, vlll. 8—14 . . .	

But M. Renan, who is compelled, in accordance with his own theory of the mission of the Shemitic races, to admit that no trace of anything approaching to the regular drama is found among them, does not regard the Song of Songs as a drama in the same sense as the products of the Greek and Roman theatres, but as dramatic poetry in the widest application of the term, to designate any composition conducted in dialogue and corresponding to an action. The absence of the regular drama he attributes to the want of a complicated mythology, analogous to that possessed by the Indo-European peoples. Monotheism, the characteristic religious belief of the Shemitic races, stifled the growth of a mythology and checked the development of the drama. Be this as it may, dramatic representation appears to have been alien to the feelings of the Hebrews. At no period of their history before the age of Herod is there the least trace of a theatre at Jerusalem, whatever other foreign innovations may have been adopted, and the burst of indignation which the high-priest Jason incurred for attempting to establish a gymnasium and to introduce the Greek games is a significant symptom of the repugnance which the people felt for such spectacles. The same antipathy remains to the present day among the Arabs, and the attempts to introduce theatres at Beyrout and in Algeria have signally failed. But, says M. Renan, the Song of Songs is a dramatic poem: there were no public performances in Palestine, therefore it must have been represented in private; and he is compelled to frame

the following hypothesis concerning it: that it is a *libretto* intended to be completed by the play of the actors and by music, and represented in private families, probably at marriage-feasts, the representation being extended over the several days of the feast. The last supposition removes a difficulty which has been felt to be almost fatal to the idea that the poem is a continuously developed drama. Each act is complete in itself; there is no suspended interest, and the structure of the poem is obvious and natural if we regard each act as a separate drama intended for one of the days of the feast. We must look for a parallel to it in the middle ages, when, besides the mystery plays, there were scenic representations sufficiently developed. The Song of Songs occupies the middle place between the regular drama and the eclogue or pastoral dialogue, and finds a perfect analogue, both as regards subject and scenic arrangement, in the most celebrated of the plays of Arras, *Le Jeu de Robin et Marion*. Such is M. Renan's explanation of the outward form of the Song of Songs, regarded as a portion of Hebrew literature. It has been due to his great learning and reputation to give his opinion somewhat at length; but his arguments in support of it are so little convincing that it must be regarded at best but as an ingenious hypothesis, the groundwork of which is taken away by M. Renan's own admission that dramatic representations are alien to the spirit of the Shemitic races. The simple corollary to this proposition must be that the Song of Songs is not a drama, but in its external form partakes more of the nature of an eclogue or pastoral dialogue.

It is scarcely necessary after this to discuss the question whether the Book of Job is a dramatic poem or not. Inasmuch as it represents an action and a progress, it is a drama as truly and really as any poem can be which develops the working of passion, and the alternations of faith, hope, distrust, triumphant confidence, and black despair, in the struggle which it depicts the human mind as engaged in, while attempting to solve one of the most intricate problems it can be called upon to regard. It is a drama as life is a drama, the most powerful of all tragedies; but that it is a dramatic poem, intended to be represented upon a stage, or capable of being so represental, may be confidently denied.

One characteristic of Hebrew poetry, not indeed peculiar to it, but shared by it in common with the literature of other nations, is its intensely national and local colouring. The writers were Hebrews of the Hebrews, drawing their inspiration from the mountains and rivers of Palestine, which they have immortalised in their poetic figures, and even while uttering the sublimest and most universal truths never forgetting their own nationality in its narrowest and intensest form. Their images and metaphors, says Munk (*Palestine*, p. 444 a), "are taken chiefly from nature and the phenomena of Palestine and the surrounding countries, from the pastoral life, from agriculture and the national history. The stars of heaven, the sand of the sea-shore, are the image of a great multitude. Would they speak of a mighty host of enemies invading the country, they are the swift torrents or the roaring waves of the sea, or the clouds that bring on a tempest; the war-chariots advance swiftly like lightning or the whirlwinds. Happiness rises as the dawn and shines like the daylight; the blessing of God descends like the dew or the bountiful rain; the anger of Heaven is a devouring fire that annihilates the

wicked as the flame which devours the stubble. Unhappiness is likened to days of clouds and darkness; at times of great catastrophes the sun sets in broad day, the heavens are shaken, the earth trembles, the stars disappear, the sun is changed into darkness and the moon into blood, and so on. The cedars of Lebanon, the oaks of Bashan, are the image of the mighty man, the palm and the reed of the great and the humble, briars and thorns of the wicked; the pious man is an olive ever green, or a tree planted by the water-side. The animal kingdom furnished equally a large number of images: the lion, the image of power, is also, like the wolf, bear, etc., that of tyrants and violent and rapacious men; and the pious who suffers is a feeble sheep led to the slaughter. The strong and powerful man is compared to the he-goat or the bull of Bashan: the kine of Bashan figure, in the discourses of Amos, as the image of rich and voluptuous women; the people who rebel against the Divine will are a refractory heifer. Other images are borrowed from the country life and from the life domestic and social: the chastisement of God weighs upon Israel like a waggon laden with sheaves; the dead cover the earth as the dung which covers the surface of the fields. The impious man sows crime and reaps misery, or he sows the wind and reaps the tempest. The people yielding to the blows of their enemies are like the corn crushed beneath the threshing instrument. God tramples the wine in the wine-press when He chastises the impious and sheds their blood. The wrath of Jehovah is often represented as an intoxicating cup, which He causes those to empty who have merited His chastisement: terrors and anguish are often compared to the pangs of childbirth. Peoples, towns, and states are represented by the Hebrew poets under the image of daughters or wives; in their impiety they are courtesans or adulteresses. The historical allusions of most frequent occurrence are taken from the catastrophe of Sodom and Gomorrah, the miracles of the departure from Egypt, and the appearance of Jehovah on Sinai. Examples might easily be multiplied in illustration of this remarkable characteristic of the Hebrew poets: they stand thick upon every page of their writings, and in striking contrast to the vague generalisations of the Indian philosophic poetry.

In Hebrew, as in other languages, there is a peculiarity about the diction used in poetry—a kind of poetical dialect, characterized by archaic and irregular forms of words, abrupt constructions, and unusual inflexions, which distinguish it from the contemporary prose or historical style. It is universally observed that archaic forms and usages of words linger in the poetry of a language after they have fallen out of ordinary use. A few of these forms and usages are here given from Gesenius' *Lehrgebäude*. The Piel and Hiphil voices are used intransitively (Jer. li. 56; Ez. x. 7; Job xxix. 24): the apocopated future is used as a present (Job xv. 33; Ps. xi. 6; Is. xlii. 6). The termination  $\text{לִי}$  is bound for the ordinary feminine  $\text{לִי}$  (Ex. xv. 2; Gen. xlix. 22; Ps. cxxxii. 4); and for the plural  $\text{לֵנוּ}$  we have  $\text{לִי}$  (Job xv. 13; Ez. xxvi. 18) and  $\text{לֵנוּ}$  (Jer. xxii. 14; Am. vii. 1). The verbal suffixes,  $\text{לִי}$ ,  $\text{לֵנוּ}$ , and  $\text{לֵנוּ}$  (Ex. xv. 9), and the pronominal suffixes to nouns,  $\text{לִי}$  for  $\text{לִי}$ , and  $\text{לֵנוּ}$  for  $\text{לֵנוּ}$  (Hab. iii. 10), are peculiar to the poetical books; as are  $\text{לִי}$  (Ps. cxvi. 12),  $\text{לֵנוּ}$  (Deut. xxxii. 37; Ps. xi. 7),

the term. There are, say Jerome, four alphabetical Psalms, the 110th (111th), 111th (112th), 118th (119th), and the 144th (145th). In the first two, one letter corresponds to each clause or versicle, which is written in trimeter iambic. The others are in tetrameter iambics, like the song in Deuteronomy. In Ps. 118 (119), eight verses follow each letter: in Ps. 144 (145) a letter corresponds to a verse. In Lamentations we have four alphabetical acrostics, the first two of which are written in a kind of Sapphic metre; for three clauses which are connected together and begin with one letter (*i. e.* in the first clause) close with a period in heroic measure (*Heroici comma*). The third is written in trimeter, and the verses in threes each begin with the same letter. The fourth is like the first and second. The Proverbs end with an alphabetical poem in tetrameter iambics, beginning, "A virtuous woman who can find?" In the *Præf. in Chron. Euseb.* Jerome compares the metres of the Psalms to those of Horace and Pindar, now running in iambics, now ringing with Alcaics, now swelling with Sapphics, now beginning with a half foot. What, he asks, is more beautiful than the song of Deuteronomy and Isaiah? What more weighty than Solomon? What more perfect than Job? All which, as Josephus and Origen testify, are composed in hexameters and pentameters. There can be little doubt that these terms are mere generalities, and express no more than a certain rough resemblance, so that the songs of Moses and Isaiah may be designated hexameters and pentameters, with as much propriety as the first and second chapters of Lamentations may be compared to Sapphic odes. The resemblance of the Hebrew verse composition to the classic metres, is expressly denied by Gregory of Nyssa (1 *Tract. in Psalm.* cap. iv.). Augustine (*Ep.* 131 *ad Numerium*) confesses his ignorance of Hebrew, but adds that those skilled in the language believed the Psalms of David to be written in metre. Isidore of Seville (*Orig.* i. 18) claims for the heroic metre the highest antiquity, inasmuch as the Song of Moses was composed in it, and the Book of Job, who was contemporary with Moses, long before the times of Pherecydes and Homer, is written in dactyls and spondee. Joseph Saliger (*Animadv. ad Eus. Chron.* p. 6 b, &c.) was one of the first to point out the fallacy of Jerome's statement with regard to the metres of the Psalter and the Lamentations, and to assert that these books contained no verse bound by metrical laws, but that their language was merely prose, animated by a poetic spirit. He admitted the Song of Moses in Deuteronomy, the Proverbs, and Job, to be the only books in which there was necessarily any trace of rhythm, and this rhythm he compares to that of two dimeter iambics, sometimes of more, sometimes of fewer syllables as the sense required. Gerhard Vossius (*de Nat. et Const. Artis Poët.* lib. 1, c. 13, §2) says, that in Job and the Proverbs there is rhythm but no metre; that in regard is had to the number of syllables but not to their quantity. In the Psalms and Lamentations not even rhythm is observed.

But, in spite of the opinions pronounced by these high authorities, there were still many who believed in the existence of a Hebrew metre, and in the possibility of recovering it. The theories proposed for this purpose were various. Gomarus, professor at Gröningen (*Davidis Lyra*, Lugd. Bat. 1637), advocated both rhymes and metre; for the latter he laid down the following rules. The vowel alone, as it is long or short, determines the length of a syllable.

VOL. II.

*Shloa* forms no syllable. The periods or versicles of the Hebrew poems never contain less than a distich, or two verses, but in proportion as the periods are longer they contain more verses. The last syllable of a verse is indifferently long or short. This system, if system it may be called (for it is equally adapted for prose), was supported by many men of note; among others by the younger Buxtorf, Heinsius, L. de Liou, Constantin l'Empereur, and Hottinger. On the other hand it was vigorously attacked by L. Caprellius, Calovius, Danlauer, Pfeiffer, and Solomon Van Til. Towards the close of the 17th century Marcus Meibomius announced to the world, with an amount of pompous assurance which is charming, that he had discovered the lost metrical system of the Hebrews. By the help of this mysterious secret, which he attributed to divine revelation, he proposed to restore not only the Psalms but the whole Hebrew Scriptures, to their pristine condition, and thus confer upon the world a knowledge of Hebrew greater than any which had existed since the ages which preceded the Alexandrine translators. But Meibomius did not allow his enthusiasm to get the better of his prudence, and the condition on which this portentous secret was to be made public was, that six thousand curious men should contribute 5*l.* sterling a-piece for a copy of his book, which was to be printed in two volumes folio. It is almost needless to add that his scheme fell to the ground. He published some specimens of his restoration of ten Psalms, and six entire chapters of the Old Testament in 1690. The glimpses which he gives of his grand secret are not such as would make us regret that the knowledge of it perished with him. The whole Book of Psalms, he says, is written in distichs, except the first Psalm, which is in a different metre, and serves as an introduction to the rest. They were therefore intended to be sung, not by one priest, or by one chorus, but by two. Meibomius "was severely chastised by J. H. Mains, B. H. Gebhardus, and J. G. Zentgrafius" (Jebb, *Sacr. Lit.* p. 11). In the last century the learned Francis Hare, bishop of Chichester, published an edition of the Hebrew Psalms, metrically divided, to which he prefixed a dissertation on the ancient poetry of the Hebrews (*Psalm. lib. in versiculos metricæ divinus*, &c., Lond. 1736). Bishop Hare maintained that in Hebrew poetry no regard was had to the quantity of syllables. He regarded *Shéras* as long vowels, and long vowels as short at his pleasure. The rules which he laid down are the following. In Hebrew poetry all the feet are dissyllables, and no regard is had to the quantity of a syllable. Clauses consist of an equal or unequal number of syllables. If the number of syllables be equal, the verses are trochaic; if unequal, iambic. Periods for the most part consist of two verses, often three or four, sometimes more. Clauses of the same period are of the same kind, that is, either iambic or trochaic, with very few exceptions. Trochaic clauses generally agree in the number of the feet, which are sometimes three, as in Ps. xiv. 1, cvi. 1, and this is the most frequent; sometimes five, as in Ps. ix. 5. In iambic clauses the number of feet is sometimes the same, but they generally differ. Both kinds of verse are mixed in the same poem. In order to carry out these rules they are supplemented by one which gives to the versifier the widest licence. Words and verses are contracted or lengthened at will, by syncope, elision, &c. In addition to this, the bishop was under the necessity of maintaining that all grammarians had hitherto erred in laying down the

rules of ordinary punctuation. His system, if it may be so called, carries its own refutation with it, but was considered by Lowth to be worthy a reply under the title of *Metriæ Hærianæ Brevis Confutatio*, printed at the end of his *De Sacra Poes. Heb. Tractationes*, &c.

Anton (*Conject. de Metro Heb. Ant.* Lips. 1770), admitting the metre to be regulated by the accents, endeavoured to prove that in the Hebrew poems was a highly artistic and regular system, like that of the Greeks and Romans, consisting of strophes, antistrophes, epodes, and the like; but his method is as arbitrary as Hare's. The theory of Lautwein (*Versuch einer richtigen Theorie von der bibl. Verskunst*, Tüb. 1775) is an improvement upon those of his predecessors, inasmuch as he rejects the measurement of verse by long and short syllables, and marks the scansion by the tone accent. He assumes little more than a free rhythm: the verses are distinguished by a certain relation in their contents, and connected by a poetic euphony. Sir W. Jones (*Comment. Poes. Asiaticæ*, 1774) attempted to apply the rules of Arabic metre to Hebrew. He regarded as a long syllable one which terminated in a consonant or quiescent letter (ס, מ, ׀); but he did not develop any system. The present Arabic prosody, however, is of comparatively modern invention; and it is not consistent with probability that there could be any system of versification among the Hebrews like that imagined by Sir W. Jones, when in the example he quotes of Cant. i. 5, he refers the first clause of the verse to the second, and the last to the fifteenth kind of Arabic metre. Greve (*Ultima Capita Jobi*, &c., 1791) believed that in Hebrew, as in Arabic and Syriac, there was a metre, but that it was obscured by the false orthography of the Masorets. He therefore assumed for the Hebrew an Arabic vocalisation, and with this modification he found iambic trimeters, dimeters, and tetrameters, to be the most common forms of verse, and lays down the laws of versification accordingly. Bellermann (*Versuch über die Metrik der Hebräer*, 1813) was the last who attempted to set forth the old Hebrew metres. He adopted the Masoretic orthography and vocalisation, and determined the quantity of syllables by the accentuation, and what he termed the "Moresystem," denoting by *moren* the compass of a single syllable. Each syllable which has not the tone accent must have three *moren*; every syllable which has the tone accent may have either four or two, but generally three. The *moren* are reckoned as follows: a long vowel has two; a short vowel, one; every consonant, whether single or double, has one *more*. *Sheva* simple or composite is not reckoned. The quiescent letters have no *more*. *Dagesh forte* compensative has one; so has *metheg*. The majority of disyllable and trisyllable words, having the accent on the last syllable, will thus form iambs and anapaests. But as many have the accent on the penultimate, these will form trochees. The most common kinds of feet are iambs and anapaests, interchanging with trochees and tribachs. Of verses composed of these feet, though not uniform as regards the numbers of the feet, consist, according to Bellermann, the poems of the Hebrew Scriptures.

Among those who believed in the existence of a Hebrew metre, but in the impossibility of recovering it were, Carpzov, Lowth, Pfeiffer, Herder to a certain extent, Jahn, Bauer, and Buxtorf. The opinions of Lowth, with regard to Hebrew metre, are summed up by Jebb (*Sacr. Lit.* v. 16) as follows: "He

begins by asserting, that certain of the Hebrew writings are not only animated with the true poetic spirit, but, in some degree, couched in poetic numbers; yet, he allows, that the quantity, the rhythm, or modulation of Hebrew poetry, not only is unknown, but admits of no investigation by human art or industry; he states, after Abarbanel, that the Jews themselves disclaim the very memory of metrical composition; he acknowledges, that the official confirmation of the sentences, is the sole indication of metre in these poems; he lastly maintains the *credibility* of attention having been paid to numbers or feet in their compositions; and, at the same time, he confesses the utter impossibility of determining, whether Hebrew poetry was modulated by the ear alone, or according to any rules and settled rules of prosody." The opinions of Scaliger and Vossius have been already stated. Vossius allows to Isaiah a kind of natural measure, but adds that it could not on this account be rightly termed poetry. Michaelis (*Not. 4 in Frœk.* 1781) in his notes on Lowth, held that there were no metre in Hebrew, but only a free rhythm, a recitative, though even less trammelled. He dated himself against the Masoretic distinction of long and short vowels, and made the rhythm to depend upon the tone syllable; adding, with regard to free and regular metre, that what has evaded our diligent search he thought had no existence. In the subject of the rhythmical character of Hebrew poetry, as opposed to metrical, the remarks of Jebb are remarkably appropriate. "Hebrew poetry," he says (*Sacr. Lit.* p. 20), "is universal poetry, is poetry of all languages, and of all peoples; the collocation of words (whatever may have been the sound, for of this we are quite ignorant) is merely directed to secure the best possible statement and discrimination of the sense; let, then, a translator only be literal, and, so far as the genius of a language will permit, let him preserve the original order of the words, and he will actually put the reader in possession of all, or nearly all, that the Hebrew text can give to the best Hebrew scholar of the present day. Now, had there been regular metre, the case, it is presumed, could hardly have been such; somewhat must have been sacrificed to the importunities of metrical necessity; the ear could not have invariably predominated over the sense; and the poetry could not have been so unquestionably and emphatically a poetry of sounds, or of words, but of things. Let us, at the last assertion, however, be misinterpreted; and be understood merely to assert that words or words in subordination to sound, do not in Hebrew, as in classical poetry, enter into the measure of things; but it is happily undeniable, that the end of the poetical Scriptures are expensively and to convey the sense; and it is highly probable, that the lifetime of the language, the words were so sufficiently harmonious: when I say sufficiently harmonious, I mean so harmonious as to render the poet grateful to the ear in recitation, and enable a good accompaniment; for which purpose, the most well modulated prose would fully answer; which will not be controverted by any person with a moderately good ear, that has ever been struck of Isaiah skillfully read from our authorized translation; that has ever listened to one of Kalm's songs well performed, or to a song from the *Band des Handel*."

Abarbanel (on Is. vi.) traces three classes of Hebrew poetry (including in the first the psalms)

poems which, in imitation of the Arabic, are constructed according to modern principles of versification. Among the second class he arranges such as have no metre, but are adapted to melodies. In these occur the poetical forms of words, lengthened and abbreviated, and the like. To this class belong the songs of Moses in Ex. xv., Deut. xxxii., the song of Deborah, and the song of David. The third class includes those compositions which are distinguished not by their form but by the figurative character of their descriptions, as the Song of Songs, and the Song of Isaiah.

Among those who maintain the absence of any regularity perceptible to the ear in the composition of Hebrew poetry, may be mentioned Richard Simon (*Hist. Crit. du V. T.* i. c. 8, p. 57), Wasmuth (*Inst. Acc. Hebr.* p. 14), Alstedius (*Enc. Bibl.* c. 27, p. 257), the author of the book Cozri, and R. Azariah de Rossi, in his book entitled *Meor Enayim*. The author of the book Cozri held that the Hebrews had no metre bound by the laws of diction, because their poetry being intended to be sung was therefore independent of metrical laws. R. Azariah expresses his approbation of the opinions of Cozri and Aburabanel, who deny the existence of songs in Scripture composed after the manner of modern Hebrew poems, but he adds nevertheless, that beyond doubt there are other measures which depend upon the sense. Mendelssohn (on Ex. xv.) also rejects the system of יְתִידִית וְתִנּוּשִׁית (literally, pegs and vowels).<sup>b</sup> Rabbi Azariah appears to have anticipated Bishop Lowth in his theory of parallelism: at any rate his treatise contains the germ which Lowth developed, and may be considered, as Jebb calls it, the technical basis of his system. But it also contains other elements, which will be alluded to hereafter. His conclusion, in Lowth's words (*Isaiah*, prel. diss.), was as follows:—"That the sacred songs have undoubtedly certain measures and proportions which, however, do not consist in the number of syllables, perfect or imperfect, according to the form of the modern verse which the Jews make use of, and which is borrowed from the Arabians (though the Arabic prosody, he observes, is too complicated to be applied to the Hebrew language); but in the number of things, and of the parts of things,—that is, the subject, and the predicate, and their adjuncts, in every sentence and proposition. Thus a phrase, containing two parts of a proposition, consists of two measures; add another containing two more, and they become four measures; another again, containing three parts of a proposition, consists of three measures; add to it another of the like, and you have six measures."

The following example will serve for an illustration:—

Thy-right-hand, O-Jehovah, is-glorious in-power,

Thy-right-hand, O-Jehovah, hath-crushed the-enemy.

The words connected by a hyphen form a term, and the two lines, forming four measures each, may be called tetrameters. "Upon the whole, the author concludes, that the poetical parts of the Hebrew Scriptures are not composed according to the rules and measures of certain feet, dissyllables, trisyllables, or the like, as the poems of the modern Jews are; but nevertheless have undoubtedly other measures which depend on things, as above explained. For which reason they are more excellent

than those which consist of certain feet, according to the number and quantity of syllables. Of this, says he, you may judge yourself in the Songs of the Prophets. For do you not see, if you translate some of them into another language, that they still keep and retain their measure, if not wholly, at least in part? which cannot be the case in those verses, the measures of which arise from a certain quantity and number of syllables." Lowth expresses his general agreement with R. Azariah's exposition of the rhythmus of things; but instead of regarding terms, or phrases, or senses, in single lines, as measures, he considered "only that relation and proportion of one verse to another, which arises from the correspondence of terms, and from the form of construction; from whence results a rhythmus of propositions, and a harmony of sentences." But Lowth's system of parallelism was more completely anticipated by Schoettgen in a treatise, of the existence of which the bishop does not appear to have been aware. It is found in his *Horae Hebraicae*, vol. i. pp. 1249-1263, diss. vi., "de Exergasia Sacra." This *exergasia* he defines to be, the conjunction of entire sentences signifying the same thing: so that *exergasia* bears the same relation to sentences that synonymy does to words. It is only found in those Hebrew writings which rise above the level of historical narrative and the ordinary kind of speech. Ten canons are then laid down, each illustrated by three examples, from which it will be seen how far Schoettgen's system corresponded with Lowth's. (1.) Perfect *exergasia* is when the members of the two clauses correspond, each to each; as in Ps. xxxiii. 7; Num. xxiv. 17; Luke i. 47. (2.) Sometimes in the second clause the subject is omitted, as in Is. i. 18; Prov. vii. 19; Ps. cxix. 3. (3.) Sometimes part of the subject is omitted, as in Ps. xxxvii. 30, cii. 28; Is. liii. 5. (4.) The predicate is sometimes omitted in the second clause, as in Num. xxiv. 5; Ps. xxxiii. 12; cxiii. 6. (5.) Sometimes part only of the predicate is omitted, as in Ps. lvii. 9, ciii. 1, cxix. 7. (6.) Words are added in one member which are omitted in the other, as in Num. xxiii. 18; Ps. cii. 29; Dan. xii. 3. (7.) Sometimes two propositions will occur, treating of different things, but referring to one general proposition, as in Ps. xciv. 9, cxviii. 3; Wisd. iii. 16. (8.) Cases occur, in which the second proposition is the contrary of the first, as in Prov. xv. 8, xiv. 1, 11. (9.) Entire propositions answer each to each, although the subject and predicate are not the same, as in Ps. li. 7, cxix. 168; Jer. viii. 22. (10.) *Exergasia* is found with three members, as in Ps. i. 1, cxix. 5, lii. 9. These canons Schoettgen applied to the interpretation of Scripture, of which he gives examples in the remainder of this and the following Dissertation.

But whatever may have been achieved by his predecessors, there can be no question that the delivery of Lowth's lectures on Hebrew Poetry, and the subsequent publication of his translation of Isaiah, formed an era in the literature of the subject, more marked than any that had preceded it. Of his system it will be necessary to give a somewhat detailed account; for whatever may have been done since his time, and whatever modifications of his arrangement may have been introduced, all subsequent writers have confessed their obligations to the two works above-mentioned, and have drawn their inspiration from them. Starting with the alphabetical poems as the basis of his investigation, because that in them the verses or stanzas were

<sup>b</sup> יְתִידִית is a syllable, simple or compound, beginning with a consonant bearing moving, *Sheva* (Mason and Bernard's *Heb.* Or. ii. 203).

more distinctly marked, Lowth came to the conclusion that they consist of verses properly so called, "of verses regulated by some observation of harmony or cadence; of measure, numbers, or rhythm," and that this harmony does not arise from rhyme, but from what he denominates parallelism. Parallelism he defines to be the correspondence of one verse or line with another, and divides it into three classes, synonymous, antithetic, and synthetic.

1. Parallel lines *synonymous* correspond to each other by expressing the same sense in different but equivalent terms, as in the following examples, which are only two of the many given by Lowth:—

"O Jehovah, in thy strength the king shall-rejoice;  
And in thy salvation how greatly shall he-exult!  
The desire of his heart thou hast-granted unto him;  
And the request of his lips thou hast-not denied."

Ps. xxi. 1, 2.

"For the moth shall-consume them like a-garment;  
And the worm shall-eat them like wool:  
But my-righteousness shall-endure for-ever;  
And my-salvation to-the-age of-age."—Is. li. 7, 8.

It will be observed from the examples which Lowth gives that the parallel lines sometimes consist of three or more synonymous terms, sometimes of two, sometimes only of one. Sometimes the lines consist each of a double member, or two propositions, as Ps. cxliv. 5, 6; Is. lxxv. 21, 22. Parallels are formed also by a repetition of part of the first sentence (Ps. lxxvii. 1, 11, 16; Is. xxvi. 5, 6; Hos. vi. 4); and sometimes a part has to be supplied from the former to complete the sentence (2 Sam. xxii. 41; Job xxvi. 5; Is. xli. 28). Parallel triplets occur in Job iii. 4, 6, 9; Ps. cxli. 10; Is. ix. 20; Joel iii. 13. Examples of parallels of four lines, in which two distichs form one stanza, are Ps. xxxvii. 1, 2; Is. i. 3, xlix. 4; Am. i. 2. In periods of five lines the odd line sometimes comes in between two distichs, as in Job viii. 5, 6; Is. xlvi. 7; Hos. xiv. 9; Joel iii. 16; or after two distichs closes the stanza, as in Is. xlv. 26. Alternate parallelism in stanzas of four lines is found in Ps. ciii. 11, 12; Is. xxx. 16; but the most striking examples of the alternate quatrain are Dent. xxxii. 25, 42, the first line forming a continuous sense with the third, and the second with the fourth (comp. Is. xxiv. 6; Gen. xlix. 6). In Is. l. 10 we find an alternate quatrain followed by a fifth line. To this first division of Lowth's Jebb objects that the name *synonymous* is inappropriate, for the second clause, with few exceptions, "diversifies the preceding clause, and generally so as to rise above it, forming a sort of climax in the sense." This peculiarity was recognised by Lowth himself in his 4th Praefation, where he says, "idem iterant, variant, augent," thus marking a cumulative force in this kind of parallelism. The same was observed by Abp. Newcome in his Preface to Ezekiel, where examples are given in which "the following clauses so diversify the preceding ones as to rise above them" (Is. xlii. 7, xliii. 16; Ps. xcv. 2, civ. 1). Jebb, in support of his own opinion, appeals to the passages quoted by Lowth (Ps. xxi. 12, cvii. 38; Is. lv. 6, 7), and suggests as a more appropriate name for parallelism of this kind, *cognate parallelism* (*Sacr. Lit.* p. 38).

2. Lowth's second division is *antithetic parallelism*; when two lines correspond with each other by an opposition of terms and sentiments; when the second is contrasted with the first, sometimes in expressions, sometimes in sense only, so that

the degrees of antithesis are various. An example—

"A wise son rejoiceth his father;  
But a foolish son is the grief of his mother."—Prov. x.  
"The memory of the just is a blessing,  
But the name of the wicked shall rot."—Prov. x. 1

The gnomic poetry of the Hebrews abounds with illustrations of antithetic parallelism. Other examples are Ps. xx. 7, 8:—

"These in chariots, and those in horses  
But we in the name of Jehovah our God will be strong  
They are bowed down, and fallen;  
But we are risen, and maintain ourselves firm."

Compare also Ps. xxi. 5, xxxvii. 10, 11; Is. li. 10, li. 10. On these two kinds of parallelism Jebb appropriately remarks:—"The *Antithetic Parallelism* serves to mark the broad distinction between truth and falsehood, and good and evil; the *Constructive Parallelism* discharges the more difficult and so critical function of discriminating between other degrees of truth and good on the one hand, of falsehood and evil on the other" (*Sacr. Lit.* p. 4).

3. *Synthetic or constructive parallelism*, when the parallel "consists only in the similar form of construction; in which word does not answer word, and sentence to sentence, as equivalent or opposite; but there is a correspondence and equality between different propositions, in respect of the shape and turn of the whole sentence, and of its constructive parts—such as noun answering to noun, verb to verb, member to member, negative to negative, interrogative to interrogative." One of the examples of constructive parallelism given by Lowth is Is. l. 5, 6:—

"The Lord Jehovah hath opened mine ear,  
And I was not rebellious;  
Neither did I withdraw myself backward—  
I gave my back to the smiters,  
And my cheeks to them that plucked off the hair;  
My face I hid not from shame and spitting."

Jebb gives as an illustration Ps. xli. 7-10:—

"The law of Jehovah is perfect, converting the soul.  
The testimony of Jehovah is pure, making us to be simple." &c.

It is instructive, as showing how difficult it is impossible, it is to make any strict distinction in Hebrew poetry, to observe that this very passage given by Gesenius as an example of *synthetic parallelism*, while De Wette calls it *synthetic*, is illustration of *synthetic parallelism* quoted by Lowth is Ps. xxvii. 4:—

"One thing I ask from Jehovah,  
It will I seek after—  
My dwelling in the house of Jehovah all the days of my life,  
To behold the beauty of Jehovah,  
And to inquire in his temple."

In this kind of parallelism, as Nicholson (*Proc. Acad.* p. 87) observes, "an idea is neither followed by its opposite, but it is repeated by the writer, while he proceeds to develop and enforce his meaning by accessory ideas and variations."

4. To the three kinds of parallelism above mentioned Jebb adds a fourth, which seems rather an unnecessary refinement upon that divided into others. He denominates it *idiomatic parallelism* in which he says, "there are stanzas in which that, whatever be the number of lines, the second shall be parallel with the last, the second with the penultimate; and so throughout." An example is

looks inward, or, to borrow a military phrase, from flanks to centre" (*Sacr. Lit.* p. 53). Thus—

"My son, if thine heart be wise,  
My heart also shall rejoice;  
Yea, my reins shall rejoice  
When thy lips speak right things."

Prov. xxiii. 15, 16.

"Unto Thee do I lift up mine eyes, O Thou that dwellest in the heavens;

Behold as the eyes of servants to the hand of their masters;

As the eyes of a maiden to the hands of her mistress:  
Even so look our eyes to Jehovah our God, until he have mercy upon us."—Ps. cxlvi. 1, 2.

Upon examining these and the other examples quoted by Bishop Jebb in support of his new division, to which he attaches great importance, it will be seen that the peculiarity consists in the structure of the stanza, and not in the nature of the parallelism; and any one who reads Ewald's elaborate treatise on this part of the subject will rise from the reading with the conviction that to attempt to classify Hebrew poetry according to the character of the stanzas employed will be labour lost and in vain, resulting only in a system which is no system, and in rules to which the exceptions are more numerous than the examples.

A few words may now be added with respect to the classification proposed by De Wette, in which more regard was had to the rhythm. The four kinds of parallelism are—1. That which consists in an equal number of words in each member, as in Gen. iv. 23. This he calls the original and perfect kind of parallelism of members, which corresponds with metre and rhyme, without being identical with them (*Die Psalmen*, *Eis.* §7). Under this head are many minor divisions.—2. Unequal parallelism, in which the number of words in the members is not the same. This again is divided into—*a.* The simple, as Ps. lxxviii. 33. *b.* The composite, consisting of the synonymous (Job x. 1; Ps. xxvi. 7), the antithetic (Ps. xv. 4), and the synthetic (Ps. xv. 5). *c.* That in which the simple member is disproportionately small (Ps. xl. 10). *d.* Where the composite member grows up into three and more sentences (Ps. i. 3, lxx. 10). *e.* Instead of the close parallelism there sometimes occurs a short additional clause, as in Ps. xxiii. 3.—3. Out of the parallelism which is unequal in consequence of the composite character of one member, another is developed, so that both members are composite (Ps. xxxi. 11). This kind of parallelism again admits of three subdivisions.—4. Rhythmical parallelism, which lies merely in the external form of the diction. Thus in Ps. xix. 11 there is nearly an equal number of words:—

"Moreover by them was thy servant warned,  
In keeping of them there is great reward."

In Ps. xxx. 3 the inequality is remarkable. In Ps. xiv. 7 is found a double and a single member, and in Ps. xxxi. 23 two double members. De Wette also held that there were in Hebrew poetry the beginnings of a composite rhythmical structure like our strophes. Thus in Ps. xlii., xliii., a refrain marks the conclusion of a larger rhythmical period. Something similar is observable in Ps. cvii. This artificial structure appears to belong to a late period of Hebrew literature, and to the same period may probably be assigned the remarkable gradational rhythm which appears in the Songs of Degrees, e. g. Ps. cxi. It must be observed that this gradational rhythm is very different from the cumu-

lative parallelism of the Song of Deborah, which is of a much earlier date, and bears traces of less effort in the composition. Strophes of a certain kind are found in the alphabetical pieces in which several Masorethic clauses belong to one letter (Ps. ix., x., xxvii., cxix.; Lam. iii.), but the nearest approach to anything like a strophical character is found in poems which are divided into smaller portions by a refrain, and have the initial or final verse the same or similar (Ps. xxxix., xlii., xliii.). In the opinion of some the occurrence of the word *Selah* is supposed to mark the divisions of the strophes.

It is impossible here to do more than refer to the essay of Koester (*Theol. Stud. und Krit.* 1831, pp. 40-114) on the strophes, or the parallelism or verses in Hebrew poetry; in which he endeavours to show that the verses are subject to the same laws of symmetry as the verse members; and that consequently Hebrew poetry is essentially strophical in character. Ewald's treatise requires more careful consideration; but it must be read itself, and a slight sketch only can here be given. Briefly thus:—Verses are divided into verse-members in which the number of syllables is less restricted, as there is no syllabic metre. A verse-member generally contains from seven to eight syllables. Two members, the rise and fall, are the fundamental constituents: thus (Judg. v. 3):—

"Hear, ye kings! give ear, ye princes!  
I to Jahve, I will sing."

To this all other modifications must be capable of being reduced. The variations which may take place may be either amplifications or continuations of the rhythm, or compositions in which a complete rhythm is made the half of a new compound, or we may have a diminution or enfeeblement of the original. To the two members correspond two thoughts which constitute the life of the verse, and each of these again may distribute itself. Gradations of symmetry are formed—1. By the echo of the whole sentence, where the same sense which is given in the first member rises again in the second, in order to exhaust itself more thoroughly (Gen. iv. 23; Prov. i. 8). An important word of the first member often reserves its force for the second, as in Ps. xx. 8; and sometimes in the second member a principal part of the sense of the first is further developed, as Ps. xlix. 5 [6].—2. When the thought trails through two members of a verse, as in Ps. cx. 5, it gives rise to a less animated rhythm (comp. also Ps. cxli. 10).—3. Two sentences may be brought together as protasis and apodosis, or simply to form one complex thought; the external harmony may be dispensed with, but the harmony of thought remains. This may be called the intermediate rhythm. The forms of structure assumed by the verse are many. First, there is the single member, which occurs at the commencement of a series in Ps. xviii. 2, xxiii. 1; at the end of a series in Ex. xv. 18, Ps. xcii. 9; and in the middle, after a short pause, in Ps. xix. 7. The bimembral verse is most frequently found, consisting of two members of nearly equal weight. Verses of more than two members are formed either by increasing the number of members from two to three, so that the complete fall may be reserved for the third, all three possessing the same power; or by combining four members two and two, as in Ps. xviii. 7, xxviii. 1.

The varieties of this structure of verse are too numerous to be recounted, and the laws of rhythm in Hebrew poetry are so free, that of necessity the

varieties of verse structure must be manifold. The *gnomic* or *sententious* rhythm, Ewald remarks, is the one which is perfectly symmetrical. Two members of seven or eight syllables, corresponding to each other as rise and fall, contain a thesis and antithesis, a subject and its image. This is the constant form of genuine gnomic sentences of the best period. Those of a later date have many members or trail themselves through many verses. The animation of the lyrical rhythm makes it break through all such restraints, and leads to an amplification or reduplication of the normal form; or the passionate rapidity of the thoughts may disturb the simple concord of the members, so that the unequal structure of verse intrudes with all its varieties. To show how impossible it is to attempt a classification of verse uttered under such circumstances, it will be only necessary to quote Ewald's own words. "All these varieties of rhythm, however, exert a perfectly free influence upon every lyrical song, just according as it suits the mood of the moment to vary the simple rhythm. The most beautiful songs of the flourishing period of poetry allow, in fact, the verse of many members to predominate whenever the diction rises with any sublimity; nevertheless, the standard rhythm still returns in each when the diction flags, and the different kinds of the more complex rhythm are employed with equal freedom and ease of variation, just as they severally accord with the fluctuating hues of the mood of emotion, and of the sense of the diction. The late alphabetical songs are the first in which the fixed choice of a particular versification, a choice, too, made with designed art, establishes itself firmly, and maintains itself symmetrically throughout all the verses" (*Dichter des A. B.* i. p. 83; trans. in Kittó's *Journal*, i. p. 318). It may, however, be generally observed, that the older rhythms are the most animated, as if accompanied by the hands and feet of the singer (Num. xxi.; Ex. xv.; Judg. v.), and that in the time of David the rhythm had attained its most perfect development. By the end of the 8th century B.C. the decay of versification begins, and to this period belong the artificial forms of verse.

It remains now only to notice the rules of Hebrew poetry as laid down by the Jewish grammarians, to which reference was made in remarking upon the system of R. Asariah. They have the merit of being extremely simple, and are to be found at length, illustrated by many examples, in Mason and Bernard's *Heb. Gram.* vol. ii. let. 57, and accompanied by an interesting account of modern Hebrew versification. The rules are briefly these:—1. That a sentence may be divided into members, some of which contain two, three, or even four words, and are accordingly termed *Binary*, *Ternary*, and *Quaternary* members respectively. 2. The sentences are composed either of *Binary*, *Ternary*, or *Quaternary* members entirely, or of these different members intermixed. 3. That in two consecutive members it is an elegance to express the same idea in different words. 4. That a word expressed in either of these parallel members is often not expressed in the alternate member. 5. That a word without an accent, being joined to another word by *Makkeph*, is generally (though not always) reckoned with that second word as one. It will be seen that these rules are essentially the same with those of Lowth, De Wette, and other writers on parallelism, and from their simplicity are less open to objection than any that have been given.

## POISON

In conclusion, after reviewing the various theories which have been framed with regard to the structure of Hebrew poetry, it must be confessed that beyond the discovery of very broad general laws little has been done towards elaborating a satisfactory system. Probably this want of success is due to the fact that there is no system to discover, and that Hebrew poetry, while possessed, in the highest degree, of all sweetness and variety of rhythm and melody, is not fettered by laws of versification as we understand the term.

For the literature of the subject, in addition to the works already quoted, reference may be made to the following:—Carpov, *Isr.* and *Leb. de. Bibl.* pt. 2, c. 1; Lowth, *De Sacra Poesi Ebraeorum Praelectiones*, with notes by J. B. Winer and Rosenmüller (Oxon. 1828); the *Præliminary Dissertation* in his translation of Isaiah: *Beit. Geist der Hebr. Poesie*; Jellib, *Sacred Literature*; Saalschütz, *Von der Form der Hebr. Poesie*; Leningburg, 1825, which contains the most complete account of all the various theories; De Wette, *Ueber die Psalmen*; Meier, *Gesch. der poet. National-Literatur der Hebräer*; Delitzsch, *Commentar über den Psalter*; and Hengst, *de Psalmen*. [W. A. W.]

**POISON.** Two Hebrew words are thus rendered in the A. V. but they are so general as to throw little light upon the knowledge and practice of poisons among the Hebrews. 1. The first of these, *חַמָּה*, *chémah*, from a root signifying "to be hot," is used of the heat produced by wine (Gen. vii. 5), and the hot passion of anger (Isa. cxxvii. 5), as well as of the burning venom of poisonous serpents (Deut. xxxii. 24, 33; Ps. lxxv. 4, cii. 5). It in all cases denotes animal poison, and not vegetable or mineral. The only allusion to its application is in Job vi. 4, where reference seems to be made to the custom of anointing arrows with the venom of a snake, a practice the origin of which is of remote antiquity (comp. Bern. An. i. 294, 295; Ovid, *Trist.* iii. 10, 64, *Fast.* v. 357, &c. Ps. xviii. 1). The *Scorpius*, a Caucasian snake mentioned by Strabo (xi. p. 429), were especially valued for art. Pliny (vi. 34) mentions a tribe of Indians who infested the Red Sea, and were armed with poisoned arrows like the Malays of the island of Borneo. For this purpose the horns of the porcupine (Plin. xvi. 20) were employed. The *Scorpius* (Plin. xvii. 76) used a poisonous bark, sometimes supposed by some to be the "leopard's bark" of the Scythians dipped their arrow points in viper's and mixed with human blood. These were so bad that a slight scratch inflicted by them was fatal (Plin. xi. 115). The practice was so common that the name *τοξόεν*, originally a poison of the arrows were dipped, was applied to poison generally.

2. *זָהָב* (once *זָהָר*, Deut. xxxii. 32), and *זָהָב* poison at all, denotes a vegetable poison, and is only twice (Deut. xxxii. 24; Job cii. 5) used of the venom of a serpent. In other places where it occurs, it is translated "gold" or "gold lock." In the margin of Deut. xlii. 18, our translators, feeling the uncertainty of the word, give an alternative "root, or, a poisonous herb." Even the fact that, whether poisonous or not, a plant of bitter taste, nothing can be inferred from

\* In some MSS. this reading occurs in the place of which a list is given by Micron (Sept. p. 21).

bitterness was its prevailing characteristic is evident from its being associated with wormwood (Deut. xix. 18 [17]; Lam. iii. 19; Am. vi. 12), and from the allusions to "water of rosh" in Jer. viii. 14, ix. 15, xxi. 15. It was not a juice or liquid (Ps. lxx. 21 [22]; comp. Mark xv. 23), but probably a bitter berry, in which case the expression in Deut. xxxii. 32, "grapes of rosh," may be taken literally. Gesenius, on the ground that the word in Hebrew also signifies "head," rejects the hemlock, colocynth, and dandel of other writers, and proposes the "poppy" instead; from the "heads" in which its seeds are contained. "Water of rosh" is then "opium," but it must be admitted that there appears in none of the above passages to be any allusion to the characteristic effects of opium. The effects of the rosh are simply nausea and loathing. It was probably a general term for any bitter or nauseous plant, whether poisonous or not, and became afterwards applied to the venom of snakes, as the corresponding word in Chaldee is frequently so used. [GALL.]

There is a clear case of suicide by poison related in 2 Macc. x. 13, where Ptolemy Macron is said to have destroyed himself by this means. But we do not find a trace of it among the Jews, and certainly poisoning in any form was not in favour with them. Nor is there any reference to it in the N. T., though the practice was fatally common at that time in Rome (Suet. Nero, 33, 34, 35; Tib. 73; Claud. 1). It has been suggested, indeed, that the *pharphasa* of Gal. v. 20 (A. V. "witchcraft"), signifies poisoning, but this is by no means consistent with the usage of the word in the LXX. (comp. Ex. vii. 11, viii. 7, 18, &c.), and with its occurrence in Rev. ix. 21, where it denotes a crime clearly distinguished from murder (see Rev. xxi. 8, xxi. 15). It more probably refers to the concoction of magical potions and love philtres.

On the question of the wine mingled with myrrh, see App. A, art. GALL. [W. A. W.]

POLLUX. [CASTOR AND POLLUX.]

POLYGAMY. [MARRIAGE.]

POMEGRANATE (רִמּוֹן, *rimmon*: *pod*, *pod*, *podokos*, *κόδων*: *malum punicum*, *malum granatum*, *malogranatum*) by universal consent is acknowledged to denote the Heb. *rimmon*, a word which occurs frequently in the O. T., and is used to designate either the pomegranate-tree or its fruit. The pomegranate was doubtless early cultivated in Egypt: hence the complaint of the Israelites in the wilderness of Zin (Num. xx. 5), this "is no place of figs, or of vines, or of pomegranates." The tree, with its characteristic calyx-crowned fruit, is easily recognised on the Egyptian sculptures (*Anc. Egypt.* i. 36, ed. 1854). The spice brought to Joshua "of the pomegranates" of the land of Canaan (Num. xiii. 23; comp. also Deut. viii. 8). The villages or towns of Rimmon (Josh. xv. 32), Gath-rimmon (xxi. 25), En-rimmon (Neh. xi. 29), possibly derived their names from pomegranate-trees which grew in their vicinity. These trees suffered occasionally from the devastations of locusts (Joel i. 12; see also Hag. ii. 19). Mention is made of "an orchard of pomegranates" in Cant. iv. 13; and in Lev. 3, the cheeks (A. V. "temples") of the Hebrew are compared to a section of "pomegranate within the locks," in allusion to the beautiful rosy colour of the fruit. Carved figures of the pomegranate adorned the tops of the pillars in Solomon's

Temple (1 K. vii. 18, 20, &c.); and worked representations of this fruit, in blue, purple, and scarlet, ornamented the hem of the robe of the ephod (Ex. xxviii. 33, 34). Mention is made of "spiced wine of the juice of the pomegranate" in Cant. viii. 2; with this may be compared the pomegranate-wine (*ποφνυς ολβος*) of which Dioscorides (v. 34) speaks, and which is still used in the East. Chardin says that great quantities of it were made in Persia, both for home consumption and for exportation, in his time (*Script. Herb.* p. 399; Harmer's *Obs.* i. 377). Russell (*Nat. Hist. of Aleppo*, i. 85, 2nd ed.) states "that the pomegranate" (*rumsin* in Arabic, the same word as the Heb.) "is common in all the gardens." He speaks of three varieties, "one sweet, another very acid, and a third that partakes of both: qualities equally blended. The juice of the sour sort is used instead of vinegar: the others are cut open when served up to table; or the grains taken out, and, besprinkled with sugar and rose-water, are brought to table in saucers." He adds that the trees are apt to suffer much in severe winters from extraordinary cold.

*Punica granatum*

The pomegranate-tree (*Punica granatum*) derives its name from the Latin *pomum granatum*, "grained apple." The Romans gave it the name of *Punica*, as the tree was introduced from Carthage; it belongs to the natural order *Myrtaceae*, being, however, rather a bush than a tree. The foliage is dark green, the flowers are crimson; the fruit is red when ripe, which in Palestine is about the middle of October, and contains a quantity of juice. The rind is used in the manufacture of morocco leather, and, together with the bark, is sometimes used medicinally to expel the tape-worm. Pomegranates without seeds are said to grow near the river Cabul. Dr. Royle (Kitto's *yc. art.* "Rimmon") states that this tree is a native of Asia, and is to be traced from Syria through Persia even to the mountains of Northern India. [W. H.]

POMMELS, only in 2 Chr. iv. 12, 13. In 1 K. vii. 41, "bowls." The word signifies convex projections belonging to the capitals of pillars [BOWL; CHAPTER.] [H. W. I.]

**POND** *Agdm.*\* The ponds of Egypt (Ex. vii. 19, viii. 5) were doubtless water left by the inundation of the Nile. In Is. xix. 10, where Vulg. has *qui faciunt lacunas ad capiendos pisces*, LXX. has *οι τον ζυδον ποιουντες*, *they who make the beer*. This rendering so characteristic of Egypt (Her. ii. 77; Diod. i. 34; Strabo, p. 799) arises from regarding *agdm* as denoting a result indicated by its root, i. e. a fermented liquor. St. Jerome, who alludes to beer called by the name of Sabaius, explains *agdm* to mean water fermenting from stagnation (Hieron. *Com. on Is.* lib. vii. vol. iv. p. 292; Calmet; Stanley, *S. & P.* App. §57). [H. W. P.]

**PONTIUS PILATE.** [PILATE.]

**PONTUS** (*Πόντος*), a large district in the north of Asia Minor, extending along the coast of the Pontus Euxinus, from which circumstance the name was derived. It is three times mentioned in the N. T. It is spoken of along with Asia, Cappadocia, Phrygia, and Pamphylia (Acts ii. 9, 10), as one of the regions whence worshippers came to Jerusalem at Pentecost: it is specified (Acts xviii. 2) as the native country of Aquila; and its "scattered strangers" are addressed by St. Peter (1 Pet. i. 1), along with those of Galatia, Cappadocia, Asia, and Bithynia. All these passages agree in showing that there were many Jewish residents in the district. As to the annals of Pontus, the one brilliant passage of its history is the life of the great Mithridates; but this is also the period of its coming under the sway of Rome. Mithridates was defeated by Pompey, and the western part of his dominions was incorporated with the province of Bithynia, while the rest was divided, for a considerable time, among various chieftains. Under Nero the whole region was made a Roman province, bearing the name of Pontus. The last of the petty monarchs of the district was Polemo II., who married Berenice, the great-granddaughter of Herod the Great. She was probably with Polemo when St. Paul was travelling in this neighbourhood about the year 52. He saw her afterwards at Caesarea, about the year 60, with her brother, Agrippa II. [J. S. H.]

**POOL.** 1. *Agdm*, see POND. 2. *Berdah* in pl. once only, *pools* (Ps. lxxiv. 6). 3. The usual word is *Berdah*, closely connected with the Arabic *Birkah*, and the derived Spanish with the Arabic article, *Al-berca*. A reservoir for water. These pools, like the tanks of India, are in many parts of Palestine and Syria the only resource for water during the dry season, and the failure of them involves drought and calamity (Is. xlii. 15). Some are supplied by springs, and some are merely receptacles for rain-water (Burekhardt, *Syria*, p. 314). Of the various pools mentioned in Scripture, as of Hebron, Samaria, &c. (for which see the Articles on those places), perhaps the most celebrated are the pools of Solomon near Bethlehem, called by the Arabs *el-Burak*, from which an aqueduct was carried which still supplies Jerusalem with water (Ecc. ii. 6; Eccles. xiv. 30, 31). They are three in number, partly hewn out of the rock, and partly built with

masonry, but successive lower upper to the top to the bottom. They are all Etham, with the E. side of are thus given length 380 feet depth at E. 2 160 feet. breadth at E. above lower 582 feet; here 50 feet. The a spring in TEEN; JENI; Robinson, *Exc*

8. Re-entry upon land in the jubilee year, with the limitation as to town homes (Lev. xlv. 25-30). [JUBILEE.]

4. Prohibition of usury, and of retention of pledges, i. e. loans without interest enjoined (Lev. xxv. 35, 37; Ex. xxii. 25-27; Deut. xv. 7, 8, xxiv. 10-13). [LOAN.]

5. Permanent bondage forbidden, and manumission of Hebrew bondsmen or bondswomen enjoined in the sabbatical and jubilee years, even when bound to a foreigner, and redemption of such previous to those years (Deut. xv. 12-15; Lev. xlv. 39-42, 47-54).

6. Portions from the tithes to be shared by the poor after the Levites (Deut. xiv. 28, xxvi. 12, 13). [TITHES.]

7. The poor to partake in entertainments at the feasts of Weeks and Tabernacles (Deut. xvi. 11, 14; see Neh. viii. 10).

8. Daily payment of wages (Lev. xix. 13).

On the other hand, while equal justice was commanded to be done to the poor man, he was not allowed to take advantage of his position to obstruct the administration of justice (Ex. xxiii. 3; Lev. xix. 15).

On the law of gleaning the Rabbinical writers founded a variety of definitions and refinements, which notwithstanding their minute and frivolous character, were on the whole strongly in favour of the poor. They are collected in the treatise of Maimonides *Miknoth Ainim*, de jure pauperis, translated by Prideaux (Ugolini, viii. 721), and specimens of their character will appear in the following titles.

There are, he says, 13 precepts, 7 affirmative and 6 negative, gathered from Lev. xix., xxiii.; Deut. xiv., xv., xxiv. On these the following questions are raised and answered, What is a "corner," a "handful?" What is to "forget" a sheaf? What is a "stranger?" What is to be done when a field or a single tree belongs to two persons; and further, when one of them is a Gentile, or when it is divided by a road, or by water;—when insects or enemies destroy the crop? How much grain must a man give by way of alms? Among prohibitions is one forbidding any proprietor to frighten away the poor by a savage beast. An Israelite is forbidden to take alms openly from a Gentile. Unwilling almsgiving is condemned, on the principle expressed in Job xxx. 25. Those who gave less than their due proportion, to be punished. Mendicants are divided into two classes, settled poor and vagrants. The former were to be relieved by the authorised collectors, but all are enjoined to maintain themselves if possible. [ALMS.] Lastly, the claim of the poor to the portions prescribed is laid down as a positive right.

Principles similar to those laid down by Moses are inculcated in N. T., as Luke iii. 11, xiv. 13; Acts vi. 1; Gal. ii. 10; Jas. ii. 15. In later times, mendicancy, which does not appear to have been contemplated by Moses, became frequent. Instances actual or hypothetical may be seen in the following passages: Luke xvi. 20, 21, xviii. 35; Mark x. 46; John ix. 8; Acts iii. 2. On the whole subject, besides the treatise above-named, see Mishna, *Peah*, i. 2, 3, 4, 5; ii. 7; *Peach*, iv. 8; Selden, *de Jure Natur.* vi. 6, p. 735, &c.; Sanlehtütz, *Arch. Heb.* ii. p. 256; Michaelis, §142, vol. ii. p. 248; Otho, *Lec. Rubb.* p. 308. [H. W. P.]

\* Arbor lac emittens mellis instar, quo et suffitus fit: videtur esse Styracis arbor. Kām 18. See Freytag, *Lex Arab.* s. v.

POPLAR (ΠΠΠ, *libneh*: στυρακος, in Gen. xxi. 37; *λεβάν*, in Hos. iv. 13; *populus*), the rendering of the above-named Hebrew word, which occurs only in the two places cited. Peeled rods of the *libneh* were put by Jacob before Laban: ring-streaked sheep. This tree is mentioned with the cast and the terebinth, by Hosea, as one under which idolatrous Israel used to sacrifice.

Several authorities, Celsius amongst the number (*Hierob.* i. 292), are in favour of the rendering of the A. V., and think the "white poplar" (*Populus alba*) is the tree denoted; others understand the "storax tree" (*Styrax officinale*, Linn.). This opinion is confirmed by the LXX. translator of Genesis, and by the Arabic version of Saadian,

which has the term *lubna* (لبنى), i. e. the "Styrax tree."\*

Both poplars<sup>b</sup> and styrax or storax trees are common in Palestine, and either would suit the passages where the Heb. term occurs. Dioscoride (i. 79) and Pliny (*N. H.* xii. 17 and 25) both speak of the *Styrax officinale*, and mention several kinds of exudation. Pliny says, "that part of Syria which adjoins Judaea above Phoenicia produces storax, which is found in the neighbourhood of Gabala (*Jebeil*) and Marathus, as also of Casius, a mountain of Seleucia. . . . That which comes from the mountain of Amanus in Syria is highly esteemed for medicinal purposes, and even more so by the perfumers."

*Styrax officinale*

Storax (στυραξ), is mentioned in Eccles. xiv. 15, together with other aromatic substances. The modern Greek name of the tree, as we learn from Sillithorpe (*Flor. Græc.* i. 275) is *στυρακι*, and is a common wild shrub in Greece and in most parts of the Levant. The resin exudes either spontaneously or after incision. This property, however,

\* *Populus alba* and *P. euphratica* I saw. *P. deltoides* and *nigra* are also said to grow in Syria" (J. P. Hooker).

It would seem, is only for the most part possessed by trees which grow in a warm country; for English specimens, though they flower profusely, do not produce the drug. Mr. Dan. Hanbury, who has discussed the whole subject of the storax plants with much care (see the *Pharmaceutical Journal and Transactions* for Feb. 1857), tells us that a friend of his quite failed to obtain any exudation from *Styrax officinale*, by incisions made in the hottest part of the summer of 1856, on specimens growing in the botanic garden at Montpellier. "The experiment was quite unsuccessful; neither aqueous sap nor resinous; 'we flowed from the incisions.'" Still Mr. Hanbury quotes two authorities to show that under certain favourable circumstances the tree may exude a fragrant resin even in France and Italy.

The *Styrax officinale* is a shrub from nine to twelve feet high, with ovate leaves, which are white underneath; the flowers are in racemes, and are white or cream-coloured. This white appearance agrees with the etymology of the Heb. *lōneh*. The liquid storax of commerce is the product of the *Liquidambar Orientale*, Mill. (see a fig. in Mr. Hanbury's communication), an entirely different plant, whose resin was probably unknown to the ancients. [W. H.]

**PORATHA** (פֹּרָתָה; פֹּרָתָה; Alex. Bap-  
ḥad: *Phoratha*). One of the ten sons of Haman slain by the Jews in Shushan the palace (Esth. ix. 9). Perhaps "Poradatha" was the full form of the name, which the LXX. appear to have had before them (compare Aridatha, Parshandatha).

**PORCH**. 1. *Ḳlam*, or *alam*. 2. *Misderōn* *alam*, strictly a vestibule (Ges. p. 43), was probably a sort of verandah chamber in the works of Solomon, open in front and at the sides, but capable of being enclosed with awnings or curtains, like that of the royal palace at Ispahan described by Chardin (vii. 386, and pl. 39). The word is used in the Talmud (*Middoth*, iii. 7).

*Misderōn* was probably a corridor or colonnade connecting the principal rooms of the house (Wilkinson, *A. E. i.* p. 11). The porch<sup>b</sup> (Matt. xxi. 71), was probably the passage from the street into the first court of the house, in which, in Eastern houses is the *masābah* or stone-bench, for the porter or persons waiting, and where also the master of the house often receives visitors and transacts business (Lane, *Mod. Eg. i.* 32; Shaw, *Trav.* p. 207). [HOUSE.] The word in the parallel passage (Mark xiv. 68) is *προαύλιον*, the outer court. The scene therefore of the denial of our Lord took place, either in that court, or in the passage from it to the house-door. The term *σῶα* is used for the colonnade or portico of Bethesda, and also for that

<sup>a</sup> 1. פֹּרָתָה, or פֹּרָתָה; *aúlām*; *porticus* (1 Chr. xxviii. 11); *raós*; *porticus*.

2. פֹּרָתָה; *paraśtās*; *porticus*; only once used Judg. iii. 23.

<sup>b</sup> *קלמן*.

<sup>c</sup> The two words are in fact quite distinct, being derived from different roots. "Porter" in the modern sense is from the French *porteur*. The similarity between the two is alluded to in a passage quoted from Watts by Dr. Johnson.

<sup>d</sup> פֹּרָתָה; *ra aílām*; *frons*.

<sup>e</sup> פֹּרָתָה; *ra aílām*; *vestibulum*.

of the Temple called Solomon's porch (John i. x. 23; Acts iii. 11, v. 12).

Josephus describes the porticoes or cloisters which surrounded the Temple of Solomon, and also the royal portico. These porticoes are described by Tacitus as forming an important line of defence during the siege (Joseph. *Ant.* viii. 3, §6, xv. 11, §3, 5; *B. J.* v. 5, §2; Tac. *Hist.* v. 12). [TEMPLE OF SOLOMON'S PORCH.] [H. W. P.]

#### PORCIUS FESTUS. [FESTUS.]

**PORTER**. This word when used in the A.V. does not bear its modern signification of a carrier of burdens,<sup>a</sup> but denotes in every case a gate-keeper from the Latin *portarius*, the man who attended to the *porta*. In the original the word is פֹּרְתָה, *shā'ar*, a gate: *θυραῖος*, and *τοῦρατος*; *portarius*, and *janitor*. This meaning is evidently implied in 1 Chr. ix. 21; 2 Chr. xxiii. 19, xxv. 15; John x. 3. It is generally employed in reference to the Levites who had charge of the entrance to the sanctuary, but is used also in other connexions in 2 Sam. xviii. 26; 2 K. vii. 10, 11; Mark xii. 34; John x. 3, xviii. 16, 17. In two passages (1 Chr. xv. 23, 24) the Hebrew word is rendered "doorkeepers," and in John xviii. 16, 17, *ἡ θυραῖος* is "she that kept the door." [G.]

**POSIDONIUS** (Ποσειδώνιος; *Posidonios*), an envoy sent by Nicanor to Judas (2 Macc. xiv. 19).

#### POSSESSION. [DEMONIACUS.]

**POST**. I. 1. *Ajil*,<sup>a</sup> a word indefinitely rendered by LXX. and Vulg. Probably, as Gesenius argues, the door-case of a door, including the lintel and side-posts (Ges. *Thes.* p. 43). Akin to this is *atām*,<sup>b</sup> only used in plur. (Ex. xl. 16, &c.), probably a portico, and so rendered by Symm. and Syr. Ven. (Ges. p. 48).

2. *Amūdā*,<sup>c</sup> usually "cubit," once only "post" (Is. vi. 4).

3. *Mezāzah*,<sup>d</sup> from a root signifying to shin*e* i. e. implying motion (on a centre).

4. *Saph*,<sup>e</sup> usually "threshold."

The ceremony of boring the ear of a voluntary bondsman was performed by placing the ear against the door-post of the house (Ex. xxi. 6; see Jer. Sat. i. 103, and Plaut. *Poen.* v. 2, 21). [SLAVE-PILLAR.]

The posts of the doors of the Temple were of olive-wood (1 K. vi. 33).

II. *Rāts*,<sup>f</sup> A. V. "post" (Esth. iii. 13), elsewhere "runner," and also "guard." A courier or carrier of messages, used among other places in Job ix. 25 [ANGAREUS.] [H. W. P.]

**POT**. The term "pot"<sup>g</sup> is applicable to many sorts of vessels, that it can scarcely be re-

<sup>f</sup> פֹּרְתָה; *ἐπιθῦρος*; *superliminaria*.

<sup>g</sup> פֹּרְתָה; *σταθμός*, *φλιά*; *portis*, from פָּרַץ, *min*.

<sup>h</sup> פֹּרְתָה; *φλιά*; *limen*; in plur. *τὰ ἐνστάλα*; *apothiminaria* (Am. ix. 1).

<sup>i</sup> פֹּרְתָה, part of פָּרַץ, "run;" *βιβλιοθήκη*; *curator*.

<sup>j</sup> 1. פֹּרְתָה; *ἀγγεῖον* (2 K. iv. 2), applied to oil.

2. פֹּרְתָה; *σῶμα*; *scyphus* (Jer. xxxv. 5; Gen. p. 280); usually "bowl" or "cup."

3. פֹּרְתָה; *κόφινος*; *coquina*; also "basket."

4. פֹּרְתָה; *σκεῦος*; *vas*; usually "vessel," rare in "pot" (Lev. vi. 32).

stricted to any cue in particular. [BOWL: CAL-DROW; BASIN: CUP, &c.]

But from the places where the word is used, we may collect the uses, and also in part the materials of the utensils implied.

1. *Adc*, an earthen jar, deep and narrow, without handles, probably, like the Roman and Egyptian amphora, inserted in a stand of wood or stone (Wilkinson, *Anc. Eg.* i. 47; Sandys, *Trav.* p. 150).

2. *Cheres*, an earthen vessel for stewing or cooking. Such a vessel was used for baking (Ex. iv. 9). It is contrasted in the same passage (Lev. vi. 28) with a metal vessel for the same purpose. [VESSEL.]

3. *Ddd*, a vessel for culinary purposes, mentioned (1 Sam. ii. 14) in conjunction with "cal-dron" and "kettle," and so perhaps of smaller size.

4. *Str* is combined with other words to denote special uses, as *basher*, "flesh" (Ex. xvi. 3); *ra-chads*, "washing" (Ps. lx. 8; LXX. has *λίσθη-ης δαυδός*); *matserpā*, "fining-pot" (Prov. xxvii. 21).

The blackness which such vessels would contract is alluded to in Joel ii. 6.

The "pots," *getiydm*, set before the Rechabites (Jer. xxxv. 5), were probably bulging jars or bowls.

The water-pots of Cana appear to have been large amphorae, such as are in use at the present day in Syria (Fisher, *Vieira*, p. 56; Jolliffe, i. 33). These were of stone or hard earthenware; but gold, silver, brass, or copper, were also used for vessels both for domestic and also, with marked preference, for ritual use (1 K. vii. 45, x. 21; 2 Chr. iv. 16, ix. 20; Mark vii. 4; Heb. ix. 4; John ii. 6; Michaelis, *Luce of Moses*, §217, iii. 335, ed. Smith).

Crucibles for refining metal are mentioned (Prov. xvi. 23, xvii. 21).

The water-pot of the Samaritan woman may have been a leathern bucket, such as Belouin women use (Buckhardt, *Notes*, i. 45).

The shapes of these vessels we can only conjecture, as very few remains have yet been discovered, but it is certain that pottery formed a branch of native Jewish manufacture. [POTTERY.] [H. W. P.]

**POTIPHAR** (פֹּתִיפָר: Πετεφρής, Πετεφρής, Πετεφρής: *Potiphar*), an Egyptian pr. n., also written פֹּתִיפָר, POTIPHERAH. That these are but two forms of one name is shown by the ancient Egyptian equivalent, PET-P-RA, which may have been pronounced, at least in Lower Egypt, PET-PH-RA. It signifies "Belonging to the Sun." Rosellini remarks that it is of very frequent occurrence on the Egyptian monuments (*Monumenti Storici*, I. 117, 118). The fuller form is clearly nearer to the Egyptian.

Potiphar is described as "an officer of Pharaoh, chief of the executioners (סֵרִיס פֶּרַחַת צֵר הַמִּבְחִים), an Egyptian" (Gen. xxxix. 1; comp. xxxvii. 36). The word we render "officer," as in the A. V., is literally "eunuch," and the LXX. and Vulg. so translate it here (*ουνυχας*, *eunuchus*); but it is also

אֵלֶּיךָ; *αἰθης*; *olk*; used with פֶּרַחַת (Jer. l. 13) "a smothering-pot."

אֵלֶּיךָ; *καλεισθίων*; *arabus*.

אֵלֶּיךָ; *ουνυχας* *rus* (Ex. xvi. 33; Heb. ix. 4).

used for an officer of the court, and this is almost certainly the meaning here, as Potiphar was married, which is seldom the case with eunuchs, though some, as those which have the custody of the Ka'abeh at Mekkeh are exceptions, and his office was one which would not usually be held by persons of a class ordinarily wanting in courage, although here again we must except the occasional usage of Muslim sovereigns, whose executioners were sometimes eunuchs, as Haroon er-Rasheed's Mesroor, in order that they might be able to carry out the royal commands even in the harems of the subjects. Potiphar's office was "chief of the executioners," not, as the LXX. makes it, "of the cooks" (*ἀρχιμαγειρος*), for the prison was in his house, or, at least, in that of the chief of the executioners, probably a successor of Potiphar, who committed the disgraced servants of Pharaoh to Joseph's charge (xl. 2-4). He is called an Egyptian, though his master was probably a Shepherd-king of the xvth dynasty; and it is to be noticed that his name contains that of an Egyptian divinity, which does not seem to be the case with the names of the kings of that line, though there is probably an instance in that of a prince. [CHRONOLOGY, vol. i. p. 322.] He appears to have been a wealthy man, having property in the field as well as in the house, over which Joseph was put, evidently in an important post (xxxix. 4-6). In this position Joseph was tempted by his master's wife. The view we have of Potiphar's household is exactly in accordance with the representations on the monuments, in which we see how carefully the produce of the land was registered and stored up in the house by overseers, as well as the liberty that the women of all ranks enjoyed. When Joseph was accused, his master contented himself with casting him into prison (19, 20), probably being a merciful man, although he may have been restrained by God from acting more severely. After this we hear no more of Potiphar, unless, which is unlikely, the chief of the executioners afterwards mentioned be he. [See: JOSEPH.] [R. S. P.]

**POTIPHERAH** (פֹּתִיפָר: Πετεφρής, Πετεφρής, Πετεφρής: *Potiphar*), an Egyptian pr. n., also written פֹּתִיפָר, POTIPHAR corresponding to the PET-P-RA, "Belonging to the Sun," of the hieroglyphics.

Potipherah was priest or prince of On (אֵן; *On*), and his daughter Asenath was given Joseph to wife by Pharaoh (xli. 45, 50, xlvii. 20). His name, implying devotion to the sun, is very appropriate to a Heliopolite, especially to a priest of Heliopolis, and therefore the rendering "priest" is preferable in his case, though the other can scarcely be asserted to be untenable. [ON; ASE-NATH; JOSEPH.] [R. S. P.]

**POTSHERD** (פֶּרֶץ: *ὑστρακον*; *testa*, *vas fictile*): also in A. V. "sherd" (*i. e.* anything divided or separated, from *share*, Richardson's *Dict.*), a piece of earthenware, broken either by the heat of the furnace in the manufacture, by fire when used as a crucible (Prov. xvi. 23), or otherwise. [POTTERY.] [H. W. P.]

**POTTER'S-FIELD, THE** (ὁ ἀγρὸς τῶν

אֵלֶּיךָ; *αἰθης*; *cleri*; "allotments of land."

אֵלֶּיךָ; *οὐκὸς ὑστρακων*; *the fictile* (Lev. vi. 21 [23]).

*acquirers: ager aguli*). A piece of ground which, according to the statement of St. Matthew (xxvii. 7), was purchased by the priests with the thirty pieces of silver rejected by Judas, and converted into a burial-place for Jews not belonging to the city (see Alford, *ad loc.*). In the narrative of the Acts the purchase is made by Judas himself, and neither the potter's field, its connexion with the priests, nor its ultimate application are mentioned. [ACELDAMA.]

That St. Matthew was well assured of the accuracy of his version of the occurrence is evident from his adducing it (var. 9) as a fulfilment of an ancient prediction. What that prediction was, and who made it, is not, however, at all clear. St. Matthew names Jeremiah: but there is no passage in the Book of Jeremiah, as we possess it (either in the Hebrew or LXX.), resembling that which he gives; and that in Zechariah, which is usually supposed to be alluded to, has only a very imperfect likeness to it. This will be readily seen:—

St. Matt. xxvii. 9.

Then was fulfilled that which was spoken by Jeremy the prophet, saying, "And they took the thirty pieces of silver, the price of him that was valued, whom they of the children of Israel did value, and gave them for the potter's field, as the Lord appointed me."

Zech. xi. 12.

And I said unto them, "If ye think good, give my price; and if not, forbear." So they weighed for my price thirty pieces of silver. And Jehovah said unto me, "Cast it unto the potter; a goodly price that I was prized at by them!" And I took the thirty pieces of silver, and cast them to the potter in the house of Jehovah.

And even this is doubtful; for the word above translated "potter" is in the LXX. rendered "furnace," and by modern scholars (Gesenius, Fürst, Ewald, De Wette, Herzheimer—following the Targum, Peshito-Syriac, and Kimchi) "treasury" or

"treasurer." be that which

earthenware vessels in the wilderness, where there would be little facility for making them, and that the potters' trade was afterwards carried on in Palestine. They had themselves been concerned in the potters' trade in Egypt (Ps. lxxxi. 6), and the wall-paintings minutely illustrate the Egyptian process, which agrees with such notices of the Jewish practice as are found in the Prophets, and also in many respects with the process as pursued in the present day. The clay, when dug, was trodden by men's feet so as to form a paste (Is. xli. 25; Wisd. xv. 7) [BRICKS]; then placed by the potter<sup>a</sup> on the wheel beside which he sat, and shaped by him with his hands. How early the wheel came into use in Palestine we know not, but it seems likely that it was adopted from Egypt. It consisted of a wooden disc<sup>b</sup> placed on another larger one, and turned by the hand by an attendant, or worked by a treadle (Is. xlv. 9; Jer. xviii. 3; Ecclus. xxxviii. 29, 30; see Tennant, *Ceylon*, i. 452). The vessel was then smoothed and coated with a glaze,<sup>c</sup> and finally burnt in a furnace (Wilkinson, *Anc. Eg.* ii. 108). We find allusions to the potters, i.e. broken pieces<sup>d</sup> of vessels used as crucibles, or burst by the furnace, and to the necessity of keeping the latter clean (Is. xxx. 14, xlv. 9; Job ii. 8; Ps. xxii. 16; Prov. xvi. 23; Ecclus. u. s.).

Earthen vessels were used, both by Egyptians and Jews, for various purposes besides culinary. Deeds were kept in them (Jer. xxxii. 14). Tiles with patterns and writing were common both in Egypt and Assyria, and were also in use in Palestine (Ez. iv. 1). There was at Jerusalem a royal establishment of potters (1 Chr. iv. 23), from whose employment, and from the fragments cast away in the process, the Potter's Field perhaps received its name (Is. xxx. 14). Whether the term "potter" (Zech. xi. 13) is to be so interpreted may be doubted, as it may be taken for "artificer" in general, and also "treasurer," as if the coin mentioned were to be weighed, and perhaps melted down to be recoined (Ges. p. 619; Grotius, Calmet, St. Jerome, Hitzig, Birch, *Hist. of Pottery*, i. 152; Saalschütz, *Hebr. Arch.* i. 14, 11). [H. W. P.]

**POUND.** 1. A weight. See WEIGHTS AND MEASURES.

2. (*Μνᾶ*.) A money of account, mentioned in the parable of the Ten Pounds (Luke xix. 12-27), as the talent is in the parable of the Talents (Matt. xxv. 14-30), the comparison of the Saviour to a master who entrusted money to his servants wherewith to trade in his absence being probably a frequent lesson in our Lord's teaching (comp. Mark xiii. 32-37). The reference appears to be to a Greek pound, a weight used as a money of account, of which sixty went to the talent, the weight depending upon the weight of the talent. At this time the Attic talent, reduced to the weight of the earlier Phœnician, which was the same as the Hebrew, prevailed in Palestine, though other systems must have been occasionally used. The Greek name doubtless came either from the Hebrew *maneh* or from a common origin; but it must be remembered that the Hebrew talent contained but fifty manehs, and that we have no authority for supposing that the maneh was called in Palestine by the Greek name, so that it is most reasonable to

consider the Greek weight to be meant. [TALENT, WEIGHTS AND MEASURES.] [R. S. P.]

**PRÆTORIUM** (*πραιτόριον*). The headquarters of the Roman military governor, wherever he happened to be. In time of peace some one of the best buildings of the city which was the residence of the proconsul or prætor was selected for this purpose. Thus Verres appropriated the palace of king Hiero at Syracuse; at Caesarea that of Herod the Great was occupied by Felix (Acts xxiii. 35); and at Jerusalem the new palace erected by the same prince was the residence of Pilate. This last was situated on the western, or more elevated, hill of Jerusalem, and was connected with a system of fortifications, the aggregate of which constituted the *παρεμβολή*, or fortified barrack. It was the dominant position on the Western hill, and—at any rate on one side, probably the Eastern—was mounted by a flight of steps (the same from which St. Paul made his speech in Hebrew to the angry crowd of Jews, Acts xxii. 1 seq.). From the level below the barrack, a terrace led eastward to a gate opening into the western side of the cloister surrounding the Temple, the road being carried across the valley of Tyropœon (separating the Western from the Temple hill) on a causeway built up of enormous stone blocks. At the angle of the Temple cloister just above this entrance, i.e. the N.W. corner [see JERUSALEM, p. 1006, and p. 1023] stood the old citadel of the Temple hill, the *Bâpis*, or *Byrsa*, which Herod rebuilt and called by the name *Antonia*, after his friend and patron the triumvir. After the Roman power was established in Judæa, a Roman guard was always maintained in the *Antonia*, the commander of which for the time being seems to be the official termed *στρατηγὸς τοῦ λεποῦ* in the Gospels and Acts. The guard in the *Antonia* was probably relieved regularly from the cohort quartered in the *παρεμβολή*, and hence the plural form *στρατηγοί* is sometimes used, the officers, like the privates, being changed every watch; although it is very conceivable that a certain number of them should have been selected for the service from possessing a superior knowledge of the Jewish customs, or skill in the Hebrew language. Besides the cohort of regular legionaries there was probably an equal number of local troops, who when on service acted as the "supports" (*δεξιόλαβοι*, *coverers of the right flank*, Acts xxiii. 23) of the former, and there were also a few squadrons of cavalry; although it seems likely that both these and the local troops had separate barracks at Jerusalem, and that the *παρεμβολή*, or prætorian camp, was appropriated to the Roman cohort. The ordinary police of the Temple and the city seems to have been in the hands of the Jewish officials, whose attendants (*ὑπηρέται*) were provided with dirks and clubs, but without the regular armour and the discipline of the legionaries. When the latter were required to assist this *gendarmérie*, either from the apprehension of serious tumult, or because the service was one of great importance, the Jews would apply to the officer in command at the *Antonia*, who would act so far under their orders as the commander of a detachment in a manufacturing town does under the orders of the civil magistrate at the time of a riot (Acts iv. 1, v. 2+). But the power of life and

<sup>a</sup> 1. *כֹּרֵךְ*, part of *כֹּרֵךְ*, "dress;" *κεραμεὺς* *figulus*.

<sup>2</sup> *כֹּרֵךְ*, only in Dan. ii. 41; *figulus*.

<sup>3</sup> *כֹּרֵךְ* lit. "two stones;" *Aiboi*; *rota* (see Gen. p. 16).

death, or of regular scourging, rested only with the praetor, or the person representing him and commissioned by him. This power, and that which would always go with it,—the right to press whatever men or things were required by the public exigencies,—appears to be denoted by the term *ἐξουσία*, a term perhaps the translation of the Latin *imperium*, and certainly its equivalent. It was inherent in the praetor or his representatives—hence themselves popularly called *ἐξουσιασται*, or *ἐξουσιαστές* (Rom. xiii. 1, 3)—and would be communicated to all military officers in command of detached posts, such as the centurion at Capernaum, who describes himself as possessing summary powers of this kind because he was *ὕπ' ἐξουσίᾳ*, covered by the privilege of the *imperium* (Matt. viii. 9). The forced purveyances (Matt. v. 40), the requisitions for language animals (Matt. v. 41), the summary punishments following transgression of orders (Matt. v. 39) incident to a military occupation of the country, of course must have been a perpetual source of irritation to the peasantry along the lines of the military roads, even when the despotic authority of the Roman officers might be exercised with moderation. But such a state of things also afforded constant opportunities to an unprincipled soldier to extort money under the pretence of a loan, as the price of exemption from personal services which he was competent to insist upon, or as a bribe to buy off the prosecution of some vexatious charge before a military tribunal (Matt. v. 42; Luke iii. 14).

The relations of the military to the civil authorities in Jerusalem come out very clearly from the history of the Crucifixion. When Judas first makes his proposition to betray Jesus to the chief priests, a conference is held between them and the *σπαρτηγός* as to the mode of effecting the object (Luke xxii. 4). The plan involved the assemblage of a large number of the Jews by night, and Roman jealousy forbade such a thing, except under the surveillance of a military officer. An arrangement was accordingly made for a military force, which would naturally be drawn from the Antonia. At the appointed hour Judas comes and takes with him "the troops,"\* together with a number of police (*ὀφθαλμοὶ*) under the orders of the high-priests and Pharisees (John xviii. 3). When the apprehension of Jesus takes place, however, there is scarcely any reference to the presence of the military. Matthew and Mark altogether ignore their taking any part in the proceeding. From St. Luke's account one is led to suppose that the military commander posted his men outside the garden, and entered himself with the Jewish authorities (xxii. 52). This is exactly what might be expected under the circumstances. It was the business of the Jewish authorities to apprehend a Jewish offender, and of the Roman officer to take care that the proceeding led to no breach of the public peace. But when apprehended, the Roman officer became responsible for the custody of the offender, and accordingly he would at once chain him by the wrists to two soldiers (Acts xxi. 33) and carry him off. Here St. John accordingly gives another glimpse of the presence of the military:—"the troops then, and the *chilarch* and the officers of the Jews apprehended Jesus, and put him in bonds and led him away, first of all to Anna" (xviii. 12). The insults which

St. Luke mentions (xxii. 63), are apparently the barbarous sport of the ruffianly soldiers and police while waiting with their prisoner for the morning of the Sanhedrim in the hall of Caaphas; but the blows inflicted are those with the vine-stick, what the centurions carried, and with which they scourged the soldiers on the head and face (Jerome, *de viii.* 247), not a flagellation by the hands of Israel.

When Jesus was condemned by the Sanhedrim and accordingly sent to Pilate, the Jewish *chilarch* certainly expected that no enquiry would be made into the merits of the case, but that Jesus would be simply received as a convict on the authority of his own countrymen's tribunal, thrown into a *carcer*, and on the first convenient opportunity executed. They are obviously surprised at the question, "What accusation bring ye against this man?" and at the apparition of the governor himself outside the precinct of the praetorium. The *chilarch* is a man who had held the life of the native population at a former occasion (Luke xiii. 1), must have led him to expect a totally different course from him. His scrupulousity, most extraordinary in any Roman stands in striking contrast with the recklessness of the commander who proceeded at once to put St. Paul to torture, simply to ascertain why it was that so violent an attack was made on him by the crowd (Acts xxii. 24). Yet this latter is essentially a typical specimen of the feeling which prevailed among the conquerors of Judaea in relation to the conquered. The ordering the execution of a native criminal would in ninety-nine instances out of a hundred, have been regarded by a Roman magistrate as a simply ministerial act,—one which need only he was competent to perform, but which the performance was unworthy of a second thought. It is probable that the hesitation of Pilate is due rather to a superstitious fear of his *chilarch*, than to a sense of justice or a feeling of humanity towards an individual of a despised race at any rate such an explanation is more in accordance with what we know of the feeling prevalent among his class in that age.

When at last Pilate's effort to save Jesus was defeated by the determination of the Jews to kill Barabbas, and he had testified, by waving his hands in the presence of the people, that he did not consent to the judgment passed on the prisoner by the Sanhedrim, but must be regarded as performing a merely ministerial act,—he proceeds at once to the formal infliction of the appropriate punishment. His lictors take Jesus and inflict the punishment of scourging upon Him in the presence of all the people (xxvii. 26). This, in the Roman idea, was the necessary preliminary to capital punishment, as Jesus not been an alien, his head would have been struck off by the lictors immediately afterwards. But crucifixion being the customary punishment in that case, a different course became necessary. The execution must take place by the hands of the military, and Jesus is handed over from the *chilarch* to these. They take Him into the praetorium, muster the whole cohort—and among them find one which is on duty at the time (Matt. xxv. 1; Mark xv. 16). While a centurion's guard is set off for the purpose of executing Jesus and two criminals, the rest of the soldiers devote themselves in mocking the reputed King of the Jews (Matt. xxvii. 28-30; Mark xv. 17-19; Luke 22-3). Pilate, who in the meantime has been being probably a witness of the public spectacle, his wife's dream still haunts him, and through

\* Called *ὀφθαλμοὶ*, although of course only a detachment from the cohort.

has already delivered Jesus over to execution, and what is taking place is merely the ordinary course.<sup>b</sup> He comes out again to the people to protest that he is passive in the matter, and that they must take the prisoner, there before their eyes in the garb of mockery, and crucify Him (John xix. 4-6). On their reply that Jesus had asserted Himself to be the Son of God, Pilate's fears are still more roused, and at last he is only induced to go on with the military execution, for which he is himself responsible, by the threat of a charge of treason against Caesar in the event of his not doing so (John xix. 7-13). Sitting then solemnly on the *bema*, and producing Jesus, who in the meantime has had His own clothes put upon Him, he formally delivers Him up to be crucified in such a manner as to make it appear that he is acting solely in the discharge of his duty to the emperor (John xix. 13-16).

The centurion's guard now proceed with the prisoners to Golgotha, Jesus himself carrying the cross-piece of wood to which His hands were to be nailed. Weak from loss of blood, the result of the scourging, He is unable to proceed; but just as they are leaving the gate they meet Simon the Cyrenian, and at once use the military right of pressing (*ἀγγαρεύειν*) him for the public service. Arrived at the spot, four soldiers are told off for the business of the execution, the remainder keeping the ground. Two would be required to hold the hands, and a third the feet, while the fourth drove in the nails. Hence the distribution of the garments into four parts. The centurion in command, the principal Jewish officials and their acquaintance (hence probably St. John xviii. 15), and the nearest relations of Jesus (John xix. 26, 27), might naturally be admitted within the cordon—a square of perhaps 100 yards. The people would be kept outside of this, but the distance would not be too great to read the title, "Jesus the Nazarene, the King of the Jews," or at any rate to gather its general meaning.<sup>c</sup> The whole acquaintance of Jesus, and the women who had followed Him from Galilee—too much afflicted to mix with the crowd in the immediate vicinity, and too numerous to obtain admission inside the cordon—looked on from a distance (*ἀπὸ μακρόθεν*), doubtless from the hill on the other side of the valley of Kedron—a distance of not more than 600 or 700 yards, according to Mr. Ferguson's view of the site of Golgotha.<sup>d</sup> The vessel containing vinegar (John xix. 29) was set within the cordon for the benefit of the soldiers, whose duty it was to remain under arms (Matt. xxvii. 36) until the death of the prisoners, the centurion in command being responsible for their not being taken down alive. Had the Jews not been anxious for the removal of the bodies, in order not to shock the eyes of the people coming in from the country on the following day, the troops would have been relieved at the end of their watch, and their place supplied by others until death took place. The jealousy with which any interference with the regular course of a military execution was regarded appears from the application of the Jews to Pilate—not to the centurion—to have the prisoners dispatched by breaking

their legs. For the performance of this duty other soldiers were dispatched (ix. 32), not merely permission given to the Jews to have the operation performed. Even for the watching of the sepulchre recourse is had to Pilate, who bids the applicants "take a guard" (Matt. xxvii. 65), which they do, and put a seal on the stone in the presence of the soldiers, in a way exactly analogous to that practised in the custody of the sacred robes of the high priest in the Antonia (Joseph. *Ant.* xv. 11, §4).

The Praetorian camp at Rome, to which St. Paul refers (Phil. i. 13), was erected by the Emperor Tiberius, acting under the advice of Sejanus. Before that time the guards were billeted in different parts of the city. It stood outside the walls, at some distance short of the fourth milestone, and near either to the Salarian or the Nomentane road, that Nero, in his flight by one or the other of them to the house of his freedman Phaon, which was situated between the two, heard the cheers of the soldiers within for Galba. In the time of Vespasian the houses seem to have extended so far as to reach it (Tacitus, *Annal.* iv. 2; Suetonius, *Tib.* 37, *Neron.* 48; Plin. *II. N.* iii. 5). From the first, buildings must have sprung up near it for sutlers and others. St. Paul appears to have been permitted for the space of two years to lodge, so to speak, "within the rules" of the Praetorium (Acts xviii. 30), although still under the custody of a soldier. [J. W. B.]

**PRAYER.** The words generally used in the O. T. are יִשְׁתַּחֲוֶה (from root שָׁחַ, "to incline," "to be gracious," whence in Hithp. "to entreat grace or mercy"): LXX. generally, *δέσους*: Vulg. *deprecatio*: and דָּן (from root דָּן, "to judge," whence in Hithp. "to seek judgment"): LXX. *προσευχή*: Vulg. *oratio*. The latter is used to express intercessory prayer. The two words point to the two chief objects sought in prayer, viz. the prevalence of right and truth, and the gift of mercy.

The object of this article will be to touch briefly on (1) the doctrine of Scripture as to the nature and efficacy of prayer; (2) its directions as to time, place, and manner of prayer; (3) its types and examples of prayer.

(1.) Scripture does not give any theoretical explanation of the mystery which attaches to prayer. The difficulty of understanding its real efficacy arises chiefly from two sources: from the belief that man lives under general laws, which in all cases must be fulfilled unalterably; and the opposing belief that he is master of his own destiny, and need pray for no external blessing. The first difficulty is even increased when we substitute the belief in a Personal God for the sense of an Impersonal Destiny; since not only does the predestination of God seem to render prayer useless, but His wisdom and love, giving freely to man all that is good for him, appear to make it needless.

The difficulty is familiar to all philosophy, the former element being far the more important: the logical inference from it is the belief in the absolute uselessness of prayer.<sup>a</sup> But the universal instinct

<sup>a</sup> Herod's guard had pursued precisely the same brutal conduct just before.

<sup>b</sup> The latter supposition is perhaps the more correct, as the four Evangelists give four different forms.

<sup>c</sup> The two first Evangelists name Mary Magdalene among these women (Matt. xxvii. 56; Mark xv. 40). St. John names her, together with the Lord's mother, and Mary Klopas, as at the side of the cross.

<sup>a</sup> See the well-known lines:—

"Permittes ipsas expendere Numina, quid  
Convenerat nobis, rebusque sit utile nostris.  
Cuius est illis homo quamquam alibi."

Juv. *Sat.* x. 340-342.

And the older quotation, referred to by Plato (*Alc.* II. p. 184):—

of prayer, being too strong for such reasoning, generally exacted as a compromise the use of prayer for good in the abstract (the "*mens sana in corpore sano*"); a compromise theoretically liable to the same difficulties, but wholesome in its practical effect. A far more dangerous compromise was that adopted by some philosophers, rather than by mankind at large, which separated internal spiritual growth from the external circumstances which give scope thereto, and claimed the former as belonging entirely to man, while allowing the latter to be gifts of the gods, and therefore to be fit objects of prayer.<sup>6</sup>

The most obvious escape from these difficulties is to fall back on the mere subjective effect of prayer, and to suppose that its only object is to produce on the mind that consciousness of dependence which leads to faith, and that sense of God's protection and mercy which fosters love. These being the conditions of receiving, or at least of rightly entering into, God's blessings, it is thought that in its encouragement of them all the use and efficacy of prayer consist.

Now Scripture, while, by the doctrine of spiritual influence, it entirely disposes of the latter difficulty, does not so entirely solve that part of the mystery which depends on the nature of God. It places it clearly before us, and emphasizes most strongly those doctrines on which the difficulty turns. The reference of all events and actions to the will or permission of God, and of all blessings to His free grace, is indeed the leading idea of all its parts, historical, prophetic, and doctrinal; and this general idea is expressly dwelt upon in its application to the subject of prayer. The principle that our "Heavenly Father knoweth what things we have need of before we ask Him," is not only enunciated in plain terms by our Lord, but is at all times implied in the very form and nature of all Scriptural prayers; and moreover, the ignorance of man, who "knows not what to pray for as he ought," and his consequent need of the Divine guidance in prayer, are dwelt upon with equal earnestness. Yet, while this is so, on the other hand the instinct of prayer is solemnly sanctioned and enforced in every page. Not only is its subjective effect asserted, but its real objective efficacy, as a means appointed by God for obtaining blessing, is both implied and expressed in the plainest terms. As we are bidden to pray for general spiritual blessings, in which instance it might seem as if prayer were simply a means of preparing the heart, and so making it capable of receiving them; so also are we encouraged to ask special blessings, both spiritual and temporal, in hope that thus (and thus only) we may obtain them, and to use intercession for others, equally special and confident, in trust that an effect, which in this case cannot possibly be subjective to ourselves, will be granted to our prayers. The command is enforced by direct promises, such as that in the Sermon on the Mount (Matt. vii. 7, 8), of the clearest and most comprehensive character; by the example of all saints and of our Lord Himself; and by historical records of such effect as granted to prayer again and again.

Thus, as usual in the case of such mysteries, the two apparently opposite truths are emphasized, because they are needful to man's conception of his relation to God; their reconciliation is not, perhaps

cannot be, in that more conception is the working changeable.

At the same time, a reconciliation isolated and prayer are the One sup His scheme condition, is "Not my the distinction tions (which certain and a distinction prayer again Lord's own enunciated I ask any this and if we ask, we know desired of H

<sup>8</sup> See also the words of the Hymn.

xxvi. 15-15). In later times it certainly grew into a regular service, both in the Temple and in the Synagogue.

But, besides this public prayer, it was the custom of all at Jerusalem to go up to the Temple, at regular hours if possible, for private prayer (see Luke xviii. 10; Acts iii. 1); and those who were absent were wont to "open their windows towards Jerusalem," and pray "towards" the place of God's Presence (1 K. viii. 46-49; Dan. vi. 10; Ps. v. 7, xviii. 2; cxxxviii. 2). The desire to do this was possibly one reason, independently of other and more obvious ones, why the house-top or the mountain-top were chosen places of private prayer.

The regular hours of prayer seem to have been three (see Ps. lv. 17; Dan. vi. 10), "the evening," that is, the ninth hour (Acts iii. 1, x. 3), the hour of the evening sacrifice (Dan. ix. 21); the "morning," that is, the third hour (Acts ii. 15), that of the morning sacrifice; and the sixth hour, or "noon-day." To these would naturally be added some prayer at rising and lying down to sleep; and thence might easily be developed (by the love of the mystic number seven), the "seven times a day" of Ps. cxix. 164, if this is to be literally understood, and the seven hours of prayer of the ancient Church. Some at least of these hours seem to have been generally observed by religious men in private prayer at home, or in the midst of their occupation and in the streets (Matt. vi. 5). Since before meat would seem to have been an equally common practice (see Matt. ix. 36; Acts xviii. 35).

The posture of prayer among the Jews seems to have been most often standing (1 Sam. i. 26; Matt. vi. 5; Mark xi. 25; Luke xviii. 11); unless the prayer were offered with especial solemnity, and humiliation, which was naturally expressed by kneeling (1 K. viii. 54; comp. 2 Chr. vi. 13; Ezr. ix. 5; Ps. xcv. 6; Dan. vi. 10); or prostration (Josh. vii. 6; 1 K. xviii. 42; Neh. viii. 6). The hands were "lifted up," or "spread out" before the Lord (Ps. xlviii. 2, cxxxiv. 2; Ex. ix. 33, &c. &c.). In the Christian Church no posture is mentioned in the N. T. excepting that of kneeling; see Acts vii. 60 (St. Stephen); ix. 40 (St. Peter); xx. 36, xxi. 5 (St. Paul); perhaps from imitation of the example of our Lord in Gethsemane (on which occasion alone His posture in prayer is recorded). In after-times, as is well known, this posture was varied by the custom of standing in prayer on the Lord's-day, and during the period from Easter to Whit-Sunday, in order to commemorate His resurrection, and our spiritual resurrection in Him.

(3.) The only Form of Prayer given for perpetual use in the O. T. is the one in Deut. xvi. 5-15, connected with the offering of tithes and first-fruits, and containing in simple form the important elements of prayer, acknowledgment of God's mercy, self-dedication, and prayer for future blessing. To this may perhaps be added the threefold blessing of Num. vi. 24-26, couched as it is in a precatory form; and the short prayers of Moses (Num. x. 35, 36) at the moving and resting of the cloud, the former of which was the germ of the 68th Psalm.

Indeed the forms given, evidently with a view to preservation and constant use, are rather hymns or songs than prayers properly so called, although they often contain supplication. Scattered through the historical books, we have the Song of Moses, *twilight* to the children of Israel (Deut. xxxii. 1-43); his *an* important songs after the passage of the Red Sea (Ex. xv. 1-19) and at the springing out of the

water (Num. xxi. 17, 18); the Song of Deborah and Barak (Judg. v.); the Song of Hannah in 1 Sam. ii. 1-10 (the effect of which is seen by reference to the Magnificat); and the Song of David (Ps. xviii.), singled out in 2 Sam. xxii. But after David's time, the existence and use of the Psalms, and the poetical form of the Prophetic Books, and of the prayers which they contain, must have tended to fix this Psalmic character on all Jewish prayer. The effect is seen plainly in the form of Hezekiah's prayers in 2 K. xix. 15-19; Is. xxxviii. 9-20.

But of the prayers recorded in the O. T., the two most remarkable are those of Solomon at the dedication of the Temple (1 K. viii. 23-53), and of Joshua the high-priest, and his colleagues, after the captivity (Neh. ix. 5-38).<sup>a</sup> The former is a prayer for God's presence with His people in time of national defeat (vers. 33, 34), famine or pestilence (35-37), war (44, 45), and captivity (46-50), and with each individual Jew and stranger (41-43) who may worship in the Temple. The latter contains a recital of all God's blessings to the children of Israel from Abraham to the captivity, a confession of their continual sins, and a fresh dedication of themselves to the Covenant. It is clear that both are likely to have exercised a strong liturgical influence, and accordingly we find that the public prayer in the Temple, already referred to, had in our Lord's time grown into a kind of liturgy. Before and during the sacrifice there was a prayer that God would put it into their hearts to love and fear Him; then a repeating of the Ten Commandments, and of the passages written on their phylacteries [MATHETES]; next three or four prayers, and ascriptions of glory to God; and the blessing from Num. vi. 24-26, "The Lord bless thee," &c., closed this service. Afterwards, at the offering of the meat-offering, there followed the singing of psalms, regularly fixed for each day of the week, or specially appointed for the great festivals (see Bingham, b. xiii. ch. v. sect. 4). A somewhat similar liturgy formed a regular part of the Synagogue worship, in which there was a regular minister, as the leader of prayer (מַשְׁכֵּן הַקָּדוֹשׁ, "legatus ecclesiae"); and public prayer, as well as private, was the special object of the Proseuchae. It appears also, from the question of the disciples in Luke xi. 1, and from Jewish tradition, that the chief teachers of the day gave special forms of prayer to their disciples, as the badge of their discipleship and the best fruits of their learning.

All Christian prayer is, of course, based on the Lord's Prayer; but its spirit is also guided by that of His prayer in Gethsemane, and of the prayer recorded by St. John (ch. xvii.), the beginning of His great work of intercession. The first is the comprehensive type of the simplest and most universal prayer: the second justifies prayers for special blessings of this life, while it limits them by perfect resignation to God's will; the last, dwelling as it does on the knowledge and glorification of God, and the communion of man with Him, as the one object of prayer and life, is the type of the highest and most spiritual devotion. The Lord's Prayer has given the form and tone of all ordinary Christian prayer; it has fixed, as its leading principles, simplicity and confidence in Our Father, community of sympathy with all men, and practical reference to our own life; it has shown, as its true objects, first the glory of God, and next the needs of man

<sup>a</sup> To these may be added Dan. ix. 4-19.

To the intercessory prayer, we may trace up its transcendental element, its desire of that communion through *וְיָחַד* with the nature of God, which is the secret of all individual holiness, and of all community with men.

The influence of these prayers is more distinctly traced in the prayers contained in the Epistles (see Eph. iii. 14-21; Rom. xvi. 25-27; Phil. i. 3-11; Col. i. 9-15; Heb. xiii. 20, 21; 1 Pet. v. 10, 11, &c.), than in those recorded in the Acts. The public prayer, which from the beginning became the principle of life and unity in the Church (see Acts ii. 42; and comp. i. 24, 25, iv. 24-30, vi. 6, xii. 5, xiii. 2, 3, xvi. 25, xxi. 36, xxi. 5), although doubtless always including the Lord's Prayer, probably in the first instance took much of its form and style from the prayers of the synagogues. The only form given (besides the very short one of Acts i. 24, 25), dwelling as it does (Acts iv. 24-30) on the Scriptures of the O. T. in their application to our Lord, seems to mark this connexion. It was probably by degrees that they assumed the distinctively Christian character.

In the record of prayers accepted and granted by God, we observe, as always, a special adaptation to the period of His dispensation, to which they belong. In the patriarchal period, they have the simple and childlike tone of domestic supplication for the simple and apparently trivial incidents of domestic life. Such are the prayers of Abraham for children (Gen. xv. 2, 3); for Ishmael (xvii. 18); of Isaac for Rebekah (xv. 21); of Abraham's servant in Mesopotamia (xix. 12-14); although sometimes they take a wider range in intercession, as with Abraham for Sodom (Gen. xviii. 23-32), and for Abimelech (xx. 7, 17). In the Mosaic period they assume a more solemn tone and a national bearing; chiefly that of direct intercession for the chosen people; as by Moses (Num. xi. 2, xii. 13, xxi. 7); by Samuel (1 Sam. vii. 5, xii. 19, 23); by David (2 Sam. xxiv. 17, 18); by Hezekiah (2 K. xix. 15-19); by Isaiah (2 K. xix. 4; 2 Chr. xxxii. 20); by Daniel (Dan. ix. 20, 21); or of prayer for national victory, as by Asa (2 Chr. xiv. 11); Jehoshaphat (2 Chr. xx. 6-12). More rarely are they for individuals, as in the prayer of Hannah (1 Sam. i. 12); in that of Hezekiah in his sickness (2 K. xx. 2); the intercession of Samuel for Saul (1 Sam. xv. 11, 35), &c. A special class are those which precede and refer to the exercise of miraculous power; as by Moses (Ex. viii. 12, 30, xv. 25); by Elijah at Zarephath (1 K. xvii. 20) and Carmel (1 K. xviii. 36, 37); by Elisha at Shunem (2 K. iv. 33) and Dothan (vi. 17, 18); by Isaiah (2 K. xx. 11); by St. Peter for Tabitha (Acts ix. 40); by the elders of the Church (James v. 14, 15, 16). In the New Testament they have a more directly spiritual bearing; such as the prayer of the Church for protection and grace (Acts iv. 24-30); of the Apostles for their Samaritan converts (viii. 15); of Cornelius for guidance (x. 4, 31); of the Church for St. Peter (xii. 5); of St. Paul at Philippi (xvi. 25); of St. Paul against the thorn in the flesh answered, although not granted (2 Cor. xii. 7-9), &c. It would seem the intention of Holy Scripture to encourage all prayer, more especially intercession, in all relations, and for all righteous objects. [A. B.]

It co counts satisf two success Ewald acco an actual ex members in instance in Solomon (I like manne household t turn uncal spirit and

throughout that of reverence for the Law of Jehovah, and the priestly order which it established. A conjecture midway between these two extremes is perhaps permissible. David and his sons may have been admitted, not to distinctively priestly acts, such as burning incense (Num. xvi. 40; 2 Chr. xxvi. 18), but to an honorary, titular priesthood. To wear the ephod in processions (2 Sam. vi. 14), at the time when this was the special badge of the order (1 Sam. xxii. 18), to join the priests and Levites in their songs and dances, might have been conceded, with no deviation from the law, to the members of the royal house.<sup>a</sup> There are some indications that these functions (possibly this liturgical retirement from public life) were the lot of the members of the royal house who did not come into the line of succession, and who belonged, by descent or incorporation, to the house of Nathan as distinct from that of David (Zech. xii. 12). The very name Nathan, connected, as it is, with Nethinim, suggests the idea of dedication. [NETHINIM.] The title *Cohen* is given to Zabud, the son of Nathan (1 K. iv. 5). The genealogy of the line of Nathan in Luke iii. includes many names—Levi, Eliezer, Malchi, Jochanan, Mattathias, Heli—which appear elsewhere as belonging to the priesthood. The mention in 1 Eadr. v. 5, of Joiakim as the son of Zerubbabel, while in Neh. xii. 10 he appears as the son of Jehu, the son of Josedek, indicates, either a strange confusion or a connexion, as yet imperfectly understood, between the two families.<sup>b</sup> The same explanation applies to the parallel cases of Ira the Jairite (2 Sam. xx. 26), where the LXX. gives *Iepéds*. It is noticeable that this use of the title is confined to the reigns of David and Solomon, and that the synonym "at the king's hand" of 1 Chr. xviii. 17 is used in 1 Chr. xxv. 2 of the sons of Asaph as "prophesying" under their head or father, and of the relation of Asaph himself to David in the choral service of the Temple.

*Origin.*—The idea of a priesthood connects itself, in all its forms, pure or corrupted, with the consciousness, more or less distinct, of sin. Men feel that they have broken a law. The power above them is holier than they are, and they dare not approach it. They crave for the intervention of some one of whom

they can think as likely to be more acceptable than themselves. He must offer up their prayers, thanksgivings, sacrifices. He becomes their representative in "things pertaining unto God." He may become also (though this does not always follow) the representative of God to man. The functions of the priest and prophet may exist in the same person. The reverence which men pay to one who bears this consecrated character may lead them to acknowledge the priest as being also their king. The claim to fill the office may rest on characteristics belonging only to the individual man, or confined to a single family or tribe. The conditions of the priesthood, the office and influence of the priests, as they are among the most conspicuous facts of all religions of the ancient world, so do they occupy a like position in the history of the religion of Israel.

No trace of an hereditary or caste-priesthood meets us in the worship of the patriarchal age. Abraham, Isaac, and Jacob perform priestly acts, offer sacrifices, "draw near" to the Lord (Gen. xii. 8, xviii. 23, xvi. 25, xxxiii. 20). To the eldest son, or to the favoured son exalted to the place of the eldest, belongs the "goody raiment" (Gen. xxvii. 15), the "coat of many colours" (Gen. xxxvii. 3), in which we find perhaps the earliest trace of a sacerdotal vestment<sup>d</sup> (comp. Blunt, *Scriptural Coincid.* i. 1; Ugolini, xiii. 138). Once, and once only, does the word *Côhen* meet us as belonging to a ritual earlier than the time of Abraham. Melchizedek is "the priest of the most high God" (Gen. xiv. 18). The argument of the Epistle to the Hebrews has an historical foundation in the fact that there are no indications in the narrative of Gen. xiv. of any one preceding or following him in that office. The special Divine names which are connected with him as the priest of "the most high God, the possessor of heaven and earth," render it probable that he rose, in the strength of those great thoughts of God, above the level of the other inhabitants of Canaan. In him Abraham recognized a faith like his own, a life more entirely consecrated, the priestly character in its perfection [comp. MELCHIZEDEK]. In the worship of the patriarchs themselves, the chief of the family, as such, acted as the

<sup>a</sup> The apocryphal literature of the N. T., worthless as a witness to a fact, may perhaps be received as an indication of the feeling which saw in the house and lineage of David a kind of quasi-sacerdotal character. Joseph, though of the tribe of Judah, is a priest living in the Temple (*Hist. Joseph.* c. 2, in Tischendorf, *Evang. Apoc.*). The kindred of Jesus are recognized as taking tithes of the people (*Evang. Nicod.* i. 16, *ibid.*). In what approaches more nearly to history, James the Just, the brother of the Lord, is admitted (partly, it is true, as a Nazirite) into the Holy Place, and wears the linen dress of the priests (*Hegrelpp.* ap. Euseb. *H. E.* ii. 23). The extraordinary story found in Suidas, s. v. *Ἰωσήφ*, represents the priests of Jerusalem as electing the "Son of Joseph" to a vacant office in the priesthood, on the ground that the two families had been so closely connected, that there was no great deviation from usage in admitting one of the lineage of David to the privileges of the sons of Aaron. Augustine was inclined to see in this intermingling of the royal and priestly lines a possible explanation of the apocryphal traditions that the Mother of the Lord was of the tribe of Levi (c. *Paust.* xliii. 9). The marriage of Aaron himself with the sister of the prince of Judah (Ex. vii. 23), that of Jehoiada with Jehoiadab's daughter (2 Chr. xxii. 11), and of Joseph with one who was "cousin" to a daughter of Aaron (Luke i. 36), are historical instances of this connection. The statement of Eusebius (s. v. *Ἰωσήφ*), that

patriarch of Alexandria (Selden, *De Success. Pont.* i. 13), that Aristobulus was a priest of the house of David, suggests a like explanation.

<sup>b</sup> Comp. the remarkable passage in Augustine, *De divers. Quest.* lxi.: "A David enim in duas familias, regiam et sacerdotalem, origo illa distributa est, quarum duarum familiarum, sicut dictum est, regiam descendens Mattheus, sacerdotalem ascendens Lucas secutus est, ut hominum nosse Jesus Christus, rex et sacerdos nosse, et cognitionem duceret de stirpe sacerdotali, et non esset tam in de tribu sacerdotali." The cognatio he supposes to have been the marriage of Nathan with one of the daughters of Aaron.

<sup>c</sup> The true idea of the priesthood, as distinct from all other ministerial functions like those of the Levites, is nowhere given more distinctly than in Num. xvi. 5. The priest is Jehovah's, is "holy," is "chosen," "draws near" to the Lord. In all these points he represents the ideal life of the people (Ex. xix. 3-6). His highest act, that which is exclusively sacerdotal (Num. xvi. 40; 2 Chr. xxvi. 18), is to offer the incense which is the symbol of the prayers of the worshippers (1e. cxli. 2; Rev. viii. 3).

<sup>d</sup> In this sacerdotal, dedicated character of Joseph's youth, we find the simplest explanation of the words which speak of him as "the separated one" "the Nazirite" (*Nazir*), among his brethren (Gen. xix. 26; Deut. xxiii. 16).

priest. The office descended with the birthright, and might apparently be transferred with it. As the family expanded, the head of each section probably stood in the same relation to it. The thought of the special consecration of the first-born was recognized at the time of the Exodus (*infra*). A priesthood of a like kind continued to exist in other Semitic tribes. The Book of Job, whatever may be its date, ignores altogether the institutions of Israel, and represents the man of Uz as himself "sanctifying" his sons, and offering burnt-offerings (Job i. 5). Jethro, is a "priest of Midian" (Ex. ii. 16, iii. 1), Balak himself offers a bullock and a ram upon the seven altars on Pisgah (Num. xxii. 2, &c.).

In Egypt the Israelites came into contact with a priesthood of another kind, and that contact must have been for a time a very close one. The marriage of Joseph with the daughter of the priest of On—a priest, as we may infer from her name, of the goddess Neith—(Gen. xli. 45) [ASENATH], the special favour which he showed to the priestly caste in the years of famine (Gen. xlvii. 26), the training of Moses in the palace of the Pharaohs, probably in the colleges and temples of the priests (Acts vii. 22)—all this must have impressed the constitution, the dress, the outward form of life upon the minds of the lawgiver and his contemporaries. Little as we know directly of the life of Egypt at this remote period, the stereotyped fixedness of the customs of that country warrants us in referring to a tolerably distant past the facts which belong historically to a later period, and in doing so, we find coincidences with the ritual of the Israelites too numerous to be looked on as accidental, or as the result of forces which were at work, independent of each other, but taking parallel directions. As circumcision was common to the two nations (Herod. ii. 37), so the shaving of the whole body (*ibid.*) was with both part of the symbolic purity of the priesthood, once for all with the Levites of Israel (Num. viii. 7), every third day with those of Egypt. Both are restricted to garments of linen (Herod. ii. 37, 81; Plutarch, *De Isid.* c. 4; Juven. vi. 533; Ex. xxviii. 39; Ezek. xliv. 18). The sandals of byblus worn by the Egyptian priests were but little removed from the bare feet with which the sons of Aaron went into the sanctuary (Herod. ii. 37). For both there were multiplied ablutions. Both had a public maintenance assigned, and had besides a large share in the flesh of the victims offered (Herod. l. c.). Over both there was one high-priest. In both the law of succession was hereditary (*ibid.*; comp. also Spencer, *De Leg. Hebr.* c. iii. 1, 5, 11; Wilkinson, *Ancient Egyptians*, iii. p. 116).

Facts such as these leave scarcely any room for doubt that there was a connexion of some kind between the Egyptian priesthood and that of Israel. The latter was not, indeed, an outgrowth or imitation of the former. The faith of Israel in Jehovah, the one Lord, the living God, of whom there was no form or similitude, presented the strongest possible contrast to the multitudinous idols of the polytheism of Egypt. The symbolism of the one was cosmic, "of the earth, earthy," that of the other,

chiefly, if not looking, as we the Israelites people who (polytheism, nation must have subjects of it played the law which they w bet had to li as the elem which they w were widely of Egypt mi against the more attracti

Not in the first proclamation of the great laws of duty in the Decalogue (Ex. xx. 1-17), nor in the applications of those laws to the chief contingencies of the people's life in the wilderness, does it find a place. It appears together with the Ark and the Tabernacle, as taking its position in the education by which the people were to be led toward the mark of their high calling. As such we have to consider it.

**Consecration.**—The functions of the HIGH-PRIEST, the position and history of the LEVITES as the consecrated tribe, have been discussed fully under those heads. It remains to notice the characteristic facts connected with "the priests, the sons of Aaron," as standing between the two. Solemn as was the subsequent dedication of the LEVITES, that of the priests involved a yet higher consecration. A special word (קֹדֶשׁ, *kaddash*) was appropriated to it. Their old garments were laid aside. Their bodies were washed with clean water (Ex. xxix. 4; Lev. viii. 6) and anointed with the perfumed oil, prepared after a prescribed formula, and to be used for no lower purpose\* (Ex. xxix. 7, xxx. 22-33). The new garments belonging to their office were then put on them (*infra*). The truth that those who intercede for others must themselves have been reconciled, was indicated by the sacrifice of a bullock as a sin-offering, on which they solemnly laid their hands, as transferring to it the guilt which had attached to them (Ex. xxix. 10; Lev. viii. 18). The total surrender of their lives was represented by the ram slain as a burnt-offering, a "sweet savour" to Jehovah (Ex. xxix. 18; Lev. viii. 21). The blood of these two was sprinkled on the altar, offered to the Lord. The blood of a third victim, the ram of consecration, was used for another purpose. With it Moses sprinkled the right ear that was to be open to the Divine voice, the right hand and the right foot that were to be active in divine ministrations (Ex. xxix. 20; Lev. viii. 23, 4). Lastly, as they were to be the exponents, not only of the nation's sense of guilt, but of its praise and thanksgiving, Moses was to "fill their hands"† with cakes of unleavened bread and portions of the sacrifices, which they were to present before the Lord as a wave-offering. The whole of this mysterious ritual was to be repeated for seven days, during which they remained within the Tabernacle, separated from the people, and not till then was the consecration perfect (comp. on the meaning of all these acts Bähr, *Symbolik*, ii. 2. v. §2). Moses himself, as the representative of the Unseen King, is the consecrator, the sacrificer throughout these ceremonies; as the channel through which the others receive their office, he has for the time a higher priesthood than that of Aaron (Selden, *De Synedr.* i. 16; Ugolini, xii. 3). In accordance with the principle which runs through the history of Israel, he, the ruler, solemnly divests himself of the priestly office and transfers it to another. The

fact that he had been a priest, was merged in his work as a lawgiver. Only once in the language of a later period was the word *כהן* applied to him (Ps. xcix. 6).

The consecrated character thus imparted did not need renewing. It was a perpetual inheritance transmitted from father to son through all the centuries that followed. We do not read of its being renewed in the case of any individual priest of the sons of Aaron.<sup>1</sup> Only when the line of succession was broken, and the impiety of Jeroboam intruded the lowest of the people into the sacred office, do we find the re-appearance of a like form (2 Chr. xiii. 9), of the same technical word. The previous history of Jeroboam and the character of the worship which he introduced make it probable that, in that case also, the ceremonial was, to some extent, Egyptian in its origin.

**Dress.**—The "sons of Aaron" thus dedicated were to wear during their ministrations a special apparel—at other times apparently they wore the common dress of the people. The material was linen, but that word included probably, as in the case of the Egyptian priests, the byssus, and the cotton stuffs of that country (Ex. xxviii. 42; comp. COTTON).<sup>2</sup> Linen drawers from the loins to the thighs were "to cover their nakedness." The *pericundia* of the Hebrew ritual in this and in other places (Ex. xx. 26, xxviii. 42) was probably a protest against some of the fouler forms of nature-worship, as e. g. in the worship of Peor (Maimonides, *Mora Nivochim*, iii. 45, in Ugolini, xiii. p. 385), and possibly also, in some Egyptian rites (Herod. ii. 60). Over the drawers was worn the *etoneth*, or close-fitting cassock, also of fine linen, white, but with a diamond or chess-board pattern on it (Bähr, *Symbol.* ii. c. iii. §2). This came nearly to the feet (קֹדֶשׁ חִטָּוֶן, Joseph. *Ant.* iii. 7, §1), and was to be woven in its garment-shape (not cut out and then sewed together), like the *χιτών ἄβραφος* of John xix. 23, in which some interpreters have even seen a token of the priesthood of him who wore it (Ewald, *Gesch.* v. 177; Ugolini, xiii. p. 218).<sup>3</sup> The white cassock was gathered round the body with a girdle of needlework, into which, as in the more gorgeous belt of the high-priest, blue, purple, and scarlet, were intermingled with white, and worked in the form of flowers (Ex. xxviii. 39, 40, xxxix. 2; Ezek. xlv. 17-19). Upon their heads they were to wear caps or bonnets (in the English of the A. V. the two words are synonymous) in the form of a cup-shaped flower, also of fine linen. These garments they might wear at any time in the Temple, whether on duty or not, but they were not to sleep in them (Joseph. *B. J.* v. 5, §7). When they became soiled, they were not washed or used again, but torn up to make wicks for the lamps in the Tabernacle (Selden, *De Synedr.* xiii. 11). They had besides them other "clothes of service," which were probably simpler,

\* The sons of Aaron, it may be noticed, were simply sprinkled with the precious oil (Lev. viii. 30). Over Aaron himself it was poured till it went down to the skirts of his clothing (ibid. 12; Ps. cxxxiii. 2).

† This appears to have been regarded as the essential part of the consecration; and the Hebrew, "to fill the hand," is accordingly used as a synonyme for "to consecrate" (Ex. xxix. 9; 2 Chr. xiii. 9).

<sup>1</sup> Ewald (*Alterthüm.* p. 289-291) writes as if the ceremonies of consecration were repeated on the admission of every priest to the performance of his functions; but this is on the assumption, apparently, that Ex. xxix. and

Lev. viii. are not historical, but embody the customs of a later period. Bähr (*Symbolik*, l. c.) leaves it as an open question, and treats it as of no moment.

<sup>2</sup> The reason for fixing on this material is given in Ex. xlv. 18; but the feeling that there was something unclean in clothes made from the skin or wool of an animal was common to other nations. Egypt has been already mentioned. The Arab priests in the time of Mahomet wore linen only (Ewald, *Alterth.* p. 289).

<sup>3</sup> Here also modern Eastern customs present an analogy in the woven, seamless *thum* worn by the Mecca pilgrims (Ewald, *Alterth.* p. 289).

Dress of Egyptian Priests. (Wilkinson)

But are not described (Ex. xxxi. 10; Ez. xlii. 14). In all their acts of ministration they were to be barefooted.<sup>2</sup> Then, as now, this was the strongest recognition of the sanctity of a holy place which the Oriental mind could think of (Ex. iii. 5; Josh. v. 15), and throughout the whole existence of the Temple service,

even though it drew upon them the scorn of the heathen (Juven. *Sat.* vi. 159), and seriously affected the health of the priests (Ugolini, viii. p. 976, xiii.

<sup>2</sup> This is inferred (1) from the absence of any direction as to a covering for the feet; (2) from the later custom; (3) from the universal feeling of the East. Shoes were worn as a protection against defilement. In a sanctuary there was nothing that could defile.

<sup>3</sup> Bähr (*Symb* in the number, vestments, diacon 33 on the day Egyptian priest

rental awe, not with the orgiastic wildness which led the priests of Baal in their despair to make cuttings in their flesh (Lev. xix. 28; 1 K. xviii. 28), and carried those of whom Atya was a type to a more terrible mutilation (Deut. xxi. 1). The same thought found expression in two other forms affecting the priests of Israel. The priest was to be one who, as the representative of other men, was to be physically as well as liturgically perfect.\* As the victim was to be without blemish so also was the sacrificer (comp. Bähr, *Symbol.* ii. c. ii. §3). The law specified in broad outlines the excluding defects (Lev. xxi. 17-21), and these were such as impaired the purity, or at least the dignity, of the ministrant. The morbid casuistry of the later rabbis drew up a list of not less than 142 faults or infirmities which involved permanent, of 22 which involved temporary deprivation from the priestly office (Carpzov. *App. Critic.* p. 92, 93; Ugolini, xii. 54, xiii. 903); and the original symbolism of the principle (Philo, *De Vict.* and *De Monarch.* ii. 5) was lost in the prurient minuteness which, here as elsewhere, often makes the study of rabbinic literature a somewhat repulsive task. If the Christian Church has sometimes seemed to approximate, in the conditions it laid down for the priestly character, to the rules of Judaism, it was yet careful to reject the Jewish principles, and to rest its regulations simply on the grounds of expediency (*Const. Apost.* 77, 78). The marriages of the sons of Aaron were, in like manner, hedged round with special rules. There is, indeed, no evidence for what has sometimes been asserted that either the high-priest (Philo, *De Monarch.* ii. 11, ii. 229, ed. Mang.; Ewald, *Altorth.* p. 302) or the other sons of Aaron (Ugolini, xii. 52) were limited in their choice to the women of their own tribe, and we have some distinct instances to the contrary. It is probable, however, that the priestly families frequently intermarried, and it is certain that they were forbidden to marry an unchaste woman, or one who had been divorced, or the widow of any but a priest (Lev. xxi. 7, 14; Ezek. xlv. 22). The prohibition of marriage with one of an alien race was assumed, though not enacted in the law; and hence the reforming zeal of a later time compelled all who had contracted such marriages to put away their strange wives (Ezr. x. 18), and counted the offspring of a priest and a woman taken captive in war as illegitimate (Joseph. *Ant.* iii. 10, xi. 4; c. *Apion.* i. 7), even though the priest himself did not thereby lose his function (Ugolini, xii. 924). The high-priest was to carry the same idea to a yet higher point, and was to marry none but a virgin in the first freshness of her youth (Lev. xxi. 13). Later casuistry fixed the age within the narrow limits of twelve and twelve and a half (Carpzov. *App. Crit.* p. 88). It followed as a matter of necessity from these regulations, that the legitimacy of every priest depended on his genealogy. A single missing or faulty link would vitiate the whole succession. To those genealogies, accordingly, extending back unbroken for 2000 years, the priests could point, up to the time of the destruction of the Temple (Joseph. c. *Apion.* i. 7). In later times, wherever the priest might live—Egypt, Babylon, Greece—he was to send the register of all marriages in his family to Jerusalem (*Ibid.*). They could be referred to in any doubtful

or disputed case (Ezr. ii. 62; Neh. vii. 64). In them was registered the name of every mother as well as of every father (*ibid.*; comp. also the story already referred to in Sukias, u. v. 'Insoos'). It was the distinguishing mark of a priest, not of the Aaronic line, that he was ἀνδρῶν, ἀμῆτρων, ἀγενεαλόγητος (Heb. vii. 3), with no father or mother named as the ground of his title.

The age at which the sons of Aaron might enter upon their duties was not defined by the law, as that of the Levites was. Their office did not call for the same degree of physical strength; and if twenty-five in the ritual of the Tabernacle (Num. viii. 24) and twenty in that of the Temple (1 Chron. xxiii. 27) was the appointed age for the latter, the former were not likely to be kept waiting till a later period. In one remarkable instance, indeed, we have an example of a yet earlier age. The boy Aristobulus at the age of seventeen ministered in the Temple in his pontifical robes, the admired of all observers, and thus stirred the treacherous jealousy of Herod to remove so dangerous a rival (Joseph. *Ant.* xv. 3, §3). This may have been exceptional, but the language of the rabbis indicates that the special consecration of the priest's life began with the opening years of manhood. As soon as the dawn appeared on his cheek the young candidate presented himself before the Council of the Sanhedrim, and his genealogy was carefully inspected. If it failed to satisfy his judges, he left the Temple clad in black, and had to seek another calling: if all was right so far, another ordeal awaited him. A careful inspection was to determine whether he was subject to any one of the 144 defects which would invalidate his priestly acts. If he was found free from all blemish, he was clad in the white linen tunic of the priests, and entered on his ministrations. If the result of the examination was not satisfactory, he was relegated to the half-menial office of separating the sound wood for the altar from that which was decayed and worm-eaten, but was not deprived of the emoluments of his office (Lightfoot, *Temple Service*, c. 6).

**Functions.**—The work of the priesthood of Israel was, from its very nature, more stereotyped by the Mosaic institutions than any other element of the national life. The functions of the Levites—less defined, and therefore more capable of expansion—altered, as has been shown [LEVITES], from age to age; but those of the priests continued throughout substantially the same, whatever changes might be brought about in their social position and organization. The duties described in Exodus and Leviticus are the same as those recognized in the Books of Chronicles, as those which the prophet-priest Ezekiel sees in his vision of the Temple of the future. They, assisting the high-priest, were to watch over the fire on the altar of burnt-offerings and to keep it burning evermore both by day and night (Lev. vi. 12; 2 Chr. xiii. 11), to feed the golden lamp outside the veil with oil (Ex. xxvii. 20, 21; Lev. xxiv. 2), to offer the morning and evening sacrifices, each accompanied with a meat-offering and a drink-offering at the door of the tabernacle (Ex. xxix. 38-44). These were the fixed, invariable duties; but their chief function was that of being always at hand to do the priest's office for any guilty, or penitent,

\* The idea of the perfect body, as symbolising the holy soul, &c., as might be expected, wide-spread among the

religions of heathendom. "Sacerdos non integri corporis quasi unus omnis et vitandus est." Seneca (*Trachylus* c. 2).

or rejoicing Israelite. The worshipper might come at any time. If he were rich and brought a bullock, it was the priest's duty to slay the victim, to place the wood upon the altar, to light the fire, to sprinkle the altar with the blood (Lev. i. 5). If he were poor and brought a pigeon, the priest was to wring its neck (Lev. i. 15). In either case, he was to burn the meat-offering and the peace-offering which accompanied the sacrifice (Lev. ii. 2, 9, iii. 11). After the birth of every child, the mother was to come with her sacrifice of turtle-doves or pigeons (Lev. xii. 6; Luke ii. 22-24), and was thus to be purified from her uncleanness. A husband who suspected his wife of unfaithfulness might bring her to the priest, and it belonged to him to give her the water of jealousy as an ordeal, and to pronounce the formula of execration (Num. v. 11-31). Lepers were to come, day by day, to submit themselves to the priest's inspection, that he might judge whether they were clean or unclean, and when they were healed perform for them the ritual of purification (Lev. xiii. xiv., and comp. Mark i. 44). All the numerous accidents which the law looked on as defilements or sins of ignorance had to be expiated by a sacrifice, which the priest, of course, had to offer (Lev. xv. 1-33). As they thus acted as mediators for those who were labouring under the sense of guilt, so they were to help others who were striving to attain, if only for a season, the higher standard of a consecrated life. The Nazarite was to come to them with his sacrifice and his wave-offering (Num. vi. 1-21).

Other duties of a higher and more ethical character were hinted at, but were not, and probably could not be, the subject of a special regulation. They were to teach the children of Israel the statutes of the Lord (Lev. x. 11; Deut. xxxiii. 10; 2 Chr. xv. 3; Ezek. xlv. 23, 24). The "priest's lips" (in the language of the last prophet looking back upon the ideal of the order) were to "keep knowledge" (Mal. ii. 7). Through the whole history, with the exception of the periods of national apostasy, these acts, and others like them, formed the daily life of the priests who were on duty. The three great festivals of the year were, however, their seasons of busiest employment. The pilgrims who came up by tens of thousands to keep the feast, came each with his sacrifices and oblations. The work at such times was, on some occasions at least, beyond the strength of the priests in attendance, and the Levites had to be called in to help them (2 Chron. xxix. 34, xxxv. 14). Other acts of the priests of Israel, significant as they were, were less distinctively sacerdotal. They were to bless the people at every solemn meeting; and that this part of their office might never fall into disuse, a special formula of benediction was provided (Num. vi. 22-27). During the journeys in the wilderness it belonged to them to cover the ark and all the vessels of the sanctuary with a purple or scarlet cloth before the Levites might approach them (Num. iv. 5-15). As the people started on each day's march they were to blow "an alarm" with

long silver trumpets (Num. x. 1-8),—with trumpet the whole multitude were to be assembled, with one if there was to be a special council of the elders and princes of Israel. With the same instruments they were to proclaim the commencement of all the solemn days, and days of gladness (Num. x. 10); and throughout all the change in the religious history of Israel this adhered to them as a characteristic mark. Other instruments of music might be used by the more highly trained Levites and the schools of the Prophets, but the trumpets belonged only to the priests. They blew them in the solemn march round Jericho (Josh. vi. 4), in the religious war which Judah waged against Jeroboam (2 Chr. xiii. 12, when they summoned the people to a solemn penitential fast (Joel ii. 1, 15). In the service of the second temple there were never to be less than 21 or more than 84 blowers of trumpets present in the temple daily (Ugolini, xiii. p. 1011). The presence of the priests on the field of battle for this purpose, often in large numbers, armed for war, and sharing in the actual contest (1 Chr. xii. 23, 27; 2 Chr. xx. 21, 22), led, in the later periods of Jewish history, to the special appointment at such times of a war-priest, deputed by the Sanhedrim to be the representative of the high-priest, and standing next but one to him in the order of precedence (comp. Ugolini, xii. 1031, *De Sacerdote Castrensi*; and xiii. 871).<sup>8</sup>

Other functions were hinted at in Deuteronomy which might have given them greater influence as the educators and civilizers of the people. They were to act (whether individually or collectively does not distinctly appear) as a court of appeal in the more difficult controversies in criminal or civil cases (Deut. xvii. 8-13). A special reference was to be made to them in cases of undetected murder, and they were thus to check the vindictive blood-feuds which it would otherwise have been likely to occasion (Deut. xxi. 5). It must remain doubtful, however, how far this order kept its ground during the storms and changes that followed. The judicial and the teaching functions of the priesthood remained probably for the most part in abeyance through the ignorance and vices of the priests. Zealous reformers kept this before them as an ideal (2 Chr. xvii. 7-9, xix. 8-10; Ex. xlv. 24), but the special stress laid on the attempts to realize it shows that they were exceptional.<sup>9</sup>

*Maintenance.*—Functions such as these were clearly incompatible with the common activities of men. At first the small number of the priests must have made the work almost unintermittent, and even when the system of rotation had been adopted, the periodical absences from home could not fail to be disturbing and injurious, had they been dependent on their own labours. The serenity of the priestly character would have been disturbed had they had to look for support to the lower industries. It may have been intended (*supra*) that their time, when not liturgically employed, should be given to the study of the Law, or to instructing others in it. On these grounds therefore a distinct provision was

<sup>8</sup> In this case, however, the trumpets were of rams horns, not of silver.

<sup>9</sup> Jost (*Judenth.* i. 153) regards the war-priest as belonging to the ideal system of the later Rabbis, not to the historical constitution of Israel. Deut. xx. 2, however, supplies the germ out of which such an office might naturally grow. Judas Maccabæus, in his wars, does what

the war-priest was said to do (1 Macc. iii. 56).

<sup>9</sup> The teaching functions of the priest have probably been unduly magnified by writers like Michaëlis, who aim at bringing the institutions of Israel to the standard of modern expediency (*Comm. on Laws of Moses*, i. 35-41), as they have been unduly depreciated by Saalschütz and Jahn.

masses for them. This consisted—(1) of one-tenth of the tithes which the people paid to the Levites, one per cent. i. e. on the whole produce of the country (Num. xviii. 26-28). (2) Of a special tithe every third year (Deut. xiv. 28, xvi. 12). (3) Of the redemption-money, paid at the fixed rate of five shekels a head, for the first-born of man or beast (Num. xviii. 14-19).<sup>1</sup> (4) Of the redemption-money paid in like manner for men or things specially dedicated to the Lord (Lev. xxvii.). (5) Of spoil, captives, cattle, and the like, taken in war (Num. xxi. 25-47). (6) Of what may be described as the perquisites of their sacrificial functions, the shew-bread, the flesh of the burnt-offerings, peace-offerings, trespass-offerings (Num. xviii. 8-14; Lev. vi. 26, 29, vii. 6-10), and, in particular, the heave-shoulder and the wave-breast (Lev. x. 12-15). (7) Of an undefined amount of the first-fruits of corn, wine, and oil (Ex. xxiii. 19; Lev. ii. 14; Deut. xvi. 1-10). Of some of these, as "most holy," none but the priests were to partake (Lev. vi. 29). It was lawful for their sons and daughters (Lev. x. 14), and even in some cases for their home-born slaves, to eat of others (Lev. xxii. 11). The stranger and the hired servant were in all cases excluded (Lev. xxii. 10). (8) On their settlement in Canaan the priestly families had thirteen cities assigned them, with "suburbs" or pasture-grounds for their flocks (Josh. xxi. 13-19). While the Levites were scattered over all the conquered country, the cities of the priests were within the tribes of Judah, Simeon, and Benjamin, and this concentration was not without its influence on their subsequent history. [Comp. LEVITES.] These provisions were obviously intended to secure the religion of Israel against the dangers of a caste of pauper-priests, needy and dependent, and unable to bear their witness to the true faith. They were, on the other hand, as far as possible removed from the condition of a wealthy order. Even in the ideal state contemplated by the Book of Deuteronomy, the Levite (here probably used generically, so as to include the priests) is repeatedly marked out as an object of charity, along with the stranger and the widow (Deut. xii. 12, 19, xiv. 27-29). During the long periods of national apostasy, tithes were probably paid with even less regularity than they were in the more orthodox period that followed the return from the Captivity (Neh. xiii. 10; Mal. iii. 8-10). The standard of a priest's income, even in the earliest days after the settlement in Canaan, was miserably low (Judg. xvii. 10). Large portions of the priesthood fell, under the kingdom, into a state of abject poverty (comp. 1 Sam. ii. 36). The clinging evil throughout their history was not that they were too powerful and rich, but that they sank into the state from which the Law was intended to preserve them, and so came to "teach for hire" (Mic. iii. 11; comp. Salschütz, *Archäologie Jer. Hebräer*, ii. 344-355).

**Classification and Statistics.**—The earliest historical trace of any division of the priesthood, and corresponding cycle of services, belongs to the time of David. Jewish tradition indeed recognizes an earlier division, even during the life of Aaron, into

eight houses (Gem. Hieros. *Taanith*, in Ugolini, xiii. 875), augmented during the period of the Shiloh-worship to sixteen, the two families of Eleazar and Ithamar standing in both cases on an equality. It is hardly conceivable, however, that there could have been any rotation of service while the number of priests was so small as it must have been during the forty years of sojourn in the wilderness, if we believe Aaron and his lineal descendants to have been the only priests officiating. The difficulty of realizing in what way the single family of Aaron were able to sustain all the burden of the worship of the Tabernacle and the sacrifices of individual Israelites, may, it is true, suggest the thought that possibly in this, as in other instances, the Hebrew idea of sonship by adoption may have extended the title of the "Sons of Aaron" beyond the limits of lineal descent, and, in this case, there may be some foundation for the Jewish tradition. Nowhere in the later history do we find any disproportion like that of three priests to 22,000 Levites. The office of supervision over those that "kept the charge of the sanctuary," entrusted to Eleazar (Num. iii. 32), implies that some others were subject to it besides Ithamar and his children, while these very keepers of the sanctuary are identified in ver. 38 with the sons of Aaron who are encamped with Moses and Aaron on the east side of the Tabernacle. The allotment of not less than thirteen cities to those who bore the name, within little more than forty years from the Exodus, tends to the same conclusion, and at any rate indicates that the priesthood were not intended to be always in attendance at the Tabernacle, but were to have homes of their own, and therefore, as a necessary consequence, fixed periods only of service. Some notion may be formed of the number on the accession of David from the facts (1) that not less than 3700 tendered their allegiance to him while he was as yet reigning at Hebron over Judah only (1 Chr. xii. 27), and (2) that one-twenty-fourth part were sufficient for all the services of the statelier and more frequent worship which he established. To this reign belonged accordingly the division of the priesthood into the four-and-twenty "courses" or orders (חִבְלֵי חַדָּשׁ, *diapéreis, ἐφημερίαι*, 1 Chr. xiv. 1-19;

2 Chr. xxiii. 6; Luke i. 5), each of which was to serve in rotation for one week, while the further assignment of special services during the week was determined by lot (Luke i. 9). Each course appears to have commenced its work on the Sabbath, the outgoing priests taking the morning sacrifice, and leaving that of the evening to their successors (2 Chr. xxiii. 8; Ugolini, xiii. 319). In this division, however, the two great priestly houses did not stand on an equality. The descendants of Ithamar were found to have fewer representatives than those of Eleazar,<sup>2</sup> and sixteen courses accordingly were assigned to the latter, eight only to the former (1 Chr. xxiv. 4; comp. Carpov. *App. Crit.* p. 98). The division thus instituted was confirmed by Solomon, and continued to be recognized as the typical number of the priesthood. It is to be noted, however, that this arrangement was to some extent

<sup>1</sup> The later Rabbin enumerates no less than twenty-four sources of emolument. Of these the chief only are given here (Ugolini, xiii. 1124).

<sup>2</sup> It is to be noticed that the Law, by recognizing the substitution of the Levites for the first-born, and ordering payment only for the small number of the latter in excess

of the former, deprived Aaron and his sons of a large sum which would otherwise have accrued to them (Num. iii. 44-51).

<sup>3</sup> This diminution may have been caused partly by the slaughter of the priests who accompanied Hophni and Phinehas (Ps. lxxviii. 61), partly by the massacre at Nob.

elastic. Any priest might be present at any time, and even perform priestly acts, so long as he did not interfere with the functions of those who were officiating in their course (Ugolini, xiii. 881), and at the great solemnities of the year, as well as on special occasions like the opening of the Temple, they were present in great numbers. On the return from the Captivity there were found but four courses out of the twenty-four, each containing, in round numbers, about a thousand\* (Ezr. ii. 36-39). Out of these, however, to revive, at least, the idea of the old organization, the four-and-twenty courses were reconstituted, bearing the same names as before, and so continued till the destruction of Jerusalem. If we may accept the numbers given by Jewish writers as at all trustworthy, the proportion of the priesthood to the population of Palestine during the last century of their existence as an order must have been far greater than that of the clergy has ever been in any Christian nation. Over and above those that were scattered in the country and took their turn, there were not fewer than 24,000 stationed permanently at Jerusalem, and 12,000 at Jericho (Gesar. Hieros. *Taanith*, fol. 67, in *Carpov. App. Crit.* p. 100). It was a Jewish tradition that it had never fallen to the lot of any priest to offer incense twice (Ugolini, xii. 18). Oriental statistics are, however, always open to some suspicion, those of the Talmud not least so; and there is, probably, more truth in the computation of Josephus, who estimates the total number of the four houses of the priesthood, referring apparently to Ezr. ii. 36, at about 20,000 (c. *Apion*. ii. 7). Another indication of number is found in the fact that a "great multitude" could attach themselves to the "sect of the Nazarenes" (Acts vi. 7), and so have cut themselves off, sooner or later, from the Temple services, without any perceptible effect upon its ritual. It was almost inevitable that the great mass of the order, under such circumstances, should sink in character and reputation. Poor and ignorant, despised and oppressed by the more powerful members of their own body, often robbed of their scanty maintenance by the rapacity of the high-priests, they must have been to Palestine what the clergy of a later period have been to Southern Italy, a dead weight on its industry and strength, not compensating for their unproductive lives by any services rendered to the higher interests of the people. The Rabbinic classification of the priesthood, though belonging to a somewhat later date, reflects the contempt into which the order had fallen. There were—(1) the heads of the twenty-four courses, known sometimes as ἀρχιερεῖς; (2) the large number of reputable officiating but inferior priests;

\* The causes of this great reduction are not stated, but large numbers must have perished in the siege and storm of Jerusalem (1am. iv. 16), and many may have preferred remaining in Babylon.

† Another remarkable instance of the connexion between the Nazarene vow, when extended over the whole life, and a liturgical, quasi-priestly character, is found in the history of the Rechabites. They, or others like them, are named by Amos (ii. 11) as having a vocation like that of the prophets. They are received by Jeremiah into the house of the Lord, into the chamber of a prophet-priest (Jer. xxxv. 4). The solemn blessing which the prophet pronounces (xxxv. 19) goes beyond the mere perpetuation of the name. The term he uses, "to stand before me" (עֹמְדֵי לְפָנַי), is one of special significance. It is used

(3) the *plebeii*, or (to use the extreme formula of Rabbinic scorn) the "priests of the people of the earth," ignorant and unlettered; (4) those that through physical disqualifications or other causes were non-efficient members of the order, though entitled to receive their tithes (Ugolini, xii. 18) (Jost, *Judenthum*, i. 156).

*History.*—The new priesthood did not establish itself without a struggle. The rebellion of Korah at the head of a portion of the Levites as representatives of the first-born, with Dathan and Abiram as leaders of the tribe of the first-born son of Jacob (Num. xvi. 1), showed that some looked back to the old patriarchal order rather than forward to the new, and it needed the witness of "Aaron's rod that budded" to teach the people that the latter had in it a vitality and strength which had departed from the former. It may be that the exclusion of all but the sons of Aaron from the service of the Tabernacle drove those who would not resign their claim to priestly functions of some kind to the worship, possibly with a rival tabernacle, of Moloch and Chem (Am. v. 25, 26; Ez. ix. 16). Prominent as was the part taken by the priests in the daily march of the host of Israel (Num. x. 8), in the passage of the Jordan (Josh. iii. 14, 15), in the destruction of Jericho (Josh. vi. 12-16), the history of Manasse shows that within that century there was a strong tendency to relapse into the system of a *lamech*, instead of an hereditary priesthood (Judg. xviii). The frequent invasions and conquests during the period of the Judges must have interfered (as noted above) with the payment of tithes, with the maintenance of worship, with the observance of all festivals, and with this the influence of the priesthood must have been kept in the background. If the descendants of Aaron, at some unrecorded crisis in the history of Israel, rose, under Eli, into the position of national defenders, it was only to sink in his sons into the lowest depth of sacerdotal corruption. For a time the prerogative of the line of Aaron was in abeyance. The capture of the Ark, the removal of the Tabernacle from Shiloh, threw everything into confusion, and Samuel, a Levite, but not within the priestly family (Santal), sacrifices, and "comes near" to the Lord in training under Eli, his Nazarene life, his prophetic office, being regarded apparently as a special consecration (comp. August. c. *Final.* xii. 33; *De Civ. Dei*, xvii. 4). For the priesthood, as far as the people generally, the time of Samuel must have been one of a great moral reformation, while the expansion, if not the foundation, of the Schools of the Prophets, at once gave to it the aspect of an independent order, and acted as a check on its corruptions and excesses, a perpetual safeguard

emphatically of ministerial functions, like those of the prophet (1 K. xviii. 1, xviii. 15; Jer. xv. 10, or the priest (Levit. x. 8, xviii. 6-7; Judg. xx. 26). The Targum of Jonathan accordingly gives this meaning to a text. Strangely enough, we have in the history of the death of James the Just (Hegesipp. in Euseb. *H. E.* ii. 23) an indication of the fulfilment of the blessing in this point. Among the priests who are present, there is one "belonging to the Rechabim of whom Jeremiah had spoken." The mention of the house of Rechab among the "house of the scribes," in 1 Chr. ii. 55, points to something of the same nature. The title prefixed to the LXX and Vulg. to Ps. lxxxi, connects it with the "sons of Jeremiah, the first that went into captivity." Augustine takes this as the starting-point for his interpretation (*Psalm. vi. / Psal.* lxxxi.).

against the development from it of any Egyptian or Brahminic caste-system (Ewald, *Gesch. Isr.* ii. 185), standing to it in much the same relation as the monastic and mendicant orders stood, each in its turn, to the secular clergy of the Christian Church. Though Shiloh had become a deserted sanctuary, Nob (1 Sam. xxi. 1) was made for a time the centre of national worship, and the symbolic ritual of Israel was thus kept from being forgotten. The reverence which the people feel for them, and which compels Saul to have recourse to one of alien blood (Doeg the Edomite) to carry his murderous commission into act, shows that there must have been a great step upwards since the time when the sons of Eli "made men to abhor the offerings of the Lord" (1 Sam. xxi. 17, 18). The reign of Saul was, however, a time of suffering for them. He had manifested a disposition to usurp the priest's office (1 Sam. xiii. 9). The massacre of the priests at Nob showed how insecure their lives were against any unguarded or savage impulse.<sup>2</sup> They could but wait in silence for the coming of a deliverer in David. One at least among them shared his exile, and, so far as it was possible, lived in his priestly character, performing priestly acts, among the wild company of Adullam (1 Sam. xxiii. 6, 9). Others probably were sheltered by their remoteness, or found shelter in Hebron as the largest and strongest of the priestly cities. When the death of Saul set them free they came in large numbers to the camp of David, prepared apparently not only to testify their allegiance, but also to support him, armed for battle, against all rivals (1 Chr. xii. 27). They were summoned from their cities to the great restoration of the worship of Israel, when the Ark was brought up to the new capital of the kingdom (1 Chr. xv. 4). For a time, however (another proof of the strange confusion into which the religious life of the people had fallen), the Ark was not the chief centre of worship; and while the newer ritual of psalms and minstrelsy gathered round it under the ministrations of the Levites, headed by Benaiah and Jahaziel as priests (1 Chr. xvi. 5, 6), the older order of sacrifices was carried on by the priests in the tabernacle on the high-place at Gibeon (1 Chr. xvi. 37-39, xxi. 29; 2 Chr. i. 3). We cannot wonder that first David and then Solomon should have sought to guard against the evils incidental to this separation of the two orders, and to unite in one great Temple priests and Levites, the symbolic worship of sacrifice and the spiritual offering of praise.

The reigns of these two kings were naturally the culminating period of the glory of the Jewish priesthood. They had a king whose heart was with them, and who joined in their services dressed as they were (1 Chr. xv. 27), while he yet scrupulously abstained from all interference with their functions. The name which they bore was accepted (whatever explanation may be given of the fact) as the highest title of honour that could be borne by the king's sons (2 Sam. viii. 18, *supra*). They occupied high places in the king's council (1 K. iv. 2, 4), and might even take their places, as in the case of Benaiah, at the head of his armies (1 Chr. xii. 27, xxvii. 5), or be recognized, as Zabud the son of Nathan was, as the "king's

friends," the keepers of the king's conscience (1 K. iv. 5; Ewald, *Gesch.* iii. 334).

The position of the priests under the monarchy of Judah deserves a closer examination than it has yet received. The system which has been described above gave them for every week of service in the Temple twenty-three weeks in which they had no appointed work. Was it intended that they should be idle during this period? Were they actually idle? They had no territorial possessions to cultivate. The cities assigned to them and to the Levites gave but scanty sustenance to their flocks. To what employment could they turn? (1) The more devout and thoughtful found, probably, in the schools of the prophets that which satisfied them. The history of the Jews presents numerous instances of the union of the two offices. [Comp. LEVITES.] They became teaching-priests (2 Chr. xv. 3), students, and interpreters of the Divine Law. From such as these, men might be chosen by the more zealous kings to instruct the people (2 Chr. xvii. 8), or to administer justice (2 Chr. xix. 8). (2) Some perhaps, as stated above, served in the king's army. We have no ground for transferring our modern conceptions of the peacefulness of the priestly life to the remote past of the Jewish people. Priests, as we have seen, were with David at Hebron as men of war. They were the trumpeters of Abijah's army (2 Chr. xiii. 12). The Temple itself was a great armoury (2 Chr. xxiii. 9). The heroic struggles of the Maccabees were sustained chiefly by their kindred of the same family (2 Macc. viii. 1). (3) A few chosen ones might enter more deeply into the divine life, and so receive, like Zechariah, Jeremiah, Ezekiel, a special call to the office of a prophet. (4) We can hardly escape the conclusion that many did their work in the Temple of Jehovah with a divided allegiance, and acted at other times as priests of the high-places (Ewald, *Gesch.* iii. 704). Not only do we read of no protests against the sins of the idolatrous kings, except from prophets who stood forth, alone and unsupported, to bear their witness, but the priests themselves were sharers in the worship of Baal (Jer. ii. 8), of the sun and moon, and of the host of heaven (Jer. viii. 1, 2). In the very Temple itself they "ministered before their idols" (Ez. xliv. 12), and allowed others, "uncircumcised in heart, and uncircumcised in flesh," to join them (ibid. 7). They ate of unclean things and polluted the Sabbotha. There could be no other result of this departure from the true idea of the priesthood than a general degradation. Those who ceased to be true shepherds of the people found nothing in their ritual to sustain or elevate them. They became as sensual, covetous, tyrannical, as ever the clergy of the Christian Church became in its darkest periods; conspicuous as drunkards and adulterers (Is. xxviii. 7, 8, lvi. 10-12). The prophetic order, instead of acting as a check, became sharers in their corruption (Jer. v. 31; Lam. iv. 13; Zeph. iii. 4). For the most part the few efforts after better things are not the result of a spontaneous reformation, but of conformity to the wishes of a reforming king. In the one instance in which they do act spontaneously—their resistance to the usurpation of the priest's functions by Uzziah—their protest, however right in itself, was yet only too compatible with a wrong use of the office which they claimed as belonging exclusively to themselves (2 Chr. xxvi. 17). The

<sup>2</sup> It is to be noticed that while the Heb. text gives 85 as the number of priests slain, the LXX. increases it to 95. Josephus (*Ant.* vi. 12. 9) to 305.

discipline of the Captivity, however, was not without its fruits. A large proportion of the priests had either perished or were content to remain in the land of their exile; but those who did return were active in the work of restoration. Under Ezra they submitted to the stern duty of repudiating their heathen wives (Ezr. x. 18, 19). They took part—though here the Levites were the more prominent—in the instruction of the people (Ezr. iii. 2; Neh. viii. 9-13). The root-evils, however, soon reappeared. The work of the priesthood was made the instrument of covetousness. The priests of the time of Malachi required payment for every ministerial act, and would not even “shut the doors” or “kindle fire” for nought (Mal. i. 10). They “corrupted the covenant of Levi” (Mal. ii. 8). The idea of the priest as the angel, the messenger, of the Lord of Hosts, was forgotten (Mal. iii. 7; comp. Eccles. v. 6). The inevitable result was that they again lost their influence. They became “base and contemptible before all the people” (Mal. ii. 9). The office of the scribe rose in repute as that of the priest declined (Joel, *Judenth.* i. 37, 148). The sects that multiplied during the last three centuries of the national life of Judaism were proofs that the established order had failed to do its work in maintaining the religious life of the people. No great changes affected the outward position of the priests under the Persian government. When that monarchy fell before the power of Alexander, they were ready enough to transfer their allegiance.<sup>a</sup> Both the Persian government and Alexander had, however, respected the religion of their subjects; and the former had conferred on the priests immunities from taxation (Ezr. vi. 8, 9, vii. 24; Jos. *Ant.* xi. 8). The degree to which this recognition was carried by the immediate successors of Alexander is shown by the work of restoration accomplished by Simon the son of Onias (Eccles. i. 12-20); and the position which they thus occupied in the eyes of the people, not less than the devotion with which his zeal inspired them, prepared them doubtless for the great struggle which was coming, and in which, under the priestly Maccabees, they were the chief defenders of their country's freedom. Some, indeed, at that crisis, were found among the apostates. Under the guidance of Jason (the heathenised form of Joshua) they forsook the customs of their fathers; and they who, as priests, were to be patterns of a self-respecting purity, left their work in the Temple to run naked in the circus which the Syrian king had opened in Jerusalem (2 Macc. iv. 13, 14). Some, at an earlier period, had joined the schismatic Onias in establishing a rival worship (Jos. *Ant.* xii. 3, §4). The majority, however, were true-hearted; and the Maccabean struggle which left the government of the country in the hands of their own order, and, until the Roman conquest, with a certain measure of independence, must have given to the higher

<sup>a</sup> A real submission is hardly concealed by the narrative of the Jewish historian. The account of the effect produced on the mind of the Macedonian king by the solemn procession of priests in their linen ephods (Joseph. *Ant.* xi. 8), stands probably on the same footing as Livy's account of the retreat of Porsena from the walls of unconquered Rome.

<sup>b</sup> It deserves notice that from these priests may have come the statements as to what passed within the Temple

members of the order a position of security and influence. The martyr-spirit showed itself again in the calmness with which they carried on the ministrations in the Temple, when Jerusalem was besieged by Pompey, till they were slain even in the act of sacrificing (Jos. *Ant.* xiv. 4, §3; *B. J.* i. 7, §5). The reign of Herod, on the other hand, in which the high-priesthood was kept in abeyance, or transferred from one to another at the will of one who was an alien by birth and half a heathen in character, must have tended to depress them.

It will be interesting to bring together the few facts that indicate their position in the N. T. period of their history. The division into four-and-twenty courses is still maintained (Luke i. 5; Joseph. *Vit.* 1), and the heads of these courses together with those who have held the high-priesthood (the office no longer lasting for life), are “chief priests” (*ἀρχιερεῖς*) by courtesy (Carpzov. *App. Crit.* p. 102), and take their place in the Sanhedrim. The number scattered throughout Palestine was, as has been stated, very large. Of these the greater number were poor and ignorant, despised by the more powerful members of their own order, not gaining the respect or affection of the people. The picture of cowardly selfishness in the priest of the parable of Luke x. 31, can hardly be thought of as other than a representative one, indicating the estimate commonly and truly formed of the character of the class. The priestly order, like the nation, was divided between contending sects. The influence of Hyrcanus, himself in the latter part of his life a Sadducee (Joseph. *Ant.* xiii. 10, §6), had probably made the tenets of that party popular among the wealthier and more powerful members, and the chief priests of the Gospels and the Acts, the whole *ἀρχιεπισκοπὴ γένος* (Acts iv. 1, 6, v. 17) were apparently consistent Sadducees, sometimes combining with the Pharisees in the Sanhedrim, sometimes thwarted by them, persecuting the followers of Jesus because they preached the resurrection of the dead. The great multitude (*ὄχλος*), on the other hand, who received that testimony<sup>b</sup> (Acts vi. 7) must have been free from, or must have overcome Sadducean prejudices. It was not strange that those who did not welcome the truth which would have raised them to a higher life, should sink lower and lower into an ignorant and ferocious fanaticism. Few stranger contrasts meet us in the history of religion than that presented in the life of the priesthood in the last half-century of the Temple, now going through the solemn sacrificial rites, and joining in the noblest hymns, now raising a fierce clamour at anything which seemed to them a profanation of the sanctuary, and rushing to dash out the brains of the bold or incautious intruder,<sup>c</sup> or of one of their own order who might enter while under some ceremonial defilement, or with a half-humorous cruelty setting fire to the clothes of the Levites who were found sleeping when they ought to have been watching at their posts (Lightfoot, *Temple*

at the time of the Crucifixion (Matt. xxvii. 51), and that these facts may have had some influence in determining their belief. They, at any rate, would be brought into frequent contact with the teachers who continued daily in the Temple and taught in Solomon's porch (Acts v. 12).

<sup>c</sup> It belonged to the priests to act as sentinels over the Holy Place, as to the Levites to guard the wider area of the precincts of the Temple (Ugolini xiii. 1062).

*Script.*, c. 1.). The rivalry which led the Levites to claim privileges which had hitherto belonged to the priests has been already noticed. [LEVITES.] In the scenes of the last tragedy of Jewish history the order passes away, without honour, "dying as a fool dieth." The high-priesthood is given to the lowest and vilest of the adherents of the frenzied Zealots (Jos. B. J. iv. 3, §6). Other priests appear as deserting to the enemy (*Ibid.* vi. 6, §1). It is from a priest that Titus receives the lamps, and gems, and costly raiment of the sanctuary (*Ibid.* vi. 8, §3). Priests report to their conquerors the terrible utterance "Let us depart," on the last Pentecost ever celebrated in the Temple (*Ibid.* vi. 5, §3). It is a priest who fills up the degradation of his order by dwelling on the fall of his country with a cold-blooded satisfaction, and finding in Titus the fulfilment of the Messianic prophecies of the O. T. (*Ibid.* vi. 5, §4). The destruction of Jerusalem deprived the order at one blow of all but an honorary distinction. Their occupation was gone. Many families must have altogether lost their genealogies. Those who still prided themselves on their descent, were no longer safe against the claims of pretenders. The jealousies of the lettered class, which had been kept under some restraint as long as the Temple stood, now had full play, and the influence of the Rabbis increased with the fall of the priesthood. Their position in mediæval and modern Judaism has never risen above that of complimentary recognition. Those who claim to take their place among the sons of Aaron, are entitled to receive the redemption-money of the first-born, to take the Law from its chest, to pronounce the benediction in the synagogues (Ugolini, xii. 48).

The language of the N. T. writers in relation to the priesthood ought not to be passed over. They recognize in Christ, the first-born, the king, the Anointed, the representative of the true primeval priesthood after the order of Melchizedek (Heb. vii., viii.), from which that of Aaron, however necessary for the time, is now seen to have been a deflection. But there is no trace of an order in the new Christian society, bearing the name, and exercising functions like those of the priests of the older Covenant. The Synagogue and not the Temple furnishes the pattern for the organization of the Church. The idea which pervades the teaching of the Epistles is that of an universal priesthood. All true believers are made kings and priests (Rev. i. 6; 1 Pet. ii. 9), offer spiritual sacrifices (Rom. xii. 1),

may draw near, may enter into the holiest (Heb. x. 19-22) as having received a true priestly consecration. They too have been washed and sprinkled as the sons of Aaron were (Heb. x. 22). It was the thought of a succeeding age that the old classification of the high-priest, priests, and Levites was reproduced in the bishops, priests, and deacons of the Christian Church.<sup>4</sup> The idea which was thus expressed rested, it is true, on the broad analogy of a threefold gradation, and the terms, "priest," "altar," "sacrifice," might be used without involving more than a legitimate symbolism, but they brought with them the inevitable danger of reproducing and perpetuating in the history of the Christian Church many of the feelings which belonged to Judaism, and ought to have been left behind with it. If the evil has not proved so fatal to the life of Christendom as it might have done, it is because no bishop or pope, however much he might exaggerate the harmony of the two systems, has ever dreamt of making the Christian priesthood hereditary. We have perhaps reason to be thankful that two errors tend to neutralize each other, and that the age which witnessed the most extravagant sacerdotalism was one in which the celibacy of the clergy was first exalted, then urged, and at last enforced.

The account here given has been based on the belief that the books of the O. T. give a trustworthy account of the origin and history of the priesthood of Israel. Those who question their authority have done so, for the most part, on the strength of some preconceived theory. Such a hierarchy as the Pentateuch prescribes, is thought impossible in the earlier stages of national life, and therefore the reigns of David and Solomon are looked on, not as the restoration, but as the starting-point of the order (Von Bohlen, *Die Genesis*, Einl. §16). It is alleged that there could have been no tribe like that of Levi, for the consecration of a whole tribe is without a parallel in history (Vatke, *Bibl. Theol.* i. p. 222). Deuteronomy, assumed for once to be older than the three books which precede it, represents the titles of the priest and Levite as standing on the same footing, and the distinction between them is therefore the work of a later period (Georg. *Die älteren Jüd. Feste*, p. 45, 51; comp. Bähr *Symbolik*, b. ii. c. i. §1, whence these references are taken). It is hardly necessary here to do more than state these theories. [E. H. P.]

**PRINCE, PRINCESS.** The only special uses of the word "prince" are—1. "Princes of

<sup>4</sup> The history of language presents few stranger facts than those connected with these words. Priest, our only equivalent for *iepeis*, comes to us from the word which was chosen because it excluded the idea of a sacerdotal character. *Bishop* has narrowly escaped a like perversion, occurring, as it does constantly, in Wyclif's version as the translation of *ἀρχιεπίσκοπος* (e. g. John xviii. 15, Heb. viii. 1).

1. *כֹּהֵן*, only in a few places; commonly "priest."

2. *נָשִׂיא*; *ἀρχων*, *ὁ ἡγουμένος*; *dux*; applied to Messiah (Dan. ix. 25).

3. *רָצִי*, properly "willing," chiefly in poet. (Gen. p. 653); *ἀρχων*; *princeps*.

4. *הַיָּחִיד*, from *הָיָה*, "prince," an anointed One; *ἀρχων*; *princeps*; also in A. V. "duke" (Job. xlii. 21).

5. *רֹאשׁ*, verb. adj. from *רָאָה*, "raise;" *ἀρχων ἡγουμένος*, *ἡγεμὼν*, *βασιλεὺς*; *princeps*, *dux*; also in A. V. "ruler," "chief," "captain." This word appears on the name of Simon Maccabæus (Gen. 917).

6. *סַרְסַר*; *ἀρχηγός*, *ἀρχων*; *princeps*; also "captain" and "ruler."

7. *גָּבִיר*, an adj. "great," also as a subst. "captain," and used in composition, as *Rab-saris*; *ἀρχων ἡγεμὼν*; *optimus*.

8. *רִיבִי*, part. of *רָבַע*, "bear," a poet. word; *σαρδάτης*; *δυναστής*; *princeps*, *legum conditor*.

9. *בָּכַר*; *ἀρχων*; *princeps*; also in A. V. "captain" "ruler," prefixed to words of office, as "chief-baker," &c. *עֲרֵךְ*; *ἀρχουσα*; *regina*.

10. *שָׂרִיס*, "ruler," "captain;" *שָׂרִיסָא*, "captain," "prince;" *πρωτεύων*; *dux*.

11. In plur. only, *מַלְכִּים*; *βασιλεῖς*; akin to Sanskr. *prathamā primus*; *ἐνδοξος*; *inclayi* (Esth. i. 3).

12. *מַגִּיסִים*; *ἀρχοντες*; *magistratus*; usually "rulers."

13. *שְׁלֵחִים*; *πρέσβεις*; *legati*; only in Pa. Levit. 31.

14. *מַלְכֵי מִדְּבָרִים* and *מַלְכֵי מִדְּבָרִים*; *ἡγεῖς*, *ἡγετοί*; *satrapæ*; a Persian word.

territory as were peaceable and could be held without force of arms (Suet. Oct. 47; Strabo, xvii. p. 840; Dio Cass. liii. 12), an arrangement which remained with frequent alterations till the 3rd century. Over these senatorial provinces the senate appointed by lot yearly an officer, who was called "proconsul" (Dio Cass. liii. 13), who exercised purely civil functions, had no power over life and death, and was attended by one or more legates (Dio Cass. liii. 14). He was neither girt with the sword nor wore the military dress (Dio Cass. liii. 13). The provinces were in consequence called "proconsular." With the exception of Africa and Asia, which were assigned to men who had passed the office of consul, the senatorial provinces were given to those who had been praetors, and were divided by lot each year among those who had held this office five years previously. Their term of office was one year. Among the senatorial provinces in the first arrangement by Augustus, were Cyprus, Achaia, and Asia within the Halys and Taurus (Strabo, xvii. p. 842). The first and last of these are alluded to in Acts xiii. 7, 8, 12, xiv. 38, as under the government of proconsuls. Achaia became an imperial province in the second year of Tiberius, A.D. 16, and was governed by a procurator (Tac. Ann. i. 76), but was restored to the senate by Claudius (Suet. Claud. 25), and therefore Gallio, before whom St. Paul was brought, is rightly termed "proconsul" in Acts xviii. 12. Cyprus also, after the battle of Actium, was first made an imperial province (Dio Cass. liii. 12), but five years afterwards (A.D. 22) it was given to the senate, and is reckoned by Strabo (xvii. p. 840) ninth among the provinces of the people governed by στρατηγοί, as Achaia is the seventh. These στρατηγοί, or praetors, had the title of proconsul. Cyprus and Narbonese Gaul were given to the senate in exchange for Dalmatia, and thus, says Dio Cassius (liv. 4), proconsuls (ἀποκρίσεις) began to be sent to those nations. In Boeckh's *Corpus Inscriptionum*, No. 2631, is the following relating to Cyprus: ἡ πόλις Κόρινθος ἰσχυρὰ Κόρινθον ἀνέστησαν ἀγέλας. This Quintus Julius Cordus appears to have been proconsul of Cyprus before the 12th year of Claudius. He is mentioned in the next inscription (No. 2632) as the predecessor of another proconsul, Lucius Annii Bassus. The date of this last inscription is the 12th year of Claudius, A.D. 52. The name of another proconsul of Cyprus in the time of Claudius occurs on a copper coin, of which an engraving is given in vol. i. p. 377. A coin of Ephesus [see vol. i. 564] illustrates the usage of the word ἀποκρίσεις in Acts xiii. 38. [W. A. W.]

**PROCURATOR.** The Greek ἡγεμών,\* rendered "governor" in the A. V., is applied in the N. T. to the officer who presided over the imperial province of Judaea. It is used of Pontius Pilate (Matt. xxvii. 2, of Felix (Acts xxi. 31, xiv. 3), and of Festus (Acts xxi. 30). In all these cases the Vulgate equivalent is *praeses*. The office of procurator (ἡγεμονία) is mentioned in Luke iii. 1, and in this passage the rendering of the Vulgate is more close (*procurator Pontio Pilato Judaeam*). It is

explained, under the head of *Proconsul*, that after the battle of Actium, B.C. 27, the provinces of the Roman empire were divided by Augustus into two portions, giving some to the senate, and reserving to himself the rest. The imperial provinces were administered by legates, called *legati Augusti pro praetore*, sometimes with the addition of *consulari potestate*, and sometimes *legati consulares*, or *legati* or *consulares* alone. They were selected from among men who had been consuls or praetors, and sometimes from the inferior senators (Dio Cass. liii. 13, 15). Their term of office was indefinite, and subject only to the will of the emperor (Dio Cass. liii. 13). These officers were also called *praesides*, a term which in later times was applied indifferently to the governors both of the senatorial and of the imperial provinces (Suet. Claud. 17). They were attended by six lictors, used the military dress, and wore the sword (Dio Cass. liii. 13). No quaestor came into the emperor's provinces, but the property and revenues of the imperial treasury were administered by the *Rationales*, *Procuratores* and *Actores* of the emperor, who were chosen from among his freedmen, or from among the knights (Tac. Hist. v. 9; Dio Cass. liii. 15). These procurators were sent both to the imperial and to the senatorial provinces (Dio Cass. liii. 15<sup>b</sup>). Sometimes a province was governed by a procurator with the functions of a praeses. This was especially the case with the smaller provinces and the outlying districts of a larger province; and such is the relation in which Judaea stood to Syria. After the deposition of Archelaus Judaea was annexed to Syria, and the first procurator was Coponius, who was sent out with Quirinus to take a census of the property of the Jews and to confiscate that of Archelaus (Jos. Ant. xviii. 1, §1). His successor was Marcus Ambivivus, then Annus Rufus, in whose time the emperor Augustus died. Tiberius sent Valerius Gratus, who was procurator for eleven years, and was succeeded by Pontius Pilate (Jos. Ant. xviii. 2, §2), who is called by Josephus (Ant. xviii. 3, §1) ἡγεμών, as he is in the N. T. He was subject to the governor (*praeses*) of Syria, for the council of the Samaritans denounced Pilate to Vitellius, who sent him to Rome and put one of his own friends, Marcellus, in his place (Jos. Ant. xviii. 4, §2). The headquarters of the procurator were at Caesarea (Jos. B. J. ii. 9, §2; Acts xlii. 23), where he had a judgment-seat (Acts xxv. 6) in the audience chamber (Acts xxv. 23\*), and was assisted by a council (Acts xxv. 12) whom he consulted in cases of difficulty, the *assessores* (Suet. Galb. 14), or ἡγεμόνες, who are mentioned by Josephus (B. J. ii. 16, §1) as having been consulted by Cestius, the governor of Syria, when certain charges were made against Florus, the procurator of Judaea. More important cases were laid before the emperor (Acts xxv. 12; comp. Jos. Ant. xx. 6, §2). The procurator, as the representative of the emperor, had the power of life and death over his subjects (Dio Cass. liii. 14; Matt. xxvii. 26), which was denied to the proconsul. In the N. T. we see the procurator only in his judicial capacity. Thus Christ is brought before Pontius

Stianus, proconsul of Asia, by P. Coer, a Roman knight, and Helius, a freedman, who had the care of the imperial revenues in Asia (*rei famulatus principis in Asia impositus*).

\* Unless the ἀποκρίσεις (A. V. "place of bearing") was the great stadium mentioned by Josephus (B. J. i. 9, §2).

\* ἡγεμών is the general term, which is applied also to the governor (*praeses*) of the imperial province of Syria (Luke ii. 2); the Greek equivalent of *procurator* is strictly *ἐκπαιστής* (Jos. Ant. xx. 6, §2, 8, §5; comp. Jos. x. 2, §1), and his office is called *ἐκπαιστήριον* (Jos. Ant. xx. 6, §1). A curious illustration of this is given by Tacitus (Ann. xii. 1), where he describes the poisoning of Junia-

Pilate as a political offender (Matt. xxvii. 2, 11), and the accusation is heard by the procurator, who is seated on the judgment-seat (Matt. xxvii. 19). Felix heard St. Paul's accusation and defence from the judgment-seat at Caesarea (Acts xxiv.), which was in the open air in the great stadium (Jos. B. J. ii. 9, §2), and St. Paul calls him "judge" (Acts xxiv. 10), as if this term described his chief functions. The procurator (*ἡγεμῶν*), is again alluded to in his judicial capacity in 1 Pet. ii. 14. He was attended by a cohort as body-guard (Matt. xxvii. 27), and apparently went up to Jerusalem at the time of the high festivals, and there resided in the palace of Herod (Jos. B. J. ii. 14, §3; Philo, *De Leg. ad Caium*, §37, ii. 589, ed. Maug.), in which was the *praetorium*, or "judgment-hall," as it is rendered in the A. V. (Matt. xxvii. 27; Mark xv. 16; comp. Acts xxiii. 35). Sometimes it appears Jerusalem was made his winter quarters (Jos. Ant. xviii. 3, §1). The High-Priest was appointed and removed at the will of the procurator (Jos. Ant. xviii. 2, §2). Of the oppression and extortion practised by one of these officers, Gessius Florus, which resulted in open rebellion, we have an account in Josephus (Ant. xx. 11, §1; B. J. ii. 14, §2). The same laws held both for the governors of the imperial and senatorial provinces, that they could not raise a levy or exact more than an appointed sum of money from their subjects, and that when their successors came they were to return to Rome within three months (Dio Cass. liii. 15). For further information see Walter, *Gesch. des Röm. Rechts*. [W. A. W.]

#### PROPHET (נָבִי: *προφήτης*: *propheta*).

I. THE NAME.—The ordinary Hebrew word for prophet is *nābi* (נָבִי), derived from the verb נָבָה, connected by Gesenius with נָבַה, "to bubble forth," like a fountain. If this etymology is correct, the substantive would signify either a person who, as it were, involuntarily bursts forth with spiritual utterances under the divine influence (cf. Ps. xlv. 1, "My heart is *bubbling up* of a good matter") or simply one who pours forth words. The analogy of the word נָבַה (*nāṭaph*), which has the force of "dropping" as honey, and is used by Micah (ii. 6, 11), Ezekiel (xxi. 2), and Amos (vii. 16), in the sense of prophesying, points to the last signification. The verb נָבָה is found only in the *niphāl* and *hitpaēl*, a peculiarity which it shares with many other words expressive of speech (cf. loqui, fari, vociferari, concionari, φηγγόμεναι, as well as *uarréoumai* and *vaticinari*). Bunsen (*Gott in Geschichte*, p. 141) and Davidson (*Intr. Old Test.* ii.

430) suppose *Nābi* to signify the man to whom announcements are made by God, i. e. inspired. But it is more in accordance with the etymology and usage of the word to regard it as signifying (actively) one who announces or pours forth the declarations of God. The latter signification is preferred by Ewald, Hävernick, Oehler, Hengstenberg, Bleek, Lee, Pusey, McCaul, and the great majority of Biblical critics.

Two other Hebrew words are used to designate a prophet, רוֹאֵה, *Roēh*, and חֹזֶה, *Chozeh*, both signifying one who sees. They are rendered in the A. V. by "seer;" in the LXX. usually by *θεῖστρος* or *δραῦν*, sometimes by *προφήτης* (1 Chr. xvi. 28; 2 Chr. xvi. 7, 10). The three words seem to be contrasted with each other in 1 Chron. xxix. 29. "The acts of David the king, first and last, behold they are written in the book of Samuel the seer (*Roēh*), and in the book of Nathan the prophet (*Nābi*), and in the book of Gad the seer (*Chozeh*)." *Roēh* is a title almost appropriated to Samuel. It is only used ten times, and in seven of these it is applied to Samuel (1 Sam. ix. 9, 11, 18, 19; 1 Chr. ix. 22; xxvi. 28; xxix. 29). On two other occasions it is applied to Hanani (2 Chr. xvi. 7, 10). Once it is used by Isaiah (Is. xxx. 10) with no reference to any particular person. It was superseded in general use by the word *Nābi*, which Samuel (*himself* entitled *Nābi* as well as *Roēh*, 1 Sam. iii. 20; 2 Chr. xxxv. 18) appears to have revived after a period of desuetude (1 Sam. ix. 9, and to have applied to the prophets organized by him.<sup>a</sup> The verb נָסָה, from which it is derived, is the common prose word signifying "to see;" חִוּהוּ—whence the substantive חֹזֶה, *Chozeh*, is derived—is more poetical. *Chozeh* is rarely found except in the Books of the Chronicles, but חִוּוּ is the word constantly used for the prophetic vision. It is found in the Pentateuch, in Samuel, in the Chronicles, in Job, and in most of the prophets.

Whether there is any difference in the usage of these three words, and, if any, what that difference is, has been much debated (see Witsius, *Miscell. Sacra*, i. 1, §19; Carpzovius, *Intr. ad Libros Canon. V. T.* iii. 1, §2; Winer, *Real-Wörterbuch*, art. "Propheten"). Hävernick (*Einkleitung*, Th. 1; *Abth.* . . s. 56) considers *Nābi* to express the title of those who officially belonged to the prophetic order, while *Roēh* and *Chozeh* denote those who received a prophetic revelation. Dr. Lee (*Inspiration of Holy Scripture*, p. 543), agrees with Hävernick in his explanation of *Nābi*, but he identifies *Roēh* in meaning rather with *Nābi* than with *Chozeh*. He further throws out a suggestion that

<sup>a</sup> In 1 Sam. ix. 9 we read, "He that is now called a prophet (*Nābi*) was beforetime called a seer (*Roēh*)," from whence Dr. Stanley (*Lect. on Jewish Church*) has concluded that *Roēh* was "the oldest designation of the prophetic office," "superseded by *Nābi* shortly after Samuel's time, when *Nābi* first came into use" (*Lect. xlviii.*, xix.). This seems opposed to the fact that *Nābi* is the word commonly used in the Pentateuch, whereas *Roēh* does not appear until the days of Samuel. The passage in the book of Samuel is clearly a parenthetical insertion, perhaps made by the *Nābi* Nathan (or whoever was the original author of the book), perhaps added at a later date, with the view of explaining how it was that Samuel bore the title of *Roēh*, instead of the now usual appellation of *Nābi*. To the writer the days of Samuel were "beforetime," and he explains that in those ancient days, that is the days of Samuel, the word used for prophet was *Roēh*, not *Nābi*. But that does not

imply that *Roēh* was the primitive word, and that *Nābi* first came into use subsequently to Samuel (see Hengstenberg, *Beiträge zur Einleitung ins A. T.* ii. 33). Dr. Stanley represents *Chozeh* as "another antique title." But on no sufficient grounds. *Chozeh* is first found in 2 Sam. xxiv. 11; so that it does not seem to have come into use until *Roēh* had almost disappeared. It is also found in the books of Kings (2 K. xvi. 17; and Chronicles frequently). In Amos (vii. 12), *Amiah* (xxix. 10), *Micah* (iii. 7), and the derivatives of the verb *chāzāh* are used by the prophets to designate their visions down to the Captivity (cf. Is. i. 1; Dan. viii. 1, Zech. xiii. 4). The derivatives of *nāṭāh* are rarer, and, as being prose words, are chiefly used by Daniel (cf. E. i. 1; Dan. x. 7). On examination we find that *Nābi* existed before and after and alongside of both *Roēh* and *Chozeh*, but that *Chozeh* was somewhat more modern than *Roēh*.

*Chozeh* is the special designation of the prophet attached to the royal household. In 2 Sam. xxiv. 11, Gad is described as "the prophet (*Nābi*) Gad, David's seer (*Chozeh*)" and elsewhere he is called "David's seer (*Chozeh*)" (1 Chr. xxi. 9), "the king's seer (*Chozeh*)" (2 Chr. xxix. 25). "The case of Gad," Dr. Lee thinks, "affords the clue to the difficulty, as it clearly indicates that attached to the royal establishment there was usually an individual styled 'the king's seer,' who might at the same time be a *Nābi*." The suggestion is ingenious (see, in addition to places quoted above, 1 Chr. xxv. 5, xxix. 29; 2 Chr. xxix. 30, xxiv. 15), but it was only David (possibly also Manasseh, 2 Chr. xxxiii. 18) who, so far as we read, had this seer attached to his person; and in any case there is nothing in the word *Chozeh* to denote the relation of the prophet to the king, but only in the connection in which it stands with the word king. On the whole it would seem that the same persons are designated by the three words *Nābi*, *Rōh*, and *Chozeh*; the last two titles being derived from the prophets' power of seeing the visions presented to them by God, the first from their function of revealing and proclaiming God's truth to men. When Gregory Naz. (*Or.* 23) calls Ezekeil *ὁ τῶν μετὰ τὸν ἐξουσίαν καὶ ἐγγρηρὴς ἀνταρπῶν*, he gives a sufficiently exact translation of the two titles *Chozeh* or *Rōh*, and *Nābi*.

The word *Nābi* is uniformly translated in the LXX. by *προφήτης*, and in the A. V. by "prophet." In classical Greek, *προφήτης* signifies one who speaks for another, specially one who speaks for a god and so interprets his will to man (Liddell & Scott, s. v.). Hence its essential meaning is "an interpreter." Thus Apollo is a *προφήτης* as being the interpreter of Zeus (Aesch. *Eum.* 19). Poets are the Prophets of the Muses, as being their interpreters (Plat. *Phaedr.* 262 D). The *προφῆται* attached to heathen temples are so named from their interpreting the oracles delivered by the inspired and unconscious *μῦσται* (Plat. *Tim.* 72 B; Herod. vii. 111, note, ed. Baehr). We have Plato's authority for deriving *μῦσται* from *μῦστος* (i. e.). The use of the word *προφήτης* in its modern sense is post-classical, and is derived from the LXX.

From the mediæval use of the word *προφητεία*, prophecy passed into the English language in the sense of prediction, and this sense it has retained as its popular meaning (see Richardson, s. v.). The larger sense of interpretation has not, however, been lost. Thus we find in Bacon, "An exercise commonly called *prophesying*, which was this: that the ministers within a precinct did meet upon a week day in some principal town, where there was some ancient grave minister that was president, and an auditory admitted of gentlemen or other persons of leisure. Then every minister successively, beginning with the youngest, did handle one and the same part of Scripture, spending severally some quarter of an hour or better, and in the whole some two hours. And so the exercise being begun and concluded with prayer, and the president giving a text for the next meeting, the assembly was dissolved" (*Pacification of the Church*). This mean-

It seems to be incorrect to say that the English word was "originally" used in the wider sense of "preaching," and that it became "limited" to the meaning of "predicting," in the seventeenth century, in consequence of "an etymological mistake" (Stanley, *loc. cit.* xix. xx.). The word entered into the English language in its sense of predicting. It could not have been otherwise, for at the time of the formation of the English language, the word *προ-*

ing of the word is made further familiar to us by the title of Jeremy Taylor's treatise "On Liberty of Prophesying." Nor was there any risk of the title of a book published in our own days, "On the Prophetical Office of the Church" (Oxf. 1838), being misunderstood. In fact the English word prophet, like the word inspiration, has always been used in a larger and in a closer sense. In the larger sense our Lord Jesus Christ is a "prophet," Moses is a "prophet," Mahomet is a "prophet." The expression means that they proclaimed and published a new religious dispensation. In a similar though not identical sense, the Church is said to have a "prophetical," i. e. an expository and interpretative office. But in its closer sense the word, according to usage though not according to etymology, involves the idea of foresight. And this is and always has been its more usual acceptation.<sup>b</sup> The different meanings, or shades of meaning, in which the abstract noun is employed in Scripture, have been drawn out by Locke as follows:—"Prophecy comprehends three things; prediction; singing by the dictate of the Spirit; and understanding and explaining the mysterious, hidden sense of Scripture, by an immediate illumination and motion of the Spirit" (*Paraphrase of 1 Cor.* xii. note, p. 121, Lond. 1742). It is in virtue of this last signification of the word, that the prophets of the N. T. are so called (1 Cor. xii.): by virtue of the second, that the sons of Asaph, &c. are said to have "prophesied with a harp" (1 Chr. xxv. 3), and Miriam and Deborah are termed "prophetesses." That the idea of potential if not actual prediction enters into the conception expressed by the word prophecy, when that word is used to designate the function of the Hebrew prophets, seems to be proved by the following passages of Scripture, Deut. xviii. 22; Jer. xxviii. 9; Acts ii. 30, iii. 18, 21; 1 Pet. i. 10; 2 Pet. i. 19, 20, iii. 2. Etymologically, however, it is certain that neither prescience nor prediction are implied by the term used in the Hebrew, Greek, or English language.

II. PROPHETICAL ORDER.—The sacerdotal order was originally the instrument by which the members of the Jewish Theocracy were taught and governed in things spiritual. Feast and fast, sacrifice and offering, rite and ceremony, constituted a varied and ever-recurring system of training and teaching by type and symbol. To the priests, too, was entrusted the work of "teaching the children of Israel all the statutes which the Lord hath spoken unto them by the hand of Moses" (Lev. x. 11). Teaching by act and teaching by word were alike their task. This task they adequately fulfilled for some hundred or more years after the giving of the Law at Mount Sinai. But during the time of the Judges, the priesthood sank into a state of degeneracy, and the people were no longer affected by the acted lessons of the ceremonial service. They required less enigmatic warnings and exhortations. Under these circumstances a new moral power was evoked—the Prophetic Order. Samuel, himself a Levite, of the family of Kohath (1 Chr. vi. 28), and almost certainly a

*φῦρεῖν* had, by usage, assumed popularly the meaning of prediction. And we find it ordinarily employed, by early as well as by late writers, in this sense (see Polydore Virgil, *History of England*, iv. 161, Camden, ed. 1846; *Covenanter Mysteries*, p. 65, Shakespeare Soc. Ed., 1841, and Richardson, s. v.). It is probable that the meaning was "limited" to "prediction" as much and as little before the seventeenth century as it has been since.

priest,<sup>c</sup> was the instrument used at once for effecting a reform in the sacerdotal order (1 Chr. ix. 22), and for giving to the prophets a position of importance which they had never before held. So important was the work wrought by him, that he is classed in Holy Scripture with Moses (Jer. xv. 1; Ps. xcix. 6; Acts iii. 24), Samuel being the great religious reformer and organizer of the prophetic order, as Moses was the great legislator and founder of the priestly rule. Nevertheless, it is not to be supposed that Samuel created the prophetic order as a new thing before unknown. The germs both of the prophetic and of the regal order are found in the Law as given to the Israelites by Moses (Deut. xiii. 1, xviii. 20, xvii. 18), but they were not yet developed, because there was not yet the demand for them. Samuel, who evolved the one, himself saw the evolution of the other. The title of prophet is found before the legislation of Mount Sinai. When Abraham is called a prophet (Gen. xx. 7), it is probably in the sense of a friend of God, to whom He makes known His will; and in the same sense the name seems to be applied to the patriarchs in general (Ps. cv. 15).<sup>d</sup> Moses is more specifically a prophet, as being a proclaimer of a new dispensation, a revealer of God's will, and in virtue of his divinely inspired songs (Ex. xv.; Deut. xxxii., xxxiii.; Ps. xc.), but his main work was not prophetic, and he is therefore formally distinguished from prophets (Num. xii. 6) as well as classed with them (Deut. xviii. 15, xxxiv. 10). Aaron is the prophet of Moses (Ex. vii. 1); Miriam (Ex. xv. 20) is a prophetess; and we find the prophetic gift in the elders who "prophesied" when "the Spirit of the Lord rested upon them," and in Eldad and Medad, who "prophesied in the camp" (Num. xi. 27). At the time of the sedition of Miriam, the possible existence of prophets is recognized (Num. xii. 6). In the days of the Judges we find that Deborah (Judg. iv. 4) is a prophetess; a prophet (Judg. vi. 8) rebukes and exhorts the Israelites when oppressed by the Midianites; and, in Samuel's childhood, "a man of God" predicts to Eli the death of his two sons, and the curse that was to fall on his descendants (1 Sam. ii. 27).

Samuel took measures to make his work of restoration permanent as well as effective for the moment. For this purpose he instituted Companies, or Colleges of Prophets. One we find in his lifetime at Ramah (1 Sam. xix. 19, 20); others

afterwards at 5), Gilgal (vi. 1). The to those of gathered pre trained for destined to tutions, that ing of the seems never of men to 1 The apocryph ix. 27, xiv. represent th have consis Sometimes t xxii. 6; 2 prophet, pr called their (2 K. ii. 3) office by th la. lxi. 1; sons. <sup>c</sup> Dr. Stanley (*loc. cit.* xviii.) declares it to be "doubtful if he was of Levitical descent, and certain that he was not a priest." If the record of 1 Chr. vi. 28 is correct, it is certain that he was a Levite by descent though an Ephraimite by habitation (1 Sam. i. 1). There is every probability that he was a priest (cf. 1 Sam. i. 22, ii. 11, 18, vii. 5, 17, x. 1, xiii. 11) and no presumption to the contrary. The fact on which Dr. Stanley relies, that Samuel lived "not at Gibeon or at Nob but at Ramah," and that "the prophetic schools were at Ramah, and at Bethel, and at Gilgal, not at Hebron and Anathoth," does not suffice to raise a presumption. As Judge, Samuel would have lived where it was most suitable for the judge to dwell. Of the three colleges, that at Ramah was alone founded by Samuel, of course where he lived himself, and even where Ramah was we do not know: one of the latest hypotheses places it two miles from Hebron.

<sup>d</sup> According to Hengstenberg's view of prophecy, Abraham was a prophet because he received revelations by the means of dream and vision (Gen. xv. 17).

<sup>e</sup> There seems no sufficient ground for the common

statement th in the Israel that they c nor again f existed from (*Sacred Poet* that their p 1 Sam. vii. 1 We have, b except in the "It is a suppose the prophets and antagonism. (4. 10), but a hierarchy. (ii. 1), but (cf. i. 14). I writings as 'ing as Levi 'prophetic' 'angelical' to

the question addressed to the Shunamite by her husband, "Wherefore wilt thou go to him to-day? It is neither new moon nor Sabbath" (2 K. iv. 23), it appears that weekly and monthly religious meetings were held as an ordinary practice by the prophets (see Patrick, *Comm. in loc.*). Thus we find that "Elisha sat in his house," engaged in his official occupation (cf. Ezek. viii. 1, xiv. 1, xx. 1), "and the elders sat with him" (2 K. vi. 32), when the King of Israel sent to slay him. It was at these meetings, probably, that many of the warnings and exhortations on morality and spiritual religion were addressed by the prophets to their countrymen. The general appearance and life of the prophet were very similar to those of the Eastern dervish at the present day. His dress was a hairy garment, girt with a leathern girdle (Is. xx. 2; Zech. xiii. 4; Matt. iii. 4). He was married or unmarried as he chose; but his manner of life and diet were stern and austere (2 K. iv. 10, 38; 1 K. xix. 6; Matt. iii. 4).

III. THE PROPHETIC GIFT.—We have been speaking of the *Prophetic Order*. To belong to the prophetic order and to possess the prophetic gift are not convertible terms. There might be members of the prophetic order to whom the gift of prophecy was not vouchsafed. There might be inspired prophets, who did not belong to the prophetic order. Generally, the inspired prophet came from the College of the Prophets, and belonged to the prophetic order; but this was not always the case. In the instance of the Prophet Amos, the rule and the exception are both manifested. When Amaziah, the idolatrous Israelitish priest, threatens the prophet, and desires him to "flee away into the land of Judah, and there eat bread and prophesy there, but not to prophesy again any more at Bethel," Amos in reply says, "I was no prophet, neither was I a prophet's son; but I was an herdsman, and a gatherer of sycamore fruit; and the Lord took me as I followed the flock, and the Lord said unto me, Go prophesy unto my people Israel" (vii. 14). That is, though called to the prophetic office, he did not belong to the prophetic order, and had not been trained in the prophetic colleges; and this, he indicates, was an unusual occurrence. (See J. Smith on *Prophecy*, c. ix.).

The sixteen prophets whose books are in the Canon have therefore that place of honour, because they were endowed with the *prophetic gift* as well as ordinarily (so far as we know) belonging to the *prophetic order*. There were hundreds of prophets contemporary with each of these sixteen prophets; and no doubt numberless compositions in sacred poetry and numberless moral exhortations were issued from the several schools, but only sixteen books find their place in the Canon. Why is this? Because these sixteen had what their brother-colleagues had not, the Divine call to the office of prophet, and the Divine illumination to enlighten them. It was not sufficient to have been taught and trained in preparation for a future call. Teaching and training served as a preparation only. When the schoolmaster's work was done, then, if the instrument was worthy, God's work began.

<sup>a</sup> Bishop Lowth "esteems the whole Book of Isaiah poetical, a few passages exempted, which, if brought together, would not at most exceed the bulk of five or six chapters." "half of the Book of Jeremiah," "the greater part of Ezekiel." The rest of the prophets are mainly poetical, but Haggai is "prosaic," and Jonah and

Moses had an external call at the burning bush (Ex. iii. 2). The Lord called Samuel, so that Ek perceived, and Samuel learned, that it was the Lord who called him (1 Sam. iii. 10). Isaiah (vi. 8). Jeremiah (i. 5), Ezekiel (ii. 4), Amos (vii. 15), declare their special mission. Nor was it sufficient for this call to have been made once for all. Each prophetic utterance is the result of a communication of the Divine to the human spirit, received either by "vision" (Is. vi. 1) or by "the word of the Lord" (Jer. ii. 1). (See *Aids to Faith*, Essay iii., "On Prophecy.") What then are the characteristics of the sixteen prophets, thus called and commissioned, and entrusted with the messages of God to His people?

(1.) They were the national poets of Judaea. We have already shown that music and poetry, chants and hymns, were a main part of the studies of the class from which, generally speaking, they were derived. As is natural, we find not only the songs previously specified, but the rest of their compositions, poetical or breathing the spirit of poetry.<sup>a</sup>

(2.) They were annalists and historians. A great portion of Isaiah, of Jeremiah, of Daniel, of Jonah, of Haggai, is direct or indirect history.

(3.) They were preachers of patriotism; their patriotism being founded on the religious motive. To the subject of the Theocracy, the enemy of his nation was the enemy of God, the traitor to the public weal was a traitor to his God; a denunciation of an enemy was a denunciation of a representative of evil, an exhortation in behalf of Jerusalem was an exhortation in behalf of God's Kingdom on earth, "the city of our God, the mountain of holiness, beautiful for situation, the joy of the whole earth, the city of the great King" (Ps. xlviii. 1, 2).

(4.) They were preachers of morals and of spiritual religion. The symbolical teaching of the Law had lost much of its effect. Instead of learning the necessity of purity by the legal washings, the majority came to rest in the outward act as in itself sufficient. It was the work, then, of the prophets to hold up before the eyes of their countrymen a high and pure morality, not veiled in symbols and acts, but such as none could profess to misunderstand. Thus, in his first chapter, Isaiah contrasts ceremonial observances with spiritual morality: "Your new moons and your appointed feasts my soul hateth: they are a trouble to me; I am weary to bear them. . . . Wash you, make you clean; put away the evil of your doings from before mine eyes; cease to do evil; learn to do well; seek judgment; relieve the oppressed, judge the fatherless, plead for the widow" (i. 14-17). He proceeds to denounce God's judgments on the oppression and covetousness of the rulers, the pride of the women (c. iii.), on grasping, profligacy, iniquity, injustice (c. v.), and so on throughout. The system of morals put forward by the prophets if not higher, or sterner, or purer than that of the Law, is more plainly declared, and with greater, because now more needed, vehemence of diction.<sup>b</sup>

(5.) They were extraordinary, but yet authorized, exponents of the Law. As an instance of this, we may take Isaiah's description of a true fast (lviii.

Daniel are plain prose (*Sacred Poetry*, Lect. xxi.).

<sup>b</sup> "Magna fides et grandis audacia Prophetarum," says St. Jerome (*in Ezek.*). This was their general characteristic, but that gifts and graces must be discovered, is proved by the cases of Balaam, Jonah, Caiaphas, and the disobedient prophet of Judah.

3-7), Ezekiel's explanation of the sins of the father being visited on the children (c. xviii.); Micah's preference of "doing justly, loving mercy, and walking humbly with God," to "thousands of rams and ten thousands of rivers of oil" (vi. 6-8). In these as in other similar cases (cf. Hos. vi. 6; Amos v. 21), it was the task of the prophets to restore the balance which had been overthrown by the Jews and their teachers dwelling on one side or on the other covering of a truth or of a duty, and leaving the other side or the inner meaning out of sight.

(6.) They held, as we have shown above, a pastoral or quasi-pastoral office.

(7.) They were a political power in the state. Strong in the safeguard of their religious character, they were able to serve as a counterpoise to the royal authority when wielded even by an Ahab.

(8.) But the prophets were something more than national poets and annalists, preachers of patriotism, moral teachers, exponents of the Law, pastors, and politicians. We have not yet touched upon their most essential characteristic, which is, that they were instruments of revealing God's will to man, as in other ways, so, specially, by predicting future events, and, in particular, by foretelling the incarnation of the Lord Jesus Christ, and the redemption effected by Him.<sup>1</sup> There are two chief ways of exhibiting this fact: one is suitable when discoursing with Christians, the other when arguing with unbelievers. To the Christian it is enough to show that the truth of the New Testament and the truthfulness of its authors, and of the Lord Himself, are bound up with the truth of the existence of this predictive element in the prophets. To the unbeliever it is necessary to show that facts have verified their predictions.

(a.) In St. Matthew's Gospel, the first chapter, we find a quotation from the Prophet Isaiah, "Behold a virgin shall be with child, and shall bring forth a son, and they shall call his name Emmanuel;" and, at the same time, we find a statement that the birth of Christ took place as it did "that it might be fulfilled which was spoken of the Lord by the prophet," in those words (i. 22, 23). This means that the prophecy was the declaration of God's purpose, and that the circumstances of the birth of Christ were the fulfilment of that purpose. Then, either the predictive element exists in the Book of the Prophet Isaiah, or the authority of the Evangelist St. Matthew must be given up. The same Evangelist testifies to the same Prophet having

"spoken of" which he quotes 15) that Jesus "that" other prophet (ix. 1) "17) that Jesus fulfilled which (Is. liii. 4). a particular which was quoted from Matthew, we Prophet Isaiah Jesus some say But, further, Evangelist; well. He died of his age "is saith—" (Is. well prophesie believe our Lord we must believe Prophet Isaiah between fifty a sample; but forward with Heb. viii. 8), ii. 15; Rom (Acts vii. 42; (Matt. xii. 7) (Heb. xii. 26) 27; Joh. xix. 2; Luke vii. of the prophet respect to Es the more, a spoken of toge 15) as author less than sev being predicti

(b.) The admit of being Here it is necessary of certain declaration of wisdom at made; (2) towards take place; (3) to an adequate that correspond Davidson, in

<sup>1</sup> Dr. Davidson pronounces it as "now commonly admitted that the essential part of biblical prophecy does not lie in predicting contingent events, but in divining the essentially religious in the course of history. . . . In no prophecy can it be shown that the literal predicting of distant historical events is contained. . . . In conformity with the analogy of prophecy generally, special predictions concerning Christ do not appear in the Old Testament." Dr. Davidson must mean that this is "now commonly admitted" by writers like himself, who, following Eichhorn, resolve "the prophet's delineations of the future" into "in essence nothing but forebodings—efforts of the spiritual eye to bring up before itself the distinct form of the future. The prevision of the prophet is intensified presentiment." Of course, if the powers of the prophets were simply "forebodings" and "presentiments" of the human spirit in "its pre-conscious region," they could not do more than make indefinite guesses about the future. But this is not the Jewish nor the Christian theory of prophecy. See S. Basile (in *Stud. Bibl.*), S. Curye. (*Rev.* xxi. i. v.

137, ed. 1612), *Evangel.* v. 132, *Tryp.* p. 224, c.

<sup>2</sup> This conclusion words were things were done might be accomplished declared by the Christ knowing since with what reality had no variance with them, and which inasmuch as he it would imply trived certain of Christ), not in with His will, be to the declaration could well be made

gives a "Criterion of Prophecy," and in accordance with it he describes "the conditions which would confer cogency of evidence on single examples of prophecy," in the following manner: first, "the known promulgation of the prophecy prior to the event; secondly, the clear and palpable fulfilment of it; lastly, the nature of the event itself, if when the prediction of it was given, it lay remote from human view, and was such as could not be foreseen by any supposable effort of reason, or be deduced upon principles of calculation derived from probability and experience" (*Disc. viii. p. 378*). Applying his test, the learned writer finds that the establishment of the Christian Religion and the person of its Founder were predicted when neither reason nor experience could have anticipated them; and that the predictions respecting them have been clearly fulfilled in history. Here, then, is an adequate proof of an inspired prescience in the prophets who predicted these things. He applies his test to the prophecies recorded of the Jewish people, and their actual state, to the prediction of the great apostasy and to the actual state of corrupted Christianity, and finally to the prophecies relating to Nineveh, Babylon, Tyre, Egypt, the Ishmaelites, and the Four Empires, and to the events which have befallen them; and in each of these cases he finds proof of the existence of the predictive element in the prophets.

In the Book of Kings we find Micaiah the son of Imlah uttering a challenge, by which his predictive powers were to be judged. He had pronounced, by the word of the Lord, that Ahab should fall at Ramoth-Gilead. Ahab, in return, commanded him to be shut up in prison until he came back in peace. "And Micaiah said, If thou return at all in peace" (that is, if the event does not verify my words), "the Lord hath not spoken by me" (that is, I am no prophet capable of predicting the future) (1 K. xii. 28). The test is sound as a negative test, and so it is laid down in the Law (*Deut. xviii. 22*); but as a positive test it would not be sufficient. Ahab's death at Ramoth-Gilead did not prove Micaiah's predictive powers, though his escape would have disproved them. But here we must notice a very important difference between single prophecies and a series of prophecy. The fulfilment of a single prophecy does not prove the prophetic power of the prophet, but the fulfilment of a long series of prophecies by a series or number of events does in itself constitute a proof that the prophecies were intended to predict the events, and, consequently, that predictive power resided in the prophet or prophets. We may see this in the so far parallel cases of satirical writings. We know for certain that Aristophanes refers to Cleon, Pericles, Nicias (and we should be equally sure of it were his satire more concealed than it is) simply from the fact of a number of satirical hits converging together on the object of his satire. One, two, or three strokes might be intended for more persons than one, but the addition of each stroke makes the aim more apparent, and when we have a sufficient number before us we can no longer possibly doubt his design. The same may be said of fables, and still more of allegories. The fact of a complicated lock being opened by a key shows that the lock and key were meant for each other. Now the Messianic picture drawn by the prophets as a body contains at least as many traits as these:—That salvation should come through the family of Abraham, Isaac,

Jacob, Judah, David: that at the time of the final absorption of the Jewish power, Shiloh (the tranquilliser) should gather the nations under his rule. that there should be a great Prophet, typified by Moses; a King descended from David; a Priest for ever, typified by Melchisedek: that there should be born into the world a child to be called Mighty God, Eternal Father, Prince of Peace: that there should be a Righteous Servant of God on whom the Lord would lay the iniquity of all: that Messiah the Prince should be cut off, but not for himself: that an everlasting kingdom should be given by the Ancient of Days to one like the Son of Man. It seems impossible to harmonise so many apparent contradictions. Nevertheless it is an undoubted fact that, at the time seemingly pointed out by one or more of these predictions, there was born into the world a child of the house of David, and therefore of the family of Abraham, Isaac, Jacob, and Judah, who claimed to be the object of these and other predictions; who is acknowledged as Prophet, Priest, and King, as Mighty God and yet as God's Righteous Servant who bears the iniquity of all; who was cut off, and whose death is acknowledged not to have been for his own, but for others' good; who has instituted a spiritual kingdom on earth, which kingdom is of a nature to continue for ever, if there is any continuance beyond this world and this life; and in whose doings and sufferings on earth a number of specific predictions were minutely fulfilled. Then we may say that we have here a series of prophecies which are so applicable to the person and earthly life of Jesus Christ as to be thereby shown to have been designed to apply to Him. And if they were designed to apply to Him, prophetic prediction is proved.

Objections have been urged:—1. *Vagueness*.—It has been said that the prophecies are too darkly and vaguely worded to be proved predictive by the events which they are alleged to foretell. This objection is stated with clearness and force by Ammon. He says, "Such simple sentences as the following: Israel has not to expect a king, but a teacher; this teacher will be born at Bethlehem during the reign of Herod; he will lay down his life under Tiberius, in attestation of the truth of his religion; through the destruction of Jerusalem, and the complete extinction of the Jewish state, he will spread his doctrine in every quarter of the world—a few sentences like these, expressed in plain historical prose, would not only bear the character of true predictions, but, when once their genuineness was proved, they would be of incomparably greater worth to us than all the oracles of the Old Testament taken together" (*Christology*, p. 12). But to this it might be answered, and has been in effect answered by Hengstenberg—1. That God never forces men to believe, but that there is such an union of definiteness and vagueness in the prophecies as to enable those who are willing to discover the truth, while the wilfully blind are not forcibly constrained to see it. 2. That, had the prophecies been couched in the form of direct declarations, their fulfilment would have thereby been rendered impossible, or, at least, capable of frustration. 3. That the effect of prophecy (e.g. with reference to the time of the Messiah's coming) would have been far less beneficial to believers, as being less adapted to keep them in a state of constant expectation. 4. That the Messiah of Revelation could not be so clearly portrayed in his varied character as God and Man, as Prophet, Priest

and King, if he had been the mere "teacher" which is all that Amnon acknowledges him to be. 5. That the state of the Prophets, at the time of receiving the Divine revelation, was (as we shall presently see) such as necessarily to make their predictions fragmentary, figurative, and abstracted from the relations of time. 6. That some portions of the prophecies were intended to be of double application, and some portions to be understood only on their fulfilment (cf. John, xiv. 29; Ez. xxxvi. 33).

2. *Obscurity of a part or parts of a prophecy otherwise clear.*—The objection drawn from "the unintelligibility of one part of a prophecy, as invalidating the proof of foresight arising from the evident completion of those parts which are understood" is akin to that drawn from the vagueness of the whole of it. And it may be answered with the same arguments, to which we may add the consideration urged by Butler that it is, for the argument in hand, the same as if the parts not understood were written in cipher or not written at all:—"Suppose a writing, partly in cipher and partly in plain words at length; and that in the part one understood there appeared mention of several known facts—it would never come into any man's thought to imagine that, if he understood the whole, perhaps he might find that these facts were not in reality known by the writer" (*Analogy*, pt. ii. c. vii.). Furthermore, if it be true that prophecies relating to the first coming of the Messiah refer also to his second coming, some part of those prophecies must necessarily be as yet not fully understood.

It would appear from these considerations that Davison's second "condition," above quoted, "the clear and palpable fulfilment of the prophecy," should be so far modified as to take into account the necessary difficulty, more or less great, in recognising the fulfilment of a prophecy which results from the necessary vagueness and obscurity of the prophecy itself.

3. *Application of the several prophecies to a more immediate subject.*—It has been the task of many Biblical critics to examine the different passages which are alleged to be predictions of Christ, and to show that they were delivered in reference to some person or thing contemporary with, or shortly subsequent to, the time of the writer. The conclusion is then drawn, sometimes scornfully, sometimes as an inference not to be resisted, that the passages in question have nothing to do with the Messiah. We have here to distinguish carefully between the conclusion proved, and the corollary drawn from it. Let it be granted that it may be proved of all the predictions of the Messiah—it certainly may be proved of many—that they primarily apply to some historical and present fact: in that case a certain law, under which God vouchsafes his prophetic revelations, is discovered; but there is no semblance of disproof of the further Messianic interpretation of the passages under consideration. That some such law does exist has been argued at length by Mr. Davison. He believes, however, that "it obtains only in some of the more distinguished monuments of prophecy," such as the prophecies founded on, and having primary reference to, the kingdom of David, the restoration of the Jews, the destruction of Jerusalem (*On Prophecy*, Disc. v.). Dr. Lee thinks that Davison "exhibits too great reserve in the application of this important principle" (*On Inspiration*, Lect. iv.). He considers it to be of universal application; and upon it he

founds the prophecy," some in two or even first in type, perhaps awaits ment. This seems necessary prediction on of Jerusalem penation. writes: "Al Him, many but yet some soever He is be first and one place in be cut off."

IV. THE Holy Script Spirit of God communicat seventy elder Spirit which them. . . Spirit that seventy elde the Spirit re did not cease that all the the Lord w

xl. 17, 23, 29). Here we see that what made the seventy prophesy, was their being endued with the Lord's Spirit by the Lord Himself. So it is the Spirit of the Lord which made Saul (1 Sam. x. 6) and his messengers (1 Sam. xix. 20) prophesy. And thus St. Peter assures us that "prophecy came not in old time by the will of man, but holy men of God spake, moved (*φωδμενοι*) by the Holy Ghost" (2 Pet. i. 21), while false prophets are described as those "who speak a vision of their own heart, and not out of the mouth of the Lord" (Jer. xxiii. 16), "who prophesy out of their own hearts, . . . who follow their own spirit, and have seen nothing" (Ex. xiii. 2, 3).<sup>2</sup> The prophet held an intermediate position in communication between God and man. God communicated with him by His Spirit, and he, having received this communication, was "the spokesman" of God to man (cf. Ex. vii. 1 and iv. 16). But the means by which the Divine Spirit communicated with the human spirit, and the conditions of the human spirit under which the Divine communications were received, have not been clearly declared to us. They are, however, indicated. On the occasion of the sedition of Miriam and Aaron, we read, "And the Lord said, Hear now my words: If there be a prophet among you, I the Lord will make myself known unto him in a vision, and will speak unto him in a dream. My servant Moses is not so, who is faithful in all mine house: with him will I speak mouth to mouth, even apparently, and not in dark speeches, and the similitude of the Lord shall be behold" (Num. xii. 6-8). Here we have an exhaustive division of the different ways in which the revelations of God are made to man. 1. Direct declaration and manifestation, "I will speak mouth to mouth, apparently, and the similitude of the Lord shall be behold." 2. Vision. 3. Dream. It is indicated that, at least at this time, the vision and the dream were the special means of conveying a revelation to a prophet, while the higher form of direct declaration and manifestation was reserved for the more highly favoured Moses.<sup>3</sup> Joel's prophesy appears to make the same division, "Your old men shall dream dreams, and your young men shall see visions," these being the two methods in which the promise, "your sons and your daughters shall prophesy," are to be carried out (ii. 28). And of Daniel we are told that "he had understanding in all visions and dreams" (Dan. i. 17). Can these phases of the prophetic state be distinguished from each other? and in what did they consist?

According to the theory of Philo and the Alexandrian school, the prophet was in a state of entire unconsciousness at the time that he was under the influence of Divine inspiration, "for the human understanding," says Philo, "takes its departure on the arrival of the Divine Spirit, and, on the removal of the latter, again returns to its home, for the mortal must not dwell with the immortal" (*Quis Rer. Dic. Hæc.* t. i. p. 511). Balaam is described by him as an unconscious instrument through

<sup>2</sup> Hence the emphatic declarations of the Great Prophet of the Church that he did not speak of Himself (John vii. 17, &c.).

<sup>3</sup> Maimonides has drawn out the points in which Moses is considered superior to all other prophets as follows.—

1. All the other prophets saw the prophesy in a dream or in a vision, but our Rabbi Moses saw it whilst awake. 2. To all the other prophets it was revealed through the medium of an angel, and therefore they saw that which they saw in an allegory or enigma, but to Moses it is said: With him will I speak mouth to mouth (Euseb.

whom God spake (*De Vita Mosis*, lib. I. t. ii. p. 124). Josephus makes Balaam excuse himself to Balak on the same principle: "When the Spirit of God seizes us, It utters whatsoever sounds and words It pleases, without any knowledge on our part, . . . for when It has come into us, there is nothing in us which remains our own" (*Antiq.* iv. 6. §5, t. i. p. 216). This theory identifies Jewish prophecy in all essential points with the heathen *μαντική*, or divination, as distinct from *προφητεία*, or interpretation. Montanism adopted the same view: "Defendimus, in causa novæ prophetiæ, gratiæ æstasin, id est amentiam, convenire. In spiritu enim homo constitutus, præsertim cum gloriam Dei conspiciat, vel cum per ipsum Deus loquitur, necesse est excidat sensus, obumbratus scilicet virtute divina, de quo inter nos et Psychicos (catholicos) quaestio est" (Tertullian, *Adv. Marcion.* iv. 22). According to the belief, then, of the heathen, of the Alexandrian Jews, and of the Montanists, the vision of the prophet was seen while he was in a state of ecstatic unconsciousness, and the enunciation of the vision was made by him in the same state. The Fathers of the Church opposed the Montanist theory with great unanimity. In Eusebius' History (v. 17) we read that Miltiades wrote a book *περί τοῦ μὴ δεῖν προφητῆν ἐν ἐκστάσει λαλεῖν*. St. Jerome writes: "Non loquitur propheta *ἐν ἐκστάσει*, ut Montanus et Prisca Maximillaque delirant, sed quod prophetat liber est visiois intelligentis universa quæ loquitur" (*Prolog. in Nahum*). And again: "Neque vero ut Montanus cum insanis fœminis somniat, prophetæ in ecstasi locuti sunt ut necierint quid loquerentur, et cum alios erudirent ipsi ignorant quid dicerent" (*Prolog. in Esai.*). Origen (*Contr. Celsum*, vii. 4), and St. Basil (*Commentary on Isaiah*, Proem. c. 5), contrast the prophet with the soothsayer, on the ground of the latter being deprived of his senses. St. Chrysostom draws out the contrast: *Τούτο γὰρ μάντις ἴδιον, τὸ ἐκστατικόν, τὸ ἀνάγκην ὑπομένειν, τὸ ἐθελεῖν, τὸ ἐλεῖσθαι, τὸ σύρεσθαι ὥστε μανόμενον. Ὁ δὲ προφήτης οὐχ ὁύτως, ἀλλὰ μετὰ διανοίας τηρούσης καὶ σωφρονούσης καταστάσεως, καὶ εἰδὼς ἃ φέγγεται, φησὶν ἅπαντα ὥστε καὶ πρὸ τῆς ἐκστάσεως πάντῃθεν γινώσκει τὸν μάντιν καὶ τὸν προφήτην* (*Hom. xix. in Epist. ad Corinth.*). At the same time, while drawing the distinction sharply between heathen soothsaying and Montanist prophesying on the one side, and Hebrew prophecy on the other, the Fathers use expressions so strong as almost to represent the Prophets to be passive instruments acted on by the Spirit of God. Thus it is that they describe them as musical instruments,—the pipe (Athenagoras, *Leg. pro Christianis*, c. ix.; Clem. Alex. *Cohort. ad Gent.* c. i.), the lyre (Justin Martyr, *Cohort. ad Græc.* c. viii.; Ephraem Syr. *Rhythma*, xxix.; Chrysostom, *Ad Pop. Antioch.* Hom. i. t. ii.); or as pens (St. Greg. Magn. *Præf. in*

xii. 8) and face to face (Ex. xxxiii. 11). 3. All the other prophets were terrified, but with Moses it was not so; and this is what the Scripture says: As a man speaketh unto his friend (Ex. xxxiii. 11). 4. All the other prophets could not prophesy at any time that they wished, but with Moses it was not so, but at any time that he wished for it, the Holy Spirit came upon him; so that it was not necessary for him to prepare his mind, for he was always ready for it, like the ministering angels" (*Yad HaChasidim*, c. vii., Bernard's transl. p. 116, quoted by Leo p. 467).

ὁδὸν αὐτῶν τὰ μέλλοντα καλῶς· εἶθ' οὕτω περιεγράψαντες ἔλεγον ταῦτα ἕκαστος ἑνὶ τῶν ἑαυτοῦ λόγων ἀποκριθεὶς (Hippol. *De An-tichristo*, c. ii.). Πῶς προφῆτευσαν αἱ καθαραὶ καὶ διαγλαίψαι ψυχαί; οἶονεi κάτοπτρα γινόμενα τῆς Θείας ἐνεργείας, τὴν ἐμφασιν βανῆς καὶ αστόχουτος κα. οὐδὲν ἐπιβουλεύοντι ἐκ τῶν παθῶν τῆς σαρκὸς ἐκτελείοντες· πᾶσι μὲν γὰρ παρέσσι τὸ Ἅγιον Πνεῦμα (St. Basil, *Comm. in Eccl. Proem.*).

Had the prophets a full knowledge of that which they predicted? It follows from what we have already said that they had not, and could not have. They were the "spokesmen" of God (Ex. vii. 1), the "mouth" by which His words were uttered, or they were enabled to view, and empowered to describe, pictures presented to their spiritual intuition; but there are no grounds for believing that, contemporaneously with this miracle, there was wrought another miracle enlarging the understanding of the prophet so as to grasp the whole of the Divine counsels which he was gazing into, or which he was the instrument of enunciating. We should not expect it beforehand; and we have the testimony of the prophets themselves (Dan. xii. 8; Zech. iv. 5), and of St. Peter (1 Pet. i. 10), to the fact that they frequently did not comprehend them. The passage in St. Peter's Epistle is very instructive: "Of which salvation the prophets have enquired and searched diligently, who prophesied of the grace that should come unto you: searching what, or what manner of time the Spirit of Christ which was in them did signify, when it testified beforehand the sufferings of Christ, and the glory that should follow. Unto whom it was revealed, that not unto themselves, but unto us they did minister the things, which are now reported unto you by them that have preached the gospel unto you with the Holy Ghost sent down from heaven." It is here declared (1) that the Holy Ghost through the prophet, or the prophet by the Holy Ghost, testified of Christ's sufferings and ascension, and of the institution of Christianity; (2) that after having uttered predictions on those subjects, the minds of the prophets occupied themselves in searching into the full meaning of the words that they had uttered; (3) that they were then divinely informed that their predictions were not to find their completion until the last days, and that they themselves were instruments for declaring good things that should come not to their own but to a future generation. This is exactly what the prophetic state above described would lead us to expect. While the Divine communication is being received, the human instrument is simply passive. He sees or hears by his spiritual intuition or perception, and declares what he has seen or heard. Then the reflective faculty which had been quiescent but never so overpowered as to be destroyed, awakens to

the consideration of the message or vision received, and it strives earnestly to understand it, and more especially to look at the revelation as *an* instead of *out* of time. The result is failure; but this failure is softened by the Divine intimation that the time is not yet.\* The two questions, What did the prophet understand by this prophecy? and, What was the meaning of this prophecy? are totally different in the estimation of every one who believes that "the Holy Ghost spake by the Prophets," *c.* who considers it possible that he did so speak.†

V. INTERPRETATION OF PREDICTIVE PROPHECY.—We have only space for a few rules, deduced from the account which we have given of the nature of prophecy. They are, (1.) Interpose distances of time according as history may show them to be necessary with respect to the past, or inference may show them to be likely in respect to the future, because, as we have seen, the prophetic visions are abstracted from relations in time. (2.) Distinguish the *form* from the *idea*. Thus Isaiah (xi. 15) represents the *idea* of the removal of all obstacles from before God's people in the *form* of the Lord's destroying the tongue of the Egyptian sea, and smiting the river into seven streams. (3.) Distinguish in like manner figure from what is represented by it, *e. g.*, in the verse previous to that quoted, do not understand literally, "They shall fly upon the shoulders of the Philistines" (Is. xi. 14). (4.) Make allowance for the imagery of the prophetic visions, and for the poetical diction in which they are expressed. (5.) In respect to things past, interpret by the apparent meaning, checked by reference to events; in respect to things future, interpret by the apparent meaning, checked by reference to the analogy of the faith. (6.) Interpret according to the principle which may be deduced from the examples of visions explained in the Old Testament. (7.) Interpret according to the principle which may be deduced from the examples of prophecies interpreted in the New Testament.

VI. USE OF PROPHECY.—Predictive prophecy is at once a part and an evidence of revelation: at the time that it is delivered, and until its fulfilment, a part; after it has been fulfilled, an evidence. St. Peter (Ep. 2, i. 19) describes it as "a light shining in a dark place," or "a taper glimmering where there is nothing to reflect its rays," that is, throwing some light, but only a feeble light as compared with what is shed from the Gospel history. To this light, feeble as it is, "you do well," says the Apostle, "to take heed." And he warns them not to be offended at the feebleness of the light, because it is of the nature of prophecy until its fulfilment—(in the case of Messianic predictions, of which he is speaking, described as "until the day dawn, and the day star arise in your hearts")—to shed only a feeble light. Nay, he continues, even the prophets could not themselves interpret its meaning," "for

\* See Keble, *Christian Year*, 13th S. aft. Trin., and *See, Inspiration*, p. 210.

† It is on this principle rather than as it is explained by Dr. McCaul (*Aids to Faith*) that the prophecy of Hosea xi. 1 is to be interpreted. Hosea, we may well believe, understood in his own words no more than a reference to the historical fact that the children of Israel came out of Egypt. But Hosea was not the author of the prophecy—he was the instrument by which it was promulgated. The Holy Spirit intended something further—and what this something was He informs us by the Evangelist St. Matthew (Matt. ii. 15). The two facts of the Israelites being led out of Egypt and of Christ's return from Egypt appear to Professor Jowett so distinct that the refer-

ence by St. Matthew to the Prophet is to him inexplicable except on the hypothesis of a mistake on the part of the Evangelist (see Jowett's *Essay on the Interpretation of Scripture*). A deeper insight into Scripture shows that "the Jewish people themselves, their history, their ritual, their government, all present one grand prophecy of the future Redeemer" (Lee, p. 107). Consequently "Israel" is one of the *forms* naturally taken in the prophetic vision by the *idea* "Messianic."

† This is a more probable meaning of the words *ἡμέρας ἐνέλασεν οὐ γινέται* than that given by Pearson (*On the Creed*, art. i. p. 17, Ed. Hutton), "that no prophecy did so proceed from the prophet that he of himself or by his own instinct did open his mouth to prophecy."

the prophecy came not in old time by the will of man," i. e. the prophets were not the authors of their predictions. "but holy men of old spake by the impulse (*φωβόμενοι*) of the Holy Ghost." This, then, was the use of prophecy before its fulfilment, —to act as a feeble light in the midst of darkness, which it did not dispel, but through which it threw its rays in such a way as to enable a true-hearted believer to direct his steps and guide his anticipations (cf. Acts xiii. 27). But after fulfilment, St. Peter says, "the word of prophecy" becomes "more sure" than it was before, that is, it is no longer merely a feeble light to guide, but it is a firm ground of confidence, and, combined with the apostolic testimony, serves as a trustworthy evidence of the faith; so trustworthy, that even after he and his brother Apostles are dead, those whom he addressed will feel secure that they "had not followed cunningly devised fables," but the truth.

As an evidence, fulfilled prophecy is as satisfactory as anything can be, for who can know the future except the Ruler who disposes future events; and from whom can come prediction except from Him who knows the future? After all that has been said and unsaid, prophecy and miracles, each resting on their own evidence, must always be the chief and direct evidences of the truth of the Divine character of a religion. Where they exist, a Divine power is proved. Nevertheless, they should never be rested on alone, but in combination with the general character of the whole scheme to which they belong. Its miracles, its prophecies, its morals, its propagation, and its adaptation to human needs, are the chief evidences of Christianity. None of these must be taken separately. The fact of their conspiring together is the strongest evidence of all. That one object with which predictions are delivered is to serve in an after age as an evidence on which faith may reasonably rest, is stated by our Lord Himself: "And now I have told you before it come to pass, that when it is come to pass ye might believe" (John xiv. 29).

VII. DEVELOPMENT OF MESSIANIC PROPHECY. —Prediction, in the shape of promise and threatening, begins with the Book of Genesis. Immediately upon the Fall, hopes of recovery and salvation are held out, but the manner in which this salvation is to be effected is left altogether indefinite. All that is at first declared is that it shall come through a child of woman (Gen. iii. 15). By degrees the area is limited: it is to come through the family of Shem (Gen. ix. 26), through the family of Abraham (Gen. xii. 3), of Isaac (Gen. xxii. 18), of Jacob (Gen. xxviii. 14), of Judah (Gen. xlix. 10). Balaam seems to say that it will be wrought by a warlike Israelitish King (Num. xxiv. 17); Jacob, by a peaceful Ruler of the earth (Gen. xlix. 10); Moses, by a Prophet like himself, i. e. a revealer of a new religious dispensation (Deut. xviii. 15). Nathan's announcement (2 Sam. vii. 16) determines further that the salvation is to come through the house of David, and through a descendant of David who shall be himself a king. This promise is developed by David himself in the Messianic Psalms. Ps. xviii. and lxi. are founded on the promise communi-

cated by Nathan, and do not go beyond the announcement made by Nathan. The same may be said of Ps. lxxix., which was composed by a later writer. Ps. ii. and cx. rest upon the same promise as their foundation, but add new features: the Son of David is to be the Son of God (ii. 7), the anointed of the Lord (ii. 2), not only the King of Zion (ii. 6, cx. 1), but the inheritor and Lord of the whole earth (ii. 8, cx. 6), and, besides this, Priest for ever after the order of Melchizedek (ii. 4). At the same time he is, as typical of his progenitor, to be full of suffering and affliction (Ps. xlii., lxxi., cii., cix.): brought down to the grave yet raised to life without seeing corruption (Ps. xvi.). In Ps. xlv., lxxii., the sons of Sion and Solomon describe his peaceful reign. Between Solomon and Hezekiah intervened some 300 years, during which the voice of prophecy was silent. The Messianic conception entertained at this time by the Jews might have been that of a King of the royal house of David who would arise and gather under his peaceful sceptre his own people and strangers. Sufficient allusion to his prophetic and priestly offices had been made to create thoughtful consideration, but as yet there was no delineation of him in those characters. It was reserved for the Prophets to bring out these features more distinctly. The sixteen Prophets are divided into four groups: the Prophets of the Northern Kingdom, — Hosea, Amos, Joel, and the Prophets of the Southern Kingdom, —Isaiah, Jeremiah, Obadiah, Micah, Nahum, Habakkuk, Zephaniah; the Prophets of the Captivity, —Isaiah and Daniel; the Prophets of the Return, —Isaiah, Zechariah, Malachi. In this great period of prophecy there is no longer any chronological development of Messianic Prophecy, as it was in the period previous to Solomon. Each prophet adds a feature, one more, another less clearly, outlines the features, and we have the portrait; but it does not grow gradually and perceptibly under the hand of the several artists. Here, therefore, in tracing the chronological progress of the prediction of the Messiah comes to an end its development. A point is found in the prophecy contained in Ps. 13-15, and lxi. We here read that there dwells a Servant of God, lowly and despised, full of grief and suffering, oppressed, condemned as a nation and put to death. But his sufferings, it is said, are not for his own sake, for he had been so guilty of fraud or violence; they are patiently borne, patiently borne, victorious in their death, and, by God's appointment, they have a reconciling and justifying efficacy. The result his sacrificial offering is to be his triumph of triumph. By the path of humiliation and suffering, he is to reach that state of glory known by David and Solomon. The portrait drawn of the Messiah is drawn out by Isaiah in two parts of his book as the atoning sacrifice. At the time of Hezekiah therefore (for Augustin *Christology*, vol. ii., has satisfactorily shown the theory of a Deutero-Isaiah of the days of captivity) the portrait of the Messiah — as King, Priest, Prophet, and Redeemer — is set out in all its essential features.\* The account

\* The modern Jews, in opposition to their ancient exposition, have been driven to a non-Messianic interpretation of Is. liii. Among Christians the non-Messianic interpretation commenced with Grotius. He applies the chapter to Jeremiah. According to Doederlein, Schaefer, Steppahl, Eichhorn, Rosenmüller, Hitzig, Haendewerk

Kister (after the Jewish exposition, *Isaiah*, Ritschl, Abartanet, Lipschütz), the subject of the prophecy is the Israelitish people. According to Ewald, Bleek, it is the ideal Jewish people. According to Paulus, Ammon, Maass, Thiel, it is the guilty portion of the Israelitish people.

and later Prophets (cf. Mic. v. 2; Dan. vii. 9; Zech. vi. 13; Mal. iv. 2) added some particulars and details, and so the conception was left to await its realization after an interval of some 400 years from the date of the last Hebrew Prophet.

It is the opinion of Hengstenberg (*Christology*, I. 235) and of Pusey (*Minor Prophets*, Part I. Introd.) that the writings of the Minor Prophets are chronologically placed. Accordingly, the former arranges the list of the Prophets as follows: Hosea, Joel, Amos, Obadiah, Jonah, Micah, Isaiah ("the principal prophetic figure in the first or Assyrian period of canonical prophetism"), Nahum, Habakkuk, Zephaniah, Jeremiah ("the principal prophetic figure in the second or Babylonian period of canonical prophetism"), Ezekiel, Daniel, Haggai, Zechariah, Malachi. Calmet (*Dict. Bibl.* s. v. "Prophet") as follows: Hosea, Amos, Isaiah, Jonah, Micah, Nahum, Jeremiah, Zephaniah, Joel, Daniel, Ezekiel, Habakkuk, Obadiah, Haggai, Zechariah, Malachi. Dr. Stanley (*Lect.* xix.) in the following order: Joel, Jonah, Hosea, Amos, Isaiah, Micah, Nahum, Zechariah, Zephaniah, Habakkuk, Obadiah, Jeremiah, Ezekiel, Isaiah, Daniel, Haggai, Zechariah, Malachi. Whence it appears that Dr. Stanley recognizes two Isaiahs and two Zechariahs, unless "the author of Is. xl-lxvi. is regarded as the older Isaiah transported into a style and position later than his own time" (p. 423).

VIII. PROPHETS OF THE NEW TESTAMENT.—So far as their predictive powers are concerned, the Old Testament prophets find their New Testament counterpart in the writer of the Apocalypse [REVELATIONS; ANTICHRIST, in Appendix B]; but in their general character, as specially illumined revealers of God's will, their counterpart will rather be found, first in the Great Prophet of the Church, and his forerunner John the Baptist, and next in all those persons who were endowed with the extraordinary gifts of the Spirit in the Apostolic age, the speakers with tongues and the interpreters of tongues, the prophets and the discerners of spirits, the teachers and workers of miracles (1 Cor. xii. 10, 28). The connecting-link between the O. T. prophet and the speaker with tongues is the state of ecstasy in which the former at times received his visions and in which the latter uttered his words. The O. T. prophet, however, was his own interpreter: he did not speak in the state of ecstasy: he saw his visions in the ecstatic, and declared them in the ordinary state. The N. T. discerners of spirits has his prototype in such as Micahiah the son of Imlah (1 K. xii. 22), the worker of miracles in Elijah and Elisha, the teacher in each and all of the prophets. The prophets of the N. T. represented their namesakes of the O. T. as being expounders of Divine truth and interpreters of the Divine will to their auditors.

ing to De Wette, Gesenius, Schenkel, Umbreit, Hofmann, it is the prophetic body. August refers it to king Isaiah; Konynenburg and Bahrdt to Ezekiel; Stäudlin to Isaiah himself; Bolten to the house of David. Ewald thinks that no historical person was intended, but that the author of the chapter has misled his readers by inserting a passage from an older book, in which a martyr was spoken of. "This," he says, "quite spontaneously suggested itself, and has impressed itself on his mind more and more;" and he thinks that "controversy on chap. iii. will never cease until this truth is acknowledged" (*Prophecy*, II. 8. 407). Hengstenberg gives the following list of German commentators who have maintained the Messianic explanation:—Jathe Hensler, Kocher,

That predictive powers did occasionally exist in the N. T. prophets is proved by the case of Agabus (Acts xi. 28), but this was not their characteristic. They were not an order, like apostles, bishops or presbyters, and deacons, but they were men or women (Acts xxi. 9) who had the *χαρίσμα προφητείας* vouchsafed them. If men, they might at the same time be apostles (1 Cor. xiv.); and there was nothing to hinder the different *χαρίσματα* of wisdom, knowledge, faith, teaching, miracles, prophecy, discernment, tongues, and interpretation (1 Cor. xii.), being all accumulated on one person, and this person might or might not be a presbyter. St. Paul describes prophecy as being effective for the conversion, apparently the sudden and immediate conversion, of unbelievers (1 Cor. xiv. 24), and for the instruction and consolation of believers (Ib. 31). This shows its nature. It was a spiritual gift which enabled men to understand and to teach the truths of Christianity, especially as veiled in the Old Testament, and to exhort and warn with authority and effect greater than human (see Locke, *Paraphrase*, note on 1 Cor. xii., and Conybeare and Howson, i. 461). The prophets of the N. T. were supernaturally-illumined expounders and preachers.

Koppe, Michaelis, Schmießer, Storr, Hensl, Krüger, Jahn, Steudel, Sack, Reiske, Tholuck, Hivernick, Stier. Hengstenberg's own exposition, and criticism of the expositions of others, is well worth consultation (*Christology*, vol. II.).

Obadiah is generally considered to have lived at a later date than is compatible with a chronological arrangement of the canon, in consequence of his reference to the capture of Jerusalem. But such an inference is not necessary, for the prophet might have thrown himself in imagination forward to the date of his prophecy (Hengstenberg), or the words which, as translated by one A. V. are a constriction as to the past, may be really but as imperative as to the future (Pusey).

## PROSELYTES (עֲרָבִים: προσήλυτοι. 1 Chr.

xxii. 22, &c.: γειώραι, Ex. xii. 19: *Proselyti*). The Hebrew word thus translated is in the A. V. commonly rendered "stranger" (Gen. xv. 13, Ex. ii. 22, Is. v. 17, &c.). The LXX., as above, commonly gives the equivalent in meaning (προσήλυτοι ἀπὸ τοῦ προσεληλυθέναι καινῇ καὶ φιλοθεῖα πολιτεῖα, Philo and Nidas, s. v.), but sometimes substitutes a Hellenized form (γειώραι) of the Aramaic form עֲרָבִים. In the N. T. the A. V. has taken the word in a more restricted meaning, and translated it accordingly (Matt. xxiii. 15, Acts ii. 10, vi. 5).

The existence, through all stages of the history of the Israelites, of a body of men, not of the same race, but holding the same faith and adopting the same ritual, is a fact which, from its very nature, requires to be dealt with historically. To start with the technical distinctions and regulations of the later Rabbis is to invert the natural order, and leads to inevitable confusion. It is proposed accordingly to consider the condition of the proselytes of Israel in the five great periods into which the history of the people divides itself: viz. (I.) the age of the patriarchs; (II.) from the Exodus to the commencement of the monarchy; (III.) the period of the monarchy; (IV.) from the Babylonian captivity to the destruction of Jerusalem; (V.) from the destruction of Jerusalem downwards.

I. The position of the family of Israel as a distinct nation, with a special religious character, appears at a very early period to have exercised a power of attraction over neighbouring races. The slaves and soldiers of the tribe of which Abraham was the head (Gen. xvi. 27), who were included with him in the covenant of circumcision, can hardly perhaps be classed as proselytes in the later sense. The case of the Shechemites, however (Gen. xxxiv.), presents a more distinct instance. The converts are swayed partly by passion, partly by interest. The sons of Jacob then, as afterwards, require circumcision as an indispensable condition (Gen. xxxiv. 14). This, and apparently this only, was required of proselytes in the pre-Mosaic period.

II. The life of Israel under the Law, from the very first, presupposes and provides for the incorporation of men of other races. The "mixed multitude" of Ex. xii. 38 implies the presence of proselytes more or less complete. It is recognised in the earliest rules for the celebration of the Passover (Ex. xii. 19). The "stranger" of this and other laws in the A. V. answers to the word which distinctly means "proselyte," and is so translated in the LXX., and the prominence of the class may be estimated by the frequency with which the word recurs: 9 times in Exodus, 20 in Leviticus, 11 in Numbers, 19 in Deuteronomy. The laws clearly point to the position of a convert. The "stranger" is bound by the law of the Sabbath (Ex. xx. 10, xxiii. 12; Deut. v. 14). Circumcision is the condition of any fellowship with him (Ex. xii. 48; Num. ix. 14). He is to be present at the Passover (Ex. xii. 19), the Feast of Weeks (Deut. xvi. 11), the Feast of Tabernacles (Deut. xvi. 14), the Day of Atonement (Lev. xvi. 29). The laws of prohibited marriages (Lev. xviii. 26) and abstinence from blood (Lev. xvii. 10) are binding upon him. He is liable to the same punishment for Molech-worship (Lev. xx. 2) and for blasphemy (Lev. xxiv. 16), may claim the same right of asylum as the Israelites in the cities of refuge (Num. xxxv. 15; Josh. xx. 9). On the other side he is subjected to some draw-

## PROSELYTES

backs. He cannot hold land (Lev. xix. 10). He has no *jus connubii* with the descendants of Aaron (Lev. xxi. 14). His condition is assumed to be, for the most part, one of poverty (Lev. xxi. 22), one of servitude (Deut. xxix. 11). For this reason he is placed under the special protection of the law (Deut. x. 18). He is to share in the right of gleaning (Lev. xix. 10), is placed in the same category as the fatherless and the widow (Deut. xxi. 17, 18, and 12, xxvii. 19), is joined with the Levite as entitled to the tithe of every third year's produce (Deut. xiv. 29, xxvi. 12). Among the proselytes of the period the KENITES, who under HOSIAS accompanied the Israelites in their wanderings, and ultimately settled in Canaan, were probably the most conspicuous (Judg. i. 16). The presence of the race was recognised in the solemn declaration of blessing and curses from Ebal and Gerizim (Josh. vii. 26).

The period after the conquest of Canaan is not favourable to the admission of proselytes. The people had no strong faith, no commanding power. The Gibeonites (Josh. ix.) furnish the only instance of a conversion, and their condition is rather that of slaves compelled to conform than of true proselytes. [NETHINIM.]

III. With the monarchy, and the consequent law and influence of the people, there was more to attract stragglers from the neighbouring nations, and we meet accordingly with many names which suggest the presence of men of another race conforming to the faith of Israel. Among the Elamites (1 Sam. xxi. 7), Uriah the Hittite (2 Sam. ii. 2), Araunah the Jebusite (2 Sam. xxi. 25), Zaid the Ammonite (2 Sam. xxi. 37), Ishmael the Midianite (1 Chr. xi. 46)—these two in spite of an opposite law to the contrary (Deut. xxi. 3)—and also the period Shebna the scribe (probably, *non*, *Hebrew* on Is. xlii. 15), and Ebed-Melech the Ethiopian (Jer. xxxviii. 7), are examples that such proselytism might rise even to high offices about the person of a king. The CHALDEANS and PARSIS were assisted probably of foreigners who had been taken to the service of David, and were content to adopt the religion of their master (Ewald, *loc. cit.* i. 330, iii. 183). The vision in Ps. lxxviii. 9, a time in which men of Tyre, Egypt, Ethiopia, &c., should all be registered among the names of Zion, can hardly fail to have had its counterpart in some admission of proselytes within the camp of the writer (Ewald and De Wette in *loc. cit.*). A convert of another kind, the type, as it were, in thought, of the later proselytes of the post-exilic period is found in Naaman the Syrian (2 K. v. 18) recognising Jehovah as his God, yet not submitting himself to any rigorous observance of the law.

The position of the proselytes during the post-exilic period appears to have undergone considerable change. On the one hand men rose, as we have seen, to power and fortune. The case for which provision is provided (Lev. xxv. 47) might actually arise if they might be the creditors of Israelites and the masters of Israelite slaves. It might also be a sign of the times in the later days of the monarchy that they became "very high," the "head" and not the "tail" of the people (Deut. xxi. 10). The picture had, however, another side. They were treated by David and Solomon as a religiously brought (like Perioeci, almost like *Romani*) and system of compulsory labour from which they were exempted (1 Chr. xxi. 2; 2 Chr. vii. 2). The statistics of this period, taken probably for that purpose, give their number (probably, *not*, *not*).

number of adult working males) at 153,600 (ib.). They were subject at other times to wanton insolence and outrage (Ps. xciv. 8). As some compensation for their sufferings they became the special objects of the care and sympathy of the prophets. One after another of the "goodly fellowship" pleads the cause of the proselytes as warmly as that of the widow and the fatherless (Jer. vii. 6, xlii. 3; Ex. xxii. 7, 29; Zech. vii. 10; Mal. iii. 5). A large accession of converts enters into all their hopes of the Divine Kingdom (Is. ii. 2, xi. 10, lvi. 3-6; Mic. iv. 1). The sympathy of one of them goes still further. He sees, in the far future, the vision of a time when the last remnant of inferiority shall be removed, and the proselytes, completely emancipated, shall be able to hold and inherit land even as the Israelites (Ex. xlvii. 22).<sup>a</sup>

IV. The proselytism of the period after the captivity assumed a different character. It was for the most part the conformity, not of a subject race, but of willing adherents. Even as early as the return from Babylon we have traces of those who were drawn to a faith which they recognised as holier than their own, and had "separated themselves" unto the law of Jehovah (Neh. x. 28). The presence of many foreign names among the NETEMIM (Neh. vii. 46-59) leads us to believe that many of the new converts dedicated themselves specially to the service of the new Temple. With the conquests of Alexander, the wars between Egypt and Syria, the struggle under the Maccabees, the expansion of the Roman empire, the Jews became more widely known and their power to proselytise increased. They had suffered for their religion in the persecution of Antiochus, and the spirit of martyrdom was followed naturally by propagandism. Their monotheism was rigid and unbending. Scattered through the East and West, a marvel and a portent, wondered at and scorned, attracting and repelling, they presented, in an age of shattered creeds, and corroding doubts, the spectacle of a faith, or at least a dogma which remained unshaken. The influence was sometimes obtained well, and exercised for good. In most of the great cities of the empire, there were men who had been rescued from idolatry and its attendant debasements, and brought under the power of a higher moral law. It is possible that in some cases the purity of Jewish life may have contributed to this result, and attracted men or women who shrank from the unutterable contamination, in the midst of which they lived.<sup>b</sup> The converts who were thus attracted, joined, with varying strictness (*infra*) in the worship of the Jews. They were present in their synagogues (Acts xiii. 42, 43, 50, xvii. 4, xviii. 7). They came up as pilgrims to the great feasts at Jerusalem (Acts ii. 10). In Palestine itself the influence was often stronger and better. Even Roman centurions learnt to love the conquered nation, built synagogues for them (Luke vii. 5), fasted and prayed, and gave alms, after the pattern of the strictest Jews (Acts x. 2, 30), and became preachers of the new faith to the soldiers under them (ib. v. 7). Such men, drawn by what was best in Judaism, were naturally

<sup>a</sup> The significance of this passage in its historical connexion with Ps. lxxxvii., already referred to, and its spiritual fulfilment in the language of St. Paul (Eph. ii. 19), deserves a fuller notice than they have yet received.

<sup>b</sup> This influence is not perhaps to be altogether excluded, but it has sometimes been enormously exaggerated. Compare Dr. Temple's "Essay on the Education of the World" (*Essays and Reviews*, p. 12).

among the readiest receivers of the new truth which rose out of it, and became, in many cases, the nucleus of a Gentile Church.

Proselytism had, however, its darker side. The Jews of Palestine were eager to spread their faith by the same weapons as those with which they had defended it. Had not the power of the Empire stood in the way, the religion of Moses, stripped of its higher elements, might have been propagated far and wide, by force, as was afterwards the religion of Mahomet. As it was, the Idumeans had the alternative offered them by John Hyrcanus of death, exile, or circumcision (Joseph. *Ant.* xiii. 9, §3). The Idumeans were converted in the same way by Aristobulus (ib. xiii. 11, §3). In the more frenzied fanaticism of a later period, the Jews under Josephus could hardly be restrained from seizing and circumcising two chiefs of Trachonitis who had come as envoys (Joseph. *Vit.* 23). They compelled a Roman centurion, whom they had taken prisoner, to purchase his life by accepting the sign of the covenant (Joseph. *B. J.* ii. 11, §10). Where force was not in their power (the "veluti Judaei, cogensus" of Hor. *Sat.* i. 4, 142, implies that they sometimes ventured on it even at Rome), they obtained their ends by the most unscrupulous fraud. They appeared as soothsayers, diviners, exorcists, and addressed themselves especially to the fears and superstitions of women. Their influence over these became the subject of indignant satire (Juv. *Sat.* vi. 543-547). They persuaded noble matrons to send money and purple to the Temple (Joseph. *Ant.* xviii. 3, §5). At Damascus the wives of nearly half the population were supposed to be tainted with Judaism (Joseph. *B. J.* ii. 10, §2). At Rome they numbered in their ranks, in the person of Poppaea, even an imperial concubine (Joseph. *Ant.* xx. 7, §11). The converts thus made, cast off all ties of kindred and affection (Tac. *Hist.* v. 9). Those who were most active in proselytizing were precisely those from whose teaching all that was most true and living had departed. The vices of the Jew were engrafted on the vices of the heathen. A repulsive casuistry released the convert from obligations which he had before recognised, while in other things he was bound, hand and foot, to an unhealthy superstition. It was no wonder that he became "twofold more the child of Gehenna" (Matt. xxiii. 15) than the Pharisees themselves.

The position of such proselytes was indeed every way pitiable. At Rome, and in other large cities, they became the butts of popular scurrility. The words "curtus," "verpes," met them at every corner (Hor. *Sat.* i. 4, 142; Mart. vii. 29, 34, 81, xi. 95, xii. 37). They had to share the fortunes of the people with whom they had cast in their lot, might be banished from Italy (Acts xviii. 2; Suet. *Claud.* 25), or sent to die of malaria in the most unhealthy stations of the empire (Tac. *Ann.* ii. 85). At a later time, they were bound to make a public profession of their conversion, and to pay a special tax (Suet. *Domit.* xii.). If they failed to do this and were suspected, they might be subject to the most degrading examination to ascertain the fact of their being prose-

<sup>a</sup> The Law of the Corban may serve as one instance (Matt. xv. 4-6). Another is found in the Rabbinic teaching as to marriage. Circumcision, like a new birth, cancelled all previous relationships, and unions within the nearest degrees of blood were therefore no longer incestuous (Maimon. *on Jehos.* p. 982; Selden, *de Jure Nat. et Gent.* ii. 4, *Uxor Hebr.* li. 18).

lytes (*ibid.*). Among the Jews themselves their case was not much better. For the most part the convert gained out little honour even from those who gloried in having brought him over to their sect and party. The popular Jewish feeling about them was like the popular Christian feeling about a converted Jew. They were regarded (by a strange Rabbinic perversion of Is. xiv. 1) as the leprosy of Israel, "cleaving" to the house of Jacob (*Jebam.* 47, 4; *Kiddush.* 70, 6). An opprobrious proverb coupled them with the vilest profligates ("proselyti et pachaustae") as hindering the coming of the Messiah (*Lightfoot, Hor. Heb.* in Matt. xxiii. 5). It became a recognised maxim that no wise man would trust a proselyte even to the twenty-fourth generation (*Jalkuth Ruth.* f. 163 a).

The better Rabbis did their best to guard against these evils. Anxious to exclude all unworthy converts, they grouped them, according to their motives, with a somewhat quaint classification.

- (1.) Love-proselytes, where they were drawn by the hope of gaining the beloved one. (The story of Syllaenus and Salome, *Joseph. Ant.* xvi. 7, §6, is an example of a half-finished conversion of this kind.)
- (2.) Man-for-Woman, or Woman-for-Man proselytes, where the husband followed the religion of the wife, or conversely.
- (3.) Esther-proselytes, where conformity was assumed to escape danger, as in the original Purim (*Esth.* viii. 17).
- (4.) King's-table-proselytes, who were led by the hope of court favour and promotion, like the converts under David and Solomon.
- (5.) Lion-proselytes, where the conversion originated in a superstitious dread of a divine judgment, as with the Samaritans of 2 K. xvii. 26.

(*Gem. Hieros. Kiddush.* 65, 6; *Jost, Judenth.* i. 448.) None of these were regarded as fit for admission within the covenant. When they met with one with whose motives they were satisfied, he was put to a yet further ordeal. He was warned that in becoming a Jew he was attaching himself to a persecuted people, that in this life he was to expect only suffering, and to look for his reward in the next. Sometimes these cautions were in their turn carried to an extreme, and amounted to a policy of exclusion. A protest against them on the part of a disciple of the Great Hillel is recorded, which throws across the dreary rubbish of Rabbinism the momentary gleam of a noble thought. "Our wise men teach," said Simon ben Gamaliel, "that when a heathen comes to enter into the covenant, our part is to stretch out our hand to him and to bring him under the wings of God" (*Jost, Judenth.* i. 447).

Another mode of meeting the difficulties of the case was characteristic of the period. Whether we may transfer to it the full formal distinction between Proselytes of the Gate and Proselytes of Righteousness (*infra*) may be doubtful enough, but we find two distinct modes of thought, two distinct policies in dealing with converts. The history of Helena, queen of Adiabene, and her son Izates, presents the two in collision with each other. They had been converted by a Jewish merchant, Ananias, but the queen feared lest the circumcision of her son should disquiet and alarm her subjects. Ananias assured her that it was not necessary. Her son might worship God, study the law, keep the command-

ments, without it. Soon, however, a stricter tutor came, Eleazar of Galilee. Finding Izates neglecting the law, he told him sternly that it was of little use to study that which he disobeyed, and so came upon his fears, that the young devotee was again secure the safety of which his uncircumcision had deprived him (*Joseph. Ant.* xi. 2, §5; *Jost, Judenth.* i. 341). On the part of some, therefore, there was a disposition to dispense with what others looked on as indispensable. The contents of Luke vii. (probably) and Acts x., possibly the Hellenes of John xii. 20 and Acts xiii. 42, are instances of men admitted on the former footing. The phrases of *σεβόμενοι προσήλυτοι* (*Acts* ii. 10, of *σεβόμενοι* (*xvii.* 4, 17; *Joseph. Ant.* xii. 7, §2, *ἄνθρωποι ἐθελῶντες* (*Acts* ii. 5, vii. 2) are often, but inaccurately, supposed to describe the same class—the Proselytes of the Gate. The probability is either that the terms were used generally of all converts, or, if with a specific meaning, were applied to the full Proselytes of Righteousness (comp. a full examination of the passages is given by E. Laidner, *On the Decree of Acts xv.*; *Westcott, Acts*). The two tendencies were, at all events at work, and the battle between them was renewed almost on holier ground and on a wider scale. James and Eleazar were represented in the two parties of the Council of Jerusalem. The point of touch had been quickened into a new life, and was emancipating itself from the old thralldom. The decree of the Council were the solemn assertion of the principle that believers in Christ were to stand on the basis of Proselytes of the Gate, not of Proselytes of Righteousness. The teaching of St. Paul in his righteousness and its conditions, its dependence on faith, its independence of circumcision, stands out in sharp clear contrast with the teaching which held that that rite was necessary to salvation, and confined the term "righteousness" to the circumcised convert.

V. The teachers who carried on the fatherless succession consoled themselves, as they saw their order waning and their own glory fading, by enveloping the decaying system with an almost microscopic minuteness. They would at least transmit to future generations the full measure of the religion of their fathers. In proportion as they ceased to have any power to proselytize, they laboured with exhaustive fulness on the question how proselytes were to be made. To that point accordingly belong the rules and decisions which we have carried back to an earlier age, and which may be conveniently discussed. The principle of the Talmud may indicate the premises and represent the Jews from the 2nd to the 5th century. They are very untrustworthy as to any earlier date. The points of interest which present themselves in inquiry are, (1.) The Classification of Proselytes; (2.) The ceremonies of their admission.

The division which has been in part adopted, was recognised by the Talmudic Rabbis, and received its full expression at the hands of R. Simonides (*Hile. Mel.* i. 6). They placed it in remote antiquity, a divine authority. The Proselytes of the Gate (*גר תימן*), so named from the frequently occurring description in the Law, "the stranger (*גר*) that is within thy gate" (*Ex.* xx. 10, &c.). They were known also as sojourners (*גר תימן*), with a reference to *Lev.* xiv. 47, &c. To them were referred the pas-

part of the precepts of the Law as to the "stranger." The Targums of Onkelos and Jonathan give this as the equivalent in Deut. xxiv. 21. Converts of this class were not bound by circumcision and the other special laws of the Mosaic code. It was enough for them to observe the seven precepts of Noah (Otho, *Lex. Rab.* "Noachida;" Selden, *De Jur. Nat. et Gent.* i. 10), i. e. the six supposed to have been given to Adam, (1) against idolatry, (2) against blaspheming, (3) against bloodshed, (4) against uncleanness, (5) against theft, (6) of obedience, with (7) the prohibition of "flesh with the blood thereof" given to Noah. The proselyte was not to claim the privileges of an Israelite, might not redeem his first-born, or pay the half-shekel (Leyrer, *ut inf.*). He was forbidden to study the Law under pain of death (Otho, *l. c.*). The later Rabbis, when Jerusalem had passed into other hands, held that it was unlawful for him to reside within the holy city (Maimon. *Beth-ha'acher*, vii. 14). In return they allowed him to offer whole burnt-offerings for the priest to sacrifice, and to contribute money to the Corban of the Temple. They held out to him the hope of a place in the paradise of the world to come (Leyrer). They insisted that the profession of his faith should be made solemnly in the presence of three witnesses (Maimon. *Hilc. Mel.* viii. 10). The Jubilee was the proper season for his admission (Müller, *De Pros.* in Ugolini xxii. 841).

All this seems so full and precise, that we cannot wonder that it has led many writers to look on it as representing a reality, and most commentators accordingly have seen these Proselytes of the Gate in the *σεβόμενοι, εὐλαβεῖς, φοβούμενοι τὸν Θεὸν* of the Acts. It remains doubtful, however, whether it was ever more than a paper scheme of what ought to be, disguising itself as having actually been. The writers who are most full, who claim for the distinction the highest antiquity, confess that there had been no Proselytes of the Gate since the Two Tribes and a half had been carried away into captivity (Maimon. *Hilc. Mel.* i. 6). They could only be admitted at the jubilee, and there had since then been no jubilee celebrated (Müller, *l. c.*). All that can be said therefore is, that in the time of the N. T. we have independent evidence (*ut supra*) of the existence of converts of two degrees, and that the Talmudic division is the formal systematising of an earlier fact. The words "proselytes," and of *σεβόμενοι τὸν Θεὸν*, were, however, in all probability limited to the circumcised.

In contrast with these were the Proselytes of Righteousness (*גֵּרֵי הָעֲרֻךְ*), known also as Proselytes of the Covenant, perfect Israelites. By some writers the Talmudic phrase, *proselyti tracti* (*גֵּרֵי תַרְטִי*) is applied to them as drawn to the covenant by spontaneous conviction (Buxtorf, *Lexic.* s. v.), while others (Kimchi) refer it to those who were constrained to conformity, like the Gibeonites. Here also we must receive what we find with the same limitation as before. All seems at first clear and definite enough. The proselyte was first catechised as to his motives (Maimon. *ut supra*). If these were satisfactory, he was first instructed as to the Divine protection of the Jewish people, and then circumcised. In the case of a convert already

circumcised (a Midianite, e. g. or an Egyptian), it was still necessary to draw a few drops of "the blood of the covenant" (Gem. Bab. *Shabb.* f. 135 a). A special prayer was appointed to accompany the act of circumcision. Often the proselyte took a new name, opening the Hebrew Bible and accepting the first that came (Leyrer, *ut inf.*).

All this, however, was not enough. The convert was still a "stranger." His children would be counted as bastards, i. e. aliens. Baptism was required to complete his admission. When the wound was healed, he was stripped of all his clothes, in the presence of the three witnesses who had acted as his teachers, and who now acted as his sponsors, the "fathers" of the proselyte (*Ketubb.* xi., *Eruhb.* xv. 1), and led into the tank or pool. As he stood there, up to his neck in water, they repeated the great commandments of the Law. These he promised and vowed to keep, and then, with an accompanying benediction, he plunged under the water. To leave one hand-breadth of his body unsubmerged would have vitiated the whole rite (Otho, *Lex. Rab.* "Baptismus;" Reisk. *De Bapt. Pros.* in Ugolini xxii.). Strange as it seems, this part of the ceremony occupied, in the eyes of the later Rabbis, a co-ordinate place with circumcision. The latter was incomplete without it, for baptism also was of the fathers (Gem. Bab. *Jebam.* f. 461, 2). One Rabbi appears to have been bold enough to declare baptism to have been sufficient by itself (*ibid.*); but for the most part, both were reckoned as alike indispensable. They carried back the origin of the baptism to a remote antiquity, finding it in the command of Jacob (Gen. xxxv. 2) and of Moses (Ex. xix. 10). The Targum of the Pseudo-Jonathan inserts the word "Thou shalt circumcise and baptise" in Ex. xii. 44. Even in the Ethiopic version of Matt. xxiii. 15, we find "compass sea and land to baptise one proselyte" (Winer, *Reb.* s. v.). Language, foreshadowing, or caricaturing, a higher truth was used of this baptism. It was a new birth.<sup>4</sup> (*Jebam.* f. 62. 1; 92. 1; Maimon. *Tasur. Bich.* c. 14; Lightfoot, *Harm. of Gospels.* iii. 14; *Exerc. on John* iii.). The proselyte became a little child. He received the Holy Spirit (*Jebam.* f. 22 a, 48 b.). All natural relationships, as we have seen, were cancelled.

The baptism was followed, as long as the Temple stood, by the offering or Corban. It consisted, like the offerings after a birth (the analogy apparently being carried on), of two turtle-doves or pigeons (Lev. xii. 18). When the destruction of Jerusalem made the sacrifice impossible, a vow to offer it as soon as the Temple should be rebuilt was substituted. For women-proselytes, there were only baptism\* and the Corban, or, in later times, baptism by itself.

It is obvious that this account suggests many questions of grave interest. Was this ritual observed as early as the commencement of the first century? If so, was the baptism of John, or that of the Christian Church in any way derived from, or connected with the baptism of proselytes? If not, was the latter in any way borrowed from the former?

It would be impossible here to enter at all into the literature of this controversy. The list of works named by Leyrer occupies nearly a page of

<sup>4</sup> This thought probably had its starting-point in the language of Ps. lxxvii. There also the proselytes of Babel and Egypt are registered as "born" in Zion.

\* The Galilean female proselytes were said to have objected to this, as causing barrenness (Winer, *Reb. ut inf.*).

**parables** This form of comparison would very naturally be taken by the short pithy sentences which passed into use as popular sayings and proverbs, especially when employed in mockery and sarcasm, as in Mic. ii. 4, Hab. ii. 8, and even in the more developed taunting song of triumph for the fall of Babylon in Is. xiv. 4. Probably all proverbial sayings were at first of the nature of similes, but the term *māshāl* soon acquired a more extended significance. It was applied to denote such short, pointed sayings, as do not involve a comparison directly, but still convey their meaning by the help of a figure, as in 1 Sam. x. 12, Ez. xii. 22, 23, xvii. 2, 3 (comp. *παράβολα*, Luke iv. 23). From this stage of its application it passed to that of sententious maxims generally, as in Prov. i. 1, x. 1, xiv. 1, xvi. 7, 9, Eccl. xii. 9, Job xiii. 12, many of which, however, still involve a comparison (Prov. xv. 3, 11, 12, 13, 14, &c., xvi. 1, 2, 3, &c.). Such comparisons are either expressed, or the things compared are placed side by side, and the comparison left for the hearer or reader to supply. Next we find it used of those longer pieces in which a single idea is no longer exhausted in a sentence, but forms the germ of the whole, and is worked out into a didactic poem. Many instances of this kind occur in the first section of the Book of Proverbs; others are found in Job xxvii., xxix., in both which chapters Job takes up his *māshāl*, or "parables," as it is rendered in the A. V. The "parable" of Balaam, in Num. xxiii. 7-10, xxiv. 3-9, 15-19, 20, 21-22, 23-24, are prophecies conveyed in figures; but *māshāl* also denotes the "parable" proper, as in Ez. xvii. 2, xx. 49 (xvi. 5), xxiv. 3. Lowth, in his notes on Is. xiv. 4, speaking of *māshāl*, says: "I take this to be the general name for poetic style among the Hebrews, including every sort of it, as ranging under one, or other, or all of the characters, of sententious, figurative, and sublime; which are all contained in the original notion, or in the use and application of the word *māshāl*. Parables or proverbs, such as those of Solomon, are always expressed in short, pointed sentences; frequently figurative, being formed on some comparison, both in the matter and the form. And such in general is the style of the Hebrew poetry. The verb *māshāl* signifies to rule, to exercise authority; to make equal, to compare one thing with another; to utter parables, or acute, weighty, and powerful speeches, in the form and manner of parables, though not properly such. Thus Balaam's first prophecy, Num. xxiii. 7-10, is called his *māshāl*; though it has hardly anything figurative in it: but it is beautifully sententious, and, from the very form and manner of it, has great spirit, force, and energy. Thus Job's last speeches, in answer to the three friends, chaps. xxvii.-xxxi., are called *māshāl*, from no one particular character which discriminates them from the rest of the poem, but from the sublime, the figurative, the sententious manner, which equally prevails through the whole poem, and makes it one of the first and most eminent examples extant of the truly great and beautiful in poetic style." But the Book of Proverbs, according to the introductory verses which describe its character, contains, besides several varieties of the *māshāl*, sententious sayings of other kinds, mentioned in i. 6. The first of these is the *chiddāh*, rendered in the A. V. "dark saying," "dark speech," "hard question," "riddle," and once (Hab. ii. 6) "proverb." It is applied to Solomon's riddle in Judg. xiv., to the hard questions

with which the queen of Sheba plied Solomon (1 K. x. 1; 2 Chr. ix. 1), and is used almost synonymously with *māshāl* in Ez. xvii. 2, and in Ps. xlix. 4 (5), lxxviii. 2, in which last passages the poetical character of both is indicated. The word appears to denote a knotty, intricate saying, the solution of which demanded experience and skill: that it was obscure is evident from Num. xii. 8. In addition to the *chiddāh* was the *māṣāl*, *māṣāl* (Prov. i. 6, A. V. "the interpretation," marg. "an eloquent speech"), which occurs in Hab. ii. 6 in connexion both with *chiddāh* and *māshāl*. It has been variously explained as a mocking, taunting speech (Ewald); or a speech dark and involved, such as needed a *māṣāl*, or interpreter (cf. Gen. xlii. 23; 2 Chr. xxxii. 31; Job xxxiii. 23; Is. xliii. 27); or again, as by Delitzsch (*Der prophet Habakuk*, p. 59), a brilliant or splendid saying ("Glanz- oder Wohlrede, oratio splendida, elegans, luminibus ornata"). This last interpretation is based upon the usage of the word in modern Hebrew, but it certainly does not appear appropriate to the Proverbs; and the first explanation, which Ewald adopts, is as little to the point. It is better to understand it as a dark enigmatical saying, which, like the *māshāl*, might assume the character of sarcasm and irony, though not essential to it.

2. *Canonicity of the book and its place in the Canon.*—The canonicity of the Book of Proverbs has never been disputed except by the Jews themselves. It appears to have been one of the points urged by the school of Shammai, that the contradictions in the Book of Proverbs rendered it apocryphal. In the Talmud (*Shabbath*, fol. 30 b) it is said: "And even the Book of Proverbs they sought to make apocryphal, because its words were contradictory the one to the other. And wherefore did they not make it apocryphal? The words of the book Koheleth [are] not [apocryphal] we have looked and found the sense: here also we must look." That is, the book Koheleth, in spite of the apparent contradictions which it contains, is allowed to be canonical, and therefore the existence of similar contradictions in the Book of Proverbs forms no ground for refusing to acknowledge its canonicity. It occurs in all the Jewish lists of canonical books, and is reckoned among what are called the "writings" (*Cethubim*) or Hagiographa, which form the third great division of the Hebrew Scriptures. Their order in the Talmud (*Baba Bathra*, fol. 14 b) is thus given: Ruth, Psalms, Job, Proverbs, Ecclesiastes, Song of Songs, Lamentations, Daniel, Esther, Ezra (including Nehemiah), and Chronicles. It is in the *Tosephtoth* on this passage that Proverbs and Ecclesiastes are styled "books of wisdom." In the German MSS. of the Hebrew O. T. the Proverbs are placed between the Psalms and Job, while in the Spanish MSS., which follow the Masorah, the order is, Psalms, Job, Proverbs. This latter is the order observed in the Alexandrian MS. of the LXX. Melito, following another Greek MS., arranges the Hagiographa thus: Psalms, Proverbs, Ecclesiastes, Song of Songs, Job, as in the list made out by the Council of Laodicea; and the same order is given by Origen, except that the Book of Job is separated from the others by the prophets Isaiah, Jeremiah, Daniel, and Ezekiel. But our present arrangement existed in the time of Jerome (see *Proef. in Hieronymum* iii.; "Tertius ordo scripturarum possidet. Et primus liber incipit ab Job. Secundus a David. . . Tertius est Salomon, tres libros habens: Proverbia,

quae illi parabolas, id est Masaloth appellant: Ecclesiastes, id est, Coeleth: Canticum Cantiorum, quem titulo Sir Asirim praesecant"). In the Peshito Syriac, Job is placed before Joshua, while Proverbs and Ecclesiastes follow the Psalms, and are separated from the Song of Songs by the Book of Ruth. Gregory of Nazianzus, apparently from the exigencies of his verse, arranges the writings of Solomon in this order, Ecclesiastes, Song of Songs, Proverbs. Pseudo-Epiphanius places Proverbs, Ecclesiastes, and Song of Songs between the 1st and 2nd Books of Kings and the minor prophets. The Proverbs are frequently quoted or alluded to in the New Testament, and the canonicity of the Book thereby confirmed. The following is a list of the principal passages:—

Prov. i. 16	compare	Rom. iii. 10, 15.
iii. 7	"	Rom. xii. 16.
iii. 11, 12	"	Heb. xii. 5, 6; see also Rev. iii. 19.

xxvii. 1	"	Jam. iv. 13, 14.

3. *Authorship and date.*—The superscriptions which are affixed to several portions of the Book of Proverbs, in i. 1, x. 1, xxv. 1, attribute the authorship of those portions to Solomon, the son of David, king of Israel. With the exception of the last two chapters, which are distinctly assigned to other authors, it is probable that the statement of the superscriptions is in the main correct, and that the majority of the proverbs contained in the book were uttered or collected by Solomon. It was natural, and quite in accordance with the practice of other nations, that the Hebrews should connect Solomon's name with a collection of maxims and precepts which form a part of their literature to which he is known to have contributed most largely (1 K. iv. 32). In the same way the Greeks attributed most of their maxims to Pythagoras; the Arabs to Lokman, Abn Obeid, Al Mofaddel, Meidani, and Zamakhshari; the Persians to Ferid Attar; and the northern people to Odin. But there can be no question that the Hebrews were much more justified in assigning the Proverbs to Solomon, than the nations which have just been enumerated were in attributing the collections of national maxims to the traditional authors above mentioned. The parallel may serve as an illustration, but must not be carried too far. According to Bartolucci (*Bibl. Rab. iv. 373 b*), quoted by Carpov (*Introd. pt. ii. c. 4, §4*), the Jews ascribe the composition of the Song of Songs to Solomon's youth, the Proverbs to his mature manhood, and the Ecclesiastes to his old age. But in the *Seder Olam Rabba* (ch. xv. p. 41, ed. Meyer) they are all assigned to the end of his life. There is nothing unreasonable in the supposition that many, or most of the proverbs in the first twenty-nine chapters may have originated with Solomon. Whether they were left by him in their present form is a distinct question, and may now be considered. Before doing so, however, it will be necessary to examine the different parts into which the book is naturally divided.

Speaking roughly, it consists of three main divisions, with two appendices. 1. (Chaps. i–ix.) is a connected *mdshál*, in which Wisdom is personified and the youth exhorted to devote themselves to her. This portion is preceded by an introduction of title describing the character and general aim of the book. 2. Chaps. x. 1–xxiv., with the title, "The Proverbs of Solomon," consist of three portions. x. 1–xxii. 16, a collection of single proverbs and detached sentences out of the region of moral teaching and worldly prudence; xxii. 17–xxiv. 21, a new connected *mdshál*, with an introduction, xxii. 17–21, which contains precepts of righteousness and prudence; xxiv. 23–34, with the inscription, "This also belong to the wise," a collection of national maxims, which serve as an appendix to the preceding. Then follows the third division, xxv–xxvii., which, according to the superscription, probably be a collection of Solomon's proverbs, consisting of single sentences, which the men of the court of Hezekiah copied out. The first appendix, ch. xxv., "The words of Agur," is a collection of partly proverbial and partly enigmatical sayings; the second, ch. xxvi., is divided into two parts, "the words of King Lemuel" (1–6), and an alphabetical acrostic in praise of a virtuous woman, which occupies the rest of the chapter. Rejecting, therefore, for the present, the two last chapters, which do not even profess to be by Solomon, or to contain any of his teaching, we may examine the other divisions for the purpose of ascertaining whether any conclusion as to their origin and authorship can be arrived at. At first sight it is evident that there is a marked difference between the collections of single maxims and the longer didactic pieces, which both owe their origin to general *mdshál*. The collection of *Hezekiah's* proverbs made by the men of Hezekiah (xxv–xxvii.) belongs to the former class of detached sentences, and in this respect corresponds with those in the second main division (x. 1–xxii. 16). The expression of xxv. 1, "these also are the proverbs of Solomon," implies that the collection was made as an appendix to another already in existence, which we may as unreasonably presume to have been that which stands immediately before it in the present arrangement of the book. Upon one point most authorities are agreed, that the germ of the book in its present shape is the portion x. 1–xxii. 16, which is prefixed the title, "The Proverbs of Solomon." At what time it was put into the form in which we have it, cannot be exactly determined. It suggests as a probable date about two centuries after Solomon. The collector gathered together that king's genuine sayings, but must have mingled with them many by other authors and from other times, earlier and later. It seems clear that he must have lived before the time of Hezekiah, but the expression in xxv. 1, to which reference has already been made. In this portion many proverbs are repeated in the same, or a similar form, and which of itself militates against the supposition that all the proverbs contained in it proceeded from one author. Compare xxv. 12 with xvi. 23 and xv. 24; xxi. 9 with xxi. 19; x. 1<sup>a</sup> with xx. 2<sup>a</sup>; x. 2<sup>a</sup> with xi. 4<sup>b</sup>; x. 13<sup>a</sup> with xviii. 11<sup>a</sup>; xv. 23<sup>a</sup> with xvi. 12<sup>a</sup>; xi. 21<sup>a</sup> with xvi. 5<sup>a</sup>; xiv. 31<sup>a</sup> with xxi. 7<sup>a</sup>; xix. 12<sup>a</sup> with xx. 2<sup>a</sup>. Such repetitions, as before remarks, we do not expect to find in a work which proceeds immediately from the hands of one author. But if we suppose the contents of the present book to have been collected by one man out of divers sources, and as well as written, as we

itions become intelligible. Bertholdt argues that many of the proverbs could not have proceeded from Solomon, because they presuppose an author in different circumstances of life. His arguments are extremely weak, and will scarcely bear examination. For example, he asserts that the author of x. 5, xii. 10, 11, xiv. 4, xx. 4, must have been a landowner or husbandman; that x. 15, points to a man living in want; xi. 14, xiv. 20, to a private man living under a well-regulated government; xi. 26, to a tradesman without wealth; xii. 4, to a man not living in polygamy; xii. 9, to one living in the country; xiii. 7, 8, xvi. 8, to a man in a middle station of life; xiv. 1, xv. 25, xvi. 11, xvii. 2, xix. 13, 14, xx. 10, 14, 23, to a man of the rank of a citizen; xiv. 21, xvi. 19, xviii. 23, to a man of low station; xvi. 10, 12-15, xix. 12, xx. 2, 26, 28, to a man who was not a king; xxi. 5, to one who was acquainted with the course of circumstances in the common citizen life; xxi. 17, to one who was an enemy to luxury and festivities. It must be confessed, however, that an examination of these passages is by no means convincing to one who reads them without having a theory to maintain. That all the proverbs in this collection are not Solomon's is extremely probable; that the majority of them are his there seems no reason to doubt, and this fact would account for the general title in which they are all attributed to him. It is obvious that between the proverbs in this collection and those that precede and follow it, there is a marked difference, which is sufficiently apparent even in the English Version. The poetical style, says Ewald, is the simplest and most antique imaginable. Most of the proverbs are examples of antithetic parallelism, the second clause containing the contrast to the first. Each verse consists of two members, with generally three or four, but seldom five words in each. The only exception to the first law is xix. 7, which Ewald accounts for by supposing a clause omitted. This supposition may be necessary to his theory, but cannot be admitted on any true principle of criticism. Furthermore, the proverbs in this collection have the peculiarity of being contained in a single verse. Each verse is complete in itself, and embodies a perfectly intelligible sentiment; but a thought in all its breadth and definiteness is not necessarily exhausted in a single verse, though each verse must be a perfect sentence, a proverb, a lesson. There is one point of great importance to which Ewald draws attention in connexion with this portion of the book; that it is not to be regarded, like the collections of proverbs which exist among other nations, as an accumulation of the popular maxims of lower life which passed current among the people and were gathered thence by a learned man; but rather as the efforts of poets, artistically and scientifically arranged, to comprehend in short sharp sayings the truths of religion as applied to the infinite cases and possibilities of life. While admitting, however, this artistic and scientific arrangement, it is difficult to assent to Ewald's further theory, that the collection in its original shape had running through it a continuous thread, binding together what was manifold and scattered, and that in this respect it differed entirely from the form in which it appears at present. Here and there, it is true, we meet with verses grouped together apparently with a common object, but these are the exceptions, and a rule so general cannot be derived from them. No doubt the original collection of Solomon's proverbs, if such there were,

from which the present was made, underwent many changes, by abbreviation, transposition, and interpolation, in the two centuries which, according to Ewald's theory, must have elapsed before the compiler of the present collection put them in the shape in which they have come down to us; but evidence is altogether wanting to show what that original collection may have been, or how many of the three thousand proverbs which Solomon is said to have spoken, have been preserved. There is less difficulty in another proposition of Ewald's, to which a ready assent will be yielded: that Solomon was the founder of this species of poetry; and that in fact many of the proverbs here collected may be traced back to him, while all are inspired with his spirit. The peace and internal tranquillity of his reign were favourable to the growth of a contemplative spirit, and it is just at such a time that we should expect to find gnomic poetry developing itself and forming an epoch in literature.

In addition to the distinctive form assumed by the proverbs of this earliest collection, may be noticed the occurrence of favourite and peculiar words and phrases. "Fountain of life" occurs in Prov. x. 11, xiii. 14, xiv. 27, xvi. 22 (comp. Ps. xxxvi. 9 [10]); "tree of life," Prov. xi. 30, xiii. 12, xv. 4 (comp. iii. 18); "snares of death," Prov. xiii. 14, xiv. 27 (comp. Ps. xviii. 5 [6]); מַרְפֵּא, *marpé*, "healing, health," Prov. xii. 18, xiii. 17, xvi. 24 (comp. xiv. 30, xv. 4), but this expression also occurs in iv. 22, vi. 15 (comp. iii. 8), and is hardly to be regarded as peculiar to the older portion of the book; nor is it fair to say that the passages in the early chapters in which it occurs are imitations; מַחֲרִיב, *machriḥ*, "destruction," Prov. x. 14, 15, 28, xiii. 3, xiv. 28, xvii. 7, xxi. 15, and nowhere else in the book; יָדָא, *yadā*, which Ewald calls a participle, but which may be regarded as a future with the relative omitted, Prov. xii. 17, xiv. 5, 25, xix. 5, 9 (comp. vi. 19); שֶׁקֶץ, *sheqetz*, "perverseness," Prov. xi. 13, xv. 4; אִשְׁלֹף, *ashloph*, the verb from the preceding, Prov. xiii. 6, xix. 3, xxii. 12; יִנְדָּה, *yindā*, "shall not be acquitted," Prov. xi. 21, xvi. 5, xvii. 5, xix. 5, 9 (comp. vi. 29, xxviii. 20); רִדְדָה, *ridḏā*, "pursued," Prov. xi. 19, xii. 11, xiii. 21, xv. 9, xix. 7 (comp. xxviii. 19). The antique expressions אֲרִי־לֵב, *'arī-lēb*, A. V., "but for a moment," Prov. xii. 19; יָד לֵיךְ, *yad lēyḏ*, lit. "hand to hand," Prov. xi. 21, xvi. 5; אִישׁ גָּלָה, *ish galā*, "meddled with," Prov. xvii. 14, xviii. 1, xx. 3; נִרְדָּן, *nirḏān*, "whisperer, talebearer," Prov. xvi. 28, xviii. 18 (comp. xvi. 20, 22), are almost confined to this portion of the Proverbs. There is also the peculiar usage of שָׁם, *shām*, "there is," in Prov. xi. 24, xii. 18, xiii. 7, 23, xiv. 12, xvi. 25, xviii. 24, xx. 15. It will be observed that the use of these words and phrases by no means exists in determining the authorship of this section, but gives it a distinctive character.

With regard to the other collections, opinions differ widely both as to their date and authorship. Ewald places next in order chaps. xxv.-xxix., the superscription to which fixes their date about the end of the 8th century B.C. "There also are the

proverbs of Solomon, which the men of Hezekiah copied out," or compiled. The memory of these learned men of Hezekiah's court is perpetuated in Jewish tradition. In the Talmud (*Baba Bathra*, fol. 15 a) they are called the מְלֻמְּדֵי שְׁלֹמֹה, "society" or "academy" of Hezekiah, and it is there said, "Hezekiah and his academy wrote Isaiah, Proverbs, Song of Songs, Ecclesiastes." R. Gedaliah (*Shalsheleth Hakkabbalah*, fol. 66 b), quoted by Carpsov (*Introd.* part. ii. c. 4, §4), says, "Isaiah wrote his own book and the Proverbs, and the Song of Songs, and Ecclesiastes." Many of the proverbs in this collection are mere repetitions, with slight variations, of some which occur in the previous section. Compare, for example, xxv. 24 with xxi. 9; xxvi. 13 with xxii. 13; xxvi. 15 with xix. 24; xxvi. 22 with xviii. 8; xxvii. 13 with xv. 16; xxvii. 15 with xix. 13; xxvii. 21 with xvii. 3; xxviii. 6 with xix. 1; xxviii. 19 with xii. 11; xxix. 23 with xv. 18, &c. We may infer from this, with Bertheau, that the compilers of this section made use of the same sources from which the earlier collection was derived. Hitzig (*Die Sprüche Salomo's*, p. 258) suggests that there is a probability that a great, or the greatest part of these proverbs were of Ephraimite origin, and that after the destruction of the northern kingdom, Hezekiah sent his learned men through the land to gather together the fragments of literature which remained current among the people and had survived the general wreck. There does not appear to be the slightest ground, linguistic or otherwise, for this hypothesis, and it is therefore properly rejected by Bertheau. The question now arises, in this as in the former section; were all these proverbs Solomon's? Jahn says Yes; Bertholdt, No; for xxv. 2-7 could not have been by Solomon or any king, but by a man who had lived for a long time at a court. In xxvii. 11, it is no monarch who speaks, but an instructor of youth; xxviii. 16 censures the very errors which stained the reign of Solomon, and the effect of which deprived his son and successor of the ten tribes; xxvii. 23-27 must have been written by a sage who led a nomadic life. There is more force in these objections of Bertholdt than in those which he advanced against the previous section. Hensler (quoted by Bertholdt) finds two or three sections in this division of the book, which he regards as extracts from as many different writings of Solomon. But Bertholdt confesses that his arguments are not convincing.

The peculiarities of this section distinguish it from the older proverbs in x.-xxii. 16. Some of these may be briefly noted. The use of the interrogation "seest thou?" in xxvi. 12, xxix. 20 (comp. xxii. 29), the manner of comparing two things by simply placing them side by side and connecting them with the simple copula "and," as in xxv. 3, 20, xxvi. 3, 7, 9, 21, xxvii. 15, 20. We miss the pointed antithesis by which the first collection was distinguished. The verses are no longer of two equal members; one member is frequently shorter than the other, and sometimes even the verse is

extended to three members in order fully to express the thought. Sometimes, again, the verse is extended over two or more verses, as in 6, 7, 8-10; and in a few cases a series of verses contains longer exhortations to rectitude, as in xxvi. 23-28, xxvii. 2. The character of the proverbs is clearly different; the construction is looser and weaker, and longer than the sententious brevity which characterizes the older collection. The point to which Ewald thinks that in the contents of the book there are traceable the marks of a more dangerous and hostile, in which domestic life had reached greater perfect state and public security and confidence deeper. There is, he says, a cautious tone in the language when the rulers of the state are the breath of that untroubled joy for the high reverence paid to him, which characterizes the older collection, does not animate the state of society at the end of the B.C., with which we are thoroughly familiar from the writings of the prophets, and the condition of things hinted at in the latter part of this section, and this may therefore be contrasted with the superscription, be accurate at which the collection was made, as Ewald's conclusion. It is true we have no direct evidence of the later times of the monarchy, but the condition of those times was such as many of the proverbs of this section of the observation and experience of the time, but it by no means follows that the later partakes of this later tone; or that some of the proverbs may not reach back to the time of Solomon, and so justify the date which is given to the section, "These are the proverbs of Solomon." But of the sixth century B.C. we know so much, that the age of Solomon himself we know so much, that a thing belonging to that period is such a halo of dazzling splendour, that the people almost disappear, that it is almost impossible to assert that the circumstances of the time have given birth to many of the proverbs which apparently carry with them the marks of a later period. At best such reasoning from analogy is uncertain and hypothetical, and the inferences drawn vary with each commentator who examines it. Ewald discovers traces in chapters xxviii., xxix., though he assigns these to this section, while Hitzig regards xxv. 27 as a continuation of xxii. 16, and xxv. 28 as added probably after the year 722 B.C. In apparent precision in the assignment of the several sections, it must be confessed that the foundation, and the dates are almost entirely conjectural. All that we know about the time of Solomon, is that in the time of Hezekiah, in the last quarter of the 8th century B.C., supposed to contain what tradition has preserved as the proverbs of Solomon, and that the proverbs were believed to be of Solomon's time, and no good reason to doubt. Beyond

<sup>a</sup> Hitzig's theory about the Book of Proverbs in its present shape is this: that the oldest portion consists of chapters i.-ix., to which was added, probably after the year 760 B.C., the second part, x.-xxii. 16, xxviii. 17-xxix. 18; that in the last quarter of the same century the anthology, xxv.-xxvii., was formed, and coming into the hands of a man who already possessed the other two parts, inspired

him with the composition of xxii. 17-23 placed before the anthology, and inserted the last sheet of the second part. The xxviii. 17 was left without a beginning. From xxii. 1-16, he wrote xxviii. 1-16 and so on. This was after the exile.

nothing. Ewald, we have seen, assigns the whole of this section to the close of the 8th century B.C., long before which time, he says, most of the proverbs were certainly not written. But he is then compelled to account for the fact that in the superscription they are called "the proverbs of Solomon." He does so in this way. Some of the proverbs actually reach back into the age of Solomon, and those which are not immediately traceable to Solomon or his time, are composed with similar artistic flow and impulse. If the earlier collection rightly bears the name of "the proverbs of Solomon" after the mass which are his, this may claim to bear such a title of honour after some important elements. The argument is certainly not sound, that, because a collection of proverbs, the majority of which are Solomon's, is distinguished by the general title "the proverbs of Solomon," therefore a collection, in which at most but a few belong to Solomon or his time, is appropriately distinguished by the same superscription. It will be seen afterwards that Ewald attributes the superscription in xxv. 1 to the compiler of xxii. 17-xxv. 1.

The date of the sections i.-ix., xxii. 17-xxv. 1, has been variously assigned. That they were added about the same period Ewald infers from the occurrence of favourite words and constructions, and that that period was a late one he concludes from the traces which are manifest of a degeneracy from the purity of the Hebrew. It will be interesting to examine the evidence upon this point, for it is a remarkable fact, and one which is deeply instructive as showing the extreme difficulty of arguing from internal evidence, that the same details lead Ewald and Hitzig to precisely opposite conclusions; the former placing the date of i.-ix. in the first half of the 7th century, while the latter regards it as the oldest portion of the book, and assigns it to the 9th century. To be sure those points on which Ewald relies as indicating a late date for the section, Hitzig summarily disposes of as interpolations. Among the favourite words which occur in these chapters are חוכמה, *chocmâth*, "wisdom," for "wisdom" in the abstract, which is found only in i. 20, ix. 1, xxiv. 7; נָרְיָה, *zardh*, "the strange woman," and נִכְרִי, *noçriyyâh*, "the foreigner," the adulteress who seduces youth, the antithesis of the virtuous wife or true wisdom, only occur in the first collection in xxii. 14, but are frequently found in this, ii. 16, v. 3, 20, vi. 24, vii. 5, xxiii. 27. Traces of the decay of Hebrew are seen in such passages as v. 2, where דְּנִיפָה, a dual fem., is constructed with a verb masc. pl., though in v. 3 it has properly the feminine. The unusual plural דְּנִיפָה (viii. 4), says Ewald, would hardly be found in writings before the 7th century. These difficulties are avoided by Hitzig, who regards the passages in which they occur as interpolations. When we come to the internal historical evidence these two authorities are no less at issue with regard to their conclusions from it. There are many passages which point to a condition of things in the highest degree confused, in which robbers and lawless men roamed at large through the land and endeavoured to draw aside their younger contemporaries to the like dissolute life (i. 11-19, ii. 12-15, iv. 14-17, xxiv. 15). In this Ewald sees traces of a late date. But Hitzig avoids this conclusion by asserting that at all times there are individuals who are reckless and at war with society and who attach themselves to bands

of robbers and freebooters (comp. Judg. ix. 4; xi. 3 1 Sam. xxii. 2; Jer. vii. 11), and to such allusion is made in Prov. i. 10; but there is nowhere in these chapters (i.-ix.) a complaint of the general depravity of society. So far he is unquestionably correct, and no inference with regard to the date of the section can be drawn from these references. Further evidence of a late date Ewald finds in the warnings against lightly rising to oppose the public order of things (xxiv. 21), and in the beautiful exhortation (xxiv. 11) to rescue with the sacrifice of one's self the innocent who is being dragged to death, which points to a confusion of right pervading the whole state, of which we nowhere see traces in the older proverbs. With these conclusions Hitzig would not disagree, for he himself assigns a late date to the section xxii. 17-xxv. 34. We now come to evidence of another kind, and the conclusions drawn from it depend mainly upon the date assigned to the Book of Job. In this collection, says Ewald, there is a new danger of the heart warned against, which is not once thought of in the older collections, envy at the evident prosperity of the wicked (iii. 31, xxiii. 17, xxiv. 1, 19), a subject which for the first time is brought into the region of reflection and poetry in the Book of Job. Other parallels with this book are found in the teaching that man, even in the chastisement of God, should see His love, which is the subject of Prov. iii., and is the highest argument in the Book of Job; the general apprehension of Wisdom as the Creator and Disposer of the world (Prov. iii., viii.) appears as a further conclusion from Job xxviii.; and though the author of the first nine chapters of the Proverbs does not adopt the language of the Book of Job, but only in some measure its spirit and teaching, yet some images and words appear to be re-echoed here from that book (comp. Prov. viii. 25 with Job xxxviii. 6; Prov. ii. 4, iii. 14, viii. 11, 19, with Job xxviii. 12-19; Prov. vii. 23 with Job xvi. 15, xx. 25; Prov. iii. 23, &c., with Job v. 22, &c.). Consequently the writer of this section must have been acquainted with the Book of Job, and wrote at a later date, about the middle of the 7th century B.C. Similar resemblances between passages in the early chapters of the Proverbs and the Book of Job are observed by Hitzig (comp. Prov. iii. 25 with Job v. 21; Prov. ii. 4, 14 with Job iii. 21, 22; Prov. iv. 12 with Job xxviii. 7; Prov. iii. 11, 13 with Job v. 17; Prov. viii. 25 with Job xv. 7), but the conclusion which he derives is that the writer of Job had already read the Book of Proverbs, and that the latter is the more ancient. Reasoning from evidence of the like kind he places this section (i.-ix.) later than the Song of Songs, but earlier than the second collection (x. 1-xxii. 16, xxviii. 17-xxix.), which existed before the time of Hezekiah, and therefore assigns it to the 9th century B.C. Other arguments in support of this early date are the fact that idolatry is nowhere mentioned, that the offerings had not ceased (vii. 14., nor the congregations (v. 14)). The two last would agree as well with a late as with an early date, and no argument from the silence with respect to idolatry can be allowed any weight, for it would equally apply to the 9th century as to the 7th. To all appearances, Hitzig continues, there was peace in the land, and commerce was kept up with Egypt (vii. 16). The author may have lived in Jerusalem (i. 20, 21, vii. 12, viii. 3); vii. 16, 17 points to the luxury of a large city, and the educated language belongs to a citizen of the capital. After a

careful consideration of all the arguments which have been adduced, by Ewald for the late, and by Hitzig for the early date of this section, it must be confessed that they are by no means conclusive, and that we must ask for further evidence before pronouncing so positively as they have done upon a point so doubtful and obscure. In one respect they are agreed, namely, with regard to the unity of the section, which Ewald considers as an original whole, perfectly connected and flowing as it were from one outpouring. It would be a well ordered whole, says Hitzig, if the interpolations, especially vi. 1-19, iii. 22-26, viii. 4-12, 14-16, ix. 7-10, &c., are rejected. It never appears to strike him that such a proceeding is arbitrary and uncritical in the highest degree, though he clearly plumes himself on his critical sagacity. Ewald finds in these chapters a certain development which shows that they must be regarded as a whole and the work of one author. The poet intended them as a general introduction to the Proverbs of Solomon, to recommend wisdom in general. The blessings of wisdom as the reward of him who boldly strives after her are repeatedly set forth in the most charming manner, as on the other hand folly is represented with its disappointment and enduring misery. There are three main divisions after the title, i. 1-7. (a.) i. 8-iii. 35; a general exhortation to the youth to follow wisdom, in which all, even the higher arguments, are touched upon, but nothing fully completed. (b.) iv. 1-vi. 19 exhausts whatever is individual and particular; while in (c.) the language rises gradually with ever-increasing power to the most universal and loftiest themes, to conclude in the sublimest and almost lyrical strain (vi. 20-ix. 18). But, as Bertheau remarks, there appears nowhere throughout this section to be any reference to what follows, which must have been the case had it been intended for an introduction. The development and progress which Ewald observes in it are by no means so striking as he would have us believe. The unity of plan is no more than would be found in a collection of admonitions by different authors referring to the same subject, and is not such as to necessitate the conclusion that the whole is the work of one. There is observable throughout the section, when compared with what is called the earlier collection, a complete change in the form of the proverb. The single proverb is seldom met with, and is rather the exception, while the characteristics of this collection are connected descriptions, continuous elucidations of a truth, and longer speeches and exhortations. The style is more highly poetical, the parallelism is synonymous and not antithetic or synthetic, as in x. 1-xii. 16; and another distinction is the usage of *Elohim* in ii. 5, 17, iii. 4, which does not occur in x. 1-xii. 16. Amidst this general likeness, however, there is considerable diversity. It is not necessary to lay so much stress as Bertheau appears to do upon the fact that certain paragraphs are distinguished from those with which they are placed, not merely by their contents, but by their external form; nor to argue from this that they are therefore the work of different authors. Some paragraphs, it is true, are completed in ten verses, as i. 10-19, iii. 1-10, 21-20, iv. 10-19, viii. 12-21, 22-31; but it is too much to assert that an author, because he sometimes wrote paragraphs of ten verses, should always do so, or to say with Bertheau, if the whole were the work of one author it would be very remarkable if he only now and then bound himself by the

strict law of numbers. The argument seems to be the strictness of the law, and then attempts to lead the writer to observe it. There is more than the appeal to the difference in the formation of sentences and the whole manner of the language indicating diversity of authorship. Compare, e. g. with vii. 4-27, where the same subject is treated. In the former, one sentence is woven through 22 verses, while in the latter the language is easy, flowing, and appropriate. Again the connexion is interrupted by the insertion of vi. 1-19. In the previous chapter the exhortation to listen to the doctrine of the speaker is followed by the warning against intercourse with the adulteress. In vi. 1-19 the subject is abruptly changed, and a series of proverbs applicable to different relations of life is introduced. From all this Bertheau argues against Ewald that these introductory chapters could not have been the product of a single author, forming a gradually developed and consistent whole, but that they are a collection of admonitions by different poets, which all aim at rendering the youth capable of receiving good instruction, and inspiring him to strive after the possession of wisdom. This supposition is somewhat favored by the frequent repetitions of favourite figures of impersonations: the strange woman and wisdom are many times over in this section, which would hardly have been the case if it had been the work of one author. But the occurrence of these repetitions, if it is against the unity of authorship, shows that the different portions of the section must have been contemporaneous, and were written at a time when such vivid impersonations of wisdom and its opposites were current and familiar. The very thought is the same, and the question therefore to be considered is whether it is more probable that a writer would repeat himself, or that fragments of a number of writers should be found, distinguished by the same way of thinking, and by the use of the same striking figures and impersonations. If the proverbs spoken by one man were circulated only for a time, and after his death collected and arranged, there would almost of necessity be a recurrence of the same expressions and illustrations, and from this point of view the argument from repetitions loses much of its force. With regard to date as well as the authorship of this section it is impossible to pronounce with certainty. In its present form it did not exist till probably some long time after the proverbs which it contains were composed. There is positively no evidence that would lead us to a conclusion upon this point, and consequently the most opposite results have been arrived at: Ewald, as we have seen, places it in the 7th century, while Hitzig refers it to the 10th. At whatever time it may have reached its present shape there appears no sufficient reason to think that Solomon may not have uttered many a word of the proverbs which are here collected, although Ewald positively asserts that we have had a proverb of the Solomonian period. He assumes that it is a mere assumption, that the form of the Solomonian proverb is that which distinguishes the section x. 1-xii. 16, and has already been named. Bloch regards chap. i.-ix., as a general introduction to the work of the last editor, written by him as an introduction to the Proverbs of Solomon which follow, while i. 1-6 was intended by him as a description to indicate the aim of the book, as well reference to his own method than to the end of the book, and especially to the proverbs of Solomon.

contained in it. Bertholdt argues against Solomon being the author of these early chapters, that it was impossible for him, with his large harem, to have given so forcibly the precept about the blessings of a single wife (v. 18, &c.); nor, with the knowledge that his mother became the wife of David through an act of adultery, to warn so strongly against intercourse with the wife of another (vi. 24, &c., vii. 5-23). These arguments do not appear to us so strong as Bertholdt regarded them. Eichhorn, on the contrary, maintains that Solomon wrote the introduction in the first nine chapters. From this diversity of opinion, which he remarks is entirely the result of an examination of internal evidence, it seems to follow naturally that the evidence which leads to such varying conclusions is of itself insufficient to decide the question at issue.

We now pass on to another section, xxii. 17-xxiv., which contains a collection of proverbs marked by certain peculiarities. These are, 1. The structure of the verses, which is not so regular as in the preceding section, x. 1-xxii. 16. We find verses of eight, seven, or six words, mixed with others of eleven (xxii. 29, xxiii. 31, 35), fourteen (xxiii. 29), and eighteen words (xxiv. 12). The equality of the verse members is very much disturbed, and there is frequently no trace of parallelism. 2. A sentence is seldom completed in one verse, but most frequently in two; three verses are often closely connected (xxiii. 1-3, 6-8, 19-21); and sometimes as many as five (xxiv. 30-34). 3. The form of address, "my son," which is so frequent in the first nine chapters, occurs also here in xxiii. 19, 28, xxiv. 13; and the appeal to the hearer is often made in the second person. Ewald regards this section as a kind of appendix to the earliest collection of the proverbs of Solomon, added not long after the introduction in the first nine chapters, though not by the same author. He thinks it probable that the compiler of this section added also the collection of proverbs which was made by the learned men of the court of Hezekiah, to which he wrote the superscription in xiv. 1. This theory of course only affects the date of the section in its present form. When the proverbs were written there is nothing to determine. Berthieu maintains that they in great part proceeded from one poet, in consequence of a peculiar construction which he employs to give emphasis to his presentation of a subject or object by repeating the pronoun (xxii. 19; xxiii. 14, 15, 19, 20, 28; xxiv. 6, 27, 32). The compiler himself appears to have added xxii. 17-21 as a kind of introduction. Another addition (xxiv. 23-34) is introduced with "these also belong to the wise," and contains apparently some of "the words of the wise" to which reference is made in i. 6. Jahn regards it as a collection of proverbs not by Solomon. Hensler says it is an appendix to a collection of doctrines which is entirely lost and unknown; and with regard to the previous part of the section xxii. 17-xxiv. 22, he leaves it uncertain whether or not the author was a teacher to whom the son of a distinguished man was sent for instruction. Hitzig's theory has already been given.

After what has been said, the reader must be left to judge for himself whether Keil is justified in asserting so positively as he does the single authorship of chaps. i.-xxix., and in maintaining that "the contents in all parts of the collection show one and the same historical background, corresponding only to the relations, ideas, and circumstances

as well as to the progress of the culture and experiences of life, acquired by the political development of the people in the time of Solomon."

The concluding chapters (xxx., xxxi.) are in every way distinct from the rest and from each other. The former, according to the superscription, contains "the words of Agur the son of Jakeh." Who was Agur, and who was Jakeh, are questions which have been often asked, and never satisfactorily answered. The Rabbins, according to Isaiah, and Jerome after them, interpreted the name symbolically of Solomon, who "collected understanding" (from *Uq. Agur*, "to collect," "gather"), and is elsewhere called "Kohleth." All that can be said of him is that he is an unknown Hebrew sage, the son of an equally unknown Jakeh, and that he lived after the time of Hezekiah. Ewald attributes to him the authorship of xxx. 1-xxxi. 9, and places him not earlier than the end of the 7th or beginning of the 6th cent. B.C. Hitzig, as usual, has a strange theory: that Agur and Lemuel were brothers, both sons of the queen of Massa, a district in Arabia, and that the father was the reigning king. [See JAKEH.] Bunsen (*Bibl. Werk*, i. p. clxxviii.), following Hitzig, contends that Agur was an inhabitant of Massa, and a descendant of one of the five hundred Simeonites who in the reign of Hezekiah drove out the Amalekites from Mount Seir. All this is mere conjecture. Agur, whoever he was, appears to have had for his pupils Ithiel and Ucal, whom he addresses in xxx. 1-6, which is followed by single proverbs of Agur's. Chap. xxxi. 1-9 contains "the words of king Lemuel, the prophecy that his mother taught him." Lemuel, like Agur, is unknown. It is even uncertain whether he is to be regarded as a real personage, or whether the name is merely symbolical, as Eichhorn and Ewald maintain. If the present text be retained it is difficult to see what other conclusion can be arrived at. If Lemuel were a real personage he must have been a foreign neighbour-king or the chief of a nomadic tribe, and in this case the proverbs attributed to him must have come to the Hebrews from a foreign source, which is highly improbable and contrary to all we know of the people. Dr. Davidson indeed is in favour of altering the punctuation of xxx. 1, with Hitzig and Berthieu, by which means Agur and Lemuel become brothers, and both sons of a queen of Massa. Reasons against this alteration of the text are given under the article JAKEH. Eichhorn maintains that Lemuel is a figurative name appropriate to the subject. [LEMUEL.]

The last section of all, xxxi. 10-31, is an alphabetical acrostic in praise of a virtuous woman. Its artificial form stamps it as the production of a late period of Hebrew literature, perhaps about the 7th century B.C. The colouring and language point to a different author from the previous section, xxx. 1-xxxi. 9.

To conclude, it appears, from a consideration of the whole question of the manner in which the Book of Proverbs arrived at its present shape, that the nucleus of the whole was the collection of Solomon's proverbs in x. 1-xxii. 16; that to this was added the further collection made by the learned men of the court of Hezekiah, xxv.-xxix.; that these two were put together and united with xxii. 17-xxiv., and that to this as a whole the introduction i.-ix. was affixed, but that whether it was compiled by the same writer who added xxii. 16-xxiv. cannot be determined. Nor is it possible to assert that this same compiler may not have added

the concluding chapters of the book to his previous collection. With regard to the date at which the several portions of the book were collected and put in their present shape, the conclusions of various critics are uncertain and contradictory. The chief of these have already been given.

The nature of the contents of the Book of Proverbs precludes the possibility of giving an outline of its plan and object. Such would be more appropriate to the pages of a commentary. The chief authorities which have been consulted in the preceding pages are the introductions of Carpzov, Eichhorn, Bertholdt, Jahn, De Wette, Keil, Davidson, and Bleek; Rosenmüller, *Scholia*; Ewald, *Die Dicht. des A. B.* 4 Th.; Bertheau, *Die Sprüche Salomo's*; Hitzig, *Die Sprüche Salomo's*; Elster, *Die Salomonischen Sprüche*. To these may be added, as useful aids in reading the Proverbs, the commentaries of Albert Schultens, of Eichel in Mendelssohn's Bible (perhaps the best of all), of Loewenstein, Urnreit, and Moses Stuart. There is also a new translation by Dr. Noyes, of Harvard University, of the three Books of Proverbs, Ecclesiastes, and Canticles, which may be consulted, as well as the older works of Hodgson and Helden. [W. A. W.]

**PROVINCE** (מְרִינָה: *ἐπαρχία*, N. T.; *χώρα*, LXX.; *provincia*). It is not intended here to do more than indicate the points of contact which this word presents with Biblical history and literature.

(1). In the O. T. it appears in connexion with the wars between Ahab and Benhadad (1 K. xx. 14, 15, 19). The victory of the former is gained chiefly "by the young men of the princes of the provinces," i. e. probably, of the chiefs of tribes in the Gilead country, recognizing the supremacy of Ahab, and having a common interest with the Israelites in resisting the attacks of Syria. They are specially distinguished in ver. 15 from "the children of Israel." Not the hosts of Ahab, but the youngest warriors "armour-bearers," Keil, *in loc.* of the land of Jephthah and Elijah, fighting with a fearless faith, are to carry off the glory of the battle (comp. Ewald, *Gesch.* iii. 492).

(2). More commonly the word is used of the divisions of the Chaldean (Dan. ii. 49, iii. 1, 30) and the Persian kingdoms (Ezr. ii. 1; Neh. vii. 6; Esth. i. 1, 22, ii. 3, &c.). The occurrence of the word in Eccles. ii. 8, v. 8, may possibly be noted as an indication of the later date now commonly ascribed to that book.

The facts as to the administration of the Persian provinces which come within our view in these passages are chiefly these:—Each province has its own governor, who communicates more or less regularly with the central authority for instructions (Ezr. iv. and v.). Thus Tatnai, governor of the provinces on the right bank of the Euphrates, applies to Darius to know how he is to act as to the conflicting claims of the Apharsachites and the Jews (Ezr. v.). Each province has its own system of finance, subject to the king's direction (Herod. iii. 89). The "treasurer" is ordered to spend a given amount upon the Israelites (Ezr. vii. 22), and to exempt them from all taxes (vii. 24). [TAXES.] The total number of the provinces is given at 127 (Esth. i. 1, viii. 9). Through the whole extent of the kingdom there is carried something like a postal system. The king's couriers (Βιβλιδφοροί, the

ἑγγαροί of Herod. viii. 98), carry his letters of orders (Esth. i. 22, iii. 13). From all Persian concubines are collected for his harem (x. 3). Horses, mules, or dromedaries, are employed in this service (viii. 10). (Comp. Herod. viii. 98, Xen. *Cyrop.* viii. 6; Heeren's *Persien*, ch. 2.)

The word is used, it must be remembered, of smaller sections of a satrapy rather than of the satrapy itself. While the provinces are 127, the satrapies are only 29 (Herod. iii. 52). The Jew who returned from Babylon are described as "children of the province" (Ezr. ii. 1; Neh. vi. 9), and have a separate governor [TIMSHARAI] of his own race (Ezr. ii. 63; Neh. v. 14, vii. 2), and they are subject to the satrap (חֲנָנִי) of the province west of the Euphrates (Ezr. v. 7, vi. 1).

(3). In the N. T. we are brought into contact with the administration of the provinces of the Roman empire. The classification given by Tacitus (xvii. p. 840) of provinces (*ἐπαρχιαι*) supports the need military control, and therefore placed under the immediate government of the emperor, and those still belonging theoretically to the senate and administered by the senate; and of the last again into *proconsular* (*ἀσπαραχική*) and *praetorial* (*σπαρταρχική*), is recognized, more or less fully, in the Gospels and the Acts. *Cyrenia* (Κύρηναι) is the *ἡγεμονία* of Syria (Luke ix. 3), the word here in this case used for *praeses* or *proconsul*. This was the *ἡγεμονία* of the sub-province of Judea (Luke xiii. 1, Matt. xxvii. 2, &c.), as pointed out by the power of a *legatus*; and the same title is given to his successors, Felix and Festus (Acts xxi. 24, xxv. 1, xxvi. 30). The governors of the praetorial provinces of Cyprus, Achaia, and Asia, on the other hand, are rightly described as *ἀσπαραχικοί*, *proconsuls* (Acts xiii. 7, xviii. 12, &c.). In the two former cases the province had been originally an imperial one, but had been transferred to Cyprus by Augustus (Dio Cass. lxx. 4), and by Claudius (Sueton. *Claud.* 25), to the latter. The *σπαρταρχοί* of Acts xvi. 22 ("magistrates," A. V.), on the other hand, were the *ἀσπαραχικοί* or *praetors* of a Roman colony. The duty of the legal and other provincial governors to report quarterly to the emperor is recognized in Acts xxi. 32, which furnished the groundwork for the question of Pilate. [PILATE.] The right of any Roman citizen to appeal from a provincial governor to the emperor is asserted by St. Paul (Acts xvi. 35). In the council (*συμβούλιον*) of Acts xxi. 39, we recognize the assessors who were appointed to be part in the judicial functions of the governor. The authority of the *legatus*, praetor, or *proconsul*, extended, it need hardly be said, to capital punishment (subject, in the case of Roman citizens, to the right of appeal), and, in most cases, the *proconsul* inflicting it belonged to him exclusively. It was necessary for the Sanhedrin to pass Pilate's case to the execution of our Lord (John xix. 11). The strict letter of the law forbade *proconsuls* to attempt to take their wives with them, but in the case of Pilate's wife (Matt. xxvii. 19, and *ibid.* Acts xxiv. 24) show that it had fallen into disuse. Tacitus (*Ann.* iii. 33, 34) records an unsuccessful attempt to revive the old practice.

The financial administration of the Roman provinces is discussed under *PERCEPIONS* and *TAXES*. [E. A. F.]

\* The A. V. rendering "deputy" had, it should be remembered, a more definite value in the days of Elizabeth

and James than it has for us. The phrase "deputy" was officially "the Lord Deputy."

**PSALMS. BOOK OF.** 1. *The Collection as a Whole.*—It does not appear how the Psalms were, as a whole, anciently designated. Their present Hebrew appellation is תהלים, "Praises." But in the actual superscriptions of the psalms the word תהלה is applied only to one, Ps. cxlv., which is indeed emphatically a praise-hymn. The LXX. entitled them ψαλμοι, or "Psalms," using the word ψαλμος at the same time as the translation of מזמור, which signifies strictly a rhythmical composition (Lowth, *Prælect.* III.), and which was probably applied in practice to any poem specially intended, by reason of its rhythm, for musical performance with instrumental accompaniment. But the Hebrew word is, in the O. T., never used in the plural; and in the superscriptions of even the Davidic psalms it is applied only to some, not to all; probably to those which had been composed most expressly for the harp. The notice at the end of Ps. lxxii. has suggested that the Psalms may in the earliest times have been known as תפלות, "Prayers;" and in fact "Prayer" is the title prefixed to the most ancient of all the psalms, that of Moses, Ps. xc. But the same designation is in the superscriptions applied to only three besides, Pss. xvii., lxxxvi., cii.; nor have all the psalms the character of prayers. The other special designations applied to particular psalms are the following: שיר, "Song," the outpouring of the soul in thanksgiving, used in the first instance of a hymn of private gratitude, Ps. xxx., afterwards of hymns of great national thanksgiving, Pss. xlv., xlviii. lxx., &c.; משכיל, *muschil*, "Instruction" or "Homily," Pss. xxxii., xli., xlv., &c. (comp. the אשכנח, "I will instruct thee," in Ps. xxxii. 8); מנצח, *menachem*, "Private Memorial," from the root נחם (perhaps also with an anagrammatical allusion to the root נחך, "to support," "maintain," comp. Ps. xvi. 5), Pss. xvi., lvi., lxx., &c.; עדות, *eduth*, "Testimony," Pss. lx., lxxx.; and שנין, *shinnim*, "Irregular or Dithyrambic Ode," Ps. vii. The strict meaning of these terms is in general to be gathered from the earlier superscriptions. Once made familiar to the psalmists, they were afterwards employed by them more loosely.

The Christian Church obviously received the Psalter from the Jews not only as a constituent portion of the sacred volume of Holy Scripture, but also as the liturgical hymn-book which the Jewish Church had regularly used in the Temple. The number of separate psalms contained in it is, by the concordant testimony of all ancient authorities, one hundred and fifty; the avowedly "supernumerary" psalm which appears at the end of the Greek and Syriac Psalters being manifestly apocryphal. This total number commends itself by its internal probability as having proceeded from the last sacred collector and editor of the Psalter. In the details, however, of the numbering, both the Greek and Syriac Psalters differ from the Hebrew. The Greek translators joined together Pss. ix., x. and Pss. cxiv., cxv., and then divided Ps. cxvi. and Ps. cxvii.: this was perpetuated in the versions derived from the Greek, and amongst others in the Latin Vulgate. The Syriac so far followed the Greek as to join together Pss. cxv., cxvi., and to divide Ps. cxvii. Of the three divergent systems of numbering, the Hebrew (as followed in our A. V.) is, even on internal grounds, to be preferred.

It is decisive against the Greek numbering that Ps. cxvi., being symmetrical in its construction, will not bear to be divided; and against the Syriac, that it destroys the outward correspondence in numerical place between the three great triumphal psalms, Pss. xviii., lxxviii., cxviii., as also between the two psalms containing the praise of the Law, Pss. xix., cxi. There are also some discrepancies in the versal numberings. That of our A. V. frequently differs from that of the Hebrew in consequence of the Jewish practice of reckoning the superscription as the first verse.

2. *Component Parts of the Collection.*—Ancient tradition and internal evidence concur in parting the Psalter into five great divisions or books. The ancient Jewish tradition is preserved to us by the abundant testimonies of the Christian Fathers. And of the indications which the sacred text itself contains of this division the most obvious are the doxologies which we find at the ends of Pss. xli., lxxii., lxxxix., cvi., and which, having for the most part no special connexion with the psalms to which they are attached, mark the several ends of the first four of the five Books. It suggests itself at once that these Books must have been originally formed at different periods. This is by various further considerations rendered all but certain, while the few difficulties which stand in the way of admitting it vanish when closely examined.

Thus, there is a remarkable difference between the several Books in their use of the divine names Jehovah and Elohim, to designate Almighty God. In Book I the former name prevails: it is found 272 times, while Elohim occurs but 15 times. (We here take no account of the superscriptions or doxology, nor yet of the occurrences of Elohim when inflected with a possessive suffix.) On the other hand, in Book II. Elohim is found more than five times as often as Jehovah. In Book III. the preponderance of Elohim in the earlier is balanced by that of Jehovah in the later psalms of the Book. In Book IV. the name Jehovah is exclusively employed; and so also, virtually, in Book V., Elohim being there found only in two passages incorporated from earlier psalms. Those who maintain, therefore, that the psalms were all collected and arranged at once, contend that the collector distributed the psalms according to the divine names which they severally exhibited. But to this theory the existence of Book III., in which the preferential use of the Elohim gradually yields to that of the Jehovah, is fatal. The large appearance, in fact, of the name Elohim in Books II. and III. depends in great measure on the period to which many of the psalms of those Books belong; the period from the reign of Solomon to that of Hezekiah, when through certain causes the name Jehovah was exceptionally disused. The preference for the name Elohim in most of the Davidic psalms which are included in Book II., is closely allied with that character of those psalms which induced David himself to exclude them from his own collection, Book I.; while, lastly, the sparing use of the Jehovah in Ps. lxxviii., and the three introductory psalms which precede it, is designed to cause the name, when it occurs, and above all JAN, which is emphatic for Jehovah, to shine out with greater force and splendour.

This, however, brings us to the observance of the superscriptions which mark the authorship of the several psalms; and here again we find the several groups of psalms which form the respective five Books distinguished, in great measure, by their

superscriptions from each other. Book I. is exclusively Davidic. Of the forty-one psalms of which it consists, thirty-seven have David's name prefixed; and of the remaining four, Ps. i., ii., are probably outwardly anonymous only by reason of their prefatory character, Ps. x., xxxiii., by reason of their close connexion with those which they immediately succeed.\* Book II. (in which the apparent anonymousness of Ps. xliii., lvi., lvii., lxi., may be similarly explained) falls, by the superscriptions of its psalms, into two distinct subdivisions, a Levitic and a Davidic. The former consists of Ps. xlii.-xlix., ascribed to the Sons of Korah, and Ps. l., "A Psalm of Asaph;" the latter comprises Ps. li.-lxi., bearing the name of David, and supplemented by Ps. lxxii., the psalm of Solomon. In Book III. (Ps. lxxiii.-lxxxix.), where the Asaphic psalms precede those of the Sons of Korah, the psalms are all ascribed, explicitly or virtually, to the various Levite singers, except only Ps. lxxxvi., which bears the name of David; this, however, is not set by itself, but stands in the midst of the rest. In Books IV., V., we have, in all, seventeen psalms marked with David's name. They are to a certain extent, as in Book III., mixed with the rest, sometimes singly, sometimes in groups. But these Books differ from Book III. in that the non-Davidic psalms, instead of being assigned by superscriptions to the Levite singers, are left anonymous. Special attention, in respect of authorship, is drawn by the superscriptions only to Ps. xc., "A Prayer of Moses," &c.; Ps. cii., "A Prayer of the afflicted," &c.; and Ps. cxvii., marked with the name of Solomon.

In reasoning from the phenomena of the superscriptions, which indicate in many instances not only the authors, but also the occasions of the several psalms, as well as the mode of their musical performance, we have to meet the preliminary enquiry which has been raised, Are the superscriptions authentic? For the affirmative it is contended that they form an integral, and till modern times almost undisputed, portion of the Hebrew text of Scripture;† that they are in analogy with other biblical super- or subscriptions, Davidic or otherwise (comp. 2 Sam. i. 18, probably based on an old superscription; ib. xxiii. 1; Is. xxxviii. 9; Hab. iii. 1, 19); and that their diversified, unsystematic, and often obscure and enigmatical character is inconsistent with the theory of their having originated at a later period. On the other hand is urged their analogy with the untrustworthy subscriptions of the N. T. epistles; as also the fact that many arbitrary superscriptions are added in the Greek version of the Psalter. The above represents, however, but the outside of the controversy. The real pith of it lies in this: Do they, when individually sifted, approve themselves as so generally correct, and as so free from any single fatal objection to their credit, as to claim our universal confidence? This can evidently not be discussed here. We must simply avow our conviction, founded on thorough examination, that they are, when rightly interpreted, fully trustworthy, and that every separate objection that has been made to the correctness of any one of them can be fairly met. Moreover,

\* An old Jewish canon, which may be deemed to hold good for the earlier but not for the later Books, enacts that all anonymous psalms be accounted the compositions of the authors named in the superscriptions last preceding.

most of the arguments of their assailants are obviously recoil upon themselves. Thus when it is alleged that the contents of Ps. cxlvi. have no connexion with the occasion indicated in the superscription, we reply that the fact of the connexion not being readily apparent renders it impossible that the superscription should have been put by any but David himself.

Let us now then trace the bearing of the superscriptions upon the date and method of compilation of the several Books. Book I. is, by the superscriptions, entirely Davidic; nor do we find a trace of any but David's authorship. No trace exists in the mention of the "Temple" (Ps. 7), for that word is even in 1 Sam. x. 8, 9, applied to the Tabernacle; nor yet in the phrase "bringeth back the captivity" (Ps. 7), which elsewhere used, idiomatically, with great latitude of meaning (Job xlii. 10; Hos. vi. 11; Is. 53); nor yet in the acrosticism of Ps. xvi. 6, for that all acrostic psalms are of late date is a purely gratuitous assumption, and some even of the most sceptical critics admit the Davidic authorship of the partially acrostic Ps. ix., x. All the psalms of Book I. being thus Davidic, we may well think that the compilation of the Book was also Davidic work. In favour of this is the circumstance that it does not comprise all David's psalms, as the latest, which yet would have been all handed in it by any subsequent collector; also the circumstance that its two prefatory psalms, although superscribed, are yet shown by internal evidence to have proceeded from David himself; and furthermore, that of the two recensions of the same hymn, Ps. xiv., liii., it prefers that which seems to have been more specially adapted by its original author to the temple-service. Book II. appears by the date of its latest psalm, Ps. xlii., to have been compiled in the reign of King Hezekiah. It would naturally comprise, 1st, several or most of the Levitic psalms anterior to that date; and 2dly, the remainder of the psalms of David, previously compiled. To these latter the collector, after prefixing the single psalm of Solomon, has added the notice that "the prayers of David the son of Jesse are ended" (Ps. lxxii. 20); evidently implying, at least on the *prima facie* view, that no new compositions of the royal psalmist remained. Then do we find, in the later Books III., IV., &c., further psalms yet marked with David's name. Another question shall help us to reply. How do we find, in Book III. rather than Book II., whole psalms, Ps. lxxiii.-lxxxiii., bearing the name of David's contemporary musician Asaph? Could it be because they proceeded not from Asaph himself? No critic whatever contends that all these psalms belong to the age of David; and, in no case, internal evidence is in every single instance in favour of a later origin. They were composed by the "sons of Asaph" (2 Chr. xix. 13, 14, 15, &c.), the members, by hereditary descent, of the choir which Asaph founded. It was to be expected that these psalmists would, in ascribing their psalms, prefer honouring and perpetuating the memory of their ancestor to obscuring his own personal names on the Church's annals.

† Well says Bossuet, *Discours*, § 28. "Qui non modo modo intelligent, video esse quoniam proutque apud forum auctoritate dubitatur, ex antiquis canonibus Theodori de Mopsestia formam esse exsequenda."

which both explains the present superscriptions, and also renders it improbable that the person intended in them could, according to a frequent but now waning hypothesis, be any second Asaph, of younger generation and of inferior fame. The superscriptions of Ps. lxxviii., lxxix., "Maschil of Heman," "Maschil of Ethan," have doubtless a like purport; the one psalm having been written, as in fact the rest of its superscription states, by the Sons of Korah, the choir of which Heman was the founder; and the other correspondingly proceeding from the third Levitical choir, which owed its origin to Ethan or Jeduthun. If now in the times posterior to those of David the Levite choirs prefixed to the psalms which they composed the names of Asaph, Heman, and Ethan, out of a feeling of veneration for their memories; how much more might the name of David be prefixed to the utterances of those who were not merely his descendants, but also the representatives for the time being, and so in some sort the pledges, of the perpetual royalty of his lineage! The name David is used to denote, in other parts of Scripture, after the original David's death, the then head of the Davidic family; and so, in prophecy, the Messiah of the seed of David, who was to sit on David's throne (1 K. xii. 16; Hos. iii. 5; Is. lv. 3; Jer. xxx. 9; Es. xxxiv. 23, 24). And thus then we may explain the meaning of the later Davidic superscriptions in the Psalter. The psalms to which they belong were written by Hezekiah, by Josiah, by Zerubbabel, or others of David's posterity. And this view is confirmed by various considerations. It is confirmed by the circumstance that in the later Books, and even in Book V. taken alone, the psalms marked with David's name are not grouped all together. It is confirmed in some instances by the internal evidence of occasion: thus Psalm ci. can ill be reconciled with the historical circumstances of any period of David's life, but suits exactly with those of the opening of the reign of Josiah. It is confirmed by the extent to which some of these psalms—Ps. lxxvi., cviii., cxliv.—are compacted of passages from previous psalms of David. And it is confirmed lastly by the fact that the Hebrew text of many (see, above all, Ps. cxxxix.) is marked by grammatical Chaldaisms, which are entirely unparalleled in Ps. i.—lxxii., and which thus afford sure evidence of a comparatively recent date. They cannot therefore be David's own; yet that the superscriptions are not on that account to be rejected, as false, but must rather be properly interpreted, is shown by the improbability that any would, carelessly or presumptuously, have prefixed David's name to various psalms scattered through a collection, while yet leaving the rest—at least in Books IV., V.—altogether unsuperscribed.

The above explanation removes all serious difficulty respecting the history of the later Books of the Psalter. Book III., the interest of which centres in the times of Hezekiah, stretches out, by its last two psalms, to the reign of Manasseh: it was probably compiled in the reign of Josiah. Book IV. contains the remainder of the psalms up to the date of the Captivity; Book V. the psalms of the Return. There is nothing to distinguish these two Books from each other in respect of outward decoration or arrangement, and they may have been compiled together in the days of Nehemiah.

The superscriptions, and the places which the psalms themselves severally occupy in the Psalter, are thus the two guiding clues by which, in con-

junction with the internal evidence, their various authors, dates, and occasions, are to be determined. In the critical results obtained on these points by those scholars who have recognized and used these helps there is, not indeed uniformity, but at least a visible tendency towards it. The same cannot be said for the results of the judgments of those, of whatever school, who have neglected or rejected them; nor indeed is it easily to be imagined that internal evidence alone should suffice to assign one hundred and fifty devotional hymns, even approximately, to their several epochs.

It would manifestly be impossible, in the compass of an article like the present, to exhibit in detail the divergent views which have been taken of the dates of particular psalms. There is, however, one matter which must not be altogether passed over in silence: the assignment of various psalms, by a large number of critics, to the age of the Maccabees. Two preliminary difficulties fatally beset such procedure: the hypothesis of a Maccabean authorship of any portion of the Psalter can ill be reconciled either with the history of the O. T. canon, or with that of the translation of the LXX. But the difficulties do not end here. How,—for we shall not here discuss the theories of Hitzig and his followers Lengerke and Justus Olshausen, who would represent the greater part of the Psalter as Maccabean,—how is it that the psalms which one would most naturally assign to the Maccabean period meet us not in the close but in the middle, i. e. in the Second and Third Books of the Psalter? The three named by De Wette (*Eind. in des A. T. §270*) as bearing, apparently a Maccabean impress, are Ps. xlii., li., lxxiv.; and in fact these, together with Ps. lxxix., are perhaps all that would, when taken alone, seriously suggest the hypothesis of a Maccabean date. When then arise the early places in the Psalter which these occupy? But even in the case of these, the internal evidence, when more narrowly examined, proves to be in favour of an earlier date. In the first place the superscription of Ps. li. cannot possibly have been invented from the historical books, inasmuch as it disagrees with them in its details. Then the mention by name in that psalm of the Israelitish tribes, and of Moab, and Philistia, is unsuited to the Maccabean epoch. In Ps. xlii. the complaint is made that the tree of the nation of Israel was no longer spreading over the territory that God had assigned it. Is it conceivable that a Maccabean psalmist should have held this language without making the slightest allusion to the Babylonish captivity; as though the tree's growth were now first being seriously impeded by the wild stocks around, notwithstanding that it had once been entirely transplanted, and that, though restored to its place, it had been weakly ever since? In Ps. lxxiv. it is complained that "there is no more any prophet." Would that be a natural complaint at a time when Jewish prophecy had ceased for more than two centuries? Lastly, in Ps. lxxix. the mention of "kingdoms" in ver. 6 ill suits the Maccabean time; while the way in which the psalm is cited by the author of the First Book of Maccabees (vii. 16, 17), who omits those words which are foreign to his purpose, is such as would have hardly been adopted in reference to a contemporary composition.

3. *Connexion of the Psalms with the Israelitish history.*—In tracing this we shall, of course, assume the truth of the conclusions at which in the previous section we have arrived.

The psalms grew, essentially and gradually, out of the personal and national career of David and of Israel. That of Moses, Psalm xc., which, though it contributed little to the production of the rest, is yet, in point of actual date, the earliest, faithfully reflects the long, weary wanderings, the multiplied provocations, and the consequent punishments of the wilderness; and it is well that the Psalter should contain at least one memorial of those forty years of toil. It is, however, with David that Israelitish psalmody may be said virtually to commence. Previous mastery over his harp had probably already prepared the way for his future strains, when the anointing oil of Samuel descended upon him, and he began to drink in special measure, from that day forward, of the Spirit of the Lord. It was then that, victorious at home over the mysterious melancholy of Saul and in the field over the vaunting champion of the Philistine hosts, he sang how from even babes and sucklings God had ordained strength because of His enemies (Ps. viii.). His next psalms are of a different character: his persecutions at the hands of Saul had commenced. Ps. lviii. was probably written after Jonathan's disclosures of the murderous designs of the court: Ps. lix. when his house was being watched by Saul's emissaries. The inhospitality of the court of Achish at Gath, gave rise to Ps. lvi.: Ps. xxxiv. was David's thanksgiving for deliverance from that court, not unmingled with shame for the unworthy stratagem to which he had there temporarily had recourse. The associations connected with the cave of Adullam are embodied in Ps. lvii.: the feelings excited by the tidings of Doeg's servility in Ps. lii. The escape from Keilah, in consequence of a divine warning, suggested Ps. xxi. Ps. liv. was written when the Ziphites officiously informed Saul of David's movements. Pss. xxxv., xxxvi., recall the colloquy at Engedi. Nabal of Carmel was probably the original of the fool of Ps. lxxiii.; though in this case the closing verse of that psalm must have been added when it was further altered, by David himself, into Ps. xiv. The most thoroughly idealized picture suggested by a retrospect of all the dangers of his outlaw-life is that presented to us by David in Ps. xxii. But in Ps. xxiii., which forms a side-piece to it, and the imagery of which is drawn from his earlier shepherd-days, David acknowledges that his past career had had its brighter as well as its darker side; nor had the goodness and mercy which were to follow him all the days of his life been ever really absent from him. Two more psalms, at least, must be referred to the period before David ascended the throne, viz. xxxviii. and xxxix., which naturally associate themselves with the distressing scene at Ziklag after the inroad of the Amalekites. Ps. xl. may perhaps be the thanksgiving for the retrieval of the disaster that had there befallen.

When David's reign has commenced, it is still with the most exciting incidents of his history, private or public, that his psalms are mainly associated. There are none to which the period of his reign at Hebron can lay exclusive claim. But after the conquest of Jerusalem his psalmody opened afresh with the solemn removal of the ark to Mount Zion; and in Pss. xxiv.-xxix., which belong together, we have the earliest definite instance of David's systematic composition or arrangement of psalms for public use. Ps. xxx. is of the same date: it was composed for the dedication of David's new palace, which took place on the same day with the

establishment. Other psalm allusions to conveyed the David in the imagery of P of this period against Edom conducted by the allied Am the terminat Rabbah. In two psalms episode while himself, but laboured, an own name, permit the f Zion, nor the be completed which it gav from Absalom (the "Cush" which reflect which possib Ziba and Me the wilderness.

The cours yet complete him for the

Temple (1 Chr. xxviii., xxix.) would naturally call forth a renewal of his best efforts to glorify the God of Israel in psalms; and to this occasion we doubtless owe the great festal hymns Psa. lxxv.-lxxvii., lxxviii., containing a large review of the past history, present position, and prospective glories of God's chosen people. The supplications of Psa. lxxix. suit best with the renewed distress occasioned by the sedition of Adonijah. Psa. lxxxi., to which Psa. lxx., a fragment of a former psalm, is introductory, forms David's parting strain. Yet that the psalmody of Israel may not seem finally to terminate with him, the glories of the future are forthwith anticipated by his son in Psa. lxxxi. And so closes the first great blaze of the lyrical devotions of Israel. David is not merely the soul of it; he stands in it absolutely alone. It is from the events of his own career that the greater part of the psalms have sprung; he is their author, and on his harp are they first sung; to him too is due the design of the establishment of regular choirs for their future sacred performance; his are all the arrangements by which that design is carried out; and even the improvement of the musical instruments needed for the performance is traced up to him (Amos vi. 5).

For a time the single psalm of Solomon remained the only addition to those of David. Solomon's own gifts lay mainly in a different direction; and no sufficiently quickening religious impulses mingled with the generally depressing events of the reigns of Rehoboam and Abijah to raise up to David any lyrical successor. If, however, religious psalmody were to revive, somewhat might be not unreasonably anticipated from the great assembly of King Asa (2 Chr. xv.); and Psa. l. suits so exactly with the circumstances of that occasion, that it may well be assigned to it. Internal evidence renders it more likely that this "Psalm of Asaph" proceeded from a descendant of Asaph than from Asaph himself; and possibly its author may be the Azariah the son of Obed, who had been moved by the Spirit of God to kindle Asa's zeal. Another revival of psalmody more certainly occurred under Jehoshaphat at the time of the Moabite and Ammonite invasion (2 Chr. xx.). Of this, Psa. xlvii., xlviii. were the fruits; and we may suspect that the Levite singer Jahaziel, who foretold the Jewish deliverance, was their author. The great prophetic ode Psa. xlv. connects itself most readily with the splendours of Jehoshaphat's reign. And after that psalmody had thus definitely revived, there would be no reason why it should not thenceforward manifest itself in seasons of anxiety, as well as of festivity and thanksgiving. Hence Psa. xlix. Yet the psalms of this period flow but sparingly. Psa. xlii.-xliv., lxxiv., are best assigned to the reign of Ahaz; they delineate that monarch's desecration of the sanctuary, the sighings of the faithful who had exiled themselves in consequence from Jerusalem, and the political humiliation to which the kingdom of Judah was, through the ravellings of Ahaz, reduced. The reign of Hezekiah is naturally rich in psalmody. Psa. xlii., lxxiii., lxxv., lxxvi., connect themselves with the resistance to the supremacy of the Assyrians and the divine destruction of their host. The first of these psalms indeed would by its place in the Psalter more naturally belong to the deliverance in the days of Jehoshaphat, to which some, as Delitzsch, actually refer it; but if internal evidence be deemed to establish sufficiently its later date, it may have been exceptionally permitted to appear in Book II. on account of its similarity in style to Psa. xlviii.,

xlvi. We are now brought to a series of psalms of peculiar interest, springing out of the political and religious history of the separated ten tribes. In date of actual composition they commence before the times of Hezekiah. The earliest is probably Psa. lxxx., a supplication for the Israelitish people at the time of the Syrian oppression. Psa. lxxxi. is an earnest appeal to them, indicative of what God would yet do for them if they would hearken to his voice: Psa. lxxxii. a stern reproof of the internal oppression prevalent, by the testimony of Amos, in the realm of Israel. In Psa. lxxxiii. we have a prayer for deliverance from that extensive confederacy of enemies from all quarters, of which the traces meet us in Joel iii., Amos i., and which probably was eventually crushed by the contemporaneous victories of Jeroboam II. of Israel and Uzziah of Judah. All these psalms are referred by their superscriptions to the Levite singers, and thus bear witness to the efforts of the Levites to reconcile the two branches of the chosen nation. In Psa. lxxxviii., belonging, probably, to the opening of Hezekiah's reign, the psalmist assumes a bolder tone, and, reproving the disobedience of the Israelites by the parable of the nation's earlier rebellions, sets forth to them the Temple at Jerusalem as the appointed centre of religious worship, and the heir of the house of David as the sovereign of the Lord's choice. This remonstrance may have contributed to the partial success of Hezekiah's messages of invitation to the ten tribes of Israel. Psa. lxxxiv. represents the thanks and prayers of the northern pilgrims, coming up, for the first time in two hundred and fifty years, to celebrate the passover in Jerusalem: Psa. lxxxv. may well be the thanksgiving for the happy restoration of religion, of which the advent of these pilgrims formed part. Psa. lxxxvii., on the other hand, is the lamentation of the Jewish Church for the terrible political calamity which speedily followed, whereby the inhabitants of the northern kingdom were carried into captivity, and Joseph lost, the second time, to Jacob. The prosperity of Hezekiah's own reign outweighed the sense of this heavy blow, and nursed the holy faith whereby the king himself in Psa. lxxxvii., and the Levites in Psa. lxxxviii., anticipated the future welcome of all the Gentiles into the Church of God. Psa. lxxxix. (an Asaphic psalm, and therefore placed with the others of like authorship) may best be viewed as a picture of the evil days that followed through the transgressions of Manasseh. And in Psa. lxxxviii., lxxxix. we have the pleadings of the nation with God under the severest trial that it had yet experienced, the captivity of its anointed sovereign, and the apparent failure of the promises made to David and his house.

The captivity of Manasseh himself proved to be but temporary; but the sentence which his sins had provoked upon Judah and Jerusalem still remained to be executed, and precluded the hope that God's salvation could be revealed till after such an outpouring of His judgments as the nation never yet had known. Labour and sorrow must be the lot of the present generation; through these mercy might occasionally gleam, but the glory which was eventually to be manifested must be for posterity alone. The psalms of Book IV. bear generally the impress of this feeling. The Messianic Psalm xc., from whatever cause here placed, harmonizes with it. Psa. xcii., xciii. are of a peaceful, simple, liturgical character; but in the series of psalms Psa. xciii.-c. which foretell the future

advent of God's kingdom, the days of adversity of the Chaldean oppression loom in the foreground. Ps. ci., ciii., "of David," readily refer themselves to Josiah as their author; the former embodies his early resolutions of piety; the latter belongs to the period of the solemn renewal of the covenant after the discovery of the book of the Law, and after the assurance to Josiah that for his tenderness of heart he should be graciously spared from beholding the approaching evil. Intermediate to these in place, and perhaps in date, is Ps. cii., "A Prayer of the afflicted," written by one who is almost entirely wrapped up in the prospect of the impending desolation, though he recognizes withal the divine favour which should remotely but eventually be manifested. Ps. civ., a meditation on the providence of God, is itself a preparation for that "hiding of God's face" which should ensue ere the Church were, like the face of the earth, renewed; and in the historical Ps. cv., cvi., the one the story of God's faithfulness, the other of the people's transgressions, we have the immediate prelude to the captivity, together with a prayer for eventual deliverance from it.

We pass to Book V. Ps. cvii. is the opening psalm of the return, sung probably at the first Feast of Tabernacles (Exr. iii.). The ensuing Davidic psalms may well be ascribed to Zerubbabel; Ps. cviii. (drawn from Ps. lvii., lx.) being in anticipation of the returning prosperity of the Church; Ps. cix., a prayer against the efforts of the Samaritans to hinder the rebuilding of the Temple; Ps. cx., a picture of the triumphs of the Church in the days of the future Messiah, whose union of royalty and priesthood had been at this time set forth in the type and prophecy of Zech. vi. 11-13.\* Ps. cxviii., with which Ps. cxiv.-cxvii. certainly, and in the estimation of some Ps. cxli., and even Ps. cxi., cxii., stand connected, is the festal hymn sung at the laying of the foundations of the second Temple. We here pass over the questions connected with Ps. cxix.; but a directly historical character belongs to Ps. cxx.-cxxxiv., styled in our A. V. "Songs of Degrees." [DEGREES, SONGS OF, where the different interpretations of the Hebrew title are given.] Internal evidence refers these to the period when the Jews under Nehemiah were, in the very face of the enemy, repairing the walls of Jerusalem; and the title may well signify "Songs of goings up (as the Hebrew phrase is) upon the walls," the psalms being, from their brevity, well adapted to be sung by the workmen and guards while engaged in their respective duties. As David cannot well be the author of Ps. cxii., cxiv., cxxi., cxxiii., marked with his name, so neither, by analogy, can Solomon well be the actual author of Ps. cxvii. Theodoret thinks that by "Solomon" Zerubbabel is intended, both as deriving his descent from Solomon, and as renewing Solomon's work: with yet greater probability we might ascribe the psalm to Nehemiah. Ps. cxxxv., cxxxvi., by their parallelism with the confession of sins in Neh. ix., connect themselves with the national fast of which that chapter speaks. Of somewhat earlier date, it may be, are Ps. cxxxvii. and the ensuing Davidic psalms. Of these, Ps. cxxxix. is a psalm of the new birth of Israel, from the womb of the Babylonish captivity, to a

argumenten the psalm pr more than is

But not the less do they repudiate the outward rite when separated from that which it was designed to express (Ps. xl., lxix.): a broken and contrite heart is, from erring man, the genuine sacrifice which God requires (Ps. li.).

Similar depth is observable in the view taken by the psalmists of human sin. It is to be traced not only in its outward manifestations, but also in the inward workings of the heart (Ps. xxxvi.), and is to be primarily ascribed to man's innate corruption (Ps. li., lviii.). It shows itself alike in deeds, in words (Ps. xvii., cxli.), and in thoughts (Ps. cxxxix.); nor is even the believer able to discern all its various ramifications (Ps. xix.). Connected with this view of sin is, on the one hand, the picture of the utter corruption of the ungodly world (Ps. xiv.); on the other, the encouragement to genuine repentance, the assurance of divine forgiveness (Ps. xxxii.), and the trust in God as the source of complete redemption (Ps. cxix.).

In regard of the law, the psalmist, while warmly acknowledging its excellence, feels yet that it cannot so effectually guide his own unassisted exertions as to preserve him from error (Ps. xix.). He needs an additional grace from above, the grace of God's Holy Spirit (Ps. li.). But God's Spirit is also a free spirit (ib.): led by this he will discern the law, with all its precepts, to be no arbitrary rule of bondage, but rather a charter and instrument of liberty (Ps. cxix.).

The Psalms bear repeated testimony to the duty of instructing others in the ways of holiness (Ps. xxxiii., xxxiv., li.). They also indirectly enforce the duty of love, even to our enemies (Ps. vii. 4, xxxv. 13, cix. 4). On the other hand they imprecate, in the strongest terms, the judgments of God on transgressors. Such imprecations are levelled at transgressors as a body, and are uniformly uttered on the hypothesis of their wilful persistence in evil, in which case the overthrow of the sinner becomes a necessary part of the uprooting of sin. They are in no wise inconsistent with any efforts to lead sinners individually to repentance.

This brings us to notice, lastly, the faith of the psalmists in a righteous recompense to all men according to their deeds (Ps. xxxvii., &c.). They generally expected that men would receive such recompense in great measure during their own lifetime. Yet they felt withal that it was not then complete: it perpetuated itself to their children (Ps. xxxvii. 25, cix. 12, &c.); and thus we find set forth in the Psalms, with sufficient distinctness, though in an unmaturing and consequently imperfect form, the doctrine of a retribution after death.

5. *Prophetic Character of the Psalms.*—The moral struggle between godliness and ungodliness, so vividly depicted in the Psalms, culminates, in Holy Scripture, in the life of the Incarnate Son of God upon earth. It only remains to show that the Psalms themselves definitely anticipated this culmination. Now there are in the Psalter at least three psalms of which the interest evidently centres in a person distinct from the speaker, and which, since they cannot without violence to the language be interpreted of any but the Messiah, may be termed directly and exclusively Messianic. We refer to Ps. ii., xiv., cx.; to which may perhaps be added Ps. lxxii.

It would be strange if these few psalms stood, in their prophetic significance, absolutely alone among the rest: the more so, inasmuch as Ps. ii. forms part of the preface to the First Book of the Psalter,

and would, as such, be entirely out of place, did not its general theme virtually extend itself over those which follow, in which the interest generally centres in the figure of the suppliant or worshipper himself. And hence the impossibility of viewing the psalms generally, notwithstanding the historical drapery in which they are outwardly clothed, as simply the past devotions of the historical David or the historical Israel. Other arguments to the same effect are furnished by the idealized representations which many of them present; by the outward points of contact between their language and the actual earthly career of our Saviour; by the frequent references made to them both by our Saviour Himself and by the Evangelists; and by the view taken of them by the Jews, as evidenced in several passages of the Targum. There is yet another circumstance well worthy of note in its bearing upon this subject. Alike in the earlier and in the later portions of the Psalter, all those psalms which are of a personal rather than of a national character are marked in the superscriptions with the name of David, as proceeding either from David himself or from one of his descendants. It results from this, that while the Davidic psalms are partly personal, partly national, the Levitic psalms are uniformly national. Exceptions to this rule exist only in appearance: thus Ps. lxxiii., although couched in the first person singular, is really a prayer of the Jewish faithful against the Assyrian invaders; and in Ps. xlii., xliiii., it is the feelings of an exiled company rather than of a single individual to which utterance is given. It thus follows that it was only those psalmists who were types of Christ by external office and lineage as well as by inward piety, that were charged by the Holy Spirit to set forth beforehand, in Christ's own name and person, the sufferings that awaited him and the glory that should follow. The national hymns of Israel are indeed also prospective; but in general they anticipate rather the struggles and the triumphs of the Christian Church than those of Christ Himself.

We annex a list of the chief passages in the Psalms which are in anywise quoted or embodied in the N. T.:—Ps. ii. 1, 2, 7, 8, 9, iv. 4, v. 9, vi. 3, 8, viii. 2, 4-6, x. 7, xiv. 1-3, xvi. 8-11, xviii. 4, 49, xix. 4, xxii. 1, 8, 18, 22, xxiii. 6, xxiv. 1, xxvi. 5, xxvii. 1, 2, xxviii. 8, 12-16, 20, xxxv. 9, xxxvi. 1, xxxvii. 11, xl. 6-8, xli. 9, xlv. 22, xlv. 6, 7, xlviii. 2, li. 4, lv. 22, lxxviii. 18, lxxix. 4, 9, 22, 23, 25, lxxv. 8, lxxviii. 2, 24, lxxxiii. 6, lxxxvi. 9, lxxxix. 20, xc. 4, xci. 11, 12, xcii. 7, xciv. 11, xcvi. 7-11, cii. 25-27, civ. 4, cix. 8, cx. 1, 4, cxii. 9, cxvi. 10, cxvii. 1, cxviii. 6, 22, 23, 25, 28, cxv. 5, cxl. 3.

6. *Literature.*—The list of Jewish commentators on the Psalter includes the names of Saadiah (who wrote in Arabic), Jarchi, Aben Ezra, and Kimchi. Among later performances that of Sforza († 1550) is highly spoken of (reprinted in a Furth Psalter of 1804); and special mention is also due to the modern German translation of Mendelssohn († 1786), to which again is appended a comment by Joel Brill. In the Christian Church devotional familiarity with the Psalter has rendered the number of commentators on it immense; and in modern times even the number of private translations of it has been so large as to preclude enumeration here. Among the Greek Fathers, Theodoret is the best commentator, Chrysostom the best homilist, on the Psalms: for the rest, a catena of the Greek commentators was formed by the Jesuit Corderius. In the

West the pithy expositions of Hilary and the sermons of Augustine are the main patristic helps. A list of the chief mediæval comments, which are of a devotional and mystical rather than of a critical character, will be found in Neale's *Commentary* (vol. i. 1860), which is mainly derived from them, and favourably introduces them to modern English readers. Later Roman Catholic labourers on the Psalms are Genebrard (1587), Agellius (1606), Bellarmine (1617), Lorinus (1619), and De Muis (1650): the valuable critical commentary of the last-named has been reprinted, accompanied by the able preface and terse annotations of Bossuet. Among the Reformers, of whom Luther, Zwingle, Bucer, and Calvin, all applied themselves to the Psalms, Calvin naturally stands, as a commentator, pre-eminent. Of subsequent works those of Geier (1668) and Venema (1762, &c.) are still held in some repute; while Rosenmüller's *Scholia* give, of course, the substance of others. The modern German labourers on the Psalms, commencing with De Wette, are very numerous. Maurer shines as an elegant grammatical critic: Ewald (*Dichter des A. B. i. and ii.*) as a translator. Hengstenberg's *Commentary* holds a high place. The two latest Commentaries are that of Hupfeld (in progress), a work of high philological merit, but written in strong opposition to Hengstenberg, and from an unsatisfactory point of theological view; and that of Delitzsch (1859-60), the diligent work of a sober-minded theologian, whose previous *Synbolae ad Ps. illustr. isagogicae* had been a valuable contribution to the external criticism of the Psalms. Of English works we may mention the Paraphrase of Hammond; the devotional *Commentary* of Bishop Horne, and along with this the unpretending but useful *Plain Commentary* recently published; Merrick's *Annotations*; Bishop Horsley's *Translation and Notes* (1815, posthumous); Dr. Mason Good's *Historical Outline*, and also his *Translation with Notes* (both posthumous; distinguished by taste and originality rather than by sound judgment or accurate scholarship); Phillips's *Text, with Commentary*, for Hebrew students; J. Jebb's *Literal Translation and Dissertations* (1846); and lastly Thrupp's *Introduction to the Psalms* (1860), to which the reader is referred for a fuller discussion of the various matters treated of in this article. In the Press, a new *Translation, &c.*, by Perowne, of which specimens have appeared. A catalogue of commentaries, treatises, and sermons on the Psalms, is given in Darling's *Cyclop. Bibliographica*, (subjects) p. 374-514.

7. *Psalter of Solomon*.—Under this title is extant, in a Greek translation, a collection of eighteen hymns, evidently modelled on the canonical psalms, breathing Messianic hopes, and forming a favourable specimen of the later popular Jewish literature. They have been variously assigned by critics to the times of the persecution of Antiochus Epiphanes (Ewald, Dillmann), or to those of the rule of Herod (Movers, Delitzsch). They may be found in the *Codex Pseudepigraphus V. T.* of Fabricius. [J. F. T.]

**PSALTERY.** The psaltery was a stringed instrument of music to accompany the voice. The Hebrew נָבֵל, *nēbel*, or נֶבֶל, *nebel*, is so rendered in the A. V. in all passages where it occurs, except in Is. v. 12, xiv. 11, xxii. 24 marg.; Am. v. 23, vi. 5, where it is translated *viol*, following the Geneva Version, which has *viola* in all cases, except 2 Sam. vi. 5; 1 K. x. 12 ("psaltery"); 2 Kad. x.

22; Eccles. ("musicke" "musike"). "the fingers were as in the guitar." *Pop. Mus.* i. the Psalms. This instrument is superior in tone, somewhat back, somewhat more nasal, had virtually number was doubled; the string. The strings were "angle" (Chords, the p are frequent and were cle though still and Leaf, 3

"And be As har and again in "The trem best.

The word *psalter* have been in the century, for *psalterion* in the Again, in 1595) we r . . . by son liberrall scienc owne defence words, saying a harpe, not but if they of small n enough how The Greek *psalterion* denoted instead of being used as a bowstring. But it only the Heb. *nebel*, and in Lxxi. 22 (*psalter* in Am. v. employed. *nebel* or *nebelion* is ancient to show LXX. was of the Hebrew translators. on account the Hebrew them as equivalent upon §3) that the *nebel*, *cinnd* had ten strings the latter the hand. he adds (A of electrum v. 12) says

pegs than the *cinôre*. That *nûbla* was a foreign name is evident from Strabo (x. p. 471), and from Athenæus (iv. p. 175), where its origin is said to be Sidonian. Beyond this, and that it was a stringed instrument (Ath. iv. p. 175), played by the hand (Ovid, *Art. Am.* iii. 327), we know nothing of it, but in these facts we have strong presumptive evidence that *nûbla* and *nebel* are the same; and that the *nûbla* and *psalterion* are identical appears from the Glossary of Philoxenus, where *nûbla* = ψάλλης, and *nûblion* = ψάλλων, and from Suidas, who makes *psalterion* and *nûbla*, or *nûbla*, synonymous. Of the Psaltery among the Greeks there appear to have been two kinds. The *παρτίς*, which was of Persian (Athen. xiv. p. 636) or Lydian (*ibid.* p. 635) origin, and the *μαγυρίς*. The former had only two (Athen. iv. p. 183) or three (*ibid.*) strings; the latter as many as twenty (Athen. xiv. p. 634), though sometimes only five (*ibid.* p. 637). They are sometimes said to be the same, and were evidently of the same kind. Both Isidorus (*de Orig.* iii. 21) and Cassiodorus (*Praef. in Ps.* c. iv.) describe the psaltery as triangular in shape, like the Greek Δ, with the sounding-board above the strings, which were struck downwards. The latter adds that it was played with a plectrum, so that he contradicts Josephus if the psaltery and *nebel* are really the same. In this case Josephus is the rather to be trusted. St. Augustine (on Ps. xxxii. [xxxiii.]) makes the position of the sounding-board the point in which the cithara and psaltery differ; in the former it is below, in the latter above the strings. His language implies that both were played with the plectrum. The distinction between the cithara and psaltery is observed by Jerome (*Prolog. in Ps.*). From these conflicting accounts it is impossible to say positively with what instrument the *nebel* of the Hebrew exactly corresponded. It was probably of various kinds, as Kimchi says in his note on Is. xxii. 24, differing from each other both with regard to the position of the pegs and the number of the strings. In illustration of the descriptions of Isidorus and Cassiodorus reference may be made to the drawings from Egyptian musical instruments given by Sir Gard. Wilkinson (*Anc. Eg.* ii. 280, 287), some one of which may correspond to the Hebrew *nebel*.<sup>a</sup> Munk (*Palestine*, plate 16, figs. 12, 13) gives an engraving of an instrument which Niebuhr saw. Its form is that of an inverted delta placed upon a round box of wood covered with skin.

The *nebel 'ûsôr* (Ps. xxxiii. 2, xcii. 3 [4], cxliv. 9) appears to have been an instrument of the psaltery kind which had ten strings, and was of a trapezium shape, according to some accounts. Forkel, *Gesch. d. Mus.* i. 133, Aben Ezra (on Ps. cl. 3) says the *nebel* had ten holes. So that he must have considered it to be a kind of pipe.

From the fact that *nebel* in Hebrew also signifies a wine-bottle or skin, it has been conjectured that the term when applied to a musical instrument denotes a kind of bagpipe, the old English *cornamute*, Fr. *cornemuse*, but it seems clear, whatever else may be obscure concerning it, that the *nebel* was a stringed instrument. In the Mishna (*Gittin*, xvi. 7) mention is made of a case (פֶּתֶל = *thēn*) in which it was kept.

Its first appearance in the history of the O. T. is in connexion with the "string" of prophets who

met Saul as they came down from the high place (1 Sam. x. 5). Here it is clearly used in a religious service, as again (2 Sam. vi. 5; 1 Chr. xiii. 8), when David brought the ark from Kirjath-jearim. In the temple band organized by David were the players on psalteries (1 Chr. xv. 16, 20), who accompanied the ark from the house of Obed-edom (1 Chr. xv. 28). They played when the ark was brought into the temple (2 Chr. v. 12); at the thanksgiving for Jehoshaphat's victory (2 Chr. xx. 28); at the restoration of the temple under Hezekiah (2 Chr. xxix. 25), and the dedication of the walls of Jerusalem after they were rebuilt by Nehemiah (Neh. xii. 27). In all these cases, and in the passages in the Psalms where allusion is made to it, the psaltery is associated with religious services (comp. Am. v. 23; 2 Esdr. x. 22). But it had its part also in private festivities, as is evident from Is. v. 12, xiv. 11, xlii. 24; Am. vi. 5, where it is associated with banquets and luxurious indulgence. It appears (Is. xiv. 11) to have had a soft plaintive note.

The psalteries of David were made of cypress (2 Sam. vi. 5), those of Solomon of algar or alning-trees (2 Chr. ix. 11). Among the instruments of the band which played before Nebuchadnezzar's golden image on the plains of Bura, we again meet with the psaltery (פֶּסְתֵּרִין, Dan. iii. 5, 10, 15; פֶּסְתֵּרִין, *pēs-tēr-in*). The Chaldean word appears to be merely a modification of the Greek ψαλτήριον. Attention is called to the fact that the word is singular in Gesenius (*Thes.* p. 1116), the termination פֶּ- corresponding to the Greek -ιον. [W. A. W.]

**PTOLEMEE and PTOLEMEUS** (Πτολεμαῖος; *Ptolemaios*). 1. "The son of Dorymenes" (1 Macc. iii. 38; 2 Macc. iv. 45; comp. Polyb. v. 61), a courtier who possessed great influence with Antiochus Epiph. He was induced by a bribe to support the cause of Menelaus (2 Macc. iv. 45-50); and afterwards took an active part in forcing the Jews to apostatize (2 Macc. vi. 8, according to the true reading). When Judas had successfully resisted the first assaults of the Syrians, Ptolemy took part in the great expedition which Lyfias organized against him, which ended in the defeat at Emmaus (B.C. 166), but nothing is said of his personal fortunes in the campaign (1 Macc. iii. 38).

2. The son of Agasarchus (Ath. vi. p. 246 C), a Megalopolitan, surnamed Macron (2 Macc. x. 12), who was governor of Cyprus during the minority of Ptol. Philometor. This office he discharged with singular fidelity (Polyb. xxvii. 12); but afterwards he deserted the Egyptian service to join Antiochus Epiph. He stood high in the favour of Antiochus, and received from him the government of Phoenicia and Coele-Syria (2 Macc. viii. 8, x. 11, 12). On the accession of Ant. Eupator, his conciliatory policy towards the Jews brought him into suspicion at court. He was deprived of his government, and in consequence of this disgrace he poisoned himself c. B.C. 164 (2 Macc. x. 13).

Ptol. Macron is commonly identified with Ptol. "the son of Dorymenes," and it seems likely from a comparison of 1 Macc. iii. 38 with 2 Macc. viii. 8, 9

<sup>a</sup> Abraham de Porta-Leone, the author of *Sculte Haghib-larim* (c. 6) identifies the *nebel* with the Italian *lido*, the lute, or rather with the particular kind called *lido chitar*.

*rona's* (the Germ. *mandolin*), the thirteen strings of which were of gut or sinew, and were struck with a quill.

that they were confused in the popular account of the war. But the testimony of Athenaeus distinctly separates the governor of Cyprus from "the son of Dorymenes" by his parentage. It is also doubtful whether Ptol. Macron had left Cyprus as early as B.C. 170, when "the son of Dorymenes" was at Tyre (2 Macc. iv. 45), though there is no authority for the common statement that he gave up the island into the hands of Antiochus, who did not gain it till B.C. 168.

3. The son of Abubus, who married the daughter of Simon the Maccabee. He was a man of great wealth, and being invested with the government of the district of Jericho, formed the design of usurping the sovereignty of Judaea. With this view he treacherously murdered Simon and two of his sons (1 Macc. xvi. 11-16; Joseph. *Ant.* xiii. 7, §4; 8, §1, with some variations); but Johannes Hyrcanus received timely intimation of his design, and escaped. Hyrcanus afterwards besieged him in his stronghold of Dôk, but in consequence of the occurrence of the Sabbatical year, he was enabled to make his escape to Zeno Cotylas prince of Philadelphia (Joseph. *Ant.* xiii. 8, §1).

4. A citizen of Jerusalem, father of Lysimachus, the Greek translator of Esther (Esth. xiii.). [LYSIMACHUS 1.]

#### GENEALOGICAL TABLE OF THE PTI

PTOLEMAEUS I. SOTER, known as the son of Lagus, a Macedonian of low rank, was generally supposed to have been an illegitimate son of Philip. He distinguished himself greatly during the campaigns of Alexander; at whose death, foreseeing the necessary subdivision of the empire, he secured for himself the government of Egypt, where he proceeded at once to lay the foundations of a kingdom (B.C. 323). His policy during the wars of the succession was mainly directed towards the consolidation of his power, and not to wide conquests. He maintained himself against the attacks of Perdiccas (B.C. 321), and Demetrius (B.C. 312), and gained a precarious footing in Syria and Phoenicia. In B.C. 307 he suffered a very severe defeat at sea off Cyprus from Antigonus, but successfully defended Egypt against invasion. After the final defeat of Antigonus, B.C. 301, he was obliged to concede the debatable provinces of Phoenicia and Coele Syria to Seleucus; and during the remainder

of his reign he was the recover attached to He abdicated Philadelphus, took place in

Ptol. Soter (xi. 5) as on the empire of ward the fou the south [E strong; and shall be stron above him [P cus, who is he Antigonus son attached him victory of I gained by hi as empire wi

by Alexander's successors; and "his dominion was great dominion" (Dan. i. c.).<sup>a</sup>

In one of his expeditions into Syria, probably B.C. 320, Ptolemy treacherously occupied Jerusalem on the Sabbath, a fact which arrested the attention of the heathen historian Agatharcides (*ap. Joseph. c. Ap. i. 22; Ant. xii. 1*). He carried away many Jews and Samaritans captive to Alexandria; but, aware probably of the great importance of the good will of the inhabitants of Palestine in the event of a Syrian war, he gave them the full privileges of citizenship in the new city. In the campaign of Gaza (B.C. 312) he reaped the fruits of his liberal policy; and many Jews voluntarily emigrated to Egypt, though the colony was from the first disturbed by internal dissensions (*Joseph. as above; Hecat. ap. Joseph. c. Ap. i. c.*). [B. F. W.]

Ptolemy I., King of Egypt.  
Pentadrachm of Ptolemy I. (Alexandrian talent). Obv. Head of king, r. f., bound with fillet. Rev. ΑΛΕΞΑΝΔΡΕΩΣ ΣΩΤΗΡΟΣ Eagle, l., on thunderbolt. (Struck at Tyre.)

**PTOLEMAEUS II. PHILADELPHUS**, the youngest son of Ptol. I., was made king two years before his death, to confirm the irregular succession. The conflict between Egypt and Syria was renewed during his reign in consequence of the intrigue of his half-brother Magas. "But in the end of years they [the kings of Syria and Egypt] joined themselves together [in friendship]. For the king's daughter of the south [Berenice, the daughter of Ptol. Philadelphus] came [as bride] to the king of the north [Antiochus II.], to make an agreement" (Dan. xi. 6). The unhappy issue of this marriage has been noticed already [ANTIOCHUS II., vol. i. p. 74]; and the political events of the reign of Ptolemy, who, however, retained possession of the disputed provinces of Phoenicia and Coele-Syria, offer no further points of interest in connexion with Jewish history.

In other respects, however, this reign was a critical epoch for the development of Judaism, as it was for the intellectual history of the ancient world. The liberal encouragement which Ptolemy bestowed on literature and science (following out in this the designs of his father) gave birth to a new school of writers and thinkers. The critical faculty was called forth in place of the creative, and learning in some sense supplied the place of original speculation. Eclecticism was the necessary result of the concurrence and comparison of dogmas; and it was impossible that the Jew, who was now become as true a citizen of the world as the Greek, should remain passive in the conflict of opinions. The origin and influence of the translation of the LXX. will be considered in another place. [SEPTUAGINT.] It is enough now to observe the greatness of the consequences involved in the union of Greek lan-

guage with Jewish thought. From this time the Jew was familiarized with the great types of Western literature, and in some degree aimed at imitating them. Ezechiel (ὁ τῶν Ἰουδαίων ἱεργῶν ποιητής, Clem. Alex. *Str. i. 23*, §155) wrote a drama on the subject of the Exodus, of which considerable fragments, in fair iambic verse, remain (Euseb. *Praep. Ev. ix. 28, 29*; Clem. Alex. *l. c.*), though he does not appear to have adhered strictly to the laws of classical composition. An elder Philo celebrated Jerusalem in a long hexameter poem—Eusebius quotes the 14th book—of which the few corrupt lines still preserved (Euseb. *Praep. Ev. ix. 20, 24, 28*) convey no satisfactory notion. Another epic poem, "on the Jews," was written by Theodotus, and as the extant passages (Euseb. *Praep. Ev. ix. 22*) treat of the history of Sichem, it has been conjectured that he was a Samaritan. The work of ARISTOBULUS on the interpretation of the Law was a still more important result of the combination of the old faith with Greek culture, as forming the groundwork of later allegories. And while the Jews appropriated the fruits of Western science, the Greeks looked towards the East with a new curiosity. The histories of Herodotus and Manetho and Hecataeus opened a world as wide and novel as the conquests of Alexander. The legendary sibyls were taught to speak in the language of the prophets. The name of Orpheus, which was connected with the first rise of Greek polytheism, gave sanction to verses which set forth nobler views of the Godhead (Euseb. *Praep. Ev. xiii. 12, &c.*). Even the most famous poets were not free from interpolation (Ewald, *Gesch. iv. 297, note*). Everywhere the intellectual approximation of Jew and Gentile was growing closer, or at least more possible. The later specific forms of teaching to which this syncretism of East and West gave rise have been already noticed. [ALEXANDRIA, vol. i. pp. 47, 8.] A second time and in a new fashion Egypt disciplined a people of God. It first impressed upon a nation the firm unity of a family, and then in due time reconnected a matured people with the world from which it had been called out. [B. F. W.]

Ptolemy II.  
Octadrachm of Ptolemy II. Obv. ΑΣΙΑΩΝ. Busts of Ptolemy II. and Antioch, r. Rev. ΘΕΩΝ. Busts of Ptolemy I. and Berenice, r.

**PTOLEMAEUS III. EUERGETES** was the eldest son of Ptol. Philad. and brother of Berenice the wife of Antiochus II. The repudiation and murder of his sister furnished him with an occasion for invading Syria (c. B.C. 246). He "stood up, a branch out of her stock [sprung from the same parents] in his [father's] estate; and set himself at [the head of] his army, and came against the fortress of the king of the north [Antiochus], and dash-

<sup>a</sup> Jerome (*ad Dan. l. c.*) very strangely refers the latter clauses of the verse to Ptol. Philadelphus, "whose empire surpassed that of his father." The whole tenor of the

passage requires the contrast of the two kingdoms in which the fortunes of Judaea hung.

against them and prevailed" (Dan. xi. 7). He extended his conquests as far as Antioch, and then eastwards to Babylon, but was recalled to Egypt by tidings of seditions which had broken out there. His success was brilliant and complete. "He carried captive into Egypt the gods [of the conquered nations] with their molten images, and with their precious vessels of silver and gold" (Dan. xi. 8). This capture of sacred trophies, which included the recovery of images taken from Egypt by Cambyses (Jerome, *ad loc.*), earned for the king the name *Euergetes*—"Benefactor"—from the superstitious Egyptians, and was specially recorded in the inscriptions which he set up at Adule in memory of his achievements (Cosmas *Ind. ap. Clint. F. H.* 382 n). After his return to Egypt (cir. B.C. 245) he suffered a great part of the conquered provinces to fall again under the power of Seleucus. But the attempts which Seleucus made to attack Egypt terminated disastrously to himself. He first collected a fleet which was almost totally destroyed by a storm; and then, "as if by some judicial infatuation," "he came against the realm of the king of the south and [being defeated] returned to his own land [to Antioch]" (Dan. xi. 9; Justin, *xvii.* 2). After this Ptolemy "desisted some years from [attacking] the king of the north" (Dan. xi. 8), since the civil war between Seleucus and Antiochus Hierax, which he fomented, secured him from any further Syrian invasion. The remainder of the reign of Ptolemy seems to have been spent chiefly in developing the resources of the empire, which he raised to the highest pitch of its prosperity. His policy towards the Jews was similar to that of his predecessors, and on his occupation of Syria he "offered sacrifices, after the custom of the Law, in acknowledgment of his success, in the Temple at Jerusalem, and added gifts worthy of his victory" (Joseph. *c. Ap. ii.* 5). The famous story of the manner in which Joseph the son of Tobias obtained from him the lease of the revenues of Judaea is a striking illustration both of the condition of the country and of the influence of individual Jews (Joseph. *Ant. xii.* 4). ## PTOLEMAEUS IV. PHILOPATOR.

After the death of Ptol. Euergetes the line of the Ptolemies rapidly degenerated (Strabo, *xvi.* 12, 13, p. 798). Ptol. Philopator, his eldest son, who succeeded him, was to the last degree sensual, effeminate, and debased. But externally his kingdom retained its power and splendour; and when circumstances forced him to action, Ptolemy himself showed ability not unworthy of his race. The description of the campaign of Raphia (B.C. 217) in the Book of Daniel gives a vivid description of his

character. "The sons of Seleucus [Seleucus Traianus and Antiochus the Great] were stored up and assembled a multitude of great forces; and one of them [Antiochus] came and encamped on the banks of the river [Euphrates]; and he returned [from Seleucia, to which he had retired during a faithless truce: Polyb. i. 26], and they [Antiochus and Ptolemy] were stored up [in war] even to his [Antiochus'] fortress. As the king of the south [Ptol. Philopator] was near with choler, and came forth and fought with him [at Raphia]; and he set forth a great multitude; and the multitude was given into his hand [to lead to battle]. And the multitude raised itself [up] for the conflict, and his heart was lifted up, and he cast down ten thousands [cf. Polyb. i. 36], but he was not vigorous" [to reap the fruits of his victory] (Dan. xi. 10-12; cf. 3 Macc. i. 1-5). After this decisive success Ptol. Philopator visited the neighbouring cities of Syria, and among others Jerusalem. After offering sacrifices of thanksgiving in the Temple he attempted to enter the sanctuary.

Ptolemy IV.

Tetradrachm of Ptolemy IV. (Egyptian talent). Obv. Bust of king, wearing diadem. Rev. ΠΤΟΛΕΜΑΙΟΥ ΕΠΙΦΑΝΕΩΣ. Eagle, L. on thunderbolt, struck a tree.

A sudden paralysis hindered his design; but when he returned to Alexandria he determined to take on the Alexandrine Jews the vengeance for his disappointment. In this, however, he was again hindered; and eventually he confined to them the full privileges which they had enjoyed before [3 MACCABEES.]. The recklessness of his rule was further marked by the first insurrection of the native Egyptians against their Greek rulers (Polyb. v. 107). This was put down, and Ptolemy, during the remainder of his life, gave himself up to unbridled excesses. He died B.C. 204, and was succeeded by his only child, Ptol. V. Epiphanes, who was at the time only four or five years old (Joseph. *Ant. xi.* 10-12). [B. F. W.]

## PTOLEMAEUS V. EPIPHANES.

The reign of Ptol. Epiphanes was a critical epoch in the history of the Jews. The rivalry between the Syrian and Egyptian parties, which had for some time divided the people, came to an open rupture in the struggles which marked his minority. The Syrian faction openly declared for Antiochus the Great, when he advanced on his second expedition against Egypt; and the Jews, who remained faithful to the old alliance, fled to Egypt in great numbers, where Onias, the high-priesthood, not long afterwards established a temple at Leontopolis. [ONIAS.] In the language of Daniel, "The rulers of the kingdom exalted themselves to establish the ruin" (Dan. xi. 14)—to confirm by the issue of them and the truth of the prophetic word, and at length

\* Jerome (*ad Dan. xi.* 14) places the flight of Onias to Egypt and the foundation of the temple of Leontopolis in

the reign of Ptol. Epiphanes. But Onias was still alive at the time of his father's death, *cf. Ant. xii.*

time to forward unconsciously the establishment of the heavenly kingdom which they sought to anticipate. The accession of Ptolemy and the confusion of a disputed regency furnished a favourable opportunity for foreign invasion. "Many stood up against the king of the south," under Antiochus the Great and Philip III. of Macedonia, who formed a league for the dismemberment of his kingdom. "So the king of the north [Antiochus] came, and cast up a mound, and took the most fenced city [Sidon, to which Scopas, the general of Ptolemy, had fled: Jerome, *ad loc.*], and the arms of the south did not withstand" [at Paneas, B.C. 198, where Antiochus gained a decisive victory] (Dan. xi. 14, 15). The interference of the Romans, to whom the regents had turned for help, checked Antiochus in his career; but in order to retain the provinces of Coele-Syria, Phoenicia, and Judaea, which he had reconquered, really under his power, while he seemed to comply with the demands of the Romans, who required them to be surrendered to Ptolemy, "he gave him [Ptolemy, his daughter Cleopatra] a young maiden" [as his betrothed wife] (Dan. xi. 17). But in the end his policy only partially succeeded. After the marriage of Ptolemy and Cleopatra was consummated (B.C. 193), Cleopatra did "not stand on his side," but supported her husband in maintaining the alliance with Rome. The disputed provinces, however, remained in the possession of Antiochus; and Ptolemy was poisoned at the time when he was preparing an expedition to recover them from Seleucus, the unworthy successor of Antiochus, B.C. 181. [B. F. W.]

Ptolemy V.

Tetradrachm of Ptolemy V. (Egyptian talent). Obv. Bust of king, r., bound with fillet, adorned with ears of wheat. Rev. ΒΑΣΙΛΕΥΣ ΠΤΟΛΕΜΑΙΟΥ. Eagle, l., on thunderbolt.

**PTOLEMAEUS VI. PHILOMETOR.** On the death of Ptol. Epiphanes, his wife Cleopatra held the regency for her young son, Ptol. Philometor, and preserved peace with Syria till she died, B.C. 173. The government then fell into unworthy hands, and an attempt was made to recover Syria (comp. 2 Macc. iv. 21). Antiochus Epiphanes seems to have made the claim a pretext for invading Egypt. The generals of Ptolemy were defeated near Pelusium, probably at the close of B.C. 171 (Clinton, *F. H.* iii. 319; 1 Macc. i. 16 ff.); and in the next year Antiochus, having secured the person of the young king, reduced almost the whole of Egypt (comp. 2 Macc. v. 1). Meanwhile Ptol. Evergetes II., the younger brother of Ptol. Philometor, assumed the supreme power at Alexandria; and Antiochus, under the pretext of recovering the crown for Philometor, besieged Alexandria in B.C. 169. By this time, however, his selfish designs were apparent: the brothers were reconciled, and Antiochus was obliged to acquiesce for the time in

\* Others reckon only three campaigns of Antiochus against Egypt in 171, 170, 168 (Gibbon on 1 Macc. i. 18). Yet the campaign of 169 seems clearly distinguished from

the arrangement which they made. But while doing so he prepared for another invasion of Egypt, and was already approaching Alexandria, when he was met by the Roman embassy led by C. Popilius Laenas, who, in the name of the Roman senate, insisted on his immediate retreat (B.C. 168), a command which the late victory at Pydna made it impossible to disobey.\*

Ptolemy VI.

Tetradrachm of Ptolemy VI. (Egyptian talent). Obv. Head of king, r., bound with fillet. Rev. ΠΤΟΛΕΜΑΙΟΥ ΦΙΛΑ ΜΗΤΡΟΠΟΛΙΣ. Eagle, l., with palm-branch, on thunderbolt.

These campaigns, which are intimately connected with the visits of Antiochus to Jerusalem in B.C. 170, 168, are briefly described in Dan. xi. 25-30. "He [Antiochus] shall stir up his power and his courage against the king of the south with a great army; and the king of the south [Ptol. Philometor] shall be stirred up to battle with a very great and mighty army; but he shall not stand: for they [the ministers, as it appears, in whom he trusted] shall forecast devices against him. Yea, they that feed of the portion of his meat shall destroy him, and his army shall melt away, and many shall fall down slain. And both these kings' hearts shall be to do mischief, and they shall speak lies at one table [Antiochus shall profess falsely to maintain the cause of Philometor against his brother, and Philometor to trust in his good faith]; but it shall not prosper [the resistance of Alexandria shall preserve the independence of Egypt]; for the end shall be at the time appointed. Then shall he [Antiochus] return into his land, and his heart shall be against the holy covenant; and he shall do exploits, and return to his own land. At the time appointed he shall return and come towards the south; but it shall not be as the former so also the latter time. [His career shall be checked at once] for the ships of Chittim [comp. Num. xxiv. 24: the Roman fleet] shall come against him: therefore he shall be dismayed and return and have indignation against the holy covenant."

After the discomfiture of Antiochus, Philometor was for some time occupied in resisting the ambitious designs of his brother, who made two attempts to add Cyprus to the kingdom of Cyrene, which was allotted to him. Having effectually put down these attempts, he turned his attention again to Syria. During the brief reign of Antiochus Eupator he seems to have supported Philip against the regent Lysias (Comp. 2 Macc. ix. 29). After the murder of Eupator by Demetrius I., Philometor espoused the cause of Alexander Balas, the rival claimant to the throne, because Demetrius had made an attempt on Cyprus; and when Alexander had defeated and slain his rival, he accepted the overtures which he made, and gave him his daughter (Cleopatra in marriage (B.C. 150: 1 Macc. x. 51-58).

these in the years before and after; though in the description of Daniel the campaigns of 170 and 168 are not noticed separately.

But, according to 1 Macc. xi. 1, 10, &c., the alliance was not made in good faith, but only as a means towards securing possession of Syria. According to others, Alexander himself made a treacherous attempt on the life of Ptolemy (comp. 1 Macc. xi. 10), which caused him to transfer his support to Demetrius II., to whom also he gave his daughter, whom he had taken from Alexander. The whole of Syria was quickly subdued, and he was crowned at Antioch king of Egypt and Asia (1 Macc. xi. 13). Alexander made an effort to recover his crown, but was defeated by the forces of Ptolemy and Demetrius, and shortly afterwards put to death in Arabia. But Ptolemy did not long enjoy his success. He fell from his horse in the battle, and died within a few days (1 Macc. xi. 18), B.C. 145.

Ptolemaeus Philometor is the last king of Egypt who is noticed in Sacred history, and his reign was marked also by the erection of the Temple at Leontopolis. The coincidence is worthy of notice, for the consecration of a new centre of worship placed a religious as well as a political barrier between the Alexandrine and Palestinian Jews. Henceforth the nation was again divided. The history of the Temple itself is extremely obscure, but even in its origin it was a monument of civil strife. Onias, the son of Onias III.,<sup>a</sup> who was murdered at Antioch, B.C. 171, when he saw that he was excluded from the succession to the high-priesthood by mercenary intrigues, fled to Egypt, either shortly after his father's death or upon the transference of the office to Alcimus, B.C. 162 (Joseph. *Ant.* xii. 9, §7). It is probable that his retirement must be placed at the later date, for he was a child (ἄνις, Joseph. *Ant.* xii. 5, §1) at the time of his father's death, and he is elsewhere mentioned as one of those who actively opposed the Syrian party in Jerusalem (Joseph. *B. J.* i. 1). In Egypt he entered the service of the king and rose, with another Jew, Dositheus, to the supreme command. In this office he rendered important services during the war which Ptol. Physcon waged against his brother; and he pleaded these to induce the king to grant him a ruined temple of Diana (τῆς ἀγίας Βουβδωρέως) at Leontopolis, as the site of a Temple, which he proposed to build "after the pattern of that at Jerusalem, and of the same dimensions." His alleged object was to unite the Jews in one body who were at the time "divided into hostile factions, even as the Egyptians were, from their differences in religious services" (Joseph. *Ant.* xiii. 3, §1). In defence of the locality which he chose he quoted the words of Isaiah (Is. xix. 18, 19), who spoke of "an altar to the Lord in the midst of the land of Egypt," and according to one interpretation mentioned "the city of the Sun" (ΣΗΜΕΙΩΝ), by name. The site was granted and the Temple built; but the original plan was not exactly carried out. The Naos rose "like a tower to the height of sixty cubits" (Joseph. *B. J.* vii. 10, §3, πύργῳ παραλθόντων . . . εἰς ἐξήκοντα πῆχυν ἀναστάντων). The altar and the offerings were similar to those at Jerusalem; but in place of the seven-branched candlestick, was "a single lamp of gold suspended by a golden chain." The service was performed by priests and Levites of pure descent; and the Temple possessed considerable revenues, which were devoted to their support and to the adequate

Egypt to keep in check the native population. After the Return the spirit of commerce must have contributed to increase the number of emigrants; but the history of the Egyptian Jews is involved in the same deep obscurity as that of the Jews of Palestine till the invasion of Alexander. There cannot, however, be any reasonable doubt as to the power and influence of the colony; and the mere fact of its existence is an important consideration in estimating the possibility of Jewish ideas finding their way to the west. Judaism had secured in old times all the treasures of Egypt, and thus the first instalment of the debt was repaid. A preparation was already made for a great work when the founding of Alexandria opened a new era in the history of the Jews. Alexander, according to the policy of all great conquerors, incorporated the conquered in his armies. Samaritans (Joseph. *Ant.* xi. 8, §6) and Jews (Joseph. *Ant.* xi. 8, §5; Hecat. *ap.* Joseph. *c. Ap.* i. 22) are mentioned among his troops; and the tradition is probably true which reckons them among the first settlers at Alexandria (Joseph. *B. J.* ii. 18, §7; *c. Ap.* ii. 4). Ptolemy Soter increased the colony of the Jews in Egypt both by force and by policy; and their numbers in the next reign may be estimated by the statement (Joseph. *Ant.* xii. 2, §1) that Ptol. Philadelphus gave freedom to 120,000. The position occupied by Joseph (Joseph. *Ant.* xii. 4) at the court of Ptol. Euergetes I., implies that the Jews were not only numerous but influential. As we go onwards, the legendary accounts of the persecution of Ptol. Philopator bear witness at least to the great number of Jewish residents in Egypt (3 Macc. iv. 15, 17), and to their dispersion throughout the Delta. In the next reign many of the inhabitants of Palestine who remained faithful to the Egyptian alliance fled to Egypt to escape from the Syrian rule (comp. Jerome *ad Dan.* xi. 14, who is however confused in his account). The consideration which their leaders must have thus gained, accounts for the rank which a Jew, Aristobulus, is said to have held under Ptol. Philometor, as "tutor of the king" (*διδάσκαλος*, 2 Macc. i. 10). The later history of the Alexandrine Jews has been noticed before (*vol.* i. p. 466). They retained their privileges under the Romans, though they were exposed to the illegal oppression of individual governors, and quietly acquiesced in the foreign dominion (Joseph. *B. J.* vii. 10, §1). An attempt which was made by some of the fugitives from Palestine to create a rising in Alexandria after the destruction of Jerusalem entirely failed; but the attempt gave the Romans an excuse for plundering, and afterwards (B.C. 71) for closing entirely the Temple at Leontopolis (Joseph. *B. J.* vii. 10). [B. F. W.]

**PTOLEMAIS** (Πτολεμαῖς; *Ptolemais*). This article is merely supplementary to that on **ACCHO**. The name is in fact an interpolation in the history of the place. The city which was called Accho in the earliest Jewish annals, and which is again the *Akko* or *St. Jean d'Acre* of crusading and modern times, was named Ptolemais in the Macedonian and Roman periods. In the former of these periods it was the most important town upon the coast, and it is prominently mentioned in the first book of Maccabees, v. 15, 55, x. 1, 58, 60, xii. 43. In the latter its eminence was far outdone by Herod's new city of CAESAREA.\* Still in

the N. T. Ptolemais is a marked point in St. Paul's travels both by land and sea. He must have passed through it on all his journeys along the great coast-road which connected Caesarea and Antioch (Acts xi. 30, xii. 25, xv. 2, 30, xviii. 22); and the distances are given both in the Antonine and Jerusalem itineraries (Wesseling, *Itin.* 158, 584). But it is specifically mentioned in Acts xxi. 7, as containing a Christian community, visited for one day by St. Paul. On this occasion he came to Ptolemais by sea. He was then on his return voyage from the third missionary journey. The last harbour at which he had touched was Tyre (ver. 3). From Ptolemais he proceeded, apparently by land, to Caesarea (ver. 8), and thence to Jerusalem (ver. 17). [J. S. H.]

**PU'A** (פּוּא': *Phua*) properly **PUVAH**. **PUVAH** the son of Issachar (Num. xxvi. 23).

**PU'AH** (פּוּאִה: *Phua*). 1. The father of Tola, a man of the tribe of Issachar, and judge of Israel after Abimelech (Judg. x. 1). In the Vulgate, instead of "the son of Dodo," he is called "the uncle of Abimelech;" and in the LXX. Tola is said to be "the son of Phua, the son (*υἱός*) of his father's brother;" both versions endeavouring to render "Dodo" as an appellative, while the latter introduces a remarkable genealogical difficulty.

2. The son of Issachar (1 Chr. vii. 1), elsewhere called **PHUVAH** and **PUA**.

3. (פּוּאִה). One of the two midwives to whom Pharaoh gave instructions to kill the Hebrew male children at their birth (Ex. i. 15). In the A. V. they are called "Hebrew midwives," a rendering which is not required by the original, and which is doubtful, both from the improbability that the king would have entrusted the execution of such a task to the women of the nation he was endeavouring to destroy, as well as from the answer of the women themselves in ver. 19, "for the Hebrew women are not like the Egyptian women;" from which we may infer that they were accustomed to attend upon the latter, and were themselves, in all probability, Egyptians. If we translate Ex. i. 18 in this way, "And the king of Egypt said to the women who acted as midwives to the Hebrew women," this difficulty is removed. The two, Shiphrah and Puah, are supposed to have been the chief and representatives of their profession; as Aben Ezra says, "They were chiefs over all the midwives: for no doubt there were more than five hundred midwives, but these two were chiefs over them to give tribute to the king of the hire." According to Jewish tradition, Shiphrah was Jochebed, and Puah, Miriam; "because," says Rashi, "she cried and talked and murmured to the child, after the manner of the women that lull a weeping infant." The origin of all this is a play upon the name Puah, which is derived from a root signifying "to cry out," as in Is. xlii. 14, and used in Rabbinical writers of the bleating of sheep. [W. A. W.]

**PUBLICAN** (τελωνιῆς; *publicanus*). The word thus translated belongs only, in the N. T., to the three Synoptic Gospels. The class designated by the Greek word were employed as collectors of the Roman revenue. The Latin word from which the English of the A. V. has been taken was applied to a higher order of men. It will be necessary to glance at the financial administration of the Roman provinces in order to understand the relation of the two classes to each other, and the grounds of the

\* It is worthy of notice that Herod, on his return from Italy to Syria, landed at Ptolemais (Joseph. *Ant.* xiv. 15, §1).

hatred and scorn which appear in the N. T. to have fallen on the former.

The Roman senate had found it convenient, at a period as early as, if not earlier than, the second Punic war, to farm the *vectigalia* (direct taxes) and the *portoria* (customs, including the *octroi* on goods carried into or out of cities) to capitalists who undertook to pay a given sum into the treasury (in *publicum*), and so received the name of *publicani* (Liv. xxi. 7). Contracts of this kind fell naturally into the hands of the *equites*, as the richest class of Romans. Not unfrequently they went beyond the means of any individual capitalist, and a joint-stock company (*societas*) was formed, with one of the partners, or an agent appointed by them, acting as managing director (*magister*; Cic. *ad Div.* xiii. 9). Under this officer, who resided commonly at Rome, transacting the business of the company, paying profits to the partners and the like, were the *sub-magistri*, living in the provinces. Under them, in like manner, were the *portitores*, the actual custom-house officers (*douaniers*), who examined each bale of goods exported or imported, assessed its value more or less arbitrarily, wrote out the ticket, and enforced payment. The latter were commonly natives of the province in which they were stationed, as being brought daily into contact with all classes of the population. The word *τελαῖται*, which etymologically might have been used of the *publicani* properly so called (*τέλη*, *δωροποι*), was used popularly, and in the N. T. exclusively, of the *portitores*.

The *publicani* were thus an important section of the equestrian order. An orator wishing, for political purposes, to court that order, might describe them as "illos equitum Romanorum, ornamentum civitatis, firmamentum Reipublice" (Cic. *pro Planc.* 9). The system was, however, essentially a vicious one, the most detestable, perhaps, of all modes of managing a revenue (comp. Adam Smith, *Wealth of Nations*, v. 2), and it bore its natural fruits. The *publicani* were banded together to support each other's interest, and at once resented and defied all interference (Liv. xxv. 3). They demanded severe laws, and put every such law into execution. Their agents, the *portitores*, were encouraged in the most vexatious or fraudulent exactions, and a remedy was all but impossible. The popular feeling ran strong even against the equestrian capitalists. The Macedonians complained, as soon as they were brought under Roman government, that, "ubi publicanus est, ibi aut jus publicum vanum, aut libertas sociis nulla" (Liv. xlv. 18). Cicero, in writing to his brother (*ad Quint.* i. 1, 11), speaks of the difficulty of keeping the *publicani* within bounds, and yet not offending them, as the hardest task of the governor of a province. Tacitus counted it as one bright feature of the ideal life of a people unlike his own, that there "nec publicanus astitit" (*German.* 29). For a moment the capricious liberalism of Nero led him to entertain the thought of sweeping away the whole system of *portoria*, but the conservatism of the senate, servile as it was in all things else, rose in arms against it, and the scheme was dropped (Tac. *Ann.* xiii. 50); and the "immodestia publicanorum" (*ib.*) remained unchecked.

\* Amusing instances of the continuance of this feeling may be seen in the extracts from Chrysostom and other writers, quoted by Suicer, s. v. *τελαῖται*. In part these are perhaps rhetorical amplifications of what they found in

If this was the case with the *portitores* of the company, we may imagine how it stood with the underlings. They overcharged whenever there was an opportunity (Luke xi. 13). They brought the charges of smuggling in the hope of obtaining large money (Luke xix. 8). They detained and spoiled letters on mere suspicion (Terent. *Phorm.* i. 2, 9). Plaut. *Trinumm.* iii. 3, 64). The *portitores* were in most cases the subject of complaint (Cic. *Quint.* i. 1, 11). It was the basest of all professions (Cic. *de Offic.* i. 42). They were the enemies and bears of human society (Stobaeus, *Serm.* 2, 2). "*Πόδες τελαῖται, πόδες ἄφρονες*" had become proverb, even under an earlier régime, and a truer than ever now (Xeno. *Comic.* op. *Democritus* Meiske, *Frag. Com.* iv. 596).<sup>2</sup>

All this was enough to bring the *publicani* into disfavour everywhere. In Judaea and Galilee there were special circumstances of aggravation. An employment brought out all the basest and most the Jewish character. The strong feeling of the Jews as to the absolute unlawfulness of paying tribute at all made matters worse. The Pharisees who discussed the question (Matt. xxi. 15, 16) most part answered it in the negative. The followers of JUDAS of GALILEE, had made this a special grievance against which they rose. In addition to their other faults, accordingly, the Pharisees of the N. T. were regarded as traitors and specially defiled by their frequent intercourse with the heathen, willing tools of the oppressor. They were classed with sinners (Matt. ix. 11, 13, 17), with harlots (Matt. xxi. 31, 32), with the heathen (Matt. xviii. 17). In Galilee they counted probably of the least reputable members of the Samaritan and peasant class. Left to themselves, one of decent lives holding aloof from them, their evil friends or companions were found among those who like themselves were outcasts from the Jewish law. Scribes and people alike hated them as traitors and peasants in Ireland have hated a *black* or those who took service in collecting tithes or evicting tenants.

The Gospels present us with some instances of this feeling. To eat and drink "with *Publicans*" seems to the Pharisaic mind incompatible with the character of a recognized Rabbi (Matt. ix. 10). They spoke in their scorn of Our Lord as the friend of *Publicans* (Matt. xi. 19). *Publicans* and furnish some curious illustrations of the same feeling. The Chaldee Targum and R. Solomon find in "the archers who sit by the waters" of Jer. vi. 18, a description of the *τελαῖται* sitting on the banks of rivers or seas in ambush for the wayfarer. The number of the Talmud enumerates three classes of men whom promises need not be kept, and to whom murderers, thieves, and *publicans* (*Amora.* i. 1). If money known to come from them was received in the alms-box of the synagogue or the Chamber of the Temple (*Baba kama*, x. 1). To write a public ticket, or even to carry the ink for it on the Sabbath-day was a distinct branch of the commerce (*Shabb.* vii. 2). They were not fit to sit in judgment, or even to give testimony (*Sabb.* x. 2). Sometimes there is an exceptional notice in the favour. It was recorded as a special instance in

the Gospels; but it can hardly be doubted that here also is the never-dying dislike of the Pharisees to the collector. Their vehement denunciations of what should be a feeling with Judaea a description of a *publican*.

the father of a Rabbi that, having been a publican for thirteen years, he had lessened instead of increasing the pressure of taxation (*ibid.*).<sup>b</sup> (The references are taken, for the most part, from Lightfoot.)

The class thus practically excommunicated furnished some of the earliest disciples both of the Baptist and of Our Lord. Like the outlying, so-called "dangerous classes" of other times, they were at least free from hypocrisy. Whatever morality they had, was real and not conventional. We may think of the Baptist's preaching as having been to them what Wesley's was to the colliers of Kingswood or the Cornish miners. The Publican who cried in the bitterness of his spirit, "God be merciful to me a sinner" (Luke xviii. 13), may be taken as the representative of those who had come under this influence (Matt. xxi. 32). The Galilaean fishermen had probably learnt, even before their Master taught them, to overcome their repugnance to the Publicans who with them had been sharers in the same baptism. The Publicans (Matthew perhaps among them), had probably gone back to their work learning to exact no more than what was appointed them (Luke iii. 13). However startling the choice of Matthew the publican to be of the number of the Twelve may have seemed to the Pharisees, we have no trace of any perplexity or offence on the part of the disciples.

The position of Zachaeus as an ἀρχιτελώνης (Luke xix. 2), implies a gradation of some kind among the persons thus employed. Possibly the balsam trade, of which Jericho was the centre, may have brought larger profits, possibly he was one of the *sub-magistri* in immediate communication with the Bureau at Rome. That it was possible for even a Jewish publican to attain considerable wealth, we find from the history of John the τελώνης (Joseph. B. J. ii. 14, §4), who acts with the levelling Jews and offers a bribe of eight talents to the Procurator, Gessius Florus. The fact that Jericho was at this time a city of the priests—12,000 are said to have lived there—gives, it need hardly be said, a special significance to Our Lord's preference of the house of Zachaeus. [E. H. P.]

**PUBLIUS** (Πάβλιος: *Publius*). The chief man—probably the governor—of Melita, who received and lodged St. Paul and his companions on the occasion of their being shipwrecked off that island (Acts xxviii. 7). It soon appeared that he was entertaining an angel unawares, for St. Paul gave proof of his divine commission by miraculously healing the father of Publius of a fever, and afterwards working other cures on the sick who were brought unto him. Publius possessed property in Melita: the distinctive title given to him is "the first of the island;" and two inscriptions, one in Greek, the other in Latin, have been found at Cetta Vecchia, in which that apparently official title occurs (Alford). Publius may perhaps have been the delegate of the Roman praetor of Sicily to whose jurisdiction Melita or Malta belonged. The Roman Martyrologies assert that he was the first bishop of the island, and that he was afterwards appointed to succeed Dionysius as bishop of Athens. St. Jerome records a tradition that

<sup>b</sup> We have a singular parallel to this in the statues of *καλὸς τελωνιστάρις*, mentioned by Suetonius, as erected by the cities of Asia to Sabinius, the father of Vespasian (Suet. Vesp. 11).

<sup>c</sup> This Timothy is said to have preached the Gospel in Britain.

he was crowned with martyrdom (*De Viris Illust.* xix.; Baron. i. 554). [E. H.—K.]

**PUDENS** (Πούδης: *Pudens*), a Christian friend of Timothy at Rome. St. Paul, writing about A.D. 68, says, "Eubulus greeteth thee, and Pudens, and Linus, and Claudia" (2 Tim. iv. 21). He is commemorated in the Byzantine Church on April 14th; in the Roman Church on May 19th. He is included in the list of the seventy disciples given by Pseudo-Hippolytus. Papebroch, the Bollandist editor (*Acta Sanctorum*, Maii, tom. iv. p. 296), while printing the legendary histories, distinguishes between two saints of this name, both Roman senators; one the host of St. Peter and friend of St. Paul, martyred under Nero; the other, the grandson of the former, living about A.D. 150, the father of Novatus, Timothy,<sup>a</sup> Praxedes, and Pudentiana, whose house, in the valley between the Viminal hill and the Esquiline, served in his lifetime for the assembly of Roman Christians, and afterwards gave place to a church, now the church of S. Pudenziana, a short distance at the back of the Basilica of Sta. Maria Maggiore. Earlier writers (as Baronius, *Ann.* 44, §61; *Ann.* 59, §18; *Ann.* 162) are disposed to believe in the existence of one Pudens only.

About the end of the 16th century it was observed (F. de Monceaux, *Eccles. Christianae veteris Britannicae incunabula*, Tournay, 1614; Estius, or his editor; Abp. Parker, *De Antiquit. Britann.*, *Eccles.* 1605; M. Alford, *Annales Eccl. Brit.* 1663; Camden, *Britannia*, 1586) that Martial, the Spanish poet, who went to Rome A.D. 86, or earlier, in his 23rd year, and dwelt there for nearly forty years, mentions two contemporaries, Pudens and Claudia, as husband and wife (*Epig.* iv. 13); that he mentions Pudens or Aulus Pudens in i. 32, iv. 29, v. 48, vi. 58, vii. 11, 97; Claudia or Claudia Rufina in viii. 60, xi. 53; and, it might be added, Linus, in i. 76, ii. 54, iv. 66, xi. 25, xii. 49. That Timothy and Martial should have each three friends bearing the same names at the same time and place is at least a very singular coincidence. The poet's Pudens was his intimate acquaintance, an admiring critic of his epigrams, an immoral man if judged by the Christian rule. He was an Umbrian and a soldier: first he appears as a centurion aspiring to become a primipilus; afterwards he is on military duty in the remote north; and the poet hopes that on his return thence he may be raised to Equestrian rank. His wife Claudia is described as of British birth, of remarkable beauty and wit, and the mother of a flourishing family.

A Latin inscription<sup>d</sup> found in 1723 at Chichester connects a [Pud]ns with Britain and with the Claudian name. It commemorates the erecter of a temple by a guild of carpenters, with the sanction of King Tiberius Claudius Cogidubnus, the site being the gift of [Pud]ens the son of Pudentinus. Cogidubnus was a native king appointed and supported by Rome (Tac. *Agrippina*, 14). He reigned with delegated power probably from A.D. 52 to A.D. 76. If he had a daughter, she would inherit the name Claudia and might, perhaps as a hostage, be educated at Rome.

<sup>d</sup> "[N]eptuno et Minervae templum [pr]o salute domus divinae, auctoritate Tiberii Claudii Cogidubni regis legati augusti in Brit. [colle]gium fabrorum et qui in eo sacra sunt, desuo d[omi]no averunt, donante arcam [Pud]ento, Pudentini filio." A corner of the stone was broken off, and the letters within brackets have been inserted on conjecture.

period when Pul must have reigned. This monarch is the grandson of Shalmaneser (the Black Obelisk king, who warred with Benhadad and Hazael, and took tribute from Jehu), while he is certainly anterior to the whole line of monarchs forming the lower dynasty—Tiglath-pileser, Shalmaneser, Sargon, &c. His probable date therefore is B.C. 800-750, while Pul, as we have seen, ruled over Assyria in B.C. 770. The Hebrew name consists of a single element. If we take the "Phalos" or "Phaloch" of the Septuagint as probably nearer to the original type, we have a form not very different from *Vul-lush* or *Ica-lush*. If, on these grounds, the identification of the Scriptural Pul with the monumental *Vul-lush* be regarded as established, we may give some further particulars of him which possess considerable interest. *Vul-lush* reigned at Calah (*Nimrud*) from about B.C. 800 to B.C. 750. He sets as that he made an expedition into Syria, wherein he took Damascus; and that he received tribute from the Medes, Armenians, Phoenicians, Samaritans, Damascenes, Philistines, and Edomites. He also tells us that he invaded Babylonia and received the submission of the Chaldeans. His wife, who appears to have occupied a position of more eminence than any other wife of an Assyrian monarch, bore the name of Semiramis, and is thought to be at once the Babylonian queen of Herodotus (i. 184), who lived six generations before Cyrus, and the prototype of that earlier sovereign of whom Ctesias told such wonderful stories (Diod. Sic. ii. 4-20), and who long maintained a great local reputation in Western Asia (Strab. xvi. i, §2). It is not improbable that the real Semiramis was a Babylonian princess, whom *Vul-lush* married on his reduction of the country, and whose son Nabonassar (according to a further conjecture) he placed upon the Babylonian throne. He calls himself in one inscription "the monarch to whose son Ashur, the chief of the gods, has granted the kingdom of Babylon." He was probably the last Assyrian monarch of his race. The list of Assyrian monumental kings, which is traceable without a break and in a direct line to him from his seventh ancestor, here comes to a stand; no son of *Vul-lush* is found; and Tiglath-pileser, who seems to have been *Vul-lush's* successor, is evidently a usurper, since he makes no mention of his father or ancestors. The circumstances of *Vul-lush's* death, and of the revolution which established the lower Assyrian dynasty, are almost wholly unknown, no account of them having come down to us upon any good authority. Not much value can be attached to the statement in Agathias (ii. 25, p. 119) that the last king of the upper dynasty was succeeded by his own gardener. [G. R.]

**PULSE** (פולס, *zêrô'tin*, and פולסים, *zêrô'tim*: *sempa*; Theod. *sempara*: *leguminas*) occurs only in the A. V. in Dan. i. 12, 16, as the translation of the above plural nouns, the literal meaning of which is "seeds" of any kind. The *zêrô'tin* on which "the four children" thrived for ten days is perhaps not to be restricted to what we now understand by "pulse," i. e. the grains of leguminous vegetables: the term probably includes edible seeds in general. Gesenius translates the words "vegetables, herbs, such as are eaten in a half-fist, as opposed to flesh and more delicate food." Probably the term denotes uncooked grains of any kind, whether barley, wheat, millet, vetches, &c. [W. H.]

**PUNISHMENTS.** The earliest theory of

punishment current among mankind is doubtless the one of simple retaliation, "blood for blood" [BLOOD, REVENGER OF], a view which in a limited form appears even in the Mosaic law. Viewed historically, the first case of punishment for crime mentioned in Scripture, next to the Fall itself, is that of Cain the first murderer. His punishment, however, was a substitute for the retaliation which might have been looked for from the hand of man, and the mark set on him, whatever it was, served at once to designate, protect, and perhaps correct the criminal. That death was regarded as the fitting punishment for murder appears plain from the remark of Lamech (Gen. iv. 24). In the post-diluvian code, if we may so call it, retribution by the hand of man, even in the case of an offending animal, for blood shed, is clearly laid down (Gen. ix. 5, 6); but its terms give no sanction to that "wild justice" executed even to the present day by individuals and families on their own behalf by so many of the uncivilized races of mankind. The prevalence of a feeling of retribution due for bloodshed may be remarked as arising among the brethren of Joseph in reference to their virtual fratricide (Gen. xlii. 21).

Passing onwards to Mosaic times, we find the sentence of capital punishment, in the case of murder, plainly laid down in the law. The murderer was to be put to death, even if he should have taken refuge at God's altar or in a refuge city, and the same principle was to be carried out even in the case of an animal (Ex. xxi. 12, 14, 28, 36; Lev. xxiv. 17, 21; Num. xxxv. 31; Deut. xix. 11, 12: and see 1 K. ii. 28, 34).

I. The following offences also are mentioned in the Law as liable to the punishment of death:

1. Striking, or even reviling, a parent (Ex. xxi. 15, 17).
2. Blasphemy (Lev. xxiv. 14, 16, 23: see Philo, *V. M.* iii. 25; 1 K. xxi. 10; Matt. xxvi. 65, 66).
3. Sabbath-breaking (Num. xv. 32-36; Ex. xxxi. 14, xxxv. 2).
4. Witchcraft, and false pretension to prophecy (Ex. xxii. 18; Lev. xx. 27; Deut. xiii. 5, xviii. 20; 1 Sam. xxviii. 9).
5. Adultery (Lev. xx. 10; Deut. xxii. 22: see John viii. 5, and Joseph. *Ant.* iii. 12, §1).
6. Unchastity, *a.* previous to marriage, but detected afterwards (Deut. xxii. 21). *b.* In a betrothed woman with some one not affianced to her (ib. ver. 23). *c.* In a priest's daughter (Lev. xxi. 9).
7. Rape (Deut. xxi. 25).
8. Incestuous and unnatural connexions (Lev. xx. 11, 14, 16; Ex. xxii. 19).
9. Man-stealing (Ex. xxi. 16; Deut. xxiv. 7).
10. Idolatry, actual or virtual, in any shape (Lev. xx. 2; Deut. xiii. 6, 10, 15, xvii. 2-7: see Josh. vii. and xxii. 30, and Num. xxv. 8).
11. False witness in certain cases (Deut. xix. 16, 19).

Some of the foregoing are mentioned as being in earlier times liable to capital or severe punishment by the hand either of God or of man, as (6.) Gen. xxxviii. 24; (1.) Gen. ix. 25; (8.) Gen. xix., xxxviii. 10; (5.) Gen. xii. 17, x. 7, xxxix. 19.

II. But there is a large number of offences, some of them included in this list, which are named in the Law as involving the penalty of "cutting off from the people." On the meaning of this expression

• כרת; ἀποκόμω.

some controversy has arisen. There are altogether thirty-six or thirty-seven cases in the Pentateuch in which this formula is used, which may be thus classified: *a.* Branch of Morals. *b.* Branch of Covenant. *c.* Branch of Ritual.

1. Wilful sin in general (Num. xv. 30, 31).

\*15 cases of incestuous or unclean connexion (Lev. xviii. 29, and xx. 9-21).

2. \*†Uncircumcision (Gen. xvii. 14; Ex. iv. 24).

Neglect of Passover (Num. ix. 13).

\*Sabbath-breaking (Ex. xxxi. 14).

Neglect of Atonement-day (Lev. xxiii. 29).

†Work done on that day (Lev. xxiii. 30).

†Children offered to Molech (Lev. xx. 3).

\*†Witchcraft (Lev. xx. 6).

Anointing a stranger with holy oil (Ex. xxx. 33).

3. Eating leavened bread during Passover (Ex. xii. 15, 19).

Eating fat of sacrifices (Lev. vii. 25).

Eating blood (Lev. vii. 27, xvii. 14).

\*Eating sacrifice in an unclean condition (Lev. vii. 20, 21, xii. 3, 4, 9).

Offering too late (Lev. xix. 8).

Making holy ointment for private use (Ex. xxx. 32, 33).

Making perfume for private use (Ex. xxx. 38).

Neglect of purification in general (Num. xix. 13, 20).

Not bringing offering after slaying a beast for food (Lev. xvii. 9).

Not slaying the animal at the tabernacle-door (Lev. xvii. 4).

\*†Touching holy things illegally (Num. iv. 15, 18, 20; and see 2 Sam. vi. 7; 2 Chr. xxvi. 21).

In the foregoing list, which, it will be seen, is classified according to the view supposed to be taken by the Law of the principle of condemnation, the cases marked with \* are (*a*) those which are expressly threatened or actually visited with death, as well as with cutting off. In those (*b*) marked † the hand of God is expressly named as the instrument of execution. We thus find that of (*a*) there are in class 1, 7 cases, all named in Lev. xx. 9-16.

do. 2, 4 cases,

do. 3, 2 cases,

while of (*b*) we find in class 2, 4 cases, of which 3 belong also to (*a*), and in class 3, 1 case. The question to be determined is, whether the phrase "cut off" be likely to mean death in all cases, and to avoid that conclusion Le Clerc, Michaelis, and others, have suggested that in some of them, the ceremonial ones, it was intended to be commuted for banishment or privation of civil rights (Mich. *Laws of Moses*, §237, vol. iii. p. 436, trans.). Rabbinical writers explained "cutting off" to mean excommunication, and laid down three degrees of severity as belonging to it (Selden, *de Syn. i.* 6). [ANATHEMA.] But most commentators agree, that, in accordance with the *prima facie* meaning of Heb. x. 28, the sentence of "cutting off" must be understood to be death-punishment of some sort. San- schütz explains it to be premature death by God's hand, as if God took into his own hand such cases of ceremonial defilement as would create difficulty for human judges to decide. Knobel thinks death-punishment absolutely is meant. So Corn. & Lapide and Ewald. Jahn explains, that when God is said to cut off, an act of divine Providence is

meant, which that "cutting death as the Calmet thinks longing to ti (*a*) that two i tion of a riti actual inflicts the people eat (2.) that of U in the latter i municated for of the direct offenders wer offences,—Na and his comp rished from i 7).—and furt might be rega To whichever thought to in the primary i of death to be sion, but in atonement on terposition o death always And it is ab sentence prod to the preser every actual xv. 27, 28; § ii. 299; Kno xvii. 13, 14; Ewald, *Gesch. Bibl.* §257).

death by oit

have thought it was never used excepting after death. A tower of burning embers is mentioned in 2 Macc. xiii. 4-8. The Rabbinical account of burning by means of molten lead poured down the throat has no authority in Scripture.

(4.) *Death by the sword or spear* is named in the Law (Ex. xix. 13, xxxii. 27; Num. xxv. 7; ) but two of the cases may be regarded as exceptional; but it occurs frequently in regal and post-Babylonian times (1 K. ii. 25, 34, xix. 1; 2 Chr. xxi. 4, Jer. xxvi. 23; 2 Sam. i. 15, iv. 12, xx. 22; 1 Sam. xv. 33, xxii. 18; Judg. ix. 5; 2 K. x. 7; Matt. xiv. 8, 10), a list in which more than one case of assassination, either with or without legal forms, is included.

(5.) *Strangling* is said by the Rabbins to have been regarded as the most common but least severe of the capital punishments, and to have been performed by immersing the convict in clay or mud, and then strangling him by a cloth twisted round the neck (Goodwyn, *M. and A.* p. 122; Otho, *Lex. Rab.* s. v. "Supplicia;" Sanhedr. vii. 3; Ker Porter, *Trav.* ii. 177; C. B. Michaelis, *De Judiciis*, ap. Pott, *Syll. Comm.* iv. §10, 12).

This Rabbinical opinion, founded, it is said, on oral tradition from Moses, has no Scripture authority.

(b.) Besides these ordinary capital punishments, we read of others, either of foreign introduction or of an irregular kind. Among the former, (1.) *CRUCIFIXION* is treated alone (vol. i. p. 369), to which article the following remark may be added, that the Jewish tradition of capital punishment, independent of the Roman governor, being interdicted for forty years previous to the Destruction, appears in fact, if not in time, to be justified (John xviii. 31, with De Wette's *Comment.*; Goodwyn, p. 121; Keil, ii. p. 264; Joseph. *Ant.* x. 9, §1).

(2.) *Drowning*, though not ordered under the Law, was practised at Rome, and is said by St. Jerome to have been in use among the Jews (Cic. *pro Sext. Rosc. Am.* 25; Jerome, *Com. on Matth.* lib. iii. p. 138; Matt. xviii. 6; Mark ix. 42).

(3.) *Sawing asunder* or crushing beneath iron instruments. The former is said to have been practised on Isaiah. The latter may perhaps not have always caused death, and thus have been a torture rather than a capital punishment (2 Sam. xii. 31, and perhaps Prov. xx. 26; Heb. xi. 37; Just. Mart. *Tryph.* 120). The process of sawing asunder, as practised in Barbary, is described by Shaw (*Trav.* p. 254).

(4.) *Pounding in a mortar, or beating to death*, is alluded to in Prov. xxvii. 22, but not as a legal punishment, and cases are described (2 Macc. vi. 28, 30). Pounding in a mortar is mentioned as a Cingalese punishment by Sir E. Tennant (*Ceylon*, ii. 88).

(5.) *Precipitation*, attempted in the case of our Lord at Nazareth, and carried out in that of captives from the Edomites, and of St. James, who is said to have been cast from "the pinnacle" of the Temple. Also it is said to have been executed on some Jewish women by the Syrians (2 Macc. v. 10; Luke iv. 29; Euseb. *H. E.* ii. 23; 2 Chr. xrv. 12).

Criminals executed by law were buried outside the city-gates, and heaps of stones were flung upon their graves (Josh. vii. 25, 26; 2 Sam. xviii. 17; Jer. xxii. 19). Mohammedians to this day cast stones, in passing, at the supposed tomb of Absalom

(Fabri, *Evagatorium*, i. 409; Sandys, *Trav.* p. 189; Raumer, *Palaest.* p. 272).

(c.) Of *secondary punishments* among the Jews the original principles were, (1.) *retaliation*, "eye for eye," &c. (Ex. xxi. 24, 25; see Gell. *Noct. Att.* xx. 1).

(2.) *Compensation*, identical (restitution) or analogous; payment for loss of time or of power (Ex. xxi. 18-36; Lev. xxiv. 18-21; Deut. xix. 21). The man who stole a sheep or an ox was required to restore four sheep for a sheep and five oxen for an ox thus stolen (Ex. xxii. 1). The thief caught in the fact in a dwelling might even be killed or sold, or if a stolen animal were found alive, he might be compelled to restore double (Ex. xxii. 2-4). Damage done by an animal was to be fully compensated (ib. ver. 5). Fire caused to a neighbour's corn was to be compensated (ver. 6). A *pledge* stolen, and found in the thief's possession, was to be compensated by double (ver. 7). All *trespass* was to pay double (ver. 9). A *pledge* lost or damaged was to be compensated (ver. 12, 13). A *pledge* withheld, to be restored with 20 per cent. of the value (Lev. vi. 4, 5). The "seven-fold" of Prov. vi. 31, by its notion of completeness, probably indicates servitude in default of full restitution (Ex. xxii. 2-4). *Slander* against a wife's honour was to be compensated to her parents by a fine of 100 shekels, and the traducer himself to be punished with stripes (Deut. xxii. 18, 19).

(3.) *Stripes*, whose number was not to exceed forty (Deut. xxv. 3); whence the Jews took care not to exceed thirty-nine (2 Cor. xi. 24; Joseph. *Ant.* iv. 8, §21). The convict was stripped to the waist and tied in a bent position to a low pillar, and the stripes, with a whip of three thongs, were inflicted on the back between the shoulders. A single stripe in excess subjected the executioner to punishment (*Maccoth*, iii. 1, 2, 3, 13, 14). It is remarkable that the Abyssinians use the same number (Wolff, *Trav.* ii. 276).

(4.) *Scourging* with thorns is mentioned Judg. viii. 16. The *stocks* are mentioned Jer. xx. 2; *passing through fire*, 2 Sam. xii. 31; *mutilation*, Judg. i. 6, 2 Macc. vii. 4, and see 2 Sam. iv. 12; *plucking out hair*, Is. l. 6; in later times, *imprisonment*, and *confiscation or exile*, Ezr. vii. 26; Jer. xxxvii. 15, xxxviii. 6; Acts iv. 3, v. 18, xii. 4. As in earlier times imprisonment formed no part of the Jewish system, the sentences were executed at once (see Esth. vii. 8-10; Selden, *De Syn.* ii. c. 13, p. 888). Before death a grain of frankincense in a cup of wine was given to the criminal to intoxicate him (ib. 889). The command for witnesses to cast the first stone shows that the duty of execution did not belong to any special officer (Deut. xvii. 7).

Of punishments inflicted by other nations we have the following notices:—In Egypt the power of life and death and imprisonment rested with the king, and to some extent also with officers of high rank (Gen. xl. 3, 22, xlii. 20). Death might be commuted for slavery (xlii. 19, xlv. 9, 33). The law of retaliation was also in use in Egypt, and the punishment of the *bastinado*, as represented in the paintings, agrees better with the Mosaic directions than with the Rabbinical (Wilkinson, *A. E.* ii. 214, 215, 217). In Egypt, and also in Babylon, the chief of the executioners, *Rab-Tabbachim*, was a great officer of state (Gen. xxxvii. 36, xxxix. xl.; Dan. ii. 14; Jer. xxxix. 13, xli. 10, xliii. 6, lii. 15, 16; Michaelis, iii. 412; Joseph. *Ant.* x. 8, §5

[**CHEETHIM**]; Mark vi. 27). He was sometimes a eunuch (Joseph. *Ant.* vii. 5, §4).

Putting out the eyes of captives, and other cruelties, as flaying alive, burning, tearing out the tongue, &c., were practised by Assyrian and Babylonian conquerors; and parallel instances of despotic cruelty are found in abundance in both ancient and modern times in Persian and other history. The execution of Haman and the story of Daniel are pictures of summary Oriental procedure (2 K. xiv. 7; Esth. vii. 9, 10; Jer. xix. 22; Dan. iii. 6, vi. 7, 24; Her. vii. 39, ix. 112, 113; Chardin, *Voy.* vi. 21, 118; Layard, *Nineveh*, ii. 369, 374, 377, *Nin. & Bab.* 456, 457). And the duty of counting the numbers of the victims, which is there represented, agrees with the story of Jehu (2 K. x. 7), and with one recorded of Shah Abbas Mirza, by Ker Porter (*Travels*, ii. 524, 525; see also Burckhardt, *Syria*, p. 57; and Malcolm, *Sketches of Persia*, p. 47).

With the Remms, stripes and the stocks, *νεμεσιγγαν* *ξύλον*, *nervus* and *columbar*, were in use, and imprisonment, with a chain attached to a soldier. There were also the *liberae custodie* in private houses [PRISON] (Acts xvi. 23, xxii. 24, xxviii. 16; Xen. *Hell.* iii. 3, 11; Herod. ix. 37; Plautus, *Rud.* iii. 6, 30, 34, 38, 50; Arist. *Eq.* 1044 (ed. Bekker); Joseph. *Ant.* xviii. 6, §7, xix. 6, §1; Sall. *Cat.* 47; *Dict. of Antiq.* "Fingrum").

*Exposure to wild beasts* appears to be mentioned by St. Paul (1 Cor. xv. 32; 2 Tim. iv. 17), but not with any precision. [H. W. P.]

#### PUN'ITES, THE (פּוּנִיטִים; δ φουαί: *Phuditae*).

The descendants of Pun, or Phuvah, the son of Issachar (Num. xxvi. 23).

**PUN'ON** (פּוּנֹן, i. e. Phunon; Samarit. פִּינֹן: פִּינוֹב; Alex. Φυνω: *Phinon*). One of the halting-places of the Israelite host during the last portion of the Wandering (Num. xxxiii. 42, 43). It lay next beyond Zalmonah, between it and Oboto, and three days' journey from the mountains of Abarim, which formed the boundary of Moab.

By Eusebius and Jerome (*Onomasticon*, Φυνωρ, "Fenon") it is identified with Pinon, the seat of the Edomite tribe of that name, and, further, with Phaeno, which contained the copper-mines so notorious at that period, and was situated between Petra and Zoar. This identification is supported by the form of the name in the LXX. and Samaritan; and the situation falls in with the requirements of the Wanderings. No trace of such a name appears to have been met with by modern explorers. [G.]

**PURIFICATION.** The term "purification," in its legal and technical sense, is applied to the ritual observances whereby an Israelite was formally absolved from the taint of uncleanness, whether evidenced by any overt act or state, or whether connected with man's natural depravity. The cases that demanded it in the former instance are defined in the Levitical law [**UNCLEANNESS**]: with regard to the latter, it is only possible to lay down the general rule that it was a fitting prelude to any nearer approach to the Deity; as, for instance, in the admission of a proselyte to the congregation [PROSELYTE], in the baptism (*καταρτισμός*, John iii. 25) of the Jews as a sign of repentance [BAPTISM], in the consecration of priests and Levites [PRIEST; LEVITE], or in the performance of special religious acts (Lev. xvi. 4; 2 Chr. xxx. 19). In the present article we are concerned solely with the

#### PURIFICATION

former class, inasmuch as to this alone were the ritual observances of a special character. The nature of purification, indeed, in all cases, consisted in some of water, whether by way of ablution or aspersion; but in the *majora delicta* of legal uncleanness, sacrifices of various kinds were added, and the ceremony throughout bore an expiatory character. Such ablution of the person was required after sexual intercourse (Lev. xv. 19; 2 Sam. x. 6); after defilement of the clothes, after touching the corpse of a clean beast, or eating or carrying the morsel of a clean beast that had died a natural death (Lev. xxi. 25, 40): ablution both of the person and of the defiled garments in cases of *gonorrhoea* or *gonorrhea* (Lev. xv. 16, 17)—the ceremony in each of the above instances to take place on the day in which the uncleanness was contracted. A higher degree of uncleanness resulted from prolonged periods of menses, and menstruation in women; in these cases a probationary interval of seven days was allowed after the cessation of the symptoms, and on the evening of the seventh day the candidate for purification performed an ablution both of the person and of the garments, and on the eighth day (two turtle-doves or two young pigeons, one to be offered, the other for a burnt-offering (Lev. xii. 1-15, 19-30). Contact with persons in the above states, or even with clothing or furniture that had been used by them while in those states, involved uncleanness in a minor degree, to be removed by ablution on the day of infection generally (Lev. xii. 5-11, 21-23), but in one particular case (after an interval of seven days (Lev. xv. 34). In cases of childbirth the sacrifice was increased to a lamb the first year with a pigeon or turtle-dove (Lev. xii. 6), an exception being made in favour of the poor who might present the same offering as in the preceding case (Lev. xii. 8; Luke ii. 22-24). The purification took place forty days after the birth of a son, and eighty after that of a daughter, the difference in the interval being based on physical considerations. The uncleanness thereby incurred were comparatively of a mild character, the more severe were connected with death, which, viewed in the penalty of sin, was in the highest degree demeriting. To this head we refer the two cases (1.) touching a corpse, or a grave (Num. xix. 14, 15, or even killing a man in war (Num. xxi. 17, 18); (2.) leprosy, which was regarded by the Israelites as nothing less than a living death. The ceremony of purification in the first of these two cases is detailed in Num. xix. A peculiar kind of water termed the *water of uncleanness* (אֵשֶׁת חַיִּים, "water of separation"), was prepared in the following manner:—An unblemished red heifer, on which the yoke had not passed, was slain by the chief priest and the high-priest outside the camp. A portion of its blood was sprinkled seven times towards the tabernacle; the rest of it, and the whole of the carcase including even its dung, were then burnt in the sight of the officiating priest, together with cedar-wood, hyssop, and scarlet. The ashes were collected by a clean man and deposited in a clean jar outside the camp. Whenever occasion required, a portion of the ashes was mixed with spring water in a jar, and the unclean person was sprinkled with it, or the third, and again on the seventh day, after

מִי־הַזֶּהָרָה.

אֶת־לִבְכֶם פָּנִי ב. Then A. V. incorrectly reads "directly before."

contraction of the uncleanness. That the water had an expiatory efficacy, is implied in the term *sin-offering*\* (A. V. "purification for sin") applied to it (Num. xix. 9), and all the particulars connected with its preparation had a symbolical significance appropriate to the object sought. The sex of the victim (female, and hence life-giving), its red colour (the colour of blood, the seat of life), its unimpaired vigour (never having borne the yoke), its youth, and the absence in it of spot or blemish, the cedar and the hyssop (possessing the qualities, the former of incorruption, the latter of purity), and the scarlet (again the colour of blood)—all these symbolized life in its fulness and freshness as the antidote of death. At the same time the extreme virulence of the uncleanness is taught by the regulations that the victim should be wholly consumed outside the camp, whereas generally certain parts were consumed on the altar, and the oil only outside the camp (comp. Lev. iv. 11, 12); that the blood was sprinkled *towards*, and not *before* the sanctuary; that the officiating minister should be neither the high-priest, nor yet simply a priest, but the *presumptive* high-priest, the office being too impure for the first, and too important for the second; that even the priest and the person that burnt the heifer were rendered unclean by reason of their contact with the victim; and, lastly, that the purification should be effected, not simply by the use of water, but of water mixed with ashes which served as a lye, and would therefore have peculiarly cleansing qualities.

The purification of the leper was a yet more formal proceeding, and indicated the highest pitch of uncleanness. The rites are thus described in Lev. xiv. 4-32:—The priest having examined the leper and pronounced him clear of his disease, took for him two birds "alive and clean," with cedar, scarlet, and hyssop. One of the birds was killed under the priest's directions over a vessel filled with spring water, into which its blood fell: the other, with the adjuncts, cedar, &c., was dipped by the priest into the mixed blood and water, and, after the unclean person had been seven times sprinkled with the same liquid, was permitted to fly away "into the open field." The leper then washed himself and his clothes, and shaved his head. The above proceedings took place outside the camp, and formed the first stage of purification. A probationary interval of seven days was then allowed, which period the leper was to pass "abroad out of his tent:"<sup>d</sup> on the last of these days the washing was repeated, and the shaving was more rigidly performed, even to the eyebrows and all his hair. The second stage of the purification took place on the eighth day, and was performed "before the Lord at the door of the tabernacle of the congregation." The leper brought thither an offering consisting of two he-lambs, a yearling ewe-lamb, fine flour mingled with oil, and a log of oil: in cases of poverty the offering was reduced to one lamb, and two turtle-doves, or two young pigeons, with a less quantity of fine flour, and a log of oil. The priest slew one of the he-lambs as a trespass-offering, and applied a portion of its blood to the right ear, right

thumb, and great toe of the right foot of the leper: he next sprinkled a portion of the oil seven times before the Lord, applied another portion of it to the parts of the body already specified, and poured the remainder over the leper's head. The other he-lamb and the ewe-lamb, or the two birds, as the case might be, were then offered as a sin-offering, and a burnt-offering, together with the meat-offering. The significance of the cedar, the scarlet, and the hyssop, of the running water, and of the "alive (full of life) and clean" condition of the birds, is the same as in the case previously described. The two stages of the proceedings indicated, the first, which took place outside the camp, the re-admission of the leper to the community of men; the second, before the sanctuary, his re-admission to communion with God. In the first stage, the slaughter of the one bird and the dismissal of the other, symbolized the punishment of death deserved and fully remitted. In the second, the use of oil and its application to the same parts of the body as in the consecration of priests (Lev. viii. 23, 24), symbolized the re-dedication of the leper to the service of Jehovah.

The ceremonies to be observed in the purification of a house or a garment infected with leprosy, were identical with the first stage of the proceedings used for the leper (Lev. xiv. 33-53).

The necessity of purification was extended in the post-Babylonian period to a variety of unauthorized cases. Cups and pots, brassen vessels and couches, were washed as a matter of ritual observance (Mark vii. 4). The washing of the hands before meals was conducted in a formal manner (Mark vii. 3), and minute regulations are laid down on this subject in a treatise of the Mishna, entitled *Tahum*. These ablutions required a large supply of water, and hence we find at a marriage feast no less than six jars containing two or three firkins apiece, prepared for the purpose (John ii. 6). We meet with references to purification after childbirth (Luke ii. 22), and after the cure of leprosy (Matt. viii. 4; Luke xvii. 14), the sprinkling of the water mixed with ashes being still retained in the latter case (Heb. ix. 13). What may have been the specific causes of uncleanness in those who came up to purify themselves before the Passover (John xi. 55), or in those who had taken upon themselves the Nazarite's vow (Acts xxi. 24, 26), we are not informed; in either case it may have been contact with a corpse, though in the latter it would rather appear to have been a general purification preparatory to the accomplishment of the vow.

In conclusion it may be observed, that the distinctive feature in the Mosaic rites of purification is their expiatory character. The idea of uncleanness was not peculiar to the Jew: it was attached by the Greeks to the events of childbirth and death (Thucyd. iii. 104; Eurip. *Iph. in Taur.* 383), and by various nations to the case of sexual intercourse (Herod. i. 198, ii. 64; Pers. ii. 16). But with all these nations simple ablution sufficed; no sacrifices were demanded. The Jew alone was taught by the use of expiatory offerings to discern to its full extent the connexion between the outward sign and the inward fount of impurity. [W. L. B.]

\* טָהוּר.

<sup>d</sup> The Rabbinical explanation of this was in conformity with the addition in the Chaldee version, "et non accedet ad latius usuris suae." The words cannot, however, be thus restricted: they are designed to mark the partial restoration of the leper—inside the camp, but outside his tent.

\* Various opinions are held with regard to the term טָהוּר. The meaning "with the flat" is in accordance with the general tenor of the Rabbinical usages, the hand used in washing the other being closed lest the palm should contract uncleanness in the act.

PURIM (פּוּרִים: \* *Φουρῖμ*: *Phurim*: also, יְמֵי הַפּוּרִים (Esth. ix. 26, 31): *die sortion*), the annual festival instituted to commemorate the preservation of the Jews in Persia from the massacre with which they were threatened through the machinations of Haman (Esth. ix.; Joseph. *Ant.* xi. 6, §13). [ESTHER.] It was probably called Purim by the Jews in irony. Their great enemy Haman appears to have been very superstitious and much given to casting lots (Esth. iii. 7). They gave the name Purim, or Lots, to the commemorative festival, because he had thrown lots to ascertain what day would be auspicious for him to carry into effect the bloody decree which the king had issued at his instance (Esth. ix. 24).

The festival lasted two days, and was regularly observed on the 14th and 15th of Adar. But if the 14th happened to fall on the Sabbath, or on the second or fourth day of the week, the commencement of the festival was deferred till the next day. It is not easy to conjecture what may have been the ancient mode of observance, so as to have given the occasion something of the dignity of a national religious festival. The traditions of the Jews, and their modern usage respecting it are curious. It is stated that eighty-five of the Jewish elders objected at first to the institution of the feast, when it was proposed by Mordecai (Jerus. Gem. *Megillah*—Lightfoot on John x. 21). A preliminary fast was appointed, called "the fast of Esther," to be observed on the 13th of Adar, in memory of the fast which Esther and her maids observed, and which she enjoined, through Mordecai, on the Jews of Shushan (Esth. iv. 16). If the 13th was a Sabbath, the fast was put back to the fifth day of the week; it could not be held on the sixth day, because those who might be engaged in preparing food for the Sabbath would necessarily have to taste the dishes to prove them. According to modern custom, as soon as the stars begin to appear, when the 14th of the month has commenced, candles are lighted up in token of rejoicing, and the people assemble in the synagogue.<sup>a</sup> After a short prayer and thanksgiving, the reading of the Book of Esther commences. The book is written in a peculiar manner, on a roll called *kar' d'fochav*, "the Roll" (מְגִלָּה, *Megillah*).<sup>d</sup> The reader translates the text, as he goes on, into the vernacular tongue of the place, and makes comments on particular passages. He reads in a histrionic manner, suiting his tones and gestures to the changes in the subject matter. When he comes to the name of Haman the whole congregation cry out, "May his name be blotted out," or "Let the name of the ungodly perish." At the same time, in some

places, the noise with pieces of wood the name of so as to obli of the sons reader utters so as to mak they were h is read thro "Cursed be Zorash (ti cursed be all blessed be t volume is t and partake milk and e synagogue, c sage is read relates the d of Agag (1 Haman (Est again in th responses fr evening. <sup>a</sup> The word פּוּר (*pur*) is Persian. In the modern language, it takes the form of *parch*, and it is cognate with *para* and *part* (Gesen. *Thes.*). It is explained, Esth.

iii. 7 and ix. 24, by the Hebrew פּוּרִים; *αλποῖ*; *sortes*.

<sup>b</sup> It can hardly be doubted that the conjecture of the editor of the Complutensian Polyglot (approved by Erasmus, in Esth. iii. 7, and by Schleusner, *Lex. in LXX.* s. *Φουρῖμ*) is correct, and that the reading should be *Φουρῖμ*. In like manner, the modern editors of Josephus have changed *Φουρῖμοι* into *Φουρῖμοι* (*Ant.* xi. 6, §13). The old editors imagined that Josephus connected the word with *φουρῖμοι*.

<sup>c</sup> This service is said to have taken place in former times on the 15th in walled towns, but on the 14th in the country and unwalled towns, according to Esth. ix. 18, 19.

probably arose the popularity of the feast of Purim in those ages in which the feeling of enmity was so strongly manifested between Jews and Christians. Several Jewish proverbs are preserved which strikingly show the way in which Purim was regarded, such as, "The Temple may fail, but Purim never;" "The Prophets may fail, but not the Megillah." It was said that no books would survive in the Messiah's kingdom except the Law and the Megillah. This affection for the book and the festival connected with it is the more remarkable because the events on which they are founded affected only an exiled portion of the Hebrew race, and because there was so much in them to shock the principles and prejudices of the Jewish mind.

Ewald, in support of his theory that there was in patriarchal times a religious festival at every new and full moon, conjectures that Purim was originally the full moon feast of Adar, as the Passover was that of Nisan, and Tabernacles that of Tisri.

It was suggested first by Kepler that the *ḥag ḥadash* of John v. 1, was the feast of Purim. The notion has been confidently expounded by Petavius, Olshausen, Stier, Wieseler, Winer, and Auger (who, according to Winer, has proved the point beyond contradiction), and is favoured by Alford and Elliott. The question is a difficult one. It seems to be generally allowed that the opinion of Chrysostom, Cyril, and most of the Fathers, which was taken up by Erasmus, Calvin, Beza, and Bengel, that the feast was Pentecost, and that of Cocceius, that it was Tabernacles (which is countenanced by the reading of one inferior MS.), are precluded by the general course of the narrative, and especially by John iv. 35 (assuming that the words of our Lord which are there given were spoken in seed-time)<sup>a</sup> compared with v. 1. The interval indicated by a comparison of these texts could scarcely have extended beyond Nisan. The choice is thus left between Purim and the Passover.

The principal objections to Purim are, (a) that it was not necessary to go up to Jerusalem to keep the festival; (b) that it is not very likely that our Lord would have made a point of paying especial honour to a festival which appears to have had but a very small religious element in it, and which seems rather to have been the means of keeping alive a feeling of national revenge and hatred. It is alleged on the other hand that our Lord's attending the feast would be in harmony with His deep sympathy with the feelings of the Jewish people, which went further than His merely "fulfilling all righteousness" in carrying out the precepts of the Mosaic law. It is further urged that the narrative of St. John is best made out by supposing that the incident at the pool of Bethesda occurred at the festival which was characterised by showing kindness to the poor, and that our Lord was induced, by the enmity of the Jews then evinced, not to remain at Jerusalem till the Passover, mentioned John vi. 4 (Stier).

The identity of the Passover with the feast in

dam recordationem incendere, et crucis admixtum speciem in contemptu Christianæ fidei sacrilega mente excurrere, Provinciarum Iudices prohibebant: ne loci sui fidei nostræ signum immiscerent, sed ritus suos infra consumptionem Christianæ legis retineant, amissuri sine dubio permissione hæc non, nisi ab illicitis temperaverint."

<sup>a</sup> This supposition does not appear to be materially weakened by our taking as a proverb *ἡμεῖς ἐσμεν αἱ εὐχαι αὐτοῦ* (John vi. 11). Whether the expression was such or not it surely adds point to our Lord's words, if we suppose the figurative language to have been suggested

question has been maintained by Lælius, Enselius, and Theodoret, and, in modern times, by Luther, Scaliger, Grotius, Hengstenberg, Gresswell, Neander, Tholuck, Robinson, and the majority of commentators. The principal difficulties in the way are (a) the omission of the article, involving the improbability that the great festival of the year should be spoken of as "a feast of the Jews;" (b) that as our Lord did not go up to the Passover mentioned John vi. 4, He must have absented himself from Jerusalem for a year and a half, that is, till the feast of Tabernacles (John vii. 2). Against these points it is contended, that the application of *ἡμεῖς* without the article to the Passover is countenanced by Matt. xxvii. 15; Luke xxi. 17 (comp. John xviii. 39); that it is assigned as a reason for His staying away from Jerusalem for a longer period than usual, that "the Jews sought to kill him" (John vii. 1; cf. v. 18); that this long period satisfactorily accounts for the surprise expressed by His brethren (John vii. 3), and that, as it was evidently His custom to visit Jerusalem once a year, He went up to the feast of Tabernacles (vii. 2) instead of going to the Passover.

On the whole, the only real objection to the Passover seems to be the want of the article before *ἡμεῖς*.<sup>1</sup> That the language of the New Testament will not justify our regarding the omission as expressing emphasis on any general ground of usage, is proved by Winer (*Grammar of the N. T. dialect*, iii. 19). It must be admitted that the difficulty is no small one, though it does not seem to be sufficient to outweigh the grave objections which lie against the feast of Purim.

The arguments on one side are best set forth by Stier and Olshausen on John v. 1, by Kepler (*Eclogæ Chronicæ*, Francfort, 1615), and by Auger (*de temp. in Act. Apost. i. 24*); those on the other side, by Robinson (*Harmony, note on the Second Passover*), and Neander, *Life of Christ*, §143. See also Lightfoot, Kuinzel, and Tholuck, on John v. 1; and Gresswell, *Diss. viii. vol. ii.*; Elliott, *Lect. 135*.

PURSE. The Hebrews, when on a journey were provided with a bag (variously termed *clat*, *tsedr*, and *charit*), in which they carried their money (Gen. xlii. 35; Prov. i. 14, vii. 20; Is. xlv. 6), and, if they were merchants, also their weights (Deut. xxv. 13; Mic. vi. 11). This bag is described in the N. T. by the terms *βαλυστός* (peculiar to St. Luke, x. 4, xii. 33, xiii. 35, 36), and *γαστήριον* (peculiar to St. John, xii. 6,

by what was actually going on in the fields before the eyes of Himself and His hearers.

<sup>1</sup> Tischendorf inserts the article in his text, and Winer allows that there is much authority in its favour. But the nature of the case seems to be such, that the insertion of the article in later MSS. may be more easily accounted for than its omission in the older ones.

<sup>2</sup> כֶּסֶף, צֶדֶק, and חֶסֶד. The last occurs only in 2 K. v. 23 "bag;" Is. iii. 22, A. V. "crispingtons." The latter is supposed to refer to the long round form of the purse.

zdi. 28). The former is a classical term (Plat. *Conv.* p. 190, E, *σὺνπαστα βαλάντια*); the latter is connected with the classical *γλαύσσοκορμίον*, which originally meant the bag in which musicians carried the mouthpieces of their instruments. In the LXX. the term is applied to the chest for the *clothes* at the Temple (2 Chr. xiv. 8, 10, 11), and *xxi*; hence adopted by St. John to describe the common purse carried by the disciples. The girdle also served as a purse, and hence the term *ζώνη* occurs in Matt. x. 9, Mark vi. 8. [GIRDLE.] Ladies wore ornamental purses (Is. iii. 23). The Rabbins forbade any one passing through the Temple with stick, shoes, and purse, these three being the indications of travelling (Mishn. *Berach.* 9. §5). [W. L. B.]

PUT, 1 Chr. i. 8; Nah. iii. 9. [PHUT.]

PUTEOLI (Πορτολὸν) appears alike in Josephus (*Vit.* 3; *Ant.* xvii. 12, §1, xviii. 7, §2) and in the Acts of the Apostles (*xvii.* 13) in its characteristic position under the early Roman emperors, viz. as the great landing-place of travellers to Italy from the Levant, and as the harbour to which the Alexandrian corn-ships brought their cargoes. These two features of the place in fact coincided; for in that day the movements of travellers by sea depended on merchant-vessels. Puteoli was at that period a place of very great importance. We cannot elucidate this better than by saying that the celebrated bay which is now "the bay of Naples," and in early times was "the bay of Cumae," was then called "Sinus Puteolanus." The city was at the north-eastern angle of the bay. Close to it was Baiae, one of the most fashionable of the Roman watering-places. The emperor Caligula once built a ridiculous bridge between the two towns; and the remains of it must have been conspicuous when St. Paul landed at Puteoli in the Alexandrian ship which brought him from Malta. [CASTOR AND POLLUX; MELITA; KIEGHUM; SYRACUSE.] In illustration of the arrival here of the corn-ships we may refer to Seneca (*Ep.* 77) and Suetonius (*Octav.* 98).

The earlier name of Puteoli, when the lower part of Italy was Greek, was Dicæarchia; and this name continued to be used to a late period. Josephus uses it in two of the passages above referred to; in the third (*Vit.* 3) he speaks of himself after the shipwreck which, like St. Paul, he had recently gone through, as *διασωθὲς εἰς τὴν Δικαίαν, ἢν Πορτολὸν Ἰταλὸν καλοῦσιν*. So Philo, in describing the curious interview which he and his fellow Jewish ambassadors had here with Caligula, uses the old name (*Legat. ad Cæsum*, ii. 521). The word Puteoli was a true Roman name, and arose (whether a *puteis* or a *putendo*) from the strong mineral springs which are characteristic of the place. Its Roman history may be said to have begun with the Second Punic War. It rose continually into greater importance, from the causes above mentioned. No part of the Campanian shore was more frequented. The associations of Puteoli with historical personages are very numerous. Scipio sailed from hence to Spain. Cicero had a villa (his "Puteolanum") in the neighbourhood. Here Nero planned the murder of his mother. Vespasian gave to this city peculiar privileges, and here Hadrian was buried. In the 5th century Puteoli was ravaged both by Alaric and Genseric, and it never afterwards recovered its former eminence. It is now a fourth-rate Italian town, still retaining the name of *Porto di Napoli*.

In connexion with St. Paul's conversion must notice its communications to Rome. The road along the mainland with Rome. The road leading northwards to Sinuessa was not made till the reign of Domitian; but there was a cross leading to Capua, and there joining the *Appian Way*. [APP. FOREM; THESS. TAVERN.] remains of this road may be traced at *Capua* and thus the Apostle's route can be followed step by step. We should also notice the fact that there were Jewish residents at Puteoli. We are sure of this from its mercantile importance; we are positively informed of it by Josephus (*xvii.* 12, §1) in his account of the visit of the tented Herod-Alexander to Augustus; and the circumstance shows how natural it was that the Apostle should find Christian "brethren" immediately on landing.

The remains of Puteoli are considerable: aqueduct, the reservoirs, porticus (galleries), baths, the great amphitheatre, the landing of the temple of Serapis, which affords very good indications of changes of level in the soil, and many other things worthy of notice. But our chief interest here is centred on the ruins of the ancient city, which is formed of the concrete called *Puteolanum*, and of the piers of which still remain. No harbour has left so solid a memorial of itself as one at which St. Paul landed in Italy. [L. S. S.]

PUTIEL (פּוּתִיֶּאל; פּוּתִיֶּאל; Putiel) of the daughters of Putiel was wife of Elimelech of Aaron, and mother of Phinehas (*Ex.* 18). Though he does not appear again in the records, Putiel has some celebrity in Jewish traditions. They identify him with the Midianite, "who fattened the calves for their worship" (Targum Pseudo-jon. on *Ex.* 18). *Genera of Sada* by Wagenseil, viii. 10. The grounds for the tradition or for such a connection against Jethro is not obvious.

PYGARG (פִּיגָרְג; *Pygargus*; *Pygargus*) occurs only (*Deut.* xxx. 5) in the Bible as animals as the rendering of the Hebrew name apparently of some species of antelope, for it is by no means easy to identify it. The *pygargus* denotes an animal with a white face and is used by Herodotus (*iv.* 192) in the same sense as some Libyan deer or antelope. *Ant.* vi. 113 mentions the *pygargus*, but gives no more than the name; comp. also Juvenal (*Sat.* x. 135). It is usual to identify the *pygargus* of the Bible with writers with the *addax* of North Africa, *Addax nasomaculatus*; but we cannot regard this point as satisfactorily settled. In the Bible this antelope does not present at all the characteristic implied by its name, and, second, there is much reason for believing (Rüppell (*Atlas zu der Reise in Nubien*, p. 21), and Hamilton Smith (*Smith's Atlas*, *King*, iv. 183), that the *Addax* has with the *Streptoceros* of Pliny (*N. H.* x. 43) which animal, it must be observed, the naturalist distinguishes from the *pygargus*. Indeed we may regard the identity of the *Addax* with the *Streptoceros* as established; for the species was, after many years, it was identified by Hemprich and Rüppell, it was found to be the same by the Arabic name of *addax* or *addax*, the name which Pliny gives as the local one of his *Addax*. The *pygargus*, therefore, must be regarded as a different animal from the *addax*. There are

antelopes which have the characteristic white croup required; many of which, however, are inhabitants of South Africa, such as the Spring-bok (*Antilocapra meschery*) and the Bonte-bok (*Dama doria pygmaea*). We are inclined to consider the *abyargos*, or *pygargus*, as a generic name to denote any of the white-rumped antelopes of North Africa, Syria, &c., such as the Ariel gazelle (*Antelope Arabica*, Hemprich), the Isabella gazelle (*Gazella Isabellina*); perhaps too the mohr, both of Abyssinia (*G. Soemmerringii*) and of Western Africa (*G. Mohr*), may be included under the term. Whether, however, the LXX. and Vulg. are correct in their interpretation of *dishon* is another question; but there is no collateral evidence of any kind beyond the authority of the two most important versions to aid us in our investigation of this word, of which various etymologies have been given from which nothing definite can be learnt. [W. H.]

## Q

QUAILS (יָבֵי, *seldo*; but in *Keri* יָבֵי, *seldio*:

*ορνιθόγλυπτα: coturnix*). Various opinions have been held as to the nature of the food denoted by the Heb. *seldo*, which on two distinct occasions was supplied to the Israelites in the wilderness; see Ex. xvi. 13, on which occasion the people were between Sin and Sinai; and Num. xi. 31, 32, when at the station named in consequence of the judgment which befel them, Kibroth-hattaavah. That the Heb. word is correctly rendered "quails," is we think beyond a shadow of doubt, notwithstanding the different interpretations which have been assigned to it by several writers of eminence. Ludolf, for instance, an author of high repute, has endeavoured to show that the *seldo* were locusts; see his *Dissertatio de Locustis, cum Distributa*, &c., Franc. ad Moen. 1694. His opinion has been fully advocated and adopted by Patrick (*Comment. on Num.* xi. 31, 32); the Jews in Arabia also, as we learn from Niebuhr (*Beschreib. von Arab.* p. 172), "are convinced that the birds which the Israelites ate in such numbers were only clouds of locusts, and they laugh at those translators who suppose that they found quails where quails were never seen." Rudbeck (*Iethyol. Bibl. Spec.* i.) has argued in favour of the *seldo* meaning "flying-fish," some species of the genus *Falcoetus*; Michaelis at one time held the same opinion, but afterwards properly abandoned it (see Rosenmüller, *Not. ad Bochart, Hieros.* ii. 649). A later writer, Ehrenberg (*Geograph. Zeit.* ix. 85), from having observed a number of "flying-fish" (guardians of the genus *Trigla* of Oken, *Dactylopterus* of modern ichthyologists), lying dead on the shore near Elim, believed that *this* was the food of the Israelites in the wilderness, and named the fish "Trigla Israelitarum." Hermann von der Hardt supposed that the locust bird (*Pastor Roseus*), was intended by *seldo*; in 1 recently Mr. Forster (*Voice of Israel*, p. 98), has advanced an opinion that "red geese" of the genus *Casarca* are to be understood by the Hebrew term; a similar explication has been suggested by Stanley (*S. & P.* p. 82) and adopted by Tennent (*Ceylon*, i. 487 note): this is apparently an old conceit, for Patrick (*Numb.* xi. 31) alludes to such an explanation, but we have been unable to trace it to its origin. Some writers, while they hold that the original word denotes "emula," are of opinion that a species of Sand-grouse

(*Pterocles alchata*), frequent in the Bible-lands, is also included under the term; see Winer (*Bibl. Real-wort.* ii. 772); Rosenmüller (*Not. ad Hieros.* ii. 649); Faber (*ad Harmer*, ii. p. 442); Gesenius (*Thes. s. v.* יָבֵי). It is usual to refer to Hasselquist as the authority for believing that the *Kata* (Sand-grouse) is denoted; this traveller, however, was rather inclined to believe, with some of the writers named above, that "locusts" and not birds, are to be understood (p. 443); and it is difficult to make out what he means by *Tetrus Israelitarum*. Linnaeus supposed he intended by it the common "quail" in one paragraph he states that the Arabians call a bird "of a greyish colour and less than our partridge," by the name of *Katta*. He adds "An Selaw?" This cannot be the *Pterocles alchata*.

*Pterocles alchata.*

The view taken by Ludolf may be dismissed with a very few words. The expression in Ps. lxxviii. 27 of "feathered fowl" (יָבֵי כָנָף), which is used in reference to the *seldo*, clearly denotes some bird, and Ludolf quite fails to prove that it may include winged insects; again there is not a shadow of evidence to support the opinion that *seldo* can ever signify any "locust," this term being used in the Arabic and the cognate languages to denote a "quail." As to any species of "flying-fish," whether belonging to the genus *Dactylopterus*, or to that of *Eruetius*, being intended, it will be enough to state that "flying-fish" are quite unable to sustain their flight above a few hundred yards at the most, and never could have been taken in the Red Sea in numbers sufficient to supply the Israelitish host. The interpretation of *seldo* by "wild geese," or "wild cranes," or any "wild fowl," is a gratuitous assumption without a particle of evidence in its favour. The *Casarca*, with which Mr. Forster identifies the *seldo*, is the *C. rutila*, a bird of about the size of a Mallard, which can by no means answer the supposed requisite of standing three feet high from the ground. "The large red-legged cranes," of which Professor Stanley speaks, are evidently white storks (*Ciconia alba*), and would fulfil the condition as to height; but the flesh is so nauseous that no Israelite could ever have done more than have tasted it. With respect to the *Pterocles alchata*, neither it, nor indeed any other species of the genus, can square with the Scriptural account of the *seldo*; the Sand-grouse are birds of strong wing and of unwearied flight, and never could have been captured in any numbers by the Israelitish multitudes. We much question, moreover, whether the people would have eaten to excess—for

so much the expression translated "fully satisfied" (Ps. lxxviii. 29) implies—of the flesh of this bird, for, according to the testimony of travellers from Dr. Russell (*Hist. of Aleppo*, ii. 194, 2nd ed.) down to observers of to-day, the flesh of the Sand-grouse is hard and tasteless. It is clear, however, that the *silac* of the Pentateuch and the 105th Ps. denotes the common "quail" (*Coturnix dactylisonans*), and no other bird. In the first place, the Heb. word *qayil* is unquestionably identical with the Arabic

*sahed* (سلي), a "quail." According to Schultens (*Orig. Heb.* i. 231) the Heb. *qayil* is derived from an Arabic root "to be fat;" the round plump form of the quail is eminently suitable to this etymology; indeed its fatness is proverbial. The objections which have been urged by Patrick and others against "quails" being intended are very easily refuted. The expression, "as it were two cubits (high) upon the face of the earth" (Num. xi. 31) is explained by the LXX., by the Vulg., and by Josephus (*Ant.* iii. 1, §5), to refer to the height at which the quails flew above the ground, in their exhausted condition from their long flight. As to the enormous quantities which the least successful Israelite is said to have taken, viz. "ten homers," in the space of a night and two days, there is every reason for believing that the "homers" here spoken of do not denote strictly the measure of that name, but simply "a heap;" this is the explanation given by Onkelos and the Arabic versions of Saadiah and Erpenius, in Num. xi. 31.

The quail migrates in immense numbers, see Pliny (*H. N.* x. 23), and Tournefort (*Voyage*, i. 329), who says that all the islands of the Archipelago at certain seasons of the year are covered with these birds. Col. Sykes states that such quantities were once caught in Capri, near Naples, as to have afforded the bishop no small share of his revenue, and that in consequence he has been called Bishop of Quails. The same writer mentions also (*Trans. Zool. Soc.* ii.) that 160,000 quails have been netted in one season on this little island; according to Temminck 100,000 have been taken near Nettuno, in one day. The Israelites would have had little difficulty in capturing large quantities of these birds, as they are known to arrive at places sometimes so completely exhausted by their flight as to be readily taken, not in nets only, but by the hand. See Diod. Sic. (i. p. 82, ed. Dindorf); Prosper Alpinus (*Rerum Aegypt.* iv. 1); Josephus (*Ant.* iii. 1, §5). Sykes (*l. c.*), says "they arrive in spring on the shores of Provence so fatigued that for the first few days they allow themselves to be taken by the hand." The Israelites "spread the quails round about the camp;" this was for the purpose of drying them. The Egyptians similarly prepared these birds: see Herodotus (ii. 77), and Maillet (*Lettres sur l'Egypte*, ix. p. 21, iv. p. 130). The expression "quails from the sea," Num. xi. 31, must not be restricted to denote that the birds came from the sea as their starting point, but it must be taken to show the direction from which they were coming; the quails were, at the time of the event narrated in the sacred writings, on their spring journey of migration northwards, an interesting proof, as Col. Sykes has remarked, of the perpetuation of an instinct

through some multitudes of from Southern Arabia Petre specified, "arrive; and the night. quail migrat Col. Montagu flesh of the c said by some supposed by from eating partly from *H. bers through we adopt as fa

Wartel-König of the Germans, but with what reason we are unable to say; probably the LXX. use the term as a synonym of *δουλεύς*, or to express the good condition in which the birds were, for Hesychius explains *δουρυγούρρα* by *δουρὺς δρεπ-αεῖδης*, i. e. "a quail of large size."

Thus, in point of etymology, zoology, history, and the authority of almost all the important old versions, we have as complete a chain of evidence in proof of the Quail being the true representative of the *Sêlde* as can possibly be required. [W. H.]

**QUARTUS** (*Κοῦαρτος*: *Quartus*), a Christian of Corinth, whose salutations St. Paul sends to the brethren at Rome (Rom. xvi. 23). There is the usual tradition that he was one of the Seventy disciples; and it is also said that he ultimately became bishop of Berytus (Tillemont, i. 334). [E. H.—s.]

**QUATERNION** (*τετραπλιον*: *quaternio*), a military term, signifying a guard of four soldiers, two of whom were attached to the person of a prisoner, while the other two kept watch outside the door of his cell (Vegetius, *De Re mil.* iii. 8; Polyb. vi. 33, §7). Peter was delivered over to four such bodies of four (Acts xii. 4), each of which took charge of him for a single watch of the night. [W. L. B.]

**QUEEN** (מלכה; מלכה; מלכה). Of the three Hebrew terms cited as the equivalents of "queen" in the A. V., the first alone is applied to a queen-regnant; the first and second equally to a queen-consort, without, however, implying the dignity which in European nations attaches to that position; and the third to the queen-mother, to whom that dignity is transferred in Oriental courts. The etymological force of the words accords with their application. *Malakh* is the feminine of *melech*, "king;" it is applied in its first sense to the queen of Sheba (1 K. x. 1), and in its second to the wives of the first rank, as distinguished from the concubines, in a royal harem (Esth. i. 9 ff., vii. 1 ff.; Cant. vi. 8): the term "princesses" is similarly used in 1 K. xi. 3. *Shêydl* simply means "wife;" it is applied to Solomon's bride (Ps. xlv. 9), and to the wives of the first rank in the harems of the Chaldees and Persian monarchs (Dan. v. 2, 3; Neh. ii. 8). *Gêbêrâh*, on the other hand, is expressive of authority; it means "powerful" or "mistress." It would therefore be applied to the female who exercised the highest authority, and this, in an Oriental household, is not the wife but the mother of the master. Strange as such an arrangement at first sight appears, it is one of the inevitable results of polygamy: the number of the wives, their social position previous to marriage, and the precariousness of their hold on the affections of their lord, combine to annihilate their influence, which is transferred to the mother as being the only female who occupies a fixed and dignified position. Hence the application of the term *gêbêrâh* to the queen-mother, the extent of whose influence is well illustrated by the narrative of the interview of Solomon and Bathsheba, as given in 1 K. ii. 19 ff. The term is applied to Maachab, Aza's mother, who was deposed from her dignity in consequence of her idolatry (1 K. xv. 13; 2 Chr. xv. 16); to Jezebel as contrasted with Joram (2 K. x. 13, "the children of the king, and the children of the queen"); and to the mother of Jehoiachin or Jeconiah (Jer. xiii. 18; compare 2 K. xxiv. 12; Jer. xxix. 2). In 1 K. xi. 19, the text probably requires emendation, the

reading followed in the LXX., הַנְּדִינָה, "the elder," according better with the context. [W. L. B.]

**QUEEN OF HEAVEN.** In Jer. vii. 18 xlv. 17, 18, 19, 25, the Heb. מַלְכַּת הַשָּׁמַיִם, *malcoth hashshamaym*, is thus rendered in the A. V. In the margin is given "frame or workmanship of heaven," for in twenty of Kennicott's MSS. the reading is מְלָאכַת, *malcoth*, of which this is the translation, and the same is the case in fourteen MSS. of Jer. xlv. 18, and in thirteen of Jer. xlv. 19. The latter reading is followed by the LXX. and Peshito Syriac in Jer. vii. 18, but in all the other passages the received text is adopted, as by the Vulgate in every instance. Kimchi says

"*M* is wanting, and it is as if מְלָאכַת, 'workmanship of heaven,' i. e. the stars; and some interpret 'the queen of heaven,' i. e. a great star which is in the heavens." Rashi is in favour of the latter; and the Targum renders throughout "the star of heaven." Kircher was in favour of some constellation, the Pleiades or Hyades. It is generally believed that the "queen of heaven" is the moon (comp. "siderum regina," Hor. *Carm. Sec.* 35, and "regina coeli" Apul. *Met.* xi. 657), worshipped as Ashtaroth or Astarte, to whom the Hebrew women offered cakes in the streets of Jerusalem. Hitzig (*Der Proph. Jeremja*, p. 64) says the Hebrews gave this title to the Egyptian Neith, whose name in the form Ta-nith, with the Egyptian article, appears with that of Baul Hamman, on four Carthaginian inscriptions. It is little to the purpose to inquire by what other names this goddess was known among the Phœnician colonists: the Hebrews, in the time of Jeremiah, appear not to have given her any special title. The Babylonian Venus, according to Harporocraton (quoted by Selden, *de Dis Syris*, synt. 2, cap. 6, p. 220, ed. 1617), was also styled "the queen of heaven." Mr. Layard identifies Hera, "the second deity mentioned by Diodorus, with Astarte, Mylitta, or Venus," and with the "queen of heaven," frequently mentioned in the sacred volumes. . . . The planet which bore her name was sacred to her, and in the Assyrian sculptures a star is placed upon her head. She was called Beltia, because she was the female form of the great divinity, or Baul; the two, there is reason to conjecture, having been originally but one, and androgynous. Her worship penetrated from Assyria into Asia Minor, where its Assyrian origin was recognised. In the rock tablets of Hierum she is represented, as in those of Assyria, standing erect on a lion, and crowned with a tower or mural coronet; which, we learn from Lucian, was peculiar to the Semitic figure of the goddess. This may have been a mollification of the high cap of the Assyrian bas-reliefs. To the Semeites she was known under the names of Astarte, Ashtaroth, Mylitta, and Alitta, according to the various dialects of the nations amongst which her worship prevailed" (*Ninereh*, ii. pp. 454, 456, 457). It is so difficult to separate the worship of the moon-goddess from that of the planet Venus in the Assyrian mythology when introduced among the western nations, that the two are frequently confused. Movers believes that Ashtaroth was originally the moon-goddess, while according to Rawlinson (*Herod.* i. 521) *Ishlar* is the Babylonian Venus, one of whose titles in the Sardapalus inscription is "the mistress of heaven and earth."

With the cakes (ד'גלגל, *cavedanim*: *χαυάρες*) which were offered in her honour, with incense and libations, Selden compares the *πίτυρα* (A. V. "bran") of Ep. of Jer. 43, which were burnt by the women who sat by the wayside near the idolatrous temples for the purposes of prostitution. These *πίτυρα* were offered in sacrifice to Hecate, while invoking her aid for success in love (Theocr. ii. 33). The Targum gives *כרדיתא*, *carditha*, which elsewhere appears to be the Greek *χειριδωτός*, a sleeved tunic. Rashi says the cakes had the image of the god stamped upon them, and Theodoret that they contained pine-cones and raisins. [W. A. W.]

**QUICKSANDS, THE** (ἡ Σύρτις: *Syrtis*), more properly THE SYRTIS (Acts xvii. 17), the broad and deep bight on the North African coast between Carthage and Cyrene. The name is derived from *Sert*, an Arabic word for a desert. For two reasons this region was an object of peculiar dread to the ancient navigators of the Mediterranean, partly because of the drifting sands and the heat along the shore itself, but chiefly because of the shallows and the uncertain currents of water in the bay. Josephus, who was himself once wrecked in this part of the Mediterranean, makes Agrippa say (B. J. ii. 16, §4), φοβεραὶ καὶ τοῖς ἀκούουσιν Σύρτις. So notorious were these dangers, that they became a commonplace with the poets (see Hor. *Od.* i. 22, 5; Ov. *Fast.* iv. 499; Virg. *Aen.* i. 111; Tibull. iii. 4, 91; Lucan, *Phars.* ix. 431). It is most to our purpose here, however, to refer to Apollonius Rhodius, who was familiar with all the notions of the Alexandrian sailors. In the 4th book of his *Argonaut.* 1232-1237, he supplies illustrations of the passage before us, in more respects than one—in the sudden violence (*ἀναρπάξῃν*) of the terrible north wind (*δολὴ βορέας θυέλλα*), in its long duration (*ἐννέα πάσας Νόετας ὁμῶς καὶ τόσσα φέρ' ἡμέρας*), and in the terror which the sailors felt of being driven into the Syrtis (*Προπρὸ μάλ' Ἰνδοὶ Σύρτιν, 38' οὐκέτι πόδες ὁπίσσω Νη.σι πέλει*). [See CLAUDIA and EUROCLEDYDON.] There were properly two Syrtis, the eastern or larger, now called the *Gulf of Sidra*, and the western or smaller, now the *Gulf of Gabes*. It is the former to which our attention is directed in this passage of the Acts. The ship was caught by a north-easterly gale on the south coast of CRETE, near Mount Ida, and was driven to the island of CLAUDA. This line of drift, continued, would strike the greater Syrtis: whence the natural apprehension of the sailors. [SIMP.] The best modern account of this part of the African coast is that which is given (in his *Memoir on the Mediterranean*, pp. 87-91, 186-190) by Admiral Smyth, who was himself the first to survey this bay thoroughly, and to divest it of many of its terrors. [J. S. H.]

**QUINTUS MEMMIUS**, 2 Macc. xi. 34. [See MANLIUS T. vol. ii. 228 b.]

**QUIVER.** Two distinct Hebrew terms are represented by this word in the A. V.

(1.) *קֶשֶׁת*, *thell*. This occurs only in Gen. xxvii. 3—"take thy weapons (lit. "thy things"), thy quiver and thy bow." It is derived (by Gesenius, *Thes.* 1304, and Fürst, *Handb.* ii. 528) from a root which has the force of hanging. The passage itself affords no clue to its meaning. It may therefore signify either a quiver, or a suspended weapon—for instance, such a sword as in our own language was formerly called a "hanger." Between these

two significant LXX., Vulgate the former; Cions, to the in

(2.) *קֶשֶׁת*, uncertain (Ges occurrences its taining or cor It is connecte Its other occu and Jer. v. 16. it by "quiver" xxxix. 23, and they render it As to the th to indicate eit way it was ca

are rarely shewn in the sculptures. When they do appear they are worn at the back, with the top between the shoulders of the wearer, or hung at the side of the chariot.

The Egyptian warriors, on the other hand, wore them along nearly horizontal, drawing out the arrows from beneath the arm (Wilkinson, *Popular Account*, i. 354). The quiver was about 4 inches diameter, supported by a belt passing over the shoulder and across the breast to the opposite side. When not in actual use, it was shifted behind.

The English word "quiver" is a variation of "cover"—from the French *couvrir*; and therefore answers to the second of the two Hebrew words. [G.]

## R

**RA'AMAH** (רַעְמָה): *ʿRemyā*, Gen. x. 7; *ʿRamyā*, Ez. xxvii. 22; *Rajma*, *Rajma*. A son of Cush, and father of the Cushite Sheba and Dedan. The tribe of Raamah became afterwards renowned as traders; in Ezekiel's lamentation for Tyre it is written, "the merchants of Sheba and Raamah, they [were] thy merchants; they occupied in thy fairs with chief of all the spices, and with all precious stones and gold" (xxvii. 22). The general question of the identity, by intermarriage, &c., of the Cushite Sheba and Dedan with the Keturahites of the same names is discussed, and the 27th chapter of Ezekiel examined, in art. **DEDAN**. Of the settlement of Raamah on the shores of the Persian gulf there are several indications. Traces of Dedan are very faint; but Raamah seems to be recovered, through the LXX. reading of Gen. x. 7, in the *ʿRemyā* of Ptol. vi. 7, and *Ῥῆμμα* of Steph. Byzant. Of Sheba, the other son of Raamah, the writer has found a trace in a ruined city so

named (شَبَا, *Shobā*) on the island of Awāl (Marāsid, s. v.), belonging to the province of Arabia called El-Bahr-yn on the shores of the gulf. [*SHEBA*.] This identification strengthens that of Raamah with *ʿRemyā*; and the establishment of these Cushite settlements on the Persian gulf is of course important to the theory of the identity of these Cushite and Keturahite tribes: but, besides etymological grounds, there are the strong reasons stated in **DEDAN** for holding that the Cushites colonized that region, and for connecting them commercially with Palestine by the great desert route.

The town mentioned by Niebuhr called Reymeh (رَيْمَة, *Descr. de l'Arabie*) cannot, on etymological grounds, be connected with Raamah, as it wants an equivalent for the *ʿ*; nor can we suppose that it is to be probably traced three days' journey from San'a (HUAL), the capital of the Yemen. [E. S. P.]

**RAAMI'AH** (רַעְמִיָּה): *ʿRemyā*; *FA Remyā*: *Rumīyah*. One of the chiefs who returned with Zerubbabel (Neh. vii. 7). In Ezr. ii. 2 he is called REELAIAN, and the Greek equivalent of the name

\* It is hardly necessary to point out that the title *Rabbi* is directly derived from the same root.

\* In Deut. xli. 5 it is רַבִּי אֶפְרַיִם וְרַבִּי אֲשֵׁר in both MSS. In Josh. xlii. 25 the Vul. has *ʿApāhā* ὁ ἱερεὺς καὶ οὐνοῦ *ʿApāh*, where the first and last words of the sentence seem to have changed places.

\* The statement of Eusebius (*Onom.* "Ammin") that

in the LXX. of Neh. appears to have arisen from a confusion of the two readings, unless, as Burtington (*Genes.* ii. 68) suggests, *ʿRemyā* is an error of the copyist for *ʿRemyā*, the uncial letters *At* having been mistaken for *M*. In 1 Esd. v. 2 the name appears as REESAIAH.

**RAAM'SES**, Ex. i. 10. [*RAEMES*.]

**RAB'BAH**. The name of several ancient places both East and West of the Jordan. The root is *rab*, meaning "multitude," and thence "greatness," of size or importance\* (*Gesenius, Thes.* 1254; Fürst, *Handb.* ii. 347). The word survives in Arabic as a common appellative, and is also in use as the name of places—e. gr. *Rabbān* on the east of the Dead Sea; *Rabbah*, a temple in the tribe of Melchidj (*Freytag*, ii. 107a); and perhaps also *Rabbat* in Morocco.

1. (רַבְבָּה): *ʿRabḥā*, *ʿRabḥā*, ὁ *ʿRabḥā*: *Rabbā*, *Rabbath*. A very strong place on the East of Jordan, which when its name is first introduced in the sacred records was the chief city of the Ammonites. In five passages (Deut. iii. 11; 2 Sam. xii. 26, xvii. 27; Jer. xlix. 2; Ez. xxi. 20) it is styled at length *Rabbath-bene-Ammon*, A. V. *Rabbath of the Ammonites*, or, children of Ammon; but elsewhere (Josh. xiii. 25; 2 Sam. xi. 1, xii. 27, 29; 1 Chr. xx. 1; Jer. xlix. 3; Ez. xiv. 5; Amos i. 14) simply **RABBAH**.

It appears in the sacred records as the single city of the Ammonites, at least no other bears any distinctive name, a fact which, as has been already remarked (vol. i. 60 a), contrasts strongly with the abundant details of the city-life of the Moabites.

Whether it was originally, as some conjecture, the HAM of which the Zuzim were dispossessed by Chedorlaomer (Gen. xiv. 5), will probably remain for ever a conjecture. When first named it is in the hands of the Ammonites, and is mentioned as containing the bed or sarcophagus of the giant Og (Deut. iii. 11), possibly the trophy of some successful war of the younger nation of Lot, and more recent settler in the country, against the more ancient Rephaim. With the people of Lot, their kinsmen the Israelites had no quarrel, and *Rabbath-of-the-children-of-Ammon* remained to all appearance unmolested during the first period of the Israelite occupation. It was not included in the territory of the tribes east of Jordan; the border of Gad stops at "Aroer, which faces Rabbah" (Josh. xiii. 25). The attacks of the Bene-Ammon on Israel, however, brought these peaceful relations to an end. Saul must have had occupation enough on the west of Jordan in attacking and repelling the attacks of the Philistines and in pursuing David through the woods and ravines of Judah to prevent his crossing the river, unless on such special occasions as the relief of Jabesh. At any rate we never hear of his having penetrated so far in that direction as Rabbah. But David's armies were often engaged against both Moab and Ammon.

His first Ammonite campaign appears to have occurred early in his reign. A part of the army, under Abisai, was sent as far as Rabbah to keep the Ammonites in check (2 Sam. x. 10, 14), but

it was originally a city of the Rephaim, implies that it was the Ashereth Karna'im of Gen. xiv. In agreement with this is the fact that it was in later times known as A-tarte (Steph. Byz., quoted by Ritter, 1:55). In this case the dual ending of Karna'im may point, as some have conjectured in Jerusalem, to the double nature of the city—a lower town and a citadel.

The main force under Joab remained at Medeba (1 Chr. xix. 7). The following year was occupied in the great expedition by David in person against the Syrians at Helam, wherever that may have been (2 Sam. x. 15-19). After their defeat the Ammonite war was resumed, and this time Rabbah was made the main point of attack (xi. 1). Joab took the command, and was followed by the whole of the army. The expedition included Ephraim and Benjamin, as well as the king's own tribe (ver. 11); the "king's slaves" (ver. 1, 17, 24); probably David's immediate body guard, and the thirty-seven chief captains. Uriah was certainly there, and if a not improbable Jewish tradition may be adopted, Ittai the Gittite was there also. [ITTAI.] The ark accompanied the camp (ver. 11), the only time<sup>a</sup> that we hear of its doing so, except that memorable battle with the Philistines, when its capture caused the death of the high-priest. David alone, to his cost, remained in Jerusalem. The country was wasted, and the roving Ammonites were driven with all their property (xii. 30) into their single stronghold, as the Bedouin Kenites were driven from their tents inside the walls of Jerusalem when Judah was overrun by the Chaldeans. [RECHABITES.] The siege must have lasted nearly, if not quite, two years; since during its progress David formed his connexion with Bathsheba, and the two children, that which died and Solomon, were successively born. The sallies of the Ammonites appear to have formed a main feature of the siege (2 Sam. xi. 17, &c.). At the end of that time Joab succeeded in capturing a portion of the place—the "city of waters," that is, the lower town, so called from its containing the perennial stream which rises in and still flows through it. The fact (which seems undoubted) that the source of the stream was within the lower city, explains its having held out for so long. It was also called the "royal city" (עִיר הַמְּלִיכָה), perhaps from its connexion with Molech or Milcom—the "king"—more probably from its containing the palace of Hanun and Nahash. But the citadel, which rises abruptly on the north side of the lower town, a place of very great strength, still remained to be taken, and the honour of this capture, Joab (with that devotion to David, which runs like a bright thread through the dark web of his character) insists on reserving for the king. "I have fought," writes he to his uncle, then living at ease in the harem at Jerusalem, in all the satisfaction of the birth of Solomon—"I have fought against Rabbah, and have taken<sup>b</sup> the city of waters; but the citadel still remains: now therefore gather the rest of the people together and come; put yourself at the head of the whole army, renew the assault against the citadel, take it, and thus finish the siege which I have carried so far," and then he ends with a rough banter<sup>c</sup>—half jest, half earnest—"lest I take the city and in future it go under my name." The waters of the lower city once in the hands of the besiegers the fate of the citadel was certain, for that fortress possessed in itself (as we learn from the invaluable notice of Josephus, *Ant.* vii. 7, §5) but one well of limited supply, quite in-

adequate to the provision shortly after 1 and its idol of Molech into the hands

Amman, from the East: showing the perennial stream and part of the citadel-hill. From a sketch by Wm. Tipping, Esq.

Pompey's general (Joseph. *B. J.* i. 6, §3). The Arabs probably held it till the year A.C. 30, when they were attacked there by Herod the Great. But the account of Josephus (*B. J.* i. 12, §5, 6) seems to imply that the city was not then inhabited, and that although the citadel formed the main point of the contest, yet that it was only occupied on the instant. The water communication alone alluded to also appears not to have been then in existence, for the people who occupied the citadel quickly surrendered from thirst, and the whole affair was over in six days.

At the Christian era Philadelphia formed the eastern limit of the region of Perea (*B. J.* iii. 3, §3). It was one of the cities of the Decapolis, and as far down as the 4th century was esteemed one of the most remarkable and strongest cities of the whole of Coele-Syria (Eusebius, *Onom.* "Amman;" Ammianus Mar. in Ritter, 1157). Its magnificent theatre (said to be the largest in Syria), temples, odeon, mausoleum, and other public buildings were probably erected during the 2nd and 3rd centuries, like those of *Jerash*, which they resemble in style, though their scale and design are grander (Lindsay). Amongst the ruins of an "immense temple" on the citadel hill, Mr. Tipping saw some p-ostate columns 5 ft. diameter. Its coins are extant, some bearing the figure of Astarte, some the word *Herkleion*, implying a worship of Hercules, probably the continuation of that of *Molech* or *Milcom*. From Stephanus of Byzantium we learn that it was also called Astarte, doubtless from its containing a temple of that goddess. Justin Martyr, a native of Shechem, writing about A.D. 140, speaks of the city as containing a multitude of Ammonites (*Dial. with Trypho*), though it would probably not be safe to interpret this too strictly.

Philadelphia became the seat of a Christian bishop,

\* Mr. Tipping gives the following dimensions in his journal. Breadth 240 ft.; height 42 steps: viz. first row 19, second 16, third 13

and was one of the nineteen sees of "Palestina tertia," which were subordinate to Bœstra (Reland, *Pal.* 228). The church still remains "in excellent preservation" with its lofty steeple (Lord Lindsay). Some of the bishops appear to have signed under the title of Bakatha; which Bakatha is by Epiphanius (himself a native of Palestine) mentioned in such a manner as to imply that it was but another name for Philadelphia, derived from an Arab tribe in whose possession it was at that time (A.D. cir. 400.) But this is doubtful. (See Reland, *Pal.* 612; Ritter, 1157.)

*Amman*<sup>a</sup> lies about 22 miles from the Jordan at the eastern apex of a triangle, of which Heshbon and *es-Salt* form respectively the southern and northern points. It is about 14 miles from the former, and 12 from the latter. Jemsh is due north, more than 20 miles distant in a straight line, and 55 by the usual road (Lindsay, 278). It lies in a valley which is a branch, or perhaps the main course, of the *Wady Zerka*,<sup>b</sup> usually identified with the *Jabbok*. The *Maid-Amman*, or water of Amman, a mere streamlet, rises within the basin which contains the ruins of the town. The main valley is a mere winter torrent, but appears to be perennial, and contains a quantity of fish, by one observer said to be trout (see Burckhardt, 338; G. Robinson, ii. 174; "a perfect fishpond," Tipping). The stream runs from west to east, and north of it is the citadel on its isolated hill.

When the Moslems conquered Syria they found the city in ruins (Abulfeda in Ritter, 1158; and in note to Lord Lindsay); and in ruins remarkable for their extent and desolation even for Syria, the "Land of ruins." It still remains. The public buildings are said to be Roman, in general character

<sup>a</sup> عمان, essentially the same word as the Hebrew *Ammon*.

<sup>b</sup> This is distinctly stated by Abulfeda (Ritter, 1156; Lindsay, note 27).

like those at *Jerash*, except the citadel, which is described as of large square stones put together without cement, and which is probably more ancient than the rest. The remains of private houses scattered on both sides of the stream are very extensive. They have been visited, and described in more or less detail, by Burckhardt (*Syria*, 557-360), who gives a plan; Seetzen (*Reisen*, i. 396, iv. 212-214); Irby (June 14); Buckingham, *E. Syria*, 68-82; Lord Lindsay (5th. ed. 278-284); G. Robinson (ii. 172-178); Lord Claud Hamilton (in Keith, *Evid. of Proph.*, ch. vi.). Burckhardt's plan gives a general idea of the disposition of the place, but a comparison with Mr. Tipping's sketch (on the accuracy of which every dependence may be placed), seems to show that it is not correct as to the proportions of the different parts. Two views are given by Laborde (*Vues en Syrie*), one of a tomb, the other of the theatre; but neither of these embraces the characteristic features of the place—the streamlet and the citadel. The accompanying view has been engraved (for the first time) from one of several careful sketches made in 1840 by William Tipping, Esq., and by him kindly placed, with some valuable information, at the disposal of the author. It is taken looking towards the east. On the right is the beginning of the citadel hill. In front is an arch (also mentioned by Burckhardt) which spans the stream. Below and in front of the arch is masonry, showing how the stream was formerly embanked or quayed in.

No inscriptions have been yet discovered. A lengthened and excellent summary of all the information respecting this city will be found in Ritter's *Erdkunde, Syrien* (1145-1159).

2. Although there is no trace of the fact in the Bible, there can be little doubt that the name of Rabbah was also attached in biblical times to the chief city of Moab. Its biblical name is AR, but we have the testimony of Eusebius (*Onomast.* "Moab") that in the 4th century it possessed the special title of Rabbath Moab, or as it appears in the corrupted orthography of Stephanus of Byzantium, the coins, and the Ecclesiastical Lists, *Rabathmoab*, *Rabbathmoab*, and *Rutba* or *Robba Moabitis* (Reiland, 957, 226; Seetzen, *Reisen*, iv. 227; Ritter, 1220). This name was for a time displaced by Areopolis, in the same manner that Rabbath-Ammon had been by Philadelphia: these, however, were but the names imposed by the temporary masters of the country, and employed by them in their official documents, and when they passed away, the original names, which had never lost their place in the mouths of the common people, reappeared, and *Rabb*: and *Ammon* still remain to testify to the

The title *Rabbi* is not known to have been used before the reign of Herod the Great, and is thought to have taken its rise about the time of the disputes between the rival schools of Hillel and Shammai. Before that period the prophets and the men of the great synagogue were simply called by their proper names, and the first who had a title is said to be Simeon the son of Hillel, who is supposed by some to be the Simeon who took our Saviour in his arms in the temple: he was called *Rabban*, and from his time such titles came to be in fashion. *Rabbi* was considered a higher title than *Rab*, and *Rabban* higher than *Rabbi*; yet it was said in the Jewish books that greater was he who was called by his own name than even he who was called *Rabban*. Some account of the *Rabbis* and the Mishnah and Talmudical writings may be found in Pridenau, *Connection*, part i. book 5, under the year B.C. 446; part ii. book 8, under the year B.C. 37; and a sketch of the history of the school of rabbinical learning at Tiberias, founded by Rabbi Judah Hakkodesh, the compiler of the Mishnah, in the second century after Christ, is given in Robinson's *Biblical Researches*, ii. 391. See also note 14 to Burton's *Bampton Lectures*, and the authorities there quoted, for instance, Bruker, vol. ii. p. 820, and Basnage, *Hist. des Juifs*, iii. 6, p. 138. [E. P. E.]

**RAB'BITH** (רַבִּית), with the def. article. *Δαβειρῶν*; Alex. *Ῥαββιθ*: *Rabbith*. A town in the territory, perhaps on the boundary, of Issachar (Josh. xix. 20 only). It is not again mentioned, nor is anything yet known of it, or of the places named in company with it. [G.]

**RABBO'NI**, John xx. 16. [RABBI.]

**RAB-MAG** (רַב־מַג: *Ῥαβ-μαγ*, *Ῥαβαμδχ*: *Rabmag*) is found only in Jer. xxxix. 3 and 13. In both places it is a title borne by a certain Nergal-sharezzer, who is mentioned among the "princes" that accompanied Nebuchadnezzar to the last siege of Jerusalem. It has already been shown that Nergal-sharezzer is probably identical with the king, called by the Greeks Nergigliassar, who ascended the throne of Babylon two years after the death of Nebuchadnezzar. [NERGAL-SHAREZZER.] This king, as well as certain other important personages, is found to bear the title in the Babylonian inscriptions. It is written indeed with a somewhat different vocalisation, being read as *Rabu-Emga* by Sir H. Rawlinson. The signification is somewhat doubtful. *Rabu* is most certainly "great," or "chief," an exact equivalent of the Hebrew רַב, whence *Rabbi*, "a great one, a doctor;" but *Mag*, or *Emga*, is an obscure term. It has been commonly identified with the word "Magus" (Gesenius, *ad* roc. מַג; Calmet, *Commentaire littéral*, vi. 203, &c.); but this identification is very uncertain, since an entirely different word—one which is read as *Mugusu*—is used in that sense throughout the Behistun inscription (Oppert, *Expédition Scientifique en Mésopotamie*, ii. 209). Sir H. Rawlinson inclines to translate *emga* by "priest," but does not connect it with the Magi, who in the time of Nergigliassar had no footing in Babylon. He regards this rendering, however, as purely conjectural, and thinks we can only say at present that the office was one of great power and dignity at the Babylonian court, and probably gave its possessor special facilities for obtaining the throne. [G. R.]

**RAB'SACES** (Ῥαβσάκης *Rabsaces*). **RABSHAKEH** (Ῥαβσάκης. xlvi. 18).

**RAB-SARIS** (רַב־סָרִיס: *Ῥαβס*; Alex. *Ῥαβ-sarap*: *Rabsaris*, *Rabsares*). 1. An officer of the king of Assyria sent up with Tartan and Rabshakeh against Jerusalem in the time of Hezekiah (2 K. xviii. 17).

2. (*Ῥαβσάκης*; Alex. *Ῥαβσάκης*.) One of the princes of Nebuchadnezzar, who was present at the capture of Jerusalem, B.C. 588, when Zedekiah, after endeavouring to escape, was taken and blinded and sent in chains to Babylon (Jer. xxxix. 3). Rabsaris is mentioned afterwards (ver. 13; among the other princes who at the command of the king were sent to deliver Jeremiah out of the prison.

Rabsaris is probably rather the name of an office than of an individual, the word signifying chief eunuch; in Dan. i. 3, Ashpenaz is called the master of the eunuchs (*Rab-sar-im*). Luther translates the word, in the three places where it occurs, as a name of office, the arch-chamberlain (*der Erzkämmerer*, *der oberste Kämmerer*). Josephus, *Ant.* x. 8, §2, takes them as the A. V. does, as proper names. The chief officers of the court were present attending on the king; and the instance of the eunuch Narses, would show that it was not impossible for the Rabsaris to possess some of the qualities fitting him for a military command. In 2 K. xxv. 19, an eunuch (סָרִיס *Saris*, in the text of the A. V. "officer," in the margin "eunuch") is spoken of as set over the men of war; and in the sculptures at Nineveh "eunuchs are represented as commanding in war; fighting both on chariots and on horseback, and receiving the prisoners and the heads of the slain after battle." Layard's *Nineveh*, vol. ii. 325.

It is not improbable that in Jeremiah xxxix. we have not only the title of the Rabsaris given, but his name also, either Sar-echim (ver. 3), or (ver. 13) Nebu-shasban (worshipper of Nebo, Is. xli. 1), in the same way as Nergal Sharezer is given in the same passages as the name of the Rab-mag. [E. P. E.]

**RAB'SHAKAH** (רַב־שָׁקֶה: *Ῥαβσάκης*, 2 K. xviii. 19; *Ῥαβσάκης*, Is. xxxvii. 36; *Rabsaces*). One of the officers of the king of Assyria sent against Jerusalem in the reign of Hezekiah. Sennacherib, having taken other cities of Judah, was now besieging Lachish, and Hezekiah, terrified at his progress, and fearing for a time his firm faith in God, sends to Lachish with an offer of submission and tribute. This he strains himself to the utmost to pay, giving for the purpose not only all the treasures of the Temple and palace, but stripping off the gold plates with which he himself in the beginning of his reign had overlaid the doors and pillars of the house of the Lord (2 K. xviii. 16; 2 Chr. xxxii. 3; see Rawlinson's *Bampton Lectures*, iv. p. 141; Layard's *Nineveh and Babylon*, p. 145). But Sennacherib, not content with this, his cupidity being excited rather than appeased, sends a great host against Jerusalem under Tartan, Rab-u-is, and Rabshakeh; not so much, apparently, with the object of at present engaging in the siege of the city, as with the idea that, in its present disheartened state, the sight of an army, combined with the threats and specious promises of Rabshakeh, might induce a surrender at once.

In Isaiah xxxvi., xxxvii., Rabshakeh alone is mentioned, the reason of which would seem to be that he acted as ambassador and spokesman, and came to

much more prominently before the people than the others. Keil thinks that Tartan had the supreme command, inasmuch as in 2 K. he is mentioned first, and, according to Is. xx. 1, conducted the siege of Ashdod. In 2 Chr. xxxii., where, with the addition of some not unimportant circumstances, there is given an extract of these events, it is simply said that (ver. 9) "Sennacherib king of Assyria sent his servants to Jerusalem." Rabshakeh seems to have discharged his mission with much zeal, addressing himself not only to the officers of Hezekiah, but to the people on the wall of the city, setting forth the hopelessness of trusting to any power, human or divine, to deliver them out of the hand of "the great king, the king of Assyria," and dwelling on the many advantages to be gained by submission. Many have imagined, from the familiarity of Rabshakeh with Hebrew,\* that he either was a Jewish deserter or an apostate captive of Israel. Whether this be so or not, it is not impossible that the assertion which he makes on the part of his master, that Sennacherib had even the sanction and command of the Lord Jehovah for his expedition against Jerusalem ("Am I now come up without the Lord to destroy it? The Lord said to me, Go up against this land to destroy it") may have reference to the prophecies of Isaiah (viii. 7, 8, x. 5, 6) concerning the desolation of Judah and Israel by the Assyrians, of which, in some form more or less correct, he had received information. Being unable to obtain any promise of submission from Hezekiah, who, in the extremity of his peril returning to trust in the help of the Lord, is encouraged by the words and predictions of Isaiah, Rabshakeh goes back to the king of Assyria, who had now departed from Lachish.

The English version takes Rabshakeh as the name of a person; it may, however, be questioned whether it be not rather the name of the office which he held at the court, that of chief cupbearer, in the same way as RAB-SARIS denotes the chief eunuch, and RAB-MAG possibly the chief priest.

Luther in his version is not quite consistent, sometimes (2 K. xviii. 17; Is. xxxvi. 2) giving Rabshakeh as a proper name, but ordinarily translating it as a title of office, arch-cupbearer (der Erzschenke).

The word Rab may be found translated in many places of the English version, for instance, 2 K. xxv. 8, 20; Jer. xxxix. 11; Dan. ii. 14 (רַב־טַבָּחִים), *Rab-tabbachim*, "captain of the guard," in the margin "chief marshal," "chief of the executioners." Dan. i. 3, *Rab-sarishm*, "master of the eunuchs;" ii. 48 (רַב־סִגְנִין), *Rab-signa*, "chief

\* The difference between speaking in the Hebrew and the Aramean, "in the Jews' language" (יְהוּדִית), *Jehudith*, and in the "Syrian language" (אַרְמֵית), *Aramith*, would be rather a matter of pronunciation and dialect than of essential difference of language. See for the "Syrian tongue," Err. iv. 7; Dan. ii. 4.

\* In this name *ch* is sounded like hard *c*, as the representative of the Hebrew *cap*. In Rachel, on the other hand, it represents *cheth*, and should properly be pronounced like a guttural *h* (see A. V. of Jer. xxxi. 15).

\* Thémis, with his usual rashness, says "Rachel is a redoubt of Carmel."

\* It is not obvious how our translators came to spell the name רַחֵל as they do in their final revision of 1611, viz. Rachel. Their practice—almost, if not quite, invariable—throughout the Old Testament of that edition, is to

of the governors;" iv. 9, v. 11 (רַחֲמַנְיָא), *Rachmannia*, "master of the magnanimi," James i. 6 (רַב־הַחֲבֵל), *Rab-hachol*, "shipmaster." It enters into the titles, Rabbi, Rabbini, and the name Rabbah. [L. P. L.]

RA'CA ('Paxd), a term of reproach used to the Jews of our Saviour's age (Matt. v. 22). Critics are agreed in deriving it from the Chaldee root רַקָּא with the sense of "worthless," but they differ as to whether this term should be connected with the root רַחֵל, conveying the notion of emptiness (Gesen. *Thes.* p. 1279), or with one of the cognate roots רַקַּק ('Tholuck), or רַקַּק ('Ludl), conveying the notion of thinness (Gesenius, *Thes.* p. 1279, Wetze, on Matt. v. 22). The first of these views is probably correct. We may compare the use of רַקַּק "vain," in Judg. ix. 4, xi. 3, *al.*, and of רַקַּק Jam. ii. 20. [W. L. E.]

RACE. [GAMES, vol. i. p. 650.]

RA'CHAB ('Paxdā: *Rahab*). RAHAB is harlot (Matt. i. 5).

RA'CHAL (רַחֵל: *Rachal*). One of the places which David and his followers used to haunt during the period of his freebooting life, and to the pass of which he sent a portion of the plunder taken from the Amalekites. It is named in 1 Sam. xiii. 29 only. The Vatican LXX. inserts five words in this passage between "fabermon" and "the rock meets." The only one of these which has any similarity to Rachal is Carmel, which would not go so well as far as position goes; but it is impossible to consider the two as identical without acknowledging the coincidence. No name like Rachal has been found to the south of Judah. [G.]

RACHEL (רַחֵל), "a ewe," the word which occurs in Gen. xxxi. 38, xxxii. 14, Gen. xl. 1, lxxiii. 7: A. V. rendered "ewe" and "sheep." ('Paxdā: *Rachal*). The younger of the daughters of Laban, the wife of Jacob, the mother of Joseph and Benjamin. The incidents of her life may be found in Gen. xxix.-xxxiii., xxxv. The story of Jacob and Rachel has always had a peculiar interest; then, that in it which appeals to some of the deepest feelings of the human heart. The beauty of Rachel, the love with which she was loved by Jacob from the first meeting by the well of Haran, when he came to her the simple courtesies of the desert life, he kissed her and told her he was Rachel's son; his long servitude with which he patiently served

present *h*, the hard guttural aspirate, by *h* (e.g. *h* in *h*); the *ch* (hard, of course) they reserve for the consistency for *h*. On this principle Rachel should have been given throughout "Rahel," as indeed it is in some of the most modern editions—Jer. xxi. 13. In the earlier editions of the English Bible (e.g. 1551, 1566) we find Rachel throughout. It is difficult to suspect that Rachel (however originating) was a woman's name in the latter part of the 16th and beginning of the 17th centuries, and that it was introduced by the less familiar though more accurate Latin version to that fact, and in obedience to the rule and direction of the translators, that "the names of women are to be retained as near as may be, according to the vulgar use."

Rachel (so common in the literature of a century ago) is a corruption, as *Rahab* is of *Rahab*. [G.]

her, in which the seven years "seemed to him but a few days, for the love he had to her;" their marriage at last, after the cruel disappointment through the fraud which substituted the elder sister in the place of the younger; and the death of Rachel at the very time when in giving birth to another son her own long-delayed hopes were accomplished, and she had become still more endeared to her husband; his deep grief and ever-living regrets for her loss (Gen. xlviii. 7): these things make up a touching tale of personal and domestic history which has kept alive the memory of Rachel—the beautiful, the beloved, the untimely taken away—and has preserved to this day a reverence for her tomb; the very infidel invaders of the Holy Land having respected the traditions of the site, and erected over the spot a small rude shrine, which conceals whatever remains may have once been found of the pillar first set up by her mourning husband over her grave.

Yet from what is related to us concerning Rachel's character there does not seem much to claim any high degree of admiration and esteem. The discontent and fretful impatience shown in her grief at being for a time childless, moved even her fond husband to anger (Gen. xxx. 1, 2). She appears moreover to have shared all the duplicity and falsehood of her family, of which we have such painful instances in Rebekah, in Laban, and not least in her sister Leah, who consented to bear her part in the deception practised upon Jacob. See, for instance, Rachel's stealing her father's images, and the ready dexterity and presence of mind with which she concealed her theft (Gen. xxxi.): we seem to detect here an apt scholar in her father's school of untruth. From this incident we may also infer (though this is rather the misfortune of her position and circumstances) that she was not altogether free from the superstitions and idolatry which prevailed in the land whence Abraham had been called (Jo-h. xxiv. 2, 14), and which still to some degree infected even those families among whom the true God was known.

The events which preceded the death of Rachel are of much interest and worthy of a brief consideration. The presence in his household of these idolatrous images, which Rachel and probably others also had brought from the East, seems to have been either unknown to or connived at by Jacob for some years after his return from Haran; till, on being reminded by the Lord of the vow which he had made at Bethel when he fled from the face of Esau, and being bidden by Him to erect an altar to the God who appeared to him there, Jacob felt the glaring impiety of thus solemnly appearing before God with the taint of impiety cleaving to him or his, and "said to his household and all that were with him, Put away the strange gods from among you" (Gen. xxxv. 2). After thus casting out the polluting thing from his house, Jacob journeyed to Bethel, where, amidst the associations of a spot consecrated by the memories of the past, he received from God an emphatic promise and blessing, and, the name of the Supplanter being laid aside, he had given to him instead the holy name of Israel. Then it was, after his spirit had been there purified and strengthened by communion with God, by the

assurance of the Divine love and favour, by the consciousness of evil put away and duties performed, then it was, as he journeyed away from Bethel, that the chastening blow fell and Rachel died. These circumstances are alluded to here not so much for their bearing upon the spiritual discipline of Jacob, but rather with reference to Rachel herself, as suggesting the hope that they may have had their effect in bringing her to a higher sense of her relations to that Great Jehovah in whom her husband, with all his faults of character, so firmly believed.

*Rachel's tomb.*—"Rachel died and was buried in the way to Ephrath, which is Bethlehem. And Jacob set a pillar upon her grave: that is the pillar of Rachel's grave unto this day" (Gen. xxxv. 19, 20). As Rachel is the first related instance of death in childbearing, so this pillar over her grave is the first recorded example of the setting up of a sepulchral monument; caves having been up to this time spoken of as the usual places of burial. The spot was well known in the time of Samuel and Saul (1 Sam. x. 2); and the prophet Jeremiah, by a poetic figure of great force and beauty, represents the buried Rachel weeping for the loss and captivity of her children, as the bands of the exiles, led away on their road to Babylon, passed near her tomb (Jer. xxxi. 15-17). St. Matthew (ii. 17, 18) applies this to the slaughter by Herod of the infants at Bethlehem.

The position of the Ramah here spoken of is one of the disputed questions in the topography of Palestine; but the site of Rachel's tomb, "on the way to Bethlehem," "a little way\* to come to Ephrath," "in the border of Benjamin," has never been questioned. It is about 2 miles S. of Jerusalem, and one mile N. of Bethlehem. "It is one of the shrines which Muslims, Jews, and Christians agree in honouring, and concerning which their traditions are identical." It was visited by Maundrell, 1697. The description given by Dr. Robinson (i. 218) may serve as the representative of the many accounts, all agreeing with each other, which may be read in almost every book of Eastern travel. It is "merely an ordinary Muslim Wely, or tomb of a holy person, a small square building of stone with a dome, and within it a tomb in the ordinary Mahomedan form, the whole plastered over with mortar. Of course the building is not ancient: in the seventh century there was here only a pyramid of stones. It is now neglected and falling to decay, though pilgrimages are still made to it by the Jews. The naked walls are covered with names in several languages, many of them in Hebrew. The general correctness of the tradition which has fixed upon this spot for the tomb of Rachel cannot well be drawn in question, since it is fully supported by the circumstances of the Scriptural narrative. It is also mentioned by the *Itin. Hieros.*, A.D. 333, and by Jerome (Ep. lxxxvi., *ad Eustoch. Epitaph. Paulæ*) in the same century."

Those who take an interest in such interpretations may find the whole story of Rachel and Leah allegorised by St. Augustine (*contra Fausum Manichæum*, xlii. li.-lviii. vol. viii. 432, &c., ed. Migne), and Justin Martyr (*Dialogue with Trypho*, c. 134, p. 360).

[E. P. E.]

\* Hebrew *Abrahâ*; in the LXX. here, xlviii. 7, and 2 K. 19. *Kaḥṣadā*. This seems to have been accepted as the name of the spot (Jemetric) in Eus. *Pr. Ev.* ix. 21), and to have been actually encountered there by a traveller in the 13th cent. (Burchard de Strassburg, by Saint

tinola, p. 35), who gives the Arabic name of Rachel's tomb as *al-abrahâ* or *Carahata*.

\* Since Robinson's last visit, it has been enlarged by the addition of a square court on the east side, with high walls and arches (*Later Researches*, 273).

**RAD'DAI** (רַדְדַּי; *Zaddai*; Alex. *Zaddai*; Joseph. *Ράδας*; *Raddas*). One of David's brothers, fifth son of Jesse (1 Chr. ii. 14). He does not appear in the Bible elsewhere than in this list, unless he be, as Ewald conjectures (*Geschichte*, iii. 266 note), identical with Rati. But this does not seem probable. Fürst (*Handb.* ii. 355 b) considers the final *i* of the name to be a remnant of *Jah* or *Jehovah*. [G.]

**RAGAU** (רָגָא; *Ragna*). 1. A place named only in Jud. i. 5, 15. In the latter passage the "mountains of Ragau" are mentioned. It is probably identical with RAGES.

2. One of the ancestors of our Lord, son of Phaleg (Luke iii. 35). He is the same person with REU son of Peleg; and the difference in the name arises from our translators having followed the Greek form, in which the Hebrew *פ* was frequently expressed by *ר*, as is the case in Raguel (which once occurs for Reuel), Gomorria, Gethulia (for Atholia), Phogor (for Peor), &c. [G.]

**RAGES** (רָגֶס, *Rāḡas*, *Rayaḡ*; *Rages*, *Ragan*) was an important city in north-eastern Media, where that country bordered upon Parthia. It is not mentioned in the Hebrew Scriptures, but occurs frequently in the Book of Tobit (i. 14, v. 5, vi. 9, and 12, &c.), and twice in Judith (i. 5 and 15). According to Tobit, it was a place to which some of the Israelitish captives taken by Shalmaneser (Ezra vi. 1) had been transported, and thither the angel Raphael conducted the young Tobiah. In the book of Judith it is made the scene of the great battle between Nabuchodonosor and Arphaxad, wherein the latter is said to have been defeated and taken prisoner. Neither of these accounts can be regarded as historic; but the latter may conceal a fact of some importance in the history of the city.

Rages is a place mentioned by a great number of profane writers. It appears as *Ragha* in the Zendavesta, in Isidore, and in Stephen; as *Raga* in the inscriptions of Darius; *Ringue* in Darius of Samos (Fr. 25), Strabo (xi. 9, §1), and Arrian (*Exp. Alex.* iii. 20); and *Rhagena* in Ptolemy (vi. 5). Properly speaking, Rages is a town, but the town gave name to a province, which is sometimes called Rages or Rhagae, sometimes Rhagiana. It appears from the Zendavesta that here was one of the earliest settlements of the Arians, who were mingled, in Rhagiana, with two other races, and were thus brought into contact with heretics (Bunsen, *Philosophy of Universal History*, iii. 485). Isidore calls Rages "the greatest city in Media" (p. 6), which may have been true in his day; but other writers commonly regard it as much inferior to Ecbatana. It was the place to which *Fravartish* (Phraortes), the Median rebel, fled, when defeated by Darius Hystaspis, and at which he was made prisoner by one of Darius' generals (*Beh. Inscr.* col. ii. par. 13). [MEDIA.] This is probably the fact which the apocryphal writer of Judith had in his mind when he spoke of Arphaxad as having been captured at Ragau. When Darius Codomannus fled from Alexander, intending to make a final stand in Bactria, he must have passed through Rages on his way to the Caspian Gates, and so we find that Alexander arrived there in pursuit of his enemy, on the eleventh day after he quitted Ecbatana (Arrian, *Exp. Alex.* iii. 20). In the troubles which followed the death of Alexander, Rages appears to have gone to decay, but it was soon after rebuilt by Seleucus I. (Nicator).

who gave it the name of *Euragria* (Strabo, xi. 56; Steph. Byz. *ad loc.*). When the Parthians took it, they called it *Arsema*, after the Arsaces the day; but it soon afterwards resumed its ancient appellation, as we see by Strabo and Isidore. The appellation it has ever since retained, with only slight corruption, the ruins being still known by the name of *Rhey*. These ruins lie about five or six south-east of Teheran, and cover a space about 3000 yards long by 3500 yards broad. The walls are marked, and are of prodigious thickness; they appear to have been flanked by strong towers, and are connected with a lofty citadel at their north-east angle. The importance of the place consisted in its vicinity to the Caspian Gates, which, in a war sense, it guarded. Owing to the barren and sterile character of the great salt desert of Iran, an army which seeks to pass from Bactria, India, Afghanistan to Media and Mesopotamia, or in reverse, must skirt the range of mountains which runs along the southern shore of the Caspian. The mountains send out a rugged and precipitous ridge in about long. 52° 25' E. from Gersnawich, which runs far into the desert, and can only be crossed with the extremest difficulty. Across this lies a single pass—the Pylæ Caspiæ of the ancients, and of this pass the possessors of Elagæ must at all times hold the keys. The modern Telin built out of its ruins, has now superseded it, and it is perhaps mainly from the importance of position that it has become the Persian capital. (For an account of the ruins of *Rhey*, see Kar Porter's *Travels*, i. 357-364; and compare *Voies Khorassan*, p. 286.) [G.]

#### RAG'UEL, or REU'EL (רָגוּאֵל): *Rayuel*

1. A prince-priest of Midian, the father of Zipporah according to Ex. ii. 21, and of Hobab according to Num. x. 29. As the father-in-law of Moses named Jethro in Ex. iii. 1, and Hobab in Jud. i. 11, and perhaps in Num. x. 29 (though the last passage admits of another sense), the probable view would be that Raguel, Jethro, and Hobab were different names for the same individual. Such is probably the case with regard to the first at all events, if not with the third. (Quint.) One of the names may represent an official title, but whether Jethro or Raguel, is uncertain, the being appropriately significant: *ῥαγὺς* signifies favour of the former (*τὸ ῥαγὺς*, i. e. *ῥαγὺς* *ἐπικαλεῖται* *τὸ ῥαγὺς*, *Ant.* ii. 12, §1), and it is not unlikely, as the name *Raguel* occurs in an uncommon one. The identity of Jethro and Raguel is supported by the indiscriminate use of the name in the LXX. (Ex. ii. 16, 18); and the application of more than one name to the same individual is an usage familiar to the Hebrews, as instances of Jacob and Israel, Solomon and Jedidiah, and the similar cases. Another solution of the difficulty has been sought in the loose use of terms of relationship among the Hebrews; as that which is Ex. iii. 1, viii. 1, Num. x. 29, may signify a relation by marriage, and consequently that Jethro and Hobab were brothers-in-law of Moses; or the terms *ab* and *ath* in Ex. ii. 16, 18, the grandfather and granddaughter. Neither of these assumptions is satisfactory, the former is

\* Jethro = "pre-eminent," from *יָתֵר* "to excel."

Raguel = "friend of God," from *רָגוּאֵל*.

† *יָתֵר*.

‡ *אֶב*.

§ *אֶת*.

absence of any corroborative evidence, the latter because the omission of Jethro the father's name in so circumstantial a narrative as in Ex. ii. is inexplicable, nor can we conceive the indiscriminate use of the terms father and grandfather without good cause. Nevertheless this view has a strong weight of authority in its favour, being supported by the Targum Jonathan, Aben Ezra, Michaelis, Winer, and others. [W. L. B.]

2. Another transcription of the name REUEL, occurring in Tobit, where Raguel, a pious Jew of "Ecbatane, a city of Media," is father of Sara, the wife of Tobias (Tob. iii. 7, 17, &c.). The name was not uncommon, and in the book of Enoch it is applied to one of the great guardian angels of the universe, who was charged with the execution of the Divine judgments on the (material) world and the stars (cc. xx. 4, xxiii. 4, ed. Hüllmann). [B. F. W.]

RA'HAB, or RA'CHAB (רַחַב): רַחַב, and רַחַב: Rahab, and Rahab), a celebrated woman of Jericho, who received the spies sent by Joshua to spy out the land, hid them in her house from the pursuit of her countrymen, was saved with all her family when the Israelites sacked the city; and became the wife of Salmon, and the ancestress of the Messiah.

Her history may be told in a few words. At the time of the arrival of the Israelites in Canaan she was a young unmarried woman, dwelling in a house of her own alone, though she had a father and mother, and brothers and sisters, living in Jericho. She was a "harlot," and probably combined the trade of lodging-keeper for wayfaring men. She seems also to have been engaged in the manufacture of linen, and the art of dyeing, for which the Phœnicians were early famous; since we find the flat roof of her house covered with stalks of flax put there to dry, and a stock of scarlet or crimson (צִנְחָה) line in her house: a circumstance which, coupled with the mention of Babylonish garments at vii. 21, as among the spoils of Jericho, indicates the existence of a trade in such articles between Phœnicia and Mesopotamia. Her house was situated on the wall, probably near the town gate, so as to be convenient for persons coming in and going out of the city. Travelers coming from Mesopotamia or Egypt to Phœnicia, would frequently pass through Jericho, situated as it was near the fords of the Jordan; and of these many would resort to the house of Rahab. Rahab therefore had been well informed with regard to the events of the Exodus. She had heard of the passage through the Red Sea, of the utter destruction of Sihon and Og, and of the irresistible progress of the Israelitish host. The effect upon her mind had been what one would not have expected in a person of her way of life. It led her to a firm faith in Jehovah as the true God, and to the conviction that He purposed to give the land of Canaan to the Israelites. When therefore the two spies sent by Joshua came to her house, they found themselves under the roof of one who, alone probably of the whole population, was friendly to their nation. Their coming, however, was quickly known; and the king of Jericho, having received information of it, while at supper, according to Josephus, sent that very evening to require her to deliver them up. It is very likely that, her house being a public one, some one who resorted there may have seen and recognised the spies, and gone off at once to report the matter to the authorities. But not without availing herself of the opportunity: for she immediately hid the men among

the flax-stalks which were piled on the flat-roof of her house, and, on the arrival of the officers sent to search her house, was ready with the story that two men, of what country she knew not, had, it was true, been to her house, but had left it just before the gates were shut for the night. If they pursued them at once, she added, they would be sure to overtake them. Misled by the false information, the men started in pursuit to the fords of the Jordan, the gates having been opened to let them out, and immediately closed again. When all was quiet, and the people were gone to bed, Rahab stole up to the house-top, told the spies what had happened, and assured them of her faith in the God of Israel, and her confident expectation of the capture of the whole land by them; an expectation, she added, which was shared by her countrymen, and had produced a great panic amongst them. She then told them her plan for their escape. It was to let them down by a cord from the window of her house which looked over the city wall, and that they should flee into the mountains which bounded the plains of Jericho, and lie hid there for three days, by which time the pursuers would have returned, and the fords of the Jordan be open to them again. She asked, in return for her kindness to them, that they should swear by Jehovah, that when their countrymen had taken the city, they would spare her life, and the lives of her father and mother, brothers and sisters, and all that belonged to them. The men readily consented, and it was agreed between them that she should hang out her scarlet line at the window from which they had escaped, and bring all her family under her roof. If any of her kindred went out of doors into the street, his blood would be upon his own head, and the Israelites in that case would be guiltless. The event proved the wisdom of her precautions. The pursuers returned to Jericho after a fruitless search, and the spies got safe back to the Israelitish camp. The news they brought of the terror of the Canaanites doubtless inspired Israel with fresh courage, and, within three days of their return, the passage of the Jordan was effected. In the utter destruction of Jericho, which ensued, Joshua gave the strictest orders for the preservation of Rahab and her family; and accordingly, before the city was burnt, the two spies were sent to her house, and they brought out her, her father and mother, and brothers, and kindred, and all that she had, and placed them in safety in the Israelitish camp. The narrator adds, "and she dwelleth in Israel unto this day;" not necessarily implying that she was alive at the time he wrote, but that the family of strangers of which she was reckoned the head, continued to dwell among the children of Israel. May not the 345 "children of Jericho," mentioned in Ezr. ii. 34, Neh. vii. 36, and "the men of Jericho" who assisted Nehemiah in rebuilding the walls of Jerusalem Neh. iii. 2., have been their posterity? Their continued sojourn among the Israelites, as a distinct family, would be exactly analogous to the cases of the Kenites, the house of Rechab, the Gileadites, the house of Caleb, and perhaps others.

As regards Rahab herself, we learn from Matt. i. 5, that she became the wife of Salmon the son of Naasson, and the mother of Boaz, Jesse's grandfather. The suspicion naturally arises that Salmon may have been one of the spies whose life she saved, and that gratitude for so great a benefit, led in his case to a more tender passion, and obliterated the

a. money of any past disgrace attaching to her name. We are expressly told that the spies were "young men" (Josh. vi. 23), νεῶλικοι, in. 1.; LXX.; and the example of the former spies who were sent from Kadesh-Barnea, who were all "heads of Israel" (Num. xiii. 3), as well as the importance of the service to be performed, would lead one to expect that they would be persons of high station. But, however this may be, it is certain, on the authority of St. Matthew, that Rahab became the mother of the line from which sprang David, and eventually Christ; and there can be little doubt that it was so stated in the public archives from which the Evangelist extracted our Lord's genealogy, in which only four women are named, viz. Tamar, Rachab, Ruth, and Bathsheba, who were all apparently foreigners, and named for that reason. [BATH-SHUA.] For that the Rachab mentioned by St. Matthew is Rahab the harlot, is as certain as that David in the genealogy is the same person as David in the books of Samuel. The attempts that have been made to prove Rachab different from Rahab,<sup>a</sup> in order to get out of the chronological difficulty, are singularly absurd, and all the more so, because, even if successful, they would not diminish the difficulty, as long as Salmon remains as the son of Naasson and the father of Boaz. However, as there are still found<sup>b</sup> those who follow Outhov in his opinion, or at least speak doubtfully, it may be as well to call attention, with Dr. Mill (p. 131), to the exact coincidence in the age of Salmon, as the son of Nahshon, who was prince of the children of Judah in the wilderness, and Rahab the harlot; and to observe that the only conceivable reason for the mention of Rachab in St. Matthew's genealogy is, that she was a remarkable and well-known person, as Tamar, Ruth, and Bathsheba were.<sup>c</sup> The mention of an utterly unknown Rahab in the line would be absurd. The allusions to "Rahab the harlot" in Heb. xi. 31, Jam. ii. 25, by classing her among those illustrious for their faith, make it still more impossible to suppose that St. Matthew was speaking of any one else. The four successive generations, Nahshon, Salmon, Boaz, Obed, are consequently as certain as words can make them.

The character of Rahab has much and deep interest. Dismissing as inconsistent with truth, and with the meaning of רַחַב and πορνή, the attempt to clear her character of stain by saying that she was only an innkeeper, and not a harlot (παρδοκέρτρα, Chrysostom and Chald. Vers.), we may yet notice that it is very possible that to a woman of her country and religion such a calling may have implied a far less deviation from the standard of morality than it does with us ("vitæ genus vile magis quam flagitiosum," Grotius), and moreover, that with a purer faith she seems to have entered upon a pure life.

As a case of conspiracy, her conduct in deceiving the king of Jericho's messengers with a false tale, and, above all, in taking part against her own countrymen, has been much discussed. With regard to

the first, strict truth, either in Jew or heathen, was a virtue so utterly unknown before the promulgation of the Gospel, that, as far as Rahab is concerned, the discussion is quite superfluous. The question as regards ourselves, whether in any case a falsehood is allowable, say to save our own life or that of another, is different, but need not be argued here.<sup>d</sup> With regard to her taking part against her own countrymen, it can only be justified, but is fully justified, by the circumstance that fidelity to her country would in her case have been infidelity to God, and that the higher duty to her Maker eclipsed the lower duty to her native land. Her anxious provision for the safety of her father's house shows how alive she was to national duties, and seems to prove that she was not influenced by a selfish insensibility, but by an enlightened preference for the service of the true God over the abominable pollutions of Canaanite idolatry. If her own life of shame was in any way connected with that idolatry, one can readily understand what a further stimulus this would give, now that her heart was purified by faith, to her desire for the overthrow of the nation to which she belonged by birth, and the establishment of that to which she wished to belong by a community of faith and love. Anyhow, allowing for the difference of circumstances, her feelings and conduct were analogous to those of a Christian Jew in St. Paul's time, who should have preferred the triumph of the Gospel to the triumph of the old Judaism; or to those of a converted Hindoo in our own days, who should side with Christian Englishmen against the attempts of his own countrymen to establish the supremacy either of Brahma or Mahomet.

This view of Rahab's conduct is fully borne out by the references to her in the N. T. The editor of the Epistle to the Hebrews tells us that "the harlot Rahab perished not with them that believed not, when she had received the spies with peace" (Heb. xi. 31); and St. James borrows the doctrine of justification by works, by asking, "Was not Rahab the harlot justified by works, when she had received the messengers, and had sent them out another way?" (Jam. ii. 25.) And in the same Clement of Rome says "Rahab the harlot was saved for her faith and hospitality" (ad Corinth. vi.).

The Fathers generally (with consensus, I think) consider the deliverance of Rahab as typical of salvation, and the scarlet line hung out at her window as typical of the blood of Jesus, in the same way as the ark of Noah, and the blood of the paschal lamb were; a view which is borne out by the analogy of the deliverances, and by the language of Heb. xi. 31 (τοῖς ἀσκήσεσσι, "the disciplines"), compared with 1 Pet. iii. 21 (ἀσκήσεις, "disciplines," Clement ad Corinth. xii.), is the first in its kind. He says that by the symbol of the scarlet line was "made manifest that there shall be redemption through the blood of the Lord to all who believe and trust in God;" and adds, that Rahab alone was a prophetess as well as a believer, a saintess in which he is followed by Origen (in Job, lib. iii.), Justin Martyr in like manner calls the scarlet

<sup>a</sup> Chiefly by Outhov, a Dutch professor, in the *Biblioth. Orient.* The earliest expression of any doubt is by Theophylact in the 11th century.

<sup>c</sup> There does not seem to be any force in Bengel's remark, adopted by Olshausen, that the article (the) is

Payas) proves that Rahab of Jericho is meant, while that all the proper names in the genealogy, with one or two oblique cases, have the article, though many of them occur nowhere else; and that it is inserted before Boaz in ver. 16.

<sup>d</sup> The question, in reference both to Rahab and to Christians, is well discussed by Augustine under *Rahab* (Opp. vi. 33, 34 comp. Balthinger, and Fox, *op. cit.*).

line "the symbol of the blood of Christ, by which those of all nations, who once were harlots and unrighteous, are saved;" and in a like spirit Irenaeus draws from the story of Rahab the conversion of the Gentiles, and the admission of publicans and harlots into the kingdom of heaven through the symbol of the scarlet line, which he compares with the Passover and the Exodus. Ambrose, Jerome, Augustine (who, like Jerome and Cyril, takes Ps. lxxvii. 4 to refer to Rahab the harlot), and Theodoret, all follow in the same track; but Origen, as usual, carries the allegory still further. Irenaeus makes the singular mistake of calling the spies *three*, and makes them symbolical of the Trinity! The comparison of the scarlet line with the scarlet thread which was bound round the hand of Sarah as a favourite one with them.\*

The Jews, as might perhaps be expected, are embarrassed as to what to say concerning Rahab. They praise her highly for her conduct; but some Rabbis give out that she was not a Canaanite, but of some other Gentile race, and was only a sojourner in Jericho. The Gemara of Babylon mentions a tradition that she became the wife of Joshua, a tradition unknown to Jerome (*adv. Jovin.*), and eight persons who were both priests and prophets sprung from her, and also Huldah the prophetess, mentioned 2 K. xxii. 14 (see Patrick, *ad loc.*). Josephus describes her as an innkeeper, and her house as an inn (*ἀνταγωγίον*), and never applies to her the epithet *πόρνη*, which is the term used by the LXX.

Rahab is one of the not very numerous cases of the calling of Gentiles before the coming of Christ; and her deliverance from the utter destruction which fell upon her countrymen is so beautifully illustrative of the salvation revealed in the Gospel, that it is impossible not to believe that it was in the fullest sense a type of the redemption of the world by Jesus Christ.

RA'HAB (רַהַב: 'Radβ: Rahab), a poetical name of Egypt. The same word signifies "ferceness, insolence, pride;" if Hebrew when applied to Egypt, it would indicate the national character of the inhabitants. Gesenius thinks it was probably of Egyptian origin, but accommodated to Hebrew, although no likely equivalent has been found in Coptic, or, we may add, in ancient Egyptian (*Thes.* s. v.). That the Hebrew meaning is alluded to in connexion with the proper name, does not seem to prove that the latter is Hebrew, but this is rendered very probable by its apposite character, and its sole use in poetical books.

\* Bullinger (5th Dec. Sermon. vi.) views the line as a sign and seal of the covenant between the Israelites and Rahab.

This word occurs in a passage in Job, where it is usually translated, as in the A. V., instead of being treated as a proper name. Yet if the passage be compared with parallel ones, there can scarcely be a doubt that it refers to the Exodus, "He divideth the sea with His power, and by His understanding He smiteth through the proud" [or "Rahab"] (xvi. 12). The prophet Isaiah calls on the arm of the Lord, "[Art] not thou it that hath cut Rahab, [and] wounded the dragon?" [Art] not thou it which hath dried the sea, the waters of the great deep; that hath made the depths of the sea a way for the ransomed to pass over?" (li. 9, 10; comp. 15.) In Ps. lxxiv. the division of the sea is mentioned in connexion with breaking the heads of the dragons and the heads of Leviathan (13, 14). So too in Ps. lxxxix. God's power to subdue the sea is spoken of immediately before a mention of his having "broken Rahab in pieces" (9, 10). Rahab, as a name of Egypt, occurs once only without reference to the Exodus: this is in Psalm lxxvii., where Rahab, Babylon, Philistia, Tyre, and Cush, are compared with Zion (4, 5). In one other passage the name is alluded to, with reference to its Hebrew signification, where it is prophesied that the aid of the Egyptians should not avail those who sought it, and this sentence follows: הָיָה לָהֶם לְעִצָּה, "Insolence [i. e. 'the insolent'], they sit still" (Is. xxx. 7), as Gesenius reads, considering it to be undoubtedly a proverbial expression. [R. S. P.]

RA'HAM (רַחֵם: 'Radμ: Raham). In the genealogy of the descendants of Caleb the son of Hebron (1 Chr. ii. 44), Raham is described as the son of Shema and father of Jorkoam. Rashi and the author of the *Quaest.* in *Pur.* attributed to Jerome, regard Jorkoam as a place, of which Raham was founder and prince.

RA'HEL (רַחֵל: 'Radηλ: Rachel). The more accurate form of the familiar name elsewhere rendered RACHEL. In the older English versions it is employed throughout, but survives in the Authorized Version of 1611, and in our present Bible, in Jer. xxxi. 15 only. [G.]

RAIN. מֶטֶר (*metēr*), and also גֶּשֶׁם (*gashēm*), which, when it differs from the more common word מֶטֶר, signifies a more violent rain; it is also used as a generic term, including the early and latter rain (Jer. v. 24; Joel ii. 23).

EARLY RAIN, the rains of the autumn, יָרֵד (yōrē), part. subst. from יָרַד, "he scattered" (Deut. xi. 14; Jer. v. 24); also the hiphil part. מֵרֵד (Joel ii. 23): *serēs spōtiues*, LXX.

LATTER RAIN, the rain of spring, מַלְקָח (*mal-ākāh*). (Prov. xvi. 15; Job xxix. 23; Jer. iii. 3; Hos. vi. 3; Joel ii. 23; Zach. x. 1): *serēs spōtiues*. The early and latter rains are mentioned together (Deut. xi. 14; Jer. v. 24; Joel ii. 23; Hos. vi. 3; James v. 7).

Another word, of a more poetical character, is רִבְרִיִּים (*rebrī'im*, a plural form, connected with רַב, "many," from the multitude of the drops), translated in our version "showers" (Deut. xxxii. 2; Jer. iii. 3, xiv. 22; Mic. v. 7 (Heb. 6); Pa. lxx. 10 (Heb. 11), lxxii. 6). The Hebrews have also the word עָרָן (*erēn*), expressing violent rain,

storm, tempest, accompanied with hail—in Job xiv. 8, the heavy rain which comes down on mountains; and the word *סִיָּר* (*sagrir*), which occurs only in Prov. xvii. 15, continuous and heavy rain, *הַיָּמִים חֲמִשְׁעִשְׂרִים*.

In a country comprising so many varieties of elevation as Palestine, there must of necessity occur corresponding varieties of climate; an account that might correctly describe the peculiarities of the district of Lebanon, would be in many respects inapplicable when applied to the deep depression and almost tropical climate of Jericho. In any general statement, therefore, allowance must be made for not inconsiderable local variations. Compared with England, Palestine would be a country in which rain would be much less frequent than with ourselves; contrasted with the districts most familiar to the children of Israel before their settlement in the land of promise, Egypt and the Desert, rain might be spoken of as one of its distinguishing characteristics (Deut. xi. 10, 11; Herodotus, iii. 10). For six months in the year no rain falls, and the harvests are gathered in without any of the anxiety with which we are so familiar lest the work be interrupted by unseasonable storms. In this respect at least the climate has remained unchanged since the time when Boaz slept by his heap of corn; and the sending thunder and rain in wheat harvest was a miracle which filled the people with fear and wonder (1 Sam. xii. 16-18); and Solomon could speak of "rain in harvest" as the most forcible expression for conveying the idea of something utterly out of place and unnatural (Prov. xvi. 1). There are, however, very considerable, and perhaps more than compensating, disadvantages occasioned by this long absence of rain: the whole land becomes dry, parched, and brown, the cisterns are empty, the springs and fountains fail, and the autumnal rains are eagerly looked for, to prepare the earth for the reception of the seed. These, the early rains, commence about the latter end of October or beginning of November, in Lebanon a month earlier: not suddenly but by degrees; the husbandman has thus the opportunity of sowing his fields of wheat and barley. The rains come mostly from the west or south-west (Luke xii. 54), continuing for two or three days at a time, and falling chiefly during the night; the wind then shifts round to the north or east, and several days of fine weather succeed (Prov. xiv. 23). During the months of November and December the rains continue to fall heavily, but at intervals; afterwards they return, only at longer intervals, and are less heavy; but at no period during the winter do they entirely cease. January and February are the coldest months, and snow falls, sometimes to the depth of a foot or more, at Jerusalem, but it does not lie long; it is very seldom seen along the coast and in the low plains. Thin ice occasionally covers the pools for a few days, and while Porter was writing his Handbook, the snow was eight inches deep at Damascus, and the ice a quarter of an inch thick. Rain continues to fall more or less during the month of March; it is very rare in April, and even in Lebanon the showers that occur are generally light. In the valley of the Jordan the barley harvest begins as early as the middle of April, and the wheat a fortnight later; in Lebanon the grain is seldom ripe before the middle of June. (See Robinson, *Biblical Researches*, i. 429; and Porter, *Handbook*, xlviii.) [PALESTINE, p. 692.]

With respect to the distinction between the latter rains, Robinson observes are not at the present day "any parties of rain or succession of showers, which regarded as distinct rainy seasons. The rains from October to March now constitute continued season of rain without any intervening term of prolonged fine weather; therefore, there has been some change in the early and the latter rains for which the husbandman waited with longing, seen rain implied the first showers of autumn when the parched and thirsty soil and prepared seed; and the latter showers of spring, seemed to refresh and forward both the rip and the vernal products of the fields (Prov. xvi. 15)."

In April and May the sky is again showers occur occasionally, but they are refreshing. On the 1st of May Robinson saw showers at Jerusalem, and "at evening thunder and lightning [which are frequent with pleasant and reviving rain. The day was also remarkable for thunder and showers, some of which were quite like rains of both these days extended far to . . . but the occurrence of rain so late was regarded as a very unusual sign (B. R. i. 430: he is speaking of the year 1856, however, "there was very much accompanied with thunder all over the Lebanon, extending to Beyrouth and Baalbek the 28th and 29th May; but the district had never seen the like before, and it was Porter (*Handbook*, xlviii.), almost as much as the thunder and rain which brought upon the Israelites during the wheat harvest."

During Dr. Robinson's stay at Beyrouth on his second visit to Palestine, in 1852, there were rains in March, once for five days and the weather continued variable, with heavy rain, till the close of the first week. The "latter rains" thus continued till nearly a month later than usual, and the afterwards seen in the very abundant winter grain (Robinson, B. R. iii. 9).

These details will, it is thought, tend to a more generalized statement, enable the reader to form a judgment on the "former" and "latter" rains of Scripture, and may serve to introduce him to two on the question, about which some have been felt, whether there has been any change in frequency and abundance of the rain in the periods of its supply. It is as if these stony hills, these deserted valleys, and these land flowing with milk and honey; the God cared for; the land upon which the eyes of the Lord, from the beginning to the end of the year (Deut. xi. 12) relate to the other considerations, account for diminished fertility, such as the decrease of population and industry, the terrace-culture and irrigation, and the supply of water, it may suffice to refer to an article on AGRICULTURE, and to the *Handbook*, 120-121). With regard to the more immediate subject, it is a very expressive "flowing with milk" implies abundant rains to keep alive the pasture of the numerous herds of milk, and to nourish the flowers of the

hore hill-sides, from whence the bees might gather their stores of honey. It is urged that the supply of rain in its due season seems to be promised as contingent upon the fidelity of the people (Deut. xi. 13-15; Lev. xxvi. 3-5), and that as from time to time, to punish the people for their transgressions, "the showers have been withholden, and there hath been no latter rain" (Jer. iii. 3; 1 K. xvii., xviii.), so now, in the great and long-continued apostasy of the children of Israel, there has come upon even the land of their forfeited inheritance a like long-continued withdrawal of the favour of God, who claims the sending of rain as one of His special prerogatives (Jer. xiv. 22).

The early rains, it is urged, are by comparison scanty and interrupted, the latter rains have altogether ceased, and hence, it is maintained, the curse has been fulfilled, "Thy heaven that is over thy head shall be brass, and the earth that is under thee shall be iron. The Lord shall make the rain of thy land powder and dust" (Deut. xxviii. 23, 24; Lev. xxvi. 19). Without entering here into the consideration of the justness of the interpretation which would assume these predictions of the withholding of rain to be altogether different in the manner of their infliction from the other calamities denounced in these chapters of threatening, it would appear that, as far as the question of fact is concerned, there is scarcely sufficient reason to imagine that any great and marked changes with respect to the rains have taken place in Palestine. In early days as now, rain was unknown for half the year; and if we may judge from the allusions in Prov. xvi. 15; Job xxix. 23, the latter rain was even then, while greatly desired and longed for, that which was somewhat precarious, by no means to be absolutely counted on as a matter of course. If we are to take as correct, our translation of Joel ii. 23, "the latter rain in the first (month)," i. e. Nisan or Abib, answering to the latter part of March and the early part of April, the times of the latter rain in the days of the prophets would coincide with those in which it falls now. The same conclusion would be arrived at from Amos iv. 7, "I have withholden the rain from you when there were yet three months to the harvest." The rain here spoken of is the latter rain, and an interval of three months between the ending of the rain and the beginning of harvest, would seem to be in an average year as exceptional now as it was when Amos noted it as a judgment of God. We may infer also from the Song of Solomon ii. 11-13, where is given a poetical description of the bursting forth of vegetation in the spring, that when the "winter" was past, the rain also was over and gone: we can hardly, by any extension of the term "winter," bring it down to a later period than that during which the rains still fall.

It may be added that travellers have, perhaps unconsciously, exaggerated the barrenness of the land, from confining themselves too closely to the southern portion of Palestine; the northern portion, Galilee, of such peculiar interest to the readers of the Gospels, is fertile and beautiful (see Stanley, *Sinai and Palestine*, chap. x., and Van der Velde, there quoted), and in his description of the valley of *Nablus*, the ancient Shechem, Robinson

(*R. E. n.* 275) becomes almost enthusiastic: "Here a scene of luxuriant and almost unparalleled verdure burst upon our view. The whole valley was filled with gardens of vegetables and orchards of all kinds of fruits, watered by several fountains, which burst forth in various parts and flow westward in refreshing streams. It came upon us suddenly, like a scene of fairy enchantment. We saw nothing like it in all Palestine." The account given by a recent lady traveller (*Egyptian Sepulchres and Syrian Shrines*, by Miss Beaufort) of the luxuriant fruit-trees and vegetables which she saw at Meshullam's farm in the valley of Urtas, a little south of Bethlehem (possibly the site of Solomon's gardens, *Ex.* ii. 4-6), may serve to prove how much now, as of old, may be effected by irrigation.

Rain frequently furnishes the writers of the Old Testament with forcible and appropriate metaphors, varying in their character according as they regard it as the beneficent and fertilizing shower, or the destructive storm pouring down the mountain side and sweeping away the labour of years. Thus Prov. xxviii. 3, of the poor that oppresseth the poor; *Ex.* xxviii. 22, of the just punishments and righteous vengeance of God (compare Ps. xi. 6; Job xx. 23). On the other hand, we have it used of speech wise and fitting, refreshing the souls of men, of words earnestly waited for and heedfully listened to (Deut. xxxii. 2; Job xxix. 23); of the cheering favour of the Lord coming down once more upon the penitent soul; of the gracious presence and influence for good of the righteous king among his people; of the blessings, gifts, and graces of the reign of the Messiah (*Hos.* vi. 3; 2 Sam. xxiii. 4; Ps. lxxii. 6).

[E. P. E.]

**RAINBOW** (קֶשֶׁף) (i. e. a bow with which to shoot arrows), Gen. ix. 13-16, *Ex.* i. 28: *ragos*, so *Ecclus.* xliii. 11: *arcus*. In N. T., Rev. iv. 3, x. 1, *ips*). The token of the covenant which God made with Noah when he came forth from the ark, that the waters should no more become a flood to destroy all flesh. With respect to the covenant itself, as a charter of natural blessings and mercies ("the World's covenant, not the Church's"), re-establishing the peace and order of Physical Nature, which in the flood had undergone so great a convulsion, see Davison *On Prophecy*, lect. iii. p. 76-80. With respect to the token of the covenant, the right interpretation of Gen. ix. 13 seems to be that God took the rainbow, which had hitherto been but a beautiful object shining in the heavens when the sun's rays fell on falling rain, and consecrated it as the sign of His love and the witness of His promise.

The following passages, Num. xiv. 4; 1 Sam. xii. 13; 1 K. ii. 35, are instances in which קָשַׁף (*adtham*, lit. "give"), the word used in Gen. ix. 13, "I do set my bow in the cloud," is employed in the sense of "constitute," "appoint." Accordingly there is no reason for concluding that ignorance of the natural cause of the rainbow occasioned the account given of its institution in the Book of Genesis.

The figurative and symbolical use of the rainbow as an emblem of God's mercy and faithfulness must not be passed over. In the wondrous vision

\* The word "month" is supplied by our translators, and their rendering is not supported by either the LXX. (*καὶ οὐκ ἐπεσοῦντο*) or the Vulg. (*sicut in principio*). Another interpretation is indeed equally probable; but

the following passages, Gen. viii. 13, Num. ix. 8, *Ex.* xxix. 17, xlv. 18, 21, justify the rendering קָשַׁף "in the first (month)."

down to St. John in the Apocalypse (Rev. iv. 3), it is said that "there was a rainbow round about the throne, in sight like unto an emerald;" amidst the awful vision of surpassing glory is seen the symbol of Hope, the bright emblem of Mercy and of Love. "Look upon the rainbow," saith the son of Sirach (Ecclesi. xliii. 11, 12), "and praise Him that made it: very beautiful it is in the brightness thereof; it compasseth the heaven about with a glorious circle, and the hands of the most High have bended it." [E. P. E.]

RAISINS. [VINE.]

RA'KEM (רַקֵּם), in panse רַקֵּם 'Porku; om. in Alex.: *Recen*). Among the descendants of Machir the son of Manasseh, by his wife Maachah, are mentioned Ulam and Ilaken, who are apparently the sons of Sheresh (1 Chr. vii. 16). Nothing is known of them.

RAK'KATH (רַקַּת; [ῥακῆ] *arakē*: Alex. 'Ρεκαθ: *Recauth*). One of the fortified towns of Naphtali, named between HAMMATH and CHIN-KEETH (Josh. xix. 35). Hammath was probably at the hot springs of Tiberias; but no trace of the name of Rakkath has been found in that or any other neighbourhood. The nearest approach is *Kerak*, formerly Tarichæne, three miles further down the shore of the lake, close to the embouchure of the Jordan. [G.]

RAK'KON (רַקֹּן, with the def. article: 'Ρεκακων: *Areckon*). One of the towns in the inheritance of Dan (Josh. xix. 46), apparently not far distant from Joppa. The LXX. (both MSS.) give only one name (that quoted above) for this and Me-jurkon, which in the Hebrew text precedes it. This fact, when coupled with the similarity of the two names in Hebrew, suggests that the one may be merely a repetition of the other. Neither has been yet discovered. [G.]

RAM (רָם: 'Apdu; Alex. 'Aḥḥar in Ruth; 'Opdu and 'Apdu in 1 Chr.: *Aran*). 1. Son of Hezron and father of Aminadab. He was born in Egypt after Jacob's migration there, as his name is not mentioned in Gen. xvi. 4. He first appears in Ruth iv. 19. The genealogy in 1 Chr. ii. 9, 10, 25, adds no further information concerning him, except that he was the second son of Hezron, Jerahmeel being the first-born. He appears in the N. T. only in the two lists of the ancestry of Christ (Matt. i. 3, 4; Luke iii. 33), where he is called ARAM, after the LXX. and Vulgate. [AMMINADAB; NAHSHON.] [A. C. H.]

2. ('Pdu: *Ram*.) The first-born of Jerahmeel, and therefore nephew of the preceding (1 Chr. ii. 25, 27). He had three sons, Manaz, Jamin, and Eker.

3. Elihu, the son of Barachel the Buzite, is described as "of the kindred of Rama" (Job

RAM, BATTERING

xxiii. 2). Rashi's note on the passage is curious: "'of the family of Ram,' Abraham, for it is said, 'the greatest man among the Amekim' (Josh. xiv.) this [is] Abraham." Ewald identifies Ram with Aram, mentioned in Gen. xlii. 21 in connection with Huz and Buz (*Gen. l. 414*). Elihu would then be a collateral descendant of Abraham, and this may have suggested the extraordinary explanation given by Rashi. [W. A. W.]

RAM. [SHEEP; SACRIFICES.]

RAM, BATTERING (רָם: *Babbaras*, *χρῆμα*: *aries*). This instrument of assault operations is twice mentioned in the O. T. (Is. lv. 2, xli. 22 [27]); and as both references are to the battering-rams in use among the Assyrians and Babylonians, it will only be necessary to describe those which are known from the monuments to have been employed in their sieges. With regard to the meaning of the Hebrew word there is no little doubt. It denotes an engine of war which was called a ram, either because it had an iron head shaped like that of a ram, or because, when used for battering down a wall, the movement was like the butting action of a ram.

In attacking the walls of a fort or city, the first step appears to have been to form an inclined plane or bank of earth (comp. Ex. iv. 2, "and a mound against it"), by which the besiegers could bring their battering-rams and other engines to the foot of the walls. "The battering-rams," says Mr. Lepach, "were of several kinds. Some were joined to moveable towers which held warriors and armed men. The whole then formed one great temporary building, the top of which is represented in sculptures as on a level with the walls, and some towers, of the besieged city. In some instances the battering-ram is without wheels; it was then per-

BATTERING RAM.

lugs constructed upon the spot, and was not intended to be moved. The moveable tower was probably sometimes unprovided with the ram, but I have not met with it so represented in the sculptures. . . . . When the machine containing the battering-ram was a simple framework, and did not form an artificial tower, a cloth or some kind of drapery, edged with fringes and otherwise ornamented, appears to have been occasionally thrown over it. Sometimes it may have been covered with hides. It moved either on four or on six wheels, and was provided with one ram or with two. The mode of working the rams cannot be determined from the Assyrian sculptures. It may be presumed, from the representations in the bas-reliefs, that they were partly suspended by a rope fastened to the outside of the machine, and that men directed and impelled them from within. Such was the plan adopted by the Egyptians, in whose paintings the warriors working the ram may be seen through the frame. Sometimes this engine was ornamented by a carved or painted figure of the presiding divinity, kneeling on one knee and drawing a bow. The artificial tower was usually occupied by two warriors: one discharged his arrows against the besieged, whom he was able, from his lofty position, to harass more effectually than if he had been below; the other held up a shield for his companion's defence. Warriors are not unfrequently represented as stepping from the machine to the battlements. . . . . Archers on the walls hurled stones from slings, and discharged their arrows against the warriors in the artificial towers; whilst the rest of the besieged were no less active in endeavouring to frustrate the attempts of the assailants to make breaches in their walls. By dropping a doubled chain or rope from the battlements, they caught the ram, and could either destroy its efficacy altogether, or break the force of its blows. Those below, however, by placing hooks over the engine, and throwing their whole weight upon them, struggled to retain it in its place. The besieged, if unable to displace the battering-ram, sought to destroy it by fire, and threw lighted torches or fire-brands upon it; but water was poured upon the flames through pipes attached to the artificial tower" (*Nineveh and its Remains*, ii. 367-370). [W. A. W.]

**RAMA** (*Pamā: Rama*), Matt. ii. 18, referring to Jer. xxi. 15. The original passage alludes to a massacre of Benjamites or Ephraimites (comp. ver. 9, 18), at the Ramah in Benjamin or in Mount Ephraim. This is seized by the Evangelist and turned into a touching reference to the slaughter of the Innocents at Bethlehem, near to which was (and is) the sepulchre of Rachel. The name of Rama is alleged to have been lately discovered attached to a spot close to the sepulchre. If it existed there in St. Matthew's day, it may have prompted his allusion, though it is not necessary to suppose this, since the point of the quotation does not lie in the name Ramah, but in the lamentation of Rachel for the children, as is shown by the change of the *uiois* of the original *α τέκνα*. [G.]

<sup>a</sup> So Rir H. C. Rawlinson, in *Athenaeum*, No. 1799, p. 530.

<sup>b</sup> Its place in the list of Joshua (mentioned above), viz. between Gibeon and Beeroth, suits the present *Ram-Atiah*; but the considerations named in the text make it very difficult to identify any other site with it than *er-Rām*.

<sup>c</sup> In his commentary on Uss. v. 2, Jerome mentions

**RAMAH** (רָמָה, with the definite article, excepting a few cases named below). A word which in its simple or compound shape forms the name of several places in the Holy Land; one of those which, like Gibeon, Geba, Gibeon, or Mirseph, betrays the aspect of the country. The lexicographers with unanimous consent derive it from a root which has the general sense of elevation—a root which produced the name of Aram,<sup>a</sup> "the high lands," and the various modifications of Ram, Ramah, Ramath, Ramoth, Remeth, Ramathaim, Arimathaea, in the Biblical records. As an appellative it is found only in one passage (Ex. xvi. 24-39), in which it occurs four times, each time rendered in the A. V. "high place." But in later Hebrew *ramtha* is a recognized word for a hill, and as such is employed in the Jewish versions of the Pentateuch for the rendering of Pisgah.

1. (*Pāma; Pāmā; Bāmā*, &c.; Alex. *Ῥαμα*, *Ῥαμμα*; *Pāma: Rama*.) One of the cities of the allotment of Benjamin (Josh. xviii. 25), a member of the group which contained Gibeon and Jerusalem. Its place in the list is between Gibeon and Beeroth. There is a more precise specification of its position in the invaluable catalogue of the places north of Jerusalem which are enumerated by Isaiah as disturbed by the gradual approach of the king of Assyria (Is. x. 28-32). At Michmash he crosses the ravine; and then successively dislodges or alarms Geba, Ramah, and Gibeon of Saul. Each of these may be recognized with almost absolute certainty at the present day. Geba is *Jeba*, on the south brink of the great valley; and a mile and a half beyond it, directly between it and the main road to the city, is *er-Rām* (its name the exact equivalent of *ha-Rāmah*) on the elevation which its ancient name implies.<sup>b</sup> Its distance from the city is two hours, i. e. five English or six Roman miles, in perfect accordance with the notice of Eusebius and Jerome in the *Onomasticon* ("Rama";<sup>c</sup> and nearly agreeing with that of Josephus (*Ant.* viii. 12, §3), who places it 40 stadia north of Jerusalem.

Its position is also in close agreement with the notices of the Bible. The palm-tree of Deborah (Judg. iv. 5) was "between Ramah<sup>d</sup> and Bethel," in one of the sultry valleys enclosed in the limestone hills which compose this district. The Levite and his concubine in their journey from Bethlehem to Ephraim passed Jerusalem, and pressed on to Gibeon, or even if possible beyond it to Ramah (Judg. xix. 13). In the struggles between north and south, which followed the disruption of the kingdom, Ramah, as a frontier town, the possession of which gave absolute command of the north road from Jerusalem (1 K. xv. 17), was taken, fortified, and retaken (*ibid.* 21, 22; 2 Chr. xvi. 1, 5, 6).

After the destruction of Jerusalem it appears to have been used as the dépôt for the prisoners (Jer. xl. 1); and, if the well-known passage of Jeremiah (xxxi. 15), in which he introduces the mother of the tribe of Benjamin weeping over the loss of her children, alludes to this Ramah, and not to one nearer to her sepulchre at Bethlehem, it was pro-

Rama as "juxta Gabaa in septimo lapide a Jerusalem sita."

<sup>d</sup> The Targum on this passage substitutes for the Palm of Deborah, Ataroth-El-borah, no doubt referring to the town of Ataroth. This has everything in its favour since *Ataria* is still found on the left hand of the north road, very nearly midway between *er-Rām* and *Bethel*.

bably also the scene of the slaughter of such of the captives as from age, weakness, or poverty, were not worth the long transport across the desert to Babylon. [RAMA.] Its proximity to Gibeah is implied in 1 Sam. xiii. 6; Hos. v. 8; Exr. ii. 26; Neh. vii. 30; the last two of which passages show also that its people returned after the Captivity. The Ramah in Neh. xi. 33 occupies a different position in the list, and may be a distinct place situated further west, nearer the plain. (This and Jer. xxi. 15 are the only passages in which the name appears without the article.) The LXX. find an allusion to Ramah in Zech. xiv. 10, where they render the words which are translated in the A. V. "and shall be lifted up (הִנֵּה), and inhabited in her place," by "Ramah shall remain upon her place."

*Er-Ram* was not unknown to the mediæval travellers, by some of whom (e. g. Brocardus, *Descr.* ch. vii.) it is recognized as Ramah, but it was reserved for Dr. Robinson to make the identification certain and complete (*Bib. Res.* i. 576). He describes it as lying on a high hill, commanding a wide prospect—a miserable village of a few half-deserted houses, but with remains of columns, squared stones, and perhaps a church, all indicating former importance.

In the catalogue of 1 Esdr. v. (20) the name appears as *CIRAMA*.

2. (*Ἀραθὰ* in both MSS., except only 1 Sam. xxi. 1, xxviii. 3, where the Alex. has *Ῥαμὰ*). The home of Elkannah, Samuel's father (1 Sam. i. 19, ii. 11), the birth-place of Samuel himself, his home and official residence, the site of his altar (vii. 17, viii. 4, xv. 34, xvi. 13, xix. 18), and finally his burial-place (xv. 1, xxviii. 3). In the present instance it is a contracted form of *RAMATHAIM-ZOPHTIM*, which in the existing Hebrew text is given at length but once, although the LXX. exhibit *Armathaim* on every occasion.

All that is directly said as to its situation is that it was in Mount Ephraim (1 Sam. i. 1), and this would naturally lead us to seek it in the neighbourhood of Shechem. But the whole tenor of the narrative of the public life of Samuel (in connexion with which alone this Ramah is mentioned) is so restricted to the region of the tribe of Benjamin, and to the neighbourhood of Gibeah the residence of Saul, that it seems impossible not to look for Samuel's city in the same locality. It appears from 1 Sam. vii. 17 that his annual functions as prophet and judge were confined to the narrow round of Bethel, Gilgal, and Mizpeh—the first the north boundary of Benjamin, the second near Jericho at its eastern end, and the third on the ridge in more modern times known as Scopus, overlooking Jerusalem, and therefore near the southern confines of Benjamin. In the centre of these was Gibeah of Saul, the royal residence during the reign of the first king, and the centre of his operations. It would be doing a violence to the whole of this part of the history to look for Samuel's residence outside these narrow limits.

On the other hand, the boundaries of Mount Ephraim are nowhere distinctly set forth. In the

mouth of an ancient Hebrew the expression would mean that portion of the mountainous district which was at the time of speaking in the possession of the tribe of Ephraim. "Little Benjamin" was in so long in close alliance with and dependence on its more powerful kinsman, that nothing is more probable than that the name of Ephraim may have been extended over the mountainous region which was allotted to the younger son of Rachel. (Of this there are not wanting indications. The palm-tree of Deborah was "in Mount Ephraim," between Bethel and Ramah, and is identified with great plausibility by the author of the Targum on Job. iv. 5 with Ataroth, one of the landmarks on the south boundary of Ephraim, which still survives in *Ḍāra*, 2½ miles north of Ramah of Benjamin (or *Rām*). Bethel itself, though in the catalogue of the cities of Benjamin (Josh. xviii. 27), was appropriated by Jerusalem as one of its old sanctuaries, and is one of the "cities of Mount Ephraim" which were taken from him by Baasha and restored by Asa (2 Chr. xiii. 19, sv. 8). Jeremiah (ch. xxi.) connects Ramah of Benjamin with Mount Ephraim (vers. 6, 9, 15, 18).

In this district, tradition, with a truer instinct than it sometimes displays, has placed the residence of Samuel. The earliest attempt to identify it is in the *Onomasticon* of Eusebius, and was not so happy. His words are, "Armathem Sephas: the city of Helkana and Samuel; it lies near <sup>1</sup> (ἐκπρὸς) Diospolis: thence came Joseph, in the Gospels said to be from Arimathæa." Diospolis is Lydda, the modern *Lidd*, and the reference of Eusebius is no doubt to *Ramleh*, the well-known modern town, two miles from *Lidd*. But there is a fatal obstacle to this identification, in the fact that *Ramleh* ("the sandy") lies on the open face of the marginal plain, and cannot in any sense be said to be in Mount Ephraim, or any other mountainous district. Eusebius possibly refers to another Ramah named in Neh. xi. 33 (see below, No. 6).

But there is another tradition, that just alluded to, common to Moslems, Jews, and Christians, up to the present day, which places the residence of Samuel in the lofty and remarkable eminence of *Nebly Samuel*, which rises four miles to the N.W. of Jerusalem and which its height (greater than that of Jerusalem itself), its commanding position, and its peculiar shape, render the most conspicuous object in all the landscapes of that district, and make its names of Ramah and Zophim exceedingly appropriate to it. The name first appears in the tract of Arculf (A.D. cir. 700), who calls it *Saint Samuel*. Before that date the relics of the Prophet had been transported from the Holy Land to France by the emperor Arcadius (see Jerome *cont.* Epiphanius, §5), and Justinian had enlarged or completed "a well and a wall" for the sanctuary (Procopius, *de Aedif.* v. cap. 9). True, neither of these notices show the spot, but they imply that it was well known, and so far support the placing it at *Nebly Samuel*. Even the days of Arculf the tradition appears to have been continuous (see the quotations in *Not. &c.* i. 248; Tobler, 881, &c.). The modern village, though miserable even among the wretched collections of

render the words "on the hill under the tomb of Isaac" Eusebius, in the *Onomasticon* (*Ῥαμὰ*, *ἐκπρὸς* *Ῥαμὰ*) as the "city of Saul."

<sup>1</sup> Jerome agrees with Eusebius in his translation of this passage; but in the *Epitaphium Pauli* (*Epiphanius*) connects Ramleh with Arimathæa only, and from its head proceeds a Lydda.

\* This passage may either be translated (with Junius, Michaels, De Wette, and Bunsen), "Saul abode in Gibeah under the tamarisk on the height" (in which case it will add one to the scanty number of cases in which the word is used otherwise than as a proper name), or it may imply that Ramah was included within the precincts of the king's city. The LXX. read *Rama* for *Ramah*, and

hills which crown the hills in this neighbourhood, bears marks of antiquity in cisterns and other traces or former habitation. The mosque is said to stand on the foundations of a Christian church, probably that which Justinian built or added to. The ostensible tomb is a mere wooden box; but below it is a cave or chamber, apparently excavated, like that of the patriarchs at Hebron, from the solid rock of the hill, and, like that, closed against all access except by a narrow aperture in the top, through which devotees are occasionally allowed to transmit their lamps and petitions to the sacred vault below.

Here, then, we are inclined, in the present state of the evidence, to place the Ramah of Samuel.<sup>8</sup> And there probably would never have been any resistance to the traditional identification if it had not been thought necessary to make the position of Ramah square with a passage with which it does not seem to the writer to have necessarily any connexion. It is usually assumed that the city in which Saul was anointed by Samuel (1 Sam. ix. x.) was Samuel's own city Ramah. Josephus certainly (*Ant.* vi. 4, §1) does give the name of the city as Armathem, and in his version of the occurrence implies that the Prophet was at the time in his own house; but neither the Hebrew nor the LXX. contains any statement which confirms this, if we except the slender fact that the "land of Zuph" (ix. 5) may be connected with the Zophim of Ramathaim-zophim. The words of the maidens (ver. 12) may equally imply either that Samuel had just entered one of his cities of circuit, or that he had just returned to his own house. But, however this may be, it follows from the minute specification of Saul's route in 1 Sam. x. 2, that the city in which the interview took place was near the sepulchre of Rachel, which, by Gen. xxxv. 16, 19 and other reasons, appears to be fixed with certainty as close to Bethlehem. And this supplies a strong argument against its being Ramathaim-zophim, since, while Mount Ephraim, as we have endeavoured already to show, extended to within a few miles north of Jerusalem, there is nothing to warrant the supposition that it ever reached so far south as the neighbourhood of Bethlehem. Saul's route will be most conveniently discussed under the head of SAUL; but the question of both his outward and his homeward journey, minutely as they are detailed, is beset with difficulties, which have been increased by the assumptions of the commentators. For instance, it is usually taken for granted that his father's house, and therefore the starting-point of his wanderings, was Gibeah. True, Saul himself, after he was king, lived at Gibeah; but the residence of Kish would appear to have been at ZELA,<sup>9</sup> where his family sepulchre was (2 Sam. xxi. 14), and of Zela no trace has yet been found. The Authorized Version has added to the difficulty by introducing the word "meet" in x. 3 as the translation of the term which they have more accurately rendered "find" in the preceding verse. Again, where was the "hill of God," the *gibeah-*

*Eloah*, with the *netiv*<sup>1</sup> of the Philistines? A *netiv* of the Philistines is mentioned later in Saul's history (1 Sam. xlii. 8) as at Geba opposite Michmash. But this is three miles north of Gibeah of Saul, and does not at all agree with a situation near Bethlehem for the anointing of Saul. The Targum interprets the "hill of God" as "the place where the ark of God was," meaning Kirjath-jearim.

On the assumption that Ramathaim-zophim was the city of Saul's anointing, various attempts have been made to find a site for it in the neighbourhood of Bethlehem. (a) Gesenius (*Thes.* 1276a) suggests the *Jebel Furidid*, four miles south-east of Bethlehem, the ancient Herodium, the "Frank mountain" of more modern times. The drawback to this suggestion is that it is not supported by any hint or inference either in the Bible, Josephus (who was well acquainted with the Herodian), or more recent authority. (b) Dr. Robinson (*Bib. Res.* ii. 8) proposes *Saba*, in the mountains six miles west of Jerusalem, as the possible representative of Zophim: but the hypothesis has little besides its ingenuity to recommend it, and is virtually given up by its author in a foot-note to the passage. (c) Van de Velde (*Syr. & Pal.* ii. 50), following the lead of Wolcott, argues for *Rameh* (or *Ramet el-Khalil*, Rob. i. 216), a well-known site of ruins about two and a half miles north of Hebron. His main argument is that a castle of S. Samuel is mentioned by F. Fabri in 1483<sup>2</sup> (apparently) as north of Hebron; that the name *Rameh* is identical with Ramah; and that its position suits the requirements of 1 Sam. x. 2-5. This is also supported by Stewart (*Tent and Khan*, 247). (d) Dr. Bonar (*Land of Promise*, 178, 554) adopts *er-Ram*, which he places a short distance north of Bethlehem, east of Rachel's sepulchre. Eusebius (*Onom.* "Paßeld") says that "Kama of Benjamin" is near (wepl) Bethlehem, where the "voice in Rama was heard;" and in our times the name is mentioned, besides Dr. Bonar, by Prokensch and Salzbacher (cited in Rob. R. R. ii. 8 note), but this cannot be regarded as certain, and Dr. Stewart has pointed out that it is too close to Rachel's monument to suit the case.

Two suggestions in an opposite direction must be noticed:—

(a) That of Ewald (*Geschichte*, ii. 550), who places Ramathaim-zophim at *Ram-ahsh*, a mile west of *el-Bireh*, and nearly five north of *Neby Samuil*. The chief ground for the suggestion appears to be the affix *Alsh*, as denoting that a certain sanctity attaches to the place. This would be more certainly within the limits of Mount Ephraim, and merits investigation. It is mentioned by Mr. Williams (*Dict. of Geogr.* "Ramatha") who, however, gives his decision in favour of *Neby Samuil*.

(b) That of Schwarz (152-158), who, starting from Gibeah-of-Saul as the home of Kish, fixes upon *Rameh* north of Samaria and west of *Samur*, which he supposes also to be Ramoth or Jarmuth,

Stewart, *Tent and Khan*, 247; Van de Velde, *Memoir* kc. &c.).

<sup>1</sup> The meaning of this word is uncertain. It may signify a garrison, an officer, or a commemorative column—a trophy.

<sup>2</sup> In the time of Benjamin of Tudela it was known as the "house of Abraham" (*B. of T.* ed. Asher, § 93).

<sup>8</sup> "Bethoron and her suburbs" were allotted to the Kohathite Levites, of whom Samuel was one by descent. Perhaps the village on the top of Neby Samuil may have been dependent on the more regularly fortified Bethoron (1 K. ix. 17).

<sup>9</sup> Zela (צל) is quite a distinct name from Zelaach (צלח), with which name would identify it (c. gr.

the Levitical<sup>2</sup> city of Issachar. Schwarz's arguments must be read to be appreciated.

3. ('Αραῖα; Alex. 'Ραμα: Arama.) One of the nineteen fortified places of Naphtali (Josh. xix. 36) named between Adamah and Hazor. It would appear, if the order of the list may be accepted, to have been in the mountainous country N.W. of the Lake of Gennesareth. In this district a place bearing the name of *Rameh* has been discovered by Dr. Robinson (*B. R.* iii. 78), which is not improbably the modern representative of the Ramah in question. It lies on the main track between Akha and the north end of the Sea of Galilee, and about eight miles E.S.E. of Safed. It is, perhaps, worth notice that, though the spot is distinguished by a very lofty brow, commanding one of the most extensive views in all Palestine (Rob. 78), and answering perfectly to the name of Ramah, yet that the village of *Rameh* itself is on the lower slope of the hill.

4. ('Ραμᾶ: Horma.) One of the landmarks on the boundary (A. V. "coast") of Asher (Josh. xix. 29), apparently between Tyre and Zidon. It does not appear to be mentioned by the ancient geographers or travellers, but two places of the same name have been discovered in the district allotted to Asher; the one east of Tyre, and within about three miles of it (Van de Velde, *Map, Memoir*), the other more than ten miles off, and south-east of the same city (Van de Velde, *Map*; Robinson, *B. R.* iii. 64). The specification of the boundary of Asher is very obscure, and nothing can yet be gathered from it; but, if either of these places represent the Ramah in question, it certainly seems safer to identify it with that nearest to Tyre and the sea-coast.

5. ('Ραμμαθ, Alex. 'Ραμωθ; 'Ραμδ in both cases: Ramoth.) By this name in 2 K. viii. 29 and 2 Chr. xxi. 6, only, is designated RAMOTH-GILEAD. The abbreviation is singular, since, in both cases, the full name occurs in the preceding verse.

6. A place mentioned in the catalogue of those re-inhabited by the Benjamites after their return from the Captivity (Neh. xi. 33). It may be the Ramah of Benjamin (above, No. 1) or the Ramah of Samuel, but its position in the list (remote from Geba, Michmash, Bethel, ver. 31, comp. Ezr. ii. 26, 28) seems to remove it further west, to the neighbourhood of Lod, Hadid, and Ono. There is no further notice in the Bible of a Ramah in this direction, but Eusebius and Jerome allude to one, though they may be at fault in identifying it with Ramathaim and Arimathæa (*Onom.* "Arimathæa Sephim;" and the remarks of Robinson, *B. R.* ii. 259). The situation of the modern *Ramleh* agrees very well with this, a town too important and too well placed not to have existed in the ancient times.<sup>3</sup> The consideration that *Ramleh* signifies "sand," and Ramah "a height," is not a valid argument against the one being the legitimate successor of the other. If so, half the identifications of modern travellers must be reversed. *Beit-ur* can no longer be the representative of Beth-horon, because *ur* means "eye," while *horon* means

<sup>2</sup> But Ramoth was allotted to the Gerahonites, while Sammel was a Kohathite.

<sup>3</sup> For the preceding name — Adamah — they give *Αραμδ*.

<sup>4</sup> This is evidenced by the attempts of Benjamin of Tudela and others to make out Ramleh to be Gaib. *Sezer, &c.*

## RAMATH OF THE SOUTH

"eyes;" nor *Beit-lahn*, of Bethlehem, because *lahm* is "Besh," and *lehem* "bread;" nor *Beit-ur* of Elealeh, because *ur* is in Arabic the article, and in Hebrew the name of God. In these cases the tendency of language is to retain the sound at the expense of the meaning.

[9.]

RAMATH-LEHI (רַמַּת לֶחִי; 'Αραῖα: *Aravias* *αἰαῖος*; *Ramathlechi*, *qual interpretatur elevatis maxillis*). The name which purports to have been bestowed by Samson on the scene of his slaughter of the thousand Philistines with the jaw-bone (*Judg.* xv. 17). "He cast away the jaw-bone out of his hand, and called that place 'Ramath-lehi,'"—as if "heaving of the jaw-bone." In this sense the name (wisely left untranslated in the A. V.) is rendered by the LXX. and Vulgate (as above). But Gesenius has pointed out (*Thes.* 752a) that to be consistent with this the vowel points should be altered, and the words become רַמַּת לֶחִי; and that as they at present stand they are exactly parallel to *Ramath-mizpeh* and *Ramath-negeb*, and mean the "height of Lechi." If we met with a similar account in ordinary history we should say that the name had already been *Ramath-lehi*, and that the writer of the narrative, with that fondness for *paronomasia* which distinguishes these ancient records, had indulged himself in connecting the name with a possible exclamation of his hero. But the fact of the positive statement in this case may make us hesitate in coming to such a conclusion in less authoritative records.

[9.]

RAMATH-MIZPEH (רַמַּת מִצְפֶּה; with def. article: 'Αραβὴ κατὰ τὴν Μασσφῆ; Alex. 'Ραμωθ\* κ. τ. Μασφα: *Ramath, Mizpeh*). A place mentioned, in Josh. xiii. 29 only, in the specification of the territory of Gad, apparently as one of its northern landmarks, Heshbon being the limit to the south. But of this our ignorance of the topography east of the Jordan forbids us to speak at present with any certainty.

There is no reason to doubt that it is the same place with that early sanctuary at which Jacob and Ladan set up their cairn of stones, and which received the names of MIZPEH, Gilead, and Jegar Sahadutha; and it seems very probable that all these are identical with *Ramoth-Gilead*, so common in the later history of the nation. In the Books of Maccabees it probably appears in the garb of *Mizpeh* (1 Macc. v. 35), but no information is afforded as to its position in either Old Test. or Apocrypha as to its position. The lists of places in the districts north or south collected by Dr. Eli Smith, and given by Dr. Robinson (*B. R.* 1st edit. App. to vol. iii.), contain several names which may retain a trace of *Ramoth*, viz. *Ramothin* (1676), *Reimoth* (1684), *Ramoth* (1684), but the situation of these places is not accurately known, and it is impossible to say whether they are appropriate to *Ramoth-Mizpeh* or not.

[10.]

RAMATH OF THE SOUTH (רַמַּת הַיָּם; with def. article: 'Αραβὴ κατὰ τὴν Ἰβή; Alex. by double tann. *Yeph*

<sup>5</sup> This reading of Ramoth for Ramath is countenanced by one Hebrew MS. collated by Krenkel. It is also followed by the Vulgate, which gives *Ramoth*, *Mizpeh* (the reading in the text is from the *Septuaginta*). On the other hand there is no want whatever for separating the two words, as it being in distinct places, as is done in both the last cases.

παλαιά . . . αὐτὴ κ.λ.: *Ramah contra australem plagam*), more accurately Ramah of the South. One of the towns in the allotment of Simeon (Josh. xix. 8), apparently at its extreme south limit. It appears from this passage to have been another name for BAALATH-BEER. Ramah is not mentioned in the list of Judah (comp. Josh. xv. 21-32), nor in that of Simeon in 1 Chr. iv. 28-33, nor is it mentioned by Eusebius and Jerome. Van de Velde (*Memoir*, 342) takes it as identical with Ramath-Lehi, which he finds at *Tell el-Lekiyeh*; but this appears to be so far south as to be out of the circle of Samson's adventures, and at any rate must wait for further evidence.

It is in all probability the same place as SOUTH RAMOTH (1 Sam. xxx. 27), and the towns in company with which we find it in this passage confirm the opinion given above that it lay very much to the south. [G.]

#### RAMATHAIM-ZOPHIM (רַמַּתַּיִם צוֹפִים):

Ῥαμαθαιμ Ζοφίμ; Alex. A. Ζωφίμ: *Ramathaim Zophim*). The full form of the name of the town in which Elkanah, the father of the prophet Samuel, resided. It is given in its complete shape in the Hebrew text and A. V. but once (1 Sam. i. 1). Elsewhere (1. 19, ii. 11, vii. 17, viii. 4, xv. 34, xvi. 13, xix. 18, 19, 22, 23, xx. 1, xxv. 1, xxviii. 3) it occurs in the shorter form of Ramah. [RAMAH, 2.] The LXX., however (in both M.S.), give it throughout as Armathaim, and insert it in i. 3 after the words "his city," where it is wanting in the Hebrew and A. V.

Ramathaim, if interpreted as a Hebrew word, is dual—"the double eminence." This may point to a peculiarity in the shape or nature of the place, or may be an instance of the tendency, familiar to all students, which exists in language to force an archaic or foreign name into an intelligible form. This has been already remarked in the case of Jerusalem (vol. i. 982a); and, like that, the present name appears in the form of RAMATHEM, as well as that of Ramathaim.

Of the force of "Zophim" no feasible explanation has been given. It was an ancient name on the east of Jordan (Num. xxiii. 14), and there, as here, was attached to an eminence. In the Targum of Jonathan, Ramathaim-zophim is rendered "Ramatha of the scholars of the prophets;" but this is evidently a late interpretation, arrived at by regarding the prophets as watchmen (the root of *zophim*, also that of *mizpeh*, having the force of looking out afar), coupled with the fact that at Naioth in Ramah there was a school of prophets. It will not escape observation that one of the ancestors of Elkanah was named Zophai or Zuph (1 Chr. vi. 28, 35), and that when Saul approached the city in which he encountered Samuel he entered the land of Zuph; but no connexion between these names and that of Ramathaim-zophim has yet been established.

Even without the testimony of the LXX. there is no doubt, from the narrative itself, that the Ramah of Samuel—where he lived, built an altar, died, and was buried—was the same place as the Ramah or Ramathaim-Zophim in which he was born. It is implied by Josephus, and affirmed by Eusebius and Jerome in the *Onomasticon* ("Armuthem Seipha"), nor would it ever have been questioned had there not been other Ramahs mentioned in the sacred history.

Of its position nothing, or next to nothing, can

be gathered from the narrative. It was in Mount Ephraim (1 Sam. i. 1). It had apparently attached to it a place called NAIOTH, at which the "company" (or "school," as it is called in modern times) of the sons of the prophets was maintained (xix. 18, &c., xx. 1); and it had also in its neighbourhood (probably between it and Gibeah-of-Saul) a great well known as the well of Has-Sechu (xix. 22). [SECHU.] But unfortunately these scanty particulars throw no light on its situation. Naioth and Sechu have disappeared, and the limits of Mount Ephraim are uncertain. In the 4th century Ramathaim-Zophim (*Onomasticon*, "Armutha-sophim") was located near Diospolis (Lydda), probably at Ramleh; but that is quite untenable, and quickly disappeared in favour of another, probably older, certainly more feasible tradition, which placed it on the lofty and remarkable hill four miles N.W. of Jerusalem, known to the early pilgrims and Crusaders as Saint Samuel and Mont Joye. It is now universally designated *Nebv Samu'el*—the "Prophet Samuel"; and in the mosque which crowns its long ridge (itself the successor of a Christian church), his sepulchre is still revered alike by Jews, Moslems, and Christians.

There is no trace of the name of Ramah or Zophim having ever been attached to this hill since the Christian era, but it has borne the name of the great Prophet certainly since the 7th century, and not improbably from a still earlier date. It is not too far south to have been within the limits of Mount Ephraim. It is in the heart of the district where Saul resided, and where the events in which Samuel took so large a share occurred. It completes the circle of the sacred cities to which the Prophet was in the habit of making his annual circuit, and which lay—Bethel on the north, Mizpeh\* on the south, Gilgal on the east, and (if we accept this identification) Ramathaim-zophim on the west—round the royal city of Gibeah, in which the King resided who had been anointed to his office by the Prophet amid such universal expectation and good augury. Lastly, as already remarked it has a tradition in its favour of early date and of great persistence. It is true that even these grounds are but slight and shifting, but they are more than can be brought in support of any other site; and the task of proving them fallacious must be undertaken by those who would disturb a tradition so old, and which has the whole of the evidence, slight as that is, in its favour.

This subject is examined in greater detail, and in connexion with the reasons commonly alleged against the identification, under RAMAH, No. 2. [G.]

RAMATHEM (Ῥαμαθαιμ, Mai and Alex.; Joseph. *Ῥαμαθὰ*: *Ramathan*). One of the three "governments" (πολὶς and *τοῦραρχία*) which were added to Judaea by king Demetrius Nicator, out of the country of Samaria (1 Macc. xi. 34.; the others were Apherema and Lydia. It no doubt derived its name from a town of the name of RAMATHAIM, probably that renowned as the birthplace of Samuel the Prophet, though this cannot be stated with certainty. [G.]

#### RAMATHITE, THE (רַמַּתִּי: ῥαμαθῖται);

Alex. ῥαμαθῖται: *Romathites*). Shimei the Ramathite had charge of the royal vineyards of King David (1 Chr. xxvii. 27). The name implies that he

\* On the ridge of Scopus, according to the opinion of the writer (see *MIZPEH*, p. 300).

was native of a place called Ramah, but of the various Ramahs mentioned none is said to have been remarkable for vines, nor is there any tradition or other clue by which the particular Ramah to which this worthy belonged can be identified. [G.]

**RAMESSES** (רַמֶּסֶס: 'Ραμεσσῆ: *Rameses*), or **RAAM'SES** (רַאמְסֵס: 'Ραμεσσῆ: *Rameses*), a city and district of Lower Egypt. There can be no reasonable doubt that the same city is designated by the *Rameses* and *Rameses* of the Heb. text, and that this was the chief place of the land of *Rameses*, all the passages referring to the same region. The name is Egyptian, the same as that of several kings of the empire, of the xviii, xix, and xxth dynasties. In Egyptian it is written RA-MESES or RA-MSES, it being doubtful whether the short vowel understood occurs twice or once: the first vowel is represented by a sign which usually corresponds to the Hebrew *U*, in Egyptian transcriptions of Hebrew names, and Hebrew, of Egyptian.

The first mention of *Rameses* is in the narrative of the settling by Joseph of his father and brethren in Egypt, where it is related that a possession was given them "in the land of *Rameses*" (Gen. xlvii. 11). This land of *Rameses*, רַמֶּסֶס אֶרֶץ, either corresponds to the land of Goshen, or was a district of it, more probably the former, as appears from a comparison with a parallel passage (6). The name next occurs as that of one of the two cities built for the Pharaoh who first oppressed the children of Israel. "And they built for Pharaoh treasure cities (עָרֵי מִסְכָּנֹת), Pithom and Raames" (Ex. i. 11). So in the A. V. The LXX., however, reads *πόλεις θυμυδς*, and the Vulg. *urbes tabernaculorum*, as if the root had been שָׁכַן. The signification of the word מִסְכָּנֹת is decided by its use for storehouses of corn, wine, and oil, which Hezekiah had (2 Chr. xxxii. 28). We should therefore here read store-cities, which may have been the meaning of our translators. The name of PITHOM indicates the region near Heliopolis, and therefore the neighbourhood of Goshen or that tract itself, and there can therefore be no doubt that *Rameses* is *Rameses* in the land of Goshen. In the narrative of the Exodus we read of *Rameses* as the starting-point of the journey (Ex. xii. 37; see also Num. xxxiii. 3, 5).

If then we suppose *Rameses* or *Rameses* to have been the chief town of the land of *Rameses*, either Goshen itself or a district of it, we have to endeavour to determine its situation. Lepsius supposes that Aboo-Kesheyd is on the site of *Rameses* (see Map, vol. i. p. 598). His reasons are, that in the LXX. Heroöpolis is placed in the land of *Rameses* (καθ' Ἡρώων πόλιν, ἐν γῇ 'Ραμεσσῆ, or ἐν γῇ 'Ραμεσσῆ), in a passage where the Heb. only mentions "the land of Goshen" (Gen. xli. 28), and that there is a monolithic group at Aboo-Kesheyd representing Tum, and Ra, and, between them, *Rameses* II., who was probably there worshipped. There would seem therefore to be an indication of the situation of the district and city from this mention of Heroöpolis, and the statue of *Rameses* might mark a place named after that king. It must, however, be remembered (a) that the situation of Heroöpolis is a matter of great doubt, and that therefore we can scarcely take any proposed situation as an indication of that of *Rameses*; (b) that the land of *Rameses* may be that of Goshen, as already remarked,

in a case the passage would not afford any more precise indication of the position of the city *Rameses* than that it was in Goshen, as is evident from the account of the Exodus; and (c) that the mention of Heroöpolis in the LXX. would seem to be a gloss. It is also necessary to consider the evidence in the Biblical narrative of the position of *Rameses*, which seems to point to the western part of the land of Goshen, since two full marches, and part at least of a third, brought the Israelites from this town to the Red Sea; and the narrative appears to indicate a route for the chief part directly towards the sea. After the second day's journey they "encamped in Etham, in the edge of the wilderness" (Ex. xiii. 20), and on the third day they appear to have turned. If, however, *Rameses* was where Lepsius places it, the route would have been almost wholly through the wilderness, and mainly along the tract bordering the Red Sea in a southerly direction, so that they would have turned almost at once. If these difficulties are not thought insuperable, it must be allowed that they render Lepsius's theory extremely doubtful, and the one fact that Aboo-Kesheyd is within about eight miles of the ancient head of the gulf, seems to us fatal to his identification. Even could it be proved that it was anciently called *Rameses*, the case would not be made out, for there is good reason to suppose that many cities in Egypt bore this name. Apart from the ancient evidence, we may mention that there is now a place called "Rameses" or "Ramesses" in the Boheyreh (the great province on the west of the Rosetta branch of the Nile), mentioned in the list of towns and villages of Egypt in De Sacy's *Abd-allatif*, p. 664. It gave to its district the name of "Hof-Rameses" or "Rameses." This "Hof" must not be confounded with the "Hof" commonly known, which was in the district of Bilbeys.

An argument for determining under what dynasty the Exodus happened has been founded on the name *Rameses*, which has been supposed to indicate a royal builder. This argument has been stated elsewhere: here we need only repeat that the highest date to which *Rameses* I. can be reasonably assigned is consistent alone with the Rabbinical date of the Exodus, and that we find a prince of the same name two centuries earlier, and therefore at a time perhaps consistent with Usber's date, so that the place might have taken its name either from this prince, or a yet earlier king or prince *Rameses*. [CHRONOLOGY; EGYPT; PHARAOH.] [R. S. P.]

**RAMESSE** ('Ραμεσσῆ: om. in Vulg.) = **RAMESSES** (Jud. i. 9).

**RAMI'AH** (רַמִּיָּה: *Paula: Rametha*). A layman of Israel, one of the sons of Parosh, who put away his foreign wife at Ezra's command (Ezr. x. 25). He is called *HIEMAS* in 1 Ed. ix. 26.

**RAMOTH** (רָמֹת: ῥαμὸθ: *Rameth*). One of the four Levitical cities of Issachar according to the catalogue in 1 Chr. (vi. 73). In the parallel list in Joshua (xxi. 28, 29), amongst other variations, Jarmuth appears in place of Ramoth. It appears impossible to decide which is the correct reading; or whether again *REMETU*, a town of Issachar, is distinct from them, or one and the same. No place has been yet discovered which can be plausibly identified with either. [G.]

**RAMOTH** (רָמֹת: *Rameth*; Alex. *ῥαμὸθ*: *Rameth*). An Israelite layman, of the sons of Mani

who had taken a strange wife, and at Ezra's instigation agreed to separate from her (Esr. x. 29). In the parallel passage of 1 Esdras (ca. 30) the name is given as HIEREMOTH. [G.]

RAMOTH GILEAD (רָמֹת גִּלְעָד: 'Ρεμμαθ, 'Ρεμμαθ, and 'Ραμῶθ, Γαλαδ; 'Ερεμβαλααθ; Alex. 'Ραμμαθ; Joseph. 'Αραμαθ: *Ramoth Galaad*) the "heights of Gilead." One of the great fastnesses on the east of Jordan, and the key to an important district, as is evident not only from the direct statement of 1 K. iv. 13, that it commanded the regions of Argob and of the towns of Jair, but also from the obstinacy with which it was attacked and defended by the Syrians and Jews in the reigns of Ahab, Haziah, and Joram.

It seems probable that it was identical with Ramath-Mizpeh, a name which occurs but once (Josh. xiii. 26), and which again there is every reason to believe occupied the spot on which Jacob had made his covenant with Laban by the simple rite of piling up a heap of stones, which heap is expressly stated to have borne the names of both GILEAD and MIZPEH, and became the great sanctuary of the regions east of Jordan. The variation of Ramoth and Ramath is quite feasible. Indeed, it occurs in the case of a town of Judah. Probably from its commanding position in the territory of Gad, as well as its sanctity and strength, it was chosen by Moses as the City of Refuge for that tribe. It is in this capacity that its name is first introduced (Deut. iv. 43; Josh. xx. 8, xxi. 38). We next encounter it as the residence of one of Solomon's commissariat officers, Ben-geber, whose authority extended over the important region of Argob, and the no less important district occupied by the towns of Jair (1 K. iv. 13).

In the second Syrian war Ramoth-Gilead played a conspicuous part. During the invasion related in 1 K. xv. 20, or some subsequent incursion, this important place had been seized by Benhadad I. from Omri (Joseph. *Ant.* viii. 15, §3). Ahab had been too much occupied in repelling the attacks of Syria on his interior to attempt the recovery of a place so distant, but as soon as these were at an end and he could secure the assistance of Jehoshaphat, the great and prosperous king of Judah, he planned an attack (1 K. xxii. 2; 2 Chr. xviii.). The incidents of the expedition are well known: the attempt failed, and Ahab lost his life. [JEZREEL; MICAH; NAAMAN; ZEDEKIAH.]

During Haziah's short reign we hear nothing of Ramoth, and it probably remained in possession of the Syrians till the suppression of the Moabite rebellion gave Joram time to renew the siege. He allied himself for the purpose as his father had done, and as he himself had done on his late campaign, with his relative the king of Judah. He was more fortunate than Ahab. The town was taken by Israel (Joseph. *Ant.* ix. 6, §11, and held in spite of all the efforts of Hazael (who was now on the throne of Damascus) to regain it (2 K. ix. 14). During the encounter Joram himself narrowly escaped the fate of his father, being (as we learn from the LXX. version of 2 Chr. xxii. 6, and from Jephthah's wounded by

one of the Syrian arrows, and that so severely as to necessitate his leaving the army and retiring to his palace at Jezreel (2 K. viii. 28, ix. 15; 2 Chr. xxii. 6). The fortress was left in charge of Jehu. But he was quickly called away to the more important and congenial task of rebelling against his master. He drove off from Ramoth-Gilead as if on some errand of daily occurrence, but he did not return, and does not appear to have revisited the place to which he must mainly have owed his reputation and his advancement.

Henceforward Ramoth-Gilead disappears from our view. In the account of the Gileadite campaign of the Maccabees it is not recognizable, unless it be under the name of Maspha (Mispeh). Carnaim appears to have been the great sanctuary of the district at that time, and contained the sacred close (*rémevos*) of Ashtaroth, in which fugitives took refuge (1 Macc. v. 43).

Eusebius and Jerome specify the position of Ramoth as 15 miles from Philadelphia (*Amman*). Their knowledge of the country on that side of the Jordan was however very imperfect, and in this case they are at variance with each other, Eusebius placing it west, and Jerome east of Philadelphia. The latter position is obviously untenable. The former is nearly that of the modern town of *es-Salt*,<sup>a</sup> which Gesenius (notes to Burckhardt, p. 1061) proposes to identify with Ramoth-Gilead. Ewald (*Gesch.* iii. 500 note), indeed, proposes a site further north as more probable. He suggests *Reimam*, on the northern slopes of the *Jebel Ajlén*, a few miles west of *Jerush*, and between it and the well-known fortress of *Kuldt er-Rubud*. The position assigned to it by Eusebius answers tolerably well for a site bearing the name of *Jelad* (جلاد), exactly identical with the ancient He-

brew *Gilead*, which is mentioned by Setzen (*Reimam*, March 11, 1806), and marked on his map (*Ibid.*, iv.) and that of Van de Velde (1858) as four or five miles north of *es-Salt*. And probably this situation is not very far from the truth. If Ramoth-Gilead and Ramath-Mizpeh are identical, a more northern position than *es-Salt* would seem inevitable, since Ramath-Mizpeh was in the northern portion of the tribe of Gad (Josh. xiii. 26). This view is supported also by the Arabic version of the Book of Joshua, which gives *Ramath el-Jerash*, i. e. the Gerasa of the classical geographers, the modern *Jerash*; with which the statement of the careful Jewish traveller Parehi agrees, who says that "Gilead is at present b Djenash" (Zunz in *Asher's Benjamin*, 405). Still the fact remains that the name of *Jebel Jilad*, or Mount Gilead, is attached to the mass of mountain between the *Wady Shocib* on the south, and *Wady Zerka* on the north, the highest part, the Ramoth, of which, is the *Jebel Oshu*. [G.]

RAMOTH IN GILEAD (רָמֹת בְּגִלְעָד: ῥ'Ραμῶθ ἐν Γαλαδ, Ἀραμαθ, 'Ραμμαθ Γαλαδ, Alex. 'Ραμμαθ, 'Ραμαθ: *Ramoth in Galaad*, Deut. iv. 43; Josh. xx. 8, xxi. 38; 1 K. xxii. 3.<sup>b</sup> Elsewhere the shorter form, RAMOTH GILEAD, is used.

רָמֹת בְּגִלְעָד, Jegar Sabadutha, one of the names connected with Mizpeh (Zunz, as above).

<sup>a</sup> The "in" in this last passage (though not distinguished by italics) is a mere interpolation of the translator: the Hebrew words do not contain the preposition, as they do in the three other passages, but are exactly those which elsewhere are rendered "Ramoth of Gilead."

<sup>a</sup> *Es Salt* appears to be an Arabic appropriation of the ecclesiastical name *Salton Hieracon*—the sacred forest—which occurs in lists of the episcopal cities on the East of Jordan (Reiland, *Pal.* 315, 317). It has now, as is usual in such cases, acquired a new meaning of its own—the broad Star. (Compare ELLERKER.)

<sup>b</sup> In this connection it is curious that the Jews should derive *Jamath* (which they write גִּלְעָד), by contraction, from

RAMS' HORNS. [CORNET; JUBILÉE.]

RAMS' SKINS DYED RED (רַמִּים אֵילִים)

רַמִּים אֵילִים *ṛāmīm ʾēlīm mēdōdāmīm*; δέρματα κριῶν *hēdōdāmīmēna*; *pelles arietum rubricatae*) formed part of the materials that the Israelites were ordered to present as offerings for the making of the Tabernacle (Ex. xxv. 5); of which they served as one of the inner coverings, there being above the rams' skins an outer covering of badgers' skins. [But see BADGER, App. A.]

There is no doubt that the A. V., following the LXX. and Vulgate, and the Jewish interpreters, is correct. The original words, it is true, admit of being rendered thus—"skins of red rams," in which case *mēdōdāmīm* agrees with *ēlīm* instead of *ṛāmīm* (see Ewald, *Gr.* §570). The red ram is by Ham. Smith (Kitto, *Cycl.* s. v.) identified with the Aoudad sheep (*Ammotragus Trapezoplus*; see a figure in App. A), "whose normal colour is red, from bright chestnut to rufous chocolate." It is much more probable, however, that the skins were those of the domestic breed of rams, which, as Itashi says, "were dyed red after they were prepared." [W. H.]

**RAPHA** (רָפָא; *Ṛapha*: *Rapha*). Son of Binea, among the descendants of Saul and Jonathan (1 Chr. viii. 37). He is called **REPHAIAH** in 1 Chr. ix. 43.

**RAPH'AEĒL** (רָפָאֵל = רָפָאֵל, "the divine healer"). "One of the seven holy angels which . . . go in and out before the glory of the Holy One" (Tob. xii. 15). According to another Jewish tradition, Raphael was one of the four angels which stood round the throne of God (Michael, Uriel, Gabriel, Raphael). His place is said to have been behind the throne, by the standard of Ephraim (comp. Num. ii. 18), and his name was interpreted as foreshadowing the healing of the schism of Jeroboam, who arose from that tribe (1 K. xi. 26; Buxtorf, *Lex. Tubb.* p. 47). In Tobit he appears as the guide and counsellor of Tobias. By his help Sara was delivered from her plague (vi. 16, 17), and Tobit from his blindness (xi. 7, 8). In the book of Enoch he appears as "the angel of the spirits of men" (xx. 3; comp. Dillmann, *ad loc.*). His symbolic character in the apocryphal narrative is clearly indicated when he describes himself as "Azarias the son of Ananias" (Tob. v. 12), the messenger of the Lord's help, springing from the Lord's mercy. [TOBIT.] The name occurs in 1 Chr. xvi. 7 as a simple proper name. [REPHAEL.] [B. F. W.]

**RAPHA'IM** (רָפָאִים = רָפָאִים, *Raphaim*, *Raphaim*). The name of an ancestor of Judith (Jud. viii. 1). In some MSS. this name, with three others, is omitted. [B. F. W.]

**RAPHON** (רָפֹון; Alex. and Joseph, *Ṛaphon*; Pesh. رَافون; *Raphon*). A city of Gilead, under the walls of which Judas Maccabaeus defeated Timotheus (1 Macc. v. 37 only). It appears to have stood on the eastern side of an important wady, and at no great distance from Carnaim—probably Ashteroth-Karnaim. It may have been identical with *Raphana*, which is mentioned by Pliny (*N. H.* v. 16) as one of the cities of the Decapolis, but with no specification of its position. Nor is there any thing in the narrative of 1 Macc., or 2 Macc. (xii.),

or of Josephus (*Ant.* xii. 8, §5), to enable us to decide whether the torrent in question is the *Barzuz*, the *Zurka*, or any other.

In Kiepert's map accompanying Wetstein's *Itinerarum*, &c. (1869), a place named *Er-Rāfe* is marked on the east of *Wady Hér*, one of the branches of the *Wady Mandhur*, and close to the great road leading to *Suamein*, which last has some claims to be identified with Ashteroth Carnaim. But in our present ignorance of the district this can only be taken as mere conjecture. If *Er-Rāfe* be *Raphana* we should expect to find large ruins. [G.]

**RA'PHU** (רָפְחִי; *Ṛaphū*: *Raphu*). The father of Palti, the spy selected from the tribe of Benjamin (Num. xiii. 9).

**RASSES, CHILDREN OF** (ῥάσας; *Rassas*: *Tharsis*). One of the nations whose country was ravaged by Holofernes in his approach to Jaba (Jud. ii. 23 only). They are named next to Lid (Lydia), and apparently south thereof. The old Latin version reads *Tharsus et Rassas*, with which the Peshito was probably in agreement before the present corruption of its text. Wolff (*Lex. Real. Judith*, 1861, pp. 95, 96) restores the original Chaldean text of the passage as *Tharsus et Rassas*, and compares the latter name with *Rhosus*, a place in the Gulf of Susus, between the *Ras el-Nahar* (Rhossicus scopulus) and *Iskenderia*, or *Alexandretta*. If the above restoration of the original text is correct, the interchange of *Menbach* and *Rassas*, as connected with *Thar* or *Thiras* (see Gen. x. 1), is very remarkable; since if *Menbach* be the original of *Muscovy*, *Rassas* can hardly be other than that of *Russia*. [ROST.] [G.]

**RATHUMUS** (ῥάθυμος; Alex. *Rathumus*, *Rathumus*). "Rathumus the story writer" (1 Est. ii. 18, 17, 25, 30, is the same as "Rathumus the chancellor" of Est. iv. 8, 9, 17, 23).

**RAVEN** (עֹרֵב, *ʾōrēb*; *corvus*), the well-known bird of that name which is mentioned in various passages in the Bible. There is no doubt that the Heb. *ʾōrēb* is correctly translated, the old versions agreeing on the point, and the etymology from a root signifying "to be black," favouring the rendering. A raven was sent out by Noah from the ark to see whether the waters were abated (Gen. viii. 7). This bird was not allowed as food by the Mosaic law (Lev. xi. 15); the word *ʾōrēb* is doubtless used in a generic sense, and includes other species of the genus *Corvus*, such as the crow (*C. corone*), and the hooded crow (*C. cornix*). Ravens were the messengers under the Divine command, supporting the prophet Elijah at the brook Cherith (1 K. xvii. 4, 6). They are expressly mentioned as instances of God's protecting love and goodness (Job xixviii. 41, Luke xii. 24, Ps. cxlvi. 9). They are enumerated with the owl, the bat, &c., as marking the desolation of Edom (Is. xxxiv. 11). "The locks of the beloved" are compared to the glossy blackness of the raven's plumage (Cant. v. 11). The raven's carnivorous habits, and especially his readiness to attack the eye, are alluded to in Prov. xxx. 17.

The LXX. and Vulg. differ materially from the Hebrew and our Authorised Version in Gen. viii. 7 for whereas in the Hebrew we read "that the raven went forth to and fro [from the ark] until the waters were dried up," in the two old versions names above, together with the Syriac, the most

is represented as "not returning until the water was dried from off the earth." On this subject the reader may refer to Houbigant (*Not. Crit.* i. 12), Bochart (*Hieroz.* ii. 801), Rosenmüller (*Schol. in V. T.*), Kalisch (*Genesis*), and Patrick (*Commentary*), who shows the manifest incorrectness of the LXX. in representing the raven as keeping away from the ark while the waters lasted, but as returning to it when they were dried up. The expression "to and fro" clearly proves that the raven must have returned to the ark at intervals. The bird would doubtless have found food in the floating carcasses of the Deluge, but would require a more solid resting-place than they could afford.

The subject of Elijah's sustenance at Cherith by means of ravens has given occasion to much fanciful speculation. It has been attempted to shew that the '*orebim*' ("ravens") were the people of Orbo, a small town near Cherith; this theory has been well answered by Reland (*Palæst.* ii. 913). Others have found in the ravens merely merchants; while Michaelis has attempted to shew that Elijah merely plundered the ravens' nests of hares and other game! Keil (*Comment.* in *K.* xvii.) makes the following just observation: "The text knows nothing of bird-catching and nest-robbing, but acknowledges the Lord and Creator of the creatures, who *commanded* the ravens to provide His servant with bread and flesh."

Jewish and Arabian writers tell strange stories of this bird and its cruelty to its young; hence, say some, the Lord's express care for the young ravens, after they had been driven out of the nests by the parent birds; but this belief in the raven's want of affection to its young is entirely without foundation. To the fact of the raven being a common bird in Palestine, and to its habit of flying restlessly about in constant search for food to satisfy its voracious appetite, may perhaps be traced the reason for its being selected by our Lord and the inspired writers as the especial object of God's providing care. The raven belongs to the order *Insessores*, family *Corvidae*. [W. H.]

**RA'ZIS** ('Pa'els: *Rarias*). "One of the elders of Jerusalem," who killed himself under peculiarly terrible circumstances, that he might not fall "into the hands of the wicked" (2 Macc. xiv. 37-46). In dying he is reported to have expressed his faith in a resurrection (ver. 46)—a belief elsewhere characteristic of the Maccabean canon. This act of suicide, which was wholly alien to the spirit of the Jewish law and people (Ewald, *Altarth.* 198; John viii. 22; comp. Grot. *De Jure Belli*, II. xix. 5), has been the subject of considerable discussion. It was quoted by the Donatists as the single fact in Scripture which supported their fanatical contempt of life (Aug. *Ep.* 104, 6). Augustine denies the fitness of the model, and condemns the deed as that of a man "non eligendae mortis sapiens, sed ferendae humilitatis impatiens" (Aug. *l. c.*; comp. *c. Gaul.* i. 36-39). At a later time the favour with which the writer of 2 Macc. views the conduct of Razis—a fact which Augustine vainly denies—was urged rightly by Protestant writers as an argument against the inspiration of the book. Indeed the whole narrative breathes the spirit of pagan heroism, or of the later zealots (comp. *Jos. B. J.* iii. 7. iv. 1, §10), and

- 1. מורה; *oidepos, eúpos; noracula, ferrum*: from  
מרה, "sweep," or "sweep." (Gesenius connects it with  
the oct רדא, "to four" (Thes. 319)

the deaths of Samson and Saul offer no satisfactory parallel (comp. Grimm, *ad loc.*). [B. F. W.]

**RAZOR.\*** Besides other usages, the practice of shaving the head after the completion of a vow, must have created among the Jews a necessity for the special trade of a barber (Num. vi. 9, 18, viii. 7; Lev. xiv. 8; Judg. xiii. 5; Is. vii. 20; Es. v. 1; Acts xviii. 18). The instruments of his work were probably, as in modern times, the razor, the basin, the mirror, and perhaps also the scissors, such as are described by Lucian (*Adv. Indoct.* p. 395, vol. ii. ed. Amst.; see 2 Sam. xiv. 26). The process of Oriental shaving, and especially of the head, is minutely described by Chardin (*Voy.* iv. 144). It may be remarked that, like the Levites, the Egyptian priests were accustomed to shave their whole bodies (Her. ii. 36, 37). [H. W. P.]

**REĀ'Ī'A** (רֵאִי'א: *Ῥῆα*: *Reia*). A Reubenite, son of Micah, and apparently prince of his tribe (1 Chr. v. 5). The name is identical with

BEAI'AH (בְּעִי'אֵחַ): 'Pdā; Alex. 'Peīd: *Raīa*).  
1. A descendant of Shubal, the son of Judah (1 Chr. iv. 2).

2. ('Païd, Exr.; 'Paaïd, Neh.: *Raāfa*.) The children of Reniah were a family of Nethinim who returned from Babylon with Zerubbabel (Exr. i. 47; Neh. vii. 50). The name appears as AIRUS in 1 Esd. v. 31.

RE'BA (רְבָּא: 'Poḥa in Num., 'Poḥ in Josh.: *Rebe*). One of the five kings of the Midianites slain by the children of Israel in their avenging expedition, when Balaam fell (Num. xxxi. 8; Josh. xiii. 21). The different equivalents for the name in the LXX. of Numbers and Joshua seem to indicate that these books were not translated by the same hand.

**REBEC'CA** (Ῥεβέκκα: *Rebecca*). The Greek form of the name **РЕВΕΚΑΗ** (Rom. ix. 10 only).

**REBEK'AH** (רִבְקָה, i. e. Ribkah: רִבְקָה: *Rebecca*), daughter of Bethuel (Gen. xxii. 23) and sister of Laban, married to Isaac, who stood in the relation of a first cousin to her father and to Lot. She is first presented to us in the account of the mission of Eliezer to Padan-aram (Gen. xxiv.), in which his interview with Rebekah, her consent and marriage, are related. The whole chapter has been pointed out as uniting most of the circumstances of a pattern-marriage. The sanction of parents, the guidance of God, the domestic occupation of Rebekah, her beauty, courteous kindness, willing consent and modesty, and success in retaining her husband's love. For nineteen years she was childless: then, after the prayers of Isaac and her journey to inquire of the Lord, Esau and Jacob were born, and while the younger was more particularly the companion and favourite of his mother (xv. 19-28) the elder became a grief of mind to her (xvi. 35). When Isaac was driven by a famine into the lawless country of the Philistines, Rebekah's beauty became, as was apprehended, a source of danger to her husband. But Abimelech was restrained by a sense of justice such as the conduct of his predecessor (xx.) in the case of Sarah would not lead Isaac to expect. It was probably a considerable time afterwards when Rebekah suggested the deceit that was

2.  $\psi_A$ ;  $\rho_{\text{oufais}}$ ;  $\psi_{\text{adime}}$ .

3. **גָּבִי**; *goubi*; *goubi* (2 Sam. xx. 8). In the Syriac V. of 2 Sam. xx. 8, *gubbi* is "a razor" (Gen. p. 287).

practised by Jacob on his blind father. She directed and aided him in carrying it out, foresaw the probable consequence of Esau's anger, and prevented it by moving Isaac to send Jacob away to Padan-aram (xxvii.) to her own kindred (xxix. 12). The Targum Pseudojon. states (Gen. xxiv. 8) that the news of her death was brought to Jacob at Allon-bachuth. It has been conjectured that she died during his sojourn in Padan-aram; for her nurse appears to have left Isaac's dwelling and gone back to Padan-aram before that period (compare xxiv. 59 and xxv. 8), and Rebekah is not mentioned when Jacob returns to his father, nor do we hear of her burial till it is incidentally mentioned by Jacob on his deathbed (xlix. 31).

St. Paul (Rom. ix. 10) refers to her as being made acquainted with the purpose of God regarding her children before they were born.

For comments on the whole history of Rebekah, see Origen, *Hom. in Gen. x. and xii.*; Chrysostom, *Hom. in Genesim*, 48-54. Rebekah's inquiry of God, and the answer given to her, are discussed by Deyling, *Obser. Sac.* i. 12, p. 53 seq., and in an essay by J. A. Schmid in *Nov. Thes. Theol.-Philolog.* i. 188.

[W. T. B.]

RE'CHAB (רֶכָב) = "the horseman," from רָכַב, *rdab*, "to ride": רֶכָבִים (*Rechab*). Three persons bearing this name are mentioned in the O. T.

1. The father or ancestor of Jehonadab (2 K. x. 15, 23; 1 Chr. ii. 55; Jer. xxiv. 6-19), identified by some writers, but conjecturally only, with Hobab (Arius Montanus on Judg. i.; Sanctius, quoted by Calmet, *Diss. sur les Rechabites*). [RECHABITES.]

2. One of the two "captains of bands" (ἡγούμενοι σωστρεμμάτων, *principes latronum*), whom Ishbosheth took into his service, and who, when his cause was failing, conspired to murder him (2 Sam. iv. 23). Josephus (*Ant.* vii. 2, §1) calls him *Θάβρος*, [BAABAH; ISHBOSETH, vol. i. p. 891.]

3. The father of Malchiah, ruler of part of Beth-haccerem (Neh. iii. 14), named as repairing the dung-gate in the fortifications of Jerusalem under Nehemiah.

[E. H. P.]

RECHABITES (רֶכָבִים: Ῥεχαβίται, Ῥεχαβίται: *Rechabites*). The tribe thus named appears before us in one memorable scene. Their history before and after it lies in some obscurity. We are left to search out and combine some scattered notices, and to get from them what light we can.

(I.) In 1 Chr. ii. 55, the house of Rechab is identified with a section of the Kenites, who came into Canaan with the Israelites and retained their nomadic habits, and the name of Hammath is mentioned as the patriarch of the whole tribe. [KENITES: HEMATH.] It has been inferred from this passage that the descendants of Rechab belonged to a branch of the Kenites settled near the first at Jabez in Judah. [JEHONADAB.] The fact, however, that Jehonadab took an active part in the revolution which placed Jehu on the throne, seems to indicate that he and his tribe belonged to Israel rather than to Judah, and the late date of 1 Chr., taken together with other facts (*infra*), makes it more probable that this passage refers to the locality occupied by the Rechabites after their return from the captivity.\* Of Rechab himself nothing is known.

\* In confirmation of this view, it may be noticed that the "shearing-house" of 2 K. x. 14 was probably the known

He may have been the father, he may have been the remote ancestor of Jehonadab. The meaning of the word makes it probable enough that it was an epithet passing into a proper name. It may have pointed, as in the robber-chief of 2 Sam. iv. 2, to a conspicuous form of the wild Bedouin life, and Jehonadab, the son of the *Kider*, may have been, in part at least, for that reason, the companion and friend of the fierce captain of Israel who drove it with the fury of madness (2 K. ix. 29).

Another conjecture as to the meaning of the name is ingenious enough to merit a disavowal from the forgotten learning of the sixteenth century. Boulduc (*De Eccles. ante Leg.* iii. 19) refers from 2 K. ii. 12, xiii. 14, that the two great prophets Elijah and Elisha were known, each of them, in his time, as the chariot (רֶכָב, *Rechab*) of Israel, i. e. its strength and protection. He infers from this that the special disciples of the prophets, who followed them in all their austerity, were known as the "sons of the chariot," *Fili Recab*, and that afterwards, when the original meaning had been lost sight of, this was taken as a patronymic, and referred to an unknown Rechab. At present, of course, the different vowel-points of the two words are sufficiently distinctive; but the strange reading of the LXX. in Judg. i. 19 (Ῥεχαβίται *Rechabites* *abrois*, where the A. V. has "because they had chariots of iron") shows that one word might easily enough be taken for the other. Apart from the evidence of the name, and the obvious probability of the fact, we have the statement (*infra* quantum) of John of Jerusalem that Jehonadab was a disciple of Elisha (*De Testif. Memor.* c. 10).

(II.) The personal history of JEHONADAB has been dealt with elsewhere. Here we have to notice the new character which he impressed on the tribe, of which he was the head. As his name, by descent, and the part which he played indicate, he and his people had all along been worshippers of Jehorah, circumcised, and so within the number of Abraham, though not reckoned as belonging to Israel, and probably therefore not considering themselves bound by the Mosaic law and ritual. The worship of Baal introduced by Jemabel and Abi was accordingly not less offensive to them than to the Israelites. The luxury and licence of Phœnician cities threatened the destruction of the simplicity of their nomadic life (Amos ii. 7, 8, vi. 4-6). A protest was needed against both evils, and so in the case of Elijah, and of the Nazarenes of Amos ii. 11, it took the form of asceticism. There was to be a more rigid abstinence than even to the old Arab life. What had been a traditional habit, was enforced by a solemn command from the chief and prophet of the tribe, the destroyer of idleness, which no one dared to transgress. They were to drink no wine, nor build houses, nor sow seed, nor plant vineyard, nor have any. All their days they were to dwell in tents, as remembering that they were strangers in the land (Jer. xlii. 4, 7). This was to be the condition of their retaining a distinct tribal existence. For two centuries and a half they adhered faithfully to this rule; but we have no record of any part taken by them in the history of the period. We may think of them as presenting the same picture which other tribes, pursuing the nomadic life with religious austerity, have presented in later periods.

recognition of the nomadic tribe of the Kenites, was the flock of sheep. [SHEPHERDS: KENITES.]

The Nabatheans, of whom Diodorus Siculus speaks (xix. 94) as neither sowing seed, nor planting fruit-trees, nor using nor building house, and enforcing these transmitted customs under pain of death, give us one striking instance.<sup>b</sup> Another is found in the prohibition of wine by Mahomet (Sale's *Koran*, *Prelim. Diss.* §5). A yet more interesting parallel is found in the rapid growth of the sect of the Wahabys during the last and present centuries. Abd-ul-Wahab, from whom the sect takes its name, reproduces the old type of character in all its completeness. Anxious to protect his countrymen from the revolting vices of the Turks, as Jehonadab had been to protect the Kenites from the like vices of the Phoenicians, the Bedouin reformer felt the necessity of returning to the old austerity of Arab life. What wine had been to the earlier preacher of righteousness, the outward sign and incentive of a fatal corruption, opium and tobacco were to the later prophet, and, as such, were rigidly proscribed. The rapidity with which the Wahabys became a formidable party, the Puritans of Islam, presents a striking analogy to the strong political influence of Jehonadab in 2 K. x. 15, 23 (comp. Burckhardt, *Bedouins and Wahabys*, p. 283, &c.).

(III.) The invasion of Judah by Nebuchadnezzar in B.C. 607, drove the Rechabites from their tents. Possibly some of the previous periods of danger may have led to their settling within the limits of the territory of Judah. Some inferences may be safely drawn from the facts of Jer. xxxv. The names of the Rechabites show that they continued to be worshippers of Jehovah. They are already known to the prophet. One of them (ver. 3) bears the same name. Their rigid Nazarite life gained for them admission into the house of the Lord, into one of the chambers assigned to priests and Levites, within its precincts. They were received by the sons or followers of a "man of God," a prophet or devotee, of special sanctity (ver. 4). Here they are tempted and are proof against the temptation, and their steadfastness is turned into a reproof for the unfaithfulness of Judah and Jerusalem. [JEREMIAH.] The history of this trial ends with a special blessing, the full import of which has, for the most part, not been adequately apprehended: "Jonadab, the son of Rechab, shall not want a man to stand before me for ever" (ver. 19). Whether we look on this as the utterance of a true prophet, or as a *uticinium ex eventu*, we should hardly expect at this precise point to lose sight altogether of those of whom they were spoken, even if the words pointed only to the perpetuation of the name and tribe. They have, however, a higher meaning. The words "to stand before me" (עֲמֹד לְפָנַי), are

essentially liturgical. The tribe of Levi is chosen to "stand before" the Lord (Deut. x. 8, xviii. 5, 7). In Gen. xviii. 22; Judg. xx. 28; Ps. cxxiv. 1; Jer. xv. 19, the liturgical meaning is equally prominent and unmistakable (comp. Gesen. *Thes.* s. v.; Grotius in loc.). The fact that this meaning is given ("ministering before me") in the Targum of Jonathan, is evidence (1) as to the received meaning of the phrase; (2) that this rendering did not shock the feelings of studious and devout Rabbis in Our Lord's time; (3) that it was at least probable, that there existed representatives of the Rechabites connected with the Temple services in the time of Jonathan. This then, was the extent of the new blessing. The Rechabites were solemnly adopted into the families of Israel, and were recognised as incorporated into the tribe of Levi.<sup>c</sup> Their purity, their faithfulness, their consecrated life gained for them, as it gained for other Nazaries that honour (comp. PRIESTS). In Lam. iv. 7, we may perhaps trace a reference to the Rechabites, who had been the most conspicuous examples of the Nazarite life in the prophet's time, and most the object of his admiration.

(IV.) It remains for us to see whether there are any traces of their after-history in the Biblical or later writers. It is believed that there are such traces, and that they confirm the statements made in the previous paragraph.

(1.) We have the singular heading of the Ps. lxxi. in the LXX. version (τῷ Δαυὶδ, υἱῷ Ἰωνάδᾶβ, καὶ τῶν πρώτων αἰχμαλωτισθέντων), evidence, of course, of a corresponding Hebrew title in the 3rd century B.C., and indicating that the "sons of Jonadab" shared the captivity of Israel, and took their place among the Levite psalmists who gave expression to the sorrows of the people.<sup>d</sup>

(2.) There is the significant mention of a son of Rechab in Neh. iii. 14, as co-operating with the priests, Levites, and princes in the restoration of the wall of Jerusalem.

(3.) The mention of the house of Rechab in 1 Chr. ii. 55, though not without difficulty, points, there can be little doubt, to the same conclusion. The Rechabites have become Scribes (סֹפְרִים, *Sopherim*). They give themselves to a calling which, at the time of the return from Babylon was chiefly if not exclusively, in the hands of Levites. The other names (TIRATHITES, SHIMEATHITES, and SUCHATHITES in A. V.) seem to add nothing to our knowledge. The Vulg. rendering, however (evidence of a traditional Jewish interpretation in the time of Jerome), gives a translation based on etymologies, more or less accurate, of the proper names, which strikingly confirms the view now taken. "Cognationes quoque Scribarum habitantium in Jabez, canentes atque resonantes, et in way as the Nethinim (Calmet, *Diss. sur les Rechab.* in Comm. vi. p. xviii. 1726). Serrarius (*Trüben* &c.) identifies them with the Essenes; Scaliger (*l. c.*) with the Chasidim, in whose name the priests offered special daily sacrifices and who, in this way, were "standing before the Lord" continually.

<sup>d</sup> Neither Ewald, nor Hengstenberg, nor De Wette, notice this inscription. Ewald, however, refers the Psalm to the time of the captivity. Hengstenberg, who asserts its Davidic authorship, indicates an alphabetic relation between Ps. lxxi. and Ps. lxx., which is at least presumptive evidence of a later origin, and points, with some fair probability, to Jeremiah as the writer. (Comp. LAMENTATIONS.) It is noticed, however, by Augustine (*AUGUSTINE* in Ps. lxx. §2) and is referred by him to the Rechabites of Jer. xxxv.

<sup>b</sup> The fact that the Nabatheans habitually drank "wild honey" (μέλι ἄγριον) mixed with water (Diod. Sic. xix. 94), and that the Bedouins as habitually still make locusts an article of food (Burckhardt, *Bedouins*, p. 270), shews very strongly that the Haphtai's life was fashioned after the Rechabite as well as the Nazarite type.

<sup>c</sup> It may be worth while to refer to a few authorities agreeing in the general interpretation here given, though differing as to details. Vatablus (*Trif. Sac.* in loc.) mentions a Jewish tradition (R. Judah, as cited by Kimchi; comp. Scaliger, *Alenck. Prælects. Serrarius*, p. 26) that the daughters of the Rechabites married Levites, and that thus their children came to minister in the Temple. Clarius (*ibid.*) conjectures that the Rechabites themselves were chosen to sit in the great Council. Sanctius and Calmet suppose them to have ministered in the same

tabernaculis comorantes."\* Thus interpreted, the passage points to a resumption of the outward form of their old life and its union with their new functions. It deserves notice also that while in 1 Chr. a. 54, 55, the Rechabites and Netophathites are mentioned in close connexion, the "sons of the singers" in Neh. xii. 28 appear as coming in large numbers from the villages of the same Netophathites. The close juxtaposition of the Rechabites with the descendants of David in 1 Chr. iii. 1, shows also in how honourable an esteem they were held at the time when that book was compiled.

(4.) The account of the martyrdom of James the Just given by Hegesippus (Eus. *H. E.* ii. 23) brings the name of the Rechabites once more before us, and in a very strange connexion. While the Scribes and Pharisees were stoning him, "one of the priests of the sons of Rechab, the son of Rechabim, who are mentioned by Jeremiah the prophet," cried out, protesting against the crime. Dr. Stanley (*Sermons and Essays on the Apostolic Age*, p. 333), struck with the seeming anomaly of a priest, "not only not of Levitical, but not even of Jewish descent," supposes the name to have been used loosely as indicating the abstemious life of James and other Nazarites, and points to the fact that Epiphanius (*Haer.* lxxviii. 14) ascribes to Symeon the brother of James the words which Hegesippus puts into the mouth of the Rechabite, as a proof that it denoted merely the Nazarite form of life. Calmet (*Diss. sur les Rechab.* l. c.) supposes the man to have been one of the Rechabite Nethinim, whom the informant of Hegesippus took, in his ignorance, for a priest. The view which has been here taken presents, it is believed, a more satisfactory solution. It was hardly possible that a writer like Hegesippus, living at a time when the details of the Temple-services were fresh in the memories of men, should have thus spoken of the Rechabim unless there had been a body of men to whom the name was commonly applied. He uses it as a man would do to whom it was familiar, without being struck by any apparent or real anomaly. The Targum of Jonathan on Jer. xxxv. 19, indicates, as has been noticed, the same fact. We may accept Hegesippus therefore as an additional witness to the existence of the Rechabites as a recognized body up to the destruction of Jerusalem, sharing in the ritual of the Temple, partly descended from the old "sons of Jonadab," partly recruited by the incorporation into their ranks of men devoting themselves, as did James and Symeon, to the same consecrated life. The form of austere holiness presented in the life of Jonadab, and the blessing pronounced on his descendants, found their highest representatives in the two Brothers of The Lord.

(5.) Some later notices are not without interest. Benjamin of Tudela, in the 12th century (Edit. Asher, 1840, i. 112-114), mentions that near El Jular (= Pumbeditha) he found Jews who were named Rechabites. They tilled the ground, kept

\* The etymologies on which this version rests are, it must be confessed, somewhat doubtful. Scaliger (*Glanch. Trihaer. Serrae*, c. 23) rejects them with scorn. Pellican and Calmet, on the other hand, defend the Vulg. rendering, and Gill (*in loc.*) does not dispute it. Most modern interpreters follow the A. V. in taking the words as proper names.

flocks and herds, abstained from wine and meat, and gave liches to teachers who devoted themselves to studying the Law, and weeping for Jerusalem. They were 100,000 in number, and were governed by a prince, Salomon ben-Nasi, who traced his genealogy up to the house of David, and ruled over the city of Thema and Tadmor. A later traveller, Dr. Wolff, gives a yet stranger and more detailed report. The Jews of Jerusalem and Yemen told him that he would find the Rechabites of Jer. residing near Mecca (*Journal*, 1829, ii. 334). When he came near Senaa he came in contact with a tribe, the Beni-Khalil, who identified themselves with the sons of Jonadab. With one of them, Mousa, Wolff conversed, and reports the dialogue as follows: "I asked him, 'Whose descendants are you?' Mousa answered, 'Come, and I will show you,' and read from an Arabic Bible the words of Jer. xxv. 5-11. He then went on, 'Come, and you will find us 60,000 in number. You see the words of the Prophet have been fulfilled, Jonadab the son of Rechab shall not want a man to stand before me for ever'" (*ibid.* p. 335). In a later journal (*Journ.* 1839, p. 389) he mentions a second interview with Mousa, describes them as keeping strictly to the old rule, calls them now by the name of the B'nè-Arhab, and says that B'nè Israel of the tribe of Dan live with them. [E. H. F.]

**RE'CHAH** (רֶחָה; רֶחָה; Alex. *Prod.* *Recha*). In 1 Chr. iv. 12, Beth-raplia, Penuah, and Tehinnah the father, or founder, of Ir-chahab, as said to have been "the men of Rechab." In the Targum of R. Joseph they are called "the men of the great Saubedrin," the Targumist apparently reading רֶחָה.

**RECORDER** (סֹפֵר), an officer of high rank in the Jewish state, exercising the functions, not simply of an annalist, but of chancellor or president of the privy council. The title itself may perhaps have reference to his office as adviser of the king; at all events the notices prove that he was more than an annalist, though the superintendence of the records was without doubt entrusted to him. In David's court the recorder appears among the high officers of his household (2 Sam. viii. 16, ix. 24; 1 Chr. xviii. 15). In Solomon's, he is numbered with the three secretaries, and is mentioned last, probably as being their president (1 K. iv. 3). Under Hezekiah, the recorder, in conjunction with the prefect of the palace and the secretary, represented the king (2 K. xviii. 18, 37): the patronymic of the recorder at this time, Josh the son of Asaph, makes it probable that he was a Levite. Under Josiah the recorder, the secretary, and the governor of the city were entrusted with the superintendence of the repairs of the Temple (2 Chr. xxxiv. 8). These notices are sufficient to prove the high position held by him. [W. L. R.]

**RED-HEIFER.** [SIN-OFFERING, p. 1324.]

Signor Pierotti, has been read, since the above was in type, at the Cambridge Meeting of the British Association (October, 1862). He met with a tribe calling themselves by that name near the Dead Sea, about two miles E.R. from it. They had a Hebrew Bible, and said their prayers at the tomb of a Jewish Rabbi. They told him precisely the same stories as had been told to Wolff thirty years before.
